E. of Armenia and Syria, W. and N. W. of the great salt desert of Iran. Its greatest length was from N. to S., and in this direction it extended from the thirty-second to the fortieth parallel, a distance of 550 miles. In width it reached from about longitude 45° to 53°; but its average breadth was not more than from 250 to 300 miles. Its area may be reckoned at about 150,000 square miles, or three-fourths of that of modern France. It comprised the modern provinces of *Irak Ajami*, Persian *Kurdistan*, part of *Luristan*, *Azerbaijan*, perhaps *Talish* and *Ghilan*, but not *Mazanderan* or *Asterabad*. The division of Media commonly recognized by the Greeks and Romans was that into Media Magna, and Media Atropatene. 1. Media Atropatene (so named from the satrap Atropates, who became independent monarch of the province on the destruction of the Persian empire by Alexander, B. C. 330) corresponded nearly to the modern *Azerbaijan*, being the tract situated between the Caspian and the mountains which run north from Zagros, and consisting mainly of the rich and fertile basin of Lake *Urmieh* or *Oroomiah*, with the valleys of the *Aras* and the *Sefid Rud*. The ancient Atropatene may have included also the countries of *Ghilan* and *Talish*, together with the plain of *Moghan* at the mouth of the combined *Kur* and *Aras* rivers. 2. Media Magna (= *Great Media*) lay S. and E. of Atropatene. It contained great part of *Kurdistan* and *Luristan*, with all *Arddlan* and *Irak Ajami*. The character of this tract is very varied. It is indicative of the division, that there were two Ecbatanas—one, the northern, at *Takhti-Suleiman*; the other, the southern, at *Hamadan*, on the flanks of Mount Orontes (*Elwand*)—respectively the capitals of the two districts. (ECBATANA.) Next to the two Ecbatanas, the chief town in Media was undoubtedly Rhages—the *Raga* of the inscriptions. (RAGES.) The only other place of much note was Bagistana, the modern *Behistun* (PERSIANS, II. 1), which guarded the chief pass connecting Media with the Mesopotamian plain. MEDES.

Med'i-an = one from MEDIA. Darius, "the son of Ahasuerus, of the seed of the Medes" (Dan. ix. 1) or "the Mede" (xi. 1) is thus described in Dan. v. 31.

\* Med'i-a-tor (L.), the A. V. translation of Gr. *mesitēs* = a go-between, mediator, one who intervenes between two parties, Rbn., N. T. Lxx. It is applied to Moses as an interpreter or mere medium of communication between Jehovah and the Israelites (Gal. iii. 19, 20; compare Deut. v. 5). But JESUS CHRIST is a mediator in a higher sense, i. e. an intercessor or reconciler. He is the "one mediator between God and men" (1 Tim. ii. 5), "the mediator of the new covenant" (Heb. xii. 24, viii. 6), or "of the N. T." (ix. 15), because He "gave Himself a ransom for all" (1 Tim. ii. 6), so that now "being justified by FAITH, we have peace with God through our Lord Jesus Christ, by whom also we have access by faith into this grace wherein we stand, and rejoice in hope of the glory of God" (Rom. v. 1, 2). ATONEMENT; JUSTIFICATION; SAVIOUR; SON OF GOD; SON OF MAN.

Med'i-cine [med'e-sin] (fr. L.). 1. Next to care for food, clothing, and shelter, the curing of hurts takes precedence even among savage nations. At a later period comes the treatment of sickness, and recognition of states of disease; and these mark a nascent civilization. From the most ancient testimonies, sacred and secular, EGYPT was foremost among the nations in this most human of studies purely physi-

cal (so Mr. Hayman, the original author of this article). Egypt was the earliest home of medical and other skill for the region of the Mediterranean basin, and every Egyptian mummy of the more expensive and elaborate sort, involved a process of anatomy. (EMBALMING.) Still we have no trace of any philosophical or rational system of Egyptian origin; and medicine in Egypt was a mere art or profession. Of science the Asclepiadæ of Greece (i. e. the reputed *descendants of Esculapius*, the god of the healing art) were the true originators. Hippocrates, who wrote a book on "Ancient Medicine," and who seems to have had many opportunities of access to foreign sources, gives no prominence to Egypt. Compared with the wild countries around them, at any rate, the Egyptians must have seemed incalculably advanced. Representations of early Egyptian surgery apparently occur on some of the monuments of Beni-Hassan. Flint knives used for embalming have been recovered—the "Ethiopic stone" of Herodotus (ii. 86; compare Ex. iv. 25) was probably either black flint or agate (KNIFE); and those who have assisted at the opening of a mummy have noticed that the teeth exhibited a dentistry not inferior in execution to the work of the best modern experts. This confirms the statement of Herodotus that every part of the body was studied by a distinct practitioner. Pliny asserts that the Egyptians claimed the invention of the healing art, and thinks them subject to many diseases. Their "many medicines" are mentioned (Jer. xlvii. 11). Athothmes II., king of the country, is said to have written on the subject of anatomy. The various recipes known to have been beneficial were recorded, with their peculiar cases, in the memoirs of physic, inscribed among the laws, and deposited in the principal temples of the place (Wilkinson, iii. 396, 397). The reputation of its practitioners in historical times was such that both Cyrus and Darius sent to Egypt for physicians or surgeons. Of midwifery we have a distinct notice (Ex. i. 15), and of women as its practitioners, which fact may also be verified from the sculptures. The physicians had salaries from the public treasury, and treated always according to established precedents, or deviated from these at their peril, in case of a fatal termination; if, however, the patient died under accredited treatment, no blame was attached. The Egyptians who lived in the corn-growing region are said by Herodotus (ii. 77) to have been specially attentive to health. The practice of circumcision is traceable on monuments certainly anterior to the age of Joseph. Its beneficial effects in the temperature of Egypt and Syria have often been noticed, especially as a preservative of cleanliness, &c. The scrupulous attention paid to the dead was favorable to the health of the living. It appears that the Ptolemies themselves practised dissection, and that, at a period, when Jewish intercourse with Egypt was complete and reciprocal, there existed in Alexandria a great zeal for anatomical study. In comparing the growth of medicine in the rest of the ancient world, the high rank of its practitioners—princes and heroes—settles at once the question as to the esteem in which it was held in the Homeric and pre-Homeric period. To descend to the historical, the story of Democedes, a Greek physician, who, having been taken captive, acquired great riches and reputation at the court of Darius, illustrates the practice of Greek surgery before the period of Hippocrates. The Dogmatic school was founded after the time of Hippocrates by his dis-

ciples, who departed from his eminently practical and inductive method, and recognized hidden causes of health or sickness arising from certain supposed principles or elements of bodies. The empirical school, which arose in the third century B. C. under the guidance of Acron of Agrigentum, Serapion of Alexandria, and Philinus of Cos, waited for the symptoms of every case, disregarding the rules of practice based on dogmatic principles. This school was opposed by the Methodic, which had arisen under the leading of Themison of Laodicea, about the period of Pompey the Great. Asclepiades, a native of Bithynia, who came to Rome shortly before Cicero's time, paved the way for the "method" in question, finding a theoretic basis in the corpuscular or atomic theory of physics which he borrowed from Heraclides of Pontus. He was a transitional link between the Dogmatic and Empiric schools, and this later or Methodic, which sought to rescue medicine from the bewildering mass of particulars in which empiricism had plunged it. All these schools may have contributed to form the medical opinions current at the period of the N. T., and the two earlier among them may have influenced Rabbinical teaching on that subject at a much earlier period.—II. Having thus described the external influences which, if any, had probably the most to do in forming the medical practice of the Hebrews, we may trace next its internal growth. The cabalistic legends mix up the names of Shem and Heber in their fables about healing, and ascribe to those patriarchs a knowledge of simples and rare roots, with, of course, magic spells and occult powers. So to Abraham is ascribed a talisman, the touch of which healed all disease. (AMULETS.) The only notices which Scripture affords in connection with the subject are the cases of difficult midwifery in the successive households of Isaac, Jacob, and Judah (Gen. xxv. 26, xxxv. 17, xxxviii. 27), and so, later, in that of Phinehas (1 Sam. iv. 19). (MIDWIFE.) The traditional value ascribed to the MAXIMAE relates to the same branch of natural medicine; but throughout this period occurs no trace of any attempt to study, digest, and systematize the subject. As Israel grew and multiplied in Egypt, they derived doubtless a large mental cultivation from their position until cruel policy turned it into bondage. But, if we add it Egyptian learning as an ingredient, we should also notice how far the standard of the whole Jewish legislative fabric is exalted above that, in its exemption from the blemishes of sorcery and juggling pretences. We have no occult practices reserved in the hands of the sacred caste. (PRIEST.) Nor was the practice of physic a privilege of the Jewish priesthood. Any one might practise it, and this publicity must have kept it pure. Nay, there was no scriptural bar to its practice by resident aliens. We read of "physicians," "healing," &c., in Ex. xxi. 19; 2 K. viii. 29; 2 Chr. xvi. 12; Jer. viii. 22. At the same time the greater leisure of the LEVITES and their other advantages would make them the students of the nation, as a rule, in all science, and their constant residence in cities would give them the opportunity, if carried out in fact, of a far wider field of observation. The reign of peace of SOLOMON'S days must have opened, especially with renewed Egyptian intercourse, new facilities for the study. He himself seems to have included in his favorite natural history some knowledge of the medicinal uses of the creatures. His works show him conversant with the notion of remedial treatment (Prov. iii. 8,

vi. 15, xii. 18, xvii. 22, xx. 30, xxix. 1; Eccl. iii. 8); and one passage (Eccl. xii.; see below) indicates considerable knowledge of anatomy. His repute in magic is the universal theme of Eastern story. The dealings of various prophets with quasi-medical agency cannot be regarded as other than the mere accidental form which their miraculous gifts took (1 K. xiii. 6, xiv. 12, xvii. 17; 2 K. i. 4, xx. 7; Is. xxxviii. 21). Jewish tradition has invested Elisha, it would seem, with a function more largely medicinal than that of the other servants of God; but the Scriptural evidence on the point is scanty, save that he appears to have known the proper means to heal the waters and temper the noxious pottage (2 K. ii. 21, iv. 39-41). The sickness of BEN-HADAD 2 is certainly so described as to imply treachery on the part of HAZAEL (2 K. viii. 15). Yet the observation of Bruce, upon a cold-water cure practised among the people near the Red Sea, has suggested a view somewhat different. The bed-clothes are soaked with cold water, and kept thoroughly wet, and the patient drinks cold water freely. But the crisis, it seems, occurs on the third day, and not till the fifth is it there usual to apply this treatment. If the chamberlain, through carelessness, ignorance, or treachery, precipitated the application, a fatal issue may have suddenly resulted. The statement that King ASA (2 Chr. xvi. 12) "sought *not* to Jehovah *but* to the physicians," may seem to countenance the notion that a rivalry of actual worship, based on some medical fancies, had been set up. (SERPENT, BRAZEN.) The captivity at Babylon brought the Jews in contact with a new sphere of thought. We know too little of the precise state of medicine in Babylon, Susa, and the "cities of the Medes," to determine the direction in which the impulse so derived would have led the exiles. The book of ECCLESIASTICS shows the increased regard given to the distinct study of medicine, by the repeated mention of physicians, &c. The wisdom of prevention is recognized in Ecclus. xviii. 13, perhaps also in x. 10. Rank and honor are said to be the portion of the physician, and his office to be from the Lord (xxxviii. 1, 3, 12). The repeated allusions to sickness in vii. 35, xxx. 17, xxxi. 22, xxxvii. 30, xxxviii. 9, coupled with the former recognition of merit, have caused some to suppose that this author was himself a physician. In Wis. xvi. 12, a PLASTER is spoken of; anointing, as a means of healing, in Tob. vi. 8. In the period of the N. T., ST. LUKE, "the beloved physician," who practised at Antioch (so Mr. Hayman; Ewald supposes he resided at Troas), whilst the body was his care, could hardly have failed to be conversant with all the leading opinions current down to his own time. The medicine and surgery of St. Luke were probably not inferior to those commonly in demand among educated Asiatic Greeks, and must have been, as regards their basis, Greek and not Jewish. Without absolute certainty as to date, we seem to have a standard Gentile medical writer of that period in ARETEUS, commonly called "the Cappadocian," who wrote certainly after Nero's reign began, and probably flourished shortly before and after the decade (A. D. 60-70) in which St. Paul reached Rome and Jerusalem fell. If he were of St. Luke's age, it is striking that he should also be perhaps the only ancient medical authority in favor of demoniacal possession as a possible account of epilepsy. (DEMONIACS.) Assuming the date above indicated, he may be taken as expounding the medical practice of the Asiatic Greeks in the latter half of the first

century. There is, however, much of strongly-marked individuality in his work, more especially in the minute verbal portraiture of disease. As the general science of medicine and surgery of this period may be represented by ARETEUS, so we have nearly a representation of its *Materia Medica* by Dioscorides, whose researches display an industry and skill which has remained the marvel of all subsequent commentators. He, too, was of the same general region—a Cilician Greek—and his first lessons were probably learned at Tarsus. He has usually been assigned to the end of the first or beginning of the second century.—Before proceeding to the examination of diseases in detail, it may be well to observe that the question of identity, between any ancient malady known by description and any modern one known by experience, is often doubtful. Some diseases, just as some plants and some animals, will exist almost anywhere; others can only be produced within narrow limits depending on the conditions of climate, habit, &c. Eruptive diseases of the acute kind are more prevalent in the East than in colder climes. They also run their course more rapidly. Disease of various kinds is commonly regarded as a divine infliction, or denounced as a penalty for transgression; "the evil diseases of Egypt" (PLAGUES, THE TEN?) are especially so characterized (Gen. xxi. 18; Ex. xv. 26; Lev. xxvi. 16; Deut. vii. 15, xxviii. 60; 1 Cor. xi. 30); so the EMERODS of the Philistines (1 Sam. v. 6); the severe dysentery (2 Chr. xxi. 15, 19) of Jehoram, which was also epidemic; so the sudden deaths of Er, Onan (Gen. xxxviii. 7, 10), the Egyptian first-born (Ex. xi. 4, 5), Nabal, Hath-sheba's son, and Jeroboam's (1 Sam. xxv. 38; 2 Sam. xii. 15; 1 K. xiv. 1, 5), are ascribed to the action of Jehovah immediately, or through a prophet. Pestilence (Hab. iii. 5) attends His path (compare 2 Sam. xxiv. 15), and is innocuous to those whom He shelters (Ps. xci. 3-10). It is by Jeremiah, Ezekiel, and Amos associated (as historically in 2 Sam. xxiv. 13) with "the sword" and "famine" (Jer. xiv. 12, xv. 2, xxi. 7, 9, &c.; Ez. v. 12, 17, vi. 11, 12, &c.; Am. iv. 6, 10). The sicknesses of the widow's son of Zarephath, of Ahaziah, Ben-hadad, the leprosy of Uzziah, the boil of Hezekiah, are also noticed as diseases sent by Jehovah, or in which He interposed (1 K. xvii. 17, 20; 2 K. i. 8, xx. 1). In 2 Sam. iii. 29, disease is invoked as a curse, and in Solomon's prayer (1 K. viii. 37; compare 2 Chr. xx. 9), anticipated as a chastisement. Satanic agency appears also as procuring disease (Job ii. 7; Lk. xiii. 11, 16). Diseases are also mentioned as ordinary calamities (Gen. xlviii. 1; 1 Sam. xxx. 13; 2 K. iv. 20, viii. 7, 29, xiii. 14; 2 Chr. xxii. 6). Among special diseases named in the O. T. are, ophthalmia (Gen. xxix. 17), which is perhaps more common in Syria and Egypt than anywhere else in the world; especially in the fig season, the juice of the newly-ripe fruit having the power of giving it. It may occasion partial or total BLINDNESS (2 K. vi. 18). The eye-salve (Rev. iii. 18) was a remedy common to Orientals, Greeks, and Romans. Other diseases are—barrenness of women, which mandrakes were supposed to have the power of correcting (Gen. xx. 18; compare xxi. 17, xxx. 1, 2, 14-16)—"consumption," and several, the names of which are derived from various words, signifying to burn or to be hot (Lev. xxvi. 16; Deut. xxviii. 22; FEVER; FLUX, BLOOD). The "burning boil," or "of a boil" (Lev. xiii. 28), is again merely marked by the notion of an effect resembling that of fire, like our "civ-

buncle;" it may possibly find an equivalent in the Damascus boil of the present time. The "botch (*shēhin* or *shechin*) of Egypt" (Deut. xxviii. 27) may be the *Elephantiasis Græcorum* (see below); the plague, as known by its attendant *bubo*, has been suggested by Scheuchzer; but Mr. Hayman thinks it was more probably the foul ulcer mentioned by Aristæus. The same word is used to express the "boil" of Hezekiah. This was certainly a single locally-confined eruption, probably a carbuncle; Dr. Mead supposes it to have been a fever terminating in an abscess. The diseases rendered "scab" and "scurvy" in Lev. xxi. 20, xxii. 22, and Deut. xxviii. 27, may be almost any skin-disease. (ITCH.) Some of these may be said to approach the type of LEPROSY. The "issue" of xv. 19 may be profuse menstruation, or uterine hemorrhage from other causes. (BLOOD, ISSUE OF; ISSUE, RUNNING.) In Deut. xxviii. 35, is mentioned a disease attacking the "knees and legs," consisting in a "sore botch which cannot be healed," but extended, in the sequel of the verse, from the "sole of the foot to the top of the head." The latter part of the quotation would certainly accord with *Elephantiasis Græcorum*. On the other hand, a disease which affects the knees and legs, or more commonly one of them only—is by a mere accident of language known as *Elephantiasis Arabum*, *Buenemia Tropica*, or "Barbadoes Leg," from being well known in that island. The *Elephantiasis Græcorum* is what now passes under the name of "leprosy"—the lepers, e. g., of the huts near the Zion gate of modern Jerusalem are elephantiasiacs. It has been asserted that there are two kinds, one painful, the other painless; but as regards Syria and the East this is contradicted. There the parts affected are quite benumbed and lose sensation. It is classed as a tubercular disease, not confined to the skin, but pervading the tissues and destroying the bones. It is not confined to any age or either sex. It first appears in general, but not always, about the face, as an indurated nodule (hence it is improperly called tubercular), which gradually enlarges, inflames, and ulcerates. If a joint be attacked, the ulceration will go on till its destruction is complete, the joints of finger, toe, &c., dropping off one by one. If the face be the chief seat of the disease, it assumes a leonine aspect, loathsome and hideous; the skin becomes thick, rugose, and livid; the eyes are fierce and staring, and the hair generally falls off from all the parts affected. When the throat is attacked, the voice shares the affection, and sinks to a hoarse, husky whisper. These two symptoms are eminently characteristic. It is hereditary, and may be inoculated, but does not propagate itself by the closest contact. It has been asserted that this, which is perhaps the most dreadful disease of the East, was Job's malady. Origen mentions, that one of the Greek versions gives it as the affliction which befell him. Wunderbar supposes it to have been the Tyrian leprosy, resting chiefly on the itching implied, as he supposes, by Job ii. 7, 8. Schmidt thinks the "sore boil" may indicate some graver disease, or concurrence of diseases. But there is no need to go beyond the statement of Scripture. The disease of King Antiochus (2 Mc. ix. 5-10, &c.) is that of a boil breeding worms. There is some doubt whether this disease be not allied to phthiriasis, in which lice are bred, and cause ulcers. In Deut. xxviii. 65, possibly a palpitation of the heart is intended (compare Gen. xiv. 26). In Mk. xi. 17 (compare Lk. ix. 38) we have an apparent case of epilepsy: this might easily be a form of demoniacal

manifestation. (DEMONIACS.) Besides the common injuries of wounding, bruising, striking out the eye, tooth, &c., we have in Ex. xxi. 22, the case of miscarriage produced by a blow, push, &c., damaging the fœtus. The plague of "boils and blains" is not said to have been fatal to man, as the murrain preceding was to cattle; this alone would seem to contradict the notion of Shapter, that the disorder in question was small-pox. The expression of Ex. ix. 10, a "boil" flourishing, or ebullient with blains, may perhaps be a disease analogous to phlegmonous erysipelas, or even common erysipelas. The "withered hand" of Jeroboam (1 K. xiii. 4-6), and of the man in Mat. xii. 10-13 (compare Lk. vi. 10), is such an effect as is known to follow from the obliteration of the main artery of any member, or from paralysis of the principal nerve, either through disease or through injury. The case of the widow's son restored by Elisha (2 K. iv. 19), was probably one of sun-stroke. The disease of Asa "in his feet" which attacked him in his old age (1 K. xv. 23; 2 Chr. xvi. 12) and became exceeding great, may have been either *œdema* = swelling, or *podagra* = gout. In 1 Mc. vi. 8, occurs a mention of "sickness of grief;" in Ecclesi. xxxvii. 80, of sickness caused by excess, which require only a passing mention. The disease of Nebuchadnezzar has been viewed by Jahn as a mental and purely subjective malady. It is not easy to see how this satisfies the plain emphatic statement of Dan. iv. 33, which seems to include, it is true, mental derangement, but to assert a degraded bodily state to some extent, and a corresponding change of habits. We may regard it as Mead, following Burton's Anatomy of Melancholy, does, as a species of the melancholy known as Lycanthropia. Persons so affected wander like wolves in sepulchres by night, and imitate the howling of a wolf or a dog. Here should be noticed the mental malady of Saul. His melancholy seems to have had its origin in his sin. Music, which soothed him for a while, has entered largely into the milder modern treatment of lunacy. (LUNATICS.) The PALSY meets us in the N. T. only, and in features too familiar to need special remark. Gangrene, or mortification in its various forms, is a totally different disorder from the "canker" of the A. V. (Gr. *gangraina* = cancer, Conybeare & Howson) in 2 Tim. ii. 17. Both gangrene and cancer were common in all the countries familiar to the Scriptural writers, and neither differs from the modern disease of the same name. In Is. xxvi. 18 and Ps. vii. 14, there seems an allusion to false conception. The whole passage in Isaiah figuratively = disappointment after great effort. POISON, as a means of destroying life, hardly occurs in the Bible, save as applied to arrows (Job vi. 4). In the annals of the Herods poisons occur as the resource of stealthy murder. The bite or sting of venomous beasts can hardly be treated as a disease; but in connection with the "fiery (i. e. venomous) serpents" of Num. xxi. 6, and the deliverance from death of those bitten, it deserves a notice. The brazen figure was symbolical only. It was customary to consecrate the image of the affliction, either in its cause or in its effect, as in the golden emerods and golden mice of 1 Sam. vi. 4, 8, and in the ex-votos common in Egypt even before the Exodus; and these may be compared with this setting up of the brazen serpent. (SERPENT, BRAZEN.) THE SCORPION and centipede abound in the Levant (Rev. ix. 5, 10), with a large variety of serpents. (ADDER; ASP; PALESTINE, ZOOLOGY; SERPENT.) To these, according to Lichten-

stein, should be added a venomous solpuga, or large spider, similar to the Calabrian Tarantula. The disease of old age has acquired a place in Biblical nosology chiefly owing to the elegant allegory into which "The Preacher" throws the successive tokens of the ravage of time on man (Ecc. xii.). The course of decline is marked in metaphor by the darkening of the great lights of nature, and the ensuing period of life is compared to the broken weather of the wet season, setting in when summer is gone, when after every shower fresh clouds are in the sky, as contrasted with the showers of other seasons, which pass away into clearness. The "keepers of the house" perhaps = the ribs which support the frame, or the arms and shoulders which enwrap and protect it. The "strong men" = its supporters, the lower limbs "bowing themselves" under the weight they once so lightly bore. The "grinding" hardly needs to be explained of the teeth now become "few." The "lookers from the windows" = the pupils of the eyes, now "darkened." The "doors shut" represent the dulness of those other senses which are the portals of knowledge. The "rising up at the voice of a bird" portrays the light, soon-fleeting, easily-broken slumber of the aged man; or possibly, and more literally, actual waking in the early morning, when first the cock crows, may be intended. The "daughters of music brought low," suggest the

— "big manly voice"

Now turned again to childish treble: "

and also, as illustrated by Barzillai (2 Sam. xix. 35), the failure in the discernment and the utterance of musical notes. The fears of old age are next noticed: "They shall be afraid of *that which is high*;" an obscure expression, perhaps, for what are popularly called "nervous" terrors, exaggerating and magnifying every object of alarm. "Fear in the way" is at first less obvious; but we observe that nothing unnerves and agitates an old person more than the prospect of a long journey. Thus regarded, it becomes a fine and subtle touch in the description of decrepitude. All realness to haste is arrested, and a numb despondency succeeds. The "flourishing" of "the almond-tree" is still more obscure; but we observe this tree in Palestine blossoming when others show no sign of vegetation, and when it is dead winter all around—no ill type, perhaps, of the old man who has survived his own contemporaries and many of his juniors. (ALMOND.) Youthful lusts die out, and their organs, of which "the grasshopper" is perhaps a figure, are relaxed. The "silver cord" may be that of nervous sensation, or motion, or even the spinal marrow itself. Perhaps some incapacity of retention may be signified by the "golden bowl broken;" the "pitcher broken at the well" suggests some vital supply stopping at the usual source—derangement, perhaps, of the digestion or of the respiration; the "wheel shivered at the cistern," conveys, through the image of the water-lifting process familiar in irrigation, the notion of the blood, pumped as it were, through the vessels, and fertilizing the whole system; for "the blood is the life." (WELL.) This careful register of the tokens of decline might lead us to expect great care for the preservation of health and strength; and this, indeed, is found to mark the Mosaic system, in the regulations concerning diet, the "divers washings," and the pollution imputed to a corpse—nay, even in circumcision itself. These served not only the ceremonial purpose of imparting self-consciousness to the He-

brew, and keeping him distinct from alien admixture, but had a sanitary aspect of rare wisdom, when we regard the country, the climate, and the age. (CLEAN; UNCLEAN.) The rite of CIRCUMCISION, besides its special surgical operation, deserves some notice in connection with the general question of the health, longevity, and fecundity of the race with whose history it is identified. Besides being a mark of the covenant and a symbol of purity, it was perhaps also a protest against the phallus-worship, which has a remote antiquity in the corruption of mankind, and of which we have some trace in the Egyptian myth of Osiris. Its beneficial effects in such a climate as that of Egypt and Syria have been the subject of comment to various writers on hygiene. The operation itself consisted originally of a mere incision; to which a further stripping-off the skin from the part and a custom of sucking the blood from the wound were in a later period added, owing to the attempts of Jews of the Maccabean period, and later (1 Mc. i. 15; compare 1 Cor. vii. 8), to cultivate heathen practices. No surgical operation beyond this finds a place in Holy Scripture, unless, indeed, that adverted to under EUNUCH. The Talmudists speak of two operations to assist birth. Wunderbar enumerates from the Mishna and Talmud fifty-six surgical instruments or pieces of apparatus; of these, however, the following only are at all alluded to in Scripture: A cutting instrument, supposed a "sharp stone" (Ex. iv. 25). The *כַּרְיֵץ* of Josh. v. 2 was probably a more refined instrument for the same purpose. An "AWL" (Ex. xxi. 6), used to bore through the ear of the bondman who refused release, is supposed to have been a surgical instrument. A seat of delivery (Heb. *obnayim*; Ex. i. 16), A.V. "the stools." (MIDWIFE.) The "roller to bind" of Ez. xxx. 21 was for a broken limb, as still used. A scraper, for which the "potsherd" of Job was a substitute (Job ii. 8). Ex. xxx. 23-25 is a prescription in form. (OINTMENT.) Traces occur of some chemical knowledge, e.g. the calcination (?) of the gold by Moses (CALF); the effect of "vinegar upon NITRE" (Ex. xxxii. 20; Prov. xxv. 20; compare Jer. ii. 22); the mention of "the apothecary" (Ex. xxx. 35; Ecc. x. 1) (OINTMENT), and of the merchant in "powders" (Cant. iii. 6), shows that a distinct and important branch of trade was set up in these wares, in which, as at a modern druggist's, articles of luxury, &c., are combined with the remedies of sickness. Among the most favorite of external remedies has always been the BATH. Besides the significance of moral purity which it carried, the use of the bath checked the tendency to become unclean by violent perspirations from within and effluvia from without; it kept the porous system in play, and stopped the outset of much disease. In order to make the sanction of health more solemn, most Oriental nations have enforced purificatory rites by religious mandates—and so the Jews. There were special occasions on which the bath was ceremonially enjoined. The Pharisees and Essenes aimed at scrupulous strictness of all such rules (Mat. xv. 2; Mk. vii. 5; Lk. xi. 38). River-bathing was common, but houses soon began to include a bath-room (Lev. xv. 18; 2 K. v. 10; 2 Sam. xi. 2; Sus. 15). Vapor-baths, as among the Romans, were latterly included in these, as well as hot and cold-bath apparatus, and the use of FRUITS and oils after quitting it was everywhere diffused. ALOES; ANISE; ANOINTING; BALM; CASSIA; CINNAMON; FIG; FRANKINCENSE; GOURD; MUSTARD; OIL; REED 4; SALT; SPICES; WINE.

**Me-e'dā** (fr. Gr.) = MEHIDA (1 Esd. v. 32).

\* **Meek**, the A. V. translation of—1. Heb. *'ānāv* or *'ānāy* = *oppressed, afflicted, wretched*, but everywhere with the accessory idea of humility, meekness, i. e. *the humble, the meek*, who prefer to suffer wrong rather than do wrong, and who therefore enjoy God's favor, Ges. (Num. xii. 3; Ps. xxii. 26 [Heb. 27], xxv. 9, xxxvii. 11, &c.), also translated "poor" (Job xxiv. 4; Ps. ix. 18 [Heb. 19], &c.), "humble" (ix. 12 [Heb. 13], x. 12, 17, &c.), "lowly" (Prov. iii. 34, xvi. 19). The kindred *'anāv* and *'anāvāh* are translated "meekness" (Ps. xviii. 35, margin, xlv. 4; Zeph. ii. 3), "gentleness" (2 Sam. xxii. 26; Ps. xviii. 35), "humility" (Prov. xv. 33, xviii. 12, xxii. 4).—2. Gr. *praos* (Mat. xi. 29) and *praūs* (v. 5, xxi. 5; 1 Pet. iii. 4); both = *meek, mild, gentle*; the latter form and the kindred nouns *praotes* and *prautes*, which are uniformly translated "meekness" in N. T. (1 Cor. i. 21; Jas. i. 21, &c.), are in LXX. = the Hebrew words under No. 1 (Robinson, *N. T. Lex.*).

**Megiddo** (Heb. *place of troops*? Ges.; *place of Go!* [GAD 3], Fū.) was in a very marked position on the southern rim of the plain of ESDRELON, on the frontier-line, speaking generally, of the territories of ISSACHAR and MANASSEH, and commanding one of those passes from the N. into the hill-country which were of such critical importance on various occasions in the history of Judaea (Jd. iv. 7). The first mention occurs in Josh. xii. 21, where Megiddo appears as the city of one of the thirty-one "kings," or petty chieftains, whom Joshua defeated on the W. of the Jordan. The song of Deborah brings the place vividly before us, as the scene of the great conflict between Sisera and Barak. The chariots of Sisera were gathered "unto the river of Kishon" (Judg. iv. 13); Barak went down with his men "from Mount TABOR" into the plain (iv. 14); "then fought the kings of Canaan in TAANACH by the waters of Megiddo" (v. 19). Still we do not read of Megiddo being firmly in the occupation of the Israelites, and perhaps it was not really so till the time of Solomon, who placed one of his commissaries over TAANACH, Megiddo, &c., and "built" (i. e. fortified) Megiddo (1 K. iv. 12, ix. 15). Here AHAZIAH 2 died (2 K. ix. 27). But the chief historical interest of Megiddo is concentrated in Josiah's death. When Pharaoh-necho came from Egypt against the king of Assyria, Josiah joined the latter, and was slain at Megiddo (xxiii. 29), and his body was carried from thence to Jerusalem (ver. 30). The story is told in more detail in 2 Chr. xxxv. 22-24. There the fatal action is said to have taken place "in the valley (or plain) of Megiddo." (VALLEY 4.) This calamity made a deep and permanent impression on the Jews. Thus, in Zech. xii. 11, "the mourning of HADAD-RIMMON in the valley of Megiddon" becomes a poetical expression for the deepest and most despairing grief; as in Rev. xvi. 16, ARMAGEDDON, in continuance of the same imagery, is presented as the scene of terrible and final conflict. The site thus associated with critical passages of Jewish history from Joshua to Josiah has been identified, beyond any reasonable doubt, with the modern *el-Lejjūn*, which is undoubtedly the *Legio* of Eusebius and Jerome (Robinson, ii. 328-330, iii. 116-119). *el-Lejjūn* is on the caravan-route from Egypt to Damascus. The remains of the ancient city are not extensive. Van de Velde describes the view of the plain as seen from the highest point between it and the sea, and the huge *tells* which mark the positions of the "key-fortresses"

of the hills and the plain, *Taanūk* and *el-Lejjūn*, the latter being the most considerable, and having another called *Tell-Metzellim* half an hour to the N. W. About a month later in the same year (April, 1852) Robinson was there. Both writers mention a copious stream flowing down this gorge (March and April) and turning some mills before joining the Kishon. Here are probably the "waters of Megiddo" of Judg. v. 19, though it should be added that by Stanley they are supposed rather to be "the pools in the bed of the Kishon" itself. The same author regards the "plain (or valley) of Megiddo" as denoting not the whole of the Esdrelon level, but that broadest part of it which is immediately opposite Megiddo.

**Me-g'd-dan** (Heb.) = MEGIDDO (Zech. xii. 11 only).

**Me-het'a-beel** (fr. Heb. = MEHETABEL), ancestor of Shemaiah the prophet who was hired against Nehemiah by Tobiah and Sanballat (Neh. vi. 10).

**Me-het'a-bel** (fr. Heb. = *whom God does good to*, Ges.), daughter of Matred, and wife of Hadad, or Hadar, king of Edom (Gen. xxxvi. 39).

**Me-hi'da** (Heb. *junction*? Ges.; *a famous, distinguished, noble one*, Fū.), ancestor of a family of Nethinim, who returned from Babylon with Zerubbabel (Ezr. ii. 52; Neh. vii. 54).

**Me'hitr** (Heb. *price, Ges.; dexterity, ability*, Fū.), son of Chelub, the brother of Shuah (1 Chr. iv. 11).

**Me-ho'lath-lite** (fr. Heb.), the = one belonging to a place called Meholah (1 Sam. xviii. 19 only); whether that was ABEL-MEHOLOH or another, is uncertain.

**Me-hu'ja-el** (fr. Heb. = *smitten of God*? Ges.; *God is combat*, i. e. the combating, Fū.), son of Irad, and fourth in descent from Cain (Gen. iv. 18).

**Me-hu'man** (Heb. *faithful*, then *curuch*, Ges.; old Persian, *belonging to the great Hom* [a Persian god], Fū.), one of the seven eunuchs (A. V. "chamberlains") of Ahasuerus (Esth. i. 10).

**Me-hu'nim** (fr. Heb.; see below) = MEHUNIMS and MEUNIM (Ezr. ii. 50).

**Me-hu'nims** (fr. Heb. pl. *Me'ūnim*; see below), the, a people against whom King Uzziiah waged a successful war (2 Chr. xxvi. 7). Although so different in its English dress, the name is in the original the plural of MAON. Maon, or the Maonites (= Mchunim or Mehunims), probably inhabited the country at the back of the great range of Seir, the modern *esh-Sherah*, which forms the eastern side of the *Wady el-'Arabah* (ARABAH), where is still a town of the same name. Another notice of the Mehunims in the reign of Hezekiah (about B. C. 726-697) is found in 1 Chr. iv. 41. Here they are spoken of as a pastoral people, either themselves Hamites, or in alliance with Hamites, quiet and peaceable, dwelling in tents. Here, however, the A. V. treats the word as an ordinary noun, and renders it "habitations." A third notice of the Mehunim, corroborative of those already mentioned, is found in 2 Chr. xx. There is every reason to believe (so Mr. Grove) that in ver. 1 "the Ammonites" should be read as "the Maonites," who in that case are the "men of Mount Seir" mentioned in ver. 10, 22. In all these passages, including the last, the LXX. render the name by *hoi Meinaioi*—the Minæans—a nation of ARABIA renowned for their traffic in spices, who are named by Strabo, Ptolemy, and other ancient geographers, and whose seat is now ascertained to have been the S. W. portion of the great Arabian peninsula, the western half of the modern Hadramaut. The latest appearance of the name in the Bible is in the lists of those who returned from the Captivity with Zerubbabel

(Ezr. ii. 50, A. V. "MEHUNIM;" Neh. vii. 52, A. V. "MEUNIM").

**Me-jar'kon** (fr. Heb. = *waters of yellowness*, Ges.), a town of Dan (Josh. xix. 48 only); named next to Gath-rimmon, and in the neighborhood of Joppa or Japho.

**Me-ko'nah** (Heb. *a base, basis, place*, Ges.), one of the towns reinhabited after the Captivity by the men of Judah (Neh. xi. 28 only); probably situated far to the south.

**Mel-a-ti'ah** (fr. Heb. = *whom Jehonah delivers*, Ges.), a Gibeonite, who assisted in rebuilding the wall of Jerusalem (Neh. iii. 7).

**Mel'chi** [-ki] (Gr. fr. Heb. = *my king*, Rbn., *N. T. Lxx.*). 1. Son of Janna, and ancestor of Joseph in the genealogy of Jesus Christ (Lk. iii. 24).—2. Son of Addi in the same genealogy (iii. 21).

**Mel-chi'ah** (fr. Heb. = *MALCHIAH*, or *MALCHIAH*), a priest, father of Pashur (Jer. xxi. 1); = *MALCHIAH 7* and *MALCHIAH 1*.

**Mel-chi'as** (Gr. = *MALCHIAH* and *MALCHIAH*). 1. *MALCHIAH 2* (1 Esd. ix. 26).—2. *MALCHIAH 3* and *MALCHIAH 4* (ix. 32).—3. *MALCHIAH 6* (ix. 44).

**Mel-chi-el** (fr. Gr. = *MALCHIEL?*). Charnis, the son of Melchiel, was one of the three governors of Bethulia (Jd. vi. 15).

**Mel-chi's'e-dee** [-kiz-] (fr. Gr.) = *MELCHIZEDEK* (Heb. v., vi., vii.).

**Mel-chi-shu'a**, or **Mel-chi-shu'a** (fr. Heb.), son of Saul (1 Sam. xiv. 49, xxxi. 2); correctly *MALCHISHUA*.

**Mel-chi'z'e-dek** [-kiz-] (fr. Heb. = *king of righteousness*, Heb. vii. 2, Ges., &c.), king of Salem and priest of the Most High God, who met Abram in the valley of SHAVEH, which is the KING'S DALE, brought out bread and wine, blessed Abram, and received tithes from him (Gen. xiv. 18-20). The other places in which Melchizedek is mentioned are Ps. cx. 4, where Messiah is described as a priest for ever, "after the order of Melchizedek" and Heb. v., vi., vii., where these two passages of the O. T. are quoted, and the typical relation of Melchizedek to our Lord is stated at great length. There is something surprising and mysterious in the first appearance of Melchizedek, and in the subsequent reference to him. Bearing a title which Jews in after-ages would recognize as designating their own sovereign, bearing gifts which recall to Christians the Lord's Supper, this Canaanite crosses for a moment the path of Abram, and is unhesitatingly recognized as a person of higher spiritual rank than the friend of God. Disappearing as suddenly as he came in, he is lost to the sacred writings for a thousand years. The faith of early ages ventured to invest his person with superstitious awe. Jewish tradition pronounces Melchizedek to be a survivor of the Deluge, the patriarch Shem (and so Luther, Melancthon, Lightfoot, &c.). It should be noted that this supposition does not appear in the Targum of Onkelos—a presumption that it was not received by the Jews till after the Christian era—nor has it found favor with the Fathers. Equally old, perhaps, but less widely diffused, is the supposition not unknown to Augustine, and ascribed by Jerome to Origen and Didymus, that Melchizedek was an angel. The Fathers of the fourth and fifth centuries record with reprobation the tenet of the Melchizedekians that he was a Power, Virtue, or Influence of God, and the not less daring conjecture of Hieracas and his followers that Melchizedek was the Holy Ghost. Epiphanius mentions some members of the Church as holding that Melchizedek was the Son of God appearing in human form. Similar to this was a Jewish opinion

that he was the Messiah. The way in which he is mentioned in Genesis would rather lead to the immediate inference that Melchizedek was of one blood with the children of Ham, among whom he lived, chief (like the king of Sodom) of a settled Canaanitish tribe (so Mr. Bullock, with Josephus, most of the early Fathers, Carpov, Fairbairn, Kitto, and most modern commentators). And as Balaam was a prophet, so Melchizedek was a priest among the corrupted heathen, not self-appointed, but constituted by a special gift from God, and recognized as such by Him. "After the order of Melchizedek," in Ps. cx. 4, is explained by Gesenius and Rosenmüller to mean *after the manner of Melchizedek*, implying likeness in official dignity, i. e. a king and priest. The relation between Melchizedek and Christ as type and antitype is made in the Epistle to the Hebrews to consist in the following particulars. Each was a priest, (1.) not of the Levitical tribe; (2.) superior to Abraham; (3.) whose beginning and end are unknown; (4.) who is not only a priest, but also a king of righteousness and peace. Auberlen (see *B. S.* xvi. 552) says, "Melchizedek is eternal priest" (Heb. vii. 3, 17; Ps. cx. 4) "in no other sense than are all glorified spirits. He is priest by virtue of his relation to God, his life in God, and his service of God. But this relation, life, and service are eternal. His priesthood is inseparable from, and rests entirely in, his spiritual service. He belongs to those kings and priests who are before the throne of God and serve Him day and night in His temple" (Rev. vii. 15).—Another fruitful source of discussion has been found in the site of SALEM and SHAVEH, which are assumed to be near each other in Abram's road from Hobah to the plain of Mamre. For the various theories, see SALEM 1 and SHAVEH.

\* **Mel'com** (fr. Heb. *Malcam*) = *MILCOM*, Ges. (marg. of Jer. xlix. 1, 8).

**Mel'e-a** (Gr. fr. Heb. = *filling, full?*), son of Menan, and ancestor of Joseph in the genealogy of Jesus Christ (Lk. iii. 31).

**Mel'ech** (Heb. *king*), second son of Micah, the son of Merib-baal or Mephibosheth (1 Chr. viii. 35, ix. 41).

**Mel'i-cu** (Heb.) = *MALLUCH 6* (Neh. xii. 14, comp. ver. 2).

**Mel'i-ta** (L. fr. Gr. = *affording honey*, Cruden; fr. Phœnician = *refuge*, Wr.), the modern *Malta*. This island has an illustrious place in Scripture, as the scene of that shipwreck of St. Paul described in such minute detail in the Acts of the Apostles. (1.) We take St. Paul's ship in the condition in which we find her about a day after leaving FAIR HAVENS, i. e. when she was under the lee of CLAUDA (Acts xxvii. 16), laid-to on the starboard tack, and strengthened with "undergirders," the boat being just taken on board, and the gale blowing hard from the E. N. E. (ETROCLYDON.) (2.) Assuming (what every practised sailor would allow) that the ship's direction of drift would be about W. by N., and her rate of drift about a mile and half an hour, we come at once to the conclusion, by measuring the distance on the chart, that she would be brought to the coast of Malta on the thirteenth day (see ver. 27). (3.) A ship drifting in this direction to the place traditionally known as St. Paul's Bay would come to that spot on the coast without touching any other part of the island previously. The coast, in fact, trends from this bay to the S. E. This may be seen on consulting any map or chart of Malta. (4.) On *Koura Point*, which is the southeasterly extremity of the bay, there must infallibly have been

breakers, with the wind blowing from the N. E. Now the alarm was certainly caused by breakers, for it took place in the night (ver. 27), and it does not appear that the passengers were at first aware of the danger which became sensible to the quick

ear of the "sailors." (5.) Yet the vessel did not strike: and this corresponds with the position of the point, which would be some little distance on the port side, or to the left, of the vessel. (6.) Off this point of the coast the soundings are twenty

Chart of part of the coast of Malta.

fathoms (ver. 28), and a little further, in the direction of the supposed drift, they are fifteen fathoms (ib.). (7.) Though the danger was imminent, we shall find from examining the chart that there would still be time to anchor (ver. 29) before striking on the

rocks ahead. (8.) With bad holding-ground there would have been great risk of the ship dragging her anchors. The bottom of St. Paul's Bay is remarkably tenacious. (9.) The other geological characteristics of the place are in harmony with the narra

St. Paul's Bay, Malta.—From a view by G. H. Andrews.—(Fbn.)

This view is taken from a point at the back of the bay, near the castle. The island shown as shutting in the bay is Salmacetta.

tive, which describes the creek as having in one place a sandy or muddy beach (so Dr. Howson; Gr. *oigialos*, A. V. simply "shore," ver. 39), and which states that the bow of the ship was held fast in the shore, while the stern was exposed to the action of the waves (ver. 41). (10.) Another point of local detail is of considerable interest—viz. that as the ship took the ground, the place was observed to be *dithalassos* (Gr. = *between two seas*, A. V. "where two seas met"), i. e. a connection was noticed between two apparently separate pieces of water. We shall see, on looking at the chart, that this would be the case. (11.) Malta is in the track of ships between Alexandria and Puteoli: and this corresponds with the fact that the "Castor and Pollux," an Alexandrian vessel which ultimately

conveyed St. Paul to Italy, had wintered in the island (Acts xxviii. 11). (12.) Finally, the course pursued in this conclusion of the voyage, first to Syracuse, and then to Rhegium, contributes a last link to the chain of arguments by which we prove that Melita is *Malta*. Some have argued, mostly from the name "ADRIA," that the Melita where St. Paul was shipwrecked was the small island of that name, now *Meleda*, on the Illyrian coast of the Adriatic; but the commonly received conclusion in favor of Malta is regarded by Dr. Howson as completely established in 1848 by Mr. Smith, of Jordanhill, in his *Voyage and Shipwreck of St. Paul*. As regards the condition of the island of Melita, when St. Paul was there, it was a dependency of the Roman province of Sicily. Its chief officer (un-

der the governor of Sicily) appears from inscriptions to have had the title of *prōtos Melitaion*, or *Prinūs Melitenium* (Gr. and L. = *first of the Melitans* or Maltese), and this is the very phrase which St. Luke uses (Acts xxviii. 7, A. V. "chief man of the island"). Melita, from its position in the Mediterranean, and the excellence of its harbors, has always been important both in commerce and war. It was a settlement of the Phenicians, at an early period, and their language, in a corrupted form, continued to be spoken there in St. Paul's day. The Greek colonists in Sicily are said to have taken it from the Phenicians; but B. C. 402 it became subject to the Carthaginians, and was ceded by them to the Romans B. C. 242. It was famous for its honey and fruits, cotton fabrics, building-stone, and a breed of dogs. A few years before St. Paul's visit, corsairs from Cilicia made Melita a frequent resort; and through the subsequent periods of its history, Vandal and Arabian, it was often associated with piracy. The Christianity, however, introduced by St. Paul was never extinct. This island had a brilliant period (A. D. 1530-1798) under the knights of St. John, a military and religious fraternity to whom, after their expulsion from Rhodes by the Turks, the island of Malta was granted by the Emperor Charles V. It was taken by the French under Bonaparte, July, 1798, and by the English in Sept., 1800. It is still a dependency of the British crown.

**Melons** (Heb. *abattikhim*, or *abattichim*) are mentioned only in Num. xi. 5. By the Hebrew word we are probably to understand both the Musk-melon (*Cucumis Melo*) and the Water-melon (*Cucurbita Citrullus*), for the Arabic noun singular, *batikh*, which is identical with the Hebrew word, is used generically. The water-melon is by some considered to be indigenous to India, from which country it may have been introduced into Egypt in very early times. The musk-melon (*Cucumis Melo*) is culti-

Musk-melon (*Cucumis Melo*).

vated in the same places and ripens at the same time with the water-melon. The water-melon is now extensively cultivated all over India and the tropical parts of Africa and America, and indeed in hot countries generally, as well as in the United States. Both are too well known to need description. "Nothing could be more regretted in the burning desert," says Thomson (ii. 261), "than

these delicious (water-) melons, whose exuberant juice is so refreshing to the thirsty pilgrim."

Water-melon (*Cucurbita Citrullus*).

**Mel'zar** (Heb. *meltsar*, probably fr. Pers. = *master of wine, chief butler*, Bohlen, Ges.). The A. V. is wrong in regarding Melzar as a proper name; it is rather an official title, as is implied in the addition of the article in each case where the name occurs (Dan. i. 11, 16); the marginal reading, "the steward," is therefore more correct.

\* **Mem** (Heb. *mēym*, probably = *water*, Ges.), the thirteenth letter of the Hebrew alphabet (Pa. cxix.)

**Writing.**  
**Mem'mi-us, Quin'tus** (both L.; Memmius [= *Memestheus*, Virgil] being the name designating a certain Roman clan, Quintus [= *fifth*] a common first name among the Romans) (2 Mc. xi. 34). **MAXILIUS, TITUS.**

**Mem'phis** (Gr. fr. Egyptian compounded of *men* [= *foundation, station*] and *nofre* [= *good*]; variously interpreted *haven* [or *abode*] of the good, *tomb of the good man* [Osiris], *gate of the blessed*, &c. [so Dr. J. P. Thompson, the original author of this article]), a city of ancient Egypt, situated on the western bank of the Nile, in latitude 30° 6' N. It is mentioned by Isaiah (xix. 13), Jeremiah (li. 16, xli. 14, 19), and Ezekiel (xxx. 13, 16), under the name of *Noph*; and by Hosea (ix. 6) under the name of *Moph* in Hebrew, and **MEMPHIS** in our English version. Though some regard **THEBES** as the more ancient city, the monuments of Memphis are of higher antiquity than those of Thebes. Herodotus dates its foundation from Menes, the first really historical king of Egypt. The era of Menes is not satisfactorily determined. But, indeterminate and conjectural as the early chronology of Egypt yet is, all agree that the known history of the empire begins with Menes, who founded Memphis. The city belongs to the earliest periods of authentic history. The building of Memphis is associated by tradition with a stupendous work of art which has permanently changed the course of the Nile and the face of the Delta. Before the time of Menes, the river, emerging from the upper valley into the neck of the Delta, bent its course westward toward the hills of the Libyan desert, or at least discharged a large portion of its waters through an arm in that direction. Here the generous flood whose yearly inundation gives life and fertility to Egypt, was largely absorbed in the sands of the desert, or wasted in

stagnant morasses. It is even conjectured that up to the time of Menes the whole Delta was an uninhabitable marsh. Herodotus informs us, upon the authority of the Egyptian priests of his time, that Menes, "by banking up the river at the bend which

it forms about a hundred furlongs south of Memphis, laid the ancient channel dry, while he dug a new course for the stream half way between the two lines of hills." From his description it appears that, like New Orleans, Memphis was created upon

The Sphinx and Pyramids of Memphis.

a marsh reclaimed by the dike of Menes and drained by his artificial lake. The dike of Menes began twelve miles south of Memphis, and deflected the main channel of the river about two miles to the eastward. Upon the rise of the Nile, a canal still conducted a portion of its waters westward through the old channel, thus irrigating the plain beyond the city in that direction, while an inundation was guarded against on that side by a large artificial lake or reservoir at Abousir. The skill in engineering which these works required, and which their remains still indicate, argues a high degree of material civilization, at least in the mechanic arts, in the earliest known period of Egyptian history. The climate of Memphis may be inferred from that of the modern Cairo—about ten miles to the N.—which is the most equable that Egypt affords. The city is said to have had a circumference of about nineteen miles, and the houses or inhabited quarters, as was usual in the great cities of antiquity, were interspersed with numerous gardens and public areas. Herodotus states, on the authority of the priests, that Menes "built the temple of Hephæstus, which stands within the city, a vast edifice, well worthy of mention." The divinity whom Herodotus identifies with Hephæstus was *Ptah*, "the creative power, the maker of all material things." The temple of Apis—the sacred bull (*CALF*)—was one of the most noted structures of Memphis. It stood opposite the southern portico of the temple of Ptah; and Psammetichus, who built that gateway, also erected in front of the sanctuary of Apis a magnificent colonnade, supported by colossal statues or Osiride pillars, such as may still be seen at the temple of Medeenet Habou at Thebes. Through this colonnade the Apis was led with great pomp upon state occasions. The place appropriated to the burial of the sacred bulls was a gallery some

2,000 feet in length by 20 in height and width, hewn in the rock without the city. This gallery was divided into numerous recesses on each side; and the embalmed bodies of the sacred bulls, each in its own sarcophagus of granite, were deposited in these "sepulchral stalls." At Memphis was the reputed burial-place of Isis; it had also a temple to that "myriad-named" divinity. Memphis had also its Serapeum (temple of Serapis), which probably stood in the western quarter of the city. The sacred cubit, and other symbols used in measuring the rise of the Nile, were deposited in the temple of Serapis. The Necropolis, adjacent to Memphis, was on a scale of grandeur corresponding with the city itself. The "city of the pyramids" is a title of Memphis in the hieroglyphics upon the monuments. The great field or plain of the Pyramids lies wholly upon the western bank of the Nile, and extends from *Abou-Loish*, a little to the N. W. of Cairo, to *Meydoom*, about forty miles to the S., and thence in a southwesterly direction about twenty-five miles farther, to the pyramids of *Houara* and of *Diakhû* in the *Fayoua*. But the principal seat of the pyramids, the Memphite Necropolis, was in a range of about fifteen miles from *Sakkara* to *Gizeh*, and in the groups here remaining nearly thirty are probably tombs of the imperial sovereigns of Memphis. The great pyramid of *Gizeh* is 733 feet square at the base, 456 feet in perpendicular height, having lost about twenty-five feet of its original height. It is of solid stone, except a low core of rock, and a very small space allowed for chambers and passages leading to them (R. S. Poole, in Kitto). The Sphinx (*CHERUBIM*) measures more than 60 feet from the ground to the crown of the head, more than 100 feet around the forehead, and nearly 150 feet in length, all cut from the solid rock (Dr. J. P. Thompson, *Egypt*, 341). Memphis

long held its place as a capital; and for centuries a Memphite dynasty ruled over all Egypt. Lepsius, Bunsen, and Brugsch, agree in regarding the 3d, 4th, 6th, 7th, and 8th dynasties of the Old Empire as Memphite, reaching through a period of about 1,000 years. During a portion of this period, however, the chain was broken, or there were contemporaneous dynasties in other parts of Egypt. The overthrow of Memphis was distinctly predicted by the Hebrew prophets (Is. xix. 13; Jer. xli. 19). The latest of these predictions was uttered nearly 600 years B. C., and half a century before the invasion of Egypt by Cambyzes (about B. C. 525). Herodotus informs us that Cambyzes, enraged at the opposition he encountered at Memphis, committed many outrages upon the city. The city never recovered from the blow inflicted by Cambyzes. The rise of ALEXANDRIA hastened its decline. The Caliph conquerors founded Fostat (Old Cairo) upon the opposite bank of the Nile, a few miles N. of Memphis, and brought materials from the old city to build their new capital (A. D. 638). At length so complete was the ruin of Memphis, that for a long time its very site was lost. Pococke could find no trace of it. Recent explorations, especially those of Messrs. Mariette and Linant, have brought to light many of its antiquities, which have been dispersed to the museums of Europe and America. The dikes and canals of Menes still form the basis of the system of irrigation for Lower Egypt; the insignificant village of *Meet Raheeneh* occupies nearly the centre of the ancient capital.

**Me-men-e-an** (Heb. fr. Pers. = *flourishing in dignity or authority*, Sim.), one of the seven princes of Persia in the reign of Ahasuerus, who "saw the king's face," and sat first in the kingdom (Esth. i. 14, 16, 21). They were "wise men who knew the times" (skilled in the planets, according to Aben Ezra), and appear to have formed a council of state; Josephus says that one of their offices was that of interpreting the laws.

**Me-na-hem** (Heb. *conso'ler*, Ges.), son of Gadi, who slew the usurper SHALUM and seized the vacant throne of Israel, B. C. 772. (ISRAEL, KINGDOM OF.) His reign, which lasted ten years, is briefly recorded in 2 K. xv. 14-22. It has been inferred from the expression in verse 14, "from Tirzah," that Menahem was a general under Zechariah stationed at Tirzah, and that he brought up his troops to Samaria and avenged the murder of his master by Shalum. He maintained the calf-worship of Jeroboam. The contemporary prophets, Hosea and Amos, have left a melancholy picture of the ungodliness, demoralization, and feebleness of Israel. In the brief history of Menahem, his ferocious treatment of TIRZAH occupies a conspicuous place (verse 16). The time of the occurrence and the site of the town have been doubted. The act, whether perpetrated at the beginning of Menahem's reign or somewhat later, was doubtless intended to strike terror into the hearts of reluctant subjects. But the most remarkable event in Menahem's reign is the first appearance of a hostile force of Assyrians on the N. E. frontier of Israel. King Pul, however, withdrew, having been converted from an enemy into an ally by a timely gift of 1,000 talents of silver. Rawlinson says that in an inscription the name of Menahem is given, probably by mistake of the stone-cutter, as a tributary of Tiglath-pileser.

**Me-nam** (fr. Gr.), the son of Mattatha, one of the ancestors of Joseph in the genealogy of Jesus Christ (Lk. iii. 31).

\* **Me-ne, Me-ne, Te'kel, U-phar'sin** (Chal. *méné, méné, tékel, úpharsin* = *numbered, numbered, weighed, and dividings*, Ges.), the mysterious inscription written upon the wall of Belshazzar's palace, in which Daniel read the doom of the king and his dynasty (Dan. v. 25 ff.). The interpretation is given in ver. 26-28. In ver. 28 "Peres" (a Chaldean singular participle, *perés* = *divided or broken*) is substituted for "Upharsin" (composed of the conjunction *ú* and the plural participle *pharsin*, which becomes *pharsin* when the conjunction is prefixed). There is in this verse a close resemblance in sound between the participle *perés* ("Peres" = *divided*) and the noun *Párs* (= *Persia* or "the Persians").

**Men-e-las-us** (L. fr. Gr. = *abiding [or withstanding] people*, L. & S.), a usurping HIGH-PRIEST who obtained the office from Antiochus Epiphanes (about B. C. 172) by a large bribe (2 Mc. iv. 23-25), and drove out Jason, who had obtained it not long before by similar means. He met with a violent death at the hands of Antiochus Eupator (about B. C. 163), which seemed in a peculiar manner a providential punishment of his sacrilege (xiii. 3, 4). According to Josephus he was a younger brother of JASO 4 and ONIAS 3, and, like Jason, changed his proper name ONIAS 4 for a Greek name. In 2 Mc. on the other hand, he is called a brother of Simon the Benjamite (2 Mc. iv. 23.) SIMON 3.

**Me-nés-the-us** [pron. in Gr. *me-nés-thosé*] (Gr. *one who abides*, L. & S.), father of APOLLONIUS 3 (2 Mc. iv. 21).

**Me'ni** (Heb. *mén* = *fate, fortune, destiny*, Ges., Fñ.). The last clause of Is. lxx. 11 is rendered in the A. V. "and that furnish the drink-offering unto that number," the marginal reading for the last word being "Meni." That the word so rendered is the proper name of an object of idolatrous worship cultivated by the Jews in Babylon, is a supposition which is in accordance with the context, and has every probability to recommend it. But the identification of Meni with any known heathen god is uncertain. The versions and commentators are at variance. In the LXX. the word is rendered "fortune" or "luck." (GAD 3.) The majority of commentators conclude that Meni is the moon god or goddess, the *Deus Lunus* or *Dea Luna* of the Romans; masculine as regards the earth which she illumines, feminine with respect to the sun from whom she receives her light. Among those who have interpreted the word literally "number," may be reckoned Rashi and Abrahamel, who understand by it the "number" of the priests who formed the company of revellers at the feast. Kimchi, in his note on Is. lxx. 11, says of Meni, "It is a star, and some interpret it of the stars which are *numbered*, and they are the seven stars of motion," i. e. the planets. But Gesenius, with more probability (so Mr. Wright), connects Meni with *manih*, one of the three idols worshipped by the Arabs before the time of Mohammed to which reference is made in the Koran (Sura 53), "What think ye of Allat, and Al Uzzah, and Manah, that other third goddess?" *Manah* was the object of worship of "the tribes of *Hudheyl* and *Khuza'ah*, who dwelt between Mecca and Medina, and, as some say, of the tribes of *Daws*, *El-Khazraj*, and *Thakeek* also. This idol was a large stone, demolished by one Saad, in the eighth year of the Flight, a year so fatal to the idols of Arabia." Meni is probably the personification of fate or destiny, under whatever form it was worshipped. Whether this form, as Gesenius maintains, was the planet Venus, known to Arabic astrologers

as "the lesser good fortune" (the planet Jupiter being the "greater"), it is impossible to say with certainty.

\* **Meu-stealers** = those who steal or kidnap their fellow-men, especially to make slaves of them (1 Tim. i. 10). Such criminals were punished capitally, according to the Mosaic law (Ex. xxi. 16; Deut. xxiv. 7). PUNISHMENTS; SLAVE.

\* **Me-u'-cha** [-kah] (fr. Heb. = *place of rest*, Ges.) (Jer. li. 59, margin). SERAIAH 11.

\* **Me-u'-chah** (Heb. *quietly*, without noise or tumult, Ges.), a word (Judg. xx. 43, margin) better translated "with ease." MANAHATH.

\* **Me-u' chites** (1 Chr. ii. 52, margin). HATSI-HAMMENOCHOTH; MANAHETHITES.

**Me-on'-aim** (Heb. pl., and see below), the **Plain of** (Heb. *elán*, see OAK 3; PLAIN 7), an oak, or terebinth, or other great tree, which formed a well-known object in central Palestine in the days of the Judges. It is mentioned—at least under this name—only in Judg. ix. 37. In what direction it stood with regard to Shechem we are not told. Meonenim, if interpreted as a Hebrew word = *enchanters* or "observers of times," as it is elsewhere rendered (Deut. xviii. 10, 14; in Mic. v. 12 it is "soothsayers"). (DIVINATION 7.) This connection of the name with magical arts has led to the suggestion that the tree in question is identical with that beneath which Jacob hid the foreign idols and amulets of his household, before going into the presence of God at Bethel (Gen. xxxv. 4). But the inference seems hardly a sound one, for *me'óninim* = not *enchantments* but *enchanters*, nor is there any ground for connecting it in any way with amulets or images; and there is the positive reason against the identification that, while this tree seems to have been at a distance from the town of Shechem, that of Jacob was in it, or in very close proximity to it (so Mr. Grove). Mr. Farrar (in Kitto) suggests that Gaal's expression in Judg. ix. 37 may only mean that one company was on the road which led by the oak of Meonenim, that "in Shechem" may = in the district round the city as well as in the city itself, and that the name Meonenim may have originated in some use made of the tree by the priests and sorcerers of the neighboring shrine of Baal-berith (compare ver. 46). Five trees are mentioned in connection with Shechem:—1. The oak (not "plain" as in A. V.) of MOREH, where Abram made his first halt and built his first altar in the Promised Land (Gen. xii. 6). 2. That of Jacob, already spoken of. 3. "The oak which was in the holy place of Jehovah" (A. V. "an oak that was by the sanctuary of the Lord") (Josh. xxiv. 26). 4. The "oak (A. V. margin, not 'plain,' as in A. V. text) of the pillar in Shechem," beneath which Abimelech was made king (Judg. ix. 6). 5. The oak of Meonenim (Mr. Grove makes the first four of these probably one and the same tree), but the oak of Meonenim (see above) a distinct one; Mr. Farrar (in Kitto) believes the whole five were the same. It is perhaps possible that Meonenim may have originally been Maonim, i. e. MAONITES or MEHUNIM.

**Me-on'-e-thal** (Heb. *my dwellings*, Ges.), a son of OTHNIEL (1 Chr. iv. 14).

**Meph'-a-ath** (Heb. *splendor*, or perhaps *lofty place*, hill, Ges.; *height, eminence*, Fü.), a city of the Reubenites, one of the towns dependent on Heshbon (Josh. xiii. 18), lying in the "plain" (compare 17, and Jer. xlviii. 21), which probably answered to the modern *Belka* (PLAIN 4); allotted to the Merarite Levites (Josh. xxi. 37; 1 Chr. vi. 79). In Jere-

miah's time it was occupied by the Moabites (Jer. xlviii. 21). Mephaath is named in the above passages with Dilon, Juhazah, Kirjathaim, and other towns, which have been identified with tolerable certainty on the N. of the Arnon (*Wady Jisjib*); but no one appears yet to have discovered any name at all resembling it. In the time of Eusebius it was used as a military post.

**Me-phib'-o-sheth** (Heb. *extermination of idols*, Sim., Ges.; *utterance of Baal*, or *fame of Baal*, Fü.), the name of two of Saul's family. 1. Saul's son by Rizpah the daughter of Aiah, his concubine (2 Sam. xxi. 8). He and his brother Armoni were among the seven victims surrendered by David to the Gibeonites, and by them crucified in sacrifice to Jehovah, to avert a famine from which the country was suffering.—2. Jonathan's son and Saul's grandson (MERIB-BAL); nephew of the preceding. (1.) His life seems to have been, from beginning to end, one of trial and discomfort. His mother's name is unknown. When his father and grandfather were slain on Mount Gilboa he was but five years old. He was then living under the charge of his nurse, probably at Gibeon, the regular residence of Saul. The tidings that the army was destroyed, the king and his sons slain, and that the Philistines were sweeping all before them, reached the royal household. The nurse fled, carrying the child on her shoulder. But in her panic and hurry she stumbled and Mephibosheth was precipitated to the ground with such force as to deprive him for life of the use of both feet (2 Sam. iv. 4). (2.) After this accident, Mephibosheth was carried with the rest of his family beyond the Jordan to the mountains of Gilead, where he found a refuge in the house of Machir, the son of Ammiel, a powerful Gadite or Manassite chief at Lo-debar, not far from Mahanaim, which during the reign of his uncle Ish-bosheth was the headquarters of his family. By Machir he was brought up, there he married, and there he was living at a later period, when David, having completed the subjugation of the adversaries of Israel on every side, had leisure to turn his attention to claims of other and hardly less pressing descriptions. So completely had the family of the late king vanished from the western side of Jordan, that the only person to be met with in any way related to them was ZIBA. From this man David learned of the existence of Mephibosheth. Royal messengers were sent to the house of Machir at Lo-debar, and by them the prince and his infant son MICHA were brought to Jerusalem. The interview with David was marked by extreme kindness on the part of the king, and on that of Mephibosheth by the fear and humility characteristic of him. He leaves the royal presence with all the property of his grandfather restored to him, and with the whole family and establishment of Ziba as his servants, to cultivate the land and harvest the produce. He himself is to be a daily guest at David's table. From this time forward he resided at Jerusalem (2 Sam. ix.). (3.) An interval of about seventeen years now passes, and the crisis of David's life arrives. Of Mephibosheth's behavior on this occasion we possess two accounts—his own (ix. 24-30), and that of Ziba (xvi. 1-4). They are naturally at variance with each other. In consequence of Ziba's story, that Mephibosheth was waiting in Jerusalem to receive from the nation his grandfather's throne, Ziba's loyalty and thoughtful courtesy are rewarded by the possessions of his master, thus once more reinstating him in the position from which he had

been so rudely thrust on Mephibosheth's arrival in Judah. Mephibosheth's story—which, however, he had not the opportunity of telling, until several days later, when he met David returning to his kingdom at the western bank of Jordan—was very different from Ziba's. He had been desirous to fly with his benefactor, and had ordered Ziba to make ready his ass; but Ziba had deceived him, had left him, and in his helpless condition he had to remain where he was. But he had gone into the deepest mourning possible for his lost friend. That David did not disbelieve his story is shown by his revoking the judgment he had previously given. That he did not entirely reverse his decision, but allowed Ziba to retain possession of half the lands of Mephibosheth, is probably due partly to weariness at the whole transaction, but mainly to the conciliatory frame of mind in which he was at that moment. "Shall there any man be put to death this day?" is the key-note of the whole proceeding. (4.) The opposite view of Mephibosheth's conduct has been maintained with much cogency and ingenuity by the late Prof. Blunt in his *Undesigned Coincidences*. But when the circumstances on both sides are weighed, there seems to be no escape from the conclusion come to above (so Mr. Grove, the original author of this article). Mephibosheth could have had nothing to hope for from the revolution; his story is throughout valid and consistent; and the history states that he commenced his mourning on the very day of David's departure (xix. 24). Ziba, on the other hand, had every thing to gain and nothing to lose by any turn affairs might take. With regard to the absence of the name of Mephibosheth from the dying words of David, which is the main occasion of Mr. Blunt's strictures, it is natural—at any rate it is allowable—to suppose that, in the interval of eight years between David's return to Jerusalem and his death, Mephibosheth's painful life had come to an end. We may without difficulty believe that he did not long survive the anxieties and annoyances which Ziba's treachery had brought upon him.

**Me'rab** (Heb. *increase*, Ges.), the eldest daughter, possibly the eldest child, of King Saul (1 Sam. xiv. 49). She first appears after the victory over Goliath and the Philistines, when David had become an inmate in Saul's house (xviii. 2), and immediately after the commencement of his friendship with Jonathan. In accordance with the promise which he made before the engagement with Goliath (xvii. 25), Saul betrothed Merab to David (xviii. 17). David's hesitation looks as if he did not much value the honor—at any rate before the marriage Merab's younger sister MICHAL had displayed her attachment for David, and Merab was then married to Adriel the Meholathite, to whom she bore five sons (2 Sam. xxi. 8). The A. V. of this last passage is an accommodation. The Hebrew text has "the five sons of Michal, daughter of Saul, which she bare to Adriel." The most probable solution of the difficulty is that "Michal" is the mistake of a transcriber for "Merab." But the error is very ancient.

**Me-ra'ah**, or **Me-ra'i'ah** (Heb. *rebellion* under *Jehovah*, Ges.), a priest in the days of high-priest Joiakim, and representative of the priestly family of Seraiah (Neh. xii. 12).

**Me-ra'oth** [-ra'voth] (Heb. *rebellious*, Ges.). 1. A descendant of Eleazar the son of Aaron, and head of a priestly house. It was thought by Lightfoot that he was the immediate predecessor of Eli in the

office of HIGH-PRIEST. Zadok and Ezra were among his illustrious descendants. It is apparently another Meraioth who comes in between Zadok and AHITUB in the genealogy of Azariah (1 Chr. ix. 11; Neh. xi. 11), unless the names Ahitub and Meraioth are transposed, which Mr. Wright supposes not improbable.—2. The head of a priestly house which, in the time of high-priest Joiakim, was represented by Helkai (Neh. xii. 15); = MEREMOTH 3.

**Me'ran** (fr. Gr., see below). The merchants of Meran and Themam are mentioned with the Hagarenes (Bar. iii. 23 only) as "searchers out of understanding." The name is probably a corruption of "MEDAN" or "MIDIAN."

**Me-ra'ri**, or **Me-ra'ri** (Heb. *unhappy, sorrowful*, or *my* [i. e. his mother's] *sorrow*). 1. Third son of Levi, and head of the third great division of the LEVITES, viz. the MERARITES, whose designation in Hebrew is the same as that of their progenitor, only with the article prefixed. Of Merari's personal history, beyond the fact of his birth before the descent of Jacob into Egypt, and of his being one of the seventy who accompanied Jacob thither, we know nothing whatever (Gen. xlv. 8, 11). At the time of the Exodus, and the numbering in the wilderness, the Merarites consisted of two families, the Mahlites and the Mushites, Mahli and Mushi being either the two sons, or the son and grandson of Merari (1 Chr. vi. 19, 47). Their chief at that time was Zuric, and the whole number of the family, from a month old and upward, was 6,200; those from thirty years old to fifty were 3,200. Their charge was the boards, bars, pillars, sockets, pins, and cords of the Tabernacle and the court, and all the tools connected with setting them up. In the encampment their place was to the N. of the Tabernacle; and both they and the Gershonites were "under the hand" of Ithamar the son of Aaron. Owing to the heavy nature of the materials which they had to carry, four wagons and eight oxen were assigned to them; and in the march both they and the Gershonites followed immediately after the standard of Judah, and before that of Reuben, that they might set up the Tabernacle against the arrival of the Kohathites (Num. iii. 20, 33–37, iv. 29–33, 42–45, vii. 8, x. 17, 21). In the division of the land by Joshua, the Merarites had twelve cities assigned to them, out of Reuben, Gad, and Zebulun, of which one was Ramoth-gilead, a city of refuge, and in later times a frequent subject of war between Israel and Syria (Josh. xxi. 7, 34–40; 1 Chr. vi. 63, 77–81). In David's time Asaiah was their chief, and assisted with 220 of his family in bringing up the Ark (xv. 6). Afterward we find the Merarites still sharing with the two other Levitical families the various functions of their caste (xxiii. 6, 21–23, xxvi. 10, 19). In Hezekiah's time the Merarites were still flourishing, and Kish the son of Abdi, and Azariah the son of Jehalelel, took their part with their brethren of the two other Levitical families in promoting the reformation, and purifying the house of the Lord (2 Chr. xxix. 12, 15). After the return from Captivity Shemaiah represents the sons of Merari, in 1 Chr. ix. 14 and Neh. xi. 15. There were also at that time sons of JEDUTHUN under Obadiah or Abia, the son of Shemaiah (1 Chr. ix. 16; Neh. xi. 17). A little later again, when Ezra was in great want of Levites to accompany him on his journey from Babylon to Jerusalem, "a man of good understanding of the sons of Mahli" was found, whose name, if the text here and at ver. 24 is correct, is

not given. "Jeshaiah also of the sons of Merari," with twenty of his sons and brethren, came with him at the same time (Ezr. viii. 18, 19). But it seems pretty certain that Sherebiah, in ver. 18, is the name of the Mahlite, and both he and Hashabiah as well as Jeshaiah, in ver. 19, were Levites of the family of Merari, and not, as the actual text of ver. 24 indicates, priests (so Lord A. C. Hervey). —2. Father of Judith (Jd. viii. 1, xvi. 7).

\* **Mer-a-rites**, or **Mer'a-rites** = descendants of MERARI 1 (Num. xxvi. 57).

**Mer-a-tha'im** (fr. Heb. dual, see below), the **Land of** (Jer. l. 21). Gesenius, &c., translate Merathaim as a common noun = *double rebellion or contumacy*, alluding to the country of the Chaldeans, and to the double captivity which first the Assyrians and then the Babylonians had inflicted on the nation of Israel. Fürst translates Merathaim = *great domination, violent rule*; the A. V. margin has "the rebels."

\* **Merchan-dise**, **Mer'chant**. ARABIA; COMMERCE; FAIRS; MARKET; MONEY; PHENICIA; SHIP, &c.

**Mer-cu-ri-us** (L. = Mercury; Gr. *Hermēs*), properly Hermes, the Greek deity, whom the Romans identified with their Mercury, the god of commerce and bargains. Hermes was the son of Zeus (JUPITER) and Maia the daughter of Atlas, and is constantly represented as the companion of his father in his wanderings upon earth. On one of these occasions they were travelling in Phrygia, and were refused hospitality by all save Baucis and Philemon, two aged peasants, of whom Ovid (*Metam.* viii. 620-724) relates that Jupiter was so pleased with their hospitality that he changed their cottage into a magnificent temple, of which Baucis and her husband were made priests, and that after their death at the same hour, they became trees before the temple. This appears to have formed part of the folk-lore of Asia Minor, and strikingly illustrates the readiness with which the simple people of Lystra recognized in Barnabas and Paul the gods who, according to their wont, had come down in the likeness of men (Acts xiv. 11). They called Paul "Mercurius, because he was the chief speaker;" identifying in him as they supposed, by this characteristic, the herald of the gods and of Zeus, the eloquent orator, inventor of letters, music, and the arts. He was usually represented as a slender, beardless youth.

\* **Mer'cy** (Heb. *hesed* or *chesed*, *rahīmīn* or *rahīmīn*; Gr. *eleos*, *oiktīrmos*) in the Scriptures is a development of benevolence, involving not only a feeling of kindness or compassion toward the needy, helpless, afflicted, or sinful, but also an active desire and endeavor to remove the evils in their case. It is especially an attribute of God and of the Lord Jesus Christ exercised toward mankind (Ex. xx. 6, xxxiv. 6, 7; 1 Tim. i. 2, &c.), and is required of Christians likewise (Lk. vi. 36; Col. iii. 12, &c.). ATONEMENT; FAITH; GRACE; JUSTIFY; LOVE, &c.

**Mer'cy-seat** (Heb. *appōreth*; Gr. *hilasterion*; see below). This appears to have been merely the lid of the ARK OF THE COVENANT, not another surface affixed thereto. It was that whereon the blood of the yearly atonement was sprinkled by the high-priest; and in this relation it is doubtful whether the sense of the word in the Hebrew is based on the material fact of its "covering" the Ark, or derived from this notion of its reference to the "covering" (i. e. atonement) of sin. The Greek is properly a neuter adjective = *propitiatory, expiatory*, Rbn. *N. T. Lex.* ATONEMENT; ATONEMENT, DAY OF; CHERUBIM.

**Me'red** (Heb. *rebellion*, Ges.), a son of Ezra, and

descendant of Judah; husband of BITHIAH the daughter of PHARAOH 5 (1 Chr. iv. 17, 18). Different traditions identify him with Caleb and Moses.

**Mer'e-moth** (Heb. *heights*, Ges.). 1. Son of Uriah, or Urijah, the priest, of the family of Koz or Hakkoz, the head of the seventh course of priests as established by David. In Ezr. viii. 33, Meremoth is appointed to weigh and register the gold and silver vessels belonging to the Temple. In rebuilding the wall of Jerusalem under Nehemiah we find Meremoth taking an active part, working between Meshullam and the sons of Hassenaah who restored the fish-gate (Neh. iii. 4), and himself restoring the portion of the Temple wall on which abutted the house of the high-priest Eliashib (21). —2. A layman of the sons of Bani, who had married a foreign wife (Ezr. x. 36). —3. A priest, or more probably a family of priests, who sealed the covenant with Nehemiah (Neh. x. 5). In xii. 8 the name occurs, with many others of the same list, among those who went up with Zerubbabel a century before. MERATHOTH 2.

**Me'res** [-reez] (Heb. fr. Pers. = *worthy*, Benfey, Ges., Fii.), one of the seven counsellors of Ahasuerus, king of Persia, "wise men which knew the times" (Esth. i. 14).

**Mer'i-bah** (Heb. *strife*, Ges.). 1. In Ex. xvii. 7 we read "he called the name of the place MAERAH and Meribah," where the people murmured, and the rock was smitten. For the situation, see REPHIDIM. —2. The name is also given to KADESH (Num. xx. 13, 24, xxvii. 14; Deut. xxii. 51, "Meribah-kadesh"), because there also the people, when in want of water, strove with God. There MOSES and AARON incurred the divine displeasure, because they "rebelled" and "sanctified not God in the midst" of the people.

**Mer-ib-ba'al** (Heb. *contender against Baal*, Ges.), son of Jonathan the son of Saul (1 Chr. viii. 34, ix. 40); doubtless = MEFIBOSHETH. For the form, compare ESH-BAAL.

**Me-ro'dach** [-dak] (Heb. *death, slaughter*, Ges.; *bold, valiant, warlike*, Fii.; fr. Pers. = *little man*, as a term of endearment, Hitzig; *man-consumer*, Bohlen) is mentioned once only in Scripture (Jer. l. 2). It has been commonly concluded from this passage that Bel and Merodach were separate gods; but from the Assyrian and Babylonian inscriptions it appears that this was not exactly the case. Merodach really (so Rawlinson) = the famous Babylonian BEL or Belus, the word being properly at first a mere epithet of the god, which by degrees superseded his proper appellation. Still a certain distinction appears to have been maintained between the names. The golden image in the great temple at Babylon seems to have been worshipped distinctly as Bel rather than Merodach, while other idols of the god may have represented him as Merodach rather than Bel. Astronomically Merodach = the planet Jupiter.

**Me-ro'dach-bal'a-dan** (see MERODACH and BALADAN), king of Babylon in the days of Hezekiah (2 K. xx. 12; Is. xxxix. 1). In the former place he is called Berodach-baladan. The orthography "Merodach" is, however, to be preferred. The name of Merodach-baladan has been clearly recognized in the Assyrian inscriptions. The Canon of Ptolemy gives Merodach-baladan (*Marducempal*) a reign of twelve years—from B. C. 721 to B. C. 709—and makes him then succeeded by a certain Arceanus. Polyhistor assigns him a six months' reign, immediately before Elibus, or Belibus, who (according to the Canon) ascended the throne B. C. 702. It has commonly

been seen that these must be two different reigns, and that Merodach-baladan must therefore have been deposed in B. C. 700, and have recovered his throne in B. C. 702, when he had a second period of dominion lasting half a year. The inscriptions contain express mention of both reigns. Sargon states that in the twelfth year of his own reign he drove Merodach-baladan out of Babylon, after he had ruled over it for twelve years; and Sennacherib tells us that in his first year he defeated and expelled the same monarch, setting up in his place "a man named Belib." Putting all our notices together, it becomes apparent that Merodach-baladan was the head of the popular party, which resisted the Assyrian monarchs, and strove to maintain the independence of the country. It is uncertain whether he was self-raised or was the son of a former king. In 2 K. he is styled "the son of Baladan;" but the inscriptions call him "the son of *Yayin*;" whence it is to be presumed that Baladan was a more remote ancestor. There is some doubt as to the time at which Merodach-baladan sent his ambassadors to Hezekiah, for the purpose of inquiring as to the astronomical marvel of which Judea had been the scene (2 Chr. xxxii. 31). We prefer (so Rawlinson) to assign the embassy to Merodach-baladan's earlier reign, and bring it within the period, B. C. 721-709, which the Canon assigns to him. Now the fourteenth year of Hezekiah, in which the embassy should fall (2 K. xx. 6; Is. xxxviii. 5), appears to have been B. C. 713. This was the year of Merodach-baladan's first reign. The real object of the mission was most likely to effect a league between Babylon, Judea, and Egypt (Is. xx. 5, 6), in order to check the growing power of the Assyrians. The league, however, though designed, does not seem to have taken effect. Sargon sent expeditions both into Syria and Babylonia—seized the stronghold of Ashdod in the one, and completely defeated Merodach-baladan in the other. That monarch sought safety in flight, and lived for eight years in exile. At last he found an opportunity to return. In B. C. 703 or 702, Babylonia was plunged in anarchy—the Assyrian yoke was thrown off, and various native leaders struggled for the mastery. Under these circumstances the exiled monarch seems to have returned, and recovered his throne. Merodach-baladan had obtained a body of troops from his ally, the king of Susiana; but Sennacherib defeated the combined army in a pitched battle. Merodach-baladan fled to the "islands at the mouth of the Euphrates." He lost his recovered crown after wearing it for about six months, and spent the remainder of his days in exile and obscurity.

**Me'rom** (Heb. *height, high place*, Ges.), the **Waters of**, a place memorable in the history of the conquest of Palestine. Here, after Joshua had gained possession of the southern portions of the country, a confederacy of the northern chiefs assembled under the leadership of Jabin I, king of Hazor (Josh. xi. 5), and here they were encountered by Joshua, and completely routed (ver. 7). The name of Merom occurs nowhere in the Bible but in this passage, nor is it found in Josephus. In the *Onomasticon* of Eusebius the name is given as "Merran," and it is stated to be "a village twelve miles distant from Sebaste (Samaria), and near Dothaim." It is a remarkable fact that though by common consent "the waters of Merom" are identified with the lake through which the Jordan runs between *Baniās* and the Sea of Galilee—the Semechonitis of Josephus, and *Bahr*

*el-Huleh* of the modern Arabs—yet that identity cannot be proved by any ancient record. The nearest approach to proof is an inference from the statement of Josephus (v. 5, § 1), that the second Jabin (Judg. iv., v.) belonged to the city Asor (Hazor), which lay above the Lake of Semechonitis (compare Josh. vi. 5, 7, 10; Judg. iv. 2). The region to which the name of *Huleh* is attached—the *Ard el-Huleh* (= *land or province of Huleh*, Porter in Kitto)—is a depressed plain or basin, commencing on the N. of the foot of the slopes which lead up to the *Merj 'Ayin* and *Tell el-Kady*, and extending southward to the bottom of the lake which bears the same name—*Bahr el-Huleh*. On the E. and W. it is enclosed between two parallel ranges of hills; on the W. the highlands of Upper Galilee—the *Jebel Safat*; and on the E. a broad ridge or table land of basalt, thrown off by the southern base of Hermon, and extending downward beyond the *Huleh* till lost in the high ground E. of the Lake of Tiberias. The latter rises abruptly from the low ground, but the hills on the western side break down more gradually, and leave a tract of undulating table-land of varying breadth between them and the plain. This basin is in all about fifteen miles long and four to five wide, and thus occupies an area about equal to that of the Lake of Tiberias. It is the receptacle for the drainage of the highlands on each side, but more especially for the waters of the *Merj 'Ayin*, an elevated plateau which lies above it amongst the roots of the great northern mountains of Palestine. In fact, the whole district is an enormous swamp, probably at one time all covered with water, and even now in the rainy season mostly submerged. In form the lake is not far from a triangle, the base being at the N. and the apex at the S., where the Jordan flows out. It measures about three miles in each direction. Its level is placed by Van de Velde at 120 feet above the Mediterranean. The French expedition in 1864 made it 469 feet above the Mediterranean. (JORDAN.) The lake is fed by the Jordan, *Ain el-Mellahah* (a large fountain near the upper end of its western side), and numerous other springs and streams. The water of the lake is clear and sweet; it is covered in part by a broad-leaved plant, and abounds in water-fowl. Owing to its triangular form, a considerable space is left between the lake and the mountains at its lower end. This appears to be more the case on the W. than on the E., and the rolling plain thus formed is very fertile, and cultivated to the water's edge. Supposing the lake to be identical with the "waters of Merom," the plain just spoken of on its southwestern margin is the only spot which could have been the site of Joshua's victory, though, as the Canaanites chose their own ground, it is difficult to imagine that they would have encamped in a position from which there was literally no escape. But this only strengthens the difficulty already expressed as to the identification. Still the district of the Huleh will always possess an interest for the Biblical student, from its connection with the Jordan, and from the cities of ancient fame on its border—KEDESH, HAZOR, DAN or LAISH, CESAREA PHILIPPI, &c.

**Me-ro-nath-lite** (fr. Heb.), the = the native of a place called probably Meronoth, of which, however, no further traces have yet been discovered. Two Meronothites are named in the Bible:—JEREMIAH, who had the charge of the royal asses of King

<sup>1</sup> *El-Huleh* is probably a very ancient name, derived from or connected with HUL, son of Aram (Gen. x. 23).

David (1 Chr. xxvii. 30); and 2. **JABON**, one of those who assisted in the repair of the wall of Jerusalem after the Captivity (Neh. iii. 7).

**Meroz** (Heb. probably = *refuge*, Ges.), a place mentioned only in the Song of Deborah and Barak in Judg. v. 23, and there denounced because its inhabitants had refused to take any part in the struggle with Sisera. Meroz must have been in the neighborhood of the Kishon, but its real position is not known: possibly it was destroyed in obedience to the curse. A place named Merrus (but Eusebius Merrhan) is named by Jerome (*Onom.* "Merrom") as twelve miles N. of Sebaste, near Dothain, but this is too far S. to have been near the scene of the conflict. Far more feasible (so Mr. Grove) is the conjecture of Schwarz, that Meroz is to be found at *Merasas*—more correctly *el-Murusus*—a ruined site about four miles N. W. of *Beisan* (Beth-shean). Wilson (ii. 89) identifies Meroz with *Kefr Musr*, a village two or three miles S. of Mount Tabor, and Van de Velde and Von Raumer favor this (Kitto, Fairbairn).

**Me'ruth** (fr. Gr.), a corruption of IMMER 1 (1 Esd. v. 24).

**Me'sech** [-sck] (fr. Heb.) = MESHECH 1 (Ps. cxx. 5).

**Me'sha** (Heb. *retreat*? Ges.), the name of one of the geographical limits of the Jektanites when they first settled in ARABIA (Gen. x. 30). Mesha and SEPBAR (so Mr. E. S. Poole) must have fallen within the southwestern quarter of the peninsula; including the modern Yemen on the W., and the districts of 'Omân, Mahreh, Shihr, &c., as far as Hadramâwt, on the E. If Mesha was the western limit of the Jektanites, it must be sought for in northwestern Yemen. The seaport called *Mousa* or *Mouza*, mentioned by Ptolemy, Pliny, Arrian, &c., presents the most probable site (so Mr. Poole, with Bochart, Niebuhr, and Ritter). It was a town of note in classical times, but has since fallen into decay, if the modern Moosâ (situate in about 13° 40' N. lat., 43° 20' E. long.) be the same place. Michaelis, Rosenmüller, Gesenius, and Kalisch would identify Mesha with *Mesene*, once an island, now a portion of the delta at the mouth of the Tigris; Knobel and Fürst with the place and valley called *Ec'sha* or *Bisha* in the N. of Yemen; Mr. Forster, with the *Zames* range or Nejd mountains running S.W. from near the Persian Gulf. Porter (in Kitto) favors the last.

**Me'sha** (Heb. *deliverance*, Ges.; see No. 3 below). 1. The king of Moab in the reigns of Ahab and his sons Ahaziah and Jehoram, kings of Israel (2 K. iii. 4), and tributary to the first. When Ahab had fallen in battle at Ramoth-gilead, Mesha seized the opportunity afforded by the confusion consequent upon this disaster, and the feeble reign of Ahaziah, to shake off the yoke of Israel and free himself from the burdensome tribute of 100,000 wethers (A. V. "lambs;" see LAMB 4) and 100,000 rams with their wool. The country E. of the Jordan was rich in pasture for cattle (Num. xxxii. 1), the chief wealth of the Moabites consisted in their large flocks of sheep, and the king of this pastoral people is described as "a sheep-master," or owner of herds. (SHEPHERD.) When JEHORAM 1 succeeded to the throne of Israel, one of his first acts was to secure the assistance of Jehoshaphat in reducing the Moabites to their former condition of tributaries. The Moabites were defeated, and the king took refuge in his last stronghold and defended himself with the energy of despair. With 700 fighting men

he made a vigorous attempt to cut his way through the beleaguering army, and when beaten back he withdrew to the wall of his city, and there, in sight of the allied host, offered his first-born son, his successor in the kingdom, as a burnt-offering to Chemosh, the ruthless fire-god of Moab. His bloody sacrifice had so far the desired effect that the besiegers retired from him to their own land. There appears to be no reason for supposing that the son of the king of Edom was the victim on this occasion. It is more natural, and renders the narrative more vivid and consistent, to suppose that the king of Moab, finding his last resource fail him, endeavored to avert the wrath and obtain the aid of his god by the most costly sacrifice in his power.—2. Eldest son of Caleb the son of Hezron by his wife Azubah, as Kimchi conjectures; "father" (i. e. prince or founder) of Ziph (1 Chr. ii. 42). (MARESHAN 2.)—3. (Heb. *retreat*, Ges.). A Benjamite, son of Shalraim, by his wife Hodesh, who bare him in the land of Moab (1 Chr. viii. 9).

**Me'shach** [-shak] (fr. Pers. = *guest of the Shah*, Ges.; properly *ram*, then the name of the *sun-god* of the Chaldeans, Fii.), the name given to MISHAEL 3, one of Daniel's three companions, of the blood-royal of Judah, chosen from among the captives to be taught "the learning and the tongue of the Chaldeans" (Dan. i. 4), so that they might be qualified to "stand before" King Nebuchadnezzar (ver. 6) as his personal attendants and advisers (ver. 20). Upon Daniel's promotion, his three companions, by his influence, were set "over the affairs of the province of Babylon" (ii. 49). But notwithstanding their Chaldean education, these three young Hebrews were strongly attached to the religion of their fathers; and their refusal to join in the worship of the image on the plain of Dura gave a handle of accusation to the Chaldeans. The rage of the king, the swift sentence of condemnation passed upon the three offenders, their miraculous preservation from the fiery furnace heated seven times hotter than usual, the king's acknowledgment of the God of Shadrach, Meshach, and Abed-nego, with their restoration to office, are written in Dan. iii., and there the history leaves them.

**Me'shech** [-shek] (Heb. *a drawing out, selection*, Sim.; *a drawing, possession*, Ges.). 1. A son of Japheth (Gen. x. 2; 1 Chr. i. 5), and the progenitor of a race frequently noticed in Scripture in connection with Tubal, Magog, and other northern nations. (TONGUES, CONFUSION OF.) They appear as allies of Gog (Ez. xxxviii. 2, 3, xxxix. 1), and as supplying the Tyrians with copper and slaves (xxvii. 13); in Ps. cxx. 5 (A. V. "Mesech"), they are noticed as one of the remotest, and at the same time rudest nations of the world. Both the name (the LXX. and Vulgate have *Mosch*) and the associations favor the identification of Meshech with the *Moschi*, a people regarded on very sufficient grounds (so Rawlinson, *Essay xi. in App. to Hdt.* i.) as the ancestors of the Muscovites, who built Moscow, and still give name to Russia through the East. The position of the Moschi in the age of Ezekiel was probably the same as is described by Herodotus (iii. 94), viz. on the borders of Colchis and Armenia, where a mountain-chain connecting Anti-Taurus with Caucasus, was named after them the *Moschici Montes*, and where was also a district named by Strabo *Moschire*. The Moschi were once one of the most powerful nations of Western Asia, and not improbably occupied the whole of the district afterward named Cappadocia. The Assyrian monarchs had frequent wars with them. In the

Assyrian inscriptions the name appears under the form of *Muskai*.—2. Masu (1 Chr. i. 17).

**Me-shel-e-mi'ah** (fr. Heb. = whom *Jehovah repays or treats as a friend*, Ges.), a Korhite, son of Kore, of the sons of Asaph, who, with his seven sons and his brethren, was a porter or gate-keeper of the house of Jehovah in David's reign (1 Chr. ix. 21, xxvi. 1, 2, 9); = **SHELEMIAH** 6.

**Me-shez-a-bael** (fr. Heb. = *delivered of God*, Ges.). 1. Ancestor of **MESHULLAM** 13 (Neh. iii. 4).—2. One of the "heads of the people," probably a family, who sealed the covenant with Nehemiah (x. 21).—3. Father of Pethaliah, and descendant of Zerach the son of Judah (xi. 24).

**Me-shil'le-mith** (Heb. = **MESHILMOTH**, Ges., Fül.), son of Immer, a priest, and ancestor of Amasai or Maasai (Neh. xi. 13), and of Pashur and Adaiah (1 Chr. ix. 12); = **MESHILMOTH** 2.

**Me-shil'le-moth** (Heb. *those who requite*, Ges.; *requita'*, Fül.). 1. An Ephraimite, ancestor of Berechiah, a chief under Pekah (2 Chr. xxviii. 12).—2. **MESHILMOTH** (Neh. xi. 13).

\* **Me-sho'bab** (Heb. *returned*, Ges.), one of the Simcoite princes in Hezekiah's reign who smote the Hamites of Gedor 5 (1 Chr. iv. 34).

**Me-shul'tam** (Heb. *friend*, sc. of God). 1. Ancestor of Shaphan the scribe (2 K. xxii. 3).—2. Son of Zerubbabel (1 Chr. iii. 19).—3. A Gadite chief in Bashan in the reign of Jotham king of Judah (v. 13).—4. A Benjaminite chief, of the sons of Elpaal (viii. 17).—5. A Benjaminite, son of Hodaviah or Joed, and father of Sallu (ix. 7; Neh. xi. 7).—6. A Benjaminite chief, who lived at Jerusalem after the Captivity; son of Shephathiah (1 Chr. ix. 8).—7. The same as **SHALLUM** 6, high-priest and father of Bilhiah (ix. 11; Neh. xi. 11).—8. A priest, son of **MESHILMOTH** (1 Chr. ix. 12).—9. A Kohathite Levite in Josiah's reign, an overseer of the workmen in restoring the Temple (2 Chr. xxxiv. 12).—10. One of the "heads" (A. V. "chief men") sent by Ezra to Iddo, to gather together the Levites to join the caravan about to return to Jerusalem (Ezr. viii. 16); perhaps the same as—11. A chief man in Ezra's time, probably a Levite, who assisted Jonathan and Jahaziah in examining the marriages which some of the people had contracted with foreign wives (x. 15).—12. One of the descendants of Bani, who had married a foreign wife and put her away (x. 29).—13. Son of Berechiah and probably a priest, assisted in rebuilding the wall of Jerusalem as well as the Temple wall, adjoining which he had his "chamber," and his daughter was married to Johanan, the son of Tobiah the Ammonite (Neh. iii. 4, 30, vi. 18); compare No. 15, 16.—14. Son of Besodeiah; he assisted Jehoiada, the son of Paseah, in restoring the old gate of Jerusalem (iii. 6).—15. One, probably a priest or Levite, who stood at the left hand of Ezra when he read the Law to the people (viii. 4); perhaps the same as—16. A priest who sealed the covenant with Nehemiah (x. 7); compare No. 13.—17. One of the heads of the people who sealed the covenant with Nehemiah (ver. 20).—18. A priest, chief of the house of Ezra, in the days of high-priest Joiakim (xii. 13).—19. A priest in the days of high-priest Joiakim, and head of the family of Ginnethon (ver. 16).—20. A porter, or family of porters (ver. 25); compare **SHALLUM** 8, 9.—21. One of the princes of Judah, or priests (compare No. 13, 15, 16, above), who took part at the dedication of the wall of Jerusalem (xii. 33).

**Me-shul'le-meth** (Heb. *friend*, sc. of God, Ges.), daughter of Haruz of Jotbah; wife of Manasseh,

king of Judah, and mother of his successor Amon (2 K. xxi. 19).

**Me-se'ba-ite** (Heb. *Mitsbdaydh* = *gathering-place of Jehovah*, Fül.), the, a title of **JASIEL** (1 Chr. xi. 47 only). The word retains strong traces of **ZOBAB**, one of the petty Aramite kingdoms (so Mr. Grove). Gesenius and Fürst make it the name of a place otherwise unknown.

**Mes-o-pe-ta'mia** (Gr. the country *between rivers*) is the ordinary Greek and English rendering of **ARAM-NAHARAIM** or *Syria of the two rivers*, whereof we have frequent mention in the earlier books of Scripture (Gen. xxiv. 10; Deut. xxiii. 4; Judg. iii. 8, 10). (**ARAM**.) If we look to the signification of the name, we must regard Mesopotamia as the entire country between the two rivers—the **TIGRIS** and the **EUPHRATES**. This is a tract nearly 700 miles long, and from 20 to 250 miles broad, extending in a southeasterly direction from *Telek* (lat. 38° 23', long. 39° 18') to *Kurnah* (lat. 31°, long. 47° 30'). The Arabian geographers term it *the Island*, a name almost literally correct, since a few miles only intervene between the source of the Tigris and the Euphrates at *Telek*. It is for the most part a vast plain, but is crossed about its centre by the range of the *Sinjar* hills, running nearly E. and W. from about Mosul to a little below *Rakkeh*; and in its northern portion it is even mountainous, the upper Tigris valley being separated from the Mesopotamian plain by an important range, the *Mons Mauius* of Strabo, which runs from *Birehjik* to *Jezireh*. This district is always charming; but the remainder of the region varies greatly according to circumstances. (**ASSYRIA**; **BABEL**; **CHALDEA**.) The region which bears the name of Mesopotamia by way of eminence, both in Scripture and in the classical writers (so Rawlinson, and most scholars), is the northwestern portion of the tract already described, or the country between the great bend of the Euphrates (lat. 35° to 37° 30') and the upper Tigris. It consists of the mountain country extending from *Birehjik* to *Jezireh* upon the N.; and upon the S. of the great undulating Mesopotamian plain, as far as the *Sinjar* hills, and the river *Khabour*. The northern range, called by the Arabs *Karajah Dagh* toward the W., and *Jebel Tur* toward the E., does not attain to any great elevation. The streams from the N. side of this range are short, and fall mostly into the Tigris. Those from the S. flow down at very moderate intervals along the whole course of the range and gradually collect into two considerable rivers—the *Belik* (ancient Bilichus), and the *Khabour* (**HABOR** or **CHABORAS**)—which empty themselves into the Euphrates. S. of the mountains is the great plain already described, which between the *Khabour* and the Tigris is interrupted only by the *Sinjar* range, but W. of the *Khabour* is broken by several spurs from the *Karajah Dagh*, having a general direction from N. to S. Besides *Orfa* and *Harran* (**HARAN**; **UR**), the chief cities of modern Mesopotamia are *Mardin* and *Nisibin*, S. of the *Jebel Tur*, and *Diarbekr*, N. of that range, upon the Tigris. Of these places two, *Nisibin* and *Diarbekr*, were important from a remote antiquity, *Nisibin* being then *Nisibis*, and *Diarbekr*, *Amida*. We first hear of Mesopotamia in Scripture as the country where Nahor and his family settled after quitting *Ur* of the Chaldees (Gen. xxiv. 10). Here lived Bethuel and Laban; and hither Abraham sent his servant, to fetch Isaac a wife "of his own kindred" (ver. 58). Hither, too, a century later, came Jacob on the same errand; and hence he returned with his two wives

after an absence of twenty-one years. After this we have no mention of Mesopotamia till the close of the wanderings in the wilderness (Deut. xxiii. 4). (BALAAM.) About half a century later, we find, for the first and last time, Mesopotamia the seat of a powerful monarchy (Judg. iii.). (CRUSHAN-RISHATHAIM.) Finally, the children of Ammon, having provoked a war with David, "sent a thousand talents of silver to hire them chariots and horsemen out of Mesopotamia, and out of Syria-maachah, and out of Zobah" (1 Chr. xix. 6). Mesopotamia is mentioned in the N. T. in Acts ii. 9, vii. 2. According to the Assyrian inscriptions, Mesopotamia was inhabited in the early times of the empire (B. C. 1200-1100) by a vast number of petty tribes, each under its own prince, and all quite independent of one another. The Assyrian monarchs contended with these chiefs at great advantage, and by the time of Jehu (B. C. 880) had fully established their dominion over them. The tribes were all called "tribes of the Nairi," a term which some compare with the *Naharaim* of the Jews, and translate "tribes of the stream-lands." But this identification is very uncertain. It appears, however, (1.) that Mesopotamia was independent of Assyria till after David's time; (2.) that the Mesopotamians were warlike, and used chariots in battle; and (3.) that not long after David's time they lost their independence, their country being absorbed by Assyria. On the destruction of the Assyrian empire, Mesopotamia seems to have been divided between the Medes and the Babylonians. The conquests of CYRUS brought it wholly under the Persian yoke; and thus it continued to the time of ALEXANDER THE GREAT. At Alexander's death it fell to Seleucus, and formed a part of the great Syrian kingdom till wrested from Antiochus V. by the Parthians, about B. C. 160. Trajan conquered it A. D. 115, and formed it into a Roman province; but Adrian relinquished it A. D. 117. It was afterward more than once reconquered by Rome, but reverted to the Persians, A. D. 363. Since about A. D. 640 it has been, with various changes, mostly under Mohammedan sway. (ARABIA.) It is now a part of the Turkish empire.—Dr. Beke, whose view is favored by Dr. W. L. Alexander (in Kitto), Ayre, &c., maintains that the "Aram-naharim" or "Mesopotamia" and the "Padan-aram" of the Scriptures were in the region of Damascus, between the rivers Abana and Pharpar. HARAN.

\* **Mess'en-ger.** ANGEL; APOSTLE; EPISTLE; FOOTMAN 2; MESSIAH; PROPHET, &c.

**Mes-si'ah** (fr. Heb. *māshiah* or *māshīach* = *anointed* = CHRIST). This word is applicable in its first sense to any one anointed with the holy oil. (ANOINTING.) It is applied to the high-priest in Lev. iv. 3, 5, 16. The kings of Israel were called *anointed*, from the mode of their consecration (1 Sam. ii. 10, 35, xii. 3, 5, &c.). This word also refers to the expected Prince of the chosen people who was to complete God's purposes for them, and to redeem them, and of whose coming the prophets of the old covenant in all time spoke. It is twice used in the N. T. of Jesus (Jn. i. 41, iv. 25, A. V. "Messias"); but the equivalent "the CHRIST" (from the Greek) is constantly applied, first with the article as a title = the *Anointed One*, later without the article, as a proper name, JESUS CHRIST. Three points belong to this subject: 1. The expectation of a Messiah among the Jews; 2. The expectation of a suffering Messiah (SAVIOR); 3. The nature

and power of the expected Messiah (Son of God). The present article will contain a rapid survey of the first point only. The earliest gleam of the Gospel is found in the account of the fall (Gen. iii. 15). (ADAM.) Many interpreters understand by the seed of the woman, the Messiah only; but it is easier to think with Calvin that mankind, after they are gathered into one army by Jesus the Christ, the Head of the Church, are to achieve a victory over evil. The blessings in store for the children of Shem are remarkably indicated in the words of Noah, "Blessed be the Lord God of Shem," or literally "Blessed be Jehovah the God of Shem" (ix. 26). Next follows the promise to ABRAHAM, wherein the blessings to Shem are turned into the narrower channel of one family (xii. 2, 3). The promise is still indefinite; but it tends to the undoing of the curse of Adam, by a blessing to all the earth through the seed of Abraham, as death had come on the whole earth through Adam. A great step is made in Gen. xlix. 10, "The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until SHILOH come; and unto him shall the gathering of the people be." This is the first case in which the promises distinctly centre in one person. The next passage usually quoted is the prophecy of Balaam (Num. xxiv. 17-19). The *star* points indeed to the glory, as the sceptre denotes the power of a king. But it is doubtful whether the prophecy is not fulfilled in David (2 Sam. viii. 2, 14); and though David is himself a type of Christ, the direct Messianic application of this place is by no means certain. The prophecy of Moses (Deut. xviii. 18) claims attention. Does this refer to the Messiah? The reference to Moses in Jn. v. 45-47, "He wrote of me," seems to point to this passage. On the other hand, many critics would fain find here the divine institution of the whole prophetic order. Hengstenberg thinks it does promise that an order of prophets should be sent, but that the singular ("a prophet") is used in direct reference to the greatest of the prophets, Christ Himself, without whom the words would not have been fulfilled. The passages in the Pentateuch which relate to "the Angel of the Lord" have been thought by many to bear reference to the Messiah.—The second period of Messianic prophecy would include the time of David. Passages in the PSALMS are numerous which are applied to the Messiah in the N. T.; e. g. Ps. ii., xvi., xxii., xl., cx. Other Psalms quoted in the N. T. appear to refer to the actual history of another king, but may have an ulterior reference to the Messiah; e. g. Ps. xlv., lxxviii., lxxix., lxxii. The advance in clearness in this period is great. The name of Anointed, i. e. King, comes in, and the Messiah is to come of the lineage of David. He is described in His exaltation, with His great kingdom that shall be spiritual rather than temporal (Ps. ii., xxi., xl., cx.). He is seen in suffering and humiliation (xxii., xvi., xl.).—After the time of David the predictions of the Messiah ceased for a time; until those prophets arose whose works we possess in the canon of Scripture. This third period lasts from the reign of Uzziah to the Babylonish Captivity. The Messiah is a king and ruler of David's house, who shall come to reform and restore the Jewish nation and purify the church, as in Is. xi., xl.-lxvi. The blessings of the restoration, however, will not be confined to Jews; the heathen are made to share them fully (Is. ii., lxxvi.). Mic. v. 2 (comp. Mat. ii. 6) left no doubt in the mind of the Sanhedrim as to the birthplace of the Messiah. The line-

age of David is again alluded to in Zech. xii. 10-14. The time of the second Temple is fixed by Hag. ii. 9 for Messiah's coming; the "seventy weeks" of Dan. ix. 24 ff. still more definitely pointed out the period (see WEEK); and the coming of the Forerunner and of the Anointed are clearly revealed in Mal. iii. 1, iv. 5, 6.—The fourth period (after the close of the canon of the O. T.) is known to us in a great measure from allusions in the N. T. to the expectation of the Jews. The Pharisees and those of the Jews who expected Messiah at all, looked for a temporal prince only. The apostles themselves were infected with this opinion, till after the Resurrection (Mat. xx. 20, 21; Lk. xxiv. 21; Acts i. 6). Gleams of a purer faith appear, Lk. ii. 30, xxiii. 42; Jn. iv. 25. On the other hand there was a skeptical school which had discarded the expectation altogether. The expectation of a golden age that should return upon the earth, was common in heathen nations. This hope the Jews also shared; but with them it was associated with the coming of a particular person, the Messiah. It has been asserted that in Him the Jews looked for an earthly king, and that the existence of the hope of the Messiah may thus be accounted for on natural grounds and without a divine revelation. But the prophecies refute this: they hold out not a Prophet only, but a King and a Priest, whose business it should be to set the people free from sin, and to teach them the ways of God, as in Ps. xxii. xl, cx.; Is. ii. xi, liii. In these and other places too the power of the coming One reaches beyond the Jews and embraces all the Gentiles, which is contrary to the exclusive notions of Judaism. A fair consideration of all the passages will convince that the growth of the Messianic idea in the prophecies is owing to revelation from God (2 Pet. i. 19-21). **INSPIRATION; PROPHET.**

**Messias** (Gr.) = MESSIAH (Jn. i. 41; iv. 25).

**Metals.** The Hebrews, in common with other ancient nations, were acquainted with nearly all the metals known to modern metallurgy, whether as the products of their own soil or the results of intercourse with foreigners. One of the earliest geographical definitions is that which describes the country of Havilah as the land which abounded in gold, and the gold of which was good (Gen. ii. 11, 12). The first artist in metals was a Cainite, Tubal Cain, the son of Lamech, the forger or sharpener of every instrument of COPPER (A. V. "BRASS") and IRON (iv. 22). "Abram was very rich in cattle, in SILVER, and in gold" (xiii. 2); silver being the medium of commerce (MONEY), while gold existed in the shape of ornaments, during the patriarchal ages. TIN is first mentioned among the spoils of the Midianites taken when Balaam was slain (Num. xxxi. 22), and LEAD is used to heighten the imagery of Moses' triumphal song (Ex. xv. 10). Whether the ancient Hebrews were acquainted with STEEL, properly so called, is uncertain; the words so rendered in the A. V. (2 Sam. xxii. 35; Job xx. 24; Ps. xviii. 34; Jer. xv. 12) are in all other passages translated *brass*, and would be more correctly *copper*. The "northern iron" of Jer. xv. 12 is believed by commentators to be iron hardened and tempered by some peculiar process, so as more nearly to correspond with what we call *steel*; and the "flaming torches" of Nah. ii. 3 are probably the flashing steel scythes of the war-chariots which should come against Nineveh. Besides the simple metals, it is supposed that the Hebrews used the mixture of copper and tin known as *bronze*, and probably in all cases in which copper or "brass" is mentioned as in any way manufactured,

bronze is to be understood as the metal indicated. (AMBER.) With the exception of iron, gold is the most widely diffused of all metals. Almost every country in the world has in its turn yielded a certain supply, and as it is found most frequently in alluvial soil, among the débris of rocks washed down by the torrents, it was known at a very early period, and was procured with little difficulty. We have no indications of gold streams or mines in Palestine. The Hebrews obtained their principal supply from Southern Arabia, and the commerce of the Persian Gulf. It was probably brought in form of ingots (Josh. vii. 21; A. V. "wedge," lit. *tongue*), and was rapidly converted into articles of ornament and use. (ORNAMENTS, PERSONAL, &c.) The great abundance of gold in early times is indicated by its entering into the composition of every article of ornament and almost all of domestic use. Among the spoils of the Midianites taken by the Israelites in their bloodless victory when Balaam was slain, were ear-rings and jewels to the amount of 16,750 shekels of gold (Num. xxxi. 48-54), equal in value to about \$150,000 of our present money. 1,700 shekels of gold (worth more than \$15,000) in nose-jewels (A. V. "ear-rings") alone were taken by Gideon's army from the slaughtered Midianites (Judg. viii. 26). These numbers, though large, are not incredibly great, when we consider that the country of the Midianites was at that time rich in gold streams, since exhausted, and that like the Malays of the present day, and the Peruvians of the time of Pizarro, they carried most of their wealth about them. But the amount of treasure accumulated by David from spoils taken in war, is so enormous, that we are tempted to conclude the numbers exaggerated. (ABIJAH I.) From the gold shields of Hadadezer's army, &c., he had collected (1 Chr. xxii. 14) 100,000 talents of gold and 1,000,000 of silver; to these must be added his own contribution of 3,000 talents of gold and 7,000 of silver (xxix. 2-4), and the additional offerings of the people, the total value of which is reckoned at nearly \$4,500,000,000. The numbers given by Josephus (vii. 14, § 2) are only one-tenth of those in 1 Chronicles, but the sum is still enormous. Though gold was thus common, silver appears to have been the ordinary medium of commerce. The first commercial transaction of which we possess the details was the purchase of Ephron's field by Abraham for 400 shekels of silver (Gen. xxiii. 16); and generally in the O. T. "MONEY" in the A. V. is literally *silver* (xvii. 12, xx. 16, xxvii. 28, &c.). The first payment in gold is mentioned in 1 Chr. xxi. 25, where David buys the threshing-floor of ARAUNAH for 600 shekels of gold by weight. With this exception there is no case in the O. T. in which gold is alluded to as a medium of commerce; the Hebrew coinage may have been partly gold, but we have no proof of it. Silver was brought into Palestine in the form of plates from Tarshish, with gold and ivory (1 K. x. 22; 2 Chr. ix. 21; Jer. x. 9). The accumulation of wealth in the reign of Solomon was so great that silver was but little esteemed; "the king made silver to be in Jerusalem as stones" (1 K. x. 21, 27). With the treasures brought out of Egypt, not only the ornaments but the ordinary metal-work of the tabernacle were made. (TABERNACLE; TEMPLE.) From a comparison of the different amounts of gold and silver collected by David, it appears that the proportion of the former to the latter was one to nine nearly. "BRASS," or more properly copper, was a native product of Palestine, "a land whose stones are

iron, and out of whose hills thou mayest dig *copper*" (A. V. "brass;" Deut. viii. 9; Job xxviii. 2). It was so plentiful in the days of Solomon that the quantity employed in the Temple could not be estimated, it was so great (1 K. vii. 47). There is strong reason to believe that brass, a mixture of copper and zinc, was unknown to the ancients. To *zinc* no allusion is found. But tin was well known, and from the difficulty which attends the toughening pure copper so as to render it fit for hammering, it is probable that the mode of deoxidizing copper by the admixture of small quantities of tin had been early discovered. ARMS (2 Sam. xxi. 16; Job xx. 24; Ps. xviii. 34) and armor (1 Sam. xvii. 5, 6, 38) were made of this metal, which was capable of being so wrought as to admit of a keen and hard edge. The Egyptians employed it in cutting the hardest granite. (HANDICRAFT; TOOL.) Iron, like copper, was found in the hills of Palestine. The "iron mountain" in the Transjordanic region is described by Josephus (*B. J.* iv. 8, § 2), and was remarkable for producing a particular kind of palm. Iron-mines are still worked by the inhabitants of *Kefr Haneh* in the S. of the valley *Zaharâni*, between *Hâsbeiya* and Sidon. Tin and lead were both known at a very early period, though there is no distinct trace of them in Palestine. The former was among the spoils of the Midianites (Num. xxxi. 22), who might have obtained it in their intercourse with the Phœnician merchants (comp. Gen. xxxvii. 25, 36), who themselves procured it from Tarshish (Ez. xxvii. 12) and the tin countries of the West. Antimony (2 K. ix. 30; Jer. iv. 30, A. V. "painting"), in the form of powder, was used by the Hebrew women for coloring their eyelids and eyebrows. (PAINT.) Further information will be found in the articles upon the several metals, and under MINES; REFINER.

**Me-te'rus.** According to 1 Esd. v. 17, "the sons of Meterus" (not in Ezr. and Neh.) returned with Zerubbabel.

**Me'theg-am'mah** (Heb., see below), a place which David took from the Philistines, apparently in his last war with them (2 Sam. viii. 1). In the parallel passage (1 Chr. xviii. 1), "Gath and her daughter-towns" (A. V. "towns") is substituted for Me'theg-ammah. The legion of interpretations may be reduced to two:—1. That adopted by Gesenius and Fürst, in which Ammah is taken = *mother-city*, *metropolis* (comp. 2 Sam. xx. 19), and Me'theg-ammah = *the bridle of the mother city*—viz. of Gath, the chief town of the Philistines. 2. That of Ewald, who, taking Ammah as = *forearm*, treats the words Me'theg-ammah (= *bridle of the arm*) as a metaphor to express the perfect manner in which David had smitten and humbled his foes.

**Me-thu'sa-el** (fr. Heb. = *man of God*, Ges.), son of Mehujael, fourth in descent from Cain, and father of LAMECH 1 (Gen. iv. 18).

**Me-thu'se-lah** (fr. Heb. = *man of offspring*, Mr. Barry; *man of the dart*, Ges.), son of Enoch; sixth in descent from Seth, and father of LAMECH 2 (Gen. v. 25–27; 1 Chr. i. 3). Methuselah's life is 969 years, a period exceeding that of any other PATRIARCH, and, according to the Hebrew CHRONOLOGY, bringing his death down to the very year of the flood.

**Me-n'nim** (Heb.) = MEHUNIM and MEHUNIMS (Neh. vii. 52).

**Me-n'zal** (Heb.) (Ez. xxvii. 19, margin). UZAL.

**Me'za-hab** (fr. Heb. *water* [i. e. *lustre*] of gold, Ges.; *seed* [i. e. *shoot*] of the sun, Fii.; *what is gold?* Rashi), father of Matred and grandfather of Mehet-

abel, who was wife of Hadar or Hadad, king of Edom (Gen. xxxvi. 39; 1 Chr. i. 50).

**Mi'a-min** (fr. Heb. = *from the right hand*, or = BENJAMIN, Ges.; also written MIJAMIN). 1. A layman of the sons of Parosh, who had married a foreign wife and put her away at the bidding of Ezra (Ezr. x. 25).—2. A priest or family of priests who went up from Babylon with Zerubbabel (Neh. xii. 5); probably = MIJAMIN 2 and MINIAMIN 2.

**Mib'har** (Heb. *choice*, Ges.; *youth, a youth*, Fii.). "Mibhar the son of Haggeri" is the name of one of David's heroes in 1 Chr. xi. 38. The verse in which it occurs appears to be corrupt, for in 2 Sam. xxiii. 36 we find, instead of "Mibhar the son of Haggeri," "of Zobah, Bani the Gadite." It is easy to see, if the latter be the true reading, how the Heb. *Bâni haggaddi* (= "Bani the Gadite") could be corrupted into *ben-haggeri* (= "son of Haggeri"). But that "Mibhar" is a corruption of *mîlatsôbâh* = "of Zobah," is not so clear, though not absolutely impossible. It would seem from the LXX. of 2 Sam., that both readings originally coexisted.

**Mib'sam** (Heb. *sweet odor*, Ges.). 1. A son of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), not elsewhere mentioned. The signification of his name has led some to propose an identification of the tribe sprung from him with some one of the Abrahamic tribes settled in Arabia aromatifera (i. e. spice-bearing Arabia).—2. A son of Simeon (1 Chr. iv. 25), perhaps named after the Ishmaelite Mibsan. MISHMA.

**Mib'zar** (fr. Heb. = *for/ress*, Ges.), one of the phylarchs or "dukes" of Edom (1 Chr. i. 53) or Esau (Gen. xxxvi. 43) after the death of Hadad or Hadar.

**Mi'cah** (Heb. *who like Jehovah?* = MICAH, Ges.).

1. An Israelite whose familiar story is preserved in Judg. xvii., xviii., furnishing us with a picture of the interior of a private Israelite family of the rural districts, which in many respects stands quite alone in the sacred records, and has probably no parallel in any literature of equal age. But apart from this the narrative has several points of special interest to students of Biblical history in the information which it affords as to the condition of the nation. We see (1.) how completely some of the most solemn and characteristic enactments of the Law had become a dead letter. Micah was evidently a devout believer in Jehovah. His one anxiety is to enjoy the favor of Jehovah (xvii. 13); the formula of blessing used by his mother and his priest invokes the same awful name (2, xviii. 6); and yet so completely ignorant is he of the Law of Jehovah, that the mode which he adopts of honoring Ilm is to make a molten and graven image, teraphim or images of domestic gods, and to set up an unauthorized priesthood, first in his own family (xvii. 5), and then in the person of a Levite not of the priestly line (12). (2.) The story also throws a light on the condition of the Levites. Here we have a Levite belonging to Bethlehem-judah, a town not allotted to his tribe; wandering forth to take up his abode wherever he could find a residence; undertaking the charge of Micah's idol-chapel; and lastly, carrying off the property of his master and benefactor, and becoming the first priest to another system of false worship. But the transaction becomes still more remarkable when we consider (3.) that this was no obscure or ordinary Levite. He belonged to the chief family in the tribe, nay, we may say to the chief family of the nation, for though not himself a priest, he was closely allied to the priestly house, and was the grandson of no less a person

than the great Moses himself. (JONATHAN 5; MANASSEH 5.) (4.) The narrative gives us a most vivid idea of the terrible anarchy in which the country was placed, when "there was no king in Israel, and every man did what was right in his own eyes," and shows how urgently necessary a central authority had become. A body of 600 men completely armed, besides the train of their families and cattle, traverses the length and breadth of the land, not on any mission for the ruler or the nation, as on later occasions (2 Sam. ii. 12, &c., xx. 7, 14), but simply for their private ends. Entirely disregarding the rights of private property, they burst in wherever they please along their route, and plundering the valuables and carrying off persons, reply to all remonstrances by taunts and threats. As to the date of these events, the narrative gives us no direct information beyond the fact that it was before the beginning of the monarchy; but we may at least infer that it was also before the time of Samson, because in this narrative (xviii. 12) we meet with the origin of the name MAHANAH-DAN, a place which already bore that name in Samson's childhood (xiii. 25). The date of the record itself may perhaps be more nearly arrived at. That, on the one hand, it was after the beginning of the monarchy is evident from the references to the ante-monarchical times (xviii. 1, xix. 1, xxi. 25). The reference to the establishment of the house of God in Shiloh (xviii. 31) seems also to point to the early part of Saul's reign (so Mr. Grove). (JUDGES, BOOK OF.)—2. A descendant of Joel the Reubenite (1 Chr. v. 3).—3. Son of Mephibosheth, and grandson of Jonathan (viii. 34, 35, ix. 40, 41); = MICHA 1.—4. A Levite descended from Asaph (ix. 15); = MICHA 3 and MICHAIAH 2.—5. A Kohathite Levite, eldest son of Uzziel (xxiii. 20); = MICHAH.—6. Father of Abdon in Josiah's reign (2 Chr. xxxiv. 20); = MICHAIAH 1.—7. The sixth in order of the minor prophets, according to the arrangement in our present canon; in the LXX. he is placed third, after Hosea and Amos. (BIBLE.) To distinguish him from MICHAIAH the son of Imnah, the contemporary of Elijah, he is called the MORASTHITE, i. e. a native of Moresheth, or some place of similar name, which Jerome and Eusebius call Morasthi and identify with a small village near Eleutheropolis to the E., where formerly the prophet's tomb was shown, though in the days of Jerome it had been succeeded by a church. (MOR-ESTHETH-GATH.) As little is known of the circumstances of Micah's life as of many of the other prophets. Pseudo-Epiphanius makes him, contrary to all probability, of the tribe of Ephraim. For rebuking Jehoram for his impieties, Micah, according to the same authority, was thrown from a precipice, and buried at Morathi in his own country, hard by the cemetery of Enakim, where his sepulchre was still to be seen. The period during which Micah exercised the prophetic office is stated, in the superscription to his prophecies, to have extended over the reigns of Jotham, Ahaz, and Hezekiah, kings of Judah, being thus not longer than fifty-nine years (B. C. 756-697), from the accession of Jotham to the death of Hezekiah, nor shorter than sixteen years (B. C. 742-726), from the death of Jotham to the accession of Hezekiah. (ISRAEL, KINGDOM OF.) In either case he would be contemporary with Hosea and Amos during part of their ministry in Israel, and with Isaiah in Judah. One of his prophecies (Mic. iii. 12) is distinctly assigned to the reign of Hezekiah (Jer. xxvi. 18), and was probably delivered before

the great passover which inaugurated the reformation in Judah. The dates of the others are conjectural. The time assigned to the prophecies by the only direct evidence which we possess, agrees so well with their contents that it may fairly be accepted as correct. Certain portions of Micah's prophecy may have been uttered in the reigns of Jotham and Ahaz (so Mr. Wright, original author of this article), and for the probability of this there is strong internal evidence, while they may have been collected as a whole in the reign of Hezekiah and committed to writing. The book thus written may have been read in the presence of the king and the whole people, on some great fast or festival day. In the first years of Hezekiah's reign the idolatry which prevailed in the time of Ahaz was not eradicated, and in assigning the date of Micah's prophecy to this period there is no anachronism in the allusions to idolatrous practices. Wells assigns the delivery of ch. i. to the contemporary reigns of Jotham, king of Judah, and of Pekah, king of Israel; ii. 1-iv. 8 to those of Ahaz, Pekah, and Hosea; iii. 12 to the last year of Ahaz, and the remainder of the book to the reign of Hezekiah. But, at whatever time the several prophecies were first delivered, they appear in their present form as an organic whole, marked by a certain regularity of development. Three sections, omitting the superscription, are introduced by the same phrase, "hear ye," and represent three natural divisions of the prophecy—I. ii.; iii.-v.; vi., vii.—each commencing with rebukes and threatenings and closing with a promise. The first section opens with a magnificent description of the coming of Jehovah to judgment for the sins and idolatries of Israel and Judah (i. 2-4), and the sentence pronounced upon Samaria (5-9) by the Judge Himself. The prophet sees the danger which threatens his country, and traces in imagination the devastating march of the Assyrian conquerors (i. 8-16). The impending punishment suggests its cause, and the prophet denounces a woe upon the people generally for the corruption and violence which were rife among them, and upon the false prophets who led them astray by pandering to their appetites and luxury (ii. 1-11). The sentence of captivity is passed upon them (10), but is followed instantly by a promise of restoration and triumphant return (ii. 12, 13). The second section is addressed especially to the princes and heads of the people; their avarice and rapacity are rebuked in strong terms; and the judgments of God are denounced upon the rulers, false prophets, and priests (iii. 1-11). "Therefore shall Zion for your sake be ploughed as a field, and Jerusalem shall become heaps, and the mountain of the house" (= Temple) "as the high places of the forest" (= the uncultivated woodland heights) (iii. 12). But the threatening is again succeeded by a promise of restoration, and in the glories of the Messianic kingdom the prophet loses sight of the desolation which is to befall his country. The predictions in this section form the climax of the book, and Ewald arranges them in four strophes, consisting of from seven to eight verses each (iv. 1-8, iv. 9-v. 2, v. 3-9, v. 10-15), except the last, which is shorter. In the last section (vi., vii.), Jehovah, by a bold poetical figure, is represented as holding a controversy with His people, pleading with them in justification of His conduct toward them and the reasonableness of His requirements. The dialogue form in which ch. vi. is cast renders the picture very dramatic and striking. The whole concludes with a tri-

umphant song of joy at the great deliverance, like that from Egypt, which Jehovah will achieve, and a full acknowledgment of His mercy and faithfulness to His promises (16-20). The last verse is reproduced in the song of Zacharias (Lk. i. 72, 73). The predictions uttered by Micah relate to the invasions of Shalmaneser (Mic. i. 6-8; 2 K. xvii. 4-6) and Sennacherib (Mic. i. 9-16; 2 K. xviii. 13), the destruction of Jerusalem (Mic. iii. 12, vii. 13), the Captivity in Babylon (iv. 10), the return (iv. 1-8, vii. 11), the establishment of a theocratic kingdom in Jerusalem (iv. 8), and the Ruler who should spring from Bethlehem (v. 2). The destruction of Assyria and Babylon is supposed to be referred to in v. 5, 6, vii. 8, 10. It is remarkable that the prophecies commence with the last words recorded of the prophet's namesake, Micaiah the son of Im-lah, "Hearken, O people, every one of you" (1 K. xxii. 28). The style of Micah has been compared with that of Hosea and Isaiah. His diction is vigorous and forcible, sometimes obscure from the abruptness of its transitions, but varied and rich in figures derived from the pastoral (Mic. i. 8, ii. 12, v. 4, 5, 7, 8, vii. 14) and rural life of the lowland country (i. 6, iii. 12, iv. 3, 12, 13, vi. 15), whose vines and olives and fig-trees were celebrated (1 Chr. xxvii. 27, 28), and supply the prophet with so many striking allusions (Mic. i. 6, iv. 3, 4, vi. 15, vii. 1, 4) as to suggest that, like Amos, he may have been either a herdsman or a vine-dresser, who had heard the howling of the jackals (i. 8, A. V. "dragons") as he watched his flocks or his vines by night, and had seen the lions slaughtering the sheep (v. 8). The language of Micah is quoted in Mat. ii. 5, 6, and his prophecies are alluded to in Mat. x. 35, 36; Mk. xiii. 12; Lk. xii. 63; Jn. vii. 42. **INSPIRATION; PROPHECY.**

**Mi-cal'ah** [-ka'yah] (Heb. = MICAHIAH and MICAH), son of Im-lah, a prophet of Samaria, who, in the last year of the reign of AHAH, king of Israel, predicted his defeat and death, B. C. 877. The circumstances were as follows:—Three years after the great battle with Ben-hadad (1 K. xx. 29, 30), Ahab proposed to JEHOASHAPHAT that they should jointly go up to battle against Ramoth-gilead. Jehoshaphat assented in cordial words to the proposal; but suggested that they should first "inquire at the word of Jehovah." Accordingly, Ahab assembled 400 prophets, while, in an open space at the gate of the city of Samaria, he and Jehoshaphat sat in royal robes to meet and consult them. The prophets unanimously gave a favorable response; and among them, Zedekiah the son of Chenaanah made horns of iron as a symbol, and announced, from Jehovah, that with those horns Ahab would push the Assyrians till he consumed them. Jehoshaphat was dissatisfied with the answer, and asked if there was no other prophet of Jehovah at Samaria? Ahab replied that there was yet one—Micaiah the son of Im-lah; but, he added, "I hate him, for he does not prophesy good concerning me, but evil." Micaiah was, nevertheless, sent for; and after an attempt had in vain been made to tamper with him, he first expressed an ironical concurrence with the 400 prophets, and then openly foretold the defeat of Ahab's army and the death of Ahab himself. And in opposition to the other prophets, he said, that he had seen Jehovah sitting on His throne, and all the host of Heaven standing by Him, on His right hand and on His left: that Jehovah said, Who shall persuade Ahab to go up and fall at Ramoth-gilead? that a spirit came forth and said

that he would do so; and on being asked, Where-with? he answered, that he would go forth and be a lying spirit in the mouth of all the prophets. Irritated by the account of the vision, Zedekiah struck Micaiah on the cheek, and Ahab ordered Micaiah to be taken to prison, and fed on bread and water till his return to Samaria. Josephus relates several details not contained in the Bible, some of which are probable, while others are very unlikely; but for none of which does he give any authority. Thus, he says that Micaiah was already in prison, when sent for to prophesy before Ahab and Jehoshaphat, and that it was Micaiah who had predicted death by a lion to the son of a prophet, under the circumstances mentioned in 1 K. xx. 35, 36, and who had rebuked Ahab after his brilliant victory over the Syrians for not putting Ben-hadad to death. The history of Micaiah is an exemplification in practice, of contradictory predictions being made by different prophets, the false and the true (Deut. xviii. 21, 22). **DIVINATION; IDOLATRY; MAGIC; PROPHECY.**

**Mi'cha** [-ka] (Heb. = MICAH and MICAHIAH, Ges., Fü.). 1. Son of Mephibosheth (2 Sam. ix. 12); = MICAH 3.—2. A Levite, or family of Levites, who signed the covenant with Nehemiah (Neh. x. 11).—3. Father of Mattaniah, a Gershonite Levite and descendant of Asaph (xi. 17, 22); = MICAH 4 and MICAHIAH 2.—4. A Simeonite, father of Ozias, one of the three governors of Bethulia in the time of Judith (Jd. vi. 15).

**Mi'cha-el** [usually pronounced mi'kel] (Heb. *who like God?* Ges., Fü.). 1. An Asherite, father of Sethur the spy (Num. xiii. 13).—2. Son of Abihail; one of the Gadites who settled in Bashan (1 Chr. v. 13).—3. Another Gadite, ancestor of Abihail (ver. 14).—4. A Gershonite Levite, ancestor of Asaph (vi. 40).—5. One of the sons of Izrahiah, "chief men" of Issachar (vii. 3). (ORADIAH 2).—6. A Benjamite chief, of the sons of Beriah (viii. 16).—7. One of the captains of the "thousands" of Manasseh who joined David at Ziklag (xii. 20).—8. The father, or ancestor, of Omri, chief of Issachar in David's reign (xxvii. 18).—9. One of the sons of Jehoshaphat murdered by their elder brother Jehoram (2 Chr. xxi. 2, 4).—10. Father or ancestor of Zebadiah who returned with Ezra (Ezr. viii. 8; 1 Esd. viii. 34).—11. "One," or "the first of the chief princes" or archangels (Dan. x. 13; compare Jude 9; ANGELS; ARCHANGEL), described in Dan. x. 21 as the "prince" of Israel, and in xii. 1 as "the great prince which standeth" in time of conflict "for the children of thy people." All these passages in the O. T. belong to that late period of its Revelation, when, to the general declaration of the angelic office, was added the division of that office into parts, and the assignment of them to individual angels. As GABRIEL represents the ministration of the angels toward men, so Michael is the type and leader of their strife, in God's name and His strength, against the power of Satan. In the O. T., therefore, he is the guardian of the Jewish people in their antagonism to godless power and heathenism. In the N. T. (Rev. xii. 7) he fights in heaven against the dragon—"that old serpent called the Devil and Satan, which deceiveth the whole world;" and so takes part in that struggle, which is the work of the Church on earth. In Jude 9 (compare 2 Pet. ii. 11) we are told that "Michael the archangel, when contending with the devil he disputed about the body of MOSES, durst not bring against him a railing accusation, but said, The Lord rebuke thee." The allusion (so Mr. Barry) seems

to be to a Jewish legend attached to Deut. xxiv. 6. The Targum of Jonathan attributes the burial of Moses to the hands of the angels of God, and particularly of the archangel Michael. Later traditions set forth how Satan disputed the burial, claiming for himself the dead body, because of the Egyptian's blood (Ex. ii. 12) on Moses' hands. The spirit of Michael's answer (fr. Zech. iii. 1) is the reference to God's mercy alone for justification, and the leaving of all vengeance and rebuke to Him; and in this spirit it is quoted by the apostle. Some have explained "the body of Moses" to be the Jewish, as "the body of Christ" is the Christian Church; but the analogy is unwarrantable. The Rabbinical traditions about Michael are very numerous. Many (Luther, Hengstenberg, Dr. W. L. Alexander [in Kitto], Prof. Douglas [in Fairbairn], &c.) maintain that Michael = the Messiah or Lord Jesus Christ (compare Dan. x. 21, xii. 1 with ix. 25; Rev. xii. 7 with 1 Jn. iii. 8). "Michael designates Him," says Prof. Douglas, "as does also the title 'Angel' or 'Archangel,'" not simply in His Divine essence, but in an official character of subordination, as the Messenger of Jehovah and the Captain of the Lord's host. Professor Douglas compares the answer of Michael in Jude 9 with those of Christ in Mat. iv. 4, 7, 10, and remarks that the opposition of Michael and the devil here "is without a parallel in Scripture, if Michael be a created angel; whereas it is a very common opposition indeed, if Michael be Christ."

**Mīchab** (Heb. = מִיכָאֵל), eldest son of Uzziel (1 Chr. xxiv. 24, 25); = מִיכָאֵל.

**Mīchal-ah** [-ka'yah] (Heb. *who like Jehovah?* Ges.).

1. Father of Achbor, a man of high rank in the reign of Josiah (2 K. xxii. 12); = מִיכָאֵל 6.—2. Son of Zaccur, a descendant of Asaph (Neh. xii. 35); = מִיכָאֵל 4 and מִיכָאֵל 3.—3. One of the priests at the dedication of the wall of Jerusalem (xii. 41).—4. Rehoboam's wife and Abijah's mother, daughter of Uriel of Gibeah (2 Chr. xiii. 2). (MAACHAH 3.)—5. One of the princes whom Jehoshaphat sent to teach the Law in the cities of Judah (xvii. 7).—6. Son of Gemariah, and grandson of Shaphan the scribe. After Baruch had read, in public, prophecies of Jeremiah announcing imminent calamities, Michaiah went and declared them to all the princes assembled in King Jehoiakim's house; and the princes forthwith sent for Baruch to read the prophecies to them (Jer. xxxvi. 11-14).

**Mīchal** (Heb. = מִיכָאֵל, Ges.), the younger of King Saul's two daughters (1 Sam. xiv. 49). The king had proposed to bestow on David his eldest daughter **MERAB**; but apparently altering his mind, married her to Adriel the Meholathite (xviii. 19). Michal fell violently in love with the young hero. Saul embraced the opportunity which this afforded him of exposing his rival to the risk of death. The price fixed on Michal's hand was no less than the slaughter of a hundred Philistines. For these the usual "dowry," by which, according to the custom of the East (MARRIAGE), the father is paid for his daughter, was relinquished. David, by a brilliant feat, doubled the tale of victims, and Michal became his wife. It was not long before the strength of her affection was put to the proof. They seem to have been living at Gibeah. After one of Saul's attacks of frenzy, Michal learned that the house was being watched by the myrmidons of Saul, and that it was intended on the next morning to attack her husband as he left his door (xix. 11). Like a true soldier's wife, she met stratagem by

stratagem. She first provided for David's safety by lowering him out of the window; to gain time for him to reach the residence of Samuel, she next dressed up the bed as if still occupied by him: the teraphim, or household god, was laid in bed, its head enveloped, like that of a sleeper, in the usual net of goat's hair for protection from goats (so Mr. Grove; A. V. "and put a pillow of goat's hair for his bolster"), the rest of the figure covered with the wide *beyod* or plaid (A. V. "cloth;" see DRESS, III. 4). She feigned that David was sick; and prevented the king's messengers from executing the command to take David till the peremptory order was given, "Bring him up to me in the bed, that I may slay him." Saul's messengers forced their way into the innermost apartment, and there discovered the deception which had been played off upon them with such success. Saul's rage may be imagined: his fury was such that Michal was obliged to fabricate a story of David's having attempted to kill her. This was the last time she saw her husband for many years; and when the rupture between Saul and David had become open and incurable, Michal was married to Phalti or Phaltiel of Gallim (1 Sam. xxv. 44; 2 Sam. iii. 15). After the death of her father and brothers at Gilboa, Michal and her new husband appear to have betaken themselves with the rest of the family of Saul to the eastern side of the Jordan. After Abner made his overtures to David, the latter sent messengers to Ish-bosheth to demand his lost wife (iii. 12 ff.). On the road leading up from the Jordan valley to the Mount of Olives we first encounter her with her husband—Michal under the joint escort of David's messengers and Abner's twenty men, on the way to David at Hebron, the submissive Phaltiel behind, bewailing the wife thus torn from him. It was at least fourteen years since David and she had parted at Gibeah, since she had watched him disappear down the cord into the darkness, and had perilled her own life for his against the rage of her insane father. That David's love for his absent wife had undergone no change in the interval seems certain from the eagerness with which he reclaims her as soon as the opportunity is afforded him. The meeting took place at Hebron. How Michal comforted herself in the altered circumstances of David's household we are not told; but it is plain from the subsequent occurrences that something had happened to alter the relations of herself and David. The alienation was probably mutual, and one outburst, probably of a petulant and jealous temper inherited from her father, produced the rupture between them which closes our knowledge of Michal. It was the day of David's greatest triumph, when he brought the Ark of Jehovah from its temporary resting-place to its home in the newly-acquired city. Michal, from the window of her apartments in the royal harem, watched the procession approach; the motions of her husband shocked her as undignified and indecent, "she despised him in her heart." After the exertions of the long day were over, the king was received by his wife with a bitter taunt which showed how incapable she was of appreciating either her husband's temper or the service in which he had been engaged. David's retort was a tremendous one, conveyed in words which once spoken could never be recalled. It gathered up all the differences between them which made sympathy no longer possible, and we do not need the assurance of the sacred writer, that "Michal had no child unto the

day of her death," to feel quite certain that all intercourse between her and David must have ceased from that date (vi. 20 ff.; 1 Chr. xv. 29). Her name appears but once again (2 Sam. xxi. 8).  
**MERAB.**

**Mi-che'as** (L. *Mi-hæas*, fr. Heb.) = the prophet MICAH 7 the Morasthite (2 Esd. i. 39).

**Mich'mas** (Heb.) = MICHMASH (Ezr. ii. 27; Neh. vii. 31).

**Mich'mash** (Heb. *something hidden*, Ges.; *place of Chemosh*, Fū.), a town which is known to us almost solely by its connection with the Philistine war of Saul and Jonathan (1 Sam. xiii., xiv.). It has been identified with great probability in a village which still bears the name of *Mukhanas*, and stands at about seven miles N. of Jerusalem, on the northern edge of the *Wady Suweinit*—in some maps *Wady Fuwar*—which forms the main pass of communication between the central highlands on which the village stands, and the Jordan valley at Jericho. The place was thus situated in the very middle of the tribe of Benjamin. But though in the heart of Benjamin, it is not named in the list of the towns of that tribe (compare Josh. xviii.), but first appears as one of the chief points of Saul's position at the outbreak of the war. Michmash was soon occupied by the Philistines, and was their furthest eastern post. But it was destined to witness their sudden overthrow. (JONATHAN 1.) Unless MAKAZ be Michmash—an identification for which we have only the authority of the LXX.—we hear nothing of the place from this time till the invasion of Judah by Sennacherib in the reign of Hezekiah (Is. x. 28). After the Captivity, 122 men of Michmash ("Michmas," A. V.) returned (Ezr. ii. 27; Neh. vii. 31). At a later date it became the residence of Jonathan Maccabeus, and the seat of his government (1 Mc. ix. 73). In the time of Eusebius and Jerome (*Onom.* "Machmas") it was "a very large village retaining its ancient name, and lying near Ramah in the district of *Ælia* (Jerusalem), at nine miles distance therefrom." Immediately below the village the valley spreads out to a considerable width—perhaps half a mile; and its bed is broken up into an intricate mass of hummocks and mounds, some two of which, before the torrents of 3,000 winters had reduced and rounded their forms, were probably the two "sharp rocks"—the BOZEZ and SENEH of Jonathan's adventure. Right opposite is *Jeba* (Geba) on a curiously terraced hill. In the middle ages *el-Bireh* was believed to be Michmash. BEEROTH.

**Mich'me-thah** (fr. Heb. = *hiding-place*? Ges., Fū.), a place on the boundary of the territories of Ephraim and Manasseh on the western side of Jordan. (1.) It lay "facing (A. V. 'before') Shechem;" it also was the next place on the boundary W. of ASHER 2 (Josh. xvii. 7), if, indeed, the two are not the same place. The place must be E. of, and not far distant from, Shechem (so Mr. Grove). But then (2.) Michmethah follows Beth-horon the upper, as if on its western or seaward side, in the description of "the border," apparently Ephraim's southern boundary (Josh. xvi. 6). "With our present data it is impossible to determine whether the sacred writer refers to one town or two. If to one only, it must have been near Shechem, and the meaning of Josh. xvi. 6 will be 'The border went out to (or along) the W. side' (A. V. 'toward the sea') 'to Michmethah on the N.'" (Porter, in Kitto). The site is unknown.

**Mich'ri** (Heb. *price of Jehovah*, Ges.), ancestor of

Elah, a Benjaminite chief after the Captivity (1 Chr. ix. 8).

**Mich'tam** (Heb., see below). This word occurs in the titles of six Psalms (xvi., lvi.–lx.) all of which are ascribed to David. The marginal reading of our A. V. is "a *golden* Psalm," while in the Geneva version it is described as "a certain tune." From the position which it occupies in the title, we may infer that Michtam is applied to these Psalms to denote their musical character, but beyond this every thing is obscure. The etymology is uncertain. 1. Kimchi and Aben Ezra trace it to the Hebrew root *cātham*, as it appears in *cethem*, rendered in the A. V. "gold" (Job xxviii. 16), "pure gold" (19), "fine gold" (xxxi. 24); because the Psalm was to David precious as fine gold. They have been followed in the margin of our version.—2. In Syriac *cathem* = *to stain*, hence *to defile*, the primary meaning of the root being probably *to spot, mark with spots*, whence the substantive is in common use in Rabbinical Hebrew = *spot* or *mark*. From this etymology the meanings have been given to *Michtam* of a *noted* song, or a song *graven* or carved upon stone, a monumental inscription.—3. According to Hezel, Michtam (Ar. *katama* = *to conceal, repress*) was a title given to certain Psalms, because they were written while David was in concealment. From the same root Hengstenberg attributes to them a *hidden*, mystical import. Apparently referring the word to the same origin, Ewald suggests that it may designate a song accompanied by bass instruments.—4. But the explanation most approved by Rosenmüller and Gesenius finds in Michtam the equivalent of Heb. *nich-tāb*, A. V. "writing" (Is. xxxviii. 9). Hupfeld adheres to the rendering *jewel, treasure* (see No. 1 above), which Luther also gives, and which is adopted by Hitzig and Mendelssohn.

**Mid'din** (Heb. *measurèr*, Ges.; *stretch, extension*, Fū.), a city of Judah (Josh. xv. 61), one of the six specified as in the "wilderness" (DESERT 2), on the western shore of the Dead Sea; site unknown.

**Mid'-an** (Heb. *strife, contention*, Ges.), a son of ABRAHAM and KETURAH (Gen. xxv. 2; 1 Chr. i. 32; progenitor of the Midianites, or Arabians dwelling principally in the desert N. of the peninsula of ARABIA. Southward they extended along the eastern shore of the Gulf of Eyleh, or of *ʿAkabab* (*Sinus Ælaniticus*); and northward they stretched along the eastern frontier of Palestine. Midian is first mentioned, as a people, when Hadad, king of Edom, "smote Midian in the field of Moab" (Gen. xxxvi. 35). It is also mentioned, when Moses fled, having killed the Egyptian, to the "land of Midian" (Ex. ii. 15), and married a daughter of a priest of Midian (21). (JETHRO.) The "land of Midian," or the portion of it specially referred to, was probably the peninsula of SINAI (so Mr. E. S. Poole; but compare Ex. xviii. 1–6, 27). The name of Midian, however (and hence the "land of Midian"), was perhaps often applied, as that of the most powerful of the northern Arab tribes, to the northern Arabs generally, i. e. those of Abrahamite descent (compare Gen. xxxvii. 28, 36; MEDAN; Judg. viii. 24). The Midianites were mostly dwellers in tents, not towns; and Sinai has not sufficient pasture to support more than a small, or a moving people. But perhaps (or we may say *probably*) the peninsula of Sinai has considerably changed in its physical character since the time of Moses. Whatever may have been the position of Midian in the Sinaitic peninsula, if we may believe the Arabian historians and geographers, backed as their testimony is by the Greek

geographers, the city of Midian was situate on the opposite, or Arabian, shore of the Arabian Gulf, and thence northward, and spreading E. and W. we have the true country of the wandering Midianites. The next occurrence of the name of this people in the sacred history marks their northern settlement on the border of the Promised Land, "on this side Jordan (by) Jericho" in the plains of Moab (Num. xxii. 1-4), when Balak said, of Israel, to the elders of Midian, "Now shall this company lick up all (that are) round about us, as the ox licketh up the grass of the field." The spoil taken in the war that soon followed, and more especially the mention of the dwellings of Midian, point to a considerable pastoral settlement of Midian in the Transjordanic country. In this case the Midianites were evidently *tributary* to the Amorites, being "dukes of Sihon, dwelling in the country:" this inferior position explains their omission from Balaam's prophecy (xxiv. 17 ff.). It was here, "on this side Jordan," that the chief doings of the Midianites with the Israelites took place. The Midianites joined with the Moabites in inviting Balaam to curse the Israelites (xxii. 4, 7), and afterward seduced the Israelites in Shittim into idolatry and debauchery (xxv.). The influence of the Midianites on the Israelites was clearly most evil. Much of its dangerous character may probably be ascribed to the common descent from Abraham. While the Canaanitish tribes were abhorred, Midian might claim consanguinity, and more readily seduce Israel from their allegiance. The events at Shittim occasioned the injunction to vex the Midianites and smite them (xxv. 18). 12,000 men, 1,000 from each tribe, went up to this war, a war in which all the males of the enemy were slain (xxxi.). After a lapse of some years, the Midianites appear again as the enemies of the Israelites. They had recovered from the devastation of the former war, probably by the arrival of fresh colonists from the desert tracts over which their tribes wandered; and they now were sufficiently powerful to become the oppressors of the children of Israel (Judg. vi.). Allied with the Amalekites, and the "children of the East," they drove them to make dens in the mountains and caves and strongholds, and wasted their crops even to Gaza, on the Mediterranean coast, in the land of Simeon. The judgship of Gideon was the immediate consequence of these calamities; and with the battle he fought in the valley of Jezreel, and his pursuit of the flying enemy over Jordan to Karkor, the power of Midian seems to have been broken (vii., viii.). Midian had oppressed Israel for seven years. As a numberless eastern horde they entered the land with their cattle and their camels. The imagination shows us the green plains of Palestine sprinkled with the black goats'-hair tents of this great Arab tribe, their flocks and herds and camels let loose in the standing corn, and foraging parties of horsemen driving before them the possessions of the Israelites. The descent of Gideon and his servant into the camp, and the conversation of the Midianite watch, form a vivid picture of Arab life. It does more: it proves that as Gideon, or Phurah his servant, or both, understood the language of Midian, the Shemitic languages differed much less in the fourteenth or thirteenth century B. C. than they did in after times. The stratagem of Gideon receives an illustration from modern Oriental life. Until lately the police in Cairo were accustomed to go their rounds with a lighted torch thrust into a pitcher, and the pitcher was suddenly withdrawn when light was required—a custom af-

fording an exact parallel to the ancient expedient adopted by Gideon. The consequent panic of the great multitude in the valley, if it has no parallels in modern European history, is consistent with Oriental character. At the sight of the 300 torches, suddenly blazing round about the camp in the beginning of the middle watch, with the confused din of the trumpets, and the cry, "The sword of the Lord, and of Gideon" (vii. 20), "all the host ran, and cried, and fled" (21). (LAMP.) The rout was complete. The flight of so great a host, encumbered with slow-moving camels, baggage, and cattle, was calamitous. All the men of Israel, out of Naphtali, and Asher, and Manasseh, joined in the pursuit; and Gideon roused the men of Mount Ephraim to "take before" the Midianites "the waters unto Beth-barah and Jordan" (23, 24). Thus cut off, two princes, OREB and ZEEB, fell into the hands of Ephraim. But though many joined in a desultory pursuit of the rabble of the Midianites, only the 300 men who had blown the trumpets in the valley of Jezreel crossed the Jordan with Gideon, "faint yet pursuing" (viii. 4). With this force it remained for the liberator to attack the enemy on his own ground. 15,000 men, under the "kings" of Midian, Zeba and Zalmunna, were at Karkor, the sole remains of 135,000 (10). The assurance of God's help encouraged the weary 300, and they ascended from the plain (or *ghôr*) to the higher country by a ravine or torrent-bed in the hills, "and smote the host, for the host was secure" (11)—secure in that wild country, on their own ground, and away from the frequent haunts of man. A sharp pursuit seems to have followed this fresh victory, ending in the capture of the kings and the final discomfiture of the Midianites. ZEB and ZALMUNNA were slain, and with them the name itself of Midian almost disappears from sacred history.—Having traced the history of Midian, it remains to show what is known of their condition and customs. The whole account of their doings with Israel plainly marks them as characteristically Arab. They are described as true Arabs—now Bedaweers, or "people of the desert;" anon pastoral, or settled Arabs—the "flock" of Jethro; the cattle and flocks of Midian, in the later days of Moses; their camels without number, as the sand of the sea-side for multitude when they oppressed Israel in the days of the Judges—all agree with such a description. Like Arabs, who are predominantly a nomadic people, they seem to have partially settled in the land of Moab (Num. xxxi. 9, 10). The only glimpse of their habits is found in the vigorous picture of the camp in the valley of Jezreel (Judg. vii. 13). The spoil taken in both the war of Moses and that of Gideon is remarkable. On the former occasion, the 675,000 sheep, 72,000 beeves, and 61,000 asses, show the pastoral character of the Midianites. But the gold, silver, brass, iron, tin, and lead (Num. xxxi. 22), the "jewels of gold, chains, and bracelets, rings, ear-rings, and tablets" (50) taken by Moses, is especially noteworthy; and also the booty taken by Gideon (Judg. viii. 21, 24-26). (METALS.) We have here a wealthy Arab nation, living by plunder, delighting in finery; and, where forays were impossible, carrying on the traffic southward into Arabia, and across to Chaldea; or into the rich plains of Egypt. Midian is named authentically only in the Bible. It has no history elsewhere. The city of "*Medyn*" (say the Arabs) is the city of the people of *Shu'ub* (Jethro?), and is opposite *Tahook*, on the shore of *Bahr el-Kulzum* (the Red Sea): between

these is six days' journey. It (*Medyen*) is larger than *Tabook*; and in it is the well from which Moses watered the flock of *Shu'eyb*" (*Murásid*, s. v.). El-Makreezee tells us that in the land of Midian were many cities, of which the people had disappeared, and the cities themselves had fallen to ruin; that when he wrote (in the year 825 of the *Hegira* or Flight) forty cities remained, the names of some being known, and of others, lost.

\* *Mid'i-an-ite* (fr. Heb.) = one from MIDIAN (Gen. xxxvii. 28, 36; Num. x. 29, &c.).

\* *Mid'i-an-ite* (adj. fr. Heb.) = of, or belonging to, MIDIAN (Num. xxv. 6 ff.).

\* *Mid'rif* = the diaphragm (Ex. xxix. 13, margin; A. V. text "caul"). CAUL 1.

*Mid'wife*. Parturition in the East is usually easy. The office of a midwife is thus, in many Eastern countries, in little use, but is performed, when necessary, by relatives. In the description of the transaction mentioned in Ex. i., one expression, "upon the stools," receives remarkable illustration from modern usage. The Egyptian practice, as described by Mr. Lane, exactly answers to that indicated in Exodus. "Two or three days before the expected time of delivery, the *Layeh* (midwife) conveys to the house the *kursae elwildeh*, a chair of peculiar form, upon which the patient is to be seated during the birth." CHILD; MEDICINE.

*Mig'dal-el* (Heb. *tower of El or God*, Ges., Fñ.), one of the fortified towns of Naphtali (Josh. xix. 38 only). If it be possible that *Hûrah* is Horeem and *Yarûn* Iron, the possibility is strengthened (so Mr. Grove) by finding a *Mujidel* at no great distance from them, viz. on the left bank of the *Wady Ker-kerah*, eight miles due E. of the *Râs en-Nâkûrah* (Ladder of Tyre), six miles W. of *Hûrah* and eight of *Yarûn*. Robinson (ii. 397) and Wilson (ii. 136, 641) make Migdal-el probably = MAGDALA, the modern *el-Mejdel*, near Tiberias. Porter (in Kitto) favors its being at *Mejdel Selim*, a village in the northern part of the mountains of Naphtali. Schwarz, reading Migdal-el and Horeem as one word, proposes to identify it with *Migdal el-Kerûm*, a place about twelve miles E. of 'Akka.

*Mig'dal-gad* (Heb. *tower of GAD*, Ges., Fñ.; see below), a city of Judah (Josh. xv. 37) in the maritime lowland. (SEPHELA.) By Eusebius and Jerome it appears to be mentioned as "Magdala." A village called *el-Mejdel*, identified with Migdal-gad by Van de Velde, lies in the maritime plain, two miles inland from Ascalon, nine from *Um Lâkis* (Lachish?), and eleven from *'Ajlân* (Eglon). Migdal-gad was probably dedicated to or associated with the worship of the ancient deity GAD.

*Mig'dol* (Heb. *tower*, Ges., Fñ., R. S. Poole), proper name of one or two places on the eastern frontier of Egypt. 1. A Migdol is mentioned in the account of the Exodus (Ex. xiv. 2; Num. xxxiii. 7, 8; EXODUS, THE). We suppose that the position of the encampment was before or at PI-HAHIROTH, behind which was Migdol, and on the other hand BAAL-ZEPHON and the sea, these places being near together. The place of the encampment and of the passage of the sea we believe (so Mr. R. S. Poole) to have been not far from the Persepolitan monument, which is made in Linant's map the site of the Serapeum. 2. A Migdol is spoken of by Jeremiah and Ezekiel. The latter mentions it as a boundary-town, evidently on the eastern border, corresponding to Seveneh, or SYENE, on the S. (margin of Ez. xxix. 10, xxx. 6). In Jeremiah the Jews in Egypt are spoken of as dwelling at Migdol, Tah-

panhes, and Noph, and in the country of Pathros (Jer. xlv. 1); and in foretelling, apparently, an invasion of Egypt by Nebuchadnezzar, Migdol, Noph, and Tahpanhes are again mentioned together (xlv. 14). It seems plain, from its being spoken of with Memphis, and from Jews dwelling there, that this Migdol was an important town, and not a mere fort, or even military settlement. After this time there is no notice of any place of this name in Egypt, excepting of Magdolos, by Hecataeus of Miletus, and in the *Itinerary of Antoninus*, in which *Magdolo* is placed twelve Roman miles S. of Pelusium, in the route from the Serapeum to that town. This latter place most probably represents the Migdol mentioned by Jeremiah and Ezekiel. Its position on the route to Palestine would make it both strategically important and populous, neither of which would be the case with a town in the position of the Migdol of the Pentateuch. Gesenius, however, holds that there is but one Migdol mentioned in the Bible (*loc. s. v.*). Lepsius distinguishes two Migdols, and considers Magdolo = the Migdol of Jeremiah and Ezekiel.

*Mig'ron* (Heb. *precipice*, Ges.), a town, or a spot—for there is nothing to indicate which—in the neighborhood of Saul's city, Gibeah, on the very edge of the district belonging to it (1 Sam. xiv. 2); distinguished by a pomegranate-tree, under which on the eve of a memorable event we discover Saul and Ahiah surrounded by the poor remnants of their force. Migron is presented to our view only once again, viz. in the list of the places disturbed by Sennacherib's approach to Jerusalem (Is. x. 28). But here its position seems a little further N. than that indicated in the former passage. It here occurs between Aianth—i. e. AI—and MICHMASH, in other words (so Mr. Grove) was on the N. of the *Wady Suweinit*, while Gibeah was more than two miles to the S. thereof. In Hebrew, *Migron* may mean a *precipice*, and it is not impossible, therefore, that two places of the same name are intended. Porter (in Kitto) thinks there was only one Migron, viz. on or close to the S. brow of the *Wady Suweinit*. The precise site is unknown.

*Mij'a-min* (fr. Heb. = MIAMIN). 1. Chief of the sixth course of priests established by David (1 Chr. xxiv. 9).—2. A priest, or family of priests, who signed the covenant with Nehemiah; probably descended from the preceding (Neh. x. 7). MIAMIN 2; MINIAMIN 2.

*Mik'loth* (Heb. *staves*? Ges.; *twigs, branches*, or *sticks* as *lots*, Fñ.). 1. Son of Jchiel, the father of Gibeon, by his wife Maachah (1 Chr. viii. 32, ix. 37, 38).—2. The leader of the second division of David's army (xxvii. 4).

*Mik-nei'ah* [-nee'yah] (fr. Heb. = *possession of Jehovah*, Ges.), one of the Levites of the second rank, gatekeepers of the ark, appointed by David to play in the Temple band "with harps upon Sheminith" (1 Chr. xv. 18, 21).

*Mil'a-lal*, or *Mil'a-lal'* (Heb. *eloquent*, Ges.; *Jah is elevation or promise*, Fñ.), probably a priest who assisted at the dedication of the walls of Jerusalem (Neh. xii. 36).

*Mil'eah* (Heb. *queen*, or Chal. *counsel*, Ges.). 1. Daughter of Haran and wife of her uncle NAHOR, Abraham's brother, to whom she bare eight children (Gen. xi. 29, xxii. 20, 23, xxiv. 15, 24, 47).—2. Fourth daughter of ZELOPHEHAD (Num. xxvi. 33, xxvii. 1, xxxvi. 11; Josh. xvii. 3).

*Mil'com* (Heb. *little Molech*, as a term of endearment, Ges.), the "abomination" of the children of

Ammon; = MOLECH (1 K. xi. 7, &c.), MELCOM (margin of Jer. xlix. 1, 3), and MALCHAM (Zeph. i. 5, margin "their king").

\* *Mil'dew*, the A. V. translation of Hebrew *yérá-kôn* = *paleeness, yellowness*, a turning yellow from disease, Ges. (Deut. xxviii. 22; 1 K. viii. 37, &c.); once translated "paleeness" sc. from fright (Jer. xxx. 6). It is uniformly, except in Jeremiah l. c., connected with "blasting" (Heb. *shiddiphôn* = *blasting, blight*, e. g. of grain by the east wind, Ges.).

*Mile*, a Roman measure of length equal to 1,618 English yards, the English mile being 1,760 yards. It is only once noticed in the Bible (Mat. v. 41), the usual method of reckoning both in the N. T. and in Josephus being by the stadium (A. V. "furlong"). The Roman system of measurement was fully introduced into Palestine, though probably at a later date. The mile of the Jews is said to have been of two

kinds, long or short, dependent on the length of the pace, which varied in different parts, the long pace being double the short one.

*Mi-le'tus* (L. fr. Gr.) (Acts xx. 15, 17), less correctly *Mi-le'tum* (2 Tim. iv. 20), a celebrated city near the mouth of the river Aleander. It was the birth-place of Thales, Anaximander, &c.; and was anciently the principal sea-port for its region. St. Paul, on the return voyage from his third missionary journey, sent for the presbyters of Ephesus to meet him at Miletus (Acts xx. 17), twenty or thirty miles distant by land, and here he gave them a solemn and affectionate charge (18 ff.). In the context we have the geographical relations of Miletus brought out distinctly. It lay on the coast to the S. of Ephesus. It was a day's sail from Trogyllium (ver. 15). Moreover, to those who are sailing from the N., it is in the direct line for Cos. The site of

General View of the Theatre and Ruins of Miletus.—From Laborde, *Voyage en Orient*.—(Fairbairn.)

Miletus has now receded ten miles from the coast, and even in the apostle's time it must have lost its strictly maritime position. The passage in 2 Tim., where Miletus is mentioned, presents a very serious difficulty to the theory that there was only one Roman imprisonment. Miletus was far more famous 500 years before St. Paul's day, than it ever became afterward. In early times it was the most flourishing city of the Ionian Greeks. (ΙΟΝΙΑ.) In the natural order of events, it was absorbed in the Persian empire. After a brief period of spirited independence, it received a blow from which it never recovered, in the siege conducted by Alexander the Great, when on his Eastern campaign. But still it held, even through the Roman period, the rank of a second-rate trading-town, and Strabo mentions its four harbors. At this time it was politically in the province of ASIA, though CARIA was the old ethnological name of the district in which it was situated. The ruins of the ancient Miletus are generally supposed to be at *Palatasha*. Here are remains of an enormous theatre, an aqueduct, the site of several temples, including one to Apollo, a Christian church, and the walls.

**Milk.** As an article of diet, milk holds a more important position in Eastern countries than with us. It is not a mere adjunct in cookery, or restricted to the use of the young, although it is naturally the characteristic food of childhood, both from its simple and nutritive qualities (1 Pet. ii. 2), and particularly as contrasted with meat (1 Cor. iii. 2; Heb. v. 12): but beyond this it is regarded as substantial food adapted alike to all ages and classes. It appears as the very emblem of abundance and

wealth, in company with honey (Ex. iii. 8; Deut. vi. 3, xi. 9) or wine (Is. lv. 1), or by itself (Job xxi. 24); hence also to "suck the milk" of an enemy's land implied its complete subjection (Is. lx. 16; Ez. xxv. 4). Not only the milk of cows, but of sheep (Deut. xxxii. 14), of camels (Gen. xxxii. 15), and of goats (Prov. xxvii. 27) was used; the latter appears to have been most highly prized. Milk was used sometimes in its natural state, and sometimes in a sour coagulated state: the former was named *háláb* or *cháláb*, and the latter *hemáh* or *chemáh*. In the A. V. the latter is rendered "BUTTER," but Mr. Bevan, Gesenius, &c., think that in every case (except perhaps Prov. xxx. 33) the term refers to a preparation of milk well known in Eastern countries under the name of *leben*. The method now pursued in its preparation is to boil the milk over a slow fire, adding to it a small piece of old *leben* or some other acid in order to make it coagulate. The refreshing draught which Jael offered "in a lordly dish" to Sisera (Judg. v. 25) was *leben*. *Leben* is still extensively used in the East: at certain seasons of the year the poor almost live upon it, while the upper classes eat it with salad or meat. It is still offered in hospitality to the passing stranger (Gen. xviii. 8). Thomson (i. 135) regards the Mosaic precept, "Thou shalt not seethe a kid in his mother's milk" (Ex. xxxiii. 19, xxxiv. 26; Deut. xiv. 21), as referring to a favorite Arab dish, prepared by stewing a fat and tender young kid, carefully dressed, in milk, generally sour, mixed with onions and hot spices. This is a gross, unwholesome dish, associated with immoderate feasting, regarded by the Jews as forbidden specifically in the above precept,

and was perhaps connected with idolatrous sacrifices.

**MILL.** The mills (Heb. dual *rêhayim* or *rêchayim* = *the two millstones*, Ges.; Gr. *mulôn*, "mill" [Mat. xxiv. 41]; *mulos*, "millstone") of the ancient Hebrews probably differed but little from those at present in use in the East. These consist of two circular stones, about eighteen inches or two feet in diameter, the lower of which is fixed, and has its upper surface slightly convex, fitting into a corresponding concavity in the upper stone. The latter, called by the Hebrews *recheb*, literally "CHARIOT," and by the Arabs *rekkab*, "rider," has a hole in it through which the grain passes, immediately above

Women grinding grain with the hand-mill of modern Syria.—(Ayre.)

a pivot or shaft which rises from the centre of the lower stone, and about which the upper stone is turned by means of an upright handle fixed near the edge. It is worked by women, sometimes singly and sometimes two together, who are usually seated on the bare ground (Is. xlvii. 1, 2) "facing each other; both have hold of the handle by which the upper is turned round on the 'nether' millstone. The one whose right hand is disengaged throws in the grain as occasion requires through the hole in the upper stone. It is not correct to say that one pushes it half round, and then the other seizes the handle. Both retain their hold, and pull to or push from, as men do with the whip or crosscut saw. The proverb of our Saviour (Mat. xxiv. 41) is true to life, for *women* only grind. I cannot recall an instance in which men were at the mill" (Thomson, ii. 295). The labor is very hard, and the task of grinding in consequence performed only by the lowest servants (Ex. xi. 5), and captives (Judg. xvi. 21; Job xxxi. 10; Is. xlvii. 1, 2; Lam. v. 13). So essential were millstones for daily domestic use, that they were forbidden to be taken in pledge (Deut. xxiv. 6; Jos. iv. 8, § 26), in order that a man's family might not be deprived of the means of preparing their food. The sound of the mill is the indication of peaceful household life, and the absence of it is a sign of desolation and abandonment (Eccl. xii. 4; Jer. xxv. 10; Rev. xviii. 22). The hand-mills of the ancient Egyptians appear to have been of the same character as those of their descendants, and like them were worked by women (Wilkinson, *Anc. Egypt.*, ii. p. 118, &c.). "They had also a large mill on a very similar principle; but the stones were of far greater power and dimensions; and this could only have been turned by cattle or asses, like those of the ancient Romans, and of the modern Cairenes." It was the millstone of a mill of this kind, driven by an ass, which is alluded to in Mat. xviii. 6 (Gr. *mulos onikos*). With the movable upper millstone of the hand-mill the woman of Thebez "all to brake" (i. e. completely or altogether broke) Abimelech's skull (Judg. ix. 53). OIL.

**Millet.** (Heb. *dôhan* or *dôchan*) (Ezr. iv. 9 only). Probably the grains of *Panicum miliaceum* and *Italicum*, and of the *Holcus Sorghum*, Linn. (the

*Sorghum vulgare* of modern writers), may all be comprehended by the Hebrew word. Dr. Royle maintains that the true *dukhan* of Arab authors is the *Panicum miliaceum*, common millet or *warree*, an

Indian Millet (*Sorghum vulgare*).

annual grass, native of India, which is universally cultivated in the East. Its seeds are often used as an ingredient in making bread. The *Sorghum vulgare*, or Indian millet, also a native of India, long

Common Millet (*Panicum italicum*).

cultivated as forage and as food for man and animals, includes at least four varieties, viz. the broom-

corn, *impee*, *durra*, and Chinese sugar-cane. (See *New American Cyclopædia*, articles "Millet" and "Sorghum"). Probably both the *Sorghum vulgare* and the *Panicum miliaceum* were used by the ancient Hebrews and Egyptians.

**MIL'lo** (Heb., see below), a place in ancient JERUSALEM. Both name and thing seem to have been already in existence when the city was taken from the Jebusites by David (2 Sam. v. 9; 1 Chr. xi. 8). Its repair or restoration was one of the great works for which Solomon raised his "levy" (1 K. ix. 15, 24, xi. 27); and it formed a prominent part of the fortifications by which Hezekiah prepared for the approach of the Assyrians (2 Chr. xxxii. 5). The last passage seems to show that Millo was part of the "city of David," i. e. of Zion (compare 2 K. xii. 20). If "Millo" be taken as a Hebrew word, it would be derived from a root = *to fill* or *to be full*. This notion has been applied by the interpreters after their custom in the most various and opposite ways:—a *mound*, *rampart*, so called as *filled* in with stones and earth; hence *fortress*, *castle*; especially a part of the citadel of Jerusalem, probably the *rampart*, *intrenchment*, Ges.; a *bastion*, Fä.; an open space used for assemblies, and therefore often filled with people; a ditch or valley; even a trench filled with water. But none of these guesses enable us to ascertain what Millo really was, and it would probably be nearer the truth—it is certainly safer (so Mr. Grove)—to look on the name as an ancient term, Jebusite, or possibly even still older, adopted by the Israelites when they took the town, and incorporated into their own nomenclature. The LXX. render in every case (excepting only 2 Chr. xxxii. 5) *hē akra*, a word which they employ nowhere else in the O. T. Now the Gr. *hē akra* = the *citadel*, and is the word used throughout the Books of Maccabees for the fortress on Mount Zion (so Mr. Grove, but see JERUSALEM, pp. 452-3, 459, 461-2). MILLO, THE HOUSE OF.

**MIL'lo** (Heb., see above), the *House of*. 1. Apparently a family or clan, mentioned in Judg. ix. 6, 20 only, in connection with the men or lords of Shechem.—2. The "house of Millo that goeth down to SILLA" was the spot at which King Joash was murdered by his servants (2 K. xii. 20). There is nothing to lead us to suppose that the murder was not committed in Jerusalem, and in that case the spot must be connected with the ancient MILLO.

\* **MIL'na** (L.) (Lk. xix. 13 margin). MONEY.

\* **Min'cing**, the A.V. translation of Heb. infinitive *taphôph* = *to take short and quick steps, to trip*, with reference to the affected gait of coquettish females, Ges. (Is. iii. 16 only).

**Mines, Mi'ning.** "Surely there is a source for the SILVER, and a place for the GOLD which they refine. IRON is taken out of the soil, and stone man melts for COPPER. He hath put an end to darkness, and to all perfection (i. e. most thoroughly), he searcheth the stone of thick darkness and of the shadow of death. He hath sunk a shaft far from the wanderer; they that are forgotten of the foot are suspended, away from man they waver to and fro. (As for) the earth, from her cometh forth bread, yet her nethermost parts are upturned as (by) fire. The place of sapphire (are) her stones, and dust of gold is his. A track which the bird of prey hath not known, nor the eye of the falcon glared upon; which the sons of pride (i. e. wild beasts) have not trodden, nor the roaring lion gone over; in the flint man hath thrust his hand, he hath overturned mountains from the root; in the rocks he hath

cleft channels, and every rare thing hath his eye seen; the streams hath he bound that they weep not, and that which is hid he bringeth forth to light" (so Mr. Wright translates Job xxviii. 1-11). Such is the highly poetical description given by the author of the Book of Job of the operations of mining as known in his day, the only record of the kind from the ancient Hebrews. It may be fairly inferred from the description that a distinction is made between gold obtained in the manner indicated, and that found in the natural state in the alluvial soil, among the débris washed down by the torrents. This appears to be implied in the expression "the gold they refine," which presupposes a process by which the pure gold is extracted from the ore, and separated from the silver or copper with which it may have been mixed. What is said of gold may be equally applied to silver, for the two metals are associated in almost every allusion to the process of refining. In the passage quoted, so far as can be made out, the natural order of mining operations is observed in the description. The poet might have had before him the copper-mines of the Sinaitic peninsula. In the *Wady Maghârah* (= the valley of the Care), about forty miles N. W. of Mount Sinai, are still traces of the Egyptian colony of miners who settled there for the purpose of extracting copper from the freestone rocks, and left their hieroglyphic inscriptions upon the face of the cliff. The ancient furnaces are still to be seen, and on the coast of the Red Sea are found the piers and wharves whence the miners shipped their metal in the harbor of *Abu Zelimch*. The copper-mines of Phaeno in Idumea, according to Jerome, were between Zoar and Petra: in the persecution of Diocletian the Christians were condemned to work them. (PUNON.) The gold-mines of Egypt in the Bishâree desert have been discovered within a few years by M. Linant and Mr. Bonomi. Ruins of the miners' huts still remain as at *Suribit el-Khâdim*, in the Sinaitic peninsula. According to the account given by Diodorus Siculus, the mines were worked by gangs of convicts and captives in fetters, who were kept day and night to their task by the soldiers set to guard them. The work was superintended by an engineer, who selected the stone and pointed it out to the miners. The harder rock was split by the application of fire, but the softer was broken up with picks and chisels. The miners were quite naked, their bodies being painted according to the color of the rock they were working, and in order to see in the dark passages of the mine they carried lamps upon their heads. The stone as it fell was carried off by boys, it was then pounded in stone mortars with iron pestles by those who were over thirty years of age till it was reduced to the size of a lentil. The women and old men afterward ground it in mills to a fine powder. The final process of separating the gold from the pounded stone was intrusted to the engineers who superintended the work. They spread this powder upon a broad slightly-inclined table, and rubbed it gently with the hand, pouring water upon it from time to time so as to carry away all the earthy matter, leaving the heavier particles on the board. This was repeated several times; at first with the hand and afterward with fine sponges gently pressed upon the earthy substance, till nothing but the gold was left. It was then collected by other workmen, and placed in earthen crucibles with a mixture of lead and salt in certain proportions, together with a little tin and some barley bran. The crucibles were covered and

carefully closed with clay, and in this condition baked in a furnace for five days and nights without intermission. Of the three methods employed for refining gold and silver, (1.) by exposing the fused metal to a current of air; (2.) by keeping the alloy in a state of fusion and throwing nitre upon it; and (3.) by mixing the alloy with lead, exposing the whole to fusion upon a vessel of bone-ashes or earth, and blowing upon it with bellows or other blast; the third appears most nearly to coincide with the description of Diodorus. To this, known as the cupelling process (LEAD), there seems to be a reference in Ps. xii. 6; Jer. vi. 28-30; Ez. xxii. 18-22, and from it Mr. Napier deduces a striking illustration of Mal. iii. 2, 3, "he shall sit as a refiner and purifier of silver," &c. When the alloy is melted upon a cupel, and the air blown upon it, the surface has a deep orange red color, with a kind of flickering wave passing over the surface. As the process proceeds, the heat is increased, and the refiner watches the operation, either standing or sitting, with the greatest earnestness, until all the orange color and shading disappears, and the refiner may see himself as in a looking-glass.—Silver-mines are mentioned by Diodorus with those of gold, iron, and copper, in the island of Meroë. But the chief supply of silver in the ancient world appears to have been brought from Spain. The mines of that country were celebrated (1 Mc. viii. 3). Mount Orospeña, from which the Guadalquivir, the ancient Baites, takes its rise, was formerly called "the silver mountain," from the silver mines in it. But the largest silver-mines in Spain were in the neighborhood of Carthago Nova (modern Carthagena). The process of separating the silver from the lead is abridged by Strabo from Polybius. The lumps of ore were first pounded, and then sifted through sieves into water. The sediment was again pounded, and again filtered, and after this process had been repeated five times the water was drawn off, the remainder of the ore melted, the lead poured away and the silver left pure. If Tartessus be the TARSHISH of Scripture, the metal workers of Spain in those days must have possessed the art of hammering silver into sheets, for we find in Jer. x. 9, "silver spread into plates is brought from Tarshish, and gold from UPHAZ." We have no means of knowing whether the gold of OPHIR was obtained from mines or from the washing of gold-streams. Probably the greater part of the gold which came into the hands of the Phenicians and Hebrews was obtained from streams; its great abundance seems to indicate this. As gold is seldom if ever found entirely free from silver, the quantity of the latter varying from two per cent. to thirty per cent., it has been supposed that the ancient metallurgists were acquainted with some means of parting them, an operation performed in modern times by boiling the metal in nitric or sulphuric acid. To some process of this kind reference is supposed to be made in Prov. xvii. 3, "The *fining-pot* is for silver, and the *furnace* for gold;" and again in xxvii. 21. A strong proof of the acquaintance possessed by the ancient Hebrews with the manipulation of metals is found by some in the destruction of the golden CALF in the desert by Moses, which they have unscientifically supposed was effected by calcination, &c. "And he took the calf which they had made, and burnt it in the fire, and ground it to powder, and strawed it upon the water, and made the children of Israel drink" (Ex. xxxii. 20). The whole difficulty (so Mr. Wright) appears to have arisen from a desire to find too much in the

text. The main object of the destruction of the calf was to prove its worthlessness and to throw contempt upon idolatry, and all this might have been done without any refined chemical process like that referred to. How far the ancient Hebrews were acquainted with the processes at present in use for extracting copper from the ore it is impossible to assert, as there are no references in Scripture to anything of the kind except in the passage of Job already quoted. Copper-smelting, however, is in some cases attended with comparatively small difficulties, which the ancients had evidently the skill to overcome. Some means of toughening the metal so as to render it fit for manufacture must have been known to the Hebrews as to other ancient nations. The Egyptians evidently possessed the art of working bronze in great perfection at a very early time, and much of the knowledge of metals which the Israelites had must have been acquired during their residence among them. Of TIN there appears to have been no trace in Palestine. That the Phenicians obtained their supplies from the mines of Spain and Cornwall there can be no doubt. The lead-mines of *Gebel e' Rossaz*, near the coast of the Red Sea, about latitude 25° N., may have supplied the Hebrews with that metal, of which there were no mines in their own country or it may have been obtained from the rocks in the neighborhood of Sinai. The hills of Palestine are rich in iron, and the mines are still worked there, though in a very simple rude manner, like that of the ancient Samothracians; of the method employed by the Egyptians and Hebrews we have no certain information. It may have been similar to that in use throughout India from very early times, which is thus described by Dr. Ure:—"The furnace or bloomery in which the ore is smelted is from four to five feet high; it is somewhat pear-shaped, being about five feet wide at the bottom and one foot at the top. It is built entirely of clay. . . . There is an opening in front about a foot or more in height, which is built up with clay at the commencement and broken down at the end of each smelting operation. The bellows are usually made of goat's skin. . . . The bamboo nozzles of the bellows are inserted into tubes of clay, which pass into the furnace. . . . The furnace is filled with charcoal, and a lighted coal being introduced before the nozzles, the mass in the interior is soon kindled. As soon as this is accomplished, a small portion of the ore, previously moistened with water to prevent it from running through the charcoal, but without any flux whatever, is laid on the top of the coals and covered with charcoal to fill up the furnace. In this manner ore and fuel are supplied, and the bellows are urged for three or four hours. When the process is stopped and the temporary wall in front broken down, the bloom is removed with a pair of tongs from the bottom of the furnace." It has seemed necessary to give this account of a very ancient method of iron-smelting, because, from the difficulties which attend it, and the intense heat required to separate the metal from the ore, it has been asserted that the allusions to iron and iron manufacture in the O. T. are anachronisms. But if it were possible among the ancient Indians in a very primitive state of civilization, it might have been known to the Hebrews, who may have acquired their knowledge by working as slaves in the iron furnaces of Egypt (compare Deut. iv. 20). FURNACE; HANDICRAFT; METALS.

**Mixed People.** This phrase (Heb. *hā'ereb*), in Jer. xxv. 20, and Ez. xxx. 5, like that of "the MIXED

**MULTITUDE**," which the Hebrew closely resembles, = the miscellaneous foreign population of Egypt and its frontier-tribes, including every one, says Jerome, who was not a native Egyptian, but was resident there. It is difficult to identify with the mingled people any particular race of which we have knowledge. "The kings of the mingled people that dwell in the deserts" are the same apparently as the tributary kings (A. V. "kings of Arabia") who brought presents to Solomon (1 K. x. 15); the Hebrew in the two cases is identical. The "mingled people" in the midst of Babylon (Jer. l. 37) were probably the foreign soldiers or mercenary troops, who lived among the native population, as the Targum takes it.

**Min'ia-min** (Heb. = MIAMIN, MIJAMIN, Ges.). 1. A Levite in the reign of Hezekiah (2 Chr. xxxi. 15). —2. A priest, probably = MIAMIN 2 and MIJAMIN 2 (Neh. xii. 17). —3. One of the priests at the dedication of the wall of Jerusalem (xii. 41).

**Min'ni** (Heb. *division, allotment?* Ges.), a portion of ARMENIA mentioned in connection with Ararat and Ashchenaz (Jer. li. 27).

**Min'is-ter** = an attendant or servant, one who acts in subordination or obedience to another. This term is used in the A. V. to describe various officials of a religious and civil character. In the O. T. it answers to the Heb. *mēshārēth*, which is applied, (1.) to an attendant upon a person of high rank (Ex. xxiv. 13; Josh. i. 1; 2 K. iv. 43, A. V. "servitors;" Ex. xxxiii. 11, A. V. "servant," &c.); (2.) to the *attachés* of a royal court (1 K. x. 5; 2 Chr. xxii. 8; comp. Ps. civ. 4), distinguished from the "servants" or officials of higher rank; (3.) to the priests and Levites (Is. lxi. 6; Ez. xlv. 11; Joel i. 9, 13; Ezr. viii. 17; Neh. x. 36). In the N. T. we have three Greek terms, each with its distinctive meaning—*leitourgos*, *hypēretēs*, and *diakonos*. The first answers most nearly to the Heb. *mēshārēth* and is usually employed in the LXX. as its equivalent. It betokens a subordinate public administrator (Rom. xiii. 6, xv. 16; Heb. viii. 2). In all these instances the original and special meaning of the word, as used by the Athenians of one who performs certain gratuitous public services, is preserved. In Heb. i. 7 it is used of the angels. In Ecclus. x. 2 it is translated "officer." The second Greek term differs from the two others in containing the idea of actual and personal attendance on a superior. Thus it is used of the attendant in the *SYNAGOGUE*, the *hazzān* or *chazzān* of the Talmudists (Lk. iv. 20), whose duty it was to open and close the building, to produce and replace the books employed in the service, and generally to wait on the officiating priest or teacher. The idea of *personal attendance* comes prominently forward in Lk. i. 2 and Acts xxvi. 16. It is frequently translated "OFFICER" (Mat. v. 25, &c.) and "servant" (xxvi. 58, &c.). In all these cases the etymological sense of the word (literally *a sub-rouer*, one who rows under the command of the steersman) comes out. The third Greek term, often = "servant" in general (Mat. xxii. 13; Jn. ii. 5, 9, xii. 26, &c.), is employed in a general sense for any Christian teacher (PREACHER), as Paul and Apollos (1 Cor. iii. 5, &c.), Tychicus (Eph. vi. 21; Col. iv. 7), Epaphras (i. 7), Timothy (1 Th. iii. 2), and Christ Himself (Rom. xv. 8; Gal. ii. 17); and in a special sense, for which see DEACON. SERVANT.

**Minnith** (Heb. = MINNI?), a place on the east of the Jordan, to which Jephthah's slaughter of the Ammonites extended (Judg. xi. 33). Minnith was in the neighborhood of ABEL-CERAMIM. A site

bearing the name *Menjah*, is marked in Van de Velde's map, at seven Roman miles E. of Heshbon, on a road to *Ammān* (RABBAN), though not on the frequented track. The "wheat of Minnith" is mentioned in Ez. xxvii. 17, as supplied by Judah and Israel to Tyre; but there is nothing to indicate that the same place is intended, and indeed the word is thought by some not to be a proper name.

**Min'strel**. The Heb. word in 2 K. iii. 15 (*minag-gēn*) properly signifies a player upon a stringed instrument like the HARP, on which David played before Saul (1 Sam. xvi. 16, xviii. 10, xix. 9), and which the harlots of the great cities used to carry with them as they walked to attract notice (Is. xxiii. 16). The passage in which it occurs has given rise to much conjecture; Elisha, upon being consulted by Jehoram as to the issue of the war with Moab, at first indignantly refuses to answer, and is only induced to do so by the presence of Jehoshaphat. He calls for a harper, apparently a camp-follower; "and it came to pass as the harper harped that the hand of Jehovah was on him." Other instances of the same Divine influence or impulse connected with music, are seen in the case of Saul and the young prophets in 1 Sam. x. 5, 6, 10, 11. In the present passage the reason of Elisha's appeal is variously explained. According to Keil, "Elisha calls for a minstrel, in order to gather in his thoughts by the soft tones of music from the impression of the outer world and by repressing the life of self and of the world to be transferred into the state of internal vision, by which his spirit would be prepared to receive the Divine revelation." This, in effect, is the view taken by Josephus, Maimonides, &c. The "minstrels" in Mat. ix. 23 (Gr. pl. of *aulētēs*, translated "pipers" in Rev. xviii. 22), were the flute-players who were employed as professional mourners to whom frequent allusion is made (Eccl. xii. 5; 2 Chr. xxxv. 25; Jer. ix. 17-20). MORNING; MUSIC.

**Mint** (Gr. *hēduasmon*) occurs only in Mat. xxiii. 23, and Lk. xi. 42, as one of those herbs, the title of which the Jews were most scrupulously exact in paying. The A. V. is undoubtedly correct in the translation of the Greek word, and all the old versions are agreed in understanding some species of mint (*Mentha*) by it. Mint was used by the Greeks

Horse-mint (*Mentha sylvestris*).

and Romans both as a carminative in medicine and a condiment in cookery. The woodcut represents

the horse-mint (*Mentha sylvestris*) which is common in Syria, and, according to Russell, found in the gardens at Aleppo; *Mentha sativa* is generally supposed to be only a variety of *Mentha arvensis*, another widely-diffused species (popularly called *field-mint* or *corn-mint*); perhaps all these were known to the ancients. There are numerous species of this genus, having similar properties, usually growing in moist situations, and yielding a powerful odor, especially when bruised. Spearmint (*Mentha viridis*) and peppermint (*Mentha piperita*) are well known in the United States.

**Miph'kad** (Heb. *review, appointment, appointed place*, Ges.), **the Gate**, one of the gates of JERUSALEM at the time of the rebuilding of the wall after the Captivity (Neh. iii. 31). It was probably not in the wall of Jerusalem proper, but in that enclosing the Temple, and somewhere near to the junction of the two on the northern side.

**Mir'a-cles.** The word "miracle" (fr. L. *miraculum* = *any thing wonderful or strange*) is a common translation in our A. V. of the Gr. *semeion* (Lk. xxiii. 8; Jn. ii. 11, &c.), often translated literally "sign" (Mat. xii. 38, 39, xvi. 1 ff., &c.), once "token" (2 Th. iii. 17), thrice "wonder" (Rev. xii. 1, 3, xiii. 13); also of the Gr. *dunamis* (Mk. ix. 39; Acts ii. 22, viii. 13, xix. 11; 1 Cor. xii. 10, 28, 29 ["workers of miracles"]); Gal. iii. 5; Heb. ii. 4), oftener literally "power" (Mat. vi. 13, xxii. 29, &c.), also "mighty work" (xi. 20 ff., &c.). It is also the A. V. translation of the Heb. *ôlâ* twice (Num. xiv. 22; Deut. xi. 3), usually translated "sign" (Gen. i. 14; Ex. iv. 8, 9, &c.); Heb. *môphêth* twice (vii. 9; Deut. xxix. 3, Heb. 2), usually translated "wonder" (Ex. iv. 21, vii. 3, &c.); Heb. pl. *niphlaôth* once (Judg. vi. 13), elsewhere "wonders" (Ex. iii. 20, &c.), "marvels" (xxxiv. 10), "wondrous works," "wondrous things," "marvellous works," "marvellous things," &c. The Gr. *teras*, occurring only in the pl. and uniformly translated "wonders" (Mat. xxiv. 24, &c.), deserves mention here as expressing one of the prominent ideas of a "miracle." Our translators did not borrow "miracle" from the Vulgate, but apparently from their English predecessors, Tynedale, Coverdale, &c.; and it had, probably before their time, acquired a fixed technical import in theological language, which is not directly suggested by its etymology. It will perhaps be found (so Bishop Fitzgerald, the original author of this article) that the habitual use of the term "miracle" has tended to fix attention too much on the physical *strangeness* of the facts thus described, and to divert attention from what may be called their *signality*. In reality, the practical importance of the *strangeness* of miraculous facts consists in this, that it is one of the circumstances which, taken together, make it reasonable to understand the phenomenon as a mark, seal, or attestation of the Divine sanction to something else. And if we suppose the Divine intention established that a given phenomenon is to be taken as a mark or sign of Divine attestation, theories concerning the *mode* in which that phenomenon was produced become of comparatively little practical value, and are only serviceable as helping our conceptions. In many cases the phenomenon which constitutes a Divine sign may be one not, in itself, at all varying from the known course of nature. This is the common case of prophecy: in which the fulfilment of the prophecy, which constitutes the sign of the prophet's commission, may be the result of ordinary causes, and yet, from being incapable of having

been anticipated by human sagacity, it may be an adequate mark or sign of the Divine sanction. In such cases, the miraculous or wonderful element is to be sought not in the fulfilment, but in the prediction. (ΠΡΟΦΗΤ.) It would appear, indeed, that in almost all cases of signs or evidential miracles something prophetic is involved. In the common case, e. g. of healing sickness by a word or touch, the word or gesture may be regarded as a *prediction* of the cure; and then, if the whole circumstances be such as to exclude just suspicion of (1.) a *natural* anticipation of the event, and (2.) a casual coincidence, it will be indifferent to the signality of the cure whether we regard it as effected by the operation of ordinary causes, or by an immediate interposition of the Deity reversing the course of nature. Hypotheses by which such cures are attempted to be accounted for by ordinary causes are indeed generally wild, improbable, and arbitrary, and are, on that ground, justly open to objection; but, if the miraculous character of the predictive antecedent be admitted, they do not tend to deprive the phenomenon of its *signality*: and there are minds who, from particular associations, find it easier to conceive a miraculous agency operating in the region of mind, than one operating in the region of matter. A "miracle," in the Scriptural sense, has been defined as "some wonderful event, such as requires Divine power to perform, and which may therefore be regarded as a sign or indication of Divine presence or agency (Prof. J. Haven in *B. S.* xix. 333). The peculiar improbability of *Miracles* is resolved by Hume, in his famous Essay, into the circumstance that they are "contrary to experience." This expression is, as has often been pointed out, strictly speaking, incorrect. In strictness, that only can be said to be contrary to experience, which is contradicted by the immediate perceptions of persons present at the time when the fact is alleged to have occurred. But the terms "contrary to experience" are used for "contrary to the analogy of our experience;" and it must be admitted that, in this latter, less strict sense, miracles are contrary to general experience, *so far as their mere physical circumstances, visible to us, are concerned*. This should not only be admitted, but strongly insisted upon, by the maintainers of miracles, because it is an essential element of their *signal* character. And this leads us to notice one grand difference between Divine Miracles and other alleged facts that seem to vary from the ordinary course of nature. It is manifest that there is an essential difference between alleging a case in which, all the real antecedents or causes being similar to those which we have daily opportunities of observing, a consequence is said to have ensued quite different from that which general experience finds to be uniformly conjoined with them, and alleging a case in which there is supposed and *indicated by all the circumstances*, the intervention of an invisible antecedent, or cause, which we know to exist, and to be adequate to the production of such result; for the special operation of which, in this case, we can assign probable reasons, and also for its not generally operating in a similar manner. This latter is the case of the Scripture-miracles. They are wrought under a solemn appeal to God, in proof of a revelation worthy of Him, the scheme of which may be shown to bear a striking analogy to the constitution and order of nature; and it is manifest that, in order to make them fit *signs* for attesting a revelation, they *ought* to be phenomena ca-

pable of being shown by a full induction to vary from what is known to us as the ordinary course of nature. Even if we do not regard the existence of God, in the proper sense of that term, as proved by the course of nature, still if we admit His existence to be in any degree probable, or even possible, the occurrence of miracles will not be incredible. For it is surely going too far to say that, because the ordinary course of nature leaves us in doubt whether the author of it be able or unable to alter it, or of such a character as to be disposed to alter it for some great purpose, it is *therefore* incredible that He should ever have actually altered it.—Some popular forms of expression tend greatly to increase, in many minds, the natural prejudice against miracles. One of these is the usual description of a miracle, as, “a violation of the laws of nature.” This metaphorical expression suggests directly the idea of natural agents breaking, of their own accord, some rule which has the authority and sanctity of a law to them. Such a figure can only be applicable to the case of a supposed *causeless* and arbitrary variation from the uniform order of sequence in natural things, and is wholly inapplicable to a change in that order caused by God Himself. The word “law,” when applied to material things, *ought* only to be understood as denoting a number of observed and anticipated sequences of phenomena, taking place with such a resemblance or analogy to each other *as if* a rule had been laid down, which those phenomena were constantly observing. But the *rule*, in this case, is nothing different from the actual order itself; and there is no cause of these sequences but the will of God choosing to produce those phenomena, and choosing to produce them in a certain order. Again, the term “nature” suggests to many persons the idea of a great system of things endowed with powers and forces of its own—a sort of machine, set a-going originally by a first cause, but continuing its motions *of itself*. Hence we are apt to imagine that a change in the motion or operation of any part of it by God, would produce the same disturbance of the other parts, as such a change would be likely to produce in them, if made by us, or any other natural agent. But if the motions and operations of material things be produced really by the Divine will, then His choosing to change, for a special purpose, the ordinary motion of one part, does not necessarily, or probably, infer His choosing to change the ordinary motions of other parts in a way not at all requisite for the accomplishment of that special purpose. It is as easy for Him to continue the ordinary course of the rest, with the change of one part, as of all the phenomena without any change at all. Thus, though the stoppage of the motion of the earth in the ordinary course of nature would be attended with terrible convulsions, the stoppage of the earth *miraculously*, for a special purpose to be served by that *only*, would not of itself be followed by any such consequences. From the same conception of nature, as a machine, we are apt to think of interferences with the ordinary course of nature as implying some imperfection in it. But this is a false analogy; for, the reason why machines are made is, to save us trouble; and, therefore, they are more perfect in proportion as they answer this purpose. But no one can seriously imagine that the universe is a machine for the purpose of saving trouble to the Almighty. Again, when miracles are described as “interferences with the laws of nature,” this description makes them appear improbable to many

minds, from their not sufficiently considering that the laws of nature interfere with one another; and that we cannot get rid of “interferences” upon any hypothesis consistent with experience. Furthermore, whatever ends may be contemplated by the Deity for the laws of nature in reference to the rest of the universe, we know that, in respect of us, they answer discernible moral ends—that they place us practically under government, conducted in the way of rewards and punishment—a government of which the *tendency* is to encourage virtue and repress vice—and to form in us a certain character by discipline; which character our moral nature compels us to consider as the highest and worthiest object which we can pursue. Since, therefore, the laws of nature have, in reference to us, moral purposes to answer, which, as far as we can judge, they have not to serve in other respects, it seems not incredible that these peculiar purposes should occasionally require modifications of those laws in relation to us, which are not necessary in relation to other parts of the universe.—After all deductions and abatements have been made, however, it must be allowed that a certain antecedent improbability must always attach to miracles, considered as events varying from the ordinary experience of mankind as known to us; because likelihood, *verisimilitude* or resemblance to what we know to have occurred, is, by the constitution of our minds, the very ground of probability; and, though we can perceive reasons, from the moral character of God, for thinking it likely that He may have wrought miracles, yet we know too little of His ultimate designs, and of the best mode of accomplishing them, to argue confidently from His character to His acts, except where the connection between the character and the acts is demonstrably indissoluble, as in the case of acts rendered necessary by the attributes of veracity and justice. Miracles are, indeed, in the notion of them, no breach of the high generalization that “similar antecedents have similar consequents;” nor, necessarily, of the maxim that “God works by general laws;” because we can see some laws of miracles (as e. g. that they are infrequent, and that they are used as attesting signs of, or in conjunction with, revelations) and may suppose more; but they do vary, when taken apart from their proper evidence, from this rule, that “what a general experience would lead us to regard as similar antecedents *are* similar antecedents;” because the only assignable specific difference observable by us in the antecedents in the case of miracles, and in the case of the experiments from the analogy of which they vary in their physical phenomena, consists in the moral antecedents; and these, in cases of physical phenomena, we generally throw out of the account; nor have we grounds *a priori* for concluding *with confidence* that these are not to be thrown out of the account here also, although we can see that the moral antecedents here (such as the fitness for attesting a revelation like the Christian) are, in many important respects, different from those which the analogy of experience teaches us to disregard in estimating the probability of physical events.—But, in order to form a fair judgment, we must take in all the circumstances of the case, and, amongst the rest, the *testimony* on which the miracle is reported to us. Our belief, indeed, in human testimony seems to rest upon the same sort of instinct on which our belief in the testimony (as it may be called) of nature is built, and is to be checked, modified, and confirmed by a process of experience

similar to that which is applied in the other case. As we learn, by extended observation of nature and the comparison of analogies, to distinguish the real laws of physical sequences from the casual conjunctions of phenomena, so are we taught in the same manner to distinguish the circumstances under which human testimony is certain or incredible, probable or suspicious. The circumstances of our condition force us daily to make continual observations upon the phenomena of human testimony; and it is a matter upon which we can make such experiments with peculiar advantage, because every man carries within his own breast the whole sum of the ultimate motives which can influence human testimony. Hence arises the aptitude of human testimony for overcoming, and more than overcoming, almost any antecedent improbability in the thing reported. So manifest, indeed, is this inherent power of testimony to overcome antecedent improbabilities, that Hume is obliged to allow that testimony may be so circumstanced as to require us to believe, in some cases, the occurrence of things quite at variance with general experience; but he pretends to show that testimony to such facts *when connected with religion* can never be so circumstanced.—Over and above the direct testimony of human witnesses to the Bible-miracles, we have also what may be called the indirect testimony of events confirming the former, and raising a distinct presumption that some such miracles must have been wrought. Thus, e. g., we know, by a copious induction, that, in no nation of the ancient world, and in no nation of the modern world unacquainted with the Jewish or Christian revelation, has the knowledge of the one true God as the Creator and Governor of the world, and the public worship of Him, been kept up by the mere light of nature, or formed the groundwork of such religions as men have devised for themselves. Yet we do find that, in the Jewish people, though no way distinguished above others by mental power or high civilization, and with as strong natural tendencies to idolatry as others, this knowledge and worship was kept up from a very early period of their history, and, according to their uniform historical tradition, kept up by revelation attested by undeniable miracles. Again, the existence of the Christian religion, as the belief of the most considerable and intelligent part of the world, is an undisputed fact; and it is also certain that this religion originated (as far as human means are concerned) with a handful of Jewish peasants, who went about preaching, on the very spot where Jesus was crucified, that He had risen from the dead, and had been seen by, and had conversed with them, and afterward ascended into heaven. This miracle, attested by them as eyewitnesses, was the very ground and foundation of the religion which they preached, and it was plainly one so circumstanced that, if it had been false, it could easily have been proved to be false. Yet, though the preachers of it were everywhere persecuted, they had gathered, before they died, large churches in the country where the facts were best known, and through Asia Minor, Greece, Egypt, and Italy; and these churches, notwithstanding the severest persecutions, went on increasing till, in about 300 years after, this religion—i. e. a religion which taught the worship of a Jewish peasant (JESUS CHRIST) who had been ignominiously executed as a malefactor—became the established religion of the Roman empire; and has ever since continued to be the pre-

vailing religion of the civilized world.—It is manifest that, if the miraculous facts of Christianity did not really occur, the stories about them must have originated either in fraud or in fancy. The coarse explanation of them by the hypothesis of unlimited fraud, has been generally abandoned in modern times: but, in Germany especially, many persons of great acuteness have long labored to account for them by referring them to fancy. Of these there have been two principal schools—the *Naturalistic*, and the *Mythic*. 1. The Naturalists suppose the miracles to have been natural events, more or less unusual, that were mistaken for miracles, through ignorance or enthusiastic excitement. But the result of their labors in detail has been to turn the N. T., as interpreted by them, into a narrative far less credible than any narrative of miracles could be. "Some infidels," says Archbishop Whately, "have labored to prove concerning *some one* of our Lord's miracles that it might have been the result of an accidental conjuncture of natural circumstances; and they endeavor to prove the same concerning *another*, and so on; and thence infer that *all* of them, occurring as a series, might have been so. They might argue, in like manner, that, because it is not very improbable one may throw sixes in any one out of 100 throws, therefore it is no more improbable that one may throw sixes 100 times running." The truth is, that every thing that is improbable in the mere *physical strangeness* of miracles applies to such a series of odd events as these explanations assume: while the hypothesis of their non-miraculous character deprives us of the means of *accounting for them* by the extraordinary interposition of the Deity. 2. The Mythic theory supposes the N. T. Scripture-narratives to have been legends, not stating the grounds of men's belief in Christianity, but springing out of that belief, and embodying the idea of what Jesus, if He were the Messiah, must have been conceived to have done in order to fulfil that character, and was therefore supposed to have done. But this leaves the origin of the belief, that a man, who *did not fulfil* the idea of the Messiah in any one remarkable particular, *was* the Messiah, wholly unaccounted for. Besides, all the arguments for the genuineness and authenticity of the writings of the N. T. bring them up to a date when the memory of Christ's real history was so recent, as to make the substitution of a set of mere legends in its place utterly incredible; and the gravity, simplicity, historical decorum, and consistency with what we know of the circumstances of the times in which the events are said to have occurred, observable in the narratives of the N. T., make it impossible reasonably to accept them as mere *myths*. In the early ages, the fact that extraordinary miracles were wrought by Jesus and His apostles, does not seem to have been generally denied by the opponents of Christianity. They seem always to have preferred adopting the expedient of ascribing them to art magic and the power of evil spirits. We are not to suppose, however, that this solution would have been preferred, if the facts could have been plausibly denied. We know that in two instances, in the Gospel narrative, the cure of the man born blind and the Resurrection, the Jewish priests were unable to pretend such a solution, and were driven to maintain unsuccessfully a charge of fraud; and the circumstances of the Christian miracles were, in almost all respects, so utterly unlike those of any pretended instances of magical wonders, that the apologists have little dif-

sculty in refuting this plea. This they do generally from the following considerations: (1.) The greatness, number, completeness, and publicity of the miracles. (2.) The natural beneficial tendency of the doctrine they attested. (3.) The connection of them with a whole scheme of revelation extending from the first origin of the human race to the time of Christ. This evasion of the force of the Christian miracles, by referring them to the power of evil spirits, has seldom been seriously resorted to in modern times; but the English infidels of the last century employed it as a kind of *argumentum ad hominem* (L. = *argument to a man*, i. e. one derived from his own principles), to tease and embarrass their opponents—contending that, as the Bible speaks of “lying wonders” of Antichrist, and relates a long contest of apparent miracles between Moses and the Egyptian magicians, Christians could not, *on their own principles*, have any certainty that miracles were not wrought by evil spirits. But (1.) The light of nature gives us no reason to believe that there are any evil spirits having power to interfere with the course of nature. (2.) It shows us that, if there be, they are continually controlled from exercising such power. (3.) The supposed records in the Bible of such an exercise show us the power there spoken of, as exerted completely under the control of God, and in such a manner as to make it evident where the advantage lay. (4.) The number, greatness, beneficence, and variety of the Bible-miracles—their connection with prophecy and a scheme of things extending from the creation down—the character of Christ and His apostles—and the manifest tendency of the Christian religion to serve the cause of truth and virtue—make it incredible that the miracles attesting it should have been wrought by evil beings.—Particular theories as to the manner in which miracles have been wrought are matters rather curious than practically useful. In all such cases we must bear in mind the great maxim *the subtlety of nature far surpasses the subtlety of the human mind*. Another question more curious than practical, is that respecting the precise period when miracles ceased in the Christian Church. It is plain, that whenever they ceased in point of fact, they ceased *relatively to us* whenever a sufficient attestation of them to our faith fails to be supplied. A real miracle may indeed be imperfectly reported to us, and *we may*, therefore, *possibly* reject accounts of real miracles; but this is an inconvenience attending *probable* evidence from its very nature.—In the case of the Scripture-miracles, we must be careful to distinguish the *particular occasions* upon which they were wrought, from their *general purpose* and design; yet not so as to overlook the connection between these two things. There are but few miracles recorded in Scripture of which the whole character was merely evidential—few, i. e., that were merely displays of a supernatural power made for the sole purpose of attesting a Divine Revelation. Of this character were the change of Moses' rod into a serpent at the burning bush (Ex. iv.), the burning bush itself (iii.), the going backward of the shadow upon the sun-dial of Ahaz (2 K. xx. 9–11; Is. xxxviii. 8), and some others. In general, however, the miracles recorded in Scripture have, beside the ultimate purpose of affording evidence of a Divine interposition, some immediate temporary purposes which they were apparently wrought to serve—such as the curing of diseases, the feeding of the hungry, the relief of innocent, or the punishment of guilty persons. These immediate

temporary ends are not without value in reference to the ultimate and general design of miracles, as providing evidence of the truth of revelation. And, in some cases it would appear that miraculous works of a particular kind (e. g. the cure of bodily diseases, the gift of tongues, the casting out of demons) were selected as emblematic or typical of some characteristic of the revelation which they were intended to attest. In this point of view, Christian miracles may be fitly regarded as *specimens* of a Divine Power, alleged to be present. In this sense, they seem to be called the *manifestation* or *exhibition* of the Spirit (1 Cor. xii. 7?). In the case of the O. T. miracles, again, in order fully to understand their evidential character, we must consider the general nature and design of the dispensation with which they were connected. The general design of that dispensation appears to have been to keep up in one particular race a knowledge of the one true God, and of the promise of a MESSIAH in whom “all the families of the earth” should be “blessed.” And in order to this end, it appears to have been necessary that, for some time, God should have assumed the character of the local tutelary Deity and Prince of that particular people. (JEHOVAH.) And from this peculiar relation in which He stood to the Jewish people (aptly called by Josephus a *Theocracy*) resulted the necessity of frequent miracles, to manifest and make sensibly perceptible His actual presence among and government over them. The miracles, therefore, of the O. T. are to be regarded as evidential of the theocratic government; and this again is to be conceived of as subordinate to the further purpose of preparing the way for Christianity, by keeping up in the world a knowledge of the true God and of His promise of a Redeemer. With respect to the *character* of the O. T. miracles, we must also remember that the whole structure of the Jewish economy had reference to the peculiar exigency of the circumstances of a people imperfectly civilized, and is so distinctly described in the N. T., as dealing with men according to the “hardness of their hearts,” and being a system of “weak and beggarly elements,” and a rudimentary instruction for “children” who were in the condition of “servants.”—It has been often made a topic of complaint against Hume that, in dealing with testimony as a medium for proving miracles, he has resolved its force entirely into our *experience* of its veracity, and omitted to notice that, antecedently to all experience, we are predisposed to give it credit by a kind of natural instinct. The argument, indeed, in Hume's celebrated *Essay on Miracles*, was very far from being a new one. The restatement of it, however, by a person of Hume's abilities, was of service in putting men upon a more accurate examination of the true nature and measure of probability. Even in the pages of Bishop Butler we may perhaps detect a misconception of this subject. “There is,” he observes, “a very strong presumption against common speculative truths, and against the most ordinary facts, before the proof of them, which yet is overcome by almost any proof. There is a presumption of millions to one against the story of Cesar or of any other man. For, suppose a number of common facts so and so circumstanced, of which one had no kind of proof, should happen to come into one's thoughts; every one would, without any possible doubt, conclude them to be false. And the like may be said of a single common fact. And from hence it appears that the question of importance, as to the matter

before us, is concerning the degree of the peculiar presumption against miracles; not whether there be any peculiar presumption at all against them. For *if there be a presumption of millions to one against the most common facts*, what can a small presumption, additional to this, amount to, though it be peculiar? It cannot be estimated, *and is as nothing*" (*Analogy*, part ii., ch. ii.). It is plain that, in this passage, Butler lays no stress upon the *peculiarities* of the story of Cesar, which he casually mentions. For he expressly adds, "or of any other man;" and repeatedly explains that what he says applies equally to any ordinary facts, or to a single fact. And the way in which he proposes to estimate the presumption against ordinary facts is, by considering the likelihood of their being anticipated beforehand by a person *guessing at random*. But, surely, this is not a measure of the likelihood of the facts considered in themselves, but of the likelihood of the *coincidence of the facts* with a rash and arbitrary anticipation. The case of a person guessing beforehand, and the case of a witness reporting what has occurred, are essentially different. The truth is, that the *chances* to which Butler seems to refer as a presumption against ordinary events, are not in ordinary cases overcome by testimony at all. The testimony has nothing to do with them; because they are chances against the event considered as the subject of a random vaticination, not as the subject of a report made by an actual observer. But it should be noticed that what we commonly call the chances against an ordinary event are not *specific*, but *particular*. They are chances against *this* event, not against *this kind of* event. The chances, in the case of casting a die, are the chances against the coming of a *particular* face; not against the coming up of *some* face. "Hume ignores the fact of a supernatural moral government over the world of nature and of men. . . . Nature is only a part of a more comprehensive system. Nature is an instrument, not an end. The moral administration of God is superior and all-comprehensive. The fixed order of Nature is appointed to promote the ends of wisdom and goodness. The same motive which dictated the establishment of this order may prescribe a deviation for it; or rather may have originally determined that the natural order should at certain points give way to supernatural manifestation. . . . Introduce the fact of a personal God, a moral government, and a wise and benevolent end to be subserved through miraculous interposition, and Hume's reasoning is emptied of all its force" (Prof. G. P. Fisher, in *New Englander*, xxiv. 14-17). —The *Ecclesiastical Miracles* are not delivered to us by inspired historians; nor do they seem to form any part of the same series of events as the miracles of the N. T. The miracles of the N. T. (setting aside those wrought by Christ Himself) appear to have been worked by a power conferred upon particular persons according to a regular law, in virtue of which that power was ordinarily transmitted from one person to another, and the only persons privileged thus to *transmit* that power were the *apostles*. The only exceptions to this rule were, (1.) the apostles themselves, and (2.) the family of Cornelius, who were the first-fruits of the Gentiles. In all other cases, miraculous gifts were conferred only by the laying on of the *apostles'* hands. By this arrangement, it is evident that a provision was made for the total ceasing of that miraculous dispensation within a limited period: because, on the death of the last of the apostles, the ordinary channels would be

all stopped through which such gifts were transmitted in the Church. One passage has, indeed, been appealed to as seeming to indicate the permanent residence of miraculous powers in the Christian Church through all ages (Mk. xvi. 17, 18). But—(1.) That passage itself is of doubtful authority, since it was omitted in most of the Greek MSS. which Eusebius was able to examine in the fourth century; and it is still wanting in some of the most important that remain to us. (MARK, GOSPEL OF.) (2.) It does not necessarily imply more than a promise that such miraculous powers should exhibit themselves among the immediate converts of the apostles. And (3.) this latter interpretation is supported by what follows—"And they went forth, and preached everywhere, the Lord working with them, and confirming the word with the accompanying signs." It is, indeed, confessed by the latest and ablest defenders of the ecclesiastical miracles that the great mass of them were essentially a new dispensation; but it is contended, that by those who believe in the Scripture-miracles, no strong antecedent improbability against such a dispensation can be reasonably entertained; because, for them, the Scripture-miracles have already "borne the brunt" of the infidel objection, and "broken the ice." But this is wholly to mistake the matter. If the only objection antecedently to proof against the ecclesiastical miracles were a presumption of their *impossibility* or *incredibility*—simply as *miracles*, this allegation might be pertinent; because he that admits that a miracle has taken place, cannot consistently hold that a *miracle as such* is impossible or incredible. But the antecedent presumption against the ecclesiastical miracles rises upon four distinct grounds, no one of which can be properly called a ground of *infidel* objection. (1.) It arises from the very nature of probability, and the constitution of the human mind, which compels us to take the analogy of general experience as a measure of likelihood. And this presumption is neither religious nor irreligious, but antecedent to, and involved in, all probable reasoning. (2.) This *general* antecedent presumption against miracles, as varying from the analogy of general experience, cannot be denied without shaking the basis of all probable evidence, whether for or against religion. Nor does the admission of the existence of the Deity, or the admission of the actual occurrence of the Christian miracles, tend to remove this antecedent improbability against miracles circumstanced as the ecclesiastical miracles generally are. The true presumption against miracles is not against their *possibility*, but their *probability*. Christianity has indeed revealed to us the permanent operation of a supernatural order of things, actually going on around us. But there is nothing in the notion of *such* a supernatural system as the Christian dispensation is, to lead us to expect continual interferences with the common course of nature. (3.) It is acknowledged by the ablest defenders of the ecclesiastical miracles that, for the most part, they belong to those classes of miracles which are described as *ambiguous* and *tentative*, i. e. they are cases in which the effect, if it occurred at all, *may* have been the result of natural causes, and where, upon the application of the same means, the desired effect was only sometimes produced. (4.) Though it is not true that the Scripture-miracles have so "borne the brunt" of the *a priori* objection to miracles (i. e. the objection from the analogy of general experience) as to remove all peculiar presumption against them as improbable events, there

is a sense in which they have prepared the way for those of the ecclesiastical legends. But it is one which aggravates, instead of extenuating, their improbability. The narratives of the Scripture-miracles may very probably have tended to raise an expectation of miracles in the minds of weak and credulous persons, and to encourage designing men to attempt an imitation of them. And those instances of Scripture-miracles which are most easily imitable by fraud, or most apt to strike a wild and mythical fancy, seem to be the types which, with extravagant exaggeration and distortion, are principally copied in the ecclesiastical miracles. In this sense it may be said that the Scripture narratives "broke the ice," and prepared the way for a whole succession of legends. On the whole, we may conclude that the mass of the ecclesiastical miracles do not form any part of the same series as those related in Scripture, which latter are, therefore, unaffected by any decision we may come to with respect to the former; and that they are pressed by the weight of three distinct presumptions against them—being improbable (1.) as varying from the analogy of nature; (2.) as varying from the analogy of the Scripture-miracles; (3.) as resembling those legendary stories which are the known product of the credulity or imposture of mankind.—Leslie, in his *Short and Easy Method with the Deists*, laid down four rules which attest the miracles of Moses and of Christ, viz. (1.) That the matter of fact be such as men's outward senses can judge of; (2.) That it be done publicly in the face of the world; (3.) That memorials and observances be kept up in commemoration of it; (4.) That such memorials and observances commence from the fact. Thus the PASSOVER, LORD'S DAY, &c., prove the reality of the miracles connected with their origin. There may be facts in favor of which these four criteria cannot be found; but that which has the four is thereby substantiated. See also CREATION; DEMONIACS; INSPIRATION; MAGIC; TONGUES, CONFUSION OF, &c.

**MIRIAM** (Heb. *their rebellion*, Scl.; *rebellion*, Ges.; *thick, fat, strong one*, Fül.). 1. Miriam, the sister of MOSES, was the eldest of that sacred family; and she first appears probably as a young girl, watching her infant brother's cradle in the Nile, and suggesting her mother as a nurse (Ex. ii. 4, 7). The independent and high position given by her superiority of age she never lost. "The sister of AARON" is her Biblical distinction (xv. 20). In Num. xii. 1 she is placed before Aaron; and in Mic. vi. 4 reckoned as amongst the Three Deliverers. She is the first personage in that household to whom the prophetic gifts are directly ascribed—"Miriam the Prophetess" is her acknowledged title (Ex. xv. 20). The prophetic power showed itself in her under the same form as in the days of Samuel and David—poetry, accompanied with music and processions. The only instance of this prophetic gift is when, after the passage of the Red Sea, she takes a cymbal in her hand, and goes forth, like the Hebrew maidens in later times after a victory (Judg. v. 1, xi. 34; 1 Sam. xviii. 6; Ps. lxxviii. 11, 25), followed by the whole female population of Israel, also beating their cymbals and striking their guitars (A. V. "dances"). It does not appear how far they joined in the whole song (Ex. xv. 1-19); but the opening words are repeated by Miriam herself at the close. (PROPHET.) She took the lead, with Aaron, in the complaint against Moses for his marriage with a Cushite. (ZEPHRAH.) "Hath JEHOVAH spoken by Moses? Hath He not also spoken by us?" (Num. xii. 1, 2).

A stern rebuke was administered in front of the sacred Tent to both Aaron and Miriam. But the punishment fell on Miriam, as the chief offender. The hateful Egyptian leprosy, of which for a moment the sign had been seen on the hand of her younger brother, broke out over the whole person of the proud prophetess. How grand was her position, and how heavy the blow, is implied in the cry of anguish which goes up from both her brothers. And it is not less evident in the silent grief of the nation (10-15). This stroke, and its removal, which took place at Hazeroth, form the last public event of Miriam's life. She died toward the close of the wanderings at Kadesh, and was buried there (xx. 1). Her tomb was shown near Petra in the days of Jerome. According to Josephus, she was married to the famous HUR, and through him, was grandmother of the architect BEZALEEL. (MARY THE VIRGIN.)—2. A man or woman mentioned in the genealogies of the tribe of Judah and house of Caleb (1 Chr. iv. 17).

**MIR'NA** (Heb. *deceit, fraud*, Ges.; *height*, Fül.), a Benjamite chief, son of Shalaharaim by his wife Hodesh; born in the land of Moab (1 Chr. viii. 10).

**MIR'RO**. The two Hebrew words, *mar'ah* (Ex. xxxviii. 8), and *re'it* (Job xxxvii. 18), are rendered "looking-glass" in the A. V., but from the context evidently denote a mirror of polished metal. In the N. T. the Gr. *enoptron* is translated "glass," i. e. mirror, in 1 Cor. xiii. 12; Jas. i. 23; and the plural participle *katoptrizomenoi* is translated "beholding as in a glass" (= mirror) in 2 Cor. iii. 18. The Hebrew women on coming out of Egypt probably brought with them mirrors like those used by the Egyptians, and made of a mixed metal, chiefly copper, wrought with such admirable skill, says Sir G. Wilkinson (*Anc. Eg. iii. 384*), that they were "susceptible of a lustre, which has even been partially revived at the

Ancient Mirrors, or "Looking-glasses," of bronze.—From the British Museum.—(Fairbairn.) 1-4, Egyptian Mirrors. 5, Assyrian Mirror.

present day, in some of those discovered at Thebes, though buried in the earth for many centuries. The mirror itself was nearly round, inserted into a handle of wood, stone, or metal, whose form varied according to the taste of the owner. Some presented the figure of a female, a flower, a column, or a rod ornamented with the head of Athor, a bird, or a fancy device; and sometimes the face of a Typhonian monster was introduced to support the mirror, serving as a contrast to the features whose beauty was displayed

within it." The metal of which the mirrors were composed, being liable to rust and tarnish, required to be constantly kept bright (Wis. vii. 26; Ecclus. xii. 11). This was done by means of pounded pumice-stone, rubbed on with a sponge, which was generally suspended from the mirror. The obscure image produced by a tarnished or imperfect mirror, appears to be alluded to in 1 Cor. xiii. 12. The obscure Heb. pl. *gilyônim* (Is. iii. 23), rendered "glasses" (i. e. mirrors) in the A. V. after the Vulgate, Targum, Gesenius, and the best authorities, is explained by Schroeder to signify *transparent dresses* of fine linen.

**Mis'a-el**, or **Mi'sa-el** (Gr. = MISHAEL). 1. MISHAEL 2 (1 Esd. ix. 44; compare Neh. viii. 4).—2. MISHAEL 3 = MESHACH (Song of the Three Holy Children 66).

**Mis'gab** (Heb. *height*, Ges.), a place in Moab named in company with NEBO and KIRIATHAIM in the denunciation of Jeremiah (xlviii. 1). It appears to be mentioned also in Is. xxv. 12, though there rendered in the A. V. "high fort." It possibly = "Mizpeh of Moab," named only in 1 Sam. xxii. 3. MIZPAH 2.

**Mish'a-el**, or **Mi'sha-el** (Heb. *who is what God is?* Ges.). 1. A son of Uzziel, the uncle of Aaron and Moses (Ex. vi. 22). When Nadab and Abihu were struck dead for offering strange fire, Mishaël and his brother Elzaphan, at the command of Moses, removed their bodies from the sanctuary, and buried them without the camp, their loose-fitting tunics serving for winding-sheets (Lev. x. 4, 5).—2. One, probably a priest or Levite, who stood at Ezra's left hand when he read the Law to the people (Neh. viii. 4).—3. One of Daniel's three companions (Dan. i. 6, 7, 11, 19, ii. 17); = MESHACH.

\* **Mi'shal** (Heb.) = MISHEAL (Josh. xxi. 30).

**Mi'sham** (Heb. *swift-going*, Ges.), a Benjamite, son of Elpaal, and descendant of Shaharaim (1 Chr. viii. 12).

**Mi'she-al**, or **Mi'sh'e-al** (Heb. *entreaty*, Ges.), a city of Asher (Josh. xix. 26), allotted to the Gershonite Levites (xxi. 30, A. V. "Mishal"; 1 Chr. vi. 74, A. V. "Mishal").

**Mish'ma** (Heb. *a hearing*, Ges.). 1. Son of Ishmael and brother of MIBSAM 1 (Gen. xxv. 14; 1 Chr. i. 30). The Masamani of Ptolemy may represent the tribe of Mishma.—2. Son of Simeon (1 Chr. iv. 25), brother of MIBSAM 2. These brothers were perhaps named after the older brothers, Mishma 1 and Mibsam 1.

**Mish-man'nah** (Heb. *fatness*, Ges.), the fourth of the twelve lion-faced Gadites who joined David at Ziklag (1 Chr. xii. 10).

**Mish'ra-ites** (fr. Heb. = *people from Mishra* [*slippery place?*]), a town or place otherwise unknown, Ges.), the, the fourth of the four "families of Kirjath-jearim," i. e. colonies proceeding therefrom and founding towns (1 Chr. ii. 53).

\* **Mis'par** (Heb.). MIZPAR and MISPERETH.

**Mis'pe-reth** (Heb. *number*, Ges.), one of those who returned with Zerubbabel and Jeshua from Babylon (Neh. vii. 7); called MIZPAR (or MISPAR) in Ezr. ii. 2, and ASPHARASUS in 1 Esd. v. 8.

**Mis're-photh-ma'im** (Heb., see below), a place in northern Palestine, in close connection with Zidon-rabbah, i. e. Sidon (Josh. xi. 8). The name occurs again in the enumeration of the districts remaining to be conquered (xiii. 6). Taken as Hebrew, the literal meaning of the name is *burnings of waters*, and accordingly it is taken by the old interpreters to mean *warm waters*, whether natural, i. e. hot

baths or springs—or artificial, i. e. salt, glass, or smelting works; more probably = *burnings by the waters*, either lime-kilns or smelting-furnaces situated near water (Gesenius). Probably here, as in many other cases (so Mr. Grove), a meaning has been forced on a name originally belonging to another language, and therefore unintelligible to the later occupiers of the country. Thomson makes Misrephoth-maim = a collection of springs called 'Ain Musheirifeh, on the sea-shore, close under the *Ras en-Nakhura*; but this has the disadvantage of being very far from Sidon. May it not rather be ZAREPHATH?

\* **Mist**, the A. V. translation of—1. Heb. *ed* = *vapor*, *mist*, rising from the earth and forming clouds, Ges. (Gen. ii. 6), translated "VAPOR" once (Job xxxvi. 27); not found elsewhere.—2. Gr. *achlus* = a *mist* before the eyes, Rbn. *N. T. Lex.* (Acts xiii. 11 only).—3. Gr. *zophos* = *darkness*, *blackness*, *thick gloom*, Rbn. *N. T. Lex.* (2 Pet. ii. 17), twice translated "DARKNESS" (4; Jude 6), and once "blackness" (Jude 13). CLOUD; DEW; RAIN, &c.

**Mite** (Gr. *lepton*), a coin current in Palestine in the time of our Lord (Mk. xii. 41-44; Lk. xxi. 1-4). It seems in Palestine to have been the smallest piece of money, being the half of the "FARTHING" 1, and therefore = three-sixteenths of a cent. Perhaps the "farthing" was the more common coin. MONEY.

**Mith'rah** (Heb. *sweetness*, Ges.), an unknown desert encampment of the Israelites (Num. xxxiii. 28, 29). WILDERNESS OF THE WANDERING.

**Mith'nite** (fr. Heb. = one from a place or tribe named *Methen*, otherwise unknown), the, the designation of JOSHAPHAT, one of David's "valiant men" (1 Chr. xi. 43).

**Mith're-dath** (Heb. fr. Pers. = *given by Mithra*, the sun-god, Ges., Fñ., &c.; *given to Mithra*, Sir Henry Rawlinson). 1. The treasurer of Cyrus, king of Persia, to whom the king gave the vessels of the Temple, to be by him transferred to the hands of Sheshbazzar (Ez. i. 8).—2. A Persian officer at Samaria, in the reign of Artaxerxes, or Smerdis the Magian; one of those leagued together to hinder the rebuilding of the Temple (Ezr. iv. 7).

**Mith-ri-da'tes** [-teez] (Gr. and L. fr. Pers. = MITHREDATH). 1. MITHREDATH 1 (1 Esd. ii. 11).—2. MITHREDATH 2 (ii. 16).

**Mi'tre**. CROWN.

**Mit-y-le'ne** (L. fr. Gr.; named [so some] from its founder's daughter, or [so others] from its restorer, Schl.), the chief town of Lesbos, and situated on the east coast of the island. At Mitylene St. Paul stopped for the night between Assos and Chios (Acts xx. 14, 15). It may be gathered from the circumstances of this voyage that the wind was blowing from the N. W.; and it is worth while to notice that in the harbor or roadstead of Mitylene the ship would be sheltered from that wind. The town itself was celebrated in Roman-times for the beauty of its buildings. The poetess Sappho and poet Alcæus, the physician Theophrastus, the sage Pittacus, &c., were natives of Mitylene. In St. Paul's day it had the privileges of a free city. It is one of the few cities of the Ægean which have continued without intermission to flourish till the present day. It has given its name to the whole island, and is itself now called sometimes *Castro*, sometimes *Mitylen*.

**Mixed Multitude**. With the Israelites who journeyed from Rameses to Succoth, the first stage of the Exodus from Egypt, there went up (Ex. xii. 38)

"a mixed multitude" (Heb. *'ēreb rab*, margin "a great mixture"), who have not hitherto been identified. Aben Ezra says it signifies the Egyptians who were mixed with them. Rashi on Num. xi. 4 (where the Heb. *asaphēph* is thus translated) identifies the "mixed multitude" of Numbers and Exodus. During their residence in Egypt marriages were naturally contracted between the Israelites and the natives (Lev. xxiv. 11). This hybrid race is evidently alluded to by Rashi and Aben Ezra, and is most probably that to which reference is made in Exodus. That the "mixed multitude" is a general term including all those who were not of pure Israelite blood is evident; more than this cannot be positively asserted. In Exodus and Numbers it probably denoted the miscellaneous hangers-on of the Hebrew camp, whether they were the issue of spurious marriages with Egyptians, or were themselves Egyptians or belonging to other nations. The Heb. *'ēreb* is translated by itself "mixed multitude" in Neh. xiii. 3 (compare 23-30), after the return from Babylon. Gesenius defines it "*a mixed multitude, mingled mass, of strangers and foreigners who follow a migrating people or an army.*" **MINGLED PEOPLE.**

**Miz̄ar** (fr. Heb. = *smallness*, hence *small, little*, Ges.), the **HILL** (Heb. *har*), a mountain apparently in the northern part of Transjordanic Palestine, from which the author of Ps. xlii. utters his pathetic appeal (ver. 6). The name appears nowhere else. Gesenius, &c., suppose it a summit probably in the ridge of Anti-Lebanon or Hermon. **HILL 2.**

**Mizpah**, and **Mizpeh** (both fr. Heb. = *watch-tower, lofty place*, Ges.), the name borne by several places in ancient Palestine.—1. The "Mizpah" first mentioned, is the heap of stones piled up by Jacob and Laban (Gen. xxxi. 48) on Mount Gilead (25), to serve both as a witness to the covenant then entered into, and also as a landmark of the boundary between them (52). This heap received a name from each of the two chief actors in the transaction—**GALEED** and **JEGAR-SAHADUTHA**. Its third name, **Mizpah**, it seems from the narrative to have derived from neither party, but to have possessed already. The name remained attached to the ancient meeting-place of Jacob and Laban, and the spot where their conference had been held became a sanctuary of Jehovah, and a place for solemn conclave and deliberation in times of difficulty long after. On this natural "watch-tower," when the last touch had been put to their misery by the threatened attack of the Ammonites, did the children of Israel assemble for the choice of a leader (Judg. x. 17, compare 16); and when the outlawed JEPHTHAH had been prevailed on to leave his exile and take the head of his people, his first act was to go to "the Mizpah," and on that consecrated ground utter all his words "before Jehovah." At Mizpah he seems to have henceforward resided; there the fatal meeting took place with his daughter on his return from the war (xi. 34), and we can hardly doubt that on the altar of that sanctuary the father's terrible vow was consummated. Most probably the "Mizpeh of Gilead" mentioned here only = the Mizpah of the other parts of the narrative; and both probably = the **RAMATH-MIZPEH** and **RAMOTH-GILEAD**, so famous in the later history (so Mr. Grove and most authorities). Mr. Grove is disposed to regard this Mizpah as the place at which the great assembly of the people was held to decide on the measures to be taken against Gibeah after the outrage on the Levite and his concubine (Judg. xx. 1, 3, xxi. 1, 5, 8). Robinson (i. 460),

Porter (in Kitto), Prof. Douglas (in Fairbairn), &c., regard this "Mizpeh" as = No. 6 below. Prof. Douglas also considers the "Mizpah" of Judg. x. 17, xi. 11, 34 as = No. 6, and different from "Mizpeh of Gilead" in xi. 29. Porter supposes the Mizpah of Genesis a different place from any mentioned in Judges, and perhaps on some hill-top N. of Gerasa. (**MAHANAIM**.) Mizpah still retained its name in the days of the Maccabees, by whom it was besieged and taken with the other cities of Gilead (1 Mc. v. 35, A. V. "Maspha").—2. A second Mizpeh, on the E. of Jordan, was the "Mizpeh of Moab," where the king of that nation was living when David committed his parents to his care (1 Sam. xxii. 3). The name does not occur again, nor is there any clew to the situation of the place. It may have been **KIR OF MOAB**, the modern *Kerak*, or even the great Mount Pisgah.—3. A third was "the land of Mizpeh," or more accurately "of Mizpah," the residence of the Hivites who joined the northern confederacy against Israel, headed by Jabin, king of Hazor (Josh. xi. 3). No other mention is found of this district in the Bible, unless it be identical with—4. "The Valley of Mizpeh," to which the discomfited hosts of the same confederacy were chased by Joshua (xi. 8). It lay eastward from **MISREPHOTH-MAIN**; but the situation of the latter place is by no means certain. If we may rely on the peculiar term (Heb. *bik'ah*) here rendered "VALLEY," then we may accept the "land of Mizpah" or "the valley of Mizpah" as = **COELESYRIA** (**CELOSRYIA**), the *Buk'ā* alike of the modern Arabs and of the ancient Hebrews. But this is only a probable inference.—5. "Mizpeh," a city of Judah (Josh. xv. 38); in the "VALLEY" (No. 5), or maritime lowland. Van de Velde suggests its identity with the present *Tell es-Sāfiyeh*, the Blanchegarde of the Crusaders, and this conjecture is favored by Mr. Grove, Knobel, Keil, &c. Porter (in Kitto) regards this site as too far N. (**GATIL**).—6. "Mizpeh," in Joshua and Samuel; elsewhere "Mizpah," a "city" of Benjamin, named between Beeroth and Chephirah, and in apparent proximity to Ramah and Gibeon (Josh. xviii. 26). Its connection with the two last-named towns is also implied in the later history (1 K. xv. 22; 2 Chr. xvi. 6; Neh. iii. 7). It was one of the places fortified by Asa against the incursions of the kings of Israel (1 K. xv. 22; 2 Chr. xvi. 6; Jer. xli. 9); and after the destruction of Jerusalem it became the residence of the superintendent appointed by the king of Babylon (Jer. xl. 7, &c.; **GEDALIAH** 1), and the scene of his murder and of the romantic incidents connected with the name of **ISHMAEL** the son of Nethaniah. But Mizpah was more than this. In the earlier periods of the history of Israel, at the first foundation of the monarchy, it was the great sanctuary of Jehovah, the special resort of the people in times of difficulty and solemn deliberation. It was one of the three holy cities which Samuel visited in turn as judge of the people (vii. 6, 16), the other two being Bethel and Gilgal. Probably this is the Mizpah of Neh. iii. 7, 15, 19. (See also No. 1 above.) With the conquest of Jerusalem and the establishment there of the Ark, the sanctity of Mizpah, or at least its reputation, seems to have declined. We hear of no religious act in connection with it till that affecting assembly called together thither, as to the ancient sanctuary of their forefathers, by Judas Maccabeus, "when the Israelites assembled themselves together and came to Maspha over against Jerusalem; for in Maspha was there aforetime a place of prayer for Israel" (1 Mc. iii. 46). The expression "over

against," no less than the circumstances of the story, seems to require that from Mizpah the City or the Temple was visible. These conditions are satisfied by the position of Scopus, the broad ridge which forms the continuation of the Mount of Olives to the N. and E., from which the traveller gains, like Titus, his first view, and takes his last farewell, of the domes, walls, and towers of the Holy City (so Mr. Grove, with Stanley and Bonar). Robinson (i. 460) regards *Nebv Samuel* (= *Prophet Samuel*), five miles N. W. of Jerusalem, as the probable site of Mizpah of Benjamin; and this identification is accepted by Wilson (ii. 36 ff.), Porter (*Handbook*, and in Kitto), and generally (so Prof. Douglas, in Fairbairn). *Nebv Samuel* is the most conspicuous object in the whole region, rising 500 or 600 feet above the plain of Gibeon, is well cultivated in terraces, and has on its top a large dilapidated mosque, formerly a church, and a little village (see cut under GIBEON). The "Mizpah" of Hos. v. 1 may be Mizpah of Benjamin, but Porter (in Kitto) prefers "Mizpeh of Gilead."

**Mizpar** (fr. Heb. = *number*, Ges.), properly MISPAR, as in the A. V. of 1611 and the Geneva version; = MISPERETH (Ezr. ii. 2).

**Mizpeh.** MIZPAH.

**Mizraim**, an English form of the Heb. *mitsrayim*, the usual name of EGYPT in the O. T., the dual of Heb. *Misr*, which is less frequently employed. If the etymology be sought in Hebrew it might signify a *mound*, *bulwark*, or *citadel*, or *distress*; but no one of these meanings is apposite. Mr. R. S. Poole prefers with Gesenius, to look to the Arabic. In the *Kānoos*, one of the meanings given to *Misr*, the corresponding Arabic word, is *red earth or mud*, and this Mr. Poole believes is the true one, from its correspondence to the Egyptian name of the country, *Kem*, which signifies *black*, and was given to it for the blackness of its alluvial soil. Gesenius accepts another meaning of the Arabic word, viz. *limit, border*.—Mizraim first occurs in the account of the Hamites in Gen. x., where we read, "And the sons of HAM; Cush, and Mizraim, and Phut, and Canaan" (ver. 6; compare 1 Chr. i. 8). If the names be in order of seniority, we can form no theory as to their settlements from their places; but if the arrangement be geographical, the placing may afford a clew to the positions of the Hamite lands. CUSH would stand first as the most widely-spread of these peoples, extending from Babylon to the upper Nile; the territory of Mizraim would be the next to the N., embracing Egypt and its colonies on the N.W. and N.E.; PHUT as dependent on Egypt might follow Mizraim; and CANAAN as the northernmost would end the list. Egypt, the "land of Ham," may have been the primitive seat of these four stocks. In the enumeration of the Mizraites, though we have tribes extending far beyond Egypt, we may suppose that they all had their first seat in Mizraim, and spread thence, as is distinctly said of the Philistines. Here the order seems to be geographical, though the same is not so clear of the Canaanites. The list is thus given in Gen. x. 1.—"And Mizraim begat LUDIM, and ANAMIM, and LEHABIM, and NAPHTHIM, and PATHRUSIM, and CASLUHIM (out of whom came PHILISTIM), and CAPTORIM" (13, 14; compare 1 Chr. i. 11, 12). Mizraim, therefore, like Cush, and perhaps Ham, geographically represents a centre whence colonies went forth in the remotest period of post-diluvian history. Mr. Poole regards the distribution of the Mizraites as showing that their colonies were but a part of the great migration that gave

the Cushites the command of the Indian Ocean, and which explains the affinity the Egyptian monuments show us between the pre-Hellenic Cretans and Carians (the latter no doubt the Leleges of the Greek writers) and the Philistines. In the use of the singular and dual Hebrew names for Egypt there can be no doubt that the dual indicates the two regions into which the country has always been divided by nature as well as by its inhabitants. It has been supposed that the singular, as distinct from the dual, signifies Lower Egypt; but this conjecture cannot be maintained (so Mr. Poole).

**Miz'zah** (Heb. *fear*, Ges.), a "duke" of Edom; son of Reuel and grandson of Esau (Gen. xxxvi. 13, 17; 1 Chr. i. 37).

**Mna'son** [na-] (Gr. *remembering*, Schl.), an "old disciple," mentioned as one of the hosts of the Apostle Paul (Acts xxi. 16). Probably his residence at this time was not Cesarea, but Jerusalem. He was a Cyprian (CYPRUS) by birth, and may have been a friend of Barnabas (Acts iv. 36), and possibly brought to the knowledge of Christianity by him.

**Mo'ab** (Heb. = *from my father*, LXX., Jos., De Wette, &c.; *going in of the father*, Hiller, Sim.; *seed of the father*, Ros., Ges., &c.; a *wished-for, longed-for one*, Füll.), son of Lot's eldest daughter, and elder brother of Ben-Ammi, the progenitor of the Ammonites (Gen. xix. 37); also the nation descended from him. ZOAR was the cradle of the race of Lot. From this centre the brother-tribes spread themselves. AMMON, whose disposition seems throughout to have been more roving and unsettled, went to the N. E. Moab, whose habits were more settled and peaceful, remained nearer their original seat. The rich highlands which crown the eastern side of the chasm of the Dead Sea, and extend northward as far as the foot of the mountains of Gilead, appear at that early date to have borne a name which in its Hebrew form is presented to us as SHAVEH-KIRIATHAIM, and to have been inhabited by a branch of the REPHAIM. This ancient people, the EMIM, gradually became extinct before the Moabites, who thus obtained possession of the whole of the rich elevated tract referred to. With the highlands they occupied also the lowlands at their feet. Of the valuable district of the highlands they were not allowed to retain entire possession. The warlike Amorites crossed the JORDAN and overran the richer portion of the territory on the N., driving Moab back to his original position behind the natural bulwark of the ARNON. The plain of the Jordan valley appears to have remained in the power of Moab. When Israel reached the boundary of the country, this contest had only very recently occurred. Sihon, the Amorite king, under whose command Heshbon had been taken, was still reigning there: the ballads commemorating the event were still fresh in the popular mouth (Num. xxi. 27-30). Of these events we obtain the above outline only from the fragments of ancient documents (xxi. 26-30; Deut. ii. 10, 11). The position into which the Moabites were driven by the incursion of the Amorites was a very circumscribed one, in extent not half that which they had lost. But on the other hand it was much more secure, and was well suited for the occupation of a people whose disposition was not so warlike as that of their neighbors. The territory occupied by Moab at the period of its greatest extent, before the invasion of the Amorites, divided itself naturally into three distinct and independent portions. Each of these portions appears

to have had its name by which it is almost invariably designated. (1.) The enclosed corner or canton S. of the Arnon was the "FIELD of Moab" (Heb. *śāleh*, A. V. "country;" Ru. i. 1, 2, 6, &c.). (2.) The more open rolling country N. of the Arnon, opposite Jericho, and up to the hills of Gilead, was the "land of Moab" (Heb. *erets* [see EARTH]; Deut. i. 5, xxxii. 49, &c.). (3.) The sunk district in the tropical depths of the Jordan valley, taking its name from that of the great valley itself—the ARABAH—was the '*Arbōth-Mōb* = the dry regions, in the A. V. "plains of Moab" (Num. xxii. 1, &c.). Outside of the hills, which enclosed the "field of Moab" or Moab proper, on the S. E., lay the vast pasture-grounds of the waste, uncultivated country (A. V. "wilderness;" see DESERT 2) which is described as "facing Moab" on the E. (A. V. "before Moab, toward the sun-rising," Num. xxi. 11). Through this latter district Israel appears to have approached the Promised Land. Some communication had evidently taken place, though of what nature it is impossible clearly to ascertain (Deut. ii. 28, 29, xxiii. 4; Judg. xi. 17). But whatever the communication may have been, the result was that Israel did not traverse Moab, but turning to the right passed outside the mountains, through the "wilderness," by the eastern side of the territory above described (Deut. ii. 8; Judg. xi. 18), and finally took up their position in the country N. of the Arnon, from which Moab had so lately been ejected. Here the headquarters of the nation remained for a considerable time while the conquest of Bashan was being effected. It was during this period that the visit of BALAAM took place. The whole of the country E. of the Jordan, except the little corner occupied by Moab, was in possession of the invaders, and although at the period in question the main body had descended from the upper level to the plains of Shittim, the '*Arbōth-Mōb*, in the Jordan valley, yet a great number must have remained on the upper level, and the towns up to the very edge of the ravine of the Arnon were still occupied by their settlements (Num. xxi. 24; Judg. xi. 26). It was a situation full of alarm for a nation which had already suffered so severely. The account of the whole of these transactions in Numbers perhaps hardly conveys an adequate idea of the extremity in which BALAK found himself in his unexpected encounter with the new nation and their mighty Divinity. The connection of Moab with MIDIAN, and the comparatively inoffensive character of the former, are shown in the narrative of the events which followed the departure of Balaam. The latest date at which the two names appear in conjunction, is found in the notice of the defeat of Midian "in the field of Moab" by the Edomite King Hadad the son of Bedad, which occurred five generations before the establishment of the monarchy of Israel (Gen. xxxvi. 35; 1 Chr. i. 46). After the conquest of Canaan the relations of Moab with Israel were of a mixed character. With the tribe of Benjamin, whose possessions at their eastern end were separated from those of Moab only by the Jordan, they had at least one severe struggle, in union with their kindred the Ammonites, and also for this time only, the wild Amalekites from the S. (Judg. iii. 12-30). (EGLON; ENOCH 2.) The feud continued with true Oriental pertinacity to the time of SAUL. Of his slaughter of the Ammonites we have full details in 1 Sam. xi., and among his other conquests Moab is especially mentioned (xiv. 47). But while such were their

relations to the tribe of Benjamin, the story of RUTH, on the other hand, testifies to the existence of a friendly intercourse between Moab and Bethlehem, one of the towns of Judah. By his descent from RUTH, DAVID may be said to have had Moabite blood in his veins. The relationship was sufficient, especially when combined with the blood-feud between Moab and Benjamin, already alluded to, to warrant his visiting the land of his ancestress, and committing his parents to the protection of the king of Moab, when hard pressed by Saul (xxii. 3, 4). But here all friendly relation stops forever. The next time the name is mentioned is in the account of David's war, at least twenty years after the last-mentioned event. Two-thirds of the people were put to death; the remainder became bondmen, and were subjected to an annual tribute. The spoils went to swell the treasures which David was amassing for the future Temple (2 Sam. viii. 2, 11, 12; 1 Chr. xviii. 2, 11). So signal a vengeance can only have been occasioned by some act of perfidy or insult, like that which brought down a similar treatment on the Ammonites (2 Sam. x.). It has been conjectured that the king of Moab betrayed the trust which David reposed in him, and either himself killed Jesse and his wife, or surrendered them to Saul. But this, though not improbable, is nothing more than conjecture. It must have been a considerable time before Moab recovered from so severe a blow. At the disruption of the kingdom, Moab seems to have fallen to the northern realm. At the death of Ahab, eighty years later, we find Moab paying him the enormous tribute, apparently annual, of 100,000 rams, and the same number of wethers (LAMB 4) with their fleeces. It is not surprising that the Moabites should have seized the moment of Ahab's death to throw off so burdensome a yoke; but it is surprising that, notwithstanding such a drain on their resources, they were ready to incur the risk and expense of a war with a state in every respect far their superior. Their first step, after asserting their independence, was to attack the kingdom of Judah (2 Chr. xx.). The army was a huge heterogeneous horde of ill-assorted elements, and the expedition contained within itself the elements of its own destruction. Dissensions arose, and the army of Jehoshaphat had only to watch the extermination of one-half the huge host by the other half, and to seize the prodigious booty left on the field. As a natural consequence of the late events, Israel, Judah, and Edom united in an attack on Moab. The three confederate armies approached not as usual by the N., but round the southern end of the Dead Sea, through the parched valleys of Upper Edom. As the host came near, the king of Moab, doubtless the same MESHA 1 who threw off the yoke of Ahab, assembled the whole of his people on the boundary of his territory. Here they remained all night on the watch. With the approach of morning the sun rose suddenly above the horizon of the rolling plain, and shone with a blood-red glare on a multitude of pools in the bed of the wady at their feet. To them the conclusion was inevitable. The army had, like their own on the late occasion, fallen out in the night; these red pools were the blood of the slain; those who were not killed had fled, and nothing stood between them and the pillage of the camp. The cry "Moab to the spoil!" was raised. Down the slopes they rushed in headlong disorder. Then occurred one of those scenes of carnage which can happen but once or twice in the existence of a

nation. The Moabites fled back in confusion, followed and cut down at every step by their enemies. Far inward did the pursuit reach, among the cities, and farms, and orchards, of that rich district: nor when the slaughter was over was the horrid work of destruction done. The towns were demolished, and the stones strewed over the tilled fields. The fountains of water were choked, and all good timber felled. At last the struggle collected itself at KIR-HARASETH. Here Mesha took refuge with his family and with the remnants of his army. The heights around were covered with slingers, who discharged their volleys of stones on the town. At length, Mesha, collecting round him 700 of his best warriors, made a desperate sally, with the intention of cutting his way through to his special foe, the king of Edom. But he was driven back. And then an awful spectacle amazed and horrified the besiegers. The king and his eldest son, the heir to the throne, mounted the wall, and, in the sight of the thousands who covered the sides of that vast amphitheatre, the father killed and burnt his child as a propitiatory sacrifice to the cruel gods of his country. Shortly afterward we hear of "bands"—i. e. pillaging, marauding parties—of the Moabites making their incursions into Israel in the spring, as if to spoil the early corn before it was fit to cut (2 K. xiii. 20). A king of Edom seems to have been killed and burnt by Moab (Am. ii. 1). In the "Burden of Moab" (Is. xv., xvi.), we possess a document full of interesting details as to the condition of the nation at the death of Ahaz, king of Judah (B. C. 726). Moab has regained more than his former prosperity, and has besides extended himself over the district which he originally occupied, and which was less vacant at the removal of Reuben to Assyria (1 Chr. v. 25, 26). This passage of Isaiah cannot be considered apart from Jer. xlviii. The latter was pronounced more than a century later, about B. C. 600, ten or twelve years before the invasion of Nebuchadnezzar, by which Jerusalem was destroyed. The difficulty of so many of the towns of Reuben being mentioned, as already in the possession of Moab, may perhaps be explained by remembering that the idolatry of the neighboring nations—and therefore of Moab—had been adopted by the Transjordanic tribes for some time previously to the final deportation by Tiglath-pileser (1 Chr. v. 25); and that many of the sanctuaries were probably even at the date of the original delivery of the denunciation in the hands of the priests of CHEMOSH and MILCOM. On the other hand, the calamities which Jeremiah describes may have been inflicted in any one of the numerous visitations from the Assyrian army, under which these unhappy countries suffered at the period of his prophecy in rapid succession. The allusions in these prophetic denunciations to the condition of Moab bear the evident stamp of portraiture by artists who knew their subject thoroughly. The nation appears in them as high-spirited, wealthy, populous, and even to a certain extent civilized, enjoying a wide reputation and popularity. And we may safely conclude that they are not merely temporary circumstances, but were the enduring characteristics of the people. In this case there can be no doubt that among the pastoral people of Syria, Moab stood next to Israel in all matters of material wealth and civilization. Half the allusions of Isaiah and Jeremiah in the passages referred to must forever remain obscure. Many expressions, also, such as the "weeping of Jazer," the "heifer of three years old," the "shadow of

Heshbon," the "lions," must be unintelligible. But nothing can obscure or render obsolete the tone of tenderness and affection which makes itself felt in a hundred expressions throughout these precious documents. Isaiah refers to the subject in another passage of extraordinary force, and of fiercer character than before (xxv. 10-12). Here the extermination, the utter annihilation, of Moab, is contemplated by the prophet with triumph, as one of the first results of the reestablishment of Jehovah on Mount Zion. Between the time of Isaiah's denunciation and the destruction of Jerusalem, we have hardly a reference to Moab. Zephaniah, writing in the reign of Josiah, reproaches them (ii. 8-10) for their taunts against the people of Jehovah, but no acts of hostility are recorded either on the one side or the other. From one passage in Jeremiah (xxv. 9-21) delivered in the fourth year of Jehoiakim, just before the first appearance of Nebuchadnezzar, it is apparent that it was the belief of the prophet that the nations surrounding Israel—and Moab among the rest—were on the eve of devastation by the Chaldeans and of a captivity for seventy years (see ver. 11), from which, however, they should eventually be restored to their own country (12, xlviii. 47). From another record of the events of the same period or of one only just subsequent (2 K. xxiv. 2), it would appear, however, that Moab made terms with the Chaldeans, and for the time acted in concert with them in harassing and plundering the kingdom of Jehoiakim. Four or five years later, in the first year of Zedekiah (Jer. xxvii. 1), these hostilities must have ceased, for there was then a regular intercourse between Moab and the court at Jerusalem (3), possibly, as Bunsen suggests, negotiating a combined resistance to the common enemy. The brunt of the storm must have fallen on Judah and Jerusalem. In Ezekiel's time, the cities of Moab were still flourishing, "the glory of the country," destined to become at a future day a prey to the "men of the East"—the Bedouins of the great desert of the Euphrates (Ez. xxv. 8-11). After the return from the Captivity, a Moabite, Sanballat of Horonaim, took the chief part in annoying and endeavoring to hinder the operations of the rebuilders of Jerusalem (Neh. ii. 19, iv. 1, vi. 1, &c.). During the interval since the return of the first caravan from Babylon, the illegal practice of marriages between the Jews and the other people around, Moab amongst the rest, had become frequent. Even among the families of Israel who returned from the Captivity was one bearing the name of PAHATH-MOAB (Ezr. ii. 6, viii. 4; Neh. iii. 11, &c.), a name which must certainly denote a Moabite connection. In Judith (iv. 3), the scene of which is laid shortly after the return from Captivity, Moabites and Ammonites are represented as dwelling in their ancient seats, and as obeying the call of the Assyrian general. In the time of Eusebius, i. e. about A. D. 380, the name appears to have been attached to the district, as well as to the town of Rabbath (AR), both being called Moab. It also lingered for some time in the name of the ancient Kir of Moab, which, as Charakmoba, is mentioned by Ptolemy, and as late as the Council of Jerusalem, A. D. 536, formed the see of a bishop under the same title. Since that time the modern name *Karak* has superseded the older one, and no trace of Moab has been found either in records or in the country itself. Like the other countries E. of Jordan, Moab has been very little visited by Europeans, and beyond its general characteristics hardly any thing is known of it. Seetzen (1806-7),

Burckhardt (1812), Irby and Mangles (1818), and De Sauley (1851), have passed through Moab Proper, from *Wady Mójeb* to *Kerak*. In one thing all agree, the extraordinary number of ruins scattered over the country. The whole country is undulating, and, after the general level of the plateau is reached, without any serious inequalities or conspicuous vegetation. The language of the Moabites was perhaps a dialect of Hebrew. In the few communications recorded as taking place between them and Israelites no interpreter is mentioned (Ru. i. 22; 1 Sam. xxii. 3, 4, &c.). For the religion of the Moabites, see CHEMOSH, MOLECH, PEOR. Of their habits and customs we have hardly a trace. **HAIR.**

\* **Mo'ab-ite** = descendant of MOAB, or one from MOAB (Deut. ii. 9, 11, 29, xxiii. 3, &c.).

\* **Mo'ab-ite'ss** (i. as in *Moabite*) = a female descendant of MOAB, or woman of MOAB (Ru. i. 22; 2 Chr. xxiv. 26, &c.).

\* **Mo'ab-ite'sh**, adj. = of or belonging to MOAB (Ru. ii. 6).

**Mo-a-di'ah** (fr. Heb. = *festival of Jehovah*, Ges.), a priest, or family of priests, who returned with Zerubbabel; = MAADIAH. The chief of the house in the time of high-priest Joiakim was Piltai (Neh. xii. 17).

**Moch'mur** [mok-] (fr. Gr. form of Heb. = *boiling, foaming*, Sin., Grove?), the **Brook**, a torrent, i. e. a *ready*, mentioned only in Jd. vii. 18. The torrent Moch'mur may be either the *Wady Makfuriyeh*, on the northern slopes of which 'Akrahah stands, or the *Wady Ahmar*, which is the eastern continuation of the former toward the *Wady Fusail* and the Jordan.

**Mo'din** (L. fr. Heb.), a place not mentioned in either Old or N. T., though rendered immortal by its connection with the history of the Jews in the interval between the two. It was the native city of the Maccabean family (1 Mc. xiii. 25; MACCABEES), and as a necessary consequence contained their ancestral sepulchre (ii. 70, ix. 19). It was here that Mattathias struck the first blow of resistance. Mattathias himself, and subsequently his sons Judas and Jonathan, were buried in the family tomb, and over them Simon erected a structure which is minutely described in 1 Mc. xiii. 25-30, and, with less detail, by Josephus. At Modin the Maccabean armies encamped on the eves of two of their most memorable victories—that of Judas over Antiochus Eupator (2 Mc. xiii. 14), and that of Simon over Cendebeus (1 Mc. xvi. 4), the last battle of the veteran chief before his assassination. The only indication of the position of the place to be gathered from the above notices is contained in the last, from which we may infer that it was near "the plain," i. e. the great maritime lowland of Philistia (ver. 5). By Eusebius and Jerome it is specified as near Diospolis, i. e. Lydda; while the notice in the Mishna, and the comments of Bartenora and Maimonides, state that it was fifteen (Roman) miles from Jerusalem. At the same time the description of the monument seems to imply that the spot was so lofty as to be visible from the sea, and so near that even the details of the sculpture were discernible therefrom. All these conditions, excepting the last, are tolerably fulfilled in either of the two sites called *Litrón* and *Kubáh*. The former, favored by Robinson, Porter, Thomson, &c., is fifteen Roman miles W. N. W. of Jerusalem, about eight English miles from *Lydd*, fifteen from the Mediterranean, with extensive ancient remains on the top of the hill. The latter is two miles further from Jerusalem on the

most westerly spur of the hills of Benjamin. The mediæval and modern tradition places Modin at *Sôba*, an eminence S. of *Kuriat el-'Enub* (Kirjath-jearim); but this being not more than seven miles from Jerusalem, while it is as much as twenty-five from Lydda and thirty from the sea, and also far removed from the plain of Philistia, is at variance with every one of the conditions implied in the records. The monuments are said by Eusebius to have been still shown when he wrote, about A. D. 320. Any restoration of the structure from so imperfect an account as that given in 1 Mc. and by Josephus can never be any thing more than conjecture.

**Mo'eth** (Gr.). In 1 Esd. viii. 63, "NOADIAH the son of Binnui" (Ezr. viii. 33), a Levite, is called "Moeth the son of Sabban."

**Mo'i'a-dah** (Heb. *birth, lineage*, Ges.), a city in the south of Judah, given to Simeon (Josh. xv. 26, xix. 2). In the latter tribe it remained at any rate till the reign of David (1 Chr. iv. 28), but afterward it seems to have come back into the hands of Judah, by whom it was reinhabited after the Captivity (Neh. xi. 26). In the *Onomasticon* a place named Malatha is spoken of as in the interior of Daroma; and further it is mentioned as four miles from Arad and twenty from Hebron. Ptolemy also speaks of a Malathia as near Elusa. The requirements of these notices are all very fairly answered by the position of the modern *el-Milth*, a site of ruins, with two large wells, about four English miles from *Tell 'Arad*, seventeen or eighteen from Hebron, and nine or ten due E. of Beer-sheba.

**Mole**, the A. V. translation of—1. Heb. *tinshemeth*, occurring in the list of unclean birds in Lev. xi. 18; Deut. xiv. 16 (A. V. "swan"), and in Lev. xi. 30 (A. V., LXX., Vulg., &c., "mole"). Bochart has argued with much force in behalf of the "CHAMELEON" being the *tinshemeth*. The only clew to an identification is to be found in the etymology, and in the context. Bochart conjectures that the Heb. root *nâsham*, *to breathe*, from which *tinshemeth* is derived, has reference to a vulgar opinion amongst the ancients that the chameleon lived on air. Probably the animals mentioned in Lev. xi. 30 are different kinds of lizards; perhaps therefore, since the etymology of the word is favorable to that view, the chameleon may be the animal intended by *tinshemeth* in Lev. xi. 30. The chameleon's lung is very large, and when filled with air it renders the body semi-transparent; from the creature's power of abstinence, no doubt arose the fable that it lived on air. Numerous theories have been proposed to account for the changes of color in its skin. It lives on trees, its five toes being in two groups for grasping; its tail is also fitted for grasping; it seizes its insect prey by darting out its long tongue, to the viscous tip of which the insect adheres; its eyes act independently of one another. The chameleons constitute a peculiar genus of saurians or lizard-like reptiles, which inhabit Asia and Africa, and the South of Europe; the *Chameleo vulgaris* is the species mentioned in the Bible. Mr. Gosse (in Fairbairn) supposes the *tinshemeth* may be the blind mole-rat (*Aspalax taphlus*), which inhabits Eastern Europe and Western Asia. Hasselquist describes the burrows of these animals as abundant on the plains of Sharon. The name "mole" is popularly applied to many small insectivorous burrowing quadrupeds belonging to the family *Talpidae*. Moles have no external ears, very small eyes, and soft compact fur. The common European mole is *Talpa Europæa*; the most common American spe-

cies are of the genus *Scalops*.—2. Heb. *hēphōr* (or *chēphōr*) *pērōth* (= *the digging of rats*, i. e. rats' holes,

Chameleon (*Chamaeleo vulgaris*).—(Fbn.)

better read as one plural word = *rats*, Ges.), translated "moles" by the A. V. and Vulgate in Is. ii. 20. Perhaps no reference is made by the Hebrew

Blind Mole-rat (*Aspalax typhlus*).—(Fbn.)

words to any particular animal, but to the holes and burrows of rats, mice, &c., which we know frequent ruins and deserted places.

**Molech** (Heb. *dominion*, *rule*, Fū.; see below). The fire-god Molech was the tutelary deity of the children of AMMON, and essentially identical with the Moabitish CHEMOSH. Fire-gods appear to have been common to all the Canaanite, Syrian, and Arab tribes, who worshipped the destructive element under an outward symbol, with the most inhuman rites. Among these were human sacrifices, purifications and ordeals by fire, devoting of the first-born, mutilation, and vows of perpetual celibacy and virginity. To this class of divinities belonged the old Canaanitish Molech. The root of the word Molech is the same as that of *melech*, or "king," and hence he is identified with MALCHAM ("their king") in 2 Sam. xii. 30 and Zeph. i. 5, the title by which he was known to the Israelites, as invested with regal honors in his character of a tutelary deity, the lord and master of his people. Our translators have recognized this identity in their rendering of Am. v. 26 (where "your Moloch" is literally "your king," as in the margin), following the Greek in the speech of Stephen, in Acts vii. 34. The first direct historical allusion to Molech-worship is in the description of Solomon's idolatry in his old age (1 K. xi. 7). In ver. 5 the same deity is called

**MILCOM**. Most of the Jewish interpreters say that in the worship of Molech the children were not burnt, but made to pass between two burning pyres, as a purificatory rite. But the allusions to the actual slaughter are too plain to be mistaken; and Aben Ezra, in his note on Lev. xviii. 21, says that "to cause to pass through" = "to burn." Compare Deut. xii. 31; 2 K. xxiii. 10, 13; 2 Chr. xxviii. 3; Ps. cvi. 37, 38; Jer. vii. 31, xix. 5, xxxii. 35; Ez. xvi. 20, 21, xxiii. 37. The worship of Molech is evidently alluded to, though not expressly mentioned, in connection with star-worship and the worship of Baal in 2 K. xvii. 16, 17, xxi. 5, 6, which seems to show that Molech, the flame-god, and Baal, the sun-god, whatever their distinctive attributes, and whether or not the latter is a general appellation including the former, were worshipped with the same rites. The sacrifice of children is said by Movers to have been not so much an expiatory as a purificatory rite, by which the victims were purged from the dross of the body and attained union with the deity. But the sacrifice of MESHA, king of Moab, when, in despair at failing to cut his way through the overwhelming forces of Judah, Israel, and Edom, he offered up his eldest son a burnt-offering, probably to Chemosh, his national divinity, has more of the character of an expiatory rite to appease an angry deity than of a ceremonial purification. According to Jewish tradition, from what source we know not, the image of Molech was of brass, hollow within, and was situated without Jerusalem. Kimchi (on 2 K. xxiii. 10) describes it as "set within seven chapels, and whoso offered fire flour they open to him one of them; (whoso offered) turtle-doves or young pigeons they open to him two; a lamb, they open to him three; a ram, they open to him four; a calf, they open to him five; an ox, they open to him six; and so whoever offered his son they open to him seven. And his face was (that) of a calf, and his hands stretched forth like a man who opens his hands to receive (something) of his neighbor. And they kindled it with fire, and the priests took the babe and put it into the hands of Molech, and the babe gave up the ghost. And why was it called Tophet and Hinnom? Because they used to make a noise with drums (Heb. *tōph*) that the father might not hear the cry of his child and have pity upon him, and return to him. Hinnom, because the babe wailed (*menahem*), and the noise of his wailing went up. Another opinion (is that it was called) Hinnom because the priests used to say, 'May it profit thee! may it be sweet to thee! may it be of sweet savor to thee!'" All this detail is probably as fictitious as the etymologies are unsound, but we have nothing to supply its place. By these chapels Lightfoot explains the allusion in Am. v. 26 and Acts vii. 43, "to the tabernacle of Moloch." It was more probably a shrine or ark in which the figure of the god was carried in processions (compare Is. xlv. 1; Bar. vi. 4), or which contained, as Movers conjectures, the bones of children who had been sacrificed and were used for magical purposes. Many instances of human sacrifices are found in ancient writers, which may be compared with the descriptions in the O. T. of the manner in which Molech was worshipped. The Carthaginians, according to Augustine, offered children to Saturn. Among the Rhodians a man was offered to Kronos (Saturn) on the 6th July. According to Manetho, Amosis abolished the same practice in Egypt at Heliopolis sacred to Juno. Sanchoniatho relates that the Phœnicians, on the occasion of any great calamity, sacri-

ficed to Saturn one of their relatives. Diodorus Siculus records that the Carthaginians, when besieged by Agathocles, tyrant of Sicily, offered in public sacrifice to Saturn 200 of their noblest children, while others voluntarily devoted themselves to the number of 300. His description of the statue of the god differs but slightly from that of Molech, which has been quoted. Molech, "the king," was the lord and master of the Ammonites; their country was his possession (Jer. xlix. 1), as Moab was the heritage of Chemosh; the princes of the land were the princes of Malcham (xlix. 8; Am. i. 15). His priests were men of rank (Jer. xlix. 3), taking precedence of the princes. So the priest of HECULES at Tyre was second to the king, and like Molech, the god himself is *Mekart*, "the king of the city." The priests of Molech, like those of other idols, were called CHEMARIM (2 K. xxxiii. 5; Hos. xi. 5; Zeph. i. 4).

**Môli** (fr. Gr.) = MAHLI, the son of Merari (1 Esd. viii. 47; compare Ezr. viii. 18).

**Môlid** (Heb. *begitler*, Ges.), son of Abishur by his wife Abihail, and descendant of Jerahmeel (1 Chr. ii. 29).

**Môloch** [-lok] (Gr. fr. Heb. = MOLECH). The Hebrew corresponding to "your Moloch" in the A. V. of Am. v. 26 is *molechem*, "your king," as in the margin. From the Greek of Acts vii. 43, and the LXX. of Amos, our translators adopted this form of MOLECH.

\* **Mol'ten im'age**, i. e. melted image. IDOL 21, 22.

**Mom'dis** (fr. Gr.) = MAADAI, of the sons of Bani (1 Esd. ix. 34; compare Ezr. x. 34).

**Money** (mun'ne). This article (originally by Mr. R. S. Poole) treats of two principal matters, the uncoined money and the coined money mentioned in the Bible. I. *Uncoined Money*. 1. *Uncoined Money in general*. It is well known that ancient nations that were without a coinage weighed the precious metals, a practice represented on the Egyptian monuments, on which gold and silver are shown to have been kept in the form of rings. The gold rings found in the Celtic countries have been held to have had the same use. We have no certain record of the use of ring-money or other uncoined money in antiquity excepting among the Egyptians. It can scarcely be doubted that the Assyrians and Babylonians adopted, if they did not originate, this custom; and probably therefore it existed in Palestine.—2. *The Antiquity of Coined Money*. Respecting the origin of coinage there are two accounts seemingly at variance: some saying that Phidon, king of Argos, first struck money, and according to Ephorus, in Ægina; but Herodotus ascribing its invention to the Lydians. The former statement probably refers to the origin of the coinage of European Greece, the latter to that of Asiatic Greece. On the whole it seems reasonable to carry up Greek coinage to the eighth century B. C. Purely Asiatic coinage cannot be taken up so early a date. The more archaic Persian coins seem to be of the time of Darius Hystaspis, or possibly Cyrus, and certainly not much older; and there is no Asiatic money, not of Greek cities, that can be reasonably assigned to an earlier period. Coined money may therefore have been known in Palestine as early as the fall of Samaria, but only through commerce with the Greeks, and we cannot suppose it was then current there.—3. *Notice of Uncoined Money in the O. T.* There is no distinct mention of coined money in the books of the O. T. written before the return from Babylon. In the history of ABRAHAM we read that Abimelech gave the

patriarch "a thousand (pieces) of silver," apparently to purchase veils for Sarah and her attendants; but the passage is extremely difficult (Gen. xx. 16). The narrative of the purchase of the burial-place from Ephron says, "Abraham weighed . . . 400 shekels of silver, current (money) with the merchant" (xxiii. 3, 9, 16). Here a currency is clearly indicated like that which the monuments of Egypt show to have been there used in a very remote age. A similar purchase is recorded of Jacob, who bought a parcel of a field at Shalem for 100 *kesitahs* (A. V. "pieces," margin "lambs," xxxiii. 18, 19). But what is the *kesitah*? The old interpreters supposed it to mean a lamb, and it has been imagined to have been a coin bearing the figure of a lamb. There is no known etymological ground for this meaning. Gesenius, Fürst, &c., make it literally something *weighed out*. Throughout the history of JOSEPH we find evidence of the constant use of money in preference to barter (xliiii. 21, xlvii. 13–16). At the time of the Exodus, money seems to have been still weighed, the ransom being "half a shekel after the shekel of the sanctuary (of) twenty gerahs the shekel" (Ex. xxx. 13). Here the shekel is evidently a weight, and of a special system of which the standard examples were probably kept by the priests. Throughout the Law money is spoken of as in ordinary use; but only silver money, gold being mentioned as valuable, but not clearly as used in the same manner. (METALS.) We may thus sum up our results respecting the money mentioned in the books of Scripture written before the return from Babylon. From the time of Abraham silver money appears to have been in general use in Egypt and Canaan. This money was weighed when its value had to be determined, and we may therefore conclude that it was not of a settled system of weights. Since the money of Egypt and that of Canaan are spoken of together, we may reasonably suppose they were of the same kind. Probably the form in both cases was similar or the same, since the ring-money of Egypt resembles the ordinary ring-money of the Celts, among whom it was probably first introduced by the Phœnician traders. We find no evidence in the Bible of the use of coined money by the Jews before the time of Ezra.—II. *Coined Money*. 1. *The Principal Monetary Systems of Antiquity*. Some notice of the principal monetary systems of antiquity, as determined by the joint evidence of the coins and of ancient writers, is necessary to render the next section comprehensible. The earliest Greek coins, by which we here intend those struck in the age before the Persian War, are of three talents or standards: the Attic, the Æginetan, and the Macedonian or earlier Phœnician. The oldest coins of Athens, of Ægina, and of Macedon and Thrace, we should select as typical respectively of these standards; obtaining as the weight of the Attic drachm about 67 3/4 grains troy (depreciating to about 65 1/2 under Alexander, and about 55 under the early Cæsars); of the Æginetan, about 96; and of the Macedonian, about 58, or 116, if its drachm be what is now generally held to be the didrachm. (WEIGHTS AND MEASURES.) The electrum coinage (AMBER) of Asia Minor probably affords examples of the use by the Greeks of a fourth talent, which may be called the later Phœnician, if we hold the staters to have been tetradrachms, for their full weight is about 248 grains; but it is possible that the pure gold which they contain, about 186 grains, should alone be taken into account, in which case they would be didrachms on the Æginetan standard. The Euboic talent of

the writers we recognize nowhere in the coinage. We must now briefly trace the history of these talents. (a.) The Attic talent was from a very early period the standard of Athens. If Solon really reduced the weight, we have no money of the city of the older currency. Corinth followed the same system; and its use was diffused by the great influence of these two leading cities. In Sicily and Italy, after a limited use of the Æginetan talent in the former, the Attic weight became universal. After Alexander's time the other talents were partly restored, but the Attic always remained the chief. (b.) The Æginetan talent was mainly used in Greece Proper and the islands, and seems to have been annihilated by Alexander, or by the general issue of a coin equally assignable to it or the Attic standard as one-half or two-thirds of a drachm. (c.) The Macedonian talent, besides being used in Macedonia and in some Thracian cities before Alexander, was the standard of the great Phenician cities under Persian rule, and was afterward restored in most of them. It was adopted in Egypt by the first Ptolemy, &c. (d.) The later Phenician talent was always used for the official coinage of the Persian kings and commanders, and after the earliest period was very general in the Persian empire. After Alexander it was scarcely used except in coast-towns of Asia Minor, at Carthage, and in Aradus (Arvad). Respecting the Roman coinage it is only necessary here to state that the origin of the weights of its gold and silver money is undoubtedly Greek, and that the denarius (PENNY), the chief silver coin, under the early emperors = the Attic drachm, then greatly depreciated. It is a common opinion among scholars that modern prices of articles are about ten times as high as those of ancient Greece (*B. S.* xv. 184).—2. *Coincd Money mentioned in the Bible.* The earliest distinct mention of coins in the Bible is held to refer to the Persian money. In *Ezr.* ii. 69, viii. 27 and *Neh.* vii. 70–72 current gold coins are spoken of, probably = Persian darics. (DRAM.) The Apocrypha contains the earliest distinct allusion to the coining of Jewish money, where it is narrated, in *1 Mc.* xv. 6, that Antiochus VII. granted to Simon the Maccabee permission to coin money with his own stamp, as well as other privileges. This was in the fourth year of Simon's pontificate, B. C. 140. The earliest Jewish coins were until lately considered to have been struck by Simon on receiving the permission of Antiochus VII. The following cuts are specimens:

Daric. Obv.: King of Persia to the right, kneeling, bearing bow and javelin. Rev.: Irregular incuse square.—(British Museum.)

Obv.: *יְרוּשָׁלַיִם קְדִישָׁה* (Heb. *Yerushalayim k'dishah* — Jerusalem the holy). Branch bearing three flowers. AR. (= silver).  
Vase, above which *א* (Heb. *aleph* = Year 1). Rev.: *קדש* (Heb. *q'dash* — holy). Branch bearing three flowers. AR. (= silver).

The average weight of the silver coins is about 220 grains troy for the shekel, and 110 for the half-shekel. The shekel corresponds almost exactly to the tetradrachm or didrachm of the earlier Phenician talent in use in the cities of Phenicia under

Obv.: *שְׁקֶל יִירוּשָׁלַיִם* (Heb. *shekel Y'rusail* — shekel of Israel). Same type, above which *ג* (Heb. *gimel* = year 3). Rev.: *קְדִישָׁה יְרוּשָׁלַיִם* (Heb. *Y'rusalayim k'dishah* — Jerusalem the holy). AR. (= silver).

Persian rule, and after Alexander's time at Tyre Sidon, and Berytus, as well as in Egypt. It is represented in the LXX. by didrachm, a rendering which has occasioned great difficulty to numisma-

Obv.: *שְׁקֶל אַרְבָּע רִבְעִים* (Heb. *shekel arba' rib'ah* — year 4: quarter). Two sheaves! Rev.: *צִיּוֹן* (Heb. *tsion* — of the redemption of Zion). A fruit. AE. (= brass or copper).

tists. The natural explanation seems to us to be that the Alexandrian Jews adopted for the "shekel" the term didrachm as the common name of the coin corresponding in weight to it, and that it thus be-

Obv.: (on the right) as above, omitting *rib'ah* — quarter. A sheaf between two fruits! Rev.: (on the left) as above. Vase. AE. (= brass or copper).

came in Hebraistic Greek the equivalent of "shekel." There is no ground for supposing a difference in use in the LXX. and N. T. The fabric of the silver coins above described is so different from that of any other ancient money, that it is extremely hard to base any argument on it alone, and the cases of other special classes, as the ancient money of Cyprus, show the danger of such reasoning. Some consider it as proving that these coins cannot be later than the time of Nehemiah, others will not admit it to be later than Alexander's time, while some still hold that it is not too archaic for the Maccabean period. The inscriptions of these coins, and all the other Hebrew inscriptions of Jewish coins, are in a character of which there are few other examples. As Gesenius has observed, it bears a strong resemblance to the Samaritan and Phenician, and we may add to the Aramean of coins which must

be carefully distinguished from the Aramean of the papyri found in Egypt. The meaning of the inscriptions does not offer matter for controversy. Their nature would indicate a period of Jewish freedom from Greek influence as well as independence, and the use of an era dating from its commencement. The old explanation of the meaning of the types of the shekels and half-shekels, that they represent the pot of manna and Aaron's rod that budded, seems to us remarkably consistent with the inscriptions and with what we should expect. Cavedoni has suggested, however, that the one type is simply a vase of the Temple, and the other a lily, arguing against the old explanation of the former that the pot of manna had a cover, which this vase has not. The copper coins form an important guide in judging of the age of the silver. That they really belong to the same time is not to be doubted. Every thing but the style proves this. We may lay down the following particulars as a basis for the attribution of this class:—(1.) The shekels, half-shekels, and corresponding copper coins may be on the evidence of fabric and inscriptions of any age from Alexander's time until the earlier period of the Maccabees. (2.) They must belong to a time of independence, and one at which Greek influence was excluded. (3.) They date from an era of Jewish independence. M. de Saulcy, struck by the ancient appearance of the silver coins, and disregarding the difference in style of the copper, has conjectured that the whole class was struck at some early period of prosperity. He fixes upon the pontificate of Jaddua, and supposes them to have been first issued when Alexander granted great privileges to the Jews; but the style, and the suppression by Alexander of all the varying weights of money in his empire except the Attic, are serious difficulties in the way of this supposition. The basis we have laid down is in entire accordance with the old theory, that this class of coins was issued by Simon the Maccabee. M. de Saulcy, however, has attributed small copper coins, all of one and the same class, to Judas the Maccabee, Jonathan, and John Hyrcanus, and would infer that the very dissimilar coins hitherto attributed to Simon, must be of another period. If these attributions be correct, his deduction is perfectly sound; but the circumstance that Simon alone is unrepresented in the series, whereas we have most reason to look for coins of him, is extremely suspicious. We shall, however, show in discussing this class, that we have discovered evidence which seems to us sufficient to induce us to abandon M. de Saulcy's classification of copper coins to Judas and Jonathan, and to commence the series with those of John Hyrcanus. For the present, therefore, we adhere to the old attribution of the shekels, half-shekels, and similar copper coins, to Simon the Maccabee.—We now give a list of all the principal copper coins of a later date than those of the class described above and anterior to Herod, according to M. de Saulcy's arrangement:—*Copper Coins.* (1.) *Judas Maccabeus.* (2.) *Jonathan.* (3.) *Simon* (wanting). (4.) *John Hyrcanus.* (5.) *Judas-Aristobulus* and *Antigonus.* (6.) *Alexander Jannæus.* *Alexandra.* *Hyrcanus* (no coins). *Aristobulus* (no coins). *Hyrcanus* (no coins). *Oligarchy* (no coins). *Aristobulus* and *Alexander* (no coins). *Hyrcanus* again restored (no coins). *Antigonus.* This arrangement is certainly the most satisfactory that has been yet proposed, but it presents serious difficulties. The most obvious of these is the absence of coins of Simon, for whose

money we have more reason to look than for that of any other Jewish ruler. A second difficulty is that the series of small copper coins, having the same, or essentially the same, reverse-type, commences with Judas, and should rather commence with Simon. A third difficulty is that Judas bears the title of priest, and probably of high-priest. A fourth and more formidable objection is that these small copper coins have for the main part of their reverse-type a Greek symbol, the united horns of plenty, and they therefore distinctly belong to a period of Greek influence. Is it possible that Judas the Maccabee, the restorer of the Jewish worship, and the sworn enemy of all heathen customs, could have struck money with a type derived from the heathen? It seems to us that this is an impossibility, and that the use of such a type points to the time when prosperity had corrupted the ruling family, and Greek usages once more were powerful in their influence. This period may be considered to commence in the rule of John Hyrcanus. On these and other grounds we maintain Bayer's opinion that the Jewish coinage begins with Simon, we transfer the coins of Jonathan the high-priest to Alexander Jannæus, and propose the following arrangement of the known money of the princes of the period we have been just considering:—*John Hyrcanus*, B. C. 135–106. Copper coins, with Hebrew inscription, "John the high-priest;" on some "A," marking alliance with Antiochus VII., Sidetes.—*Aristobulus* and *Antigonus*, B. C. 106–105 (probable attribution). Copper coins with Hebrew inscription, "Judah the high (?) priest;" copper coins with Greek inscription, "Judah the king," and "A." for Antigonus (?). M. de Saulcy supposes that Aristobulus bore the Hebrew name Judah, and there is certainly some probability in the conjecture, though the classification of these coins cannot be regarded as more than tentative.—*Alexander Jannæus*, B. C. 105–78. First coinage: copper coins with bilingual inscriptions—Greek, "Alexander the king;" Hebrew, "Jonathan the king." Second coinage: copper coins with Hebrew inscription, "Jonathan the high-priest;" and copper coins with Greek inscription, "Alexander the king." (The assigning of these latter two to the same ruler is confirmed by the occurrence of Hebrew coins of "Judah the high-priest," and Greek ones of "Judah the king," which there is good reason to attribute to one and the same person.) *Alexandra*, B. C. 78–69. The coin assigned to Alexandra by M. de Saulcy may be of this sovereign, but those of Alexander are so frequently blundered that we are not certain that it was not struck by him.—*Hyrcanus*, B. C. 69–66 (no coins).—*Aristobulus*, B. C. 66–63 (no coins).—*Hyrcanus* restored, B. C. 63–57 (no coins).—*Oligarchy*, B. C. 57–47 (no coins).—*Aristobulus* and *Alexander*, B. C. 49 (no coins).—*Hyrcanus* again, B. C. 47–40 (no coins).—*Antigonus* B. C. 40–37. Copper coins with bilingual inscriptions (Greek and Hebrew).—It is not necessary to describe in detail the money of the time commencing with the reign of Herod and closing under Hadrian. The money of Herod is abundant, but of inferior interest to the earlier coinage, from its generally having a thoroughly Greek character. It is of copper only, and seems to be of three denominations, the smallest being apparently a piece of brass, the next larger its double, and the largest its triple, as M. de Saulcy has ingeniously suggested. The smallest is the commonest, and appears to be the "farthing" of the N. T. The coin engraved below is of the smallest denomination.

tion of these. The money of Herod Archelaus, and the similar coinage of the Greek Imperial class, of Roman rulers with Greek inscriptions, present no remarkable peculiarities, nor do the coins attri-

twelve were sent forth, our Lord thus commanded them, "Provide neither gold, nor silver, nor brass in your purses" (literally "girdles," Mat. x. 9). The parallel passages are Mk. vi. 8 and Lk. ix. 3. Of these, in Mark copper alone is mentioned for money, the Palestinian currency being mainly of this metal, although silver was coined by some cities of Phenicia and Syria, and gold and silver Roman money was also in use: Luke, however, uses the term "money," which may be accounted for by his less Hebraistic style.—The coins mentioned by the evangelists, and first those of silver, are the following:—The *stater* is spoken of in the account of the miracle of the tribute-money. The receivers of *didrachms* demanded the tribute, but St. Peter found in the fish a *stater*, which he paid for our Lord and himself (Mat. xvii. 24–27, margin; see TAXES). This *stater*

Obv.: לְחֵרֹת יְרוּשָׁלַם (Heb. *lakheret* [or *lachurek*] *Yerushalaim* = of the deliverance of Jerusalem). Bunch of fruit! Rev.: שִׁמְעוֹן (Heb. *Sim'on* = Simeon). Tetrastyle temple; above which star. AR.

was therefore a tetradrachm, and it is very noteworthy that at this period almost the only Greek Imperial silver coin in the East was a tetradrachm, the didrachm being probably unknown, or very little coined. The *didrachm* is mentioned as a money of account in the passage above cited, as the equivalent of the Hebrew *SHEKEL*. The *denarius*, or Roman *PENNY*, as well as the Greek *DRACHM*, then

of about the same weight, are spoken of as current coins (xxii. 15–21; Lk. xx. 19–25). Of copper coins the *FARTHING* and its half, the *MITE*, are spoken of, and these probably formed the chief native currency. The proper Jewish series closes with the money of the famous Bar-cochab or Bar-cochba, who headed the revolt in the time of Hadrian. (JERUSALEM.) His most important coins are shekels, of which we here engrave one. (For other coins and medals, see ALEXANDER III.; ANTIOCHUS III., IV.; AUGUSTUS; CASTOR AND POLLUX; CYPRUS; DIANA; JERUSALEM; TIBERIUS.)

**Money-changers** [mun'ne-chain-jerz] (Gr. pl. of *kollubistēs*; Mat. xxi. 12; Mk. xi. 15; Jn. ii. 15, A. V. "changers;" Gr. pl. of *kermatistēs*, Jn. ii. 14, A. V. "changers of money"). According to Ex. xxx. 18–15, every Israelite who had reached or passed the age of twenty must pay into the sacred treasury, whenever the nation was numbered, a half-shekel (= thirty cents in the time of Christ) as an offering to Jehovah. The money-changers whom Christ, for their impiety, avarice, and fraudulent dealing, expelled from the Temple, were the dealers who supplied half-shekels, for such a premium as they might be able to exact, to the Jews from all parts of the world, who assembled at Jerusalem during the great festivals, and were required to pay their tribute or ransom money in the Hebrew coin. "Exchangers" (Gr. *trapezai*), in Mat. xxv. 27, is a general term for *bankers* or *brokers*. BANK; LOAN; MONEY; TABLE 6; USURY.

**Month** (Heb. *hōdash* or *chōdash*, *yerah* or *zerach*; Gr. *mēn*). The terms for "month" and "moon" have the same close connection in the Hebrew language, as in our own and in the Indo-European languages generally. The most important point in connection with the month of the Hebrews is its length, and the mode by which it was calculated. The difficulties attending this inquiry are considerable in consequence of the scantiness of the data. Though it may fairly be presumed from the terms used that the month originally corresponded to a lunation, no reliance can be placed on the mere verbal argument to prove the exact length of the month in historical times. The word appears even in the earliest times to have passed into its secondary sense, as describing a period approaching to a lunation; for, in Gen. vii. 11, viii. 4, where we first meet with it, equal periods of 30 days are described, the interval between the 17th days of the second and the seventh months being equal to 150 days (Gen. vii. 11, viii. 3, 4). We have therefore in this instance an approximation to the solar month. (CHRONOLOGY 1; YEAR.) From the time of the institution of the Mosaic law downward, the month appears to have been a lunar one. The cycle of religious feasts commencing with the Passover, depended not simply on the month, but on the moon; the 14th of Abib was coincident with the full moon; and the new moons themselves were the occasions of regular festivals (Num. x. 10, xxviii. 11–14). The commencement of the month was generally decided by observation of the new moon, which may be detected about 40 hours after the period of its conjunction with the sun. According to the Rabbinical rule, however, there must at all times have been a little uncertainty beforehand as to the exact day on which the month would begin; for it depended not only on the appearance, but on the announcement; if the important word *Mekudash* (Heb. = consecrated) were not pronounced until after dark, the following day was the first of the

month; if before dark, then that day. (NEW MOON.) But we can hardly suppose that such a strict rule of observation prevailed in early times, nor was it in any way necessary; the recurrence of the new moon can be predicted with considerable accuracy. The length of the month by observation would be alternately 29 and 30 days, nor was it allowed by the Talmudists that a month should fall short of the former or exceed the latter number, whatever might be the state of the weather.—The usual number of months in a year was twelve, as implied in 1 K. iv. 7 and 1 Chr. xxvii. 1–15; but inasmuch as the Hebrew months coincided, as we shall presently show, with the seasons, it follows, as a matter of course, that an additional month must have been inserted about every third year, which would bring the number up to thirteen. No notice, however, is taken of this month in the Bible. In the modern Jewish calendar the intercalary month is introduced seven times in every 19 years, according to the Metonic cycle, which was adopted by the Jews about A. D. 360. The usual method of designating the months was by their numeral order, e. g. “the second month” (Gen. vii. 11), “the fourth month” (2 K. xxv. 3); and this was generally retained even when the names were given, e. g. “in the month Zif, which is the second month” (1 K. vi. 1), “in the third month, i. e. the month Sivan” (Esth. viii. 9). An exception occurs, however, in regard to Abib in the early portion of the Bible (Ex. xiii. 4, xliii. 15; Deut. xvi. 1), which is always mentioned by name alone. The practice of the writers of the post-Babylonian period in this respect varied: Ezra, Esther, and Zechariah specify both the names and the numerical order; Nehemiah only the former; Daniel and Haggai only the latter.—The names of the months belong to two distinct periods; in the first place we have those peculiar to the period of Jewish independence, of which four only, even including Abib, which we hardly regard as a proper name, are mentioned, viz.: Abib (Heb. = *an ear of grain, a green ear*, Ges.), in which the Passover fell (Ex. xiii. 4, xliii. 15, xxxiv. 18; Deut. xvi. 1), and which was established as the first month in commemoration of the Exodus (Ex. xii. 2); Zif (Heb. *zif* = *brightness, beauty*, especially of flowers, i. e. flower-month, Ges.), the second month (1 K. vi. 1, 37); Bul (Heb. lit. *rain*, i. e. *rainy month*, Ges.), the eighth (1 K. vi. 38); and Ethaniam (Heb. *perennial*, sc. brooks, i. e. the month of flowing brooks, Ges.), the seventh (1 K. viii. 2). In the second place we have the names which prevailed subsequently to the Babylonish Captivity; of these the following seven appear in the Bible:—Nisan (Heb. *month of flowers*; more probably [so Benfey] from Pers. = *new day*, Ges.), the first, in which the Passover was held (Neh. ii. 1; Esth. iii. 7); Sivan (Heb. probably from Persian name of a deity, Benfey, Ges., Fñ.; from Assyrian name of the moon, Rln.), the third (Esth. viii. 9; Bar. i. 8); Elul (Heb. probably fr. a root denoting *to glean*, sc. the vine; the name of a Syrian and Phœnician deity, Fñ.), the sixth (Neh. vi. 15; 1 Mc. xiv. 27); Chisleu (Heb. probably from an Aram. name of *Orion* or *Mars*, Fñ.), the ninth (Neh. i. 1; Zech. vii. 1; 1 Mc. i. 54); Tebeth (Heb. probably from Sansc. = *winter, the cold time of the year*, Fñ.), the tenth (Esth. ii. 16); Sebat (Heb. probably from the name of some heathen deity, Fñ.), the eleventh (Zech. i. 7; 1 Mc. xvi. 14); and Adar (Heb. fr. Pers. = *fire*? Ges.; from the name of an old Syrian and Persian fire-god, Fñ.), the twelfth (Esth. iii. 7, viii. 12; 2 Mc. xv. 36). The

names of the remaining five occur in the Talmud and other works; they were Iyar (probably from Syriac), the second (Targum, 2 Chr. xxx. 2); Tammuz (from the Syrian god TAMMUZ), the fourth; Ab, the fifth, and Tisri (both names probably from Syriac), the seventh; and Marcheshvan (Heb. *rain-month*, Kimchi), the eighth. The name of the intercalary month was Veadar, i. e. the *additional* Adar. Subsequently to the establishment of the Syro-Macedonian empire, the use of the Macedonian calendar was gradually adopted for the purpose of literature or intercommunication with other countries. The only instance in which the Macedonian names appear in the Bible is in 2 Mc. xi. 30, 33, 38, where we have notice of Xanthicus in combination with another named Dioscorinthius (ver. 21), which does not appear in the Macedonian calendar. It is most probable that the author of 2 Mc. or a copyist was familiar with the Cretan calendar, which contained a month named Dioscurus, holding the same place in the calendar as the Macedonian Dystrus, i. e. immediately before Xanthicus, and that he substituted one for the other. The identification of the Jewish months with our own cannot be effected with precision on account of the variations that must inevitably exist between the lunar and the solar month. At present Nisan answers to March, but in early times it coincided with April. Zif or Iyar would correspond with May, Sivan with June, Tammuz with July, Ab with August, Elul with September, Ethaniam or Tisri with October, Bul or Marcheshvan with November, Chisleu with December, Tebeth with January, Sebat with February, and Adar with March (so Mr. Beran).

\* **Month's Prog-nos-ti-ca-tors** (Is. xlvii. 13) = those who predict at the new moons. MAGIC.

\* **Mon'u-ments**, the A. V. translation (Is. lxy. 4 only) of Heb. pl. participle *netsurim* = *kept from view, hidden, secret places*, Ges.; *watch-houses, watch-towers*, which stand alone in the fields, and in which idolatry was practised, Fñ.

**MOON** (Heb. masc. *yārēach* or *yārēach*, so called from its paleness; and fem. *lebānah*, literally the *white*; Gr. fem. *seléné*). The moon held an important place in the kingdom of nature, as known to the Hebrews. In the history of the CREATION (Gen. i. 14–16), it appears simultaneously with the sun. Conjointly with the sun, it was appointed “for signs and for seasons, and for days and years;” though in this respect it exercised a more important influence, if by the “seasons” we understand the great religious festivals of the Jews, as is particularly stated in Ps. civ. 19, and more at length in Eccles. xliii. 6, 7. Besides this, it had its special office in the distribution of light; it was appointed “to rule over the night,” as the sun over the day, and thus the appearance of the two founts of light served “to divide the day from the night.” To enter fully into this idea, we must remember both the greater brilliancy of the moon in Eastern countries, and the larger amount of work, especially travelling, that is carried on by its aid. The appeals to sun and moon conjointly are hence frequent (Josh. x. 12; Ps. lxxii. 5, 7, 17; Eccles. xii. 2; Is. xxiv. 23, &c.); sometimes, indeed, the moon receives more attention than the sun (e. g. Ps. viii. 3, lxxxix. 37). The inferiority of its light is occasionally noticed, as in Gen. i. 16; in Cant. vi. 10, and in Is. xxx. 26. The coldness of the night-dews is prejudicial to the health, and particularly to the eyes of those who are exposed to it, and the idea expressed in Ps. cxxi. 6 (“the moon shall not smite thee by night”) may

have reference to the general or the particular evil effect. (BLINDNESS; LUNATIC.) The worship of the moon was extensively practised by the nations of the East, and under a variety of aspects. In Egypt it was honored under the form of Isis, and was one of the only two deities which commanded the reverence of all the Egyptians. In Syria it was represented by that one of the Ashtaroth, surnamed "Karnaim." (ASHTORETH, &c.) There are indications of a very early introduction into the countries adjacent to Palestine of a species of worship distinct from any that we have hitherto noticed, viz. of the direct homage of the heavenly bodies, sun, moon, and stars, which is the characteristic of Sabianism. (IDOLATRY.) The first notice of this is in Job (xxi. 26, 27), and it is observable that the warning of Moses (Deut. iv. 19) is directed against this nature-worship, rather than against the form of moon-worship, which the Israelites must have witnessed in Egypt. At a later period, however, the worship of the moon in its grosser form of idol-worship was introduced from Syria. In the figurative language of Scripture the moon is frequently noticed as presaging events of the greatest importance through the temporary or permanent withdrawal of its light (Is. xiii. 10; Joel ii. 31; Mat. xxiv. 29; Mk. xiii. 24). DARKNESS; ECLIPSE; HEAVEN; NEW MOON.

**Moon, New.** NEW MOON.

**Mo-o-sai's** (Gr.), apparently = MAASEIAH 4 (1 Esd. ix. 31; compare Ezr. x. 30).

\* **Mo'rad** (Heb. *descent, declivity*, Ges.), a name found only in Josh. vii. 5, margin, in the account of the defeat of the Israelites by the men of Ai; probably better translated in the text "going down."

**Mor-as-thite** (fr. Heb.), the = the native of a place named MORESHETH. It occurs twice (Jer. xxvi. 18; Mic. i. 1), each time as the description of the prophet MICAH

**Mor-de-cai** (Heb. fr. Pers. = *little man*, or *warshipper* of MERODACH, i. e. Mars, Ges.). 1. The deliverer, under Divine Providence, of the Jews from the destruction plotted against them by HAMAN, the chief minister of AHAUERUS 3 (Xerxes); the institutor of the feast of PURIM (Esth. ii. 5-x. 3). He was a Benjamite, and one of the Captivity, residing in Shushan. From the time of ESTHER being queen he was one of those "who sat in the king's gate." In this situation he saved the king's life by discovering the conspiracy of two of the eunuchs to kill him. When the decree for the massacre of all the Jews in the empire was known, Esther, at his earnest advice and exhortation, undertook the perilous task of interceding with the king on their behalf. Whether, as some think, his refusal to bow before Haman arose from religious scruples, as if such salutation as was practised in Persia, were akin to idolatry, or whether, as seems far more probable, he refused from a stern unwillingness as a Jew to bow before an Amalekite, in either case the affront put by him upon Haman was the immediate cause of the fatal decree. The concurrence of Esther's favorable reception by the king with the providential reading to him from the Medo-Persian chronicles of Mordecai's fidelity in disclosing the conspiracy; Haman's coming then to ask leave to hang Mordecai, and being made the instrument of doing honor to his most hated adversary, which he rightly interpreted as the presage of his own downfall; and finally, the hanging of Haman and his sons on the very gallows which he had reared for Mordecai, while Mordecai occupied Haman's post as vizier of the Persian monarchy, are well-known incidents. (ESTHER, BOOK

OF.)—Mordecai's date in *sacred* history is pointed out with great particularity not only by the years of the king's reign, but by his own genealogy in Esth. ii. 5, 6. Some have understood this passage as stating that Mordecai himself was taken captive with Jecooniah; but both the chronology and the grammatical construction forbid such an interpretation. Three things are here predicated of Mordecai: (1.) that he lived in Shushan; (2.) that his name was Mordecai, son of Jair, son of Shimei, son of Kish the Benjamite, who was taken captive with Jehoichin; (3.) that he brought up Esther. Mordecai, then, was great-grandson of a contemporary of Jehoichin. Now, four generations cover 120 years—and 120 years from B. C. 599 bring us to B. C. 479, i. e. to the sixth year of the reign of Xerxes. And now it would seem both possible and probable that the Mordecai mentioned in Ezr. ii. 2 and Neh. viii. 7, as one of the leaders of the captives who returned from time to time from Babylon to Judea, was the same as the Mordecai of the book of Esther (so Lord A. C. Hervey).—As regards his place in *profane* history, the domestic annals of the reign of Xerxes are so scanty, that it would not surprise us to find no mention of Mordecai. But there is a person named by Ctesias, who probably saw the very chronicles of the kings of Media and Persia referred to in Esth. x. 2, whose name and character present some points of resemblance with Mordecai, viz. MATACAS or NATACAS, whom he describes as Xerxes' chief favorite, and the most powerful of them all. He relates of him, that when Xerxes after his return from Greece had commissioned Megabyzus to go and plunder the temple of Apollo at Delphi, upon his refusal, he sent MATACAS the eunuch, to insult the god, and to plunder his property, which MATACAS did, and returned to Xerxes. The known hatred of Xerxes to idol-worship makes his selection of a Jew for his prime minister very probable, and there are strong points of resemblance in what is thus related of MATACAS, and what we know from Scripture of Mordecai. Again, that Mordecai was, what MATACAS is related to have been, a eunuch, seems not improbable from his having neither wife nor child, from his bringing up his cousin Esther in his own house, from his situation in the king's gate, from his access to the court of the women, and from his being raised to the highest post of power by the king, which we know from Persian history was so often the case with the king's eunuchs.—The most plausible etymology usually given for the name *Mordecai* is that favored by Gesenius, who connects it with Merodach, the Babylonian idol, called Mardok in the cuneiform inscriptions. But it is improbable (so Lord A. C. Hervey) that the name of a Babylonian idol should have been given to him under the Persian dynasty, or that Mordecai should have been taken into the king's service before the commencement of the Persian dynasty. If, then, we suppose the original form of the name was MATACAI, it would easily in the Chaldee orthography become Mordecai.—As regards his place in *Rabbinical* estimation, Mordecai, as is natural, stands very high. The interpolations in the Greek book of Esther are one indication of his popularity with his countrymen. The Targum (of late date) shows that this increased rather than diminished with the lapse of centuries. It is said of Mordecai that he knew the *seventy languages*, i. e. the languages of all the nations mentioned in Gen. x., which the Jews count as seventy nations, and that his age exceeded 400 years. He is continually designated by the appellation "the Just." Benjamin

of Tudela places the tomb of Mordecai and Esther at *Hamadan* or *ECBATANA*, where is now shown in the Jewish quarter a building professedly erected about 1,100 years ago as their tomb. Others, how-

Reputed Tomb of Esther and Mordecai at Hamadan (the southern Ecbatana).—From Flandin, *Voyage en Perse*.—(Flu.)

ever, place the tomb of Mordecai in Susa.—2. One of the leaders of the captive Jews who returned with Zerubbabel (Ezr. ii. 2; Neh. vii. 7); supposed by Lord A. C. Hervey = No. 1; but according to Prof. Douglas (in Fairbairn, Kitto, &c., a different person from No. 1.

**Mo'reh** (Heb. *teacher*, Ges., Fū.). 1. The "plain" or "plains" (or, as it should rather be rendered, the *OAK* or *oaks*) "of Moreh." The Oak of Moreh was the first recorded halting-place of Abram after his entrance into Canaan (Gen. xii. 6). (ABRAHAM.) It was at the "place of SHECHEM" (xii. 6), close to the mountains of EBAL and GERIZIM (Deut. xi. 30). (MEONENIM.) Mr. Grove supposes that this place may have been also the scene of the offering of Isaac, on a mountain in "the land of MORIAH." Whether the oaks of Moreh had any connection with—2. "The Hill of Moreh," at the foot of which the Midianites and Amalekites were encamped before Gideon's attack upon them (Judg. vii. 1), seems, to say the least, most uncertain. Copious as are the details furnished of that great event of Jewish history, those which enable us to judge of its precise situation are very scanty. But a comparison of Judg. vi. 33 with vii. 1 makes it evident that it lay in the valley of JEZREEL (ESDRELON), rather on the N. side of the valley, and N. also of the eminence on which Gideon's little band of heroes was clustered. These conditions are most accurately fulfilled if we assume *Jebel ed-Duky*, the "Little Hermon" of the modern travellers, to be Moreh, the 'Ain Jalūd to be the spring of HARON, and Gideon's position to have been on the N. E. slope of *Jebel Fukūa* (Mount Gilboa), between the village of *Nuria* and the last-mentioned spring.

**Mor'esh-eth-gath** (Heb. *possession of Gath*, Ges., Fū.), a place named by the prophet Micah only (Mic. i. 14) in company with Lachish, Achzib, Mares-

Judah. MICAH was himself the native of a place called Moreseth. (MORASTHITE.) Eusebius and Jerome describe Morasthi as a moderate-sized village near Eleutheropolis, to the E. GATH; MARESHAH 1.

**Mo-ri'ah** (fr. Heb. = *shown by Jehovah*, or *the chosen of Jehovah*; see below). 1. "The Land of Moriah." On "one of the mountains" in this district took place the sacrifice of Isaac (Gen. xxii. 2). What the name of the mountain was we are not told; but it was a conspicuous one, visible from "afar off" (ver. 4). Nor does the narrative afford any data for ascertaining its position. After the deliverance of Isaac, Abraham, with a play on the name of Moriah impossible to convey in English, called the spot JEHOVAH-JIREH, "Jehovah sees" (i. e. provides), and thus originated a proverb referring to the providential and opportune interference of God. "In the mount of Jehovah, He will be seen." Mr. Grove, with Stanley, Michaelis, &c., is disposed to take the "land of Moriah" as the same district with that in which the "Oak (A. V. 'plain') of MOREH" was situated, and not as that which contains JERUSALEM, as the modern tradition, which would identify the MORIAH of Gen. xxii. and that of 2 Chr. iii. 1 (see below), affirms. (GERIZIM).—2. "Mount Moriah." The name ascribed, in 2 Chr. iii. 1 only, to the eminence on which Solomon built the Temple; "where He appeared to David his father, in a place which David prepared in the threshing-floor of ARAUNAH the Jebusite." From the mention of Araunah, the inference is natural that the "appearance" alluded to occurred at the time of the purchase of the threshing-floor by David, and his erection thereon of the altar (2 Sam. xxiv.; 1 Chr. xxi.). But nothing is said in the narratives of that event of any "appearance" of Jehovah. (Compare, however, Gen. xviii., xix., and ANGEL.) A tradition which first appears in a definite shape in Josephus, and is now almost universally accepted, asserts that the "Mount Moriah" of the Chronicles is identical with the "mountain" in "the land of Moriah" of Genesis, and that the spot on which Jehovah appeared to David, and on which the Temple was built, was the very spot of the sacrifice of Isaac. Mr. Grove, with others (see No. 1 above), disputes this identity, and claims that Jerusalem has no part in the history of Israel till the establishment of the monarchy, and that to make No. 1 = No. 2 is incompatible with the circumstances of the narrative of Gen. xxii., because—(1.) The Temple mount cannot be spoken of as a conspicuous eminence. It is not visible till the traveller is close upon it at the southern edge of the valley of Hinnom, from whence he looks down upon it as on a lower eminence. (2.) If SALEM was Jerusalem, then the trial of Abraham's faith, instead of taking place in the lonely and desolate spot implied by the narrative, where not even fire was to be obtained, and where no help but that of the Almighty was nigh, actually took place under the very walls of the city of Melchizedek.—But apparently Abraham did not see the place till he was near enough to walk to it with his son, bearing on his back the load of wood (Gen. xxii. 4-6); and sometimes the outside of fenced cities—where a deep ravine runs between the wall and the suburb—is one of the loneliest spots in the world (so H. R. R., in Kitto). Hengstenberg accounts for the rarity of the name Moriah from the fact that Jerusalem remained a heathen city till David's time, while Bethel, Peniel, Mahanaim, &c., being actually in possession of the Israelites from Joshua's time,

had their patriarchal names familiarized and perpetuated. The common view that the Moriah of Gen. xxii. is the Moriah of 2 Chr. iii. is accepted by Gesenius, Fürst, Winer, Ewald, Knobel, Prof. Douglas (in Fairbairn), Ayre, &c., &c.

\* **Morn'ing**. DAY.

\* **Morn'ing Star**. HEAVEN; LUCIFER; STAR.

**Mor'tar**. 1. A wide-mouthed utensil for pounding grain, &c. The simplest and probably most ancient method of preparing corn for food was by pounding it between two stones. Convenience suggested that the lower of the two stones should be hollowed, that the corn might not escape, and that the upper should be shaped so as to be convenient for holding. (MILL.) The pestle and mortar must have existed from a very early period. The Israelites in the desert appear to have possessed mortars and hand-mills among their necessary domestic utensils. When the manna fell they gathered it, and either ground it in the mill or pounded it in the mortar (Heb. *medôchâh*) till it was fit for use (Num. xi. 8). So in the present day stone mortars are used by the Arabs to pound wheat for their national dish *kibby*. Another Hebrew word, *machlâsh* (Prov. xxvii. 22), probably denotes a mortar of a larger kind in which corn was pounded. "Though thou bray the fool in the mortar among the bruised corn (A. V. "wheat") with the pestle, yet will not his folly depart from him." Grain may be separated from its husk and all its good properties preserved by such an operation, but the fool's folly is so essential a part of himself that no analogous process can remove it from him. Such seems the natural interpretation of this remarkable proverb. The language is intentionally exaggerated, and there is no necessity for supposing an allusion to a mode of punishment by which criminals were put to death, by being pounded in a mortar. A custom of this kind existed among the Turks, but there is no distinct trace of it among the Hebrews. Such, however, is supposed to be the reference in the proverb by Mr. Roberts (*Oriental Illustrations of the Scriptures*), who illustrates it from the fact that in India persons have been punished capitally by being pounded to death in the large mortars used for separating the rice from the husk.—2. A cement for bricks, stones, &c. For this we find two Hebrew words—(1.) *Hômer* or *chômer* (Gen. xi. 3; Ex. i. 14; Is. xli. 25; Nah. iii. 14). (CLAY 2.)—(2.) *'Aphâr* (Lev. xiv. 42, 45), literally and usually translated "dust." The Heb. *tâphêl* (= lime, hence mortar, plaster, or rather white wash, as spread upon walls, Ges.) is in the A. V. "untempered (mortar)" in Ez. xiii. 10, 11, 14, 15, xxii. 28.—The various compacting substances used in Oriental buildings appear to be—1. bitumen, as in the Babylonian structures (SLIME); 2. common mud or moistened CLAY; 3. a very firm cement compounded of sand, ashes, and lime, in the proportions respectively of 1, 2, 3, well pounded, sometimes mixed and sometimes coated with oil, so as to form a surface almost impenetrable to wet or the weather. In Assyrian, and also Egyptian brick buildings stubble or straw, as hair or wool among ourselves, was added to increase the tenacity. ARCHITECTURE; HANDICRAFT; HOUSE; LIME; PLASTER.

\* **Mor'ter** in some copies of the A. V. = **MORTAR** 2.

**Mo-se'ra** (Deut. x. 6), apparently = **Mo-se'roth** (Num. xxxiii. 30), its plural form (Heb. = *bonds, bands*, Ges.), the name of a place near Mount Hor. Hengstenberg thinks it lay in the ARABAH, where

that mountain overhangs it. Burekhardt improbably suggests that possibly *Wady Mûsa*, near Petra and Mount Hor, may contain a corruption of *Mosera*. DEUTERONOMY B. (I. 5); WILDERNESS OF THE WANDERING.

**Mo'ses** [-zez] (a Gr. and L. form of Heb. *Môshêh* = *drawn*; see below), the legislator of the Hebrew people, and in a certain sense the founder of the Jewish religion. The materials for his life are—(I.) The details preserved in the PENTATEUCH. (II.) The allusions in the Prophets and Psalms. (III.) The Jewish traditions preserved in the N. T. (Acts vii. 20-38; 2 Tim. iii. 8, 9; Heb. xi. 23-28; Jude 9); and in Josephus, Philo, and Clement of Alexandria. (IV.) The heathen traditions of Manetho, Lysimachus, and Chæremón, preserved in Josephus, of Artapanus and others in Eusebius, and of Hecætæus. (V.) The Mussulman traditions in the Koran, and the Arabian legends. (VI.) Apocryphal Books of Moses:—(1.) Prayers of Moses. (2.) Apocalypse of Moses. (3.) Ascension of Moses. (VII.) In modern times his career and legislation have been treated by Warburton, Michaelis, Ewald, and Bunsen.—His life, in the later period of the Jewish history, was divided into three equal portions of forty years each (Acts vii. 23, 30, 36). I. His birth and education. The immediate pedigree of Moses is as follows:—

The fact that he was of the tribe of Levi no doubt contributed to the selection of that tribe as the sacred caste. The Levitical parentage and the Egyptian origin both appear in the family names. *Gershom*, *Eleazar*, are both repeated in the younger generations. *Moses* and *Phinehas* are Egyptian (so Dean Stanley, original author of this article). Moses was born, according to Manetho, at Heliopolis, at the time of the deepest depression of his nation in the Egyptian servitude. (CHRONOLOGY.) His birth (according to Josephus) had been foretold to Pharaoh by the Egyptian magicians, and to his father AMRAM by a dream. The story of his birth is thoroughly Egyptian in its scene. The beauty of the new-born babe—in the later versions of the story amplified into a beauty and size almost divine—induced the mother to make extraordinary efforts for its preservation from the general destruction of the male children of Israel. (PHARAOH 3.) For three months the child was concealed in the house. Then his mother placed him in a small boat or basket of papyrus (REED 2), closed against the water by bitumen. (PITCH.) This was placed among the aquatic vegetation by the side of one of the canals of the NILE. The mother (JOCHEBED) departed as if unable to bear the sight. The sister (MIRIAM) lingered to watch his fate. The Egyptian princess (whom Jewish traditions named *Thermuthis*; Artapanus, *Merrhis*; and Arabic traditions, *Asiat*) came down, after the Homeric simplicity of the age, to bathe in the sacred river, or (Jos. ii. 9, § 5) to play by its side. Her attendant slaves followed her. She saw the

basket in the flags, or (*Jos. ib.*) borne down the stream, and despatched divers after it. The divers, or one of the female slaves, brought it. It was opened, and the cry of the child moved the princess to compassion. She determined to rear it as her own. The child (*Jos. ib.*) refused the milk of Egyptian nurses. The sister was then at hand to recommend a Hebrew nurse. The child was brought up as the princess's son, and the memory of the incident was long cherished in the name given to the founding of the water's side—whether according to its Hebrew or Egyptian form. Its Hebrew form is *Masheh*, from *māshāh*, to draw out—"because I have drawn him out of the water." But this is probably the Hebrew form given to a foreign word. In Coptic, *mo* = water, and *ushe* = saved. This is the explanation given by Josephus. The child was adopted by the princess. Tradition describes its beauty as so great that passers-by stood fixed to look at it, and laborers left their work to steal a glance (*Jos. ii. 9, § 6*). From this time for many years Moses must be considered as an Egyptian. In the Pentateuch this period is a blank, but in the N. T. he is represented as "educated in all the wisdom of the Egyptians" (*EGYPT*), and as "mighty in words and deeds" (*Acts vii. 22*). The following is a brief summary of the Jewish and Egyptian traditions which fill up the silence of the sacred writer. He was educated at Heliopolis (compare *Str. xvii. 1*), and grew up there as a priest, under his Egyptian name of *Osarsiph* or *Tisithen*. He was taught the whole range of Greek, Chaldee, and Assyrian literature. From the Egyptians especially he learned mathematics, to train his mind for the unprejudiced reception of truth (*Philo, V. M. i. 5*). "He invented boats and engines for building—instruments of war and hydraulics—hieroglyphics—division of lands" (*Artapanus*, in *Euseb. Præp. Evang. ix. 27*). (*WRIGHT*.) He taught Orpheus, and was hence called by the Greeks *Museus* (*ib.*), and by the Egyptians *Hermes* (*ib.*). He taught grammar to the Jews, whence it spread to Phenicia and Greece (*Eupolemus*, in *Clem. Alex. Strom.*). He was sent on an expedition against the Ethiopians. He got rid of the serpents of the country to be traversed by turning baskets full of ibises upon them (*Jos. ii. 10, § 2*), and founded the city of Hermopolis to commemorate his victory (*Artapanus*, in *Euseb. l. c.*). He advanced to Saba, the capital of Ethiopia, and gave it the name of Meroe, from his adopted mother *Merrhis*, whom he buried there (*ib.*). *Tharbis*, the daughter of the king of Ethiopia, fell in love with him, and he returned in triumph to Egypt with her as his wife (*Jos. ib.*).—II. The nurture of his mother is probably spoken of as the link which bound him to his own people, and the time had at last arrived when he was resolved to reclaim his nationality. Here again the N. T. preserves the tradition in a distincter form than the account in the Pentateuch (*Heb. xi. 24–26*). According to *Philo* he led an ascetic life, in order to pursue his high philosophic speculations. According to the Egyptian tradition, although a priest of Heliopolis, he always performed his prayers according to the custom of his fathers, outside the walls of the city, in the open air, turning toward the sun-rising (*Jos. Ap. ii. 2*). The king was excited to anger by the priests of Egypt, who foresaw their destroyer (*ib.*), or by his own envy (*Artapanus, l. c.*). Various plots of assassination were contrived against him, which failed. The last was after he had already escaped across the Nile from Memphis, warned by his brother *AARON*, and when pursued by the assass-

sin he killed him (*ib.*). The same general account of conspiracies against his life appears in *Josephus* (*ii. 10*). All that remains of these traditions in the sacred narrative is the simple and natural incident, that seeing an Israelite suffering the bastinado from an Egyptian (so *Stanley, A. V.* "an Egyptian smiting an Hebrew, one of his brethren" [i. e. smiting him fatally, killing him; the Hebrew is a participle of the verb translated "slew" in the next verse]; see *BLOOD, AVENGER OF*; also compare "prince" in *ver. 14* with *ver. 10*), and thinking that they were alone, he slew the Egyptian, and buried the corpse in the sand. The fire of patriotism which thus turned him into a deliverer from the oppressors, turns him in the same story into the peace-maker of the oppressed. It is characteristic of the faithfulness of the Jewish records that his fight is there occasioned rather by the malignity of his countrymen than by the enmity of the Egyptians (compare *Acts vii. 23–35*). He fled into *MIDIAN*. Beyond the fact that it was in or near the peninsula of Sinai, its precise situation is unknown. There was a famous well ("the well," *Ex. ii. 15*) surrounded by tanks for the watering of the flocks of the Bedouin herdsmen. By this well the fugitive seated himself, and watched the gathering of the sheep. There were the Arabian shepherds, and there were also seven maidens, whom the shepherds rudely drove away from the water. The chivalrous spirit which had already broken forth in behalf of his oppressed countrymen, broke forth again in behalf of the distressed maidens. They returned unusually soon to their father (*Ἰεθρο*), and told him of their adventure. Moses, who up to this time had been "an Egyptian" (*Ex. ii. 19*), now became for forty years (*Acts vii. 30*) an Arabian. He married *ZIPPORAH*, daughter of his host, to whom he also became the servant and shepherd (*Ex. ii. 21, iii. 1*). In the seclusion and simplicity of his shepherd-life he received his call as a prophet. The traditional scene of this great event is in the valley of *Shoaḡb*, or *Hobab*, on the N. side of *Jebel Musa*. Its exact spot is marked by the convent of St. Catharine, of which the altar is said to stand on the site of the Burning Bush. The original indications are too slight to enable us to fix the spot with any certainty. It was at "the back" of the "wilderness" at Horeb (*Ex. iii. 1*): to which the Hebrew adds, whilst the *LXX.* omits, "the mountain of God." Upon the mountain was a well-known acacia (*SHITTAN-TREE*), the thorn-tree of the desert, spreading out its tangled branches, thick set with white thorns, over the rocky ground. This tree (but see *BUSH 1*) became the symbol of the Divine Presence: a flame of fire in the midst of it, in which the dry branches would naturally have crackled and burnt in a moment, but which played round it without consuming it. The rocky ground at once became "holy," and the shepherd's sandal was to be taken off no less than on the threshold of a palace or a temple (compare *Acts vii. 29–33*). The call or revelation was twofold—1. The declaration of the Sacred Name expresses the eternal self-existence of the One God. (*JEHOVAH*.) 2. The mission was given to Moses to deliver his people. The two signs are characteristic—the one of his past Egyptian life—the other of his active shepherd-life. In the rush of leprosy into his hand is the link between him and the people whom the Egyptians called a nation of lepers. In the transformation of his shepherd's staff is the glorification of the simple pastoral life, of which that staff was the symbol, into the great career

which lay before it. He returns to Egypt from his exile. His Arabian wife and her two infant sons are with him. She is seated with them on the ass. He apparently walks by their side with his shepherd's staff. On the journey back to Egypt a mysterious incident occurred in the family (Ex. iv. 24-26). The most probable explanation seems to be, that at the caravanserai either Moses or Gershom was struck with what seemed to be a mortal illness. In some way this illness was connected by Zipporah with the fact that her son had not been circumcised. She instantly performed the rite, and threw the sharp instrument, stained with the fresh blood, at the feet of her husband, exclaiming in the agony of a mother's anxiety for the life of her child—"A bloody husband thou art, to cause the death of my son." Then, when the recovery from the illness took place, she exclaims again, "A bloody husband still thou art, but not so as to cause the child's death, but only to bring about his circumcision." Probably in consequence of this event, whatever it was, the wife and her children were sent back to JETHRO, and remained with him till Moses joined them at Rephidim (xviii. 2-6). After this parting he advanced into the desert, and at the same spot where he had had his vision encountered Aaron (iv. 27). From that meeting and co-operation we have the first distinct indication of his personal appearance and character. But beyond the slight glance at his infantine beauty, no hint of this grand personality is given in the Bible. What is described is rather the reverse. The only point there brought out is a singular and unlooked-for infirmity. "I am slow of speech and of a slow tongue." In the solution of this difficulty which Moses offers—"Send, I pray Thee, by the hand of him whom Thou wilt send" (i. e. make any one Thy apostle rather than me)—we read both the disinterestedness, which is the most distinct trait of his personal character, and the future relation of the two brothers. AARON spoke and acted for Moses, and was the permanent inheritor of the sacred staff of power. But Moses was the inspiring soul behind.—III. The history of Moses henceforth is the history of Israel for forty years. (EGYPT; EXODUS, THE; INSPIRATION; JOB; KORAH 4; LAW OF MOSES; MIRACLES; PASSOVER; PHARAOH 4; PLAGUES, THE TEN; SERPENT, THE BRAZEN; SINAI; WILDERNESS OF THE WANDERING.) It is important to trace his relation to his immediate circle of followers. In the Exodus, he takes the decisive lead on the night of the flight. Up to that point he and Aaron appear almost on an equality. But after that, Moses is usually mentioned alone. Aaron still held the second place. Another, nearly equal to Aaron, is HUR, of the tribe of Judah. His servant was Hoshea (afterward JOSHUA). MIRIAM always held the independent position to which her age entitled her. Her part was to supply the voice and song to her brother's prophetic power. But Moses is incontestably the chief personage of the history, in a sense in which no one else is described before or since. In the traditions of the desert, whether late or early, his name predominates over that of every one else. Of the "Books of Moses" (GENESIS; EXODUS; LEVITICS; NUMBERS; DEUTERONOMY) he is the chief subject. The very name "Mosaic" has been in later times applied to the whole religion. It has sometimes been attempted to reduce this great character into a mere passive instrument of the Divine Will, as though he had himself borne no conscious part in the actions in which he figures, or the messages which he delivers. This, however,

is as incompatible with the general tenor of the Scriptural account, as it is with the common language in which he has been described by the Church in all ages. He must be considered, like all the saints and heroes of the Bible, as a man of marvelous gifts, raised up by Divine Providence for a special purpose; but led into a closer communion with the invisible world than was vouchsafed to any other in the O. T. There are two main characters in which he appears, as a Leader, and as a Prophet. 1. As a Leader, his life divides itself into the three epochs—of the march to Sinai; the march from Sinai to Kadesh; and the conquest of the Transjordanic kingdoms. Of his natural gifts in this capacity we have but few means of judging. The two main difficulties which he encountered were the reluctance of the people to submit to his guidance, and the impracticable nature of the country which they had to traverse. The incidents with which his name was specially connected both in the sacred narrative, and in the Jewish, Arabian, and heathen traditions, were those of supplying water when most wanted. In the Pentateuch these supplies of water take place at Marah, at Horeb, at Kadesh, and in the land of Moab. The route through the wilderness is described as having been made under his guidance. The particular spot of the encampment is fixed by the cloudy pillar. But the direction of the people first to the Red Sea, and then to Mount Sinai, is communicated through Moses, or given by him. On approaching Palestine, the office of the leader becomes blended with that of the general or the conqueror. By Moses the spies were sent to explore the country. Against his advice took place the first disastrous battle at Hormah. To his guidance is ascribed the circuitous route by which the nation approached Palestine from the E., and to his generalship the two successful campaigns in which SIRON and Og were defeated. The narrative is told so shortly, that we are in danger of forgetting that at this last stage of his life Moses must have been as much a conqueror and victorious soldier as Joshua. 2. His character as a PROPHET is, from the nature of the case, more distinctly brought out. He is the first as he is the greatest example of a prophet in the O. T. In a certain sense, he appears as the centre of a prophetic circle, now for the first time named. His brother and sister were both endowed with prophetic gifts. The seventy elders, and Eldad and Medad also, all "prophesied" (Num. xi. 25-27). But Moses rose high above all these. With him the Divine revelations were made, "mouth to mouth, even apparently, and not in dark speeches, and the similitude of JEHOVAH shall he behold" (xii. 8). Of the especial modes of this more direct communication four great examples are given, corresponding to four critical epochs in his historical career. (1.) The appearance of the Divine presence in the flaming "BUSH" has been already noticed. No form is described. "The ANGEL," or "Messenger is spoken of as being "in the flame" (Ex. iii. 2-6). (2.) In the giving of the Law from Mount Sinai, the outward form of the revelation was a thick DARKNESS as of a thunder-cloud, out of which proceeded a voice (xix. 19, xx. 21). The revelation on this occasion was especially of the Name of JEHOVAH. On two occasions he is described as having penetrated within the darkness, and remained there, successively, for two periods of forty days, of which the second was spent in absolute seclusion and fasting (xxiv. 18, xxxiv. 28). Each of these periods was concluded by the production of the

two slabs or tables of granite, containing the successive editions of the TEN COMMANDMENTS; the first the writing of God, the second of Moses. (3.) Nearly at the close of those communications in the mountains of Sinai an especial revelation was made to him personally. In the despondency produced by the apostasy of the molten CALF, he besought JEHOVAH to show him "His glory." But the Divine answer which granted his request in part, announced that an actual vision of God was impossible. "Thou canst not see my face; for there shall no man see my face and live." He was commanded to hew two blocks of stone, like those which he had destroyed. He was to come absolutely alone. He took his place on a well-known or prominent rock ("the rock," xxxiii. 21). The cloud passed by (xxxiv. 5, xxxiii. 22). A voice proclaimed the two immutable attributes of God, Justice and Love—in words which became part of the religious creed of Israel and of the world (xxxiv. 6, 7). (4.) The fourth mode of Divine manifestation was that which is described as commencing at this juncture, and which continued with more or less continuity through the rest of his career. Immediately after the catastrophe of the worship of the calf, and apparently in consequence of it, Moses removed the chief tent outside the camp, and invested it with a sacred character under the name of "the Tent or Tabernacle of the Congregation" (xxxiii. 7). This tent became henceforth the chief scene of his communications with God. During these communications a peculiarity is mentioned apparently not seen before. On his final descent from Mount Sinai, after his second long seclusion, a splendor shone on his face, as if from the glory of the Divine Presence.—There is another form of the prophetic gift in which Moses more nearly resembles the later prophets, viz. the poetical form of composition which characterizes the Jewish prophecy generally. These poetical utterances, whether connected with Moses by ascription or by actual authorship (PENTATEUCH), enter so largely into the full Biblical conception of his character, that they must be here mentioned. (a.) "The song which Moses and the children of Israel sang" (after the passage of the Red Sea, Ex. xv. 1-19). To this probably allusion is made in Rev. xv. 2, 3—"the song of Moses the servant of God." (b.) A fragment of a war-song against Amalek (Ex. xvii. 16). (c.) A fragment of a lyrical burst of indignation (xxxii. 18). (d.) The fragments of war-songs in Num. xxi. 14, 15, 27-30, preserved in the "book of the wars of Jehovah" (Num. xxi. 14); and the address to the well (xxi. 16-18). (e.) The song of Moses (Deut. xxxii. 1-43) setting forth the greatness and the failings of Israel. (f.) The blessing of Moses on the tribes (xxxiii. 1-29). (g.) The 90th Psalm, "A prayer of Moses, the man of God." (PSALMS, BOOK OF.) How far the gradual development of these revelations or prophetic utterances had any connection with his own character and history, the materials are not such as to justify any decisive judgment. His Egyptian education must, on the one hand, have supplied him with much of the ritual of the Israelite worship. The coincidences between the arrangements of the priesthood, the dress, the sacrifices, the ark, in the two countries, are decisive. On the other hand, the proclamation of the Unity of God implies distinct antagonism, almost a conscious recoil, against the Egyptian system. And the absence of the doctrine of a future state proves at least a remarkable independence of the Egyptian theology,

in which that great doctrine held so prominent a place. The prophetic office of Moses can only be fully considered in connection with his whole character and appearance (Hos. xii. 13). He was in a sense peculiar to himself the founder and representative of his people. And, in accordance with this complete identification of himself with his nation, is the only strong personal trait which we are able to gather from his history (Num. xii. 3). The word "MEEK" is hardly an adequate reading of the Hebrew term, which should be rather *much enduring*. It represents what we should now designate *disinterested*. All that is told of him indicates a withdrawal of himself, a preference of the cause of his nation to his own interests, which makes him the most complete example of Jewish patriotism (Ex. ii. 11, 14, iv. 13, v. 4, xxxii. 10, 32; Num. xi. 29). His sons (ELIEZER 2; GERSHON 1) were not raised to honor. The leadership of the people passed, after his death, to another tribe. In the books which bear his name, ABRAHAM, and not himself, appears as the real father of the nation. In exact conformity with his life is the account of his end. Deuteronomy describes, and is, the long, last farewell of the prophet to his people. It takes place on the first day of the eleventh month of the fortieth year of the wanderings, in the plains of Moab (Deut. i. 3, 5). (ABEL-SHITTIM.) He is described as 120 years of age, but with his sight and his freshness of strength unabated (xxxiv. 7). The address from ch. i. to ch. xxx. contains the recapitulation of the Law. JOSHUA is then appointed his successor. The Law is written out, and ordered to be deposited in the Ark (xxxi.). The song and the blessing of the tribes conclude the farewell (xxxii., xxxiii.). And then comes the mysterious close. As if to carry out to the last the idea that the prophet was to live not for himself, but for his people, he is told that he is to see the good land beyond the Jordan, but not to possess it himself. The sin for which this penalty was imposed on the prophet was because he and Aaron rebelled against Jehovah, and "believed Him not to sanctify Him," in the murmurings at Kadesh (Num. xx. 12, xxvii. 14; Deut. xxxii. 21), or (Ps. cvi. 33) because he spoke unadvisedly with his lips. It seems to have been a feeling of distrust (Num. xx. 10). He ascends a mountain in the range which rises above the Jordan valley. The mountain-tract was known by the general name of "the PISGAH." Its summits apparently were dedicated to different divinities (Num. xxxii. 14). On one of these, consecrated to NEMO, Moses took his stand, and surveyed the four great masses of Palestine W. of the Jordan—so far as it could be discerned from that height. The view has passed into a proverb for all nations. "So Moses the servant of Jehovah died there in the land of Moab, according to the word of Jehovah, and He buried him in a 'ravine' in the land of Moab, 'before' Beth-peor—but no man knoweth of his sepulchre unto this day . . . And the children of Israel wept for Moses in the plains of Moab thirty days" (Deut. xxxiv. 5-8). This is all that is said in the sacred record. Jewish, Arabian, and Christian traditions have labored to fill up the detail. His grave, though studiously concealed in the sacred narrative, is shown by the Mussulmans on the west (and therefore the wrong) side of the Jordan, between the Dead Sea and St. Saba. In the O. T. the name of Moses does not occur so frequently, after the close of the Pentateuch, as might be expected. (MANASSEH 5.) In the Psalms and the Prophets, however,

he is frequently named as the chief of the prophets. In the N. T. he is referred to partly as the representative of the Law (e. g. Mat. xix. 7, 8; Mk. x. 3, &c.), and in the vision of the Transfiguration, where he appears side by side with Elijah. As the author of the Law he is contrasted with Christ, the Author of the Gospel: "The law was given by Moses" (Jn. i. 17). The ambiguity and transitory nature of his glory is set against the permanence and clearness of Christianity (2 Cor. iii. 13-18), and his mediatorial character against the unbroken communication of God in Christ (Gal. iii. 19). His "service" of God is contrasted with Christ's sonship (Heb. iii. 5, 6). But he is also spoken of as a likeness of Christ; and, as this is a point of view which has been almost lost in the Church, compared with the more familiar comparisons of Christ to Adam, David, Joshua, and yet has as firm a basis in fact as any of them, it may be well to draw it out in detail. (1st.) Moses is, as it would seem, the only character of the O. T. to whom Christ expressly likens Himself—"Moses wrote of me" (Jn. v. 46), i. e. in Deut. xviii. 15, 18, 19. This suggests three main points of likeness:—(a.) Christ was, like Moses, the great Prophet of the people—the last, as Moses was the first (compare 1 Cor. x. 2). (b.) Christ, like Moses, is a Lawgiver: "Him shall ye hear." (c.) Christ, like Moses, was a Prophet, out of the midst of the nation—"from their brethren." As Moses was the entire representative of his people, feeling for them more than for himself, absorbed in their interests, hopes, and fears, so, with reverence be it said, was Christ. (2d.) In Heb. iii. 1-19, xii. 24-29, and Acts vii. 37, Christ is described, though more obscurely, as the Moses of the new dispensation—as the Apostle, or Messenger, or Mediator, of God to the people—as the Controller and Leader of the flock or household of God. (3d.) The details of their lives are sometimes, though not often, compared (Acts vii. 24-28, 35). In Jude 9 is an allusion to an altercation between MICHAEL and Satan over the body of Moses. It probably refers to a lost apocryphal book, mentioned by Origen, called the "Ascension, or Assumption of Moses," and to the concealment of the body to prevent idolatry.

\* **Moses, Books of.** PENTATEUCH.

**Mo-sol'lam** (fr. Gr.) = MESHULLAM 11 (1 Esd. ix. 14; compare Ezr. x. 15).

**Mo-sol'a-mon** (fr. Gr.) = MESHULLAM 10 (1 Esd. viii. 44; compare Ezr. viii. 16).

\* **Mote**, the A. V. translation of Gr. *karp̄hos* (literally *something dry*, i. e. any small dry particle, as of chaff, wood, &c., a *twig*, *mote*, put as the emblem of lesser faults, Rbn. *N. T. Lex.*) (Mat. vii. 3-5; Lk. vi. 41, 42).

**Moth** (Heb. *ʾash*; Gr. *śēs*). By the Hebrew and Greek words we are certainly to understand some species of clothes-moth (*Tinea*). Reference to the destructive habits of the clothes-moth is made in Job xiii. 28; Ps. xxxix. 11; Is. i. 9, li. 8; Hos. v. 12; Mat. vi. 19, 20; Lk. xii. 33; Jas. v. 2; and in Eccles. xix. 3, xlii. 13; indeed in nearly every instance where mention of this insect is made, it is in reference to its destroying garments. In Job iv. 19 the A. V. has "(which) are crushed before the moth," i. e. (so Mr. Barnes) the most feeble of all objects may crush man; but Gesenius translates *they are crushed as by the moth*, i. e. as if moth-eaten. In Job xxvii. 18, "He buildeth his house as a moth," allusion is made either to the well-known case of the *Tinea pellionella*, or some allied species, or else

to the leaf-building larvæ of some other member of the order *Lepidoptera*. DRESS; WORM 1.

Clothes-moth (*Tinea pellionella*).

a. Larva in a case constructed out of the substance on which it is feeding.  
b. Case cut at the ends.  
c. Case cut open by the larva for enlarging it.  
d. e. The perfect insect.

**Moth'er** (Heb. *ēm*; Gr. *mētēr*). The superiority of the Hebrew over all contemporaneous systems of legislation and of morals is strongly shown in the higher estimation of the mother in the Jewish family, as contrasted with modern Oriental, as well as ancient Oriental and classical usage. The "king's mother," as appears in the case of Bath-sheba, was treated with especial honor (1 K. ii. 19; Ex. xx. 12; Lev. xix. 3; Deut. v. 16, xxi. 18, 21; Prov. x. 1, xv. 20, xvii. 25, xxix. 15, xxxi. 1, 30). CHILD; COOKING; DAUGHTER; DRESS; EDUCATION; FATHER; KINDRED; MARRIAGE; QUEEN; WOMEN.

\* **Mould'y** [ou as o in *note*], the A. V. translation, after the LXX., Kimchi, &c. (Josh. ix. 5, 12 only) of Heb. *mikkudim* (= *crumbs* of bread, Ges., Fül.), once translated "CRACKNELS."

**Mount, Mount'ain**, properly, an eminence higher than a HILL. In the O. T. our translators have employed this word to represent—(1.) the Heb. *har*, with its derivative or kindred *hārār* or *herer*; and (2.) the Chal. *ūr* (Dan. ii. 35, 45 only). In the N. T. it is confined almost exclusively to representing the Gr. *oros*. The Heb. *har*, like the Eng. "mountain," is employed both for single eminences more or less isolated, e. g. Sinai, Gerizim, Ebal, Zion, and Olivet, and for ranges, e. g. Lebanon. It is also applied to a mountainous country or district, as the "mountain (or 'mountains') of Judah" (Josh. xi. 21, xx. 7), "Mount Ephraim" (2 Chr. xv. 8). The various eminences or mountain-districts to which the word *har* is applied in the O. T. are:—ABARIM; AMANA; of the AMALEKITES; MOUNTAIN OF THE AMORITES; ARARAT; BAALAH; BAAL-HERMON; BASHAN; BETHEL; BETHER; CARMEL; CORRUPTION; EBAL; EPHRAIM; EPHRON; ESAU; GAASH; GERIZIM; GILBOA; GILEAD; HALAK; HERES; HERMON; HOR (2.); HORREB; of ISRAEL; JEARM; JUDAH; LEBANON; OLIVET, or of OLIVES; MIZAR; MORIAH; NAPHTALI; NEBO; PARAN; PERAZIM; SAMARIA; SEIR; SEPHAR; SINAI; SION, SIRION, or SHENIR (all names for Hermon); SHAPHER; TABOR; ZALMON; ZEMARAIM; ZION. The "Mount of the Valley" was a district on the E. of Jordan, within the territory allotted to Reuben (Josh. xiii. 19), containing a number of towns. The frequent occurrence throughout the Scriptures of personification of the natural features of the country is very remarkable. The following are, it is believed, all the words used with this object in relation to mountains or hills:—1. *Head* (Heb. *rōsh*), Gen. viii. 5; Ex. xix. 20; Deut. xxxiv. 1; 1 K. xviii.

42 (A. V. "top"). 2. *Ears* (Heb. *aznôth*), AZNOTH-TABOR, Josh. xix. 34: possibly in allusion to some projection on the top of the mountain. 3. *Shoulder* (Heb. *adkêph*), Deut. xxxiii. 12; Josh. xv. 8, and xviii. 16 ("side"). 4. *Side* (Heb. *tsad*), used in reference to a mountain in 1 Sam. xxiii. 26; 2 Sam. xiii. 34. 5. *Loins or flanks* (Heb. *cislôth*), CHISLOTH-TABOR, Josh. xix. 12; also in the name of a village, probably situated on this part of the mountain, CHESULLOTH, i. e. the *loins* (Josh. xix. 18). 6. *Rib* (Heb. *tsêlâ*), used once, in speaking of the Mount of Olives, 2 Sam. xvi. 13, and there translated "side." 7. *Back* (Heb. *shêchem*), possibly the root of the name of the town SHECHEM, from its situation, as it were, on the back of Gerizim. 8. *Thigh* (Heb. *yarchâh*), applied to Mount Ephraim, Judg. xix. 1, 18; and to Lebanon, 2 K. xix. 23; Is. xxxvii. 24; used also for the "sides" of a cave, 1 Sam. xxiv. 3. 9. The Hebrew word translated "covert" in 1 Sam. xxv. 20 is *âthar*, from *âthar*, to *hide*, and probably refers to the shrubbery or thicket through which Abigail's path lay. In this passage "hill" should be "mountain." The Chal. *târ* is the name still given to the Mount of Olives, the *Jebel el-Târ*.—*Sermon on the Mount*; see JESUS CHRIST.—See also HIGH PLACES.

**MOUNT** = a mound or bulwark anciently used in military operations; the A. V. translation of Heb. *muttsâb* (Is. xxix. 3), and *sôlêlâh* (Jer. vi. 6, &c.). The latter is sometimes translated "bank" (2 Sam. xx. 15, &c.). **WAR.**

**Mountains of the Am'-orites**, specifically mentioned Deut. i. 19, 20 (compare 41). It seems to be the range about eighty or ninety miles nearly S. from Hebron, which rises abruptly from the plateau of *et-Tîh*, running from a little S. of W. to the N. of E., and of which the extremities are the *Jebel 'Araif en-Nâkah* westward, and the *Jebel el-Mukrâh* eastward, and from which line the country continues mountainous all the way to Hebron. **WILDERNESS OF THE WANDERING.**

**Mourning.** The number of words (about eleven Hebrew and as many Greek) employed in Scripture to express the various actions characteristic of mourning, shows in a great degree the nature of the Jewish customs in this respect. They appear to have consisted chiefly in the following particulars:—1. Beating the breast or other parts of the body. 2. Weeping and screaming in an excessive degree. 3. Wearing sad-colored garments. 4. Songs of lamentation. 5. Funeral feasts. 6. Employment of persons, especially women, to lament.—I. One marked feature of Oriental mourning is what may be called its studied publicity, and the careful observance of the prescribed ceremonies (Gen. xxiii. 2; Job i. 20, ii. 8; Is. xv. 3, &c.).—II. Among the particular forms observed may be mentioned—*a*. Rending the clothes (Gen. xxxvii. 29, 34, xlv. 13, &c.). (DRSS.) *b*. Dressing in SACKCLOTH (Gen. xxxvii. 34; 2 Sam. iii. 31, xxi. 10, &c.). *c*. Ashes, dust, or earth sprinkled on the person (2 Sam. xiii. 19, xv. 32, &c.). *d*. Black or sad-colored garments (2 Sam. xiv. 2; Jer. viii. 21, &c.). *e*. Removal of ornaments or neglect of person (Deut. xxi. 12, 13; 2 Sam. xix. 24, &c.). (ANONTING; NAIL.) *f*. Shaving the head, plucking out the hair of the head or beard (Lev. x. 6; 2 Sam. xix. 24, &c.). *g*. Laying bare some part of the body (Is. xx. 2, xlvii. 2, &c.). *h*. Fasting or abstinence in meat and drink (2 Sam. i. 12, iii. 35, xii. 16, 22, &c.). (FASST.) *i*. In the same direction may be mentioned diminution in offerings to God, and prohibition to partake in sacrificial food

(Lev. vii. 20; Deut. xxvi. 14, &c.). *k*. Covering the "upper lip," i. e. the lower part of the face, and sometimes the head, in token of silence (Lev. xiii. 45; 2 Sam. xv. 30, xix. 4, &c.). *l*. Cutting the flesh (Jer. xvi. 6, 7, xli. 5). (CUTTINGS IN THE FLESH.) Beating the body (Ez. xxi. 12; Jer. xxxi. 19). *m*. Employment of persons hired for the purpose of mourning (Eccl. xii. 5; Jer. ix. 17; Am. v. 16; Mat. ix. 23). (MINSTREL.) *n*. Akin to this usage the custom for friends or passers-by to join in the lamentations of bereaved or afflicted persons (Gen. l. 3; Judg. xi. 40; Job ii. 11, xxx. 25, &c.). *o*. The sitting or lying posture in silence indicative of grief (Gen. xxiii. 8; Judg. xx. 26, &c.). *p*. Mourning feast and cup of consolation (Jer. xvi. 7, 8). The period of mourning varied. In the case of Jacob it was seventy days (Gen. l. 3); of Aaron (Num. xx. 29), and Moses (Deut. xxxiv. 8), thirty. A further period of seven days in Jacob's case (Gen. l. 10). Seven days for Saul, which may have been an abridged period in time of national danger (1 Sam. xxxi. 13).—III. Similar practices are noticed in the Apocryphal books.—IV. In Jewish writings not Scriptural, these notices are in the main confirmed, and in some cases enlarged.—V. In the last place we may mention—*a*. the idolatrous "mourning for TAMMUZ" (Ez. viii. 14), as indicating identity of practice in certain cases among Jews and heathens; and the custom in later days of offerings of food at graves (Ecclus. xxx. 18). *b*. The prohibition, both to the high-priest and to Nazarites, against going into mourning even for a father or mother (Lev. xxi. 10, 11; Num. vi. 7). The inferior priests were limited to the cases of their near relatives (Lev. xxi. 1, 2, 4). *c*. The food eaten during the time of mourning was regarded as impure (Deut. xxvi. 14; Jer. xvi. 5, 7; Ez. xxiv. 17; Hos. ix. 4).—VI. When we turn to heathen writers we find similar usages prevailing among various nations of antiquity (Egyptians, Greeks, Romans, &c.).—VII. With the practices above mentioned, Oriental and other customs, ancient and modern, in great measure agree. D'Arvieux says, Arab men are silent in grief, but the women scream, tear their hair, hands, and face, and throw earth or sand on their heads. The older women wear a blue veil and an old abba by way of mourning-garments. They also sing the praises of the deceased. Niebuhr says both Mohammedans and Christians in Egypt hire wailing-women, and wail at stated times. Burckhardt says the women of Atbara in Nubia shave their heads on the death of their nearest relatives—a custom prevalent also among several of the peasant-tribes of Upper Egypt. He also mentions wailing-women, and a man in distress besmearing his face with dirt and dust in token of grief. In the Arabian Nights are frequent allusions to similar practices. They also mention ten days and forty days as periods of mourning. Lane, speaking of the modern Egyptians, says, "After death the women of the family raise cries of lamentation called *wedwêh* or *wildâh*, uttering the most piercing shrieks, and calling upon the name of the deceased, 'O, my master! O, my resource! O, my misfortune! O, my glory!' (see Jer. xxii. 18). The females of the neighborhood come to join with them in this conclamation: generally, also, the family send for two or more *neddikêba*, or public wailing-women. Each brings a tambourine, and beating them they exclaim, 'Alas for him!' The female relatives, domestics, and friends, with their hair dishevelled, and sometimes with rent clothes, beating their faces, cry in like manner,

'Alas for him!' These make no alteration in dress, but women, in some cases, dye their shirts, head-veils, and handkerchiefs of a dark-blue color. They visit the tombs at stated periods" (*Mod. Eg.* iii. 152, 171, 195). One of the most remarkable instances of traditional customary lamentation is found in the weekly wailing of the Jews at JERUSALEM at a spot as near to the Temple as could be obtained. (BURIAL; TOMB.) Spiritual mourning, or that sorrow in view of sin which is connected with true repentance, appears to be especially meant in Mat. v. 4; Jas. iv. 9, and some other passages (compare 2 Cor. vii. 10).

**Mouse** (Heb. *'achbdr*) occurs in Lev. xi. 29; 1 Sam. vi. 4, 5; Is. lxvi. 17. The Hebrew word is probably generic, and not intended to denote any particular species of mouse. The original word denotes a field-ravager, and may therefore comprehend any destructive rodent. Probably, however, in 1 Sam. vi. 5, "the mice that mar the land" may include and more particularly refer to the short-tailed field-mice (*Arvicola agrestis*, Flem.), which Kitto says cause great destruction to the corn-lands of Syria. About fifty years ago, some of the English royal forests were threatened with total destruction by this animal. In one, Dean Forest, nearly 30,000 short-tailed field-mice were caught in traps and pits in 1813, and probably a far greater number destroyed by weasels, owls, and other predatory creatures. In New Forest, also, many thousands were taken and destroyed that year in the same way.

\* **Mouth** (Heb. usually *pek*; Gr. *stoma*) is used in the Scriptures both literally of men and beasts (Gen. viii. 11, xxv. 28, margin; Ex. iv. 11 ff.; Ps. xxii. 21; Mat. xv. 11, &c.), and figuratively of God (2 Chr. xxxv. 22; Mat. iv. 4, &c.), of inanimate things (Gen. iv. 11, xxix. 2 ff., xlii. 27, &c.), &c. It is put by metonymy for a *speaker* (Ex. iv. 16, &c.), *speech* or *words* (Ps. xlix. 18, margin, &c.), *command* (Gen. xlv. 21, margin; Num. iii. 16, margin, &c.), &c. To "speak with one mouth to mouth" (Num. xii. 8) = to speak in person, without mediator or interpreter. "With one mouth" (1 K. xxii. 13, &c.) = with one voice or accord. To "put worse in one's mouth" (Ex. iv. 15, &c.) = to suggest what one shall say. The law is "in one's mouth" (Ex. xiii. 9), i. e. is often spoken of. To "lay one's hand upon his mouth" (Judg. xviii. 19, &c.) denotes silence. See further in Ges. *Heb. Lex.*, Rbn. *N. T. Lex.*

**Mow'ing** [mo-]. As the great heat of the climate in Palestine and other similarly situated countries soon dries up the herbage itself, hay-making in our sense of the term is not in use. The "king's mowings" (Am. vii. 1), i. e. mown grass (Ps. lxxii. 6), may perhaps refer to some royal right of early pasturage for the use of cavalry (compare 1 K. xviii. 5). AGRICULTURE; GRASS; HAY; TAXES.

**Moza** (fr. Heb. = *a going forth, fountain*, Ges.; *origin, descent*, Fü.). 1. Son of Caleb the son of Hezron (1 Chr. ii. 46).—2. Son of Zimri, and descendant of Saul (viii. 36, 37, ix. 42, 43).

**Mo'zah** (fr. Heb. = *MOZA?* Ges.; *place of reeds*, Fü.; see below), a city of Benjamin (Josh. xviii. 26 only), named between Chephirah and Rekem; site unknown. Interpreting the name according to its Hebrew derivation, it may = *the spring-head*—the place at which the water of a spring gushes out (Stanley). A place of this name is mentioned in the Mishna as follows:—"There was a place below Jerusalem named Motsa; thither they descended and gathered willow-branches," i. e. for the "Feast

of Tabernacles" so called. To this the Gemara adds, "the place was a Colonia, i. e. exempt from the king's tribute." Schwarz would identify Moza with the present *Kulónieh*, a village about four miles W. of Jerusalem on the Jaffa road, at the entrance of the great *Wady Beit Haninah*.

\* **Muf'fers**, the A. V. translation of Heb. pl. *re'dlôth* = *veils*, as a female ornament, so called from their tremulous or fluttering motion, Ges., Fü. (Is. iii. 19).

**Mul'ber-ry-trees** (Heb. *bêchâim*, pl. of *bâchâ*) occurs only in 2 Sam. v. 23, 24, and 1 Chr. xiv. 14. Mr. Houghton, the original author of the present article, considers it impossible to determine the kind of tree denoted by the Hebrew word. The Jewish Rabbis, with several modern versions, make the Heb. *bâchâ* = the mulberry-tree; others retain the Hebrew word. Celsius (*Hierob.* i. 335) believes the Heb. *bâchâ* = a tree of similar name mentioned in a MS. work of the Arabic botanical writer Abu'l Fadli, viz. some species of *Amyris* or *Balsamodendron*. Dr. Royle refers the Heb. *bâchâ* to the Ar. *Shajrat-al-bak*, the *gnat-tree*, which he identifies with some species of poplar. Rosenmüller follows the LXX. of 1 Chr. xiv. 14, and believes *pear-trees* are signified. As to the claim of the mulberry-tree to represent the *bêchâim* of Scripture, it is difficult to see any foundation for such an interpretation. The tree of which Abu'l Fadli speaks, and which Sprengel identifies with *Amyris Gileadensis*, Lin. (SPICE), cannot denote the *bâchâ* of the Hebrew Bible; for plants of this family are tropical shrubs, and never could have grown in the valley of Rephaim. The explanation given by Royle, that some poplar is signified, is untenable; for the Heb. *bâchâ* and the Ar. *baka* are clearly distinct both in form and signification. Though there is no evidence to show that the mulberry-tree occurs in the Hebrew Bible, yet the fruit of this tree is mentioned in 1 Mc. vi. 34 (Gr. *moron*), the "blood" (juice) of grapes and mulberries having been shown to the elephants of Antiochus Eupator, in order to irritate them and make them more formidable opponents to the army of the Jews. It is well known that many animals are enraged when they see blood or any thing of its color. SYCAMINE-TREE.

**Mule**, the mixed offspring of the HORSE and ASS; the A. V. translation of the following Hebrew words:—1. *Pered*, *Pirdâh*, the common and fem. Hebrew nouns to express the "mule;" the first of which occurs in numerous passages of the Bible, the latter only in 1 K. i. 33, 38, 44. It is an interesting fact that we do not read of mules till the time of David, just at the time when the Israelites were becoming well acquainted with horses. After this time horses and mules are in Scripture often mentioned together. In Ezr. ii. 66 and Neh. vii. 68, we read of 245 mules; in 2 Sam. xiii. 29, all the king's sons had mules. Absalom rode on a mule in the battle of the wood of Ephraim, when the animal went away from under him and so caused his death. Mules were among the presents brought to Solomon year by year (1 K. x. 25). The Levitical law forbade the coupling together of animals of different species (Lev. xix. 19), hence the mules were probably imported. The Tyrians, after Solomon's time, were supplied with horses and mules from Armenia (Togarmah) (Ez. xxvii. 14). Michaelis conjectures that the Israelites first became acquainted with mules in the war which David carried on with the king of Nisibis (Zobah) (2 Sam. vii. 3, 4). In Solomon's time it is possible that mules from Egypt oc-

casionaly accompanied the horses which we know the king of Israel obtained from that country; for though the mule is not of frequent occurrence in the monuments of Egypt, yet it is not easy to believe that the Egyptians were not well acquainted with this animal. It would appear that only kings and great men rode on mules. We do not read of mules at all in the N. T., perhaps, therefore, they had ceased to be imported.—2. *Rechesh* (DROMEDARY 2).—3. *Yemin* is found only in Gen. xxxvi. 24, where the A. V. has "mules" as the rendering of the word. The passage is one concerning which various explanations have been attempted. Whatever may be the proper translation of the passage, it is quite certain that the A. V. is incorrect in its rendering:—"This was that ANAH that found the mules in the wilderness as he fed the asses of Zibeon his father." The most probable explanation is that which interprets *yemin* = *warm springs*, as the Vulgate has it. The celebrated hot springs of Cal-lirhoë (LASHA ?) are on the eastern side of the Dead Sea, in *Waly Zerka Ma'in*. CAMEL 4; DROMEDARY 3.

**Muppim** (Heb. *darknesses*, i. e. *sorrow, misery*, Fū.), a Benjamite, and one of the fourteen descendants of Rachel who belonged to the original colony of the sons of Jacob in Egypt (Gen. xli. 21). Commentators generally consider Muppim = SHUPHAM in Num. xxvi. 39, and SHEPHUPHAN in 1 Chr. viii. 5. Many also with Lord A. C. Hervey consider Muppim = SHUPPIM in 1 Chr. vii. 12, 15; but Dr. P. Holmes (in Kitto) regards Muppim as the grandson of Benjamin and son of Bela, and concludes that Shuppim was a nephew of Muppim.

**Murder.** The principle on which the act of taking the life of a human being was regarded by the Almighty as a capital offence is stated on its highest ground as an outrage on the likeness of God in man, to be punished even when caused by an animal (Gen. ix. 5, 6; see also Jn. viii. 44; 1 Jn. iii. 12, 15). Its secondary or social ground appears to be implied in the direction to replenish the earth which immediately follows (Gen. ix. 7). The post-diluvian command was limited by the Law of Moses, which, while it protected the accidental homicide, defined with additional strictness the crime of murder. It prohibited compensation or reprieve of the murderer, or his protection if he took refuge in the refuge city, or even at the altar of Jehovah (Ex. xxi. 12, 14; Lev. xxiv. 17, 21; 1 K. ii. 5, 6, 31; BLOOD; CITY OF REFUGE.) Bloodshed even in warfare was held to involve pollution (Num. xxxv. 33, 34; Deut. xxi. 1, 9; 1 Chr. xxviii. 3). It is not certain whether a master who killed his slave was punished with death (Ex. xxi. 20). No punishment is mentioned for suicide attempted, nor does any special restriction appear to have attached to the property of the suicide (2 Sam. xvii. 23). Striking a pregnant woman so as to cause her death was punishable with death (Ex. xxi. 23). If an animal known to be vicious caused the death of any one, not only was the animal destroyed, but the owner also, if he had taken no steps to restrain it, was held guilty of murder (ver. 29, 31). The duty of executing punishment on the murderer is in the Law expressly laid on the "revenger of blood;" but the question of guilt was to be previously decided by the Levitical tribunal. (BLOOD, AVENGER OF; MANSLAYER; PUNISHMENTS.) In regal times the duty of execution of justice on a murderer seems to have been assumed to some extent by the sovereign, as well as the privilege of pardon (2 Sam.

xiii. 39, xiv. 7, 11; 1 K. ii. 34). It was lawful to kill a burglar taken at night in the act, but unlawful to do so after sunrise (Ex. xxii. 2, 3).

**Murrain** = a plague or pestilence among cattle; the A. V. translation of Heb. *deber* in Ex. ix. 8 and margin of Ps. lxxviii. 50; elsewhere translated "pestilence" or "plague." PLAGUE, note 1; PLAGUES, THE TEN.

**Mu'shi** (Heb. probably = *felt out by Jehovah*, Ges.; *the one withdrawn* from men, Fū.), son of MERARI, the son of LEVI (Ex. vi. 19; Num. iii. 20; 1 Chr. vi. 19, 47, xxiii. 21, 23, xxiv. 26, 30).

**Mushites** = descendants of MUSHI; a family of MERARITE Levites (Num. iii. 33, xxvi. 58).

**Mus'le.** The inventor of musical instruments, like the first poet and the first forger of metals, was a Cainite. According to Gen. iv., JUBAL the son of Lamech was "the father of all such as handle the harp and organ," i. e. of all players upon stringed and wind instruments. The first mention of music in the times after the Deluge is in the narrative of Laban's interview with Jacob ("with songs, with tabret, and with harp;" Gen. xxxi. 27). (HYMN; TIMBREL.) So that, in whatever way it was preserved, the practice of music existed in the upland country of Syria, and of the three possible kinds of musical instruments, two were known and employed to accompany the song. The three kinds are alluded to in Job xxi. 12. On the banks of the Red Sea sang Moses and the children of Israel their triumphal song of deliverance from the hosts of Egypt; and Miriam, in celebration of the same event, exercised one of her functions as a prophetess by leading a procession of the women of the camp, chanting in chorus the burden to the song of Moses, "Sing ye to Jehovah, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea" (Ex. xv. 21). (DANCE 2.) The triumphal hymn of Moses had unquestionably a religious character about it, but the employment of a rude kind of music in religious service, though idolatrous, is more distinctly marked in the festivities at the erection of the golden calf (xxxii. 17, 18). The silver trumpets made by the metal workers of the Tabernacle, and used to direct the movements of the camp, point to music of a very simple kind (Num. x. 1-10; CORNET). The song of Deborah and Barak (Judg. v.) is cast in a distinctly metrical form, and was probably intended to be sung with a musical accompaniment as one of the people's songs (compare xi. 34). The simpler impromptu with which the women from the cities of Israel greeted David after the slaughter of the Philistine, was apparently struck off on the spur of the moment, under the influence of the wild joy with which they welcomed their national champion, "the darling of the songs of Israel" (1 Sam. xviii. 6, 7). Up to this time we meet with nothing like a systematic cultivation of music among the Hebrews, but the establishment of the schools of the prophets appears to have supplied this want. Whatever the students of these schools may have been taught, music was an essential part of their practice. (PROPHET.) Professional musicians soon became attached to the court. David seems to have gathered round him "singing men and singing women" (2 Sam. xix. 35). Solomon did the same (Ecc. ii. 8), adding to the luxury of his court by his patronage of art, and obtaining a reputation himself as no mean composer (1 K. iv. 32).—But the Temple was the great school of music, and it was consecrated to its highest service in the worship of Jehovah. Before,

however, the elaborate arrangements had been made by David for the temple choir, there must have been a considerable body of musicians throughout the country (2 Sam. vi. 5), and in the procession which accompanied the Ark from the house of Obed-edom, the LEVITES, with Chenaniah at their head, who had acquired skill from previous training, played on psalteries, harps, and cymbals, to the words of the psalm of thanksgiving which David had composed for the occasion (1 Chr. xv., xvi.). It may be that the Levites all along had practised music, and that some musical service was part of the worship of the Tabernacle. The position which they occupied among the other tribes naturally favored the cultivation of an art which is essentially characteristic of a leisurely and peaceful life. The three great divisions of the tribe had each a representative family in the choir. (ASAPH; HEMAN; JEDUTHUN.) Asaph himself appears to have played on the cymbals (xvi. 5; CYMBAL), and this was the case with the other leaders (xv. 19), perhaps to mark the time more distinctly, while the rest of the band played on psalteries and harps. The singers were distinct from both, as is evident in Ps. lxxvii. 25, "the singers went before, the players on instruments followed after, in the midst of the damsels playing with timbrels;" unless the "singers" here = the cymbal-players, like Heman, Asaph, and Ethan, who, in 1 Chr. xv. 19, are called "singers," and perhaps, while giving the time with their cymbals, led the choir with their voices. The "players on instruments" (Heb. *nôgênim*) were the performers upon stringed instruments, like the psaltery and harp. The "players on instruments" (Heb. *hōlêlîm* or *chōlêlîm*) in Ps. lxxxvii. 7, were different from these last, and were properly pipers or performers on perforated wind-instruments (1 K. i. 40). "The damsels playing with timbrels" (compare 1 Chr. xiii. 8) seem to indicate that women took part in the Temple choir (xxv. 5, 6; Ezr. ii. 65). The trumpets, mentioned among the instruments played before the Ark (1 Chr. xiii. 8), appear to have been reserved for the priests alone (xv. 24, xvi. 6). As they were also used in royal proclamations (2 K. xi. 14), they were probably intended to set forth by way of symbol the royalty of JEHOVAH, the theocratic King of His people, as well as to sound the alarm against His enemies (2 Chr. xiii. 12). The altar was the table of Jehovah (Mal. i. 7), and the sacrifices were His feasts (Ex. xxiii. 18), so the solemn music of the Levites corresponded to the melody by which the banquets of earthly monarchs were accompanied (2 Chr. v. 12, 13, vii. 6, xxix. 27, 28). The Temple was His palace, and as the Levite sentries watched the gates by night they chanted the songs of Zion; one of these is probably Ps. cxxxiv. The relative numbers of the instruments in the temple band, according to the traditions of Jewish writers, were:—of psalteries, from two to six; of flutes, two to twelve; of trumpets, from two upward without limit; of harps or citherns, from nine upward; of cymbals, only one pair (Forkel).—In the private as well as in the religious life of the Hebrews music held a prominent place. The kings had their court musicians (Eccl. ii. 8), who bewailed their death (2 Chr. xxxv. 25), and in the luxurious times of the later monarchy the effeminate gallants of Israel, reeking with perfumes and stretched upon their couches of ivory, were wont at their banquets to accompany the song with the tinkling of the PSALTERY or guitar (Am. vi. 4–6), and amused themselves with devising musical instruments while their

nation was perishing (compare Is. v. 11, 12). But while music was thus made to minister to debauchery and excess, it was the legitimate expression of mirth and gladness, and the indication of peace and prosperity. It was only when a curse was upon the land that the prophet could say, "The mirth of tabrets ceaseth, the noise of them that rejoice endeth, the joy of the harp ceaseth, they shall not drink wine with a song" (Is. xxiv. 8, 9, compare Ps. cxxxvii.). The bridal processions as they passed through the streets were accompanied with music and song (Jer. vii. 34), and these ceased only when the land was desolate (Ez. xxvi. 13). (MARRIAGE.) The music of the banquets was accompanied with songs and dancing (Is. xv. 25; Ecclus. xxxii., xlix. 1). The triumphal processions which celebrated a victory were enlivened by minstrels and singers (Ex. xv. 1, 20; Judg. v. 1, xi. 34; 1 Sam. xviii. 6, xxi. 14; 2 Chr. xx. 28; Jd. xv. 12, 13), and on extraordinary occasions they even accompanied armies to battle (2 K. iii. 15; 2 Chr. xiii. 12, 14). (MINSTREL.) Besides songs of triumph there were also religious songs (Is. xxx. 29; Am. v. 23; Jas. v. 13), "songs of the Temple" (Am. viii. 3), and songs in idolatrous worship (Ex. xxxii. 18). Love-songs are alluded to in Ps. xlv. title, and Is. v. 1. There were also the doleful songs of the funeral procession, and the wailing chant of the mourners who went about the streets, the professional "cunning" of those who were skillful in lamentation (2 Chr. xxxv. 25; Eccl. xii. 5; Jer. ix. 17–20; Am. v. 16). The grape-gatherers sang as they gathered in the vintage, and the wine-presses were trodden with the shout of a song (Is. xvi. 10; Jer. xlviii. 33); the women sang as they toiled at the mill, and on every occasion the land of the Hebrews during their national prosperity was a land of music and melody. There is one class of musicians to which allusion is casually made (Ecclus. ix. 4), and who were probably foreigners, the harlots who frequented the streets of great cities and attracted notice by singing and playing the guitar (Is. xxiii. 15, 16; HARLOT).—There are two aspects in which music appears, and about which little satisfactory can be said: the mysterious influence which it had in driving out the evil spirit from SAUL, and its intimate connection with prophecy and prophetic inspiration. From the instances in which it occurs, it is evident that the same Heb. root (*nābā*) is used to denote the inspiration under which the prophets spoke and the minstrels sang. All that can be safely concluded (so Mr. Wright) is that in their external manifestations the effect of music in exciting the emotions of the sensitive Hebrews, the frenzy of Saul's madness (1 Sam. xviii. 10), and the religious enthusiasm of the prophets, whether of Baal or Jehovah, were so nearly alike as to be described by the same word. The case of Saul is more difficult still. We cannot be admitted to the secret of his dark malady. Two turning-points in his history are the two interviews with Samuel:—the first, when Samuel foretold his meeting with the company of prophets, with their minstrelsy, the external means by which the spirit of Jehovah should come upon him, and he should be changed into another man (x. 5),—and the other (the last, if we except that dread encounter which the despairing monarch challenged before the fatal day of Gilboa), upon the occasion of Saul's disobedience in sparing the Amalekites, for which he was rejected from being king (xv. 26). Immediately after this we are told the Spirit of Jehovah de-

parted from Saul, and an "evil spirit from Jehovah troubled him" (xvi. 14); and his attendants, who had perhaps witnessed the strange transformation wrought upon him by the music of the prophets, suggested that the same means should be employed for his restoration (xvi. 18, 23). But on two occasions, when anger and jealousy supervened, the remedy which had soothed the frenzy of insanity had lost its charm (xviii. 10, 11, xix. 9, 10). **AIJE-LETH-SHAHAR; ALAMOTH; AL-TASCHITH; DEGREES, SONGS OF; GITTITH; HIGGAION; JONATH-KLEM-EKCHO-KIM; MAHALATH; MAHALATH LEANNOTH; MASCHIL; MICHAM; MUSICAL INSTRUMENTS; MUSICIAN, THE CHIEF; MUTH-LABEN; NEGINAH; NEGINOTH; NEHILOTH; SELAH; SHEMINITH; SHIGGAION; SHUSHAN-EDUTH.**

**Mu-si-cal In-stru-ments** are of three kinds: stringed-instruments (**HARP; PSALTERY OF VIOL; SACKBUT?**); wind-instruments (**CORNET; DULCIMER?; FLUTE; HORN; ORGAN; PIPE; TRUMPET**); instruments of percussion (**BELLS; CYMBAL; DANCE 2?; TABRET or TIMBREL**). In addition to the instruments of music which have been represented in our version by some modern word, and are treated under their respective titles (see above; also **GITTITH; MAHALATH**), there are other terms which are vaguely or generally rendered. These are—1. Chal. *dahavdn* or *dachavdn*, translated "instruments of music" in Dan. vi. 18, marg. "or table, perhaps literally *concubines*." The last-mentioned rendering is that approved by Gesenius, and seems most probable (so Mr. Wright).—2. Heb. *minnim*, rendered with great probability "stringed-instruments" in Ps. cl. 4. It appears to be a general term, but beyond this nothing is known of it. In Ps. xlv. 8 the Heb. *minni* is translated "whereby;" but Gesenius and most of the moderns follow Sebastian Schmid in translating "out of the ivory-palaces the stringed-instruments make thee glad."—3. Heb. *'asor*, "an instrument of ten strings" (Ps. xcii. 3). The full Hebrew phrase is *nebel 'asor* = a ten-stringed psalter, as in Ps. xxxiii. 2, cxliv. 9; and the true rendering of the first-mentioned passage would be "upon an instrument of ten strings, even upon the psalter."—4. Heb. *shiddah v'shiddoth* in Eccl. ii. 8 only, "I gat me men-singers and women-singers, and the delights of the sons of men, musical instruments, and that of all sorts." The words thus rendered have received a great variety of meanings—*drinking-vessels* (Aquila, Vulg.); *cup-bearers* (LXX., Peshito, Jerome, Ar.); *baths* (Chal.); *musical instruments* (David Kimchi, Luther, A. V., and many commentators; *wife and wives*, i. e. a queen with other wives and concubines (Ges.), or wives in abundance (Fü.). But the most probable interpretation (so Mr. Wright) is that suggested by a usage of the Talmud, where *shiddah* = a *palanquin* or *litter* for women.—5. Heb. *shlishim*, translated "instruments of music" in the A. V. of 1 Sam. xviii. 6, marg. "three-stringed instruments." Roelliger translates *triangles*, which are said to have been invented in Syria. We have no means of deciding which is the more correct. The LXX. and Syriac give *cymbals*; the Vulgate *sistra* = Egyptian metallic rattles. **MUSIC.**

\* **Mu-si-cian** [-zish'an], the Chief, the A. V. translation of Heb. *menatleach* or *menatleach* (= *leader, precursor, chief musician*, Ges., after Kimchi, Rashi, Aben Ezra, &c.), a term found in the titles of fifty-three psalms (iv., v., vi., &c.), and in Hab. iii. 19 (A. V. "chief singer"). "To the chief musician" denotes that the psalm is to be performed under his direction. **MUSIC.**

**Mustard** (Gr. *sinapi*) occurs in Mat. xiii. 31, xvii. 20; Mk. iv. 31; Lk. xiii. 19, xvii. 6. The subject of the mustard-tree of Scripture has of late years been a matter of considerable controversy, the common mustard-plant being supposed unable to fulfil the demands of the Biblical allusion. In a paper by the late Dr. Royle, read before the Royal Asiatic Society, and published in number xv. of their journal (1844), entitled, "On the Identification of the Mustard-tree of Scripture," the author concludes that the *Salvadora Persica*, a large shrub or tree of moderate size, with small pungent seeds, is what is meant in the Scriptures. He supposes the *Salvadora Persica* to be the same as the tree called *Khardal* (the Arabic for *mustard*), seeds of which are employed throughout Syria as a substitute for mustard, of which they have the taste and properties. This tree, according to the statement of Mr. Ameun, a Syrian, quoted by Dr. Royle, is found all along the banks of the Jordan, near the Lake of Tiberias, and near Damascus, and is said to be generally rec-

Mustard-tree? (*Salvadora Persica*).

ognized in Syria as the mustard-tree of Scripture. But Dr. J. D. Hooker says this is a very rare plant in Syria; and Mr. Houghton is disposed, with Hiller, Celsius, Rosenmüller, Lambert, Erasmus, Grotius, &c., to believe that some common mustard-plant (*Sinapis*) is the mustard-tree of the parable. The objection commonly made against any *Sinapis* being the plant of the parable is, that the seed grew into "a tree," or, as St. Luke has it, "a great tree," in the branches of which the fowls of the air are said to come and lodge. Now, in answer to the above objection, it is urged with great truth, that the expression is figurative and Oriental, and that in a proverbial simile no literal accuracy is to be expected. It is an error, for which the language of Scripture is not accountable, to assert, as Dr. Royle and some others have done, that the passage implies that birds "built their nests" in the tree; the Greek word has no such meaning, the word merely = *to settle or rest upon* any thing for a longer or shorter time; nor is there any occasion to suppose that the expression "fowls

of the air" denotes any other than the smaller *in-sessorial* kinds, linnets, finches, &c. •Hiller's explanation is probably correct; that the birds came and settled on the mustard-plant for the sake of the seed, of which they are very fond. Again, what-

Black Mustard (*Sinapis nigra*).

ever the "mustard" may be, it is expressly said to be an herb, or more properly "a garden herb." Irby and Mangles mention the large size which the mustard-plant attains in Palestine. In their journey from *Beisan* to *Ajlûn*, in the Jordan valley, they crossed a small plain very thickly covered with herbage, particularly the mustard-plant, which reached as high as their horses' heads. Thomson (ii. 100) also says he has seen the Wild Mustard on the *rich plain* of *Akkâr*, N. of *Tripolis*, as tall as the horse and the rider. If, then, the wild plant on the *rich plain* of *Akkâr* grows as high as a man on horseback, it might attain to the same or a greater height when in a cultivated garden. The expression "which is indeed the least of all seeds" is probably hyperbolic, to denote a very small seed indeed, as there are many seeds which are smaller than mustard. "The Lord in His popular teaching," says Trench (*Notes on Parables*, 108), "adhered to the popular language;" and the mustard-seed was used proverbially to denote any thing very minute. The parable of the mustard-plant may be thus paraphrased:—"The Gospel dispensation is like a grain of mustard-seed which a man sowed in his garden, which indeed is one of the least of all seeds; but which, when it springs up, becomes a tall-branched plant, on the branches of which the birds come and settle seeking their food."

**Muth-lab-ben** (Heb., see below). "To the chief musician upon Muth-labben," is the title of Ps. ix., which has given rise to infinite conjecture. Two difficulties in connection with it have to be resolved; first, to determine the true reading of the Hebrew, and then to ascertain its meaning. Neither of these points has been satisfactorily explained. If the reading of Vulgate and LXX. be correct with regard to the consonants, the Hebrew words answering to

"upon Muth" might be read *'al 'alāmôth* = "upon ALAMOTH," as in the title of Ps. xli., and the "lab-ben" is possibly a fragment of *libnêy Kôrah* = "for the sons of Korah," which appears in the same title. But if the Masoretic reading be the true one, it is hard to attach any meaning to it. The Targum renders the title of the psalm—"on the death of the man who came forth from between the camps," alluding to Goliath, the Philistine champion (1 Sam. xvii. 4). Others render it "on the death of the son," and apply it to Absalom. Rashi's words are—"but I say that this song is of the future to come, when the childhood and youth of Israel shall be made white, and their righteousness be revealed and their salvation draw nigh, when Esau and his seed shall be blotted out." Donesh supposes that *labben* was the name of a man who warred with David in those days, and to whom reference is made as "the wicked" in ver. 5. Arama (quoted by Dr. Gill in his *Exposition*) identifies him with Saul. As a last resource Kimchi suggests that the title was intended to convey instructions to the Levite minstrel Ben (1 Chr. xv. 18). Delitzsch conjectures that Muth-labben denotes the tone or melody with the words of the song associated with it; Hupfeld that it was the commencement of an old song, either signifying "die for the son," or "death to the son." Others suppose it was a musical instrument. Prof. J. A. Alexander (*on Ps. ix.*) supposes it the title, or the first words, or a prominent expression, of some other poem, in the style, or to the air of which, this psalm was composed.

\* **Muzzle** [-z]. AGRICULTURE; Ox.

**Myn'dus** (L. fr. Gr.), a commercial town on the coast of CARIA, between MILETUS and HALICARNASSUS. We find in 1 Mc. xv. 23 that it was the residence of a Jewish population. The name still lingers in the modern *Mentesche*, though the remains of the city are probably at *Gumiahlu*.

**My'ra** (L. fr. Gr. = *floving, pouring*, Schl.), an important maritime town in LYCIA, and interesting to us as the place where St. PAUL, on his voyage to Rome (Acts xxvii. 5), was removed from the Adramyttian ship which had brought him from Cesarea, and entered the Alexandrian ship in which he was wrecked on the coast of Malta. The harbor of Myra was strictly Andriace, between two and three miles distant, but the river was navigable to the city. Myra (called *Dembra* by the Greeks) is remarkable still for its remains of various periods of history. The tombs, enriched with ornament, and many of them having inscriptions in the ancient Lycian character, show that it must have been wealthy in early times. Its enormous theatre attests its considerable population in what may be called its Greek age. In the deep gorge which leads into the mountains is a large Byzantine church, a relic of the Christianity which may have begun with St. Paul's visit.

**Myrrh** [mur], the representative in the A. V. of —1. Heb. *môr*, mentioned in Ex. xxx. 23, as one of the ingredients of the "oil of holy ointment;" in Esth. ii. 12, as one of the substances used in the purification of women; in Ps. xlv. 8, and in Prov. vii. 17, and several passages in Canticles, as a perfume. The Gr. *smurna* (A. V. "myrrh") occurs in Mat. ii. 11 amongst the gifts brought by the wise men to the infant Jesus, and in Mk. xv. 23, it is said that "wine mingled with myrrh" was offered to, but refused by, our Lord on the cross. Myrrh was also used for EMBALMING (Jn. xix. 39). Various conjectures have been made as to the real nature of the

substance denoted by the Heb. *môr*, and much doubt has existed as to the countries in which it is

Myrrh-tree (*Balsamodendron Myrrha*).

produced. According to Herodotus, Dioscorides, Theophrastus, Diodorus Siculus, Strabo, Pliny, &c.,

Cretan Rock-rose (*Cistus Creticus*).

the tree which produces myrrh grows in Arabia. Forskal mentions two myrrh-producing trees, *Amyris*

*Kataf* and *Amyris Kafal*, as occurring near Haes in Arabia Felix. The myrrh-tree which Ehrenberg and Hemprich found in the borders of Arabia Felix and that which Mr. Johnson saw in Abyssinia are believed to be identical; the tree is the *Balsamodendron Myrrha*, "a low thorny ragged-looking tree, with bright trifoliate leaves;" it is probably the *Murr* of Abu 'l Fadli, of which he says, "murr is the Arabic name of a thorny tree like an acacia, from which flows a white liquid, which thickens and becomes a gum." The *Balsamodendron Myrrha*, which produces the myrrh of commerce, has a wood and bark which emit a strong odor; the gum which exudes from the bark is at first oily, but becomes hard by exposure to the air: it belongs to the natural order *Terebinthaceæ* (comp. SPICE 1). For the "wine mingled with myrrh," see CRUCIFIXION; GALL.—2. Heb. *lôt*, erroneously translated "myrrh" in the A. V. in Gen. xxxvii. 25, xliii. 11, the only passages where the word is found, is generally considered to denote the odorous resin which exudes from the branches of the *Cistus Creticus*, known by the name of *ladanum* or *ludbanum*. It is clear that *lôt* cannot signify "myrrh," which is not produced in Palestine, yet the Scriptural passages in Genesis speak of this substance as being exported from Gilead into Egypt. There are several species of *Cistus*, all of which are believed to yield the gum *ladanum*; but the species mentioned by Dioscorides is probably identical with the one found in Palestine, viz. the *Cistus Creticus*. There can be no doubt that the Heb. *lôt*, the Arabic *ladan*, the Gr. *lédanon*, the Latin and Eng. *ladanum*, are identical. The *Cistus* belongs to the natural order *Cistaceæ*, the Rock-rose family.

**Myrtle, Myrtle-tree** (Heb. *hadas*). There is no doubt that the A. V. is correct in its translation of the Hebrew word, for all the old versions are agreed upon the point, and the identical noun occurs in Arabic as the name of the "myrtle." Mention of

Common Myrtle (*Myrtus communis*).

the myrtle is made in Neh. viii. 15; Is. xli. 19, lv. 13; Zech. i. 8, 10, 11. The modern Jews still adorn with myrtle the booths and sheds at the Feast of Tabernacles. Formerly, as we learn from Nehemiah (viii. 15), myrtles grew on the hills about Jerusa-

Iem. "On Olivet," says Stanley, "nothing is now to be seen but the olive and the fig-tree:" on some of the hills, however, near Jerusalem, Hasselquist observed the myrtle. Dr. Hooker says it is not uncommon in Samaria and Galilee. There are several species of the genus *Myrtus*, but the *Myrtus communis* is the only one denoted by the Heb. *hadus*. "With its pure starry blossoms shining through its dark foliage, with its leaves so delightfully scented, and with flexible sprays which so readily twist into garlands, there is no wonder that every nation familiar with it has loved this exquisite evergreen" (Dr. J. Hamilton, in Fairbairn). Among the ancient Greeks and Romans it was sacred to Venus. Its berries are sometimes used as a substitute for spices, and from them a wine has been made. It is a common shrub or tree in Southern Europe, Northern Africa, and Syria (Dr. Royle, in Kitto).

**Mysia** [*mish'e-a*] (L. fr. Gr.; named [so Strabo] from a Lydian word *musos* [*beech-tree*], i. e. the *beech-tree* country). The exact limits of this northwestern district of Asia Minor are not easily fixed. It is mentioned only once in the N. T. (Acts xvi. 7, 8), and that cursorily and in reference to a passing journey of St. PAUL in his second missionary circuit. The best description that can be given of Mysia at this time is that it was the region about the frontier of the provinces of Asia and Bithynia. The term is evidently used in an ethnological, not a political sense. Assos and ADRAMYTTIUM were both in Mysia. Immediately opposite was the island of Lesbos. (MITYLENE.) TROAS had a small district of its own which was politically separate.

\* **Mys'te-ry**, the uniform A. V. representation in the N. T. of the Gr. *mysterion*, which in classic Greek = *a mystery or revealed secret*, used mostly in the plural to denote certain religious celebrations, which only the initiated might attend; probably *shows or scenic representations of mythical legends* (L. & S.). In the N. T. the word (so Rbn. N. T. Lex.) is used of facts, doctrines, principles, not fully revealed. Thus the "mysteries of the kingdom of heaven" (Mat. xiii. 11, &c.) were made known to the disciples more fully than to the multitude. The "mystery of iniquity" (2 Th. ii. 7) = the hidden wickedness, as yet unknown to Christians. The term is used of the Gospel or Christian dispensation, or particular parts of it, as having been long hidden and first revealed in later times (Rom. xi. 25, xvi. 25; 1 Cor. ii. 7, xv. 51, &c.). But neither Judaism nor Christianity has any mysteries, corresponding to those of the ancient heathen, to be made known only to a particular class of initiated persons. ANTI-CHRIST; BABYLON; KINGDOM.

## N

**Na'am** (Heb. *pleasantness*, Ges.), a son of Caleb the son of Jephunneh (1 Chr. iv. 15).

**Na'a-mah** (Heb. *pleasant*, Ges.). 1. One of the four women whose names are preserved in the records of the world before the Flood; all except Eve being Cainites. She was daughter of LAMECH 1 by his wife Zillah, and sister, as is expressly mentioned, to Tubal-cain (Gen. iv. 22 only).—2. Mother of King Rehoboam (1 K. xiv. 21, 31; 2 Chr. xii. 13). On each occasion she is distinguished by the title "the Ammonite" (A. V. "an Ammonitess"). She was therefore one of the foreign women whom Solomon took into his establishment (1 K. xi. 1). In the LXX. (1 K. xii. 24, answering to xiv. 31 of the He-

brew text) she is stated to have been the "daughter of Ana (i. e. Hanun) the son of Nahash."

**Na'a-mah** (see above), a town of Judah in the lowland district ("VALLEY" 5), named with MAKKE-DAH, LACHISH, &c. (Josh. xv. 41); site unknown. NAAMATHITE.

**Na'a-man** (Heb. *pleasantness*, Ges.). 1. "Naaman the Syrian," an Aramite warrior, a remarkable incident in whose life is preserved to us through his connection with the prophet Elisha (2 K. v.). Of Naaman the Syrian there is no mention in the Bible except in this connection. But a Jewish tradition, at least as old as the time of Josephus (viii. 16, § 5), and which may very well be a genuine one, identifies him with the archer whose arrow, whether at random or not, struck Ahab with his mortal wound, and thus "gave deliverance to Syria." The expression is remarkable—"because that by him Jehovah had given deliverance to Syria." The most natural explanation perhaps is that Naaman, in delivering his country, had killed one who was the enemy of Jehovah not less than he was of Syria. Whatever the particular exploit referred to was, it had given Naaman a great position at the court of Ben-hadad. He was commander-in-chief of the army, and was nearest to the person of the king, whom he accompanied officially, and supported, when he went to worship in the temple of Rimmon (ver. 18). He was afflicted with a leprosy of the white kind (ver. 27), which had hitherto defied cure. The circumstances of his visit to Elisha have been drawn out under ELISHA. His request to be allowed to take away two mules' burden of earth is not easy to understand. The natural explanation is that, with a feeling akin to that which prompted the Pisan invaders to take away the earth of ACELDAMA for the Campo Santo at Pisa, the grateful convert to Jehovah wished to take away some of the earth of His country, to form an altar for the burnt-offering and sacrifice which he intended thenceforth to dedicate to Jehovah only. But in the narrative there is no mention of an altar. How long Naaman lived to continue a worshipper of Jehovah while assisting officially at the worship of Rimmon, we are not told. His case is quoted by our Lord (Lk. iv. 27) as an instance of mercy to one not of Israel.—2. One of the family of Benjamin who came down to Egypt with Jacob (Gen. xli. 21). According to the LXX. version of that passage he was the son of Bela, which is the parentage assigned to him in Num. xxvi. 40, where, in the enumeration of the sons of Benjamin, he is said to be the son of Bela, and head of the family of the NAAMITES. He is also reckoned among the sons of Bela in 1 Chr. viii. 3, 4. Lord A. C. Hervey supposes the name repeated in ver. 7 by a copyist's error. Compare AMIAH 3; ARD; GERA.

**Na'a-math-ite** (fr. Heb., derived from a place called *Naamah*, probably on the Arabian borders of Syria), the gentile name of one of Job's friends, "Zophar the Naamathite" (Job ii. 11, xi. 1, xx. 1, xlii. 9).

**Na'a-mites** (fr. Heb.), the = the family descended from NAAMAN 2, the grandson of Benjamin (Num. xxvi. 40 only).

**Na'a-rah** (Heb. *a girl, maiden, handmaid*, Ges.), second wife of Ashur, a descendant of Judah (1 Chr. iv. 5, 6).

**Na'a-ral** (Heb. = NEARIAH?), one of David's "valiant men;" son of Ezbai (1 Chr. xi. 37). PAARAI.

**Na'a-ran** (Heb. *boyish, juvenile*, Ges.), a city of

Ephraim, mentioned in a very ancient record (1 Chr. vii. 28) as the eastern limit of the tribe; probably = NAARATH.

**Na'a-rath** (fr. Heb. = NAARATH), a place named (Josh. xvi. 7 only) as one of the landmarks on the (southern) boundary of Ephraim; apparently between ATAROTH and JERICHO. If Ataroth be the present 'Atara, then Naarah was probably somewhere lower down the wady. Eusebius and Jerome speak of it as if well known to them—"Naorath, a small village of the Jews five miles from Jericho." Schwarz fixes it at "Neama," also "five miles from Jericho," meaning perhaps *Wady Nawa'ineh*, the name of the lower part of *Wady Mutyah* or *el-'Asas*.

**Na-ash'on**, or **Na'a-shon** (fr. Heb.) = NAHSHON (Ex. vi. 28).

**Na-assem** (Gr.) = NAHSHON (Mat. i. 4; Lk. iii. 32).

**Na-a-thus** (L. fr. Gr.), one of the family of Addi (1 Esd. ix. 31); not in Ezr. x. 30.

**Na'bal** (Heb. *fool*, Stl.; *foolish*, *wicked*, Ges.), one of the characters introduced to us in David's wanderings, apparently to give one detailed glimpse of his whole state of life at that time (1 Sam. xxv.). He was a sheepmaster on the confines of Judea and the desert, in that part of the country which bore from its great conqueror the name of CALEB (xxx. 14, xxv. 8). He was himself, according to Josephus, a Ziphite, and his residence Emmaus, a place of that name not otherwise known, on the southern CARMEL in the pasture-lands of MAON. His wealth, as might be expected from his abode, consisted chiefly of 3,000 sheep and 1,000 goats, which, as in Palestine at the time of the Christian era (Mat. xxv.) and at the present day, fed together. It was the custom of the shepherds to drive them into the wild pastures on the slopes of Carmel; and it was whilst they were on one of these excursions for grazing, that they met a band of outlaws, who showed them unexpected kindness, protecting them by day and night, and never themselves committing any depredations (xxv. 7, 15, 16). Once a year there was a grand banquet, on Carmel, "like the feast of a king" (xxv. 2, 4, 36). It was on one of these occasions that Nabal came across the path of the man to whom he owes his place in history. Ten youths from the chief of the freebooters approached him with a triple salutation—enumerated the services of their master, and ended by claiming, with a mixture of courtesy and defiance, characteristic of the East, "whatsoever cometh into thy hand for thy servants and for thy son DAVID." The great sheepmaster was not disposed to recognize this unexpected parental relation. He was notorious for his obstinacy (A. V. "churlish") and for his general low conduct ("evil in his doings")—"a man of Belial;" xxv. 8, 17). On hearing the demand of the ten petitioners, he sprang up (LXX.), and broke out into fury, "Who is David? and who is the son of Jesse?"—"What runaway slaves are these to interfere with my own domestic arrangements?" (xxv. 10, 11). The moment that the messengers were gone, the shepherds that stood by perceived the danger that their master and themselves would incur. To Nabal himself they durst not speak (xxv. 17). To his wife (ABIGAIL), as to the good angel of the household, one of the shepherds told the state of affairs. She, with the offerings usual on such occasions (xxv. 18, compare xxx. 11; 2 Sam. xvi. 1; 1 Chr. xii. 40), loaded the asses of Nabal's large establishment—herself mounted one of them, and, with her attendants running before her, rode down the hill toward David's

encampment. David had already made the fatal vow of extermination (1 Sam. xxv. 22). At this moment, as it would seem, Abigail appeared, threw herself on her face before him, and poured forth her petition in language which both in form and expression almost assumes the tone of poetry. She returns with the news of David's recantation of his vow. Nabal is then in at the height of his orgies ("very drunken"), and his wife dared not communicate to him either his danger or his escape (xxv. 36). At break of day she told him both. The stupid reveler was suddenly roused to a sense of that which impended over him. "His heart died within him, and he became as a stone." It was as if a stroke of apoplexy or paralysis had fallen upon him. Ten days he lingered, "and the Lord smote Nabal, and he died" (xxv. 37, 38). ARMS, I. 4.

**Nab-o-ris** (Gr.), apparently a corruption of ZECHARIAH (1 Esd. x. 44; compare Neh. viii. 4).

**Na'bath-ites**, the = the descendants of NEBAIOTH (1 Mc. v. 25, ix. 35).

**Na'both** (Heb. *fruit*, *produce*, Ges.; *prominence*, *distinction*, Fii.), victim of AHAH and JEZEBEL. He was a Jezreelite, and the owner of a small portion of ground (2 K. ix. 25, 26) that lay on the eastern slope of the hill of JEZREEL. He had also a vineyard, of which the situation is not quite certain. According to the Hebrew text (1 K. xxi. 1) it was in Jezreel, but the LXX. render the whole clause differently. The royal palace of Ahab was close upon the city wall at Jezreel. According to both texts it immediately adjoined the vineyard (1 K. xxi. 1, 2, Heb.; 1 K. xxi. 2, LXX.; 2 K. ix. 30, 36), and it thus became an object of desire to the king who offered an equivalent in money, or another vineyard, in exchange for this. Naboth, in the independent spirit of a Jewish landholder, refused. "Jehovah forbid it to me that I should give the inheritance of my fathers unto thee." Ahab was cowed by this reply; but the proud spirit of Jezebel was roused. She took the matter into her own hands. A solemn fast was proclaimed as on the announcement of some great calamity. Naboth was "set on high" in the public place of Samaria: two men of worthless character accused him of having "cursed God and the king." He and his children (2 K. ix. 26) were dragged out of the city and dispatched the same night. The place of execution there was by the large tank or reservoir, which still remains on the slope of the hill of Samaria, immediately outside the walls. The usual punishment for blasphemy was enforced. Naboth and his sons were stoned; and the blood from their wounds ran down into the waters of the tank below. ELIJAH; JERICHO.

**Nab-u-cho-don-o-zer** (Gr.) = NEBUCHADNEZZAR, king of Babylon (1 Esd. i. 40, 41, 45, 48; Tob. xiv. 15; Jd. i. 1, 5, 7, 11, 12, ii. 1, 4, 19, iii. 2, 8, iv. 1, vi. 2, 4, xi. 7, 23, xii. 13, xiii. 18).

**Na'chon's** [-konz] (Heb. *nachon* = *prepared*, Ges.) **Thresh'lag-floor**, the place at which the Ark had arrived in its progress from Kirjath-jearim to Jerusalem, when Uzzah lost his life in his too hasty zeal for its safety (2 Sam. vi. 6); = CHIDON.

**Na'chor** (Gr., L., and an Eng. form of Heb. = NAHOR). 1. Brother of ABRAHAM (Josh. xxiv. 21); = NAHOR 2.—2. Grandfather of Abraham (Lk. iii. 34); = NAHOR 1.

**Na'dab** (Heb. *spontaneous*, *liberal*, Ges.). 1. Eldest son of AARON and Elisheba (Ex. vi. 23; Num. iii. 2). He, his father and brother, and seventy elders of Israel were led out from the midst of the assembled people (Ex. xxiv. 1), and were command-

ed to stay and worship God "afar off," below the lofty summit of Sinai, where Moses alone was to come near to the Lord. Subsequently (Lev. x. 1) Nadab and his brother were struck dead before the sanctuary by fire from the Lord. Their offence was kindling the incense in their censers with "strange" FIRE, i. e. not taken from that which burned perpetually (vi. 13) on the altar.—2. King Jeroboam's son (JEROBOAM 1), who succeeded to the throne of Israel B. C. 954, and reigned two years (1 K. xv. 25-31). (ISRAEL, KINGDOM OF.) At the siege of Gibbethon a conspiracy broke out in the midst of the army, and the king was slain at Gibbethon by BAASHA, a man of Issachar.—3. Son of Shammai (1 Chr. ii. 28), of the tribe of Judah.—4. Son of Gibeon (viii. 30, ix. 36), of the tribe of Benjamin.

**Na-dab'a-tha** (fr. Gr.), a place from which the bride was being conducted by the children of JAMBRI, when Jonathan and Simon attacked them (1 Mc. ix. 37); probably on the E. of Jordan, and possibly connected with NEBO or Nabathea. NEBAIOTH.

**Nagge** (L. fr. Heb. NOGAI), one of the ancestors of Christ (Lk. iii. 25). Nagge must have lived about the time of Onias I. and the commencement of the Macedonian dynasty.

**Na-hal-el** (Heb. *pasture*, Ges.), a city of Zebulun, given with its "suburbs" to the Merarite Levites (Josh. xxi. 35) = NAHALLAL and NAHALOL. The Jerusalem Talmud asserts that NAHALAL was in post-biblical times called Mahlul; and this Schwarz identifies with the modern *Ma'ul*, a village in the plain of Esdrelon under the mountains which enclose the plain on the N., four miles W. of Nazareth, and two of Japhia.

**Na-hal-el** (Heb. *torrent* [or *valley*] of God; see BROOK 4, &c.), one of the halting-places of Israel in the latter part of their progress to Canaan (Num. xxi. 19). It lay "beyond," i. e. N. of the Arnon (ver. 13), and between Mattanah and Bamoth, the next after Bamoth being Pishgah. Its name seems to imply that it was a stream or wady, and it is not impossible preserved in that of the *Wady Encheyle*, which runs into the *Môjeb* (ancient Arnon), a short distance E. of the place at which the road between *Rabba* (Ar) and Aroer crosses the ravine of the *Môjeb*.

**Na-hal'el** (fr. Heb.) = NAHALAL (Josh. xix. 15).

**Na-ha-lol** (Heb.) = NAHALAL (Judg. i. 30).

**Na-ham** (Heb. *consolation*, Ges.), brother of HODIAH, or Jehudijah, wife of Ezra (1 Chr. iv. 19).

**Na-ha-ma'ni** (Heb. *compassionate*, Ges.), a chief man among those who returned from Babylon with Zerubbabel and Jeshua (Neh. vii. 7).

**Na-ha-ral**, or **Na-har'a-i** (Heb. *armor*, Ges.), Joab's armor-bearer, called in the A. V. of 2 Sam. xxiii. 37, NAHARI. He was a native of Beeroth (1 Chr. xi. 39).

**Na-ha-ri** (Heb.) = NAHARAI (2 Sam. xxiii. 37). In the A. V. of 1811 the name is printed "NAHARAI the Berothite."

**Na'hash** (Heb. *serpent*). 1. "Nahash the Ammonite," king of the Ammonites (AMMON) at the foundation of the monarchy in Israel, who dictated to the inhabitants of Jabesh-gilead that cruel alternative of the loss of their right eyes or slavery, which roused the swift wrath of SAUL, and caused the destruction of the Ammonite force (1 Sam. xi. 1, 2-11). "Nahash" may have been the title of the king of the Ammonites rather than the name of an individual. Nahash, the father of HANUN 1, had rendered DAVID some special and valuable service, which David was anxious to requite (2 Sam. x. 2). The Jewish traditions affirm that it consisted in his

having afforded protection to one of David's brothers, who escaped alone when his family were massacred by the treacherous king of Moab, to whose care they had been intrusted by David (1 Sam. xxii. 3, 4), and who found an asylum with Nahash. "Shobi the son of Nahash of Rabbah of the children of Ammon" (2 Sam. xvii. 27) was among those who brought supplies to David at Mahanaim.—2. A person mentioned once only (xvii. 25) in stating that AMASA, the commander-in-chief of Absalom's army, was the son of a certain Ithra, by ABIGAIL, "daughter of Nahash, and sister to ZERUIAH." From 1 Chr. ii. 16 it appears that Zeruiah and Abigail were sisters of David and the other children of Jesse. The question then arises, How could Abigail have been at the same time daughter of Nahash and sister to the children of Jesse? To this three answers may be given:—1. The universal tradition of the Rabbis that Nahash and Jesse were identical. 2. The explanation of Stanley that Nahash was the king of the Ammonites, and that the same woman had first been his wife or concubine—in which capacity she had given birth to Abigail and Zeruiah—and afterward wife to Jesse, and the mother of his children. Or (so Fairbairn) Nahash may have been the first husband of Jesse's wife, but probably not the same as Nahash the Ammonite. 3. Nahash may possibly have been the name not of Jesse, nor of a former husband of his wife, but of his wife herself.

\* **Na'hash, the City of**, = IR-NAHASH (1 Chr. iv. 12, margin).

**Na'hath** (Heb. *a letting down, rest*, Ges.). 1. A "DUKE" or phylarch of Edom, eldest son of Reuel the son of Esau (Gen. xxxvi. 13, 17; 1 Chr. i. 37).—2. A Kohathite Levite, son of Zophai (vi. 26); = TOAH and TONU?—3. A Levite in Hezekiah's reign; an overseer of tithes, &c. (2 Chr. xxxi. 13).

**Nah'm** (Heb. *hidden*, Ges.), son of Vophsi; a Naphtalite, and one of the twelve spies (Num. xiii. 14).

**Na'hor** (Heb. *snorting, snoring*, Ges.), the name of two persons in the family of ABRAHAM, both also written NACHOR. 1. His grandfather; the son of Serug and father of Terah (Gen. xi. 22-25).—2. Grandson of No. 1, son of Terah and brother of Abraham and Haran (xi. 26, 27). The order of the ages of Terah's family is not improbably inverted in the narrative; in which case Nahor was older than Abraham. He married Milcah, the daughter of his brother Haran; and when Abraham and Lot migrated to Canaan, Nahor remained behind in the land of his birth (NAHOR, THE CITY OF; UR), on the eastern side of the Euphrates, and gathered his family around him at the sepulchre of his father (compare 2 Sam. xix. 37). (IDOLATRY.) Like Jacob, and Ishmael, Nahor was the father of twelve sons, and further, as in Jacob's case, eight of them were the children of his wife, and four of a concubine (Gen. xxii. 21-24). Special care is taken in speaking of the legitimate branch to specify its descent from Milcah—"the son of Milcah, which she bare unto Nahor." It was to this pure and unsullied race that Abraham and Rebekah in turn had recourse for wives for their sons. But with Jacob's flight from Haran the intercourse ceased.

**Na'hor, the City of** (Gen. xxv. 10) = HARAN (compare xxvii. 43). NAHOR 2.

**Nah'shon** (Heb. *enchanter*, Ges.), also written NAASHON and NAASHON; son of AMMINADAB, and prince of the children of Judah (as he is styled in the genealogy of Judah, 1 Chr. ii. 10) at the first numbering

in the wilderness (Ex. vi. 23; Num. i. 7, &c.). His sister, Elisheba, was wife to Aaron, and his son, Salmon, was husband to Rahab after the taking of Jericho. In the encampment, in the offerings of the princes, and in the order of march, the first place is assigned to Nahshon the son of Amminadab as captain of the host of Judah. He died in the wilderness according to Num. xxvi. 64, 65, but no further particulars of his life are given.

**Na'hum** (Heb. *consolation*, Ges.). "The book of the vision of Nahum the Elkoshite" stands seventh in order among the minor prophets in the present arrangement of the Canon. Of the author himself we have only the knowledge afforded us by the title of his book, which gives no indication whatever of his date, and leaves his origin obscure. The site of Elkosh, his native place, is disputed, some placing it in Galilee, others in Assyria. Those who maintain the latter view assume that the prophet's parents were carried into Captivity by Tiglath-pileser, and that the prophet was born at the village of *Al-kush* or *Elkush*, E. of the Tigris, and N. of Mosul. Ewald is of opinion that the prophecy was written there at a time when Nineveh was threatened from without. The arguments in favor of an Assyrian locality for the prophet are supported by the occurrence of what are presumed to be Assyrian words. But there is nothing in the prophecy of Nahum to indicate that it was written in the immediate neighborhood of Nineveh, and in full view of the scenes depicted, nor is the language that of an exile in an enemy's country. No allusion is made to the Captivity; while, on the other hand, the imagery is such as would be natural to an inhabitant of Palestine (i. 4), to whom the rich pastures of Bashan, the vineyards of Carmel, and the blossom of Lebanon, were emblems of all that was luxuriant and fertile. The language in i. 15, ii. 2, is appropriate to one who wrote for his countrymen in their native land (so Mr. Wright, with Prof. B. B. Edwards, Dr. W. L. Alexander, Henderson, Davidson, &c., &c.). Mr. Wright thinks the sole origin of the theory that Nahum flourished in Assyria is the name of the village containing his supposed tomb, and apparently selected by mediæval tradition as a shrine for pilgrims from its similarity to Elkosh. According to Pseudo-Epiphanius, Nahum was of the tribe of Simeon.—The date of Nahum's prophecy can be determined with as little precision as his birthplace. In the *Seder Olam Rabba* he is made contemporary with Joel and Habakkuk, in the reign of Manasseh. Syncellus places him with Hosea, Amos, and Jonah, in the reign of Joash, king of Israel, more than a century earlier; while, according to Eutychius, he was contemporary with Haggai, Zechariah, and Malachi, and prophesied in the fifth year after the destruction of Jerusalem. Josephus mentions him as living in the latter part of the reign of Jotham. Carpov concluded that Nahum prophesied in the beginning of the reign of Ahaz, about B. C. 742. Bertholdt thinks it probable that the prophet escaped into Judah when the ten tribes were carried captive, and wrote in the reign of Hezekiah. Keil places him in the latter half of Hezekiah's reign, after the invasion of Sennacherib. Vitringa was of the like opinion, and the same view is taken by De Wette and Knobel. Junius and Tremellius place his prophesying in the last years of Josiah. The arguments by which Strauss endeavors to prove that the prophecy belongs to the time at which Manasseh was in captivity at Babylon, i. e. between 680 and 667 B. C., are not convincing. That the

prophecy was written before the final downfall of Nineveh, and its capture by the Medes and Chaldeans (about B. C. 625), will be admitted. The allusions to the Assyrian power imply that it was still unbroken (i. 12, ii. 13, 14, iii. 15-17). That Palestine was suffering from the effects of Assyrian invasion at the time of Nahum's writing seems probable from the allusions in i. 11-13, ii. 2, and the vivid description of the Assyrian armament in ii. 3, 4. At such a time the prophecy would be appropriate, and if i. 14 refers to the death of Sennacherib in the house of Nisroch, it must have been written before that event. These circumstances seem to determine the fourteenth year of Hezekiah (B. C. 712) as the period before which the prophecy of Nahum could not have been written. The condition of Assyria in the reign of Sennacherib would correspond with the state of things implied in the prophecy, and it is on all accounts most probable that Nahum flourished in the latter half of the reign of Hezekiah, and wrote his prophecy soon after the date above-mentioned, either in Jerusalem or its neighborhood (so Mr. Wright, with the majority of critics).—The subject of the prophecy is, in accordance with the superscription, "the burden of Nineveh." The three chapters into which it is divided form a consecutive whole. Ch. i. is introductory. It commences with a declaration of the character of Jehovah, "a God jealous and avenging," as exhibited in His dealings with His enemies, and the swift and terrible vengeance with which He pursues them (i. 2-6), while to those that trust in Him He is "good, a stronghold in the day of trouble" (i. 7), in contrast with the overwhelming flood which shall sweep away His foes (i. 8). The language of the prophet now becomes more special, and points to the destruction which awaited the hosts of Assyria who had just gone up out of Judah (i. 9-11). In the verses that follow, the intention of Jehovah is still more fully declared, and addressed first to Judah (i. 12, 13) and then to the monarch of Assyria (i. 14). And now the vision grows more distinct. The messenger of glad tidings, the news of Nineveh's downfall, trod the mountains about Jerusalem (i. 15), and proclaimed to Judah the accomplishment of her vows. But round the doomed city gathered the destroying armies; "the breaker in pieces" had gone up, and Jehovah mustered His hosts to the battle to avenge His people (ii. 1, 2). The prophet's mind in vision sees the burnished bronze shields of the scarlet-clad warriors of the besieging army, the flashing steel scythes of the war-chariots as they are drawn up in battle array, and the quivering cyprus-shafts of their spears (ii. 3). The Assyrians hasten to the defence: their chariots rush madly through the streets, and run to and fro like the lightning in the broad ways, which glare with their bright armor like torches. But a panic has seized their mighty ones; their ranks are broken as they march, and they hurry to the wall only to see the covered battering-rams of the besiegers ready for the attack (ii. 4, 5). The crisis hastens on with terrible rapidity. The river gates are broken in, and the royal palace is in the hands of the victors (ii. 6). And then comes the end; the city is taken and carried captive, and her maidens "moan as with the voice of doves," beating their breasts with sorrow (ii. 7). The flight becomes general, and the leaders in vain endeavor to stem the torrent of fugitives (ii. 8). The wealth of the city and its accumulated treasures become the spoil of the captors, and the con-

quered suffer all the horrors that follow the assault and storm (ii. 9, 10). Over the charred and blackened ruins the prophet, as the mouth-piece of Jehovah, exclaims in triumph, "Where is the lair of the lions, the feeding-place of the young lions, where walked the lion, lioness, lion's whelp, and none made (them) afraid?" (ii. 11, 12). But for all this the downfall of Nineveh was certain, for "behold! I am against thee, saith Jehovah of Hosts" (ii. 12). The vision ends, and the prophet, recalled from the scenes of the future to the realities of the present, collects himself as it were for one final outburst of withering denunciation against the Assyrian city, not now threatened by her Median and Chaldean conquerors, but in the full tide of prosperity, the oppressor and corrupter of nations. Mingled with this woe there is no touch of sadness or compassion for her fate: she will fall unpitied and unlamented, and with terrible calmness the prophet pronounces her final doom: "all that hear the bruit of thee shall clap the hands over thee: for upon whom has not thy wickedness passed continually?" (iii. 19). As a poet, Nahum occupies a high place in the first rank of Hebrew literature. In proof of this it is only necessary to refer to the opening verses of his prophecy (i. 2-6), and to the magnificent description of the siege and destruction of Nineveh in chapter ii. His style is clear and uninvolved, though pregnant and forcible; his diction sonorous and rhythmical, the words reëchoing to the sense (comp. ii. 4, iii. 3). For illustrations of Nahum's prophecy, see NINEVEH; WAR. CANON; INSPIRATION; PROPHET.

**Na'l-das** (fr. Gr.) = BENAIAH 8 b. (1 Esd. ix. 31).

**Nail**. I. (of finger) (Chal. *tephar*; Heb. *tsipporen*).—1. A nail or claw of man or animal (Deut. xxi. 12; Dan. iv. 33, vii. 19). 2. A point or style, e. g. for writing (Jer. xvii. 1, marg.). *Tsipporen* occurs in Deut. xxi. 12, in connection with the verb *'asah* = to make (A. V. "pare," but in margin "dress," "suffer to grow"). Much controversy has arisen on the meaning of this passage; one set of interpreters, including Josephus and Philo, regarding the action as indicative of mourning, while others refer it to the laying aside of mourning. Some, who would thus belong to the latter class, refer it to the practice of staining the nails with hennah. The word *'asah* = make, is used both of *dress*ing, i. e. making clean the feet, and also of *trim*ming, i. e. combing and making neat the beard, in the case of Mephibosheth (2 Sam. xix. 24). The captive's head was probably shaved at the commencement of the month, and during that period her nails were to be allowed to grow in token of natural sorrow and consequent personal neglect.—II.—1. Heb. *yithéd*. A "nail" (Is. xxii. 23, 25), a "stake" (xxxiii. 20), also a tent-peg (Judg. iv. 21, &c.). (JÆL; TENT.) Tent-pegs are usually of wood and of large size, but sometimes, as was the case with those used to fasten the curtains of the Tabernacle, of metal (A. V. "pin;" Ex. xxvii. 19, xxxviii. 20, &c.). 2. (Heb. *mamér*; Gr. *hélos*; *provelós* "to nail"). A nail, primarily a point. We are told that David prepared iron for the nails to be used in the Temple; and as the Holy of Holies was plated with gold, the nails also for fastening the plates were probably of gold (1 Chr. xxii. 3; 2 Chr. iii. 9). The nails of the cross are alluded to in Jn. xx. 25 and Col. ii. 14.

**Na'la** (Gr. fr. Heb. = grass-plot, pasture-ground, Sim., Wr.; the lovely, Van Oosterzee [in Lange] on Lk. vii. 11), a village of Galilee, the gate of which is made illustrious by the raising of the widow's son

(Lk. vii. 11 ff.). The site of the village is certainly known; and there can be no doubt as to the approach by which our Saviour was coming when He met the funeral. The modern *Nein* is situated on the northwestern edge of the "Little Hermon," or *Jebel ed-Dûhy*, where the ground falls into the plain of Esdraelon. Again, the entrance to the place must probably always have been up the steep ascent from the plain; and here, on the west side of the village, the rock is full of sepulchral caves.

**Na'ioth** [na'yoth] (Heb., see below), or more fully, "Naioth in Ramah;" a place in which Samuel and David took refuge together, after the latter had made his escape from the jealous fury of Saul (1 Sam. xix. 18, 19, 22, 23, xx. 1). It is evident from ver. 18, that Naioth was not actually in Ramah, Samuel's habitual residence. The Hebrew word = *habitations*, and from an early date has been interpreted to mean the huts or dwellings of a school or college of prophets over which Samuel presided, as Elisha did over those at Gilgal and Jericho. This interpretation was unknown to Josephus, but is now generally accepted by lexicographers and commentators. Mr. Rowlands (in Fairbairn) supposes Naioth was at the village *Beit Hantnah*, about four miles N. N. W. of Jerusalem. But see RAMAH 2.

\* **Na'ked**. DRESS, III. 1.

\* **Name** (Heb. *shém*; Gr. *onoma*), in the Scriptures not only = that by which a person is designated, but frequently = all that is known to belong to the person having this designation, and the person himself. Thus "the name of God" or "of Jehovah," &c., indicates His authority (Deut. xviii. 20; Mat. xxi. 9, &c.), His dignity and glory (Is. xlviii. 9, &c.), His protection and favor (Prov. xviii. 10, &c.), His character (Ex. xxxiv. 5, 14, comp. 6, 7, &c.), His divine attributes in general (Mat. vi. 9, &c.), &c. The Lord is said to set or put His name where the revelation or manifestation of His perfections is made (Deut. xii. 5, xiv. 24, &c.). To believe in or on the name of Christ is to receive and treat him in accordance with the revelation which the Scriptures make of Him (Jn. i. 12, ii. 23), &c.—Proper names among the ancient nations, Hebrews, Greeks, &c., were all significant, often expressive of religious feeling (comp. JOHANAN, JONATHAN, DANIEL, THEOPHILUS, &c.). Usually among the Hebrews a person had only one name (e. g. David, Isaac, &c.), but sometimes two or more (e. g. Jacob and Israel, &c.). The Egyptians, Syrians, Persians, Greeks, usually had only one name. The Romans likewise had originally but one name for each person, but in the refinement of N. T. times they had three names each. (1.) the *prænomen*, i. e. the first or personal name, by which the individual was distinguished from others of the same family; (2.) the *nomen* or name which designated the *gens* or clan; (3.) the *cognomen*, or surname, or family name. Thus Marcus was the first or personal name, Tullius the gentile name, or name of his clan, and Cicero the surname, or family name of the great Roman orator, Marcus Tullius Cicero. Our English ancestors had at first only one name each; afterward came the surname as an addition to the Christian or personal name.

**Na-me'a** (L. fr. Gr. *Nanaia*). The last act of ANTIOCHUS EPIPHANES was his attempt to plunder the temple of Nanea at Elymais, which had been enriched by the gifts and trophies of Alexander the Great (1 Mc. vi. 1-4; 2 Mc. i. 13-16). The Persian goddess Nanea is apparently the Moon-goddess, of whom the Greek Artemis (DIANA) was the nearest

representative in Polybius (quoted by Josephus xil. 9, § 1). Elphinstone in 1811 found coins of the Sasanians with the inscription NANAIA, and on the reverse a figure with nimbus and lotus-flower. In consequence of a confusion between the Greek and Eastern mythologies, Nanea has been identified with Artemis and Aphrodite (Roman Venus), the probability being that she corresponds with the Tauric or Ephesian Artemis, who was invested with the attributes of Aphrodite, and represented the productive power of nature.

**Na-o-mi**, or **Na-o'mi** (fr. Heb. = *my pleasantness*, Ges.), the wife of ELIMELECH, and mother-in-law of RUTH (Ru. i. 2 ff., ii. 1 ff., iii. 1, iv. 3 ff.). Having buried her husband and her sons Mahlon and Chilion in the land of Moab, she returned to Bethlehem with Ruth, leaving Orpah in Moab. The significance of the name contributes to the point of the paronomasia in i. 20, 21, though the passage contains also a play on the mere sound of the name:—"Call me not Naomi (pleasant), call me Mara (bitter) . . . why call ye me Naomi when Jehovah hath testified against me?"

**Naph'ish** (Heb. *recreated, refreshed*, Ges.), the last but one of the sons of ISHMAEL (Gen. xxv. 15; 1 Chr. i. 31). The tribe descended from Nodab was subdued by the Reubenites, Gadites, and half-tribe of Manasseh, when "they made war with the Hagarites, with JETUR (ITURRA), and *Nephish* and Nodab" (1 Chr. v. 19). The tribe is not again found in the sacred records, nor is it mentioned by later writers. It has not been identified with any Arabian tribe.

**Naph'i-el** (Gr.) = NEPHUSIM (1 Esd. v. 31).

**Naph'ta-li** (Heb. *my wrestling*, A. V. marg., Ges.; *wrestling of Jah*, Fù.; see below), in N. T. NEPHTHALIM, fifth son of Jacob; the second child borne to him by Bilhah, Rachel's handmaid. His birth and the bestowal of his name are recorded in Gen. xxx. 8:—"and Rachel said 'wrestlings of God (A. V. 'with great wrestlings') have I wrestled with my sister and I have prevailed.' And she called his name Naphtali." By his birth Naphtali was thus allied to DAN (xxxv. 25). At the migration to Egypt four sons are attributed to Naphtali (xvi. 24; Ex. i. 4; 1 Chr. vii. 13). When the census was taken at Mount Sinai the tribe numbered no less than 53,400 fighting men (Num. i. 43, ii. 30), having five tribes above it in numbers, and six below. But when the borders of the Promised Land were reached, its numbers were reduced to 45,400, with four only below it in the scale (xxvi. 48-50, comp. 37). During the march through the wilderness Naphtali occupied a position on the north of the Sacred Tent with Dan and Asher (ii. 25-31). In the apportionment of the land, the lot of Naphtali was drawn the last but one. Its territory was enclosed on three sides by those of other tribes. On the W. lay Asher; on the S. Zebulun; and on the E. the Transjordanic Manasseh. The N. terminated with the ravines of the *Litany* or *Leontes*, and opened into the splendid valley which separates the two ranges of Lebanon. (CELOSYSTRIA). According to Josephus (v. 1, § 22) its E. side reached as far as Damascus, but of this, though not impossible in the early times before the Syrian monarchy, there is no indication in the Bible. The S. boundary was probably very much the same as that which at a later time separated Upper from Lower Galilee, and which ran from or about the town of 'Akka to the upper part of the Sea of Gennesaret. Thus Naphtali was cut off from the great plain of Esdraelon by the mass of the moun-

tains of Nazareth; while on the E. it had a communication with the Sea of Galilee, the rich district of the *Ard el-Huleh* and the *Merj' Ayûn*, and all the splendidly watered country about *Bdnids* and *Häbeiya*, the springs of the Jordan (comp. Deut. xxxiii. 23). But the capabilities of these plains and of the access to the lake were not destined to be developed while they were in the keeping of the tribe of Naphtali. It was the mountainous country (Josh. xx. 7) which formed the chief part of their inheritance, that impressed or brought out the qualities for which Naphtali was remarkable at the one remarkable period of its history. This district, the modern *Beld el-Bashrah*, or "land of good tidings," comprises some of the most beautiful scenery and some of the most fertile soil in Palestine, forests surpassing those of the renowned Carmel itself; as rich in noble and ever-varying prospects as any country in the world. Its three Levitical cities were KEDESH (or "Kedesh in Galilee"), HAMMOTH-DOR, and KARTAN. Naphtali had its share in those incursions and molestations by the surrounding heathen, which were the common lot of all the tribes (Judah perhaps alone excepted) during the first centuries after the conquest. One of these, apparently the severest struggle of all, fell with special violence on the north of the country, and the leader by whom the invasion was repelled—BARAK of Kedesh-naphtali—was the one great hero whom Naphtali is recorded to have produced. Gilead and Reuben lingered beyond the Jordan amongst their flocks; Dan and Asher preferred the luxurious calm of their hot lowlands to the free air and fierce strife of the mountains; Issachar with characteristic sluggishness seems to have moved slowly if he moved at all; but Zebulun and Naphtali on the summits of their native highlands devoted themselves to death, even to an extravagant pitch of heroism and self-devotion (Judg. v. 18). The mention of Naphtali by Jacob in Gen. xlix. 21—"Naphtali is a hind let loose; he giveth goodly words"—probably has reference to this event. After this burst of heroism, the Naphtalites appear to have resigned themselves to the intercourse with the heathen, which was the bane of the northern tribes in general, and of which there are already indications in Judg. i. 33. At length in the reign of Pekah, king of Israel (about a. c. 730), Tiglath-pileser overran the whole of the north of Israel, swept off the population, and bore them away to Assyria. But though the history of the tribe of Naphtali ends here, yet under the title of GALILEE the district which they had formerly occupied was destined to become in every way far more important than it had ever before been. CAERNACUM.

**Naph'ta-li** (see above), **Mount**, = the mountainous district which formed the main part of the inheritance of NAPHTALI (Josh. xx. 7), answering to "Mount Ephraim" in the centre and "Mount Judah" in the south of Palestine.

**Naph'thar** (fr. Gr. *nephthar* = *naphtha*? according to 2 Mc. i. 36 = a *cleaning* [a copyist's error?]), the name said to have been given by Nehemiah to the substance which after the return from Babylon was discovered in the dry pit in which at the destruction of the Temple the sacred Fire of the altar had been hidden (2 Mc. i. 36, comp. 19). It was either the same as or closely allied to the *naphtha* of modern commerce (*Petroleum*). The place from which this combustible "water" was taken was enclosed by the "king of Persia" (Artaxerxes Longimanus), and converted into a sanctuary (ver. 34). In modern times it has been identified with the large well

called by the Arabs *Bir Eyûb* (*well of Joab* or of *Job*, situated beneath JERUSALEM, at the confluence of the valleys of Kidron and Hinnom with the *Wady en-Nar* (or *valley of the fire*). At present it would be an equally unsuitable spot either to store fire or to seek for naphtha.

**Naph'ta-him** (Heb. fr. Egyptian; see below), a Mizraite nation or tribe, mentioned only in the account of the descendants of Noah (Gen. x. 13; 1 Chr. i. 11). If we may judge from their position in the list of the Mizraites, the Naphtuhim were probably settled at first, or at the time when Gen. v. was written, either in Egypt or immediately to the W. of it. In Coptic the city of Marea and the neighboring territory is called *niphaial* or *niphaiad*. In hieroglyphics mention is made of a nation or confederacy of tribes conquered by the Egyptians called the *Nine Bows* (*the Nine Peoples*, Brugsch), a name which Champollion read *Naphit*, or, as Mr. R. S. Poole would write it, *Na-Petu*, the *town*. Gesenius supposes Naphtuhim to be *border people*, probably dwelling on the Red Sea. Fürst makes them the inhabitants of middle Egypt, with its metropolis Memphis, and derives the name from the god *Ptah* or *Phach* (= the productive, generating world-power) there worshipped.

\* **Nap'kin.** HANDKERCHIEF.

**Nar-cis'sus** [-sis-] (L. fr. Gr. = the *narcissus* plant or flower), a dweller at Rome (Rom. xvi. 11), some members of whose household were known as Christians to St. Paul. Some persons have assumed the identity of this Narcissus with the secretary of the Emperor Claudius, a wealthy freedman who died in prison, A. D. 64-5, about three years before this epistle was written (so Mr. Bullock). Another Narcissus, an associate of Nero, was put to an ignominious death A. D. 68. His name, however, was at that time too common in Rome to give any probability to the guess that he was the Narcissus mentioned by St. Paul. An improbable tradition makes Narcissus one of the seventy disciples and bishop of Athens.

**Nard.** SPIKENARD.

**Nas'bas** (Gr.), Tobit's nephew who came with Achiacharus to the wedding of Tobias (Tob. xi. 18).

**Na'sith** (Gr.) = NEZIAH (1 Esd. v. 32).

**Na'sor** (Gr. = HAZOR, with *N* prefixed by a copyist's error from the preceding Greek word), the *Plain of*, the scene of an action between Jonathan the Maccabee and the forces of Demetrius (1 Mc. xi. 67, compare 63); = HAZOR.

**Na'than** (Heb. *given*, sc. of God, Ges.). 1. An eminent Hebrew PROPHET in the reigns of DAVID and SOLOMON. If the expression "first and last," in 2 Chr. ix. 29, is to be taken literally, he must have lived late into the life of Solomon, and have been considerably younger than David. He first appears in the consultation with David about the building of the Temple (2 Sam. vii. 2, 8, 17). He next comes forward as the reprover of David for the sin with Bath-sheba; and his famous apologue (PARABLE) on the rich man and the ewe lamb, which is the only direct example of his prophetic power, shows it to have been of a very high order (xii. 1-12). On the birth of Solomon he was either specially charged with giving him his name, JEDIDIAH, or else with his education (xii. 25). At any rate, in the last years of David, it is Nathan who, by taking the side of Solomon, turned the scale in his favor. (ADONIJAH.) He advised Bath-sheba; he himself ventured to enter the royal presence with a remonstrance against the king's apathy; and at David's request

he assisted in the inauguration of Solomon (1 K. i. 8 ff.). This is the last time that we hear directly of his intervention in the history. His son ZABUD was the "king's friend." He left two works behind him—a Life of David (1 Chr. xxix. 29), and a Life of Solomon (2 Chr. ix. 29). The last of these may have been incomplete, as we cannot be sure that he outlived Solomon. But the biography of David by Nathan is, of all the losses which antiquity, sacred or profane, has sustained, the most deplorable. His grave is shown at *Halhul* near Hebron.—2. A son of David; one of the four borne to him by Bath-sheba (1 Chr. iii. 5; compare xiv. 4, and 2 Sam. v. 14). Nathan appears to have taken no part in the events of his father's or his brother's reigns. He is interesting to us from his appearing as one of the forefathers of Joseph in the GENEALOGY OF JESUS CHRIST (Lk. iii. 31).—3. Son, or brother, of one of David's "valiant men" (2 Sam. xxiii. 36; 1 Chr. xi. 38).—4. One of the head men who returned from Babylon with Ezra on his second expedition (Ezr. viii. 16; 1 Esd. viii. 44); not impossibly = the "son of Bani," who had married a foreign wife (Ezr. x. 39).

**Na'than'a-el** (Gr. and L. = *given of God* = NETHANEEL, Ges.). 1. A disciple of Jesus Christ concerning whom, under that name at least, we learn from Scripture little more than his birthplace, Cana of Galilee (Jn. xxi. 2), and his simple truthful character (i. 47). The name does not occur in the first three Gospels. St. John (i. 46-51), however, tells us of his first interview with Jesus, in company with PHILIP, on the only occasion on which he appears prominently in the history. Nathanael seems to have heard the announcement of the Messiah's appearance with some distrust at first, as doubting whether any good could come out of Nazareth, yet readily accepted Philip's invitation to go and satisfy himself by his own observation. On his approach to Jesus he is saluted by Him as "an Israelite indeed, in whom is no guile"—a true child of Abraham, and not simply according to the flesh. Learning now how Jesus knew him—"before that Philip called thee, when thou wast under the fig-tree I saw thee"—Nathanael at once confessed, "Rabbi, thou art the Son of God; thou art the King of Israel." The name of Nathanael occurs but once again in the Gospel narrative, and then simply as one of the small company of disciples to whom Jesus showed Himself at the Sea of Tiberias after His resurrection. It is very commonly believed that Nathanael and BARTHOLOMEW are the same person. The evidence for that belief is as follows:—St. John, who twice mentions Nathanael, never introduces the name of Bartholomew at all. Mat. x. 3; Mk. iii. 18; and Lk. vi. 14, all speak of Bartholomew, but never of Nathanael. It may be, however, that Nathanael was the proper name, and Bartholomew (son of Tholmai) the surname of the same disciple, just as Simon was called Bar-jona, and James, Barnabas. It was Philip who first brought Nathanael to Jesus, just as Andrew had brought his brother Simon; and Bartholomew is named by each of the first three evangelists immediately after Philip, while by St. Luke he is coupled with Philip precisely in the same way as Simon with his brother Andrew, and James with his brother John.—2. NETHANEEL 7 (1 Esd. i. 9).—3. NETHANEEL 8 (ix. 22).—4. Son of Samael; ancestor of Judith (Jd. viii. 1), and therefore a Simeonite (ix. 2).

**Nath-a-ni'as** (Gr. = NETHANIAH) = NATHAN of the sons of Bani (1 Esd. ix. 34; compare Ezr. x. 39).

**Na'than-me'leeh** [-lek] (Heb. *placed*, i. e. appointed, *by the king*, Ges.), a eunuch (A. V. "chamberlain") in the court of Josiah (2 K. xxiii. 11).

\* **Na'tion** [-shun], **Na'tions** [-shunz]. GENTILES; HEATHEN; TONGUES, CONFUSION OF.

**Na'mm** (fr. Gr. form = *NAHUM*), son of Esli and father of Amos, in the genealogy of Christ (Lk. iii. 25), about contemporary with the high-priest Jason and King Antiochus Epiphanes.

**Nave** = the central part of a wheel. The Heb. *gav* conveys the notion of convexity or protuberance. It is rendered in the A. V. "boss" of a shield (Job xv. 26), the "eyebrow" (Lev. xiv. 9), "an eminent place" (Ez. xvi. 31), once only in plural "naves" (1 K. vii. 33); but in Ez. i. 18 twice "rings," margin "strakes." CHARIOT; LAVER.

**Na've** (L. fr. Gr. *Naué*, which in the LXX. = *NUN*), Joshua's father, *NUN* (Ecclus. xlv. 1).

\* **Nav-i-ga'tion**. SHIP.

\* **Na'vy**. COMMERCE; SHIP.

**Naz-a-rene'** [-reen] (fr. Gr.) = an inhabitant of NAZARETH. This appellative is found in the N. T. applied to Jesus in many passages (Mk. i. 24; Lk.

iv. 34, &c.). Its application to Jesus, in consequence of the providential arrangements by which His parents were led to take up their abode in Nazareth, was the filling out of the predictions in which the promised Messiah is described as a *Nézer* (Heb.; A. V. "branch"), i. e. a *shoot, sprout*, of Jesse, a humble and despised descendant of the decayed royal family (so Prof. G. E. Day, with Rbn. *N. T. Lex.*, Hengstenberg, De Wette, Meyer, &c.; see the etymology of NAZARETH). Whenever men spoke of Jesus as the Nazarene, they either consciously or unconsciously pronounced one of the names of the predicted Messiah, a name indicative both of His royal descent and His humble condition. Once (Acts xxiv. 5) the term "Nazarenes" is applied to the followers of Jesus by way of contempt. The name still exists in Arabic as the ordinary designation of Christians.

**Naz'a-reth** (Gr. through Aram. fr. Heb. *n'zer* = *shoot, sprout*, Rbn. *N. T. Lex.*, &c.; compare NAZARENE), a "city" of GALILEE, not mentioned in the O. T. or in Josephus, but found first in Mat. ii. 23. It derives its celebrity almost entirely from its con-

Nazareth, from N. N. W.—From a photograph by J. Graham.—(Ayra.) The distant range of hills is to the S. of the plain of Esdraelon.

nection with the history of Christ, and in that respect has a hold on the imagination and feelings of men which it shares only with JERUSALEM and BETHLEHEM. It is situated among the hills which constitute the south ridge of Lebanon, just before they sink down into the Plain of Esdraelon. The name of the present village, with which Nazareth is identified, is *en-Názirah*; it is on the lower declivities of a hill or mountain (Lk. iv. 29); it is within the limits of the province of Galilee (Mk. i. 9); it is near Cana (Jn. ii. 1, 2, 11); a precipice exists in the neighborhood (Lk. iv. 29); and a series of testimonies reaching back to Eusebius represent the place as having occupied the same position. The modern Nazareth belongs to the better class of Eastern villages. Its population is 3,000 or 4,000; a few are Mohammedans, the rest Latin and Greek

Christians. Most of the houses are well built of stone, and appear neat and comfortable. The streets or lanes are narrow and crooked, and after rain are so full of mud and mire as to be almost impassable. The tomb of *Nebý Ismaél*, on a hill behind the town, commands an extensive and magnificent prospect, including Lebanon and Hermon, Carmel and Tabor, the plain of Esdraelon, the Mediterranean and '1441, the mountains and villages of Samaria and Galilee, &c. At Nazareth Joseph and Mary lived (Lk. ii. 39); here the angel announced to the Virgin the Messiah's birth (i. 26 ff.); to Nazareth the holy family returned after the flight into Egypt (Mat. ii. 23); here Jesus lived from infancy to manhood (Lk. iv. 16); here He taught in the synagogue, and was twice rejected by His townsmen, who attempted on the last occasion to cast Him down from "the brow

of the hill on which the city was built" (Mat. xiii. 54 ff.; Lk. iv. 16 ff.). The title on the cross designated Him as "Jesus of Nazareth" (JESUS CHRIST; Jn. xix. 19, &c.; compare Acts xxii. 8). The origin of the dispute in which Nazareth stood (Jn. i. 47) is not certainly known. All the inhabitants of Galilee were looked upon with contempt by the people of Judea because they spoke a ruder dialect, were less cultivated, and were more exposed by their position to contact with the heathen. But Nazareth labored under a special opprobrium, for it was a Galilean and not a southern Jew who asked the reproachful question whether "any good thing" could come from that source. It has been suggested that the inhabitants of Nazareth may have had a bad name among their neighbors for irreligion or some laxity of morals. At the "FOUNTAIN of the Virgin," situated at the northeastern extremity of the town, according to one tradition, the mother of Jesus received the angel's salutation (Lk. i. 28). A prevalent, but improbable, opinion of the country has transferred the scene of the attempted precipitation of Jesus (Lk. iv. 29) to a hill about two miles S. E. of the town. Above the bulk of the town are several rocky ledges over which a person could not be thrown without almost certain destruction. But Prof. Hackett, with Robinson, Stanley, &c., supposes one very remarkable precipice, almost perpendicular and forty or fifty feet high, near the Maronite church, to be the identical one over which His infuriated townsmen attempted to hurl Jesus. The principal building at Nazareth is the Latin Convent of the Annunciation.

**Naz'a-rite** (fr. Heb. *nāzīr* [= one consecrated, devoted, Ges., Fū.; the crowned one, Ginsburg, in Kitto] and *nāzīr elōhīm* [= one consecrated to God, Ges.]) = one of either sex who was bound by a vow of a peculiar kind to be set apart from others for the service of God. The obligation was either for life or for a defined time. I. There is no notice in the Pentateuch of Nazarites for life; but the regulations for the vow of a Nazarite of days are given Num. vi. 1-21. The Nazarite, during the term of his consecration, was bound to abstain from wine, grapes, with every production of the vine, and from every kind of intoxicating drink. He was forbidden to cut the hair of his head, or to approach any dead body, even that of his nearest relation. When the period of his vow was fulfilled, he was brought to the door of the Tabernacle and was required to offer a he-lamb for a burnt-offering, a ewe lamb for a sin-offering, and a ram for a peace-offering, with the usual accompaniments of peace-offerings (Lev. vii. 12, 13) and of the offering made at the consecration of priests (Ex. xxix. 2), "a basket of unleavened bread, cakes of fine flour mingled with oil, and wafers of unleavened bread anointed with oil" (Num. vi. 15). He brought also a meat-offering and a drink-offering, which appear to have been presented by themselves as a distinct act of service (ver. 17). He was to cut off the hair of "the head of his separation" (i. e. the hair which had grown during the period of his consecration) at the door of the Tabernacle, and to put it into the fire under the sacrifice on the altar. The priest then placed upon his hands the sadden left shoulder of the ram, with one of the unleavened cakes and one of the wafers, and then took them again and waved them for a wave-offering. These, as well as the breast and the heave, or right shoulder (to which he was entitled in the case of ordinary peace-offerings, Lev. vii. 32-34), were the perquisite of the priest. The Nazarite also

gave him a present proportioned to his circumstances (ver. 21). If a Nazarite incurred defilement by accidentally touching a dead body, he had to undergo certain rites of purification, and to recommence the full period of his consecration. On the seventh day of his uncleanness he was "to cut off his hair, and on the next day to bring two turtle-doves or two young pigeons to the priest for a sin-offering and burnt-offering. He then hallowed his head, offered a lamb of the first year as a trespass-offering, and renewed his vow as at first. There is nothing whatever said in the O. T. of the duration of the period of the vow of the Nazarite of days. According to the Mishna the usual time was thirty days, but double vows for sixty days, and treble vows for a hundred days were sometimes made. Some other particulars given in the Mishna are curious as showing how the institution was regarded in later times.—II. Of the Nazarites for life three are mentioned in the Scriptures: SAMSON, SAMUEL, and JOHN THE BAPTIST. The only one of these actually called a Nazarite is Samson. We are but imperfectly informed of the difference between the observances of the Nazarite for life and those of the Nazarite for days. The later Rabbis slightly notice this point. We do not know whether the vow for life was ever voluntarily taken by the individual. In all the cases mentioned in the sacred history, it was made by the parents before the birth of the Nazarite himself. The Mishna makes a distinction between the ordinary Nazarite for life and the Samson-Nazarite.—III. The consecration of the Nazarite bore a striking resemblance to that of the high-priest (Lev. xxi. 10-12). In one particular, this is brought out more plainly in the Hebrew text than it is in our version, in the LXX., or in the Vulgate. One word (*nēzer*), derived from the same root as *Nazarite*, is used for the long hair of the Nazarite (Num. vi. 19), where the A. V. has "hair of his separation," and for the anointed head of the high-priest (Lev. xxi. 12), where it is rendered "crown." Perhaps the half sacerdotal character of Samuel might have been connected with his prerogative as a Nazarite.—IV. Of the two vows recorded of St. PAUL, that in Acts xviii. 18 certainly cannot be regarded as a regular Nazarite vow (so Mr. Clark, with Conybeare & Howson, and Prof. Murphy [in Fairbairn]; but Dr. Ginsburg [in Kitto] regards it as a regular Nazarite vow). All that we are told of it is that, on his way from Corinth to Jerusalem, he "shaved his head in Cenchrea, for he had a vow." Probably it was a sort of vow, modified from the proper Nazarite vow, which had come into use at this time amongst the religious Jews who had been visited by sickness, or any other calamity. The other reference to a vow taken by St. Paul is in Acts xxi. 24, where we find the brethren at Jerusalem exhorting him to take part with four Christians who had a vow on them, to sanctify (not "purify," as in A. V.) himself with them, and to be at charges with them, that they might shave their heads. It cannot be doubted that this was a strictly legal Nazarite vow.—V. That the institution of Naziritism existed and had become a matter of course among the Hebrews before the time of Moses, is beyond a doubt. The legislator appears to have done no more than ordain such regulations for the vow of the Nazarite of days as brought it under the cognizance of the priest, and into harmony with the general system of religious observance. Probably the consecration of the Nazarite for life was of at least equal antiquity. But it is

doubted in regard to Naziritism in general, whether it was of native or foreign origin. Ewald supposes that Nazarites for life were numerous in very early times, and that they multiplied in periods of great political and religious excitement. The only ones, however, expressly named in the O. T. are Samson and Samuel. When Amos wrote, the Nazarites, as well as the prophets, suffered from the persecution and contempt of the ungodly (Am. ii. 11, 12). In the time of Judas Maccabeus we find the devout Jews, when they were bringing their gifts to the priests, stirring up the Nazarites of days who had completed the time of their consecration to make the accustomed offerings (1 Mc. iii. 49). From this incident we may infer that the number of Nazarites must have been very considerable during the two and a half centuries before the destruction of Jerusalem.—VI. The word *nāzir* occurs in three passages of the O. T., in which it appears to mean one separated from others as a prince. Two of them refer to Joseph; one in Jacob's benediction of his sons (A. V. "separate," Gen. xlix. 26), the other in Moses' benediction of the tribes (A. V. "separated," Deut. xxxiii. 16). The third passage is in the prophet's mourning over the departed prosperity and beauty of Zion (A. V. [with the LXX., Vulgate, Henderson, &c.] "Nazarites," Lam. iv. 7, 8). In the A. V. the words are, "Her Nazarites were purer than snow," &c. But Gesenius, De Wette, Fürst, &c., think that it refers to the young princes of Israel.—VII. The vow of the Nazarite of days must have been a self-imposed discipline, undertaken with a specific purpose. The Jewish writers mostly regarded it as a kind of penance. The Nazarite of days might have fulfilled his vow without attracting much notice; but the Nazarite for life, on the other hand, must have been, with his flowing hair and persistent refusal of strong drink, a marked man. Whether in any other particular his daily life was peculiar is uncertain. But without our resting on any thing that may be called in question, he must have been a public witness for the idea of legal strictness and of whatever else Naziritism was intended to express. The meaning of the Nazarite vow has been regarded in different lights. Some consider it as a symbolical expression of the Divine nature working in man, and deny that it involved any thing of a strictly ascetic character; others see in it the principle of stoicism, and imagine that it was intended to cultivate, and bear witness for, the sovereignty of the will over the lower tendencies of human nature; while some regard it wholly in the light of a sacrifice of the person to God. Several of the Jewish writers have taken the first view more or less completely. But the philosophical Jewish doctors, for the most part, seem to have preferred the second. Philo has taken the deeper view of the subject. Ewald, following in the same line of thought, has treated the vow of the Nazarite as an act of self-sacrifice. That it was essentially a sacrifice of the person to the Lord is obviously in accordance with the terms of the Law (Num. vi. 2; so Mr. Clark; see below). As the Nazarite was a witness for the strictness of the Law, as distinguished from the freedom of the Gospel, his sacrifice of himself was a submission to the letter of a rule. Its outward manifestations were restraints and eccentricities. The man was separated from his brethren that he might be peculiarly devoted to the Lord. This was consistent with the purpose of Divine wisdom for the time for which it was ordained. Prof. Murphy (in Fairbairn) says: "The idea of sacrifice

proper does not seem to be imaged forth by any part of the Nazarite vow. This rather symbolizes separation from sin and consecration to God as the two sides of the same act." Dr. Ginsburg (in Kitto) considers Naziritism "a consecration to the Lord in the highest sense, and after the loftiest model of priestly piety."

**Ne'ah** (Heb. *motion*, perhaps *earthquake*, Ges.; *settlement*, Fii.), a place on the boundary of Zebulun (Josh. xix. 13 only). Porter (in Kitto) suggests that 'Ain, the name of a little village three miles N. W. of Nazareth, may be a corruption of Neah and occupy its position.

**Ne-ap'o-lis** (Gr. *new city*). 1. The place in Northern Greece where Paul and his associates first landed in Europe (Acts xvi. 11); where, no doubt, he landed also on his second visit to Macedonia (xx. 1), and whence certainly he embarked on his last journey through that province to Troas and Jerusalem (xx. 6). Philippi being an inland town, Neapolis was evidently the port. It has been made a question whether this harbor occupied the site of the present *Kavalla*, a Turkish commercial town on the coast of *Roumelia*, or should be sought at some other place. Cousinéry and Tafel maintain, against the common opinion, that Luke's Neapolis was not at *Kavalla*, which has a population of 5,000 or 6,000, but at a deserted harbor ten or twelve miles further W., known as *Eski* (or Old) *Kavalla*. Prof. Hackett, the original author of this article, urges the following reasons to prove that *Kavalla* should be regarded as the ancient Neapolis. (1.) The Roman and Greek ruins at *Kavalla* prove that a port existed there in ancient times. Neapolis, wherever it was, formed the point of contact between Northern Greece and Asia Minor, at a period of great commercial activity, and would be expected to have left vestiges of its former importance. The antiquities (ancient aqueducts, columns, &c.) found still at *Kavalla* fulfil entirely that presumption. On the contrary, no ruins which are unmistakably ancient have been found at *Eski Kavalla* (also called *Paleopolis*). No remains of walls, no inscriptions, and no indications of any thoroughfare leading thence to Philippi, are reported to exist there. (2.) The advantages of the position render *Kavalla* the probable site of Neapolis. It is the first convenient harbor S. of the Hellespont, on coming from the E. It lies open somewhat to the S. and S. W., but is otherwise well sheltered. (3.) The facility of intercourse between this port and Philippi shows that *Kavalla* = Neapolis. The distance is ten miles, and hence not greater than Corinth was from Cenchrea, and Ostia from Rome. The distance between Philippi and *Eski Kavalla* must be nearly twice as great. (4.) The notices of the ancient writers lead us to adopt the same view. Thus Dio Cassius says that Neapolis was opposite Thasos, and that is the situation of *Kavalla*. (5.) The ancient Itineraries support entirely the identification in question. Both the Itinerary of Antoninus and the Itinerary of Jerusalem show that the Egnatian Way passed through Philippi. They mention Philippi and Neapolis as next to each other in the order of succession; and since the line of travel which these Itineraries sketch led from the W. to Byzantium, or Constantinople, it is reasonable to suppose that the road, after leaving Philippi, would pursue the most convenient and direct course to the E. which the nature of the country allows. If the road, therefore, was constructed on this obvious principle, it would follow the track of the present Turkish road, and the

next station, consequently, would be Neapolis, or *Kavalla*, on the coast, at the termination of the only natural defile across the intervening mountains. Neapolis, therefore, like the present *Kavalla*, was on a high rocky promontory which juts out into the *Ægean*. The harbor, a mile and a half wide at the entrance, and half a mile broad, lies on the western side.—2. The Greek name of *SHECHEM*, now *Nábulus* (not in the Scriptures).

**Ne-a-ri'ah** (fr. Heb. = *servant of Jehovah*, Ges.). 1. One of the six sons of Shemaiah in the line of the royal family of Judah after the Captivity (1 Chr. iii. 22, 23).—2. A son of Ishi, and a captain of the 500 Simeonites who, in the days of Hezekiah, drove out the Amalekites from Mount Seir (iv. 42).

**Ne'bal**, or **Neb'a-l** (fr. Heb. = *fruit-bearer*? Ges.; either the *marrowy*, having the vigor of life, or projecting, Fū.), one of the "chief of the people" who sealed the covenant with Nehemiah (Neh. x. 19).

**Ne-bal'oth** [-ba'yoth], **Ne-ba'joth** (both fr. Heb. *Nebáyôth* = *heights*, Ges.), the "first-born of Ishmael" (Gen. xxv. 13; 1 Chr. i. 29), and father of a pastoral tribe named after him, the "rams of Nebaioth" being mentioned by Isaiah (lx. 7) with the flocks of Kedar. From the days of Jerome this people had been identified with the Nabatheans, until M. Quatremère first investigated the origin of the latter, their language, religion, and history. From the works of Arab authors, M. Quatremère proved the existence of a nation called *Nabat*, or *Nabeet*, pl. *Anbât*, reputed to be of ancient origin, of whom scattered remnants existed in Arab times, after the Hegira. The *Nabat*, in the days of their early prosperity, inhabited the country chiefly between the Euphrates and the Tigris, Beyn en-Nah-reyn and El-Irák (the Mesopotamia and Chaldeia of the classics). That this was their chief seat, and that they were Arameans, or more accurately Syro-Chaldeans, seems, in the present state of the inquiry, to be a safe conclusion. The Arabs loosely apply the name *Nabat* to the Syrians, or especially the Eastern Syrians, to the Syro-Chaldeans, &c. Quatremère introduced to the notice of the learned world the most important relic of that people's literature, a treatise on *Nabat* agriculture. A study of an imperfect copy of that work induced him to date it about the time of Nebuchadnezzar, or about B. C. 600. M. Chwolson, professor of Oriental languages at St. Petersburg, has since made that book a subject of special study; and in his *Remains of Ancient Babylonian Literature in Arabic Translations*, 1859, he has published the results of his inquiry. Those results, while they establish all M. Quatremère had advanced respecting the existence of the *Nabat*, go far beyond him both in the antiquity and the importance M. Chwolson claims for that people. But Ewald, in 1857 and 1859, stated some grave causes for doubting this antiquity. M. Rénan followed on the same side (1860), and more recently Alfred von Gutschmid has attacked the whole theory. The remains of the literature of the *Nabat* consist of four works, one of them a fragment: the "Book of *Nabat* Agriculture" (already mentioned); the "Book of Poisons;" the "Book of Tenkelooshá the Babylonian;" and the "Book of the Secrets of the Sun and Moon." They purport to have been translated in the year 904, by Aboo-Bekr Ahmad Ibn-'Alee the Chaldean of Kissen, better known as *Ibn-Wahsheeyeh*. The "Book of *Nabat* Agriculture" was, according to the Arab translator, commenced by Daghreeth, continued by Yānushádh,

and completed by Kuthāme. Chwolson, disregarding the dates assigned to these authors by the translator, thinks that the earliest lived some 2,500 years B. C., the second some 300 or 400 years later, and Kuthāme, to whom he ascribes the chief authorship (*Ibn-Wahsheeyeh* says he was little more than editor), at the earliest under the sixth king of a Canaanite dynasty mentioned in the book, which dynasty Chwolson—with Bunsen—makes the same as the fifth (or Arabian) dynasty of Berosus, or of the thirteenth century B. C. But in examining the work we encounter formidable intrinsic difficulties. It contains mentions of personages bearing names closely resembling those of Adam, Seth, Enoch, Noah, Shem, Nimrod, and Abraham; and M. Chwolson himself is forced to confess that the particulars related of them are in some respects similar to those recorded of the Biblical patriarchs. If this difficulty proves insurmountable, it shows that the author borrowed from the Bible, or from late Jews, and destroys the claim of an extreme antiquity. Other apparent evidences of the same kind are the occurrence of the names of Greek divinities, the mention of the Greeks as neighbors to the Canaanites, the mention of Bertaniya (= Britannia, or Britain), and other anachronisms, &c. It is even a question whether the work should not be dated several centuries after the commencement of our era. Thus, if M. Chwolson's results are accepted, the Book of *Nabat* Agriculture exhibits to us an ancient civilization before that of the Greeks, and at least as old as that of the Egyptians, of a great and powerful nation of remote antiquity. But until the original text of Kuthāme's treatise is published, we must withhold our acceptance of facts so startling, and regard the antiquity ascribed to it even by Quatremère as extremely doubtful (so Mr. E. S. Poole, original author of this article). There is little doubt that the "Book of *Nabat* Agriculture," &c., were forgeries of the pretended translator (see an article by Prof. Hadley in the *New Englander*, xxi. 505 ff.).—It remains for us to state the grounds for connecting the *Nabat* with the Nabatheans. As the Arabs speak of the *Nabat* as Syrians, so conversely the Greeks and Romans knew the Nabatheans as Arabs. The Nabatheans bordered the well-known Egyptian and Syrian provinces. The nation was famous for its wealth and commerce. Even when, by the decline of its trade, diverted through Egypt, its prosperity waned, Petra is still mentioned as a centre of the trade both of the Sabeans of Southern Arabia and the Gerrheans on the Persian Gulf. Josephus speaks of Nabatea as embracing the country from the Euphrates to the Red Sea—i. e. Arabia Petrea and all the desert E. of it. The *Nabat* of the Arabs, however, are described as famed for agriculture and science; in these respects contrasting with the Nabatheans of Petra who were dwellers in tents. Mr. Poole agrees with M. Quatremère that the civilization of the Nabatheans of Petra is not easily explained, except by supposing them to be a different people from those Arabs. A remarkable confirmation of this supposition is found in the character of the buildings of Petra, which are unlike any thing constructed by a purely Shemitic race. (E.OW; SELA.) Further, the subjects of the literature of the *Nabat*, which are scientific and industrial, are not such as are found in the writings of pure Shemites or Aryans. From most of these and other considerations we think there is no reasonable doubt that the Nabatheans of Arabia Petrea were the same people as the *Nabat* of Chaldeia, though at

what ancient epoch the western settlement was formed remains unknown. The Nabatheans were allies of the Jews after the Captivity; and Judas the Maccabee, with Jonathan, while at war with the Edomites, came on them three days S. of Jordan (1 Mc. v. 3, 24, &c.), and afterward "Jonathan had sent his brother John, a captain of the people, to pray his friends the Nabathites that they might leave with them their carriage, which was much" (ix. 35, 36). Diodorus Siculus and Strabo give much information regarding them. Lastly, did the Nabatheans, or *Nabat*, derive their name, and were they in part descended, from Nebaioth, son of Ishmael? Josephus says that Nabatea was inhabited by the twelve sons of Ishmael. The Arabs call Nebaioth *Nabith*, and do not connect him with the *Nabat*, to whom they give a different descent. But we hesitate to deny a relationship between peoples, whose names are strikingly similar, dwelling in the same tract. It is possible that Nebaioth went to the far east, to the country of his grandfather Abraham, intermarried with the Chaldeans, and gave birth to a mixed race, the *Nabat*. It is, however, safest to leave unsettled the identification of Nebaioth and *Nabat* until another link be added to the chain that at present seems to connect them (so Mr. Poole).

**Ne-bal-lat** (Heb. *secretly foolish*? Ges.; *hard, firm soil*, Fii.), a town of Benjamin, which the Benjamites reoccupied after the Captivity (Neh. xi. 34); named with ZEBOIM, LOD, and ONO. Lod is Lydda, the modern *Ludd*, and Ono possibly *Kefr 'Auna*, four miles N. of it. E. of these, and forming nearly an equilateral triangle with them, is *Beit Nebala*, which may be (so Mr. Grove, with Robinson, Wilson, Porter [in Kitto]) the representative of the ancient village. Another place of very nearly the same name, *Bir Nebala*, lies also in Benjamin, to the E. of *el-Jib* (Gibeon), and within half a mile of it.

**Ne'bat** (Heb. *look*, Ges.), father of JEROBOAM I., whose name is only preserved in connection with that of his distinguished son (1 K. xi. 26, xii. 2, 15, &c.). He is described as an Ephrathite, or Ephraimite, of Zereda. A Jewish tradition identifies him with the Benjamite Shimei of Gera.

**Ne'bo** (Heb., perhaps so named from the worship of *Mercury* [see NEBO, second article below], or better = *height*, Ges.), **Mount**, the mountain from which Moses took his first and last view of the Promised Land (Deut. xxxii. 49, xxxiv. 1). It is minutely described as in the land of Moab, facing Jericho, the head or summit of a mountain called the *PISGAH*, which again seems to have formed a portion of the general range of the "mountains of *ABARIM*." Its position is further denoted by the mention of the valley (or perhaps more correctly, the ravine) in which Moses was buried, and which was apparently one of the clefts of the mount itself (xxxii. 50)—"the ravine in the land of Moab facing Beth-peor" (xxxiv. 6). Seetzen suggested the *Jebel 'Attariis* (between the *Wady Zerka Ma'in* and the Arnon, three miles below the former, and ten or twelve S. of Heshbon) as the Nebo of Moses. The *Jebel 'Osha*, or *Ausha*, or *Jebel el-Jifad*, near *es-Salt*, about fifteen miles further N. than Jericho, is the highest point in all the eastern mountains. But these eminences are not, like the Nebo of the Scripture, "facing Jericho." Tristram (535 ff.) would identify Nebo with a mountain "brow," probably 4,500 feet high, about three miles S. W. from Heshbon, from the summit of which he enjoyed a magnificent view of the country both E. of the Jordan to Hermon and the *Hauran*, and W. of it from the

S. end of the Dead Sea with Hebron and central Judea and the plain of Esdraelon to the Mediterranean beyond Carmel. See No. 1 below.

**Ne'bo** (see above). 1. A town on the eastern side of Jordan, in the pastoral country (Num. xxxii. 3), one of those rebuilt by the tribe of Reuben (ver. 38). In these lists it is associated with Kirjathaim and Baal-meon or Beon; and in another record (1 Chr. v. 8) with Aroer. In Is. xv. 2 and Jer. xlviii. 1, 22, Nebo is mentioned in the same connection as before, but in the hands of Moab. The notices of Eusebius and Jerome are confused, but at least denote that Mount Nebo (see the article above) and the town were distinct, and distant from each other. The town they identify with Nobah or Kenath, and place it eight miles S. of Heshbon, where the ruins of *el-Habis* appear to stand at present.—2. The children of Nebo returned from Babylon with Zerubabel (Ezr. ii. 29; Neh. vii. 33). Seven of them had foreign wives, whom they were compelled to discard (Ezr. x. 43). The name occurs between Bethel and Ai, and Lydda, which implies that it was in Benjamin to the N. W. of Jerusalem. This is possibly the modern *Beit Nubah*, about twelve miles N. W. by W. of Jerusalem, eight from Lydda.

**Ne'bo** (Heb. = *interpreter of the gods*, Ges.; *the invisible*, Fii.; see below), which occurs in Is. xlv. 1 and Jer. xlviii. 1 as the name of a Chaldean god, was the god of learning and letters among the Baby-

Nebo.—Assyrian Statue in British Museum.—(Thos.)

lonians and Assyrians. The original native name was, in Hamitic Babylonian, *Nabû*, in Semitic Babylonian and Assyrian, *Nabu* (so Rawlinson). His general character corresponds to that of the Egyptian Thoth, the Greek Hermes, and the Latin MERCURY. Astronomically he is identified with the planet nearest the sun, called Nebo also by the Medæans, and *Tir* by the ancient Persians. Nebo was

of Babylonian rather than of Assyrian origin. In the early Assyrian Pantheon he occupies a very inferior position. The king supposed to be Pul first brings him prominently forward in Assyria. A statue of Nebo, set up by this monarch at Calah (*Nimrūd*), is now in the British Museum. In Babylonia Nebo held a prominent place from an early time. Borsippa was especially under his protection, and the great temple there (the modern *Birs-Nimrūd*; see BABEL, TOWER OF) was dedicated to him from a very remote age. He was the tutelary god of the most important Babylonian kings, in whose names the word *Nabu*, or Nebo, appears as an element.

**Neb-u-chad-nez'zar**, or **Neb-u-chad-rez'zar** (both Heb. fr. Chal.; see below), the greatest and most powerful of the Babylonian kings. (BABEL.) His name, according to the native orthography, is read as *Nabu-kuduri-uzur* = *Nebo is the protector against misfortune* (so Rawlinson). Nebuchadnezzar was the son and successor of Nabopolassar, the founder of the Babylonian empire. He appears to have been of marriageable age at the time of his father's rebellion against Assyria, B. C. 625; for, according to Abydenus, the alliance between Nabopolassar and the Median king was cemented by the betrothal of Amuhia, daughter of the latter, to Nebuchadnezzar. It is suspected, rather than proved, that he was the leader of a Babylonian contingent which accompanied Cyaxares (MEDES) in his Lydian war, by whose interposition, on the occasion of an eclipse, that war was brought to a close, B. C. 610. At any rate, a few years later, he was placed at the head of a Babylonian army, and sent by his father, who was now old and infirm, to chastise the insolence of PHARAOH-NECHO, king of Egypt. Nebuchadnezzar (B. C. 605) led an army against him, defeated him at CARCHEMISH in a great battle (Jer. xli. 2-12), recovered Celo-syria, Phenicia, and Palestine, took JERUSALEM (Dan. i. 1, 2; CAPTIVITY), pressed forward to Egypt, and was engaged in that country or upon its borders when intelligence arrived that Nabopolassar, after reigning twenty-one years, had died. There is no reason (so Rawlinson) to think that Nebuchadnezzar, though he appeared to be "king of Babylon" to the Jews, had really been associated with his father as king. In some alarm about the succession he hurried back to the capital, accompanied only by his light troops; and crossing the desert, probably by way of Tadmor or Palmyra, reached Babylon before any disturbance had arisen, and entered peaceably on his kingdom (B. C. 604). The bulk of the army with the captives—Phenicians, Syrians, Egyptians, and Jews (DANIEL 4; SHADRACH, &c.)—returned by the ordinary route, which skirted instead of crossing the desert. Within three years of Nebuchadnezzar's first expedition into Syria and Palestine, disaffection again showed itself in those countries. JEHOIAKIM, who, although threatened at first with captivity (2 Chr. xxxvi. 6), had been finally maintained on the throne as a Babylonian vassal, after three years of service "turned and rebelled," probably trusting to be supported by Egypt (2 K. xxiv. 1). Not long afterward Phenicia seems to have broken into revolt; and the Chaldean monarch, who had previously endeavored to subdue the disaffected by his generals (ver. 2), once more took the field in person, and marched first of all against TYRE. Having invested that city in the seventh year of his reign (Jos. Ap. i. 21), and left a portion of his army there to continue the siege, he proceeded against Jerusalem, which submitted with-

out a struggle. According to Josephus (x. 6, § 8; compare Jer. xxii. 18, 19, and xxxvi. 30) Nebuchadnezzar punished Jehoiakim with death, but placed his son JEHOIACHIN upon the throne. Jehoiachin reigned only three months; for, on his showing symptoms of disaffection, Nebuchadnezzar came up against Jerusalem for the third time, deposed the young prince (whom he carried to Babylon, with a large portion of the population of the city, and the chief of the Temple treasures), and made his uncle, ZEDEKIAH, king in his room. Tyre still held out; and it was not till the thirteenth year from its first investment that the city of merchants fell (B. C. 585). Ere this happened, Jerusalem had been totally destroyed. This consummation was owing to the folly of Zedekiah, who, despite the warnings of Jeremiah, made a treaty with Apries (Hophra), king of Egypt (Ez. xvii. 15), and on the strength of this alliance renounced his allegiance to the king of Babylon. Nebuchadnezzar commenced the final siege of Jerusalem in the ninth year of Zedekiah—his own seventeenth year (B. C. 588)—and took it two years later (B. C. 586). One effort to carry out the treaty seems to have been made by Apries. An Egyptian army crossed the frontier, and began its march toward Jerusalem; upon which Nebuchadnezzar raised the siege, and set off to meet the new foe. According to Josephus (x. 7, § 3) a battle was fought, in which Apries was completely defeated; but the Scriptural account seems rather to imply that the Egyptians retired on the advance of Nebuchadnezzar, and recrossed the frontier without risking an engagement (Jer. xxxvii. 5-8). After an eighteen months' siege, Jerusalem fell. Zedekiah escaped from the city, but was captured near Jericho (xxxix. 5) and brought to Nebuchadnezzar at RIBLAH, where his eyes were put out by the king's order, while his sons and his chief nobles were slain. Nebuchadnezzar then returned to Babylon with Zedekiah, whom he imprisoned for the remainder of his life; leaving NEBUZAR-ADAN, the captain of his guard, to complete the destruction of the city and the pacification of Judea. GEDALIAH, a Jew, was appointed governor, but he was soon murdered, and the rest of the Jews either fled to Egypt, or were carried by Nebuzar-adan to Babylon. The military successes of Nebuchadnezzar cannot be traced minutely beyond this point. It may be gathered, from the prophetic Scriptures and from Josephus, that the conquest of Jerusalem was rapidly followed by the fall of Tyre and the complete submission of Phenicia (Ez. xxvi.-xxviii.; Jos. Ap. i. 21); after which the Babylonians carried their arms into Egypt, and inflicted severe injuries on that fertile country (Jer. xli. 13-26; Ez. xxix. 2-20; Jos. x. 9, § 7). But we have no account, on which we can depend, of these campaigns. We are told by Berosus (in Jos. x. 11, § 1) that the first care of Nebuchadnezzar, on obtaining quiet possession of his kingdom, after the first Syrian expedition, was to rebuild the temple of Bel (*Bel-Merodach*) at Babylon out of the spoils of the Syrian war. He next proceeded to strengthen and beautify the city, which he renovated throughout, and surrounded with several lines of fortification, himself adding one entirely new quarter. Having finished the walls and adorned the gates magnificently, he constructed a new palace. In the grounds of this palace he formed the celebrated "hanging garden." This complete renovation of Babylon by Nebuchadnezzar, which Berosus asserts, is confirmed to us in every possible way (Dan. iv. 30). (BABEL.) But Nebuchadnezzar

did not confine his efforts to the ornamentation and improvement of his capital. Throughout the empire, at Borsippa, Sippara, Cutha, Chilmad, Duraba, Teredon, &c., &c., he built or rebuilt cities, repaired temples, constructed quays, reservoirs, canals, and aqueducts, on a scale of grandeur and magnificence surpassing every thing of the kind recorded in history, unless it be the constructions of one or two of the greatest Egyptian monarchs. (CHALDEA.) The wealth, greatness, and general prosperity of Nebuchadnezzar are strikingly placed before us in Dan. ii. 37, iii. 1 ff., iv. 10-12, &c. Toward the close of his reign the glory of Nebuchadnezzar suffered a temporary eclipse. For his pride and vanity, that strange madness was sent upon him called lycanthropy (from Gr., *wolf-man*), wherein the sufferer imagines himself a beast, and quitting the haunts of men, insists on leading the life of a beast (Dan. iv. 33). (MEDICINE.) Nebuchadnezzar himself in his Standard Inscription appears to allude to it, although in a studied ambiguity of phrase which renders the passage very difficult of translation. After describing the construction of the most important of his great works, he appears to say—"For four years (?) . . . the seat of my kingdom . . . did not rejoice my heart. In all my dominions I did not build a high place of power, the precious treasures of my kingdom I did not lay up. In Babylon, buildings for myself and for the honor of my kingdom I did not lay out. In the worship of MERODACH, my lord, the joy of my heart, in Babylon the city of his sovereignty, and the seat of my empire, I did not sing his praises, I did not furnish his altars with victims, nor did I clear out the canals" (Rln. *Hdl.* ii. 586). It has often been remarked that Herodotus ascribes to a queen, Nitocris, several of the important works, which other writers (Berosus, Abydenus) assign to Nebuchadnezzar. The conjecture naturally arises that Nitocris was Nebuchadnezzar's queen, and that, as she carried on his constructions during his incapacity, they were by some considered to be hers. After an interval of four, or perhaps seven years (Dan. iv. 16), Nebuchadnezzar's malady left him. As we are told in Scripture that "his reason returned, and for the glory of his kingdom his honor and brightness returned;" and he "was established in his kingdom, and excellent majesty was added to him" (iv. 36), so we find in the Standard Inscription that he resumed his great works after a period of suspension, and added fresh "wonders" in his old age to the marvellous constructions of his manhood. He died B. C. 561, at an advanced age (eighty-three or eighty-four), having reigned forty-three years. A son, EVIL-MERODACH, succeeded him. Nebuchadnezzar had grave faults (pride, cruelty, &c.) as well as genius and grandeur. We observe in the cuneiform inscriptions as peculiar to Nebuchadnezzar a disposition to rest his fame on his great works rather than on his military achievements, and a strong religious spirit, manifesting itself especially in a devotion, which is almost exclusive, to one particular god. MERODACH was to him "the supreme chief of the gods," "the most ancient," "the king of the heavens and the earth." It was *his* image or symbol, undoubtedly, which was "set up" to be worshipped in the "plain of DURA" (Dan. iii. 1), and *his* house in which the sacred vessels of the Temple were treasured (i. 2). Nebuchadnezzar seems at some times to have identified this, his supreme god, with the God of the Jews (iv.); at others, to have regarded the Jewish God as one of the local and inferior deities (iii.) over whom Merodach ruled.

\* **Neb-u-chad-rez-zar** = NEBUCHADNEZZAR (Jer. xxi. 2, 7, &c.).

**Neb-u-shas-ban** (Heb. *adherent* of NEBO or *Mercury*, Ges., Fii.), one of the officers of Nebuchadnezzar at the time of the capture of Jerusalem. He was RAB-SARIS, i. e. chief of the eunuchs (Jer. xxxix. 13). He and NEBUZAR-ADAN (chief of the body-guard), and NERGAL-SHAREZER (RAB-MAG, i. e. chief of the magicians), the most important officers then present, were probably the highest dignitaries of the Babylonian court. Nebushasban's office and title were the same as those of Ashpenaz (Dan. i. 3), whom he probably succeeded.

**Neb-u-zar-a-dan** (Heb. *chief* whom NEBO [or *Mercury*] favors, Ges.; *chief cutter-off* by Nebo, Fii.), the chief of the slaughterers (A. V. "captain of the guard;" see GUARD 1), a high officer in the court of Nebuchadnezzar, apparently the next to the person of the monarch. He appears not to have been present during the siege of Jerusalem; probably he was occupied at the more important operations at Tyre, but as soon as the city was actually in the hands of the Babylonians he arrived, and from that moment every thing was completely directed by him (2 K. xxv. 8 ff.). One act only is referred directly to Nebuchadnezzar, the appointment of the governor or superintendent of the conquered district. All this Nebuzar-adan seems to have carried out with wisdom and moderation. His conduct to Jeremiah, to whom his attention had been directed by his master (Jer. xxxix. 11), is marked by even higher qualities than these, and the prophet has preserved (xl. 2-5) Nebuzar-adan's speech on liberating him from his chains at Ramah, which contains expressions truly remarkable in a heathen. He seems to have left Judea for this time when he took down the chief people of Jerusalem to his master at Riblah (2 K. xxv. 18-20). In four years he again appeared. Nebuchadnezzar in his twenty-third year made a descent on the regions E. of the Jordan, including the Ammonites and Moabites, who escaped when Jerusalem was destroyed. Thence he proceeded to Egypt, and, either on the way thither or on the return, Nebuzar-adan again passed through the country and carried off 745 more captives (Jer. liii. 30).

**Ne'cho** [-ko] (Heb. fr. Egyptian) = PHARAOH-NECHO (2 Chr. xxxv. 20, 22, xxxvi. 4). PHARAOH 9.

\* **Neck** (Heb. usually *'drep* or *tsavdr*; Gr. *trachēlos*) is used both literally (Gen. xxvii. 16; Lev. v. 8; Lk. xv. 20, &c.) and figuratively in the Scriptures. To put the feet on the neck of the conquered denoted complete victory and triumph (Josh. x. 24) (FOOT; WAR). To have the hand in or on an enemy's neck (Gen. xlix. 8), or to take one by the neck (Job xvi. 12), was to seize and secure him. Burdens, yokes, &c., are borne on the neck (Gen. xxvii. 40; Deut. xxviii. 48, &c.); hence to stiffen the neck (2 Chr. xxxvi. 13), or to be stiff-necked = to be stubborn, obstinate, or rebellious. NECKLACE; YOKEL.

\* **Necklace**. CHAIN; ORNAMENTS, PERSONAL; TABLETS.

**Ne-co-dan** (fr. Gr. form) = NEKODA (1 Esd. v. 37; comp. Ezr. ii. 60).

\* **Nec-re-man-zer** (Deut. xviii. 11). DIVINATION; MAGIC.

**Ned-a-bi'ah** (fr. Heb. = whom *Jehovah impels*, Ges.), apparently a son of Jeconiah, or Jehoiahin, king of Judah (1 Chr. iii. 18). Lord A. C. Hervey, however, contends that this list contains the order of succession and not of lineal descent, and that Nedabiah and his brothers were sons of NERI.

\* **Ner'dle-work** [-dl-wurk]. EMBROIDERER.

**Ne-e-mi'as** (Gr. form) = NEHEMIAH, the son of Hachaliah (Ecclus. xlix. 18; 2 Mc. i. 18, 20, 21, 23, 31, 36, ii. 13).

\* **Ne'geb**, a Hebrew word translated "the South," "the South Country." JUDAH.

**Neg'l-nah** (Heb., the text now has *nēginath*; see below) occurs in the title of Ps. lxi., "to the chief musician upon Neginath." The LXX. and Vulgate evidently read "NĒGINOTH" in the plural, which is perhaps the true reading. Whether the word be singular or plural, it is the general term by which all stringed-instruments are described. The Heb. singular has the derived sense of a song sung to the accompaniment of a stringed-instrument, and generally of a taunting character (A. V. "song;" Job xxx. 9; Ps. lxix. 12; Lam. iii. 14). POETRY, HE-BREW.

**Neg'l-noth** (Heb. *nēginōth*, pl. of *nēginah*; see above and below). This word is found in the titles of Ps. iv., vi., liv., lv., lxxvii., lxxvii., and the margin of Hab. iii. 19 (A. V. text "stringed-instruments"), and there seems but little doubt that it is the general term denoting all stringed-instruments whatsoever, whether played with the hand, like the harp and guitar, or with a plectrum. "The chief musician on *Neginoth*" was therefore the conductor of that portion of the Temple-choir who played upon the stringed-instruments, and who are mentioned in Ps. lxxviii. 25. MUSIC; MUSICAL INSTRUMENTS.

**Ne-he-lam-ite** (fr. Heb.; probably = *descendant of Nehelam* [i. e. a strong one, Fū., Ges., Fū.], the, the designation of Shemaiah, a false prophet, who went with the Captivity to Babylon (Jer. xix. 24, 31, 32).

**Ne-he-mi'ah** (fr. Heb. = whom *Jehovah comforts*, Ges.). 1. Son of Hachaliah, and apparently of the tribe of Judah, since his fathers were buried at Jerusalem, and Hanani his kinsman seems to have been of that tribe (Neh. i. 2, ii. 3, vii. 2). All that we know certainly concerning this eminent man is contained in the book which bears his name. (NEHEMIAH, BOOK OF.) His autobiography first finds him at Shushan, the winter residence of the kings of Persia, in high office as the cupbearer of King Artaxerxes Longimanus (so Lord A. C. Hervey, original author of this article; see ARTAXERXES 2). In the twentieth year of the king's reign, i. e. B. C. 445, certain Jews, one of whom was a near kinsman of Nehemiah's, arrived from Judea, and gave Nehemiah a deplorable account of the state of Jerusalem, and of the residents in Judea. He immediately conceived the idea of going to Jerusalem to endeavor to better their state. After three or four months (from Chisleu to Nisan), in which he earnestly sought God's blessing by frequent prayer and fasting, an opportunity presented itself of obtaining the king's consent to his mission. Having received his appointment as governor of Judea, a troop of cavalry, and letters from the king to the different satraps through whose provinces he was to pass, as well as to Asaph, the keeper of the king's forests, to supply him with timber, he started upon his journey, being under promise to return to Persia within a given time. Nehemiah's great work was the rebuilding, for the first time since their destruction by Nebuzar-adan, the walls of Jerusalem, and restoring that city to its former state and dignity, as a fortified town. It is impossible to overestimate the importance to the future political and ecclesiastical prosperity of the Jewish nation of this great achievement of their patriotic governor. How low the community of the Palestine Jews had fallen,

is apparent from the fact that from the sixth of Darius to the seventh of Artaxerxes, there is no history of them whatever; and that they were in a state of abject "affliction and reproach" in the twentieth of Artaxerxes. The one step which could resuscitate the nation, preserve the Mosaic institutions, and lay the foundation of future independence, was the restoration of the city walls. To this great object therefore Nehemiah directed his whole energies without an hour's unnecessary delay. In a wonderfully short time the walls seemed to emerge from the heaps of burnt rubbish, and to encircle the city as of old. The gateways also were rebuilt, and ready for the doors to be hung upon them. But it soon became apparent how wisely Nehemiah had acted in hastening on the work. On his very first arrival, as governor, Sanballat and Tobiah had given unequivocal proof of their mortification at his appointment. But when the restoration was seen to be rapidly progressing, their indignation knew no bounds. They not only poured out a torrent of abuse and contempt on all engaged in the work, but actually made a great conspiracy to fall upon the builders with an armed force and put a stop to the undertaking. The project was defeated by the vigilance and prudence of Nehemiah, who maintained an armed attitude from that day forward. Various stratagems were then employed to get Nehemiah away from Jerusalem, and if possible to take his life. But that which most nearly succeeded was the attempt to bring him into suspicion with the king of Persia, as if he intended to set himself up as an independent king, as soon as the walls were completed, and also to frighten the Jews by the accusation of rebellion, &c. The artful letter of Sanballat so far wrought upon Artaxerxes, that he issued a decree stopping the work till further orders. Probably at the same time he recalled Nehemiah, or perhaps Nehemiah's leave of absence had previously expired; in either case had the TIRSHATHA been less upright and less wise, and had he fallen into the trap laid for him, his life might have been in great danger. The sequel, however, shows that his perfect integrity was apparent to the king. For after a delay, perhaps of several years, he was permitted to return to Jerusalem, and to crown his work by repairing the Temple, and dedicating the walls. Owing to his wise haste and steadfast perseverance, the designs of his enemies were frustrated. The walls were actually finished and ready to receive the gates, before the king's decree for suspending the work arrived. Nehemiah does not indeed mention this adverse decree, which may have arrived during his absence, or give us any clue to the time of his return; nor should we have suspected his absence at all from Jerusalem, but for the incidental allusion in ch. ii. 6, xiii. 6, coupled with the long interval between the earlier and later chapters of the book. But the interval between the close of ch. vi. and the beginning of ch. vii. is the only place where we can suppose a considerable gap in time, either from the appearance of the text, or the nature of the events narrated. It seems to suit both well to suppose that Nehemiah returned to Persia, and the work stopped immediately after the events narrated in vi. 16-19, and that chapter vii. goes on to relate the measures adopted by him upon his return with fresh powers. These were, the setting up the doors in the gates of the city, giving a special charge as to opening and shutting them, and above all providing for duly peopling the city and rebuilding its many decayed houses. Then followed a census, a large

collection of funds for the repair of the Temple, the public reading of the Law by Ezra, a celebration of the Feast of Tabernacles, such as had not been seen since Joshua's time, and a no less solemn keeping of the Day of Atonement with a solemn entering into covenant with God. It may have been after another considerable interval of time, and not improbably after another absence of the Tirshatha from his government, that the next event of interest in Nehemiah's life occurred, viz. the dedication of the walls of Jerusalem, including, if we may believe 2 Mc. i., supported by several indications in Nehemiah, that of the Temple after its repair by means of the funds collected from the whole population. This great and good governor firmly repressed the exactions of the nobles, and the usury of the rich, and rescued the poor Jews from spoliation and slavery. He refused to receive his lawful allowance as governor from the people, viz. in consideration of their poverty, during the whole twelve years that he was in office, but kept at his own charge a table for 150 Jews, at which any who returned from captivity were welcome. He made most careful provision for the maintenance of the ministering priests and Levites, and for the due and constant celebration of Divine worship. He insisted upon the sanctity of the precincts of the Temple being preserved inviolable, and peremptorily ejected the powerful Tobiah from one of the chambers which Eliashib had assigned to him. He then replaced the stores and vessels which had been removed to make room for him, and appointed proper Levitical officers to superintend and distribute them. With no less firmness and impartiality he expelled from all sacred functions those of the high-priest's family who had contracted heathen marriages, and rebuked and punished those of the common people who had likewise intermarried with foreigners; and lastly, he provided for keeping holy the Sabbath day, which was shamefully profaned by many, both Jews and foreign merchants, and by his resolute conduct succeeded in repressing the lawless traffic on the day of rest. Beyond the thirty-second year of Artaxerxes, to which Nehemiah's own narrative leads us, we have no account of him whatever. Probably he returned to Persia and died there. For pure and disinterested patriotism he stands unrivalled. All he did was noble, generous, high-minded, courageous, and to the highest degree upright. To stern integrity he united great humility and kindness, and a princely hospitality. As a statesman he combined forethought, prudence, and sagacity in counsel with vigor, promptitude, and decision in action. But in nothing was he more remarkable than for his piety, and the singleness of eye with which he walked before God.—2. One of the leaders of the first expedition from Babylon to Jerusalem under Zerubbabel (Ezr. ii. 2; Neh. vii. 7).—3. Son of Azbuk, and ruler of the half "PART" of Beth-zur, who helped to repair the wall of Jerusalem (iii. 16).

**Ne-he-mi'ah** (see above), **Book of**, the latest of all the historical books of Scripture. This book, like the preceding one of Ezra, is clearly and certainly not all by the same hand. By far the principal portion, indeed, is the work of NEHEMIAH 1; but other portions are either extracts from various chronicles and registers, or supplementary narratives and reflections, some apparently by Ezra, others, perhaps, the work of the same person who inserted the latest genealogical extracts from the public chronicles (so Lord A. C. Hervey, the original author of this article; see below).—1. The main history

contained in Nehemiah covers about twelve years, viz. from the twentieth to the thirty-second year of Artaxerxes Longimanus, i. e. from B. C. 445 to 433. The whole narrative gives us a graphic and interesting account of the state of Jerusalem and the returned captives in the writer's times, and, incidentally, of the nature of the Persian government and the condition of its remote provinces. The documents appended to it also give some further information as to the times of Zerubbabel on the one hand, and as to the continuation of the genealogical registers and the succession of the high-priesthood to the close of the Persian empire on the other. The view given of the rise of two factions among the Jews—the one the strict religious party; the other, the gentileizing party, sets before us the germ of much that we meet with in a more developed state in later Jewish history. Again, in this history, as well as in Ezra, we see the bitter enmity between the Jews and Samaritans acquiring strength and definitive form on both religious and political grounds. The book also throws much light upon the domestic institutions of the Jews. Some of its details give us incidentally information of great historical importance. (a.) The account of the building and dedication of the wall, iii., xii., contains the most valuable materials for settling the topography of JERUSALEM to be found in Scripture. (b.) The list of returned captives who came under different leaders from the time of Zerubbabel to that of Nehemiah (amounting in all to only 42,860 adult males and 7,337 servants), which is given in chapter vii., conveys a faithful picture of the political weakness of the Jewish nation as compared with the times when Judah alone numbered 470,000 fighting men (1 Chr. xxi. 5). It is an important aid, too, in understanding the subsequent history and appreciating the patriotism and valor by which they attained their independence under the Maccabees. (c.) The lists of leaders, priests, Levites, and of those who signed the covenant, reveal incidentally much of the national spirit as well as of the social habits of the captives, derived from older times. Thus the fact that *twelve* leaders are named in Nehemiah vii. 7, indicates the feeling of the captives that they represented the *twelve* tribes, a feeling further evidenced in the expression, "the men of the people of Israel." The enumeration of twenty-one and twenty-two, or, if Zidkijah stands for the head of the house of Zadok, twenty-three chief priests in x. 1-8, xii. 1-7, of whom nine bear the names of those who were heads of courses in David's time (1 Chr. xxiv.), shows how, even in their wasted and reduced numbers, they struggled to preserve these ancient institutions, and also supplies the reason of the mention of these particular twenty-two or twenty-three names. But it does more than this. Taken in conjunction with the list of those who sealed (Neh. x. 1-27), it proves the existence of a social custom of calling chiefs by the name of the clan or house of which they were chiefs. (d.) Other miscellaneous information contained in this book, embraces the hereditary crafts practised by certain priestly families, e. g. the apothecaries, or makers of the sacred ointments and incense (iii. 8), and the goldsmiths, whose business it probably was to repair the sacred vessels (iii. 8); the situation of the garden of the kings of Judah by which Zedekiah escaped (2 K. xxv. 4), as seen Neh. iii. 15; statistics, &c. The only real historical difficulty in the narrative is to determine the time of the dedication of the wall, whether in the thirty-second year of Artaxerxes or

before. The expression in Neh. xiii. 1, "On that day," seems to fix the reading of the Law to the same day as the dedication (xii. 48). But if so, the dedication must have been after Nehemiah's return from Babylon (mentioned xiii. 7). Then, if the wall only took fifty-two days to complete (vi. 15), and was begun as soon as Nehemiah entered upon his government, how came the dedication to be deferred till twelve years afterward? The answer to this probably is that, in the first place, the fifty-two days are to be reckoned from the resumption of the work after iv. 15, and a time exceeding two years may have elapsed from the commencement of the building. But even then it would not be ready for dedication. There were the gates to be hung, perhaps much rubbish to be removed, and the ruined houses in the immediate vicinity of the walls to be repaired. Still even these causes would not be adequate to account for a delay of twelve years. But Nehemiah's leave of absence from the Persian court, mentioned ii. 6, may have drawn to a close shortly after the completion of the wall, and before the other above-named works were complete. And this is rendered yet more probable by the circumstance that, in the thirty-second year of Artaxerxes we know he was with the king (xiii. 6). Other circumstances, too, may have concurred to make it imperative for him to return to Persia without delay. The last words of ch. vi. point to some new effort of Tobiah to interrupt his work, apparently by the threat of his being considered as a rebel by the king. If he could make it appear that Artaxerxes was suspicious of his fidelity, then Nehemiah might feel it matter of necessity to go to the Persian court to clear himself of the charge. And this view both receives a remarkable confirmation from, and throws quite a new light upon, Ezr. iv. 7-23. Now, if we compare Neh. vi. 6, 7, with the letter of the heathen nations mentioned in Ezr. iv., and also recollect that the only time when, as far as we know, the walls of Jerusalem were attempted to be rebuilt, was when Nehemiah was governor, it is difficult to resist the conclusion that Ezr. iv. 7-23 relates to the time of Nehemiah's government, and explains the otherwise unaccountable circumstance that twelve years elapsed before the dedication of the walls was completed. Nehemiah may have started on his journey on receiving the letters from Persia (if such they were) sent him by Tobiah, leaving his lieutenants to carry on the works, and after his departure Rehum and Shimshai and their companions may have come up to Jerusalem with the king's decree and obliged them to desist. It seems, however, that at Nehemiah's arrival in Persia, he was able to satisfy the king of his perfect integrity, and he was permitted to return to his government in Judea. His leave of absence may again have been of limited duration, and the business of the census, of repeopleing Jerusalem, setting up the city gates, rebuilding the ruined houses, and repairing the Temple, may have occupied his whole time till his second return to the king. During this second absence another evil arose—the gentilingizing party recovered strength, and the intrigues with Tobiah (Neh. vi. 17), begun before his first departure, were more actively carried on, and led so far that Eliashib the high-priest actually assigned one of the store-chambers in the Temple to Tobiah's use. This we are not told of till xiii. 4-7, when Nehemiah relates the steps he took on his return. But this very circumstance suggests that Nehemiah does not relate the events which happened in his

absence, and would account for his silence in regard to Rehum and Shimshai. We may thus, then, account for ten or eleven years having elapsed before the dedication of the walls took place. In fact, it did not take place till the last year of his government; and this leads to the right interpretation of ch. xiii. 6, and brings it into harmony with v. 14, which obviously imports that Nehemiah's government of Judea lasted only twelve years, viz. from the twentieth to the thirty-second of Artaxerxes. The dedication of the walls and the other reforms named in ch. xiii. were the closing acts of his administration. Josephus detaches Neh. viii. from its context, and appends the narratives contained in it to the times of Ezra. He makes Ezra die before Nehemiah came to Jerusalem as governor, and consequently ignores any part taken by him in conjunction with Nehemiah. He makes no mention of Sanballat in the events of Nehemiah's government, but places him in the time of Jaddua and Alexander the Great. All attempts to reconcile Josephus with Nehemiah must be lost labor. His authority must yield to that of Nehemiah. In appending the history in Neh. viii. to the times of Ezra, we know that he was guided by the Apocryphal 1 Esd., as he had been in the whole story of Zerubbabel and Darius. Probably in all the points in which he differs from Nehemiah, he followed Apocryphal Jewish writings. 2. As regards the authorship of the book, it is admitted by all critics that it is, as to its main parts, the genuine work of Nehemiah. But it is no less certain (so Lord A. C. Herve) that interpolations and additions have been made in it since his time; and there is considerable diversity of opinion as to what are the portions so added (see below). From i. 1 to vii. 6, no doubt or difficulty occurs. Again, from xii. 31 to the end of the book (except xii. 44-47), the narrative is continuous, and the use of the first person singular constant (xii. 30, 38, 40, xiii. 6, 7, &c.). It is therefore only in the intermediate chapters (vii. 6 to xii. 36, and xii. 44-47), that we have to inquire into the question of authorship, and this we will do by sections:—(a.) The first section begins at Neh. vii. 6, and ends in the first half of viii. 1, at the words "one man." This section is identical with Ezr. ii. 1—iii. 1 (EZRA, BOOK OF), word for word, and letter for letter, except in two points, viz. the numbers repeatedly vary; and there is a difference in the account of the offerings made by the governor, the nobles, and the people. The heading, the contents, the narrative about the sons of Barzillai, the fact of the offerings, the dwelling in their cities, the coming of the seventh month, the gathering of all the people to Jerusalem as one man, are in words and in sense the very self-same passage. The idea that the very same words, extending to seventy verses, describe different events, is simply absurd and irrational. The numbers, therefore, must originally have been the same in both books. But when we examine the varying numbers, we see the following particular proofs that the variations are corruptions of the original text. Though the items vary, the sum total, 42,360, is the same (Ezr. ii. 64; Neh. vii. 66). In like manner the totals of the servants, the singing men and women, the horses, mules, and asses, are all the same, except that Ezra has 200, instead of 245, singing men and women. The numbers of the priests and the Levites are the same in both, except that the singers, the sons of Asaph, are 128 in Ezra, against 148 in Nehemiah, and the porters 139 against 138. Then in each particular

case, when the numbers differ, we see plainly that the difference might arise from a copyist's error. To turn next to the offerings. Ezra (ii. 68, 69) merely gives the sum total, as follows: 61,000 drams of gold, 5,000 pounds of silver, and 100 priests' garments. Nehemiah gives no sum total, but gives the following items (vii. 72): The Tirshatha gave 1,200 drams of gold, 50 basins, 530 priests' garments. The chief of the fathers gave 20,000 drams of gold, and 2,200 pounds of silver. The rest of the people gave 20,000 drams of gold, 2,000 pounds of silver, and 67 priests' garments. Here, then, we learn that these offerings were made in three shares, by three distinct parties: the governor, the chief fathers, the people. The sum total of drams of gold we learn from Ezra was 61,000. The shares, we learn from Nehemiah, were 20,000 in two out of the three donors, but 1,000 in the case of the third and chief donor! Is it not quite evident that in the case of Nehemiah the 20 has slipped out of the text (as in 1 Esd. v. 45, 60,000 has), and that his real contribution was 21,000? his generosity prompting him to give in excess of his third. Next, the sum total of the pounds of silver was, according to Ezra, 5,000. The shares were, according to Nehemiah, 2,200 pounds from the chiefs, and 2,000 from the people. But the LXX. give 2,300 for the chiefs, and 2,200 for the people, making 4,500 in all, and so leaving a deficiency of 500 pounds as compared with Ezra's total of 5,000, and ascribing no silver offering to the Tirshatha. The sum total of the priests' garments, as given in both the Hebrew and Greek text of Ezra, and in 1 Esd., is 100. The items as given in Neh. vii. 70 are  $530 + 67 = 597$ . But the LXX. give  $30 + 67 = 97$ , and that this is nearly correct is apparent from the numbers themselves. For the total being 100, 33 is the nearest whole number to  $\frac{1}{3}$ , and 67 is the nearest whole number to  $\frac{2}{3}$  of 100. So that we cannot doubt that the Tirshatha gave 33 priests' garments, and the rest of the people gave 67, probably in two gifts of 34 and 33, making in all 100. But how came the 500 to be added on to the Tirshatha's tale of garments? Clearly it is a fragment of the missing 500 pounds of silver, which, with the 50 bowls, made up the Tirshatha's donation of silver. So that Neh. vii. 70 ought to be read thus, "The Tirshatha gave to the treasure 21,000 drams of gold, 50 basins, 500 pounds of silver, and 33 priests' garments." The offerings, then, as well as the numbers in the lists, were once identical in both books, and we learn from Ezr. ii. 68 what was the purpose of this liberal contribution, viz. "to set up the House of God in his place." From this phrase occurring in Ezr. ii. just before the account of the building of the Temple by Zerubbabel, it has usually been understood as referring to the rebuilding; but the phrase properly implies restoration and preservation (compare 2 Chr. xxiv. 13). It follows, from what has been said, that the section under consideration is in its right place in Nehemiah, and was inserted subsequently in Ezra out of its chronological order. But one or two additional proofs of this must be mentioned. The most convincing and palpable of these is perhaps the mention of the Tirshatha in Ezr. ii. 63 and Neh. vii. 65. Another proof is the mention of Ezra as taking part in that assembly of the people of Jerusalem described in Ezr. iii. 1 and Neh. viii. 1; for Ezra did not come to Jerusalem till the reign of Artaxerxes (Ezr. vii.). Another is the mention of Nehemiah as one of the leaders under whom the captives

enumerated in the census came up (Ezr. ii. 2; Neh. vii. 7): in both which passages the juxtaposition of Nehemiah with Seraiah, when compared with Neh. x. 1, 2, greatly strengthens the conclusion that Nehemiah the Tirshatha is meant. Then, again, that Nehemiah should summon all the families of Israel to Jerusalem to take their census, and that, having done so at great cost of time and trouble, he, or whoever was employed by him, should merely transcribe an old census taken nearly 100 years before, instead of recording the result of his own labors, is so improbable that nothing but the plainest necessity could make one believe it. Nehemiah's own new register begins with vii. 7. He doubtless made use of the old register as an authority by which to decide the genealogies of the present generation. Hence he refused to admit the sons of Barzilai to the priestly office, but made a note of their claim, that it might be decided whenever a competent authority should arise. From all which it is abundantly clear (so Lord A. C. Hervey) that this section belongs properly to Nehemiah.—Prof. Douglas (in Fairbairn) prefers to think "that Ezra, drawing from original documents, has given that list as it appeared at first; and that Nehemiah, who took it as the basis of a new census, has given it in the form to which it was brought by subsequent corrections." Thus Ezra gives 652 persons whose genealogy could not be traced, but Nehemiah 642, probably because 10 had determined their place in the registers by prolonged investigations. So the discrepancies in the accounts of gifts to the Temple service Prof. Douglas would explain on the same principle of an original list with subsequent alterations.—It does not follow (so Lord A. C. Hervey) that this section was written in its present form by Nehemiah. Probably ch. vii., from ver. 7, contains the substance of what was found in this part of Nehemiah's narrative, but abridged, and in the form of an abstract, which may account for the difficulty of separating Nehemiah's register from Zerubbabel's, and also for the very abrupt mention of the gifts of the Tirshatha and the people at the end of the chapter. (b.) The next section commences Neh. viii., latter part of ver. 1, and ends Neh. xi. 3. Lord A. C. Hervey favors the opinion advocated by Haevernick and Kleinert, that this section is the work of Ezra (see below). It is not necessary to suppose that Ezra himself inserted this or any other part of the present book of Nehemiah in the midst of the Tirshatha's history. But if there were extant an account of these transactions by Ezra, it may have been thus incorporated with Nehemiah's history by the last editor of Scripture. (c.) The third section, ch. xi. 3–36, contains a list of the families of Judah, Benjamin, and Levi (priests and Levites), who took up their abode at Jerusalem, in accordance with the resolution of the volunteers, and the decision of the lot, mentioned in xi. 1, 2. This list forms a kind of supplement to that in vii. 8–60, as appears by the allusion in xi. 3 to that previous document. This list is an extract from the official roll preserved in the national archives, only somewhat abbreviated (compare 1 Chr. ix.). The nature of the information in this section, and the parallel passage in 1 Chr., would rather indicate a Levitical hand. It might or might not have been the same which inserted the preceding section. If written later, it is perhaps the work of the same person who inserted xii. 1–30, 44–47. (d.) From xii. 1 to 26 is clearly (see below) an abstract from the official lists made and inserted here long after Nehemiah's time, and

after the destruction of the Persian dynasty by Alexander the Great, as is plainly indicated by the expression "Darius the Persian," as well as by the mention of Jaddua. The allusion to Jeshua, and to Nehemiah and Ezra, in ver. 28, is also such as would be made long posterior to their lifetime. (e.) xii. 44-47 is an explanatory interpolation, made in later times, probably by the last reviser of the book (but see below). That it is so is evident not only from the sudden change from the first person to the third, and the dropping of the personal narrative (though the matter is one in which Nehemiah necessarily took the lead), but from the fact that it describes the identical transaction described in xiii. 10-13 by Nehemiah himself. Though, however, it is not difficult thus to point out those passages of the book which were not part of Nehemiah's own work, it is not easy, by cutting them out, to restore that work to its integrity. For Neh. xii. 31 does not fit on well to any part of ch. vii., or, in other words, the latter portion of Nehemiah's work does not join on to the former. Probably we have only the first and last parts of Nehemiah's work, and for some reason the intermediate portion has been displaced to make room for the narrative and documents from Neh. vii. 7 to xii. 27. And we are greatly confirmed in this supposition by observing that at the close of ch. vii. we have an account of the offerings made by the governor, the chiefs, and the people; but we are not even told for what purpose these offerings were made. Obviously, therefore, the original work must have contained an account of some transactions connected with repairing or beautifying the Temple, which led to these contributions being made. 2 Mc. ii. 13 lends considerable support to the theory that the middle portion of Nehemiah's work was cut out, and that there was substituted for it partly an abridged abstract, and partly Ezra's narrative and other appended documents. We may then affirm with tolerable certainty (so Lord A. C. Hervey) that the first six chapters of Nehemiah and part of the seventh, and the last chapter and half, were alone written by him, the intermediate portion being inserted by those who had authority to do so, in order to complete the history of the transactions of those times (see below).—As regards the time when the Book of Nehemiah was put into its present form, we have only the following data to guide us. The latest high-priest mentioned, Jaddua, was doubtless still alive when his name was added. The descriptive addition to the name of Darius (Neh. xii. 22) "the Persian," indicates that the Persian rule had ceased, and the Greek rule had begun. (DARIUS 8.) Jaddua's name, therefore, and the clause at the end of ver. 22, were inserted each in the reign of Alexander the Great. But it appears that the registers of the Levites, entered into the Chronicles, did not come down lower than the time of Johanan (ver. 23). The close of the Persian dominion, and the beginning of the Greek, is the time indicated when the latest additions were made (so Lord A. C. Hervey).—Prof. Douglas (in Fairbairn) endeavors "to show that Nehemiah is one consecutive memoir, written by the person whose name it bears, according to the common opinion of both the Jewish and the Christian Church from age to age, in opposition to some popular notions of recent critics. . . . Of course different subjects are not described in the self-same words or style; and this diversity illustrates the working of Nehemiah's mind as that of a man deeply interested in the affairs in which he took an active part. It is only a perverted ingenuity which would

make these differences an evidence that chs. viii.-x. have come from a different author (see Keil's *Introduction to the O. T.*). The preëminent position assigned to Ezra (in this part of the book) necessarily threw even Nehemiah somewhat into the background, and led him to speak of himself in the third person instead of in the first, as in the rest of his book. . . . The only passages throwing real difficulties in the way of the common belief that Nehemiah wrote the book as we have it occur in ch. xii. (10, 11, 22, 23). . . 'JADDUA' is said by Josephus to have been the high-priest at the time of ALEXANDER THE GREAT; and 'Darius the Persian' (DARIUS 8) might naturally be identified with Darius Codomannus, the last Persian king, whom Alexander conquered; but such a date is altogether beyond the time to which we can suppose Nehemiah's life extended. . . . Vitringa [and] several [other] sober-minded believing critics . . . think these four verses are to be regarded as notes or explanatory remarks added by the men who closed the canon of O. T. Scripture (SYNAGOGUE, THE GREAT), as the parting assurance of these witnesses that the Word of God and the worship and ordinances of His house were preserved intact until the time at which they lived. But we are not compelled to fall back upon such an hypothesis, nor . . . even to suppose that Josephus is mistaken in making Jaddua the contemporary of Alexander. . . . We have only to reject the unsupported supposition that Darius is the third king of that name, and to identify him with the second, Darius Nothus. . . . There is nothing in the four verses quoted above which need bring their composition, and that of the book of which they form a part, down to the period of Alexander or his successors. . . . For it is assumed on the other side that these verses speak of Jaddua as in possession of the high-priesthood. Were this assumption correct, there is nothing absurd in our assuming, in turn, that Nehemiah was under thirty when he was sent to Jerusalem in the twentieth year of Artaxerxes, B. C. 445, and that God was pleased to lengthen out his life till A. C. 351 (the date given by Ewald for Jaddua's becoming high-priest). . . . But it is a mere assumption that Jaddua is here spoken of as actual high-priest; nay, we are persuaded that it is a mistake. . . . There is not even the semblance of a difficulty about Nehemiah writing these verses, if they present merely a genealogy. For we read (ch. xiii. 28) that Nehemiah chased away a younger son of Joiada, because he had profaned the priesthood by a heathenish marriage. . . . Jaddua was probably already born, as being the eldest son of the eldest brother among Joiada's children." Prof. Douglas suggests the danger that this apostate priest, generally understood to be the founder of the Samaritan worship at GERIZIM, might succeed to the high-priesthood at Jerusalem and overturn the whole theocratic constitution which Ezra and Nehemiah had devoted themselves to establishing; and regards this danger as a peculiar reason for Nehemiah's tracing the high-priestly line as far as the children were born, and thus recording how Providence had furnished visible security for the continuance of the high-priesthood in the line of pure descent by granting Eliashib descendants to the third generation. "And this gives point and value to the statements of xii. 22, 23, that the Levites, the heads of the fathers, and the priests in their courses, were all recorded in the national chronicles, not in four successive generations, as those imagine who suppose that Eliashib, Joiada, Johanan, and Jaddua, are

mentioned as successively actual high-priests, but at that one time when God's special Providence gave to the Church the strong assurance of stability, owing to the fact of four generations of the high-priestly family being alive at the same moment. This point of time would, then, exactly correspond with that other, 'to the reign of Darius the Persian,' which might equally be translated *at* or *under* this reign. . . . Ewald's table . . . exhibits Darius Nothus ascending the throne B. C. 424, and Eliashib surviving his accession for five years, and then succeeded by Joiada, B. C. 419. If we understand that Nehemiah wrote of these five years, these four verses, which have proved a stumbling-block to many critics, appear most natural, exact, and important in their meaning." Prof. Douglas regards chs. x. and xii. as giving lists of the chief-priests, or heads of the twenty-four courses, at three several times, under the three successive high-priests, Jeshua (xii. 1-7), Joiakim (12-21), and Eliashib (x. 1-8). (HIGH-PRIEST.)—3. In respect to language and style, this book is very similar to 1 and 2 Chronicles and Ezra. Nehemiah has, it is true, quite his own manner, and certain phrases and modes of expression peculiar to himself. He has also some few words and forms not found elsewhere in Scripture; but the general Hebrew style is exactly that of the books purporting to be of the same age. Some words occur in 1 and 2 Chronicles, Ezra, and Nehemiah, but nowhere else. The text of Nehemiah is generally pure and free from corruption, except in the proper names, in which there is considerable fluctuation in the orthography, both as compared with other parts of the same book and with the same names in other parts of Scripture; and also in numerals. Many various readings are also indicated by the LXX. version.—4. Nehemiah has always had an undisputed place in the Canon (BIBLE; INSPIRATION), being included by the Hebrews under the general head of the Book of Ezra, and, as Jerome tells us, by the Greeks and Latins under the name of the second Book of Ezra. (ESDRAS, FIRST BOOK OF.) There is no quotation from it in the N. T., and it has been comparatively neglected by both the Greek and Latin fathers.

**Ne-he-mi'as** (L. form of NEHEMIAH). 1. NEHEMIAH 2 (1 Esd. v. 8).—2. NEHEMIAH 1 (v. 40).

**Ne-hi-loth** (Heb. *nehilôth* or *nehilôh*; see below). The title of Ps. v. in the A. V. is "to the chief musician upon Nehiloth." It is most likely, as Gesenius and others explain, that it is derived from the root *hâlal* or *châlal* = *to bore, perforate*, whence *hâlîl* or *châlîl* = *a flute or pipe* (1 Sam. x. 5; 1 K. i. 40), so that Nehiloth is the general term for perforated wind-instruments of all kinds, as Neginoth denotes all manner of stringed-instruments. The title of Ps. v. is therefore addressed to the conductor of that portion of the Temple-choir who played upon flutes and the like, and are directly alluded to in Ps. lxxxvii. 7, where *hôlelîm* or *chôlelîm*, "the players upon instruments" who are associated with the singers, are properly "pipers" or "flute-players." MUSIC; MUSICAL INSTRUMENTS.

**Ne-hum** (Heb. *comfort*, Fû.; probably an error for REHUM, Ges.), one of those who returned from Babylon with Zerubbabel (Neh. vii. 7); = REHUM 1.

**Ne-hush'ta** (Heb. *brass*, Ges.), daughter of Elnathan of Jerusalem; wife of Jehoiachim, and mother of Jehoiachin, kings of Judah (2 K. xxiv. 8).

**Ne-hush'tan** (Heb. *the brazen*, Ges.; *brass-image*, Fû.). One of the first acts of HEZEKIAH, upon com-

ing to the throne of Judah, was to destroy all traces of the idolatrous rites which had gained such a fast hold upon the people during the reign of his father Ahaz. Among other objects of superstitious reverence and worship was the brazen serpent, made by Moses in the wilderness (Num. xxi. 9), which was preserved throughout the wanderings of the Israelites, probably as a memorial of their deliverance, and according to a late tradition was placed in the Temple. The name by which the brazen serpent was known at this time, and by which it had been worshipped, was Nehushtan (2 K. xviii. 4). It is evident that our translators by their rendering, "and he called it Nehushtan," understood, with the LXX., Vulgate, and many commentators, that Hezekiah, when he destroyed the brazen serpent, gave it the name Nehushtan = *a brazen thing*, in token of his utter contempt, and to impress upon the people the idea of its worthlessness. But it is better (so Mr. Wright) to understand the Hebrew as referring to the name by which the serpent was generally known, the subject of the verb being indefinite—"and one called it 'Nehushtan'" = "and they (i. e. people) called it 'Nehushtan.'" This is the view taken in the Targum of Jonathan, and the Peshito-Syriac, also by Buxtorf, Luther, and most modern commentators. SERPENT, BRAZEN.

**Ne'-el**, or **Ne'-el** (Heb. = JERIEL? Ges., Fû.; *dwelling-place of God*, Fû.), a place on the boundary of Asher (Josh. xix. 27 only). It occurs between JIPHTHAH-EL and CABUL. If the former be identified with *Jefât*, and the latter with *Kabil*, eight or nine miles E. S. E. of 'Akka, then Neiel may possibly be represented by *Miar*, a village conspicuously placed on a lofty mountain-brow, just half-way between the two.

**Ne-keb** (Heb. *a cavern*, Ges.), a town on the boundary of Naphtali (Josh. xix. 33). It occurs between ADAMI and JABNEEL 2. A great number of commentators have taken this name as being connected with the preceding (i. e. = Adami-Nekeb). In the Talmud the post-biblical name of Nekeb is *Triadathah*. Of this more modern name Schwarz suggests that a trace is to be found in "*Hazedhi*," three English miles N. from *al Chatti*.

**Ne-ko'da** (Heb. *distinguished*, Ges.; *shepherd*, Fû.). 1. The "children of Nekoda" returned among the Nethinim after the Captivity (Ezr. ii. 48; Neh. vii. 50).—2. The "children of Nekoda" were among those who went up after the Captivity from Tel-melah, Tel-harsa, &c., but were unable to prove their descent from Israel (Ezr. ii. 60; Neh. vii. 62).

**Nem'u-el** (Heb. = JEMUEL? Ges.). 1. A Reubenite, son of Eliab, and eldest brother of Dathan and Abiram (Num. xxvi. 9).—2. Eldest son of Simeon (xxvi. 12; 1 Chr. iv. 24), from whom descended the family of the NEMUKLITES; = JEMUEL.

**Nem'u-el-ites** (fr. Heb.), the = the descendants of NEMUEL the first-born of Simeon (Num. xxvi. 12).

**Ne'pheg** (Heb. *sprout*, Ges.). 1. A Kohathite, son of Izhar and brother of Korah (Ex. vi. 21).—2. One of David's sons born in Jerusalem (2 Sam. v. 15; 1 Chr. iii. 7, xiv. 6).

\* **Nephew** (Heb. *neched* = *progeny*, Ges.; once *bênêy bânim* = *sons' sons*; Gr. pl. *ekgona* = *descendants*), in the A. V. as in Old English writers = *grandson*, in plural *grandsons* or *grandchildren* (Judg. xii. 14, margin "son's sons;" Job xviii. 19; Is. xiv. 22; 1 Tim. v. 4). In Gen. xxi. 23 the Heb. *neched* is translated "son's son."

**Ne'phi** (L.) = NAPHTHAR (2 Mc. i. 36).

**Ne'phis** (fr. Gr.). In the corrupt list of 1 Esd. v. 21, "the sons of Nephis" apparently = "the children of Nebo" in Ezr. ii. 29, or else the name is a corruption of **MAGBISH**.

**Ne-phish** (fr. Heb.) = **NAPHISH** (1 Chr. v. 19 only).

**Ne-phish'e-sim** (Heb. = **NEPHUSIM**, Ges., Fü.). The children of Nephishesim were among the Nethinim who returned with Zerubbabel (Neh. vii. 52). **NAPHISI**; **NEPHUSIM**.

**Neph'tha-il** (L.) = **NAPHTALI** (Tob. i. 1, 2, 4, 5).

**Neph'tha-ilm** (L.) = **NAPHTALI** (Tob. vii. 3; Mat. iv. 13, 15; Rev. vii. 6).

**Neph-to'ah** (Heb. *opening*, Ges.), the **Wa'ter of**. The spring or source of the water or waters of Nephtoah was one of the landmarks in the boundary-line between Judah and Benjamin (Josh. xv. 9, xviii. 15). It lay N. W. of Jerusalem, in which direction it seems to have been satisfactorily identified in '*Ain Lifta*, a spring situated a little distance above the village of the same name, and about two and a half miles from Jerusalem (so Mr. Grove, with Stewart, Barclay, and Tobler). Nephtoah was formerly identified with various springs—the spring of St. Philip ('*Ain Haniyeh*) in the *Wady el Werd*, four miles S. W. of Jerusalem; the '*Ain Yálo* in the same valley, but one mile nearer Jerusalem; the '*Ain Karim*, or Fountain of the Virgin of mediæval times, about four miles W. from Jerusalem; and even the so-called Well of Job at the western end of the *Wady 'Aly*, and near *Yálo* (ancient Ajalon). Robinson (*Phys. Geog.* 45, 240) and Mr. Rowlands (in Fairbairn) favor '*Ain Karim*; Porter (in Kitto) favors '*Ain Yálo* as answering to Nephtoah.

**Ne-ph'isim** (Heb. *expansions*, Ges., Fü.) = **NEPHISHESIM** (Ezr. ii. 50).

**Ner** (Heb. *a light, lamp*, Ges.), a Benjamite, son of Jehiel (1 Chr. ix. 36); according to 1 Chr. viii. 33 and ix. 39, father of Kish, and grandfather of King Saul. In 1 Sam. ix. 1, Kish is said to be "the son (i. e. grandson) of Abiel;" hence most suppose Abiel = Jehiel. **ABNER** is uniformly styled "the son of Ner;" 1 Sam. xiv. 50 has "Abner, the son of Ner, Saul's uncle;" and ver. 51 says "Ner the father of Abner (was) the son of Abiel." Lord A. C. Hervey maintains that Abner was Saul's uncle, and brother of Kish. Others maintain that Ner, Abner's father, was Saul's uncle, and consequently that Abner was Saul's cousin. This supposes two named Ner (father and grandfather of Abner), unless there is some copyist's mistake. Compare Kish, 1, 2.

**Ner'e-us** [L. and Gr. pronounced *ne'ruse*] (Gr. and L., the name of an ancient sea-god), a Christian at Rome, saluted by St. Paul (Rom. xvi. 15). Origen conjectures that he belonged to the household of Philologus and Julia. A legendary account of him is given in *Acta Sanctorum*, from which may be gathered the tradition that he was beheaded at Terracina, probably in the reign of Nerva.

**Nergal** (Heb., see below), one of the chief Assyrian and Babylonian deities, seems to have corresponded closely to the classical Mars. He was of Babylonian origin, and his name (so Rawlinson) signifies, in the early Cushite dialect of that country, *the great man*, or *the great hero*. His monumental titles are—"the storm-ruler," "the king of battle," "the champion of the gods," "the male principle" (or "the strong begetter"), "the tutelary god of Babylonia," and "the god of the chase." It is conjectured that he may represent the deified Nimrod. The only express mention of Nergal contained in

the Scriptures is in 2 K. xvii. 30. He appears to have been worshipped under the symbol of the "Man-Lion." **NINEVEH**.

**Ner'gal-sha-re'zer** (Heb.; see below, also **NERGAL** and **SHAREZER**) occurs only in Jer. xxxix. 3 and 13. There appear to have been two persons of the name among the "princes of the king of Babylon," who accompanied Nebuchadnezzar on his last expedition against Jerusalem. One of these is not marked by any additional title; but the other has the honorable distinction of **RAB-MAG**, and it is to him alone that any particular interest attaches. In sacred Scripture he appears among the persons who, by command of Nebuchadnezzar, released Jeremiah from prison; profane history gives us reason to believe that he was a personage of great importance, who not long afterward mounted the Babylonian throne (so Rawlinson). This identification depends in part upon the exact resemblance of name, which is found on Babylonian bricks in the form of *Nergal-shar-uzur*; but mainly it rests upon the title of *Rubu-enga*, or **Rab-mag**, which this king bears in his inscriptions. Assuming on these grounds the identity of the Scriptural "*Nergal-sharezer*, *Rab-mag*," with the monumental "*Nergal-shar-uzur*, *Rubu-enga*," we may learn something of his history from profane authors. There cannot be a doubt that he was a monarch called *Neriglissar* or *Neriglissor* by Berosus (Josephus, *Ap.* i. 20), who murdered Evil-merodach, Nebuchadnezzar's son, and succeeded him upon the throne. This prince was married to a daughter of Nebuchadnezzar, and was thus the brother-in-law of his predecessor, whom he put to death. His reign lasted between three and four years. He appears to have died a natural death, and certainly left his crown to a young son, Laborosoarchod, who was murdered after a reign of nine months. There is abundant reason to believe from his name and his office that he was a native Babylonian—a grandee of high rank under Nebuchadnezzar, who regarded him as a fitting match for one of his daughters. His reign preceded that of the Median Darius by seventeen years. It lasted from B. C. 559 to B. C. 556. A palace, built by *Neriglissar* at Babylon, is the only building of any extent on the right bank of the Euphrates (see plan in article **BABEL**).

**Ner'i** (Gr. fr. Heb. = **NERIAH**), son of Melchi, and father of **SALATHIEL**, in the **GENEALOGY OF JESUS CHRIST** (Lk. iii. 27).

**Ner-i'ah** (fr. Heb. = *lamp of Jehovah*, Ges.), son of Maaseiah, and father of Baruch (Jer. xxxii. 12, xxxvi. 4, xliii. 3), and Seraiah (li. 59).

**Ner-i'as** (Gr. fr. Heb. = **NERIAH** (Bar. i. 1).

\* **Ne'ro** (L., a Roman family name of Sabine origin = *brave*), a Roman emperor, originally named **Lucius Domitius Ahenobarbus**, born at Antium, A. D. 37, adopted A. D. 50 by his grand-uncle **CLAUDIUS** who had married his mother, and then named **Nero Claudius Cæsar Drusus Germanicus**. He became emperor A. D. 54 on the murder of **Claudius**, and though he reigned well for the first five years, was a monster of profligacy and cruelty. He was generally supposed to have set Rome on fire A. D. 64, but he charged the crime upon the Christians, some of whom he caused to be torn in pieces by dogs, and others to be burned at night to light the imperial gardens. The Apostles **PAUL** and **PETER** suffered martyrdom in his reign. An insurrection broke out; he was declared an enemy of the state, and committed suicide, to avoid being put to death, A. D. 68. He is frequently mentioned in the N. T. as

"CESAR" (Acts xxv. 8 ff., xxvi. 32, xxviii. 19; Phil. iv. 22), sometimes as "AUGUSTUS" (Acts xxv. 21, 25), but not as "Nero" except in the spurious subscription to 2 Tim. See cut under EPHESUS; ROMAN EMPIRE; ROME.

\* **Nest** (Heb. *kén*; Gr. *kataskénosis*; Heb. *kānan* = to "make one's nest") in the Scriptures denotes the structure itself (Job xxxix. 27; Mat. viii. 20, &c.), also with the eggs or young birds in it (Deut. xxii. 6, &c.), sometimes a dwelling, especially on a high rock like an eagle's nest (Num. xxiv. 21, &c.), or as being pleasant and comfortable (Job xxix. 18). The Hebrew word in Gen. vi. 14 denotes (so Gesenius) cells, or chambers, in the Ark (A. V. "rooms," margin "nests"). BIRD.

**Net.** The various terms applied by the Hebrews to nets (*machmôr*, *michmôr*, *michmôreth*, *sêbâchâh*,

*sêbach*, *hêrem* or *chêrem*, *mâtsôd*, *mâtsôdâh*, *mâtsûdâh*, *reshelth*) had reference either to the construction of

Egyptian Landing-net.—(Wilkinson.)

the article, or to its use and objects. What distinction there may have been between the various nets

Egyptian Clap-nets.—From Thebes.—(Rawlinson's *Herodotus*, II. 110.)

described by the Hebrew terms we are unable to decide. In the N. T. we have three Greek terms: *sagênê*, whence our word *seine*, a large hauling or

draw-net (Mat. xiii. 47); *amphiblētron*, a casting-net (iv. 18; Mk. i. 16); and *diktunon*, also a casting-net (Mat. iv. 20 f.; Mk. i. 18 f.; Lk. v. 2 ff.; Jn.

Egyptian Net-traps for birds.—From Beni Hassan.—(Rawlinson's *Herodotus*, II. 110.)

xxi. 6 ff.). The net was used for **FISHING** and **HUNTING**. The Egyptians constructed their nets of flax-string: the netting-needle was made of wood, and in shape closely resembled our own (Wilkinson, ii. 93). The nets varied in form according to their use; the accompanying sketch represents the landing-net. As the nets of Egypt were well known to the early Jews (Is. xix. 8), it is not improbable that the material and form were the same in each country. The nets used for birds in Egypt were of two kinds, clap-nets and traps. The net-trap consisted of net-work strained over a frame of wood, which was so constructed that the sides would collapse by pulling a string and catch any birds that might have alighted on it while open. The clap-net was made on the same principle, consisting of a double frame with the net-work strained over it, which might be caused to collapse by pulling a string.—Net is often used metaphorically. It was an appropriate image of the subtle devices of God's enemies (Ps. ix. 15, xxv. 15, xxxi. 4, &c.), and of the unavertable vengeance of God (Lam. i. 13; Ez. xii. 13; Hos. vii. 12, &c.), &c. The Heb. *sebach*, fem. *sebachah*, in architecture (A. V. "net," "net-work," "checker," "wreath-work, &c.") = (so Gesenius) **LATTICE-work**, **balustrade**, especially on or round the capitals of columns (1 K. vii. 17, ff.; 2 K. xxv. 17, &c.).

**Ne-than'e-el** (Heb. *given of God*, Ges.; = **NATHAN-ael**). 1. Son of Zuar, and prince of Issachar at the Exodus (Num. i. 8, ii. 5, vii. 18, 28, x. 15).—2. Fourth son of Jesse, and brother of David (1 Chr. ii. 14).—3. A priest in David's reign, who blew the trumpet before the Ark (xv. 24).—4. A Levite, father of Shemaiah the scribe (xxiv. 6).—5. Fifth son of Obad-edom (xxvi. 4).—6. One of the princes of Judah, sent by Jehoshaphat to teach in the cities of Judah (2 Chr. xvii. 7).—7. A chief Levite who took part in Josiah's solemn Passover (xxxv. 9).—8. A priest of the family of Pashur in Ezra's time who had married a foreign wife (Ezr. x. 22).—9. The representative of a priestly family of Jedaiah in the time of high-priest Joiakim (Neh. xii. 21).—10. A Levite, of the sons of Asaph, who took part in the dedication of the wall of Jerusalem (ver. 36).

**Neth-a-ni'ah** (fr. Heb. = *given of Jehovah*, Ges.). 1. Son of Elishama, and father of the Ishmael who murdered Gedaliah (2 K. xxv. 23, 25; Jer. xl. 8, 14, 15, xli. 1 ff.). He was of the royal family of Judah.—2. Son of Asaph the minstrel, and chief of the fifth course of the Temple-choir (1 Chr. xxv. 2, 12).—3. One of the Levites sent by Jehoshaphat to teach the Law in the cities of Judah (2 Chr. xvii. 8).—4. Father of Jehudi (Jer. xxxvi. 14).

**Neth'l-nim**, **Neth'l-nims** (Heb. pl. *nethinim* = *the given*, Ges.). As applied specifically to a distinct body of men connected with the services of the Temple, this name first meets us in the later books of the O. T.; in 1 Chronicles, Ezra, and Nehemiah. The Hebrew word, and the ideas embodied in it may, however, be traced to a much earlier period. As derived from the verb *nathan* (= *to give, set apart, dedicate*) it was applied to those who were specially appointed to the liturgical offices of the Tabernacle. Thus the Levites were *given* to Aaron and his sons. i. e. to the priests as an order for this service (Num. iii. 9, viii. 19). At first they were the only attendants, and their work must have been laborious enough. The first conquests, however, brought them their share of the captive Midianites, and 320 were *given* to them as having charge of the Tabernacle (xxx. 47), while 32 only were assigned spe-

cially to the priests (ver. 40). This disposition to devolve the more laborious offices of their ritual upon servants of another race showed itself again in the treatment of the **GIBEONITES**. They, too, were *given* (A. V. "made") to be "hewers of wood and drawers of water" for the house of God (Josh. ix. 27). No addition to the number thus employed appears to have been made during the period of the Judges, and they continued to be known by their old name as the Gibeonites. Either the massacre at Nob had involved the Gibeonites as well as the priests (1 Sam. xxii. 19), or else they had fallen victims to some other outburst of Saul's fury, and, though there were survivors (2 Sam. xxi. 2), the number was likely to be quite inadequate for the greater stateliness of the new worship at Jerusalem. It is to this period accordingly that the origin of the class bearing this name may be traced. The Nethinim were those "whom David and the princes appointed (Heb. *gave*) for the service of the Levites" (Ezr. viii. 20). Analogy would lead us to conclude that, in this as in the former instances, these were either prisoners taken in war, or else some of the remnant of the Canaanites. From this time the Nethinim probably lived within the precincts of the Temple, doing its rougher work, and so enabling the **LEVITES** to take a higher position as the religious representatives and instructors of the people. The example set by David was followed by his successor. (**SOLOMON'S SERVANTS**.) Assuming, as is probable, that the later Rabbinic teaching represents the traditions of an earlier period, the Nethinim appear never to have lost the stigma of their Canaanite origin. They were all along a servile and subject caste. The only period at which they rise into any thing like prominence is that of the return from the Captivity. In that return the priests were conspicuous and numerous, but the Levites, for some reason unknown to us, hung back. The services of the Nethinim were consequently of more importance (Ezr. viii. 17), but in their case also, the small number of those that joined (392 under Zerubbabel, 220 under Ezra, including "Solomon's servants") indicates that many preferred remaining in the land of their exile to returning to their old service. Those that did come were consequently thought worthy of special mention. The names of their families were registered (Ezr. ii. 43-58). They were admitted, in conformity to Deut. xxix. 11, to join in the great covenant (Neh. x. 28). They, like the priests and Levites, were exempted from taxation by the Persian satraps (Ezr. vii. 24). They were under a chief of their own body (ii. 43; Neh. vii. 46). They took an active part in rebuilding the city (iii. 26), and the tower of Ophel, near the Temple, was assigned to some of them as a residence (xi. 21), while others dwelt with the Levites in their cities (ii. 70). They took their place in the chronicles of the times after the Israelites, priests, and Levites (1 Chr. ix. 2). The Mishna gives the order of social precedence thus: priests, Levites, Israelites, "bastards," the Nethinim, proselytes, manumitted slaves (Ginsburg, in Kitto). Neither in the Apocrypha, nor in the N. T., nor yet in Josephus, do we find any additional information about the Nethinim.

**Ne-to'phah** (Heb. *distillation*, Ges.), a town named only in the catalogue of those who returned with Zerubbabel from the Captivity (Ezr. ii. 22; Neh. vii. 26; 1 Esd. v. 18). But, though not directly mentioned till so late a period, Netophah was really a much older place. Two of David's "valiant men"

and captains, MAHARAI, and HELEB or HELDAI (1 Chr. xxvii. 13, 15), were Netophathites, and it was the native place of at least one of the captains who remained under arms near Jerusalem after its destruction by Nebuchadnezzar (compare 2 K. xxv. 23 with Jer. xl. 8). The "villages of the Netophathites" were the residence of the Levites who were singers (1 Chr. ix. 16; Neh. xii. 28). That Netophah belonged to Judah appears from the fact that the two heroes above mentioned belonged, the one to the Zarhites, and the other to Othniel, the son-in-law of Caleb. To judge from Neh. vii. 26 it was near or closely connected with Bethlehem. It is not mentioned by Eusebius and Jerome, and although in the Mishna reference is made to the "oil of Netophah," and to the "valley of Beth-Netophah," nothing is said as to the situation of the place. The latter may well be the present village of *Beit Netif*, which stands on a high ridge near the *Wady es Sumt*, about fifteen miles S. W. from Jerusalem, but can hardly be the Netophah of the Bible, since it is not near Bethlehem. The only name in the neighborhood of Bethlehem suggestive of Netophah is that which appears in Van de Velde's map as *Antábeh*, and in Tobler as *Om Taba*, attached to a village about two miles N. E. of Bethlehem, and a wady which falls therefrom into the *Wady en-Nar*, or Kidron (so Mr. Grove).

**Ne-top'h-a-thi** (Heb.), the same word (Neh. xii. 28) which in other passages is rendered "the Netophathite," or "the Netophathites."

**Ne-to'pha-thite**, or **Ne-top'h-a-thite** (fr. Heb. *netô-pháthî* = one from NETOPHAH), the (2 Sam. xxiii. 28, 29; 2 K. xxv. 23; 1 Chr. xi. 30, xxvii. 13, 15; Jer. xl. 8). The Eng. pl., "the Netophathites" (the Heb. word being the same as above) occurs in 1 Chr. ii. 54, ix. 16.

**Nettle**, the A. V. translation of—1. Heb. *hárûl* or *chárûl* (Job xxx. 7; Prov. xxiv. 31). There is very great uncertainty as to the meaning of the Hebrew word, and numerous are the plants which commentators have sought to identify with it: brambles, sea-orache, butcher's broom, thistles, have all been proposed. The generality of critics and some modern versions are in favor of the *nettle*. Nettles (*Urtica*) are of rapid growth in neglected spots, and some of the species are well known for their power of stinging, their minute tubular hairs or prickles transmitting a poisonous fluid when pressed. Celsius believes the plant meant is the Christ-thorn (*Zizyphus Paliurus*)—the *Paliurus aculeatus* of modern botanists—but his identification appears to be forbidden by the passage in Proverbs (l. c.). (THORNS AND THISTLES.) Dr. Royle has argued in favor of some species of wild mustard, and Mr. Houghton is inclined to adopt Dr. Royle's opinion. 2. Heb. *kimôsh* or *kimôsh* (Is. xxxiv. 13; Hos. ix. 6) = the nettle (Vulgate, Arius Montanus, Luther, A. V., &c.). Another form of the same word, *kimôshônim* ("thorns," A. V.), occurs in Prov. xxiv. 31. Modern commentators are generally agreed upon the signification of this term, which may well denote some species of nettle (*Urtica*).

**New Moon.** The first day of the lunar month was observed as a holy day. In addition to the daily sacrifice there were offered two young bullocks, a ram, and seven lambs of the first year as a burnt-offering, with the proper meat-offerings and drink-offerings, and a kid as a sin-offering (Num. xxviii. 11-15). As on the Sabbath, trade and handicraftwork were stopped (Am. viii. 5), the Temple was opened for public worship (Ez. xvi. 3; Is. lxvi.

23). The trumpets were blown at the offering of the special sacrifices for the day, as on the solemn festivals (Num. x. 10; Ps. lxxxi. 8). It was an occasion for state-banquets (1 Sam. xx. 5-24). In later, if not in earlier times, fasting was intermitted at the new moons (Jd. viii. 6). The new moons are generally mentioned so as to show that they were regarded as a peculiar class of holy days, distinguished from the solemn feasts and the Sabbaths (Ez. xlv. 17; 1 Chr. xxiii. 31; 2 Chr. ii. 4, viii. 13, xxxi. 3; Ezr. iii. 5; Neh. x. 33). The seventh new moon of the religious year, being that of Tisri, commenced the civil year, and had a significance and rites of its own. (TRUMPETS, FEAST OF.) By what method the commencement of the month was ascertained in the time of Moses is uncertain. The Mishna describes the manner in which it was determined seven times in the year by observing the first appearance of the moon, which, according to Maimonides, derived its origin by tradition from Moses, and continued in use as long as the Sanhedrim existed. On the thirtieth day of the month watchmen were placed on commanding heights round Jerusalem to watch the sky. As soon as each of them detected the moon he hastened to a house in the city, which was kept for the purpose, and was there examined by the president of the Sanhedrim. When the evidence of the appearance was deemed satisfactory, the president rose up and formally announced it, uttering the words, "It is consecrated." The information was immediately sent throughout the land from the Mount of Olives, by beacon-fires on the tops of the hills. The religious observance of the day of the new moon may plainly be regarded as the consecration of a natural division of time. MONTH; MOON.

**New Testa-ment** (see TESTAMENT). The origin, history, and characteristics of the constituent books and of the great versions of the N. T., the mutual relations of the GOSPELS, and the formation of the CANON, are discussed in other articles. (BIBLE; VERSIONS; and articles on the various books.) The present article (originally by Mr. Westcott) is on the text of the N. T. The subject naturally divides itself into the following heads, which will be examined in succession:—

#### I. The History of the Written Text.

- §§ 1-11. The earliest history of the Text. Autographs. Corruptions. The text of Clement and Origen.
- §§ 12-15. Theories of recensions of the Text.
- §§ 16-25. External characteristics of MSS.
- §§ 26-29. Enumeration of MSS. § 28. Uncial. § 29. Cursive.
- §§ 30-40. Classification of various readings.

#### II. The History of the Printed Text.

- § 1. The great periods.
- §§ 2-5. § 2. The Complutensian Polyglott. § 3. The editions of Erasmus. § 4. The editions of Stephens.
- § 5. Beza and Elzevir (English version).
- §§ 6-10. § 6. Walton; Curcellens; Mill. § 7. Bentley. § 8. G. v. Maestricht; Wetstein. § 9. Griesbach; Matthæi. § 10. Scholz.
- §§ 11-13. § 11. Lachmann. § 12. Tischendorf. § 13. Tregelles; Alford.

#### III. Principles of Textual Criticism.

- §§ 1-9. External evidence.
- §§ 10-13. Internal evidence.

#### IV. The Language of the New Testament.

I. The History of the Written Text. 1. The early history of the apostolic writings offers no points of distinguishing literary interest. Externally, as far as it can be traced, it is the same as that of other con-

temporary books. St. Paul, like Cicero or Pliny, often employed the services of an amanuensis, to whom he dictated his letters, affixing the salutation "with his own hand" (1 Cor. xvi. 21; 2 Th. iii. 17; Col. iv. 18). In one case the scribe has added a clause in his own name (Rom. xvi. 22). Once, in writing to the Galatians, the apostle appears to apologize for the rudeness of the autograph which he addressed to them, as if from defective sight (Gal. vi. 11). If we pass onward one step, it does not appear that any special care was taken in the first age to preserve the books of the N. T. from the various injuries of time, or to insure perfect accuracy of transcription. They were given as a heritage to man, and it was some time before men felt the full value of the gift. The original copies seem to have soon perished. It is certainly remarkable that in the controversies at the close of the second century, which often turned upon disputed readings of Scripture, no appeal was made to the apostolic originals.—2. In the natural course of things the apostolic autographs would be likely to perish soon. The material commonly used for letters, the papyrus-paper to which St. John incidentally alludes (2 Jn. 12; comp. 3 Jn. 13), was singularly fragile, and even the stouter kinds, likely to be used for the historical books, were not fitted to bear constant use. The papyrus fragments which have come down to the present time have been preserved under peculiar circumstances, as at the Herculaneum or in Egyptian tombs. (REED 2.) Parchment (2 Tim. iv. 13), which was more durable, was proportionately rarer and more costly. (WRITING.) And yet more than this. In the first age, the written word of the apostles occupied no authoritative position above their spoken word, and the vivid memory of their personal teaching. And when the true value of the apostolic writings was afterward revealed by the progress of the Church, these collections of "the divine oracles" would be chiefly sought for among Christians. On all accounts it seems reasonable to conclude that the autographs perished during that solemn pause which followed the apostolic age, in which the idea of a Christian Canon, parallel and supplementary to the Jewish Canon, was first distinctly realized.—3. In the time of the Diocletian persecution (A. D. 303) copies of the Christian Scriptures were sufficiently numerous to furnish a special object for persecutors, and a characteristic name (Latin *traditores*, from which comes our word *traitors*) to renegades who saved themselves by surrendering the sacred books. Partly, perhaps, owing to the destruction thus caused, but still more from the natural effects of time, no MS. of the N. T. of the first three centuries remains. Some of the oldest extant were certainly copied from others which dated from within this period, but as yet no one can be placed further back than the time of Constantine. But though no fragment of the N. T. of the first century still remains, the Italian and Egyptian papyri, which are of that date, give a clear notion of the caligraphy of the period. In these the text is written in columns, rudely divided, in somewhat awkward capital letters (*uncials*), without any punctuation or division of words. The Gr. *iota*, which was afterward *subscripted* (i. e. written under another vowel, *á, é, or ó*, of an improper diphthong), is commonly, but not always, *adscripted* (i. e. written after this vowel); and there is no trace of accents or breathings.—4. In addition to the later MSS., the earliest versions and patristic quotations give very important testimony to the character and history

of the ante-Nicene text. Express statements of readings which are found in some of the most ancient Christian writers are, indeed, the first direct evidence which we have, and are consequently of the highest importance. But till the last quarter of the second century this source of information fails us. Not only are the remains of Christian literature up to that time extremely scanty, but the practice of verbal quotation from the N. T. was not yet prevalent. The evangelic citations in the apostolic Fathers and in Justin Martyr show that the oral tradition was still as widely current as the written Gospels, and there is not in those writers one express verbal citation from the other apostolic books. This latter phenomenon is in a great measure to be explained by the nature of their writings. As soon as definite controversies arose among Christians, the text of the N. T. assumed its true importance. The earliest monuments of these remain in the works of Irenæus, Hippolytus (Pseudo-Origen), and Tertullian, who quote many of the arguments of the leading adversaries of the Church. Charges of corrupting the sacred text are urged on both sides with great acrimony. Wilful interpolations or changes are extremely rare, if they exist at all, except in the case of Marcion. (LUKE, GOSPEL OF.) His mode of dealing with the writings of the N. T., in which he was followed by his school, was, as Tertullian says, to use the knife rather than subtlety of interpretation. But after making some fundamental changes he seems to have adhered scrupulously to the text which he found. In the isolated readings which he is said to have altered, it happens not unfrequently that he has retained the right reading, and that his opponents are in error.—5. Several very important conclusions follow from this earliest appearance of textual criticism. (a.) It is evident that various readings existed in the books of the N. T. at a time prior to all extant authorities. History affords no trace of the pure apostolic originals. (b.) From the preservation of the first variations noticed, which are often extremely minute, in one or more of the primary documents still left, we may be certain that no important changes have been made in the sacred text which we cannot now detect. (c.) From the minuteness of some of the variations which are urged in controversy, it is obvious that the words of the N. T. were watched with the most jealous care, and that the least differences of phrase were guarded with scrupulous and faithful piety.—6. Passing from these isolated quotations we find the first great witnesses to the apostolic text in the early Syriac and Latin versions (VERSIONS, ANCIENT), and in the rich quotations of Clement of Alexandria († about A. D. 220) and Origen (A. D. 184–254). From the extant works of Origen alone no inconsiderable portion of the whole N. T. might be transcribed.—7. The evangelic text of Clement of Alexandria is far from pure. Two chief causes contributed especially to corrupt the text of the Gospels: the attempts to harmonize parallel narratives, and the influence of tradition. The former assumed a special importance from the *Diatessaron* of Tatian (about A. D. 170), and the latter, which was very great in the time of Justin Martyr (see § 2 above), still lingered.—8. But Origen stands as far first of all the ante-Nicene Fathers in critical authority as he does in commanding genius, and his writings are an almost inexhaustible storehouse for the history of the text.—9. In thirteen cases Origen has expressly noticed varieties of reading in the Gospels (Mat. viii. 28, xvi. 20, xviii. 1, xxi. 5, xxi. 9, 15, xxvii.

17; Mk. iii. 18; Lk. i. 46, ix. 48, xiv. 19, xxiii. 45; Jn. i. 3, 4, 28). In three of these passages the variations which he notices are no longer found in our Greek copies (Mat. xxi. 9 or 15; Mk. iii. 18 [ii. 14]; Lk. i. 46); in seven our copies are still divided; in two (Mat. viii. 28; Jn. i. 28) the reading which was only found in a few MSS. is now widely spread: in the remaining place (Mat. xxvii. 17), a few copies of no great age retain the interpolation which was found in his time "in very ancient copies."—10. The evangelic quotations of Origen are not wholly free from the admixture of traditional glosses which have been noticed in Clement of Alexandria, and often present a confusion of parallel passages; but there is little difficulty in separating his genuine text from these natural corruptions.—11. In the Epistles Origen once notices a striking variation in Heb. ii. 9, *christi theou* (Gr. = *without God*) for *chariti theou* (A. V. "through the grace of God"), which is still attested; but, apart from the specific reference to variations, it is evident that he himself used MSS. at different times which varied in many details. There can be no doubt that in Origen's time the variations in the N. T. MSS. were beginning to lead to the formation of specific groups of copies.—12. The most ancient MSS. and versions now extant exhibit the characteristic differences which have been found to exist in different parts of the works of Origen. These cannot have had their source later than the beginning of the third century, and probably were much earlier. Bengel was the first (1734) who pointed out the affinity of certain groups of MSS., which, as he remarks, must have arisen before the first versions were made. Originally he distinguished three families, of which the *Codex Alexandrinus* (i. e. the Alexandrine MS. known as A), the Greek-Latin MSS., and the mass of the more recent MSS. were respectively the types (see § 28 below). At a later time (1737) he adopted the simpler division of "two nations," the Asiatic and the African. In the latter he included *Codex Alexandrinus* (the Alexandrine MS.), the Greek-Latin MSS., the Ethiopic, Coptic (Memphitic), and Latin versions: the mass of the remaining authorities formed the Asiatic class. The honor of carefully determining the relations of critical authorities for the N. T. text belongs to Griesbach. According to him two different recensions of the Gospels existed at the beginning of the third century: the *Alexandrine*, represented by the MSS. known as B, C, L, 1, 13, 33, 69, 108, the Coptic, Ethiopic, Armenian, and later Syrian versions, and the quotations of Clement of Alexandria, Origen, Eusebius, Cyril of Alexandria, Isidore of Pelusium; and the *Western*, represented by D, and in part by 1, 13, 69, the ancient Latin version and Fathers, and sometimes by the Syriac and Arabic versions. *Codex Alexandrinus* was to be regarded as giving a more recent (Constantinopolitan) text in the Gospels.—13. The chief object of Griesbach in propounding his theory of recensions was to destroy the weight of mere numbers. Others carried on the investigation from the point where he left it. Hug endeavored, with much ingenuity, but on slender external proof, to place the theory on an historical basis. According to him, the text of the N. T. fell into a state of considerable corruption during the second century. To this form he applied the term *koiné ekdosis* (Gr. = *common edition*). In the course of the third century this text, he supposed, underwent a threefold revision, by Hesychius in Egypt, by Lucian at Antioch, and by Origen in Palestine. So that

our existing documents represent four classes: (1.) The *unrevised*, D, 1, 13, 69, in the Gospels; D, E, in the Acts; D, F, G, in the Pauline Epistles: the old Latin and Thebaic, and in part the Peshito Syriac; and the quotations of Clement of Alexandria and Origen. (2.) The Egyptian recension of Hesychius; B, C, L, in Gospels; A, B, C, 17, in the Pauline Epistles; A, B, C, Acts and Catholic Epistles; A, C, in the Apocalypse: the Memphitic version; and the quotations of Cyril of Alexandria and Athanasius. (3.) The Asiatic (Antioch-Constantinople) recension of Lucian; E, F, G, H, S, V, and the recent MSS. generally; the Gothic and Slavonic versions and the quotations of Theophylact. (4.) The supposed Palestinian recension of Origen (of the Gospels); A, K, M; the Philoxenian Syriac; the quotations of Theodoret and Chrysostom. Hug showed that the line of demarcation between the Alexandrine and Western families of Griesbach was practically an imaginary one.—14. Little remains to be said of later theories. Eichhorn accepted Hug's classification. Scholz, returning to a simpler arrangement, divided the authorities into two classes, Alexandrine and Constantinopolitan. Lachmann, who accepted only ancient authorities, simply divided them into Eastern (Alexandrine) and Western. Tischendorf, with some reserve, proposes two great classes, each consisting of two pairs, the Alexandrine and Latin, the Asiatic and Byzantine. Tregelles, discarding all theories of recension as historic facts, insists on the general accordance of ancient authorities as giving an ancient text in contrast with the recent text of the more modern copies. At the same time he points out what we may suppose to be the "genealogy of the text." This he exhibits in the following form:

D	≈ B Z	
	C L E 1 33	
	P Q T R	A
	X (Δ) 69	K M H
		E F G S U, &c.

15. The fundamental error of the recension theories is the assumption either of an actual recension or of a pure text of one type, which was variously modified in later times, while the fact seems to be exactly the converse. Groups of copies spring not from the imperfect reproduction of the character of one typical exemplar, but from the multiplication of characteristic variations. They are the results of a tendency, and not of a fact. They advance *toward* and do not lead *from* that form of text which we regard as their standard. A pure Alexandrine or Western text is simply a fiction. The tendency at Alexandria or Carthage was in a certain direction, and necessarily influenced the character of the current text with accumulative force as far as it was unchecked by other influences. This is a general law, and the history of the apostolic books is no exception to it. All experience shows that certain types of variation propagate and perpetuate themselves, and existing documents prove that it was so with the copies of the N. T. Many of the links in the genealogical table of our MSS. may be wanting, but the specific relations between the groups, and their comparative antiquity of origin, are clear. This antiquity is determined, not by the demonstration of the immediate dependence of particular copies upon one another, but by reference to a common standard. The varieties in our documents are the result of slow and natural growth, and not of violent change.—16. From the consideration of the

earliest history of the N. T. text we now pass to the era of MSS. The quotations of Dionysius Alexandrinus († A. D. 264), Petrus Alexandrinus († about A. D. 312), Methodius († A. D. 311), and Eusebius († A. D. 340), confirm the prevalence of the ancient type of text; but the public establishment of Christianity in the Roman empire necessarily led to important changes. Not only were more copies of the N. T. required for public use (compare § 3), but the nominal or real adherence of the higher ranks to the Christian faith must have largely increased the demand for costly MSS. As a natural consequence the rude Hellenistic forms gave way before the current Greek, and at the same time it is reasonable to believe that smoother and fuller constructions were substituted for the rougher turns of the apostolic language. In this way the foundation of the Byzantine text was laid. Meanwhile the multiplication of copies in Africa and Syria was checked by Mohammedan conquests. The Greek language ceased to be current in the West. The progress of the Alexandrine and Occidental families of MSS. was thus checked; and the mass of recent copies necessarily represent the accumulated results of one tendency.—17. The appearance of the oldest MSS. has been already described (§ 3). The MSS. of the fourth century, of which *Codex Vaticanus* (i. e. the Vatican MS. known as B) may be taken as a type, present a close resemblance to these. The writing is in elegant continuous (capitals) uncials, in three columns, without initial letters or *iota subscript*, or *ascript*. A small interval serves as a simple punctuation; and there are no accents or breathings by the hand of the first writer, though these have been added subsequently. *Uncial* writing continued in general use till the middle of the tenth century. From the eleventh century downward *cursive* writing prevailed, but this passed through several forms sufficiently distinct to fix the date of a MS. with tolerable certainty. The earliest cursive Biblical MS. is dated 964 A. D. The MSS. of the fourteenth and fifteenth centuries abound in the contractions which afterward passed into the early printed books. The oldest MSS. are written on the thinnest and finest vellum; in later copies the parchment is thick and coarse. Papyrus was very rarely used after the ninth century. In the tenth century cotton paper was generally employed in Europe; and one example at least occurs of its use in the ninth century. In the twelfth century the common linen or rag paper came into use. One other kind of material requires notice, redressed parchment. Even at a very early period the original text of a parchment MS. was often erased, that the material might be used afresh. In lapse of time the original writing frequently reappears in faint lines below the later text, and in this way many precious fragments of Biblical MSS., once obliterated for the transcription of other works (and hence called *palimpsests* fr. Gr. = *scratched*, or *scraped again*), have been recovered. The earliest Biblical palimpsest is not older than the fifth century (Plate i. fig. 3).—18. In uncial MSS. the contractions are usually limited to a few very common forms (ΘC, IC, ΠHP, ΔΑΔ, &c., i. e. *theos* [God], *Ιησους* [Jesus], *πατερ* [father], *Δαυειδ* [David], &c.). A few more occur in later uncial copies, in which there are also some examples of the ascript *iota*. Accents are not found in MSS. older than the eighth century. Breathings (the rough ' [= English *h*], and the smooth '), and the apostrophe ' marking the omission of a short vowel at the end of a word

occur somewhat earlier. The oldest punctuation, after the simple interval, is a stop like the modern Greek colon (·). The present Greek note of interrogation (·) came into use in the ninth century.—19. A very ingenious attempt was made to supply an effectual system of punctuation for public reading, by Euthalius, who published an arrangement of St. Paul's Epistles in clauses or lines (Gr. *stichoi*), in 458, and another of the Acts and Catholic Epistles, in 490. The same arrangement was applied to the Gospels by some unknown hand, and probably at an earlier date.—20. The earliest extant division of the N. T. into sections occurs in Codex B (the Vatican MS.; see below § 28). This division is elsewhere found only in the palimpsest fragment of St. Luke, Z. In the Acts and the Epistles there is a double division in B, one of which is by a later hand. The Epistles of St. Paul are treated as one unbroken book divided into ninety-three sections, in which Hebrews originally stood between Galatians and Ephesians.—21. Two other divisions of the Gospels must be noticed. The first of these was a division into "chapters" (Gr. *kephalaia*, *titloi*, L. *breves*), which correspond with distinct sections of the narrative, and are, on an average, a little more than twice as long as the sections in B (see § 28). This division is found in A, C, R, Z, and must therefore have come into general use some time before the fifth century. The other division was constructed with a view to a harmony of the Gospels. It owes its origin to Ammonius of Alexandria, a scholar of the third century, who constructed a Harmony of the Evangelists, taking Matthew as the basis round which he grouped the parallel passages from the other Gospels. Eusebius of Cesarea completed his labor with great ingenuity, and constructed a notation and a series of tables, which indicate at a glance the parallels which exist to any passage in one or more of the other Gospels, and the passages which are peculiar to each.—22. The division of the Acts and Epistles into chapters came into use at a later time. It is commonly referred to Euthalius, who, however, says that he borrowed the divisions of the Pauline Epistles from an earlier Father; and there is reason to believe that the division of the Acts and Catholic Epistles which he published was originally the work of Pamphilus the Martyr. The Apocalypse was divided into sections by Andreas of Cesarea, about A. D. 600.—23. The titles of the sacred books are from their nature additions to the original text. The distinct names of the Gospels imply a collection, and the titles of the Epistles are notes by the possessors, and not addresses by the writers. In their earliest form they are quite simple, *According to Matthew*, &c.; *To the Romans*, &c.; *First of Peter*, &c.; *Acts of Apostles*; *Apocalypse*. These headings were gradually amplified till they assumed such forms as *The holy Gospel according to John*; *The first Catholic Epistle of the holy and all-praiseworthy Peter*, &c. In the same way the original subscriptions, which were merely repetitions of the titles, gave way to vague traditions as to the dates, &c., of the books. Those appended to the Epistles, which have been translated in the A. V., are attributed to Euthalius, and their singular inaccuracy is a valuable proof of the utter absence of historical criticism at the time when they could find currency.—24. Very few MSS. contain the whole N. T., twenty-seven in all out of the vast mass of extant documents. Besides the MSS. of the N. T., or of parts of it, there are also Lectionaries, which contain extracts from the Gos-

pels, or from the Gospels and Acts, or rarely from the Gospels and Epistles, arranged for the Church-services.—25. When a MS. was completed it was commonly submitted, at least in early times, to a careful revision. Two Greek terms occur in describing this process, *ho antiballôn* (= *the one who throws against or compares*) and *diorthôtês* (= *one who makes straight, a corrector*). It has been suggested that the work of the former answered to that of the "corrector of the press," while that of the latter was more critical. Possibly, however, the words only describe two parts of the same work. Besides this official correction at the time of transcription, MSS. were often corrected by different hands in later times.—26. The number of uncial MSS. remaining, though great when compared with the ancient MSS. extant of other writings, is inconsiderable. Tischendorf reckons forty in the Gospels, to which must be added three others, with six additional fragments, in all forty-nine. Of these six are entire, four nearly entire, ten contain very considerable portions, twenty-nine contain only fragments, some very small, others more or less considerable. In the Acts there are ten, three being entire, one nearly entire, four large fragments, two small fragments. In the Catholic Epistles six, five entire. In the Pauline Epistles fifteen, one entire, two nearly entire. In the Apocalypse four, three entire, one nearly entire.—27. According to date these MSS. (see § 28) are classed as follows:—Fourth century:  $\alpha$ , B. Fifth century: A, C, and some fragments including Q, T. Sixth century: D, P, R, Z, E<sub>2</sub>, D<sub>2</sub>, H<sub>2</sub>, and four smaller fragments. Seventh century: Some fragments including  $\Theta$ . Eighth century: E, L, A,  $\Xi$ , B<sub>2</sub>, and some fragments. Ninth century: F, K, M, X, T,  $\Delta$ , H<sub>2</sub>, G<sub>2</sub> = L<sub>2</sub>, F<sub>2</sub>, G<sub>2</sub>, K<sub>2</sub>, M<sub>2</sub>, and fragments. Tenth century: G, H, S, U (E<sub>3</sub>).—28. A complete description of these MSS. is given in the great critical editions of the N. T.: here those only can be briefly noticed which are of primary importance.—A (i.) Primary Uncials of the Gospels.  $\alpha$  [= ALEXH] (*Codex Sinaiticus* [the Sinai MS.] = *Codex Friderico-Augustanus* [the Frederic-Augustus MS.] of LXX.), at St. Petersburg, obtained by Tischendorf from the convent of St. Catherine, Mount Sinai, in 1859, and since published in fac-simile at the expense of the emperor of Russia. The N. T. is entire, and the Epistle of Barnabas and parts of the Shepherd of Hermas are added. It is probably the oldest of the MSS. of the N. T., and of the fourth century.—A (*Codex Alexandrinus* [the Alexandrine MS.], British Museum), a MS. of the entire Greek Bible (SEPTUAGINT), with the Epistles of Clement added. It was given by Cyril Lucar, patriarch of Constantinople, to King Charles I. of England, in 1628. It contains the whole N. T., with some chasmas. It was probably written in the first half of the fifth century (Plate i. fig. 2).—B (*Codex Vaticanus* [the Vatican MS.], 1209), a MS. of the entire Greek Bible, which seems to have been in the Vatican Library almost from its commencement (about A. D. 1450). It contains the N. T. entire to IIb. ix. 14: the rest of the Hebrews, the Pastoral Epistles, and Revelation were added in the fifteenth century. The MS. is assigned to the fourth century.—C (*Codex Ephraemi rescriptus* = *the rewritten MS. of Ephrem*), No. 9 in the Imperial Library, Paris), a palimpsest MS. which contains fragments of the LXX. and of every part of the N. T. In the twelfth century the original writing was effaced and some Greek writings of Ephraem Syrus (= St. Ephrem the Syrian) were

written over it. The MS. was brought to Florence from the East at the beginning of the sixteenth century, and came thence to Paris with Catherine de' Medici. The only entire books which have perished are 2 Thessalonians and 2 John, but lacunæ of greater or less extent occur constantly. It is of about the same date as *Codex Alexandrinus*.—D (*Codex Bezae* [= *Beza's MS.*], University Library, Cambridge, England), a Greek-Latin MS. of the Gospels and Acts with a small fragment of 3 John, presented to the University of Cambridge by Beza in 1581. The text is very remarkable, and, especially in the Acts, abounds in singular interpolations. The MS. is referred to the sixth century.—L (*Paris, Codex Imperialis* [= *Imperial MS.* 62], one of the most important of the late uncial MSS. It contains the four Gospels, except Mat. iv. 22-v. 14, xxviii. 17-20; Mk. x. 16-20, xv. 2-20; Jn. xxi. 15-25. The text agrees in a remarkable manner with B and Origen. It is of the eighth century.—R (*British Museum Additions* 17,211), a very valuable palimpsest, brought to England in 1847 from the convent of St. Mary Deipara in the Nitrian desert. The original text is covered by Syrian writing of the ninth or tenth century. About 585 verses of Luke were deciphered by Tregelles in 1854, and Tischendorf in 1856. It is assigned to the sixth century (Plate i. fig. 3).—X (*Codex Monacensis* [= *Munich MS.*]) in the University Library at Munich; formerly at Ingolstadt, and afterward at Landshut. It contains fragments of the four Gospels. Of the tenth century.—Z (*Codex Dublinensis rescriptus* [= *Dublin rescript MS.*], in the Library of Trinity College, Dublin), a palimpsest containing large portions of Matthew. It is assigned to the sixth century.— $\Delta$  [= *delta*] (*Codex Sangallensis* [= *St. Gall MS.*]), a MS. of the Gospels, with an interlinear Latin translation, in the Library of St. Gall (see G<sub>2</sub> below).— $\Xi$  [= *xi*] (*Codex Zacynthius* [= *Zante MS.*]), a palimpsest in possession of the Bible Society, London, containing important fragments of Luke. It is probably of the eighth century, and is accompanied by a *Catena*.—The following are important fragments:—I (Tischendorf), various fragments of the Gospels (Acts, Pauline Epistles).—N (*Codex Cotton.* [= *Cotton MS.*]), (formerly J, N), twelve leaves of purple vellum, the writing being in silver. Four leaves are in the British Museum; six in the Vatican; two in the Imperial Library at Vienna. Tischendorf has recently found thirty-three other leaves, containing about one-third of Mk. (Davidson, in Kitto). Sixth century.—N<sup>b</sup> (*British Museum Additions*, 17, 136), a palimpsest. Century fourth, fifth.—P, Q (*Codd. Guelpherbytanii* [= MSS. in the Ducal Library at Wolfenbüttel]), two palimpsests, respectively of the fifth and sixth centuries.—T (*Codex Borgianus* [= *Borgian MS.*], Library of the Propaganda at Rome), of the fifth century.—Y (*Codex Barberini* [= *Barberinian MS.*], 225, Rome). Eighth century.— $\Theta$  [= *theta*] (*Codex Tischendorf, i.*, Leipzig). Seventh century.—(ii.) The Secondary Uncials are in the Gospels:—E (*Basileensis* [= MS. in the Public Library at Basle], K. iv. 35). Eighth century.—F (*Rheno-trajectinus* [= in the Library at Utrecht], formerly *Boreeli* [i. e. Boreel's MS.]). Ninth century.—G (British Museum, Harleian, 5684). Century ninth, tenth.—H (*Hamburgensis Seidelii* [= *Seidel's MS.*], in the Public Library at Hamburg). Ninth century.—K (*Codex Cypricus* [= *Cyprian MS.*], in the Imperial Library, Paris, No. 63). Ninth century.—M (*Codex Campianus* [= MS. of Abbé des Camps], in the Imperial Library, Paris, No. 48). Tenth century.—S

(*Vaticanus* [= in the Vatican Library, No. 354]). Tenth century.—U (*Codex Navianus*, now in St. Mark's Library, Venice). Tenth century.—V (*Mosquensis*, in the Library of the Holy Synod at Moscow). Ninth century.—Γ [= *gamma*] (*Bodleianus* [= in the Bodleian Library]). Ninth century.—Α [= *lambda*] (*Codex Tischendorf*, iii., Bodleian). Century eighth, ninth.—Σ [= *sigma*] (*St. Petersburg*). Century eighth, ninth (?).—Β (i.). Primary Uncials of the Acts and Catholic Epistles. α, A, B, C, D, (see above Α i.). Ε<sub>2</sub> (*Codex Laudianus* [= MS. of *Laud*], 35), a Greek-Latin MS. of the Acts, probably brought to England by Theodore of Tarsus, 668, and used by Bede. It was given to the University of Oxford by Archbishop Laud, in 1636. Century sixth, seventh.—(ii.) The Secondary Uncials are—G<sub>2</sub> = L<sub>2</sub> (*Codex Angelicus* [*Passionei*], named from Cardinal Passionei, its former owner; a MS. in the Library of the Augustine monks, Rome); it contains most of the Acts and the Catholic and Pauline Epistles. Ninth century.—H<sub>2</sub> (*Codex Mutinensis*, in the Ducal Library of *Modena*), of the Acts. Ninth century.—K<sub>2</sub> (*Mosquensis* [= of *Moscow*]), of the Catholic Epistles. Ninth century.—Ο (i.). Primary Uncials of the Pauline Epistles: α, A, B, C (see Α i.). D<sub>2</sub> (*Codex Claromontanus* [i. e. from Clermont, near Beauvais], Paris, Imperial Library, No. 107), a Greek-Latin MS. of the Pauline Epistles, once (like D) in the possession of Beza. It passed to the Royal Library at Paris in 1707, where it has since remained. The MS. is entire except Rom. i. 1-7. The passages Rom. i. 27-30 (in Latin, i. 24-27) were added at the close of the sixth century, and 1 Cor. xiv. 13-32 by another ancient hand. The MS. is of the middle of the sixth century.—F<sub>2</sub> (*Codex Augiensis* [= *Augian* MS.], in the Library of Trinity College, Cambridge, B, 17, 1), a Greek-Latin MS. of St. Paul's Epistles, bought by Bentley from the Monastery of Reichenau (in *L. Augia Major*), Switzerland, in 1718, and left to Trinity College by his nephew in 1786. It is assigned to the ninth century.—G<sub>2</sub> (*Codex Bernerianus* [named from Dr. Boerner, formerly its owner]; now in the Royal Library, Dresden), a Greek-Latin MS. of the Pauline Epistles, originally a part of the same volume with Δ (*delta* above); derived from the same Greek original as F<sub>2</sub> but widely different in the Latin version.—The following fragments are of great value:—H<sub>2</sub> (*Codex Coislinianus* [named from De Cambout-Coislin, bishop of Metz, in the seventeenth century, once its owner]; now in the Imperial Library, Paris, No. 202), part of a stichometrical MS. of the sixth century, consisting of twelve leaves from the Pauline Epistles: two more are at St. Petersburg.—M<sub>2</sub> (Hamburg; London), containing Heb. i. 1-iv. 3; xii. 20-end, and 1 Cor. xv. 52-2 Cor. i. 15; 2 Cor. x. 13-xii. 5, written in bright red ink in the tenth century.—(ii.) The Secondary Uncials are:—K<sub>2</sub>, L<sub>2</sub> [see above Β (ii.)].—E<sub>2</sub> (*Codex Sangermanensis*, named from the Abbey of St. Germain des Prez, Paris, where it was long preserved [Tregelles, in Horne's *Introduction*]; now at St. Petersburg), a Greek-Latin MS. of the Pauline Epistles, of which the Greek text was badly copied from D<sub>2</sub> after it had been thrice corrected, and is of no value. The Latin text is of some slight value, but has not been well examined.—D (i.). The Primary Uncials of the Apocalypse. α, A, C [see above Α (i.)]. (ii.). The Secondary Uncial is—B<sub>2</sub> (*Codex Vaticanus* [Basilianus], 2,066); formerly belonging to the Basilian monastery, Rome; now in the Vatican Library; containing homilies of Basil and Greg-

ory of Nyssa, with Revelation entire (Tregelles, in Horne's *Introduction*).—29. The number of the cursive MSS. (*minuscules*) in existence cannot be accurately calculated. Tischendorf catalogues about 500 of the Gospels, 200 of the Acts and Catholic Epistles, 250 of the Pauline Epistles, and a little less than 100 of the Apocalypse (exclusive of lectionaries); but this enumeration is only a rough approximation. Mr. Scrivener adds more than 150 to Tischendorf's number. Some of the cursive MSS. are well known and of great value; but only a few out of this whole number have been thoroughly collated; many are known only by old references; still more have been "inspected" most cursorily.—30. Having surveyed in outline the history of the transmission of the written text, and the chief characteristics of the MSS. in which it is preserved, we are in a position to consider the extent and nature of the variations in different copies. It is impossible to estimate the number of these exactly, but they cannot be less than 120,000 in all, though of these a very large proportion consist of differences of spelling and isolated aberrations of scribes, and of the remainder comparatively few alterations are sufficiently well supported to create reasonable doubt as to the final judgment. Probably there are not more than 1,600 to 2,000 places in which the true reading is a matter of uncertainty, even if we include in this questions of order, inflection, and orthography: the doubtful readings by which the sense is in any way affected are much fewer, and those of dogmatic importance can be easily numbered.—31. Various readings are due to different causes: some arose from accidental, others from intentional alterations of the original text. (i.) Accidental variations or *errata*, are by far the most numerous class, and admit of being referred to several obvious sources. (a.) Some are errors of *sound*. The most frequent form of this error is called *Itacism*, a confusion of different varieties of the *I*-sound, by which (*oi, u*) *é, i, ei, e*, &c., are constantly interchanged. Other vowel-changes, as of *o* and *δ*, *ou* and *δ*, &c., occur, but less frequently. Very few MSS. are wholly free from mistakes of this kind, but some abound in them.—32. (b.) Other variations are due to errors of *sight*. These arise commonly from the confusion of similar letters, or from the repetition or omission of the same letters, or from the recurrence of a similar ending in consecutive clauses which often causes one to be passed over when the eye mechanically returns to the copy. To these may be added the false division of words in transcribing the text from the continuous uncial writing.—33. (c.) Other variations may be described as errors of *impression* or *memory*. The copyist after reading a sentence from the text before him often failed to reproduce it exactly. He transposed the words, or substituted a synonym for some very common term, or gave a direct personal turn to what was objective before. Variations of order are the most frequent, and very commonly the most puzzling questions of textual criticism. Examples occur in every page, almost in every verse of the N. T.—34. (ii.) Of intentional changes some affect the expression, others the substance of the passage. (a.) The intentional changes in language are partly changes of Hellenistic forms for those in common use, and partly modifications of harsh constructions. Imperfect constructions are completed in different ways. Apparent solecisms are corrected. Variations in the orthography of proper names ought probably to be placed under this head.—35.

(b.) The changes introduced into the substance of the text are generally additions, borrowed either from parallel passages or from marginal glosses. The first kind of addition is particularly frequent in the Gospels. Glosses are of more partial occurrence. Of all Greek MSS. *Codex Beza* (D) is the most remarkable for the variety and singularity of the glosses which it contains (see § 28 above; ACTS OF THE APOSTLES).—36. (c.) Many of the glosses introduced into the text spring from the ecclesiastical use of the N. T., just as in the Gospels of the Episcopal Prayer-Book introductory clauses have been inserted here and there. These additions are commonly notes of person or place. Sometimes an emphatic clause is added. But the most remarkable liturgical insertion is the doxology in the Lord's Prayer, Mat. vi. 13; and it is probable that the interpolated verse, Acts viii. 37, is due to a similar cause.—37. (d.) Sometimes, though rarely, various readings noted on the margin are incorporated in the text.—38. (e.) The number of readings which seem to have been altered for distinctly dogmatic reasons is extremely small. In spite of the great revolutions in thought, feeling, and practice through which the Christian Church passed in fifteen centuries, the copyists of the N. T. faithfully preserved, according to their ability, the sacred trust committed to them. There is not any trace of intentional revision designed to give support to current opinions (Mat. xvii. 21; Mk. ix. 29; 1 Cor. vii. 5, need scarcely be noticed). The utmost that can be urged is that internal considerations may have decided the choice of readings. But the general effect of these variations is scarcely appreciable, nor are the corrections of assumed historical and geographical errors much more numerous.—39. The great mass of various readings are simply variations in form. There are, however, one or two greater variations of a different character. The most important of these are Jn. vii. 53–viii. 12; Mk. xvi. 9–end; Rom. xvi. 25–27. The first stands quite by itself; and there seems to be little doubt that it contains an authentic narrative, but not by the hand of St. John. (JOHN, GOSPEL OF.) The two others, taken in connection with the last chapter of John, suggest the possibility that the apostolic writings may have undergone in some cases authoritative revision. (MARK, GOSPEL OF; ROMANS, EPISTLE TO THE.)—40. MSS., it must be remembered, are but one of the three sources of textual criticism. The versions and patristic quotations, though themselves liable to corruption, are scarcely less important in doubtful cases.

II. *The History of the Printed Text.*—1. The history of the printed text of the N. T. may be divided into three periods. The first of these extends from the labors of the Complutensian editors to those of Mill: the second from Mill to Scholz; the third from Lachmann to the present time. The criticism of the first period was necessarily tentative and partial: the materials available for the construction of the text were few, and imperfectly known; the relative value of various witnesses was as yet undetermined; and however highly we may rate the scholarship of Erasmus or Beza, this could not supersede the teaching of long experience in the sacred writings any more than in the writings of classical authors. The second period marks a great progress: the evidence of MSS., of versions, of Fathers, was collected with the greatest diligence and success: authorities were compared and classified: principles of observation and judgment were laid down. But the influence

of the former period still lingered. The old "received" text was supposed to have some prescriptive right on the ground of its prior publication, and not on the ground of its merits. The third period was introduced by the declaration of a new and sounder law. It was laid down that no right of possession could be pleaded against evidence. The "received" text, as such, was allowed no weight whatever. Its authority, on this view, must depend solely on critical worth. From first to last, in minute details of order and orthography, as well as in graver questions of substantial alteration, the text must be formed by a free and unfettered judgment—on a critical and not on a conventional basis. Each period will now be noticed more in detail.—

(i.) *From the Complutensian Polyglot to Mill.*—2. *The Complutensian Polyglot.* The Latin VULGATE and the Hebrew text of the OLD TESTAMENT had been published some time before any part of the original Greek of the N. T. The Hymns of Zacharias and the Virgin (Lk. i. 42–56, 68–80) were appended to a Venetian edition of a Psalter in 1486. This was the first part of the N. T. which was printed in Greek. In 1504, chs. i.–vi. of John were added to an edition of the poems of Gregory of Nazianzus, published by Aldus. But the glory of printing the first Greek Testament is due to the princely Cardinal Ximenes. This great prelate as early as 1503 engaged the services of a number of scholars to superintend an edition of the whole Bible in the original Hebrew and Greek, with the addition of the Chaldee Targum of Onkelos, the LXX. version, and the Vulgate. The work was executed at Alcalá (in L. *Complutum*), where he had founded a university. The volume containing the N. T. was printed first, and was completed on January 10, 1514. The whole work was not finished till July 10, 1517, about four months before the death of the Cardinal. Various obstacles still delayed the publication, and it was not generally circulated till 1522. The impression was limited to 600 copies. The most celebrated men who were engaged on the N. T., which forms the fifth volume of the entire work, were Lebrixa (Nebrissensis) and Stunica. Considerable discussion has been raised as to the MSS. which they used. The editors describe these generally as "copies of the greatest accuracy and antiquity," sent from the Papal Library at Rome; and in the dedication to Leo acknowledgment is made of his generosity in sending MSS. of both "the Old and N. T." The whole question, however, is now rather of bibliographical than of critical interest. There can be no doubt that the copies, from whatever source they came, were of late date, and of the common type. The chief editions which follow the Complutensian in the main, are those of (Plantin) Antwerp, 1564–1612; Geneva, 1609–1632; Mainz, 1753.—3. *The editions of Erasmus.* The history of the edition of Erasmus, which was the first published edition of the N. T., is happily free from all obscurity. Erasmus had paid considerable attention to the study of the N. T. when he received an application from Froben, a printer of Basle with whom he was acquainted, to prepare a Greek text for the press. Froben was anxious to anticipate the publication of the Complutensian edition, and the haste with which the work of Erasmus was completed shows that little consideration was paid to the exigencies of textual criticism. The request was made April 17, 1515, while Erasmus was in England. The details of the printing were not settled in September in the same year, and the whole work was finished

in February, 1516. The work, as Erasmus afterward confessed, was done in reckless haste, and that too in the midst of other heavy literary labors. The MSS. which formed the basis of his edition are still, with one exception, preserved at Basle; and two which he used for the press contain the corrections of Erasmus and the printer's marks. The one is a MS. of the Gospels of the sixteenth century of the ordinary late type (marked 2 Gosp.): the other a MS. of the Acts and the Epistles (2 Acts, Epp.), somewhat older but of the same general character. Erasmus also made some use of two other Basle MSS. (1 Gosp.; 4 Acts, Epp.); the former of these is of great value, but the important variations from the common text which it offers, made him suspect that it had been altered from the Latin. For the Apocalypse he had only an imperfect MS. which belonged to Reuchlin. The last six verses were wanting, and these he translated from the Latin, a process which he adopted in other places where it was less excusable. The received text contains two memorable instances of this bold interpolation (Acts viii. 37, ix. 5, 6). But he did not neglect the testimony of the heavenly witnesses (1 Jn. v. 7), an act of critical faithfulness which exposed him to the attacks of enemies. After his first edition was published Erasmus continued his labors on the N. T.; and in March, 1519, a second edition appeared which was altered in about 400 places, of which Mill reckons that 380 were improvements. But his chief labor seems to have been spent upon the Latin version, and in exposing the "solecisms" of the common Vulgate, the value of which he completely misunderstood. These two editions consisted of 3,300 copies, and a third edition was required in 1522, when the Complutensian Polyglot also came into circulation. In this edition 1 Jn. v. 7 was inserted for the first time on the authority of the "Codex Britannicus" (i. e. Codex Montfortianus, a cursive MS. written by different hands in the fifteenth and sixteenth centuries [so Tregelles], once owned by Dr. Montfort, and now in the library of Trinity College, Dublin), in a form which obviously betrays its origin as a clumsy translation from the Vulgate. The text was altered in about 118 places. Of these corrections thirty-six were borrowed from an edition published at Venice in the office of Aldus, 1518, which was taken in the main from the first edition of Erasmus, even so as to preserve errors of the press, but yet differed from it in about 200 places, partly from error and partly from MS. authority. This edition is further remarkable as giving a few (nineteen) various readings. Three other early editions give a text formed from the second edition of Erasmus and the Aldine, those of Hagenau, 1521, of Cephalæus at Strasburg, 1524, of Bebelius at Basle, 1531. Erasmus at length obtained a copy of the Complutensian text, and in his fourth edition in 1527, gave some various readings from it in addition to those which he had already noted, and used it to correct his own text in the Apocalypse in ninety places, while elsewhere he introduced only sixteen changes. His fifth and last edition (1535) differs only in four places from the fourth, and the fourth edition afterward became the basis of the received text.—4. *The editions of Stephens.* The scene of our history now changes from Basle to Paris. In 1543, Simon de Colines (in L. *Colinæus*) published a Greek text of the N. T., corrected in about 150 places on fresh MS. authority. Not long after it appeared, R. Estienne (i. e. Robert Stephens; L. *Stephanus*) published his first edition (1546), which

was based on a collation of MSS. in the Royal Library with the Complutensian text. He gives no detailed description of the MSS. used, and their character can only be discovered by the quotation of their readings, which is given in the third edition. A second edition very closely resembling the first both in form and text, having the same preface and the same number of pages and lines, was published in 1549; but the great edition of Stephens is that known as the *Regia* (= *Royal*), published in 1550. Of the authorities which he quoted most have been since identified. They were the Complutensian text, ten MSS. of the Gospels, eight of the Acts, seven of the Catholic Epistles, eight of the Pauline Epistles, two of the Apocalypse, in all fifteen distinct MSS. One of these was the *Codex Bezae* (D). Two have not yet been recognized. The collations were made by his son Henry Stephens. Less than thirty changes were made on MS. authority; and except in the Apocalypse, which follows the Complutensian text most closely, "it hardly ever deserts the last edition of Erasmus" (Tregelles). Numerous instances occur in which Stephens deserts his former text and *all his MSS.* to restore an Erasmian reading. Stephens published a fourth edition in 1557 (Geneva), which is only remarkable as giving for the first time the present division into verses.—5. *The editions of Beza and Elzevir.* Nothing can illustrate more clearly the deficiency among scholars of the first elements of the textual criticism of the N. T. than the annotations of *Beza* (1556). This great divine obtained from H. Stephens a copy of the N. T. in which he had noted down various readings from about twenty-five MSS. and from the early editions, but he used the collection rather for exegetical than for critical purposes. The Greek text of *Beza* (dedicated to Queen Elizabeth) was printed by H. Stephens in 1565, and again in 1576; but his chief edition was the third, printed in 1582, which contained readings from the *Codices Bezae* and *Clavomontanus* (D and D<sub>2</sub>; see above, I. § 28). Other editions by *Beza* appeared in 1588-9, 1598, and his (third) text found a wide currency. Among other editions wholly or in part based upon it, those of the *Elzevirs* alone require to be noticed. The first of these editions, famous for the beauty of their execution, was published at Leyden in 1624. It is not known who acted as editor, but the text is mainly that of the third edition of Stephens. Including every minute variation in orthography, it differs from this in 278 places. In these cases it generally agrees with *Beza*, more rarely it differs from both, either by typographical errors, or perhaps by manuscript authority. In the second edition (Leyden, 1633) it was announced that the text was that which was universally received. From this time the Elzevirian text was generally reprinted on the Continent, and that of the third edition of Stephens in England, till quite recent times, as the *Received Text* (Latin *Textus Receptus*).—ii. *From Mill to Scholz.*—6. The second period of the history of the printed text may be treated with less detail. The first important collection of various readings was given by *Walton* in the sixth volume of his Polyglot (London, 1657). The Syriac, Arabic, Ethiopic, and Persian versions of the N. T., together with the readings of *Codex Alexandrinus*, were printed in the fifth volume together with the text of Stephens. To these were added in the sixth the readings collected by Stephens, others from an edition by *Wechel* at Frankfort (1597), the readings of the *Codices Bezae* and *Clavomontanus*, and of fourteen other MSS.

which had been collated under the care of Archbishop Usher. A few more MS. readings were given by *Curcellæus* (*de Courcelles*) in an edition published at Amsterdam, 1658, &c., but the great names of this period continue to be those of Englishmen. The readings of the Coptic and Gothic versions were first given in the edition of (Bishop Fell) Oxford, 1675; reprinted by Gregory, 1703; but Fell's greatest service to the criticism of the N. T. was the liberal encouragement which he gave to Dr. John Mill. The work of *Mill* (Oxford, 1707; Rotterdam, reprinted by Küster, 1710; other copies have on the title-page 1723, 1746, &c.) marks an epoch in the history of the N. T. text. Much in it will not bear the test of historical inquiry, much is imperfect in the materials, much is crude and capricious in criticism, but when every drawback has been made, the edition remains a splendid monument of the labors of a life. The work occupied Mill about thirty years, and was finished only a fortnight before his death. One great merit of Mill was that he recognized the importance of each element of critical evidence, the testimony of MSS., versions and citations, as well as internal evidence. In particular he asserted the claims of the Latin version, and maintained, against much opposition, even from his patron, Bishop Fell, the great value of patristic quotations. He had also a clear view of the necessity of forming a general estimate of the character of each authority, and described in detail those of which he made use. But he did not introduce any changes into the printed text. He repeated the Stephanic text of 1550 without any intentional change.—7. Among those who had known and valued Mill was *Richard Bentley*, the greatest of English scholars. In his earliest work, in 1691, Bentley had expressed generous admiration of the labors of Mill, and afterward, in 1713, in his *Remarks*, triumphantly refuted the charges of impiety with which they were assailed. But Mill had only "accumulated various readings as a promptuary to the judicious and critical reader;" Bentley would "make use of that promptuary . . . and not leave the reader in doubt and suspense" (*Answer to Remarks*, iii. 503). With this view he announced, in 1716, his intention of publishing an edition of the Greek Testament on the authority of the oldest Greek and Latin MSS., "exactly as it was in the best examples at the time of the Council of Nice, so that there shall not be twenty words nor even particles' difference" (iii. 477 to Archbishop Wake). Bentley continued his labors till 1729. After that time they seem to have ceased. The troubles in which he was involved render it unnecessary to seek for any other explanation of the suspension of his work.—8. The conception of Bentley was in advance both of the spirit of his age and of the materials at his command. Textual criticism was forced to undergo a long discipline before it was prepared to follow out his principles. During this time German scholars held the first place. Foremost among these was *Bengel* (1687-1752), who was led to study the variations of the N. T. from a devout sense of the infinite value of every divine word. His merit in discerning the existence of families of documents has been already noticed (I. § 12); but the evidence before him was not sufficient to show the paramount authority of the most ancient witnesses. The labors of *Wetstein* (1693-1754) formed an important epoch in the history of the N. T. His Greek Testament appeared in 1751-2 at Amsterdam. The great service which Wetstein rendered to sacred criticism

was by the collection of materials. He made nearly as great an advance on Mill as Mill had made on those who preceded him. But in the use of his materials he showed little critical tact.—9. It was the work of *Griesbach* (1745-1812) to place the comparative value of existing documents in a clearer light. His first editions (*Synopsis*, 1774; *N. T.* ed. 1, 1777-5), were based for the most part on the critical collections of Wetstein. Not long afterward *Matthæi* published an edition based on the accurate collation of Moscow MSS. These new materials were further increased by the collections of Alter (1786-7), Birch, Adler, and Moldenhawer (1788-1801), as well as by the labors of Griesbach himself. And when Griesbach published his second edition (1796-1806, 2d ed. of vol. i. by D. Schulz, 1827) he made a noble use of the materials thus placed in his hands. His chief error was that he altered the received text instead of constructing the text afresh; but in acuteness, vigor, and candor he stands below no editor of the N. T., and his judgment will always retain a peculiar value.—10. The edition of *Scholz* contributed more in appearance than reality to the furtherance of criticism (1830-1836). This laborious scholar collected a greater mass of various readings than had been brought together before, but his work is very inaccurate, and his own collations singularly superficial.—iii. *From Lachmann to the present time.*—11. In the year after the publication of the first volume of Scholz's N. T. a small edition appeared in a series of classical texts, prepared by *Lachmann* († 1851). In this the admitted principles of scholarship were for the first time applied throughout to the construction of the text of the N. T. The prescriptive right of the *textus receptus* was wholly set aside, and the text in every part was regulated by ancient authority. He published a small edition at Berlin, 1831. The first volume of his larger edition, with both Latin and Greek texts, appeared in 1842; the second, printed in 1845, was published in 1850. The Greek authorities for this, limited to the primary uncial MSS. (I. § 28), and the quotations of Irenæus and Origen, were arranged by the younger Buttmann. Lachmann himself prepared the Latin evidence, and revised both texts. Lachmann delighted to quote Bentley as his great precursor (§ 7); but there was an important difference in their immediate aims. Bentley believed that it would be possible to obtain the true text directly by a comparison of the oldest Greek authorities with the oldest MSS. of the Vulgate. Afterward very important remains of the earlier Latin versions were discovered, and the whole question was complicated by the collection of fresh documents. Lachmann therefore wished in the first instance only to give the current text of the fourth century, which might then become the basis of further criticism. This at least was a great step toward the truth, though it must not be accepted as a final one. But Lachmann's edition, great as its merits are as a first appeal to ancient evidence, is not without serious faults. The materials on which it was based were imperfect. The range of patristic citations was limited arbitrarily. The exclusion of the Oriental versions, however necessary at the time, left a wide margin for later change. The neglect of primary cursives often necessitated absolute confidence on slender MS. authority.—12. The chief defects of Lachmann's edition arise from deficiency of authorities. Another German scholar, *Tischendorf*, has devoted twenty years to enlarging our accurate knowledge of an-

cient MSS. The first edition of Tischendorf (1841) has now no special claims for notice. In his second (Leipzig) edition (1849) he fully accepted the great principle of Lachmann, that the text "must be sought solely from ancient authorities, and not from the so-called received edition," and gave many of the results of his own laborious and valuable collations. During the next few years Tischendorf prosecuted his labors on MSS. with unwearied diligence, and in 1855-9 he published his third (seventh) critical edition. In this he has given the authorities for and against each reading in considerable detail, and included the chief results of his later discoveries. The whole critical apparatus is extremely valuable, and absolutely indispensable to the student. The text, except in details of orthography, exhibits generally a retrograde movement from the most ancient testimony. The Prolegomena are copious and full of interest.—13. Meanwhile the sound study of sacred criticism had revived in England. In 1844 Tregelles published an edition of the Apocalypse in Greek and English, and announced an edition of the N. T. The first part, containing Matthew and Mark, appeared in 1857; the second, completing the Gospels, in 1861. This edition of Tregelles differs from that of Lachmann by the greater width of its critical foundation; and from that of Tischendorf by a more constant adherence to ancient evidence. The editions of Knapp (1797, &c.), Vater (1824), Tittmann (1820, &c.), and Hahn (1840, &c.), have no peculiar critical value. Meyer (1829, &c.) paid greater attention to the revision of the text which accompanies his great commentary; but his critical notes are often arbitrary and unsatisfactory. In the Greek Testament of Alford, as in that of Meyer, the text is subsidiary to the commentary; but it is impossible not to notice the important advance made by the editor in true principles of criticism during the course of its publication. Other annotated editions of the Greek Testament, valuable for special merits, may be passed over as having little bearing on the history of the text.—14. Besides the critical editions of the text of the N. T. various collections of readings have been published separately, which cannot be wholly omitted. In addition to those already mentioned (§ 9) the most important are by Rinck, *Lucubratio Critica*, 1830; Reiche, *Codicum MSS. N. T. Gr. aliquot insigniorum in Bibl. Reg., Paris . . . collatio (= Collation of some of the more important Greek N. T. MSS. in the Royal Library of Paris)*, 1847; Scrivener, *A Collation of about twenty Greek MSS. of the Holy Gospels . . .* 1853; *A Transcript of the Cod. Aug. (F<sub>2</sub>; see I. § 28), with a full Collation of Fifty MSS.*, 1859; and E. de Muralt, of Russian MSS. (N. T. 1848).

III. *Principles of Textual Criticism.* The work of the critic can never be shaped by definite rules. The formal enunciation of principles is but the first step in the process of revision. If there is need anywhere for the most free and devout exercise of every faculty, it must be in tracing out the very words of the apostles and of the Lord Himself. Canons of criticism are more frequently corollaries than laws of procedure, not without use in marking the course to be followed, but intended only to guide and not to dispense with the exercise of tact and scholarship. What appears to be the only sound system of criticism will be seen from the rules which follow.—I. *The text must throughout be determined by evidence, without allowing any prescriptive right to printed editions.* The received text may or may not be correct in any particular case, but this must be determined

solely by an appeal to the original authorities. Nor is it right even to assume the received text as our basis. The question before us is not *What is to be changed?* but, *What is to be read?*—2. *Every element of evidence must be taken into account before a decision is made.* Some uncertainty must necessarily remain; for, when it is said that the text must rest upon evidence, it is implied that it must rest on an examination of the whole evidence. But it can never be said that the mines of criticism are exhausted. To exclude remote chances of error it is necessary to take account of every testimony. No arbitrary line can be drawn excluding MSS., versions or quotations below a certain date. The true text must (as a rule) explain all variations, and the most recent forms may illustrate the original one.—3. *The relative weight of the several classes of evidence is modified by their generic character.* MSS., versions, and citations, the three great classes of external authorities for the text, are obviously open to characteristic errors. The first are peculiarly liable to errors from transcription (comp. I. § 31 ff.). The last two are liable to this cause of corruption and also to others. The genius of the language into which the translation is made may require the introduction of connecting particles or words of reference, as can be seen from the italicized words in the A. V. Glosses or marginal additions are more likely to pass into the text in the process of translation than in that of transcription. Quotations, on the other hand, are often partial or from memory, and long use may give a traditional fixity to a slight confusion or adaptation of passages of Scripture. These grounds of inaccuracy are, however, easily determined, and there is generally little difficulty in deciding whether the rendering of a version or the testimony of a Father can be fairly quoted. It is a far more serious obstacle to the critical use of these authorities that the texts of the versions and Fathers generally are in a very imperfect state. As a general rule the evidence of both may be trusted where they differ from the late text of the N. T., but where they agree with this against other early authorities, there is reason to entertain a suspicion of corruption. The evidence of versions may show at once that a MS. reading is a transcriptional error; and the absence of their support throws doubt upon readings otherwise of the highest probability. The testimony of an early Father is again sufficient to give preponderating weight to slight MS. authority: and since versions and Fathers go back to a time anterior to any existing MSS., they furnish a standard by which we may measure the conformity of any MS. with the most ancient text.—4. *The mere preponderance of numbers is in itself of no weight.* If the multiplication of copies of the N. T. had been uniform, it is evident that the number of later copies preserved from the accidents of time would have far exceeded that of the earlier, yet no one would have preferred the fuller testimony of the thirteenth to the scantier documents of the fourth century. Some changes are necessarily introduced in the most careful copying, and these are rapidly multiplied. A recent MS. may have been copied (but rarely) from one of great antiquity. But the body of later copies was made under one influence—from Byzantium or Constantinople (see I. § 16).—5. *The more ancient reading is generally preferable.* This principle seems to be almost a truism.—6. *The more ancient reading is generally the reading of the more ancient MSS.* This proposition is fully established by a comparison of

took place, "the day before Mardocheus' day," was ordained to be kept for ever as a festival (vii. 49; 2 Mc. xv. 36). There are some discrepancies between the narratives in 1 and 2 Maccabees as to Nicanor. Internal evidence is decidedly in favor of 1 Maccabees.—2. One of the first seven deacons (Acts vi. 5). According to the Pseudo-Hippolytus he was one of the seventy disciples, and "died at the time of Stephen's martyrdom." DEACON.

\* *Nicholas* (in some copies) = NICOLAS.

*Nico-demus* (L. fr. Gr. = *conqueror of the people*, Rbn. *N. T. Lex.*; fr. Heb. = *innocent of blood*, i. e. free from iniquity, upright, Wetstein), a Pharisee, a ruler of the Jews, and teacher of Israel (Jn. iii. 1, 10), whose secret visit to our Lord was the occasion of the discourse recorded only by St. John (1-21). The high station of Nicodemus as a member of the Jewish Sanhedrim, and the avowed scorn under which the rulers concealed their inward conviction (2) that Jesus was a teacher sent from God, are sufficient to account for the secrecy of the interview. A constitutional timidity is discernible in the character of the inquiring Pharisee. Thus the few words which he interposed against the rash injustice of his colleagues are cautiously rested on a general principle (vii. 50), and betray no indication of his faith in the Galilean whom his sect despised. And even when the power of Christ's love, manifested on the cross, had made the most timid disciples bold, Nicodemus does not come forward with his splendid gifts of affection until the example had been set by one of his own rank, and wealth, and station in society (xix. 39). In these three notices of Nicodemus a noble candor and a simple love of truth shine out in the midst of hesitation and fear of man. We can therefore easily believe the tradition that after the resurrection he became a professed disciple of Christ, and received baptism at the hands of Peter and John. All the rest that is recorded of him is highly uncertain. It is said that the Jews, in revenge for his conversion, deprived him of his office, beat him cruelly, and drove him from Jerusalem; that Gamaliel, his kinsman, hospitably sheltered him till his death in a country-house, and gave him honorable burial near the body of Stephen, where Gamaliel himself was afterward interred. The three bodies are said to have been discovered, August 3, 415, which day was set apart by the Roman Catholics in honor of the event. If the Nicodemus of St. John's Gospel be identical with the Nicodemus Ben Gorion of the Talmud, he must have lived till the fall of Jerusalem, which is not impossible, since the term "old," in Jn. iii. 4, may not be intended to apply to Nicodemus himself. "The Gospel of Nicodemus," also called "the Acts of Pilate," is undoubtedly spurious, and of very little value.

*Nico-la-i-tanes*, or *Nico-la-i-tans* (fr. Gr., literally = *followers of NICOLAS*, Rbn. *N. T. Lex.*; see below). On the question how far the sect mentioned by this name in Rev. ii. 6, 15, was connected with the Nicolas of Acts vi. 5, and the traditions that have gathered round his name, see NICOLAS. It will here be considered how far we can get at any distinct notion of what the sect itself was, and in what relation it stood to the life of the Apostolic age. It has been suggested as one step toward this result that the name before us was symbolic rather than historical. The Greek *Nikolaos* is, it has been said, an approximate equivalent to the Hebrew BALAAM, *the lord*, or, according to another derivation, *the devourer of the people* (compare Rev. ii. 14, 15, with

Jude 10 ff. and 2 Pet. ii. 10 ff.). If we accept this explanation we have to deal with one sect instead of two. The sect itself comes before us as presenting the ultimate phase of a great controversy which threatened at one time to destroy the unity of the Church, and afterward to taint its purity. The controversy itself was inevitable as soon as the Gentiles were admitted in any large numbers into the Church of Christ. Were the new converts to be brought into subjection to the whole Mosaic law? The apostles and elders at Jerusalem met the question calmly and wisely. (PAUL.) The burden of the Law was not to be imposed on the Gentile disciples. They were to abstain, among other things, from "meats offered to idols" and from "fornication" (Acts xv. 20, 29), and this decree was welcomed as the great charter of the Church's freedom. Strange as the close union of the moral and the positive commands may seem to us, it did not seem so to the synod at Jerusalem. The two sins were very closely allied, often even in the closest proximity of time and place. The messages to the Churches of Asia and the later Apostolic Epistles (2 Peter and Jude) indicate that the two evils appeared at that period also in close alliance. The teachers of the Church branded them with a name which expressed their true character. The men who did and taught such things were followers of Balaam (2 Pet. ii. 15; Jude 11). They, like the false prophet of Pethor, united brave words with evil deeds. In a time of persecution, when the eating or not eating of things sacrificed to idols was more than ever a crucial test of faithfulness, they persuaded men more than ever that it was a thing indifferent (Rev. ii. 13, 14). This was bad enough, but there was a yet worse evil. Mingling themselves in the orgies of idolatrous feasts, they brought the impurities of those feasts into the meetings of the Christian Church. (FEASTS OF CHARITY.) And all this was done, it must be remembered, not simply as an indulgence of appetite, but as part of a system supported by a "doctrine," accompanied by the boast of a prophetic illumination (2 Pet. ii. 1). These were the characteristics of the followers of Balaam, and, worthless as most of the traditions about Nicolas may be, they point to the same distinctive evils (so Prof. Plumptre). It confirms the view which has been taken of their character to find that stress is laid in the first instance on the "deeds" of the Nicolaitans. To hate those deeds is a sign of life in a Church that otherwise is weak and faithless (Rev. ii. 6). To tolerate them is well-nigh to forfeit the glory of having been faithful under persecution (14, 15).

*Nico-las* (fr. Gr. = *conqueror of the people*, Rbn. *N. T. Lex.*), a native of Antioch, and a proselyte to the Jewish faith. When the Church was still confined to Jerusalem he became a convert; and being a man of honest report, full of the Holy Ghost and of wisdom, he was chosen (Acts vi. 5) by the whole multitude of the disciples to be one of the first seven deacons. (DEACON.) A sect of NICOLAITANS is mentioned in Rev. ii. 6, 15; and it has been questioned whether this Nicolas was connected with them, and if so, how closely. The Nicolaitans themselves, at least as early as the time of Irenæus, claimed him as their founder. Epiphanius, an inaccurate writer, relates some details of the life of Nicolas the deacon, and describes him as gradually sinking into the grossest impurity, and becoming the originator of the Nicolaitans and other immoral sects. The same account is believed, at least to

some extent, by Jerome and other writers in the fourth century; but it is irreconcilable with the traditional account of the character of Nicolas given by Clement of Alexandria, an earlier and more discriminating writer than Epiphanius (so Mr. Bullock). He states that Nicolas led a chaste life and brought up his children in purity; that on a certain occasion, having been sharply reproved by the apostles as a jealous husband, he repelled the charge by offering to allow his wife to become the wife of any other person; and that he was in the habit of repeating a saying which is ascribed to the Apostle Matthias also—that it is our duty to fight against the flesh and to abuse it. His words were perversely interpreted by the Nicolaitans as authority for their immoral practices. Theodoret, in his account of the sect, repeats the foregoing statement of Clement; and charges the Nicolaitans with false dealing in borrowing the name of the deacon. Tillemont (and so Grotius) concludes that if not the actual founder, he was so unfortunate as to give occasion to the formation of the sect. Neander held that some other Nicolas was the founder. Prof. Schaff (*History of the Apostolic Church*, § 169) regards the Nicolaitans as having sprung from the Nicolas of Acts vi. 5, “who apostatized from the truth and became the founder of an Antinomian Gnostic sect.” Dr. Alford also (*on Rev.* ii. 6) believes the associate of the apostles made shipwreck of faith and a good conscience.

**Ni-cop'-o-les** (Gr. *city of victory*). 1. In Tit. iii. 12, the place where, at the time of writing the Epistle, St. PAUL was intending to pass the coming winter, and where he wished Titus, then in Crete, to meet him. Nothing is found in the Epistle itself to determine which Nicopolis (in Asia, Africa, or Europe) is here intended. One Nicopolis was in Thrace, near the borders of Macedonia. The subscription (which, however, is of no authority) fixes on this place, calling it the Macedonian Nicopolis, and such is the view of Chrysostom and Theodoret. Another Nicopolis was in Cilicia—and Schrader pronounces for this; but this opinion is connected with a peculiar theory regarding the apostle's journeys. Dr. Howson believes that Jerome's view is correct, and that the Pauline Nicopolis was the celebrated city of Epirus, built by AUGUSTUS in memory of the battle of Actium, and on the ground which his army occupied before the engagement. In the apostle's time it was the chief city of Western GREECE. Possibly St. Paul was arrested here, and taken thence to Rome for his final trial (so Dr. Howson). Nicopolis was on a peninsula to the W. of the bay of Actium, in a low and unhealthy situation. Its remains are extensive, three miles N. of the modern town of *Prevesa*.—2. A post-biblical name of **EMMAUS** 2.

**N'ger** (L. *black*), is the additional or distinctive name given to SIMEON 6 (Acts xiii. 1). He is not known except in that passage.

**Night** [nite]. The period of darkness, from sunset to sunrise, including the morning and evening twilight, was called by the Hebrews *layal*, or *layelâh* (A. V. almost uniformly translated "night," sometimes "night season" [Job xxx. 17, &c.]; Gr. *nux*). It is opposed to "DAY," the period of light (Gen. i. 5, 14, &c.). Following the Oriental sunset is the brief evening twilight (Heb. *nesheph*, Job xiv. 15, rendered "night" in Is. v. 11, xxi. 4, lix. 10), when the stars appeared (Job iii. 9). This is also called "evening" (Heb. *'ereb*, Prov. vii. 9: translated "night" in Gen. xlix. 27, Job vii. 4), but the Hebrew

term which especially denotes the evening twilight is *'alatah* (Gen. xv. 17, A. V. "dark;" Ez. xii. 6, 7, 12). This period of the day must also be that which is described as "night" when Boaz winnowed his barley in the evening breeze (Ru. iii. 2). The time of midnight (iii. 7; Ex. xi. 4) or greatest darkness is called in Prov. vii. 9 "the pupil of night" (A. V. "black night"). The period between midnight and the morning twilight was generally selected for attacking an enemy by surprise (Judg. vii. 19). The morning twilight is denoted by the same term (*neshuph*) as the evening twilight, and is unmistakably intended in 1 Sam. xxx. 17; Job vii. 4, A. V. "dawning of the day;" Ps. cxix. 147, A. V. "dawning of the morning;" possibly also in Is. v. 11, A. V. "night." "Night" figuratively (so Gesenius, Robinson, &c.) = calamity, adversity, misery (Job xxxv. 10; Is. xxi. 11; Mic. iii. 6, &c.); moral and spiritual darkness, or ignorance and sin (Rom. xiii. 12; 1 Th. v. 5); death (Jn. ix. 4, &c.). CHRONOLOGY I.; DARKNESS; WATCHES OF NIGHT.

**Night-hawk** (Heb. *tahmds* or *tachmds*). Bochart, whom Gesenius and Rosenmüller follow, has endeavored to prove that the Hebrew word, which occurs only (Lev. xi. 16; Deut. xiv. 15) in the list of unclean birds, denotes the male OSTRICH. The etymology of the word points to some bird of prey, though there is great uncertainty as to the particular species indicated. The LXX., Vulgate, and perhaps Onkelos, understand some kind of *owl*; most of the Jewish doctors translate indefinitely a *rapacious bird*. Michaelis believes some kind of swallow (*Hirundo*) is intended. The rendering of the A. V. is countenanced by Col. C. H. Smith (in Kitto), and Mr. Gosse (in Fairbairn). The night-hawk or night-jar of Europe (*Caprimulgus Europæus*), or a closely allied species, is a native of Syria, and belongs to a genus closely connected with superstitions in all countries. It is migratory, appears only in the twilight, preys on the wing upon insects, has bright eyes, and a wide mouth, and makes a peculiar jarring sound. As the LXX. and Vulgate are agreed that the Hebrew denotes some kind of owl, we believe it is safer to follow these versions than modern commentators (so Mr. Houghton). The Gr. *glauz*, by which the LXX. translates the Hebrew, is used by Aristotle for some common species of owl, probably for the *Striz flammea* (white owl) or the *Syrnium stridula* (tawny owl). Probably the Hebrew word may denote the *Striz flammea* or the *Athene mericanalis*, which is extremely common in Palestine and Egypt. OWL 4.

\* Night'-mon'ster. OWL 5.

**Nile.** 1. *Names of the Nile.* The Hebrew names of the Nile, excepting one that is of ancient Egyptian origin, all distinguish it from other rivers. The word Nile nowhere occurs in the A. V. The Hebrew names are—(a.) *Shihôr* or *shichôr* = the black. (שִׁיחֹר or שִׁיחֹר). The idea of blackness conveyed by this word has, as we should expect in Hebrew, a wide sense (COLORS); but apparently indicates a very dark color. (b.) *Yôr* is the same as the ancient Egyptian *atur*, *aur*, and the Coptic *eiero* or *iaro*. *Yôr*, in the singular, is used of the Nile alone (Gen. xli.; Ex. i. 22, ii. 3, 5; Am. viii. 8, ix. 5, A. V. "flood" in both, &c.), except in Dan. x. 5-7, where another river, perhaps the Tigris (xii. 5, compare x. 4), is intended by it. In the plural the same name is applied to the branches and canals of the Nile (Ps. lxxviii. 44; Ez. xxix. 3 ff., xxviii. 12); but it is also used of streams or channels (Ex. 12); but in sense, when no particular ones are indicated (see Is.

xxxiii. 21; Job xxviii. 10). (RIVER 3.) (c.) *N'har Mitsrayim*, A. V. "the RIVER OF EGYPT" (Gen. xv. 18). (RIVER 1.) (d.) *Nahal or nachal Mitsrayim*, A. V. "the RIVER OF EGYPT," is generally understood to mean "the torrent" or "brook of Egypt," and to designate a desert stream at Rhinocorura, now *El-'Arish*, on the eastern border. This name was supposed by Mr. R. S. Poole to signify the Nile, for it occurs in cases parallel to those where *Shinar* is employed (Num. xxiv. 5; Josh. xv. 4, 47; 1 K. viii. 65; 2 K. xxiv. 7; Is. xxvii. 12). (Brook 4; RIVER 2.) (e.) *Nahârêy Cûsh* = the rivers of Cush, A. V. "rivers of Ethiopia," mentioned only in the extremely difficult prophecy contained in Is. xviii. From the use of the plural we must suppose them to be the confluents or tributaries of the Nile. (See also SEA 4.)—The Nile is called by the Arabs *Bahr en-Neel* = the river Nile, the word *bahr* being applied to seas and the greatest rivers. The Egyptians call it *Bahr*, or the river alone; and call the inundation *en-Neel*, or the Nile.—With the ancient Egyptians the river was sacred, and had, besides its ordinary name already given, a sacred name, under which it was worshipped, *Hapee*, or *Hapee-mu*, the abyss, or the abyss of waters, or the hidden. Corresponding to the two regions of Egypt, the Upper Country and the Lower, the Nile was called *Hapee-res* (the Southern Nile), and *Hapee-meheet* (the Northern Nile), the former name applying to the river in Nubia as well as in Upper Egypt. The god Nilus (L. = Nile) was one of the lesser divinities. He is represented as a stout man having woman's breasts. (IDOLATRY).—2. *Description of the Nile*. The discovery of the sources of the Nile has been for ages one of the great problems of geography. Ptolemy (second century A. C.) says that its sources are in two lakes, one situated in 6° south latitude and 57° east longitude, the other in 7° south latitude and 65° east longitude, these lakes being fed by streams from the snow-clad "Mountains of the Moon," a range reported to extend from E. to W. in 12½° south latitude. These statements, long regarded as true, but afterward rejected, have been confirmed in the main by recent discoveries. The English expeditions of Captains Burton and Speke in 1856-8, of Captains Speke and Grant in 1860-63, and of Mr. (afterward Sir Samuel W.) Baker and his wife in 1861-5, have established the conclusion that the White Nile, called in Ar. *Bahr el-Abyad* (= the white sea or white river), the western of the two branches of the Nile that unite at Khartoom, proceeds from two great lakes lying under the equator and directly S. of Egypt. Of these, the eastern lake, called by the natives Ukerewe, and by its discoverers the Victoria N'yanza (= lake), was discovered August 3, 1858, by Captain J. H. Speke, who suggested that the Nile issues from its northern extremity, which he could not then visit. In July, 1862, Captain Speke found that the Victoria N'yanza, which is perhaps 250 miles E. to W., and 200 miles from N. to S., and lies mostly S. of the equator, pours itself into the Nile over the Ripon Falls, which are about twelve feet high, 400 to 500 feet broad, and 3,300 feet above the level of the sea. The Kitangûle, which he regards as an important affluent of the Nile, was discovered in January, 1862, falls into the Victoria Lake on the W. side, has an average breadth of about eighty yards, and a current of three or four miles an hour. The Nile thus rolls over 34° of latitude, or more than 2,300 miles, measured in a direct line, and the windings of the river increase this length several hundred miles, making the Nile longer than the Amazon,

the Mississippi, or the Missouri, and surpassed only by the entire course of the Missouri-Mississippi from the Rocky Mountains to the Gulf of Mexico. The second or western of the two lakes, the Luta N'zigé, or M'wootan N'zigé, of the natives, the Albert N'yanza or Albert Lake, of Baker, was discovered by him, March 14, 1864, and is supposed to extend from nearly 3° north latitude to between 1° and 2° south latitude, where its upper part turns to the W., its further extent being unknown. It may be therefore 300 or 400 miles long, and 50 to 100 miles wide. Its elevation above the sea level is reckoned by Baker at 2,720 feet. The Victoria Nile or Somerset River of Speke, which issues from the northern end of the Victoria Lake at Ripon Falls, passes over Karuma Falls (five feet high), Murchison Falls (120 feet high), and rapids of miles in length, and after a course N. W. and W. of more than 200 miles, enters the Albert Lake near its northern end. On the W. side of Albert Lake are the Blue Mountains, which rise about 7,000 feet above the lake level. The lake indeed is from 500 to 2,000 feet or more above the general level of the surrounding country. "The actual basin of the Nile," says Baker, "is included between about 22° and 39° east longitude, and from 3° south to 18° north latitude. The drainage of that vast area is monopolized by the Egyptian river. The Victoria and Albert Lakes, the two great equatorial reservoirs, are the recipients of all affluents S. of the equator; the Albert Lake being the grand reservoir in which are concentrated the entire waters from the south, in addition to tributaries from the Blue Mountains, from the N. of the equator. . . . The Victoria gathers all the waters on the E. side, and sheds them into the northern extremity of the Albert." The White Nile issues from the northern end of the Albert Lake, and is navigable for some distance, but rushes down several cataracts before it reaches Gondokoro (4° 55' north latitude), to which place—a station of the ivory and slave traders, occupied only about two months during the year—steamers have ascended from the Mediterranean. Khartoom, the chief depot of the Soudan slave-trade, is a town of 30,000 inhabitants, in north latitude 15° 29', a "miserable, filthy, and unhealthy spot." The tribes that dwell on the White Nile and about its sources are for the most part negroes, only partially clothed or entirely naked, brutal, degraded, and heathenish, some of them cannibals, almost constantly engaged in wars, utterly untrustworthy, suspicious of strangers, and disposed to throw all possible obstacles in the way of intelligent, philanthropic, or Christian enterprise. Much has been indeed accomplished by travellers in spite of all these obstacles and the innumerable dangers to which they were exposed; but much still remains to be done before these dark regions will have been fully explored, and "Ethiopia shall stretch out her hands unto God" (see B. S. xxi. 425 ff.; *North American Review*, No. 214, for January, 1867; Baker's *Albert N'yanza*, &c.). Though the White Nile is the longer of the two chief confluents of the Nile, and brings down a larger quantity of water than the other, yet it is the shorter (the *Bahr el-Azrak*, or Blue River) which brings down the decayed vegetable matter and alluvial soil that make the Nile the great fertilizer of Egypt and Nubia. The *Bahr el-Azrak* rises in the mountains of Abyssinia. The two streams form a junction at Khartoom, now the seat of government of Soudan, or the Black Country under Egyptian rule. Further to the north another great river, the Atbara, rising, like the *Bahr el-*

Azrak, in Abyssinia, falls into the main stream, which, for the remainder of its course, does not receive one tributary more. Throughout the rest of the valley, the Nile does not greatly vary, excepting that in Lower Nubia, through the fall of its level by the giving way of a barrier in ancient times, it does not inundate the valley on either hand. From time to time its course is impeded by cataracts or rapids, sometimes extending many miles, until, at the First Cataract, the boundary of Egypt, it surmounts the last obstacle. After a course of about 550 miles, at a short distance below Cairo and the Pyramids, the river parts into two great branches, which water the Delta, nearly forming its boundaries to the E. and W., and flowing into the shallow Mediterranean.—The references to the Nile in the Scriptures are mainly to its characteristics in Egypt. There above the Delta, its average breadth may be put at from one-half to three-fourths of a mile, except where large islands increase the distance. In the Delta its branches are usually narrower. The water is extremely sweet, especially at the season when it is turbid. It is said by the people that those who have drunk of it and left the country, must return to drink of it again. The great annual phenomenon of the Nile is the inundation, the failure of which produces a famine, for Egypt is virtually without rain (see Deut. xi. 10–12; Zech. xiv. 17, 18). At Khartoum the increase of the river is observed early in April, but in Egypt the first signs of rising occur about the summer solstice, and generally the regular increase does not begin until some days after, the inundation commencing about two months after the solstice. The river then pours, through canals and cuttings in the bank, which are a little higher than the rest of the soil, over the valley, which it covers with sheets of water (Jer. xlvii. 7, 8, xlviii. 1, 2; Am. viii. 7, 8, ix. 5). It attains to its greatest height about, or not long after, the autumnal equinox, and then falling more slowly than it had risen, sinks to its lowest point at the end of nine months, there remaining stationary for a few days before it again begins to rise. The inundations are very various, and when they are but a few feet deficient or excessive cause great damage and distress. The rise of a good inundation is about forty feet at the First Cataract, twenty-four to twenty-seven at Cairo, and about four feet at the Rosetta and Damietta mouths. (FAMINE.) The Nile in Egypt is always charged with alluvium, especially during the inundation; but the annual deposit, excepting under extraordinary circumstances, is very small in comparison with what would be conjectured by any one unacquainted with subjects of this nature. Inquirers have come to different results as to the rate, but the discrepancy does not generally exceed an inch in a century. The ordinary average increase of the soil in Egypt is about four and a half inches in a century. (MAN.) The cultivable soil of Egypt is wholly the deposit of the Nile, but it is obviously impossible to calculate, from its present depth, when the river first began to flow in the rocky bed now so deeply covered with the rich alluvium. In Upper Egypt the Nile is a very broad stream, flowing rapidly between high, steep mud-banks, scarped by the constant rush of the water, which from time to time washes portions away, and stratified by the regular deposit. On either side rise the bare yellow mountains, usually a few hundred feet high, rarely a thousand, looking from the river like cliffs, and often honeycombed with the entrances of tombs. Frequently the mountain on either side approaches the

river in a rounded promontory. Rarely both mountains confine the river in a narrow bed, rising steeply on either side from a deep rock-cut channel through which the water pours with a rapid current (Job xxviii. 10, 11?). In Lower Egypt the chief differences are that the view is spread out in one rich plain, only bounded on the E. and W. by the desert, of which the edge is low and sandy, unlike the mountains above, though essentially the same; and that the two branches of the river are narrower than the undivided stream. On either bank, during Low Nile, extend fields of wheat and barley, and near the river-side stretch long groves of palm-trees. The villages rise from the level plain, standing upon mounds, often ancient sites, and surrounded by palm-groves, and yet higher dark-brown mounds mark where of old stood towns, with which often "their memorial is perished" (Ps. ix. 6). The villages are connected by dikes, along which pass the chief roads. The banks of the river are enlivened by the women who come down to draw water, and, like Pharaoh's daughter, to bathe, and the herds of kine and buffaloes which are driven down to drink and wash, or to graze on the grass of the swamps, like the good kine that Pharaoh saw in his dream as "he stood by the river," which were "coming up out of the river," and "fed in the marsh-grass" (A. V. "MEADOW," Gen. xli. 1, 2). The river itself abounds in fish, which anciently formed a chief means of sustenance to the inhabitants of the country. The Israelites in the desert looked back with regret to the fish of Egypt: "We remember the fish, which we did eat in Egypt freely" (Num. xi. 5). In the Thebais crocodiles are found, and during Low Nile they may be seen basking in the sun upon the sand-banks. The crocodile is constantly spoken of in the Bible as the emblem of Pharaoh, especially in Ezekiel. (DRAGON 2; LEVIATHAN.) The great difference between the Nile of Egypt in the present day and in ancient times is caused by the failure of some of its branches (Is. xix. 5; Ez. xxx. 12), and the ceasing of some of its chief vegetable products; and the chief change in the aspect of the cultivable land, as dependent on the Nile, is the result of the ruin of the fish-pools and their conduits, and the consequent decline of the fisheries (Is. xix. 8, 10; FISH). The river was famous for its seven branches, and under the Roman dominion eleven were counted, of which, however, there were but seven principal ones. Herodotus notices that there were seven, of which he says that two, the present Damietta and Rosetta branches, were originally artificial, and he therefore speaks of "the five mouths" (Hdt. ii. 10). Now, as for a long period past, there are no navigable and unobstructed branches but these two that Herodotus distinguishes as originally works of man. The monuments and the narratives of ancient writers show us in the Nile of Egypt in old times a stream bordered by flags and reeds, the covert of abundant wild-fowl, and bearing on its waters the fragrant flowers of the various-colored lotus. Now in Egypt scarcely any reeds or water-plants—the famous papyrus (REED 2) being nearly if not quite extinct, and the lotus almost unknown—are to be seen, excepting in the marshes near the Mediterranean (Is. xix. 7). Of old the great river must have shown a more fair and busy scene than now. Boats of many kinds were ever passing along it, by the painted walls of temples, and the gardens that extended around the light summer pavilions, from the pleasure-galley, with one great square sail, white, or with variegated pat-

tern, and many oars, to the little papyrus skiff (Egypt), dancing on the water, and carrying the seekers of pleasure where they could shoot with arrows, or knock down with the throw-stick, the wild-fowl that abounded among the reeds, or engage in the dangerous chase of the hippopotamus (Bē-hemōth) or the crocodile. The Nile is constantly before us in the history of Israel in Egypt. Into it the male children were cast; in it, or rather in some canal or pool, was the ark of Moses put, and found by Pharaoh's daughter when she went down to bathe. When the plagues were sent, the sacred river—a main support of the people—and its waters everywhere, were turned into blood. MEMPHIS; ON; PLAGUES, THE TEN; THESES.

**Nimrah** (Heb. *limpid and sweet water*, Ges.), a place mentioned (Num. xxxii. 3 only) among those in the "land of Jazer and the land of Gilead." If it = BETH-NIMRAH (ver. 36), it belonged to the tribe of Gad. By Eusebius, however, it is cited as a "city of Reuben in Gilead." A wady and a town, both called *Nimreh*, have been met with in *Beth-eniyeh*, E. of the *Lejah*, and five miles N. W. of *Kunawd*. On the other hand the name of *Nimrin* is said to be attached to a watercourse and site of ruins in the Jordan valley, two miles E. of the river, near the mouth of the *Wady Sha'ib*, N. N. E. from Jericho. Robinson (i. 551; *Phys. Geog.* 87), Porter (in Kitto), &c., make these ruins = the site of Nimrah or Beth-nimrah, and the copious springs near them = "the waters of NIMRIM."

**Nimrim** (Heb. *limpid and sweet waters*, Ges.), the **Waters of**, a stream or brook within the country of Moab, which is mentioned in Isaiah xv. 6, and Jeremiah xlviii. 34). We should perhaps look for the site of Nimrim in Moab Proper, i. e. on the southeastern shoulder of the Dead Sea (so Mr. Grove). A name resembling Nimrim still exists in the *Wady en-Nemeirah* and *Burj en-Nemeirah*, which are situated on the beach, about half-way between the southern extremity and the promontory of *el-Lisn*. Eusebius places it N. of Soora, i. e. Zoar. NIMRAH.

**Nimrod** (Heb. *a rebel? Ges.; the hero or valiant one*, Fül.), a son of CUSH and grandson of HAM. The events of his life are recorded in a passage (Gen. x. 8 ff.) which, from the conciseness of its language, is involved in considerable uncertainty. *a.* We may notice the Heb. terms *gibbôr* (ver. 8; GIANTS 2), and *gibbôr tsayid liphney Yehôvâh* (ver. 9), translated in the A. V. "mighty" and "mighty hunter before the LORD." The idea of any moral qualities being conveyed by these expressions may be at once rejected. They may be regarded as betokening personal prowess with the accessory notion of gigantic stature. It is somewhat doubtful whether the prowess of Nimrod rested on his achievements as a hunter or as a conqueror. The literal rendering of the Hebrew words would undoubtedly apply to the former, but they may be regarded as a translation of a proverbial expression originally current in the land of Nimrod, where the terms significant of "hunter" and "hunting" appear to have been applied to the forays of the sovereigns against the surrounding nations. But the context certainly favors the special application of the term to the case of conquest.—*b.* The next point to be noticed is the expression in ver. 10, "The beginning of his kingdom," taken in connection with the commencement of ver. 11, which admits of the double sense: "Out of that land went forth Asshur," as in the text of the A. V., and "out of that land he went forth to Assyria," as in the

margin. These two passages mutually react on each other; for if the words "beginning of his kingdom" mean, as we believe to be the case, "his first kingdom," or, as Gesenius renders it, "the territory of which it was at first composed," then the expression implies a subsequent extension of his kingdom, in other words, that "he went forth to Assyria" (so Mr. Bevan, with the Targums of Onkelos and Jonathan, Bochart, Keil, Delitzsch, Knobel, Kalisch, Murphy, Eadie [in Fairbairn], &c.). If, however, the sense of ver. 11 be, "out of that land went forth Asshur" (so A. V., with the LXX., Vulgate, Syriac, Luther, Calvin, Grotius, Michaelis, J. P. Smith [in Kitto], &c.), then no other sense can be given to ver. 10 than that "the capital of his kingdom was Babylon," though the expression must be equally applied to the towns subsequently mentioned. This rendering appears untenable in all respects (so Mr. Bevan), and the expression may therefore be cited in support of the marginal rendering of ver. 11. With regard to the latter passage, either sense is permissible in point of grammatical construction. Authorities, both ancient and modern, are divided on the subject, but the most weighty names of modern times support the marginal rendering, as it seems best to accord with historical truth.—The chief events in the life of Nimrod, then, are (1.) that he was a Cushite; (2.) that he established an empire in SHINAR (the classical Babylonia), the chief towns being BABEL, ERECH, ACCAD, and CALNEH; and (3.) that he extended this empire northward along the course of the Tigris over ASSYRIA, where he founded a second group of capitals, NINEVEH, REHOBOTH, CALAH, and RESEN. These events correspond to and may be held to represent the salient historical facts connected with the earliest stages of the great Babylonian empire. (1.) There is abundant evidence that the race that first held sway in the Lower Babylonian plain was of Cushite or Hamitic extraction. The name Cush itself was preserved in Babylonia and the adjacent countries under the forms of Cossai, Cissia, Cuthah, and Susiana or *Chuzistan*. The earliest written language of Babylonia, as known to us from existing inscriptions, bears a strong resemblance to that of Egypt and Ethiopia. Even the name Nimrod appears in the list of the Egyptian kings of the twenty-second dynasty, but there are reasons for thinking that dynasty to have been of Assyrian extraction.—(2.) The earliest seat of empire was in the south part of the Babylonian plain. The large mounds, which for many centuries have covered the ruins of ancient cities, have already yielded some evidences of the dates and names of their founders, and we can assign the highest antiquity to the towns represented by the mounds of *Niffer* (perhaps the early Babel, though also identified with Calneh), *Warka* (the Biblical Erech), *Mugheir* (Ur), and *Sênkeresh* (Ellasar), while the name of Accad is preserved in the title *Kinzi-Akkad*, by which the founder and embellisher of those towns was distinguished. The date of their foundation may be placed at about B. C. 2200.—(3.) The Babylonian empire extended its sway northward along the course of the Tigris at a period long anterior to the rise of the Assyrian empire in the thirteenth century B. C. The existence of Nineveh itself can be traced up by the aid of Egyptian monuments to about the middle of the fifteenth century B. C. Our present information does not permit us to identify Nimrod with any personage known to us either from inscriptions or from classical writers. Josephus makes him the violent and

insolent builder of the Tower of Babel. The Orientals identify him with the constellation ORION. Arab tradition makes him an idolater and persecutor of ABRAHAM. To him the modern Arabs ascribe all the great works of ancient times, e. g. the *Dirs Nimrūd* (BAEL, TOWER OF), *Tel Nimrūd* near Bagdad, the dam of *Suhr Nimrūd* across the Tigris below Mosul, and the mound of Nimrūd in the same neighborhood. NINEVEH.

Nim'shi (Heb. *drawn out, saved*, Ges.; *Jah is Re-vealer*, Fül.), grandfather of Jehu, who is generally called "the son of Nimshi" (1 K. xix. 16; 2 K. ix. 2, 14, 20; 2 Chr. xxii. 7).

\* Nin'e-ve, a Latin form of NINEVEH (Mat. xii. 41; Lk. xi. 32).

Nin'e-veh (Heb. *city [or abode] of Ninus*, Schl.; see below), in N. T. NINEVE, the capital of the ancient kingdom and empire of ASSYRIA; a city of great power, size, and renown, usually included among the most ancient cities of which there is any historical record (so Mr. Layard, the original author of this article). The name appears to be compounded from that of an Assyrian deity, *Nin*, corresponding, it is conjectured, with the Greek Hercules, and occurring in the names of several Assyrian kings, as in *Nineu*, the mythic founder, according to Greek tradition, of the city. In the Assyrian inscriptions Nineveh is also supposed to be called *the city of Bel*. Nineveh is first mentioned in the O. T. in connection with the primitive dispersment and migrations of the human race. Asshur, or, according to the marginal reading which is generally preferred, NIMROD, is there described (Gen. x. 11) as extending his kingdom from the land of Shinar, or Babylonia, in the south, to Assyria in the north, and founding four cities, of which the most famous was Nineveh. Hence Assyria was subsequently known to the Jews as "the land of Nimrod" (compare Mic. v. 6), and was believed to have been first peopled by a colony from Babylon. The kingdom of Assyria and of the Assyrians is referred to in the O. T. as connected with the Jews at a very early period (Num. xxiv. 22, 24; Ps. lxxxiii. 8, &c.); but after the notice of the foundation of Nineveh in Genesis no further mention is made of the city until the time of the book of JONAH, or the eighth century B. C., supposing we accept the earliest date for that narrative, which, however, according to some critics, must be brought down to the fifth century B. C. In this book neither Assyria nor the Assyrians are mentioned, the king to whom the prophet was sent being termed the "king of Nineveh," and his subjects "the people of Nineveh." Assyria is first called a kingdom in the time of Menahem, about A. C. 770. NAHUM (? A. C. 645) directs his prophecies against Nineveh; only once against the king of Assyria (ch. iii. 18). In 2 K. xix. 36 and Is. xxxvii. 37 the city is first distinctly mentioned as the residence of the monarch. Sennacherib was slain there when worshipping in the temple of Nisroch his god. In 2 Chr. xxxii. 21, where the same event is described, the name of the place where it occurred is omitted. Zephaniah, about B. C. 630, couples the capital and the kingdom together (ch. ii. 13); and this is the last mention of Nineveh as an *existing* city. Ez. xxxi. mentions the nation as ruined. Jer. xxv., enumerating "all the kingdoms of the world," omits the nation and city. It has therefore been generally assumed that the destruction of Nineveh and the extinction of the empire took place between the time of Zephaniah and that of Ezekiel and Jeremiah. The exact period of

these events has consequently been fixed, with a certain amount of concurrent evidence derived from classical history, at B. C. 606. It may have occurred twenty years earlier. (MEDES.) The city was then laid waste, its monuments destroyed, and its inhabitants scattered or carried away into captivity. It never rose again from its ruins. This total disappearance of Nineveh is fully confirmed by profane history. Herodotus (i. 193) speaks of the Tigris as "the river upon which the town of Nineveh formerly stood." Xenophon, with the 10,000 Greeks, encamped during his retreat on, or very near, its site (B. C. 401), but does not mention its name. The historians of Alexander, except Arrian, do not even allude to the city, over the ruins of which the conqueror must have actually marched. His great victory over Darius (B. C. 331) was won almost in sight of them. It is evident that the later Greek and Roman writers, e. g. Strabo, Ptolemy, and Pliny, could only have derived any independent knowledge they possessed of Nineveh from traditions of no authority. They concur, however, in placing it on the eastern bank of the Tigris. During the Roman period, a small castle, or fortified town, appears to have stood on some part of the site of the ancient city. It appears to have borne the ancient traditional name of Nineve, as well as its corrupted form of Ninos and Ninus. The Roman settlement appears to have been in its turn abandoned, for there is no mention of it when Heraclius gained the great victory over the Persians in the battle of Nineveh, fought on the very site of the ancient city, A. D. 627. After the Arab conquest, a fort on the east bank of the Tigris bore the name of "Ninawi," Benjamin of Tudela, in the twelfth century, mentions the site of Nineveh as occupied by numerous inhabited villages and small townships. The name remained attached to the ruins during the Middle Ages. Tribes of Turcomans and sedentary Arabs, and Chaldean and Syrian Christians, dwell in small mud-built villages, and cultivate the soil in the country round the ruins; and occasionally a tribe of wandering Kûrds, or of Bedouins from the desert, will pitch their tents amongst them. After the Arab conquest of the west of Asia, Mosul, at one time the flourishing capital of an independent kingdom, rose on the opposite or western bank of the Tigris. Traditions of the unrivalled size and magnificence of Nineveh were equally familiar to the Greek and Roman writers, and to the Arab geographers. Diodorus Siculus asserts that the city formed a quadrangle of 150 stadia by 90, or altogether of 480 stadia (= 60 miles), and was surrounded by walls 100 feet high, broad enough for three chariots to drive abreast upon them, and defended by 1,500 towers, each 200 feet in height. According to Strabo it was larger than Babylon, which was 385 stadia in circuit. In the O. T. we only find vague allusions to the splendor and wealth of the city (Jon. iii. 2, 3, iv. 11). It is obvious that the accounts of Diodorus are for the most part absurd exaggerations founded upon fabulous traditions, for which existing remains afford no warrant. The political history of Nineveh is that of ASSYRIA. It has been observed that the territory included within the boundaries of the kingdom of Assyria proper was comparatively limited in extent, and that almost within the immediate neighborhood of the capital petty kings appear to have ruled over semi-independent states, owing allegiance and paying tribute to the great Lord of the Empire, "the King of Kings," according to his Oriental title,

who dwelt at Nineveh. The fall of the capital was the signal for universal disruption.—*The Ruins.* Previous to recent excavations and researches, the ruins which occupied the presumed site of Nineveh seemed to consist of mere shapeless heaps or

mounds of earth and rubbish. Unlike the vast masses of brick masonry which mark the site of Babylon, they showed externally no signs of artificial construction, except perhaps here and there the traces of a rude wall of sun-dried bricks. Some

This Map is taken from Fairbairn's *Imperial Bible-Dictionary*.

of these mounds were of enormous dimensions—looking in the distance rather like natural elevations than the work of men's hands. Upon and around them, however, were scattered innumerable fragments of pottery. Some had been chosen by the scattered population of the land as sites for villages, or for small mud-built forts. The summits of others were sown with corn or barley. During the spring months they were covered with grass and flowers, bred by the winter rains. The Arabs call these mounds *Tel*, the Turcomans and Turks *Teppeh*, both words being equally applied to natural hills and elevations. They differ greatly in form, size, and height. Some are mere conical heaps, varying from 50 to 150 feet high; others have a broad flat summit, and very precipitous cliff-like

sides, furrowed by deep ravines worn by the winter rains. Such mounds are especially numerous in the region to the E. of the Tigris, in which Nineveh stood, and some of them must mark the ruins of the Assyrian capital. The only difficulty is to determine which ruins are to be comprised within the actual limits of the ancient city. The northern extremity of the principal collection of mounds on the eastern bank of the Tigris may be fixed at the Shereef Khan, and the southern at Nimroud, about six and a half miles from the junction of that river with the great Zab, the ancient Lycus. Eastward they extend to Khorsabad, about ten miles N. by E. of Shereef Khan, and to Karamless, about fifteen miles N. E. of Nimroud. Within the area of this irregular quadrangle are to be found, in every direc-

tion, traces of ancient edifices and of former population. It comprises various separate and distinct groups of ruins, four of which, if not more, are the

remains of fortified enclosures or strongholds, defended by walls and ditches, towers and ramparts. The principal are—(1.) the group immediately op-

*Nebbi Yunus, Kouyunjik, and Ruins opposite Mosul.—(From Layard's *Nineveh*, I. 123.)*

posite Mosul, including the great mounds of Kouyunjik (also called by the Arabs, Armousheeyah) and Nebbi Yunus; (2.) that near the junction of

the Tigris and Zab, comprising the mounds of Nimroud and Athur; (3.) Khorsabad, about ten miles E. of the former river; (4.) Shereef Khan, about

five and a half miles N. of Kouyunjik; and (5.) Selamiyah, three miles N. of Nimroud (see map).—(1.) The ruins opposite Mosul consist of an enclosure formed by a continuous line of mounds, resembling a vast embankment of earth, but marking the remains of a wall, the western face of which is interrupted by the two great mounds of Kouyunjik and Nebbi Yunus. E. of this enclosure are the remains of an extensive line of defences, consisting of moats and ramparts. The inner wall forms an irregular quadrangle with very unequal sides—the northern being 2,383 yards, the western, or the river face, 4,583, the eastern (where the wall is almost the segment of a circle) 5,300 yards, and the southern but little more than 1,000; altogether 13,200 yards, or  $7\frac{1}{4}$  English miles. The present height of this earthen wall is between 40 and 50 feet. Here and there a mound more lofty than the rest covers the remains of a tower or a gateway. The walls appear to have been originally faced, at least to a certain height, with stonemasonry, some remains of which have been discovered. The mound of Kouyunjik is of irregular form, being nearly square at the S. W. corner, and ending almost in a point at the N. E. It is about 1,300 yards in

*Plan of Kouyunjik and Nebbi Yunus.*

length, by 500 in its greatest width; its greatest height is 96 feet, and its sides are precipitous, with occasional deep ravines or watercourses. The summit is nearly flat, but falls from the W. to the E. A small village, now abandoned, formerly stood upon it. The Khosr, a narrow, but deep and sluggish stream, sweeps round the S. side of the mound on its way to the Tigris. Anciently dividing itself into two branches, it completely surrounded Kouyunjik. Nebbi Yunus is considerably smaller than Kouyunjik, being about 530 yards, by 430, and occupying an area of about 40 acres. In height it is about the same. Upon it is a Turcoman village containing the apocryphal tomb of Jonah, and a burial-ground held in great sanctity by Mohammedans. Remains of entrances or gateways have been discovered in the N. and E. walls. The Tigris, now about one mile distant, formerly ran beneath the western wall (a), and at the foot of the two great mounds. The northern (b) and southern (d) faces were strengthened by deep and broad moats. The eastern (c) being most

The Great Mound of Nimroud.—(Ayre.)

accessible to an enemy, was most strongly fortified. The Khosr, before entering the enclosure, which it divides into two nearly equal parts, ran for some distance almost parallel to it (f). The remainder of the wall was protected by two wide moats (h), fed by the stream. In addition there were a rampart or ramparts of earth, and a moat between the inner walls and the Khosr. S. of this stream a third ditch, about 200 feet broad, excavated in the rock, extended almost the whole length of the eastern face, joining the moat on the S. An enor-

mous outer rampart of earth, still in some parts above 80 feet high (i), completed the defences on this side. A few mounds outside the ramparts probably mark the sites of detached towers or fortified posts. It is remarkable that within the enclosure, with the exception of Kouyunjik and Nebbi Yunus, no mounds or irregularities in the surface of the soil denote ruins of any size.—(2.) Nimroud consists of a similar enclosure of consecutive mounds—the remains of ancient walls. The system of defences is, however, very inferior in importance and completeness to that of Kouyunjik. The indications of towers occur at regular intervals; 108 may still be traced on the N. and E. sides. The area forms an irregular square about 2,331 yards by 2,095, containing about 1,000 acres. The N. and E. sides were defended by moats, the W. and S. walls by the river, which once flowed immediately beneath them. On the S. W. face is a great mound, 700 yards by 400, and covering about 60 acres, with a cone or pyramid of earth, about 140 feet high, rising in the N. W. corner of it. At the S. E. angle of the enclosure is a group of lofty mounds, called by the Arabs, after Nimrod's lieutenant, Athur (compare Gen. x. 11).—(3.) The enclosure-walls of Khorsabad form a square of about 2,000 yards. They show the remains of towers and gateways. There are apparently no traces of moats or ditches. The mound which gives its name to this group of ruins rises on the N. W. face. It may be divided into two parts or stages, the upper about 650 feet square, and 30 feet high, and the lower adjoining it, about 1,350 by 300. Its summit was formerly occupied by an Arab vil-

lage. In one corner is a pyramid or cone, like that at Nimroud, but much smaller. Within the interior are a few mounds, but no traces of considerable buildings.—(4.) Shereef Khan, so called from a small village in the neighborhood, consists of a group of mounds of no great size when compared with other Assyrian ruins, and without traces of an outer wall.—(5.) Selamiyah is an enclosure of irregular form, situated upon a high bank overlooking the Tigris, about 5,000 yards in circuit, and containing an area of about 410

Khorsabad.—View of the Mounds.—From Botte's *Nineve*.—(Fba.)

acres, apparently once surrounded by a ditch or moat. It contains no mound or ruin, and even the rampart has in many places nearly disappeared. The name is derived from an Arab town once of some importance, but now reduced to a miserable Turcoman village.—The greater part of the discoveries which of late have thrown so much light upon the history and condition of the ancient inhabitants of Nineveh were made in the ruins of Nimroud, Kouyunjik, and Khorsabad. The first traveller who carefully examined the supposed site of the city was Mr. Rich, formerly political agent for the East India Company at Bagdad; but his investigations were almost entirely confined to Kouyunjik and the surrounding mounds, of which he made a survey in 1820. From them he obtained a few relics, such as inscribed pottery and bricks, cylinders and gems. He subsequently visited the mound of Nimroud, of which, however, he was unable to make more than a hasty examination. Several travellers described the ruins after Mr. Rich, but no attempt was made to explore them systematically until M. Botta was appointed French consul at Mosul in 1843. The French government, having given the necessary funds, the ruins of Khorsabad were fully explored. They consisted of the lower part of a number of halls, rooms, and passages, for the most part wainscoted with slabs of coarse gray alabaster, sculptured with figures in relief, the principal entrances being formed by colossal human-headed winged bulls. No remains of exterior architecture of any great importance were discovered. The calcined limestone and the great accumulation of charred wood and charcoal showed that the building had been destroyed by fire. Its upper part had entirely disappeared, and its general plan could only be restored by the remains of the lower story. The collection of Assyrian sculptures in the Louvre, Paris, came from these ruins. M. Botta's discoveries at Khorsabad were followed by those of Mr. Layard at Nimroud and Kouyunjik, made between 1845 and 1850. The mound of Nimroud was found to contain the ruins of several distinct edifices, erected at different periods. The most ancient stood at the N. W. corner of the platform, the most recent at the S. E. In general plan and in construction they resembled the ruins at Khorsabad—consisting of a number of halls, chambers, and galleries, panelled with sculptured and inscribed alabaster slabs, and opening one into the other by doorways generally formed by pairs of colossal human-headed winged bulls or lions. The exterior architecture could not be traced. The lofty cone or pyramid of earth adjoining this edifice covered the ruins of a building the basement or which was a square of 125 feet, and consisted, to the height of 20 feet, of a solid mass of sun-dried bricks, faced on the four sides by blocks of stone carefully squared, bevelled, and adjusted. Upon this solid substructure there probably rose, as in the Babylonian temples, a succession of platforms or stages, diminishing in size, the highest having a shrine or altar upon it. (BABEL, TOWER OF.) A vaulted chamber or gallery, 100 feet long, 6 broad, and 12 high, crossed the centre of the mound on a level with the summit of the stone-masonry. It had evidently been broken into and rifled of its contents at some remote period, and may have been a royal sepulchre—the tomb of Ninus, or Sardanapalus, which stood at the entrance of Nineveh. It appears to have been raised by the son of the king who built the N. W. palace, and whose name in the

cuneiform inscriptions is supposed = Sardanapalus. Shalmanubar or Shalmaneser, the builder of this tomb or tower, also erected in the centre of the great mound a second palace, which appears to have been destroyed to furnish materials for later buildings. The black obelisk, now in the British Museum, was found among its ruins. On the W.

Entrance of Palace at Kouyunjik.

face of the mound, and adjoining the centre palace, are the remains of a third edifice, built by the grandson of Shalmanubar, whose name is read Iva-Lush,

and who is believed to be the Pul of the Hebrew Scriptures. Esar-haddon raised (about B. C. 680) at the S. W. corner of the platform another royal abode of considerable extent, but constructed principally with materials brought from his predecessor's palaces. In the opposite or S. E. corner are the ruins of a still later palace built by his grandson Ashur-emitili, very inferior in size and in splendor to other Assyrian edifices. At the S. W. corner of the mound of Kouyunjik stood a palace built by Sennacherib (about B. C. 700), exceeding in size and in magnificence of decoration all others hitherto explored. It occupied nearly 100 acres. Though but partially examined, about 60 courts, halls (some nearly 150 feet square), rooms, and passages (one 200 feet long), have been discovered, all panelled with sculptured slabs of alabaster. The entrances to the edifice and to the principal chambers were flanked by groups of winged human-headed lions and bulls of colossal proportions—some nearly 20 feet in height; 27 portals thus formed were excavated by Mr. Layard. A second palace was erected on the same platform by the son of Esar-haddon, Sardanapallus III. In it were discovered sculptures of great interest and beauty, but no propylæa or detached buildings. At Shereef Khan are the ruins of a temple, but no sculptured slabs have been dug up there. It was founded by Sennacherib, and added to by his grandson. At Selamiyah no remains of buildings nor any fragments of sculpture or inscriptions have been discovered.—The Assyrian edifices were so nearly alike in general plan, construction, and decoration, that one description will suffice for all. They were built upon artificial mounds or platforms, varying in height, but generally from 30 to 50 feet above the level of the surrounding country, and solidly constructed of regular layers of sun-dried bricks, as at Nimroud, or consisting merely of earth and rubbish heaped up, as at Kouyunjik. This platform was probably faced with stone-masonry, remains of which were discovered at Nimroud, and broad flights of steps or inclined ways led up to its summit. Although only the general plan of the ground-floor can now be traced, it is evident that the palaces had several stories built of wood and sun-dried bricks, which, when the building was deserted and allowed to fall to decay, gradually buried the lower chambers with their ruins, and protected the sculptured slabs from the effects of the weather. The depth of soil and rubbish above the alabaster slabs varied from a few inches to about 20 feet. To this accumulation of rubbish above them, the bas-reliefs owe their extraordinary preservation. The portions of the edifices still remaining consist of halls, chambers, and galleries, opening for the most part into large uncovered courts. The partition-walls vary from 6 to 15 feet in thickness, and are solidly built of sun-dried bricks, against which is placed the panelling or skirting of alabaster slabs. No windows have hitherto been discovered, and probably in most of the smaller chambers light was only admitted through the doors. The wall, above the wainscoting of alabaster, was plastered, and painted with figures and ornaments. The pavement was formed either of inscribed slabs of alabaster, or large flat kiln-burnt bricks. It rested upon layers of bitumen and fine sand. Of nearly similar construction are the modern houses of Mosul. The upper part and the external architecture of the Assyrian palaces, both of which have entirely disappeared, can only be restored conjecturally, from a comparison of monu-

ments represented in the bas-reliefs, and of edifices built by nations, such as the Persians, who took their arts from the Assyrians. By such means Mr. Fergusson (*The Palaces of Nineveh and Persepolis restored*) has, with much ingenuity, attempted to reconstruct a palace of Nineveh.—The sculptures, except the human-headed lions and bulls, were, for the most part, in low relief. The colossal figures usually represent the king, his attendants, and the gods; the smaller sculptures, which either cover the whole face of the slab, or are divided into two compartments by bands of inscriptions, represent battles, sieges, the chase, single combats with wild beasts, religious ceremonies, &c., &c. All refer to public or national events; the hunting-scenes evidently recording the prowess and personal valor of the king as the head of the people—"the mighty hunter before the Lord." The sculptures appear to have been painted—remains of color having been found on most of them. Thus decorated, without and within, the Assyrian palaces must have displayed a barbaric magnificence, not, however, devoid of a certain grandeur and beauty, which no ancient or modern edifice has probably exceeded. These great edifices, the depositories of the national records, appear to have been at the same time the abode of the king and the temple of the gods. No building has yet been discovered which possesses any distinguishing features to mark it specially as a temple. They are all precisely similar in general plan and construction. Most probably a part of the palace was set apart for religious worship and ceremonies.—*Site of the City.* Much diversity of opinion exists as to the identification of the ruins which may be properly included within the site of ancient Nineveh. According to Sir H. Rawlinson, and those who concur in his interpretation of the cuneiform characters, each group of mounds we have described represents a separate and distinct city. The name applied in the inscriptions to Nimroud is supposed to read "Kalkhu," and the ruins are consequently identified with those of the CALAH of Gen. x. 11; Khorsabad is Sargina, as founded by Sargon, the name having been retained in that of Sarghun, or Sarakoun, by which the ruins were known to the Arab geographers; Shereef Khan is Tarbisi. Selamiyah has not yet been identified, no inscription having been found in the ruins. The name of Nineveh is limited to the mounds opposite Mosul, including Kouyunjik and Nebbi Yunus. Sir H. Rawlinson was at one time inclined to exclude even the former mound from the precincts of the city. Furthermore, the ancient and primitive capital of ASSYRIA is supposed to have been not Nineveh, but a city named Asshur, whose ruins have been discovered at Kalah Sherghat, a mound on the W. bank of the Tigris, about 60 miles S. of Mosul. It need scarcely be observed that this theory rests entirely upon the presumed accuracy of the interpretation of the cuneiform inscriptions, and that it is totally at variance with the accounts and traditions preserved by sacred and classical history of the antiquity, size, and importance of Nineveh. The area of the enclosure of Kouyunjik, about 1,800 acres, was far too small for the site of the city. If Kouyunjik represents Nineveh, and Nimroud Calah, where are we to place Resen, "a great city" between the two (Gen. x. 12)? Scarcely at Selamiyah. On the other hand, it has been conjectured that these groups of mounds are not ruins of separate cities, but of fortified royal residences, each combining palaces, temples, propy-

lens, gardens, and parks, and having its peculiar name; and that they all formed part of one great city built and added to at different periods, and consisting of distinct quarters scattered over a very large area, and frequently very distant one from the other. Nineveh might thus be compared with Damascus, Ispahan, or perhaps more appropriately with Delhi. Only thus can the ancient descriptions of Nineveh, if any value whatever is to be attached to them, be reconciled with existing remains. As at Babylon, no great consecutive wall of enclosure, comprising all the ruins, such as that described by Diodorus, has been discovered at Nineveh, and no such wall ever existed. The river Gomel, the modern Ghazir-Su, may have formed the eastern boundary or defence of the city. As to the claims of the mound of Kalah Sherghat to represent the site of the primitive capital of Assyria called Asshur, they must rest entirely on the interpretation of the inscriptions. The city was founded, or added to, they are supposed to declare, by one Shamas-Iva, the son and viceroy, or satrap, of Ismi-Dagon, king of Babylon, who reigned, it is conjectured, about B.C. 1840. Assyria and its capital remained subject to Babylonia until B.C. 1273, when an independent Assyrian dynasty was founded, of which fourteen kings, or more, reigned at Kalah Sherghat. About B.C. 930 the seat of government, it is asserted, was transferred by Sardanapalus (the second of the name, and the Sardanapalus of the Greeks) to the city of Kalkhu or Calah (Nimroud), which had been founded by an earlier monarch named Shalmanubar. There it continued about 250 years, when Sennacherib made Nineveh the capital of the empire. These assumptions seem to rest upon very slender grounds, and Dr. Hincks altogether rejects the theory of the Babylonian character of these early kings, believing them to be Assyrian. It is believed that on an inscribed terra-cotta cylinder found at Kalah Sherghat, the foundation of a temple is attributed to this Shamas-Iva. A royal name, similar to that of his father, Ismi Dagon, is read on a brick from some ruins in S. Babylonia, and the two kings are presumed to be identical, though there is no other evidence of the fact (Rawlinson's *Herodotus*, i. 456, n. 5); indeed, the only son of this Babylonian king mentioned in the inscriptions is read Ibil-anu-duina, a name entirely different from that of the presumed viceroy of Asshur. Upon this presumed identification, an entirely new system of Assyrian history and chronology has been constructed, of which a sketch is given under ASSYRIA (see also Rawlinson's *Herodotus*, i. 489). But this system is at variance with sacred, classical, and monumental history, and can scarcely be accepted as proven, until the Assyrian ruins have been more completely examined, and the decipherment of the cuneiform inscriptions has made far greater progress. Tradition continuously points to Nineveh as the ancient capital of Assyria. There is no allusion to any other city which enjoyed this rank.—*Prophecies relating to Nineveh, and Illustrations of the Old Testament*. These are exclusively contained in Nahum and Zephaniah; for, although Isaiah foretells the downfall of the Assyrian empire (ch. x. and xiv.), he makes no mention of its capital. Nahum threatens the entire destruction of the city, so that it shall not rise again from its ruins: "With an overrunning flood he will make an utter end of the place thereof." "He will make an utter end; affliction shall not rise up the second time" (i. 8, 9). "Thy people is scattered upon the mountains, and no one

gathereth them. There is no healing of thy bruise" (iii. 18, 19). The manner in which the city should be taken seems to be indicated. "The defence shall be prepared" (ii. 5) is rendered in the marginal reading "the covering or coverer shall be prepared," and by Mr. Vance Smith, "the covering machine," the covered battering-ram or tower supposed to be represented in the bas-reliefs as being used in sieges. (ENGINE; RAM, BATTERING; WAR.) Some commentators believe that "the overrunning flood" refers to the agency of water in the destruction of the walls by an extraordinary overflow of the Tigris, and the consequent exposure of the city to assault through a breach; others, that it applies to a large and devastating army. An allusion to the overflow of the river may be contained in ii. 6, "The gates of the rivers shall be opened, and the palace shall be dissolved," a prophecy supposed to have been fulfilled when the Medo-Babylonian army captured the city. Most of the edifices discovered had been destroyed by fire, but no part of the walls of either Nimroud or Kouyunjik appears to have been washed away by the river. The likening of Nineveh to "a pool of water" (ii. 8) has been conjectured to refer to the moats and dams by which a portion of the country around Nineveh could be flooded. The city was to be partly destroyed by fire, "The fire shall devour thy bars," "then shall the fire devour thee" (iii. 13, 15). The gateway in the northern wall of the Kouyunjik enclosure had been destroyed by fire as well as the palaces. The population was to be surprised when unprepared, "while they are drunk as drunkards they shall be devoured as stubble fully dry" (i. 10). Diodorus states that the last and fatal assault was made when they were overcome with wine. The captivity of the inhabitants, and their removal to distant provinces, are predicted (iii. 18). The palace-temples were to be plundered of their idols, "out of the house of thy gods will I cut off the graven image and the molten image" (i. 14), and the city sacked of its wealth: "Take ye the spoil of silver, take the spoil of gold" (ii. 9). For ages the Assyrian edifices have been despoiled of their sacred images; and enormous amounts of gold and silver were, according to tradition, taken to Ecbatana by the conquering Medes. Only one or two fragments of the precious metals were found in the ruins. Nineveh, after its fall, was to be "empty, and void, and waste" (ii. 10); "it shall come to pass, that all they that look upon thee shall flee from thee, and say, 'Nineveh is laid waste'" (iii. 7). These epithets describe the present state of of the site of the city. But the fullest and the most vivid and poetical picture of its ruined and deserted condition is that given by Zephaniah, who probably lived to see its fall (ii. 13-15). The canals which once fertilized the soil are now dry. Except when the earth is green after the periodical rains, the site of the city, as well as the surrounding country, is an arid yellow waste. Flocks of sheep and herds of camels seek scanty pasture amongst the mounds. From the swamp in the ruins of Khorsabad, and from the reedy banks of the little streams that flow by Kouyunjik and Nimroud may be heard the croak of the cormorant and the bittern. The cedar-wood which adorned the ceilings of the palaces has been uncovered by modern explorers, and in the deserted halls the hyena, wolf, fox, and jackal now lie down. Many allusions in the O. T. to the dress, arms, modes of warfare (WAR, &c.), and customs of the people of Nineveh, as well as of the Jews, are explained by the Nineveh monuments.

Thus (Nah. ii. 3), "the shield of his mighty men is made red, the valiant men are in scarlet." The shields and the dresses of the warriors are generally painted red in the sculptures. The magnificent description of the assault upon the city (iii. 1-3) is

illustrated in almost every particular. The mounds built up against the walls of a besieged town (Is. xxxvii. 33; 2 K. xix. 32; Jer. xxxii. 24, &c.), the battering-ram (Ez. iv. 2), the various kinds of armor, helmets, shields, spears, and swords, used in battle

King feasting.—From Kouyunjik.

during a siege; the chariots and horses (Nah. iii. 3) are all seen in bas-reliefs. (CHARIOT; ENSIGN; HORSE; LACHISH, &c.) The interior decoration of the Assyrian palaces is described by Ezekiel, himself a captive in Assyria and an eye-witness of their magnificence (xxiii. 14, 15); a description strikingly illustrated by the sculptured likenesses of the Assyrian kings and warriors. (KING; PALACE; THRONE, &c.) The mystic figures seen by the prophet in his vision (ch. i.), uniting the man, the lion, the ox, and the

iting plains perfectly flat, such as those of Shinar, rather than an undulating country in which natural elevations are not uncommon, such as Assyria Proper. But it still remains to be proved that

Winged Globe.—(From Layard.)

Representations of a winged deity, supposed to be the god Ashur, the deified patriarch of Assyria.—(From Layard.)

eagle (CHERUB), may have been suggested by the eagle-headed idols, and man-headed bulls and lions, and the sacred emblem of the "wheel within wheel," by the winged circle or globe frequently represented in the bas-reliefs.—*Arts.* The origin of Assyrian art is a subject at present involved in mystery, and one which offers a wide field for speculation and research. Those who derive the civilization and political system of the Assyrians from Babylonia would trace their arts to the same source. One of the principal features of their architecture, the artificial platform serving as a substructure for their national edifices, may have been taken from a people inhab-

there are artificial mounds in Babylonia of an earlier date than mounds on or near the site of Nineveh. Whether other leading features and the details of Assyrian architecture came from the same source, is much more open to doubt. In none of the arts of the Assyrians have any traces hitherto been found of progressive change. In the architecture of the most ancient known edifice all the characteristics of the style are already fully developed; no new features of any importance seem to have been introduced at a later period. In sculpture, as probably in painting also, if we possessed the means of comparison, the same thing is observable as in the remains of ancient Egypt. The earliest works hitherto discovered show the result of a lengthened period of gradual development, which, judging from the slow progress made by untutored man in the arts, must have extended over a vast number of years. They exhibit the arts of the Assyrians at the highest stage of excellence they probably ever attained. The only change we can trace, as in Egypt, is one of decline or "decadence." The latest monuments, such as those from the palaces of Esar-haddon and his son, show perhaps a closer imitation of nature, and a more careful and minute execution of details than those from the earlier edifices; but they are wanting in the simplicity yet grandeur of conception, in the imagination, and in the variety of treatment displayed in the most ancient sculptures. This will at once be perceived by a comparison of the ornamental details of the two periods. The lions of the

earlier period are a grand, ideal, and, to a certain extent, conventional representation of the beast. In the later bas-reliefs the lions are more closely imitated from nature without any conventional elevation; but what is gained in truth is lost in dignity. The same may be observed in the treatment of the human form, though in its representation the Assyrians, like the Egyptians, would seem to have been, at all times, more or less shackled by religious prejudices or laws. No new forms or combinations appear to have been introduced into Assyrian art during the four or five centuries, if not longer period, in which we are acquainted with it. The art of the Nineveh monuments must in the present state of our knowledge be accepted as an original and national art, peculiar, if not to the Assyrians alone, to the races who at various periods possessed the country watered by the Tigris and Euphrates. As it was undoubtedly brought to its highest perfection by the Assyrians, and is especially characteristic of them, it may well and conveniently bear their name. From whence it was originally derived there is nothing as yet to show. If from Babylon, as some have conjectured, there are no remains to prove the fact. Analogies may perhaps be found between it and that of Egypt, but they are not sufficient to convince us that the one was the offspring of the other. The two may have been offshoots from some common trunk which perished ages before either Nineveh or Thebes was founded; or the Phenicians, as it has been suggested, may have introduced into the two countries, between which they were placed, and between which they may have formed a commercial link, the arts peculiar to each of them. Whatever the origin, the development of the arts of the two countries appears to have been affected and directed by very opposite conditions of national character, climate, geographical and geological position, politics, and religion. At a late period of Assyrian history, at the time of the building of the Khorsabad palace (about the eighth century B. C.), a more intimate intercourse with Egypt, through war or dynastic alliances, than had previously existed, appears to have led to the introduction of objects of Egyptian manufacture into Assyria, and may have influenced to a limited extent its arts. A precisely similar influence proceeding from Assyria has been remarked at the same period in Egypt, probably arising from the conquest and temporary occupation of the latter country by the Assyrians. The Ionic element in Greek art was probably derived from Assyria, as the Doric came from Egypt. The arts of the Assyrians, especially their ARCHITECTURE, spread to surrounding nations, as is usually the case when one race is brought into contact with another in a lower state of civilization. They appear to have crossed the Euphrates, and to have had more or less influence on the countries between it and the Mediterranean. Monuments of an Assyrian character have been discovered in various parts of Syria, and further researches would probably disclose many more. The arts of the Phenicians, judging from the few specimens preserved, show the same influence. The Assyrian inscriptions seem to indicate a direct dependence of Judea upon Assyria from a very early period. The TEMPLE and "houses" of Solomon (comp. 1 K. vi., vii.; 2 Chr. iii., iv.; PALACE) appear to have been very similar to the palaces of Nineveh, if not in the exterior architecture, certainly in the interior decorations. The Jewish edifices were, however, very much inferior in size to the Assyrian. Of objects of art (if we may use the term) contained in

the Temple we have the description of the pillars, of the brazen sea, and of various bronze or copper vessels. The Assyrian character of these objects is very remarkable. (ALTAR; CUP; KNOP; LAVER, &c.) The influence of Assyria to the eastward was even more considerable, extending far into Asia. The Persians copied their ARCHITECTURE (with such modifications as the climate and the building-materials at hand suggested), their sculpture, probably their painting and their mode of writing, from the Assyrians. The ruined palaces of PERSEPOLIS show the same general plan of construction as those of Nineveh—the entrances formed by human-headed animals, the skirting of sculptured stone, and the inscribed slabs. (GATE, &c.) The various religious emblems and the ornamentation have the same Assyrian character. Amongst the Assyrians the arts were principally employed, as amongst all nations in their earlier stages of civilization, for religious and national purposes. The colossal figures at the doorways of the palaces were mythic combinations to denote the attributes of a deity. The "Mar-Bull" and the "Man-Lion" are conjectured to be the gods "Nin" and "Nergal," presiding over war and the chase; the eagle-headed and fish-headed figures so constantly repeated in the sculptures, and as ornaments of vessels of metal, or in embroideries—NISROCH and DAGON. The bas-reliefs almost invariably record some deed of the king, as head of the nation, in war, and in combat with wild beasts, or his piety in erecting vast palace-temples to the gods. Hitherto no sculptures specially illustrating the private life of the Assyrians have been discovered, except one or two incidents, such as men baking bread or tending horses, introduced as mere accessories into the historical bas-reliefs. This may be partly owing to the fact that no traces whatever have yet been found of their burial-places, or even of their mode of dealing with the dead. (ANKLET; ARMLET; AXE; BRACELET; BURIAL; CART; CHALDEA; EUPHRATES; HARP; HOUSE; KNIFE; SEAL, &c.) Although the site of Nineveh afforded no special advantages for COMMERCE, and although she owed her greatness rather to her political position as the capital of the empire, yet, situated upon a navigable river communicating with the Euphrates and the Persian Gulf, she must soon have formed one of the great trading-stations between that important inland sea and Syria, and the Mediterranean, and must have become a depot for the merchandise supplied to a great part of Asia Minor, Armenia, and Persia. Her merchants are described in Ezekiel xxvii. 24 as trading in blue clothes and brodered work (such as is probably represented in the sculptures), and in Nahum iii. 16 as "multiplied above the stars of heaven."—*Writing and Language.* The ruins of Nineveh have furnished a vast collection of inscriptions partly carved on marble or stone slabs, and partly impressed upon bricks, and upon clay cylinders, or six-sided and eight-sided prisms, barrels, and tablets, which, used for the purpose when still moist, were afterward baked in a furnace or kiln (comp. Ez. iv. 1). The character employed was the arrow-headed or cuneiform—so called from each letter being formed by marks or elements resembling an arrow-head or a wedge. This mode of writing, believed by some to be of Turanian or Scythic origin, prevailed throughout the provinces comprised in the Assyrian, Babylonian, and the eastern portion of the ancient Persian empire, from the earliest times to which any known record belongs, or at least twenty centuries B. C., down to the period

of the conquests of Alexander; after which epoch, although occasionally employed, it seems to have gradually fallen into disuse. It never extended into Syria, Arabia, or Asia Minor, although it was adopted by Armenia. A cursive writing resembling

Specimen of the Arrow-headed or Cuneiform Writing.

the ancient Syrian and Phœnician, appears to have also been occasionally employed in Assyria. The Assyrian cuneiform character was of the same class as the Babylonian, only differing from it in the less complicated nature of its forms. The Assyrian and Babylonian alphabet (if the term may be applied to above 200 signs) is of the most complicated, imperfect, and arbitrary nature—some characters being phonetic, others syllabic, others ideographic—the same character being frequently used indifferently. This constitutes one of the principal difficulties in the decipherment. The investigation first commenced by Grotefend has since been carried on with much success by Sir H. Rawlinson, Dr. Hincks, Mr. Norris, and Mr. Fox Talbot, in England, and M. Oppert in France. (WRITING.) The people of Nineveh spoke a Shemitic dialect, connected with the Hebrew and with the so-called Chaldee of Daniel and Ezra. (SHEMITIC LANGUAGES.) This agrees with the testimony of the O. T. But it is asserted that there existed in Assyria as well as in Babylonia a more ancient tongue belonging to a Turanian or Scythic race, which is supposed to have inhabited the plains watered by the Tigris and Euphrates long before the rise of the Assyrian empire, and from which the Assyrians derived their civilization and the greater part of their mythology. The Assyrian inscriptions usually contain the chronicles of the king who built or restored the edifice in which they are found, records of his wars and expeditions into distant countries, of the amount of tribute and spoil taken from conquered tribes, of the building of temples and palaces, and invocations to the gods of Assyria. These inscribed bricks are of the greatest value in restoring the

royal dynasties. The most important inscription hitherto discovered in connection with Biblical history is that upon a pair of colossal human-headed bulls from Kouyunjik, now in the British Museum, containing the records of Sennacherib, and describ-

ing, among other events, his wars with Hezekiah. It is accompanied by a series of bas-reliefs believed to represent the siege and capture of LACHISH. A long list might be given of Biblical names occurring in the Assyrian inscriptions. Those of three Jewish kings have been read, JEHU son of Khumri (Omri), on the black obelisk, MENAHEM on a slab from the S. W. palace, Nimroud, now in the British Museum, and HEZEKIAH in the

Sennacherib on his Throne before Lachish.

Kouyunjik records. The most important inscribed terra-cotta cylinders are—those from Kalah Sherghat, with the annals of a king, whose name is believed to read Tiglath-pileser, not the same mentioned in 2 Kings, but an earlier monarch, supposed to have reigned about B. C. 1110; those from Khorsabad containing the annals of Sargon; those from Kouyunjik, especially one known as Bellino's cylinder, with the chronicles of Sennacherib; that from Nebbi Yunus with the records of Esar-haddon, and the fragments of three cylinders with those of his son. The most important results may be expected when inscriptions so numerous and so varied in character are deciphered. A list of nineteen or twenty kings can already be compiled, and the annals of the greater number of them will probably be restored to the lost history of one of the most powerful empires of the ancient world, and of one which appears to have exercised

Jewish Captives from Lachish.—From a bas-relief at Kouyunjik.

perhaps greater influence than any other upon the subsequent condition and development of civilized man. The only race now found near the ruins of Nineveh or in Assyria which may have any claim to be considered descendants from the ancient inhabitants of the country are the so-called Chaldean or Nestorian tribes, inhabiting the mountains of Kûrdistan, the plains round the lake of Ooroomiyah in Persia, and a few villages in the neighborhood of Mosul. They still speak a Shemitic dialect, almost identical with the Chaldee of Daniel and Ezra. A resemblance, which may be but fanciful, has been traced between them and the representations of the Assyrians in the bas-reliefs. Their physical characteristics at any rate seem to mark them as of the same race. A curse appears to hang over a land naturally rich and fertile, and capable of sustaining a vast number of human beings. Those who now inhabit it are yearly diminishing, and there seems no prospect that for generations to come this once-favored country will remain other than a wilderness.

**Nin'e-vites** = inhabitants of NINEVEH (Lk. xi. 30).

**Ni'san.** MONTH.

**Ni'son** = NISAN (Esth. xi. 2).

**Nis'roch** [-rok] (Heb., see below), the proper name of an idol of Nineveh, in whose temple Sennacherib

from the analysis given of the word by Rabbinical expositors. What the true etymology may be is extremely doubtful. If the origin of the word be Shemitic, it may be derived, as Gesenius suggests, from the Heb. *nesher*, which is in Ar. *nîr* = an eagle, with the termination *ôch* or *âch*, so that Nis-roch = the great eagle. But this explanation is far from satisfactory. It is adopted, however, by Fürst, and by Mr. Layard, who identifies with Nisroch the eagle-headed human figure, which is one of the most prominent on the earliest Assyrian monuments, and is always represented as contending with and conquering the lion or the bull.

**Ni'tre** [-ter] (Heb. *nether*) occurs in Prov. xxv. 20, "and as vinegar upon *nether*;" and in Jer. ii. 22, "though thou wash thee with *nether*." The substance denoted is not that which we now understand by the term *nitre*, i. e. nitrate of potassa = saltpetre—but the *nitron* or *litron* of the Greeks, the *nitrum* of the Latins, and the *natron* or native carbonate of soda of modern chemistry. The latter part of the passage in Proverbs is well explained by Shaw, who says (*Trav.* ii. 387), "the unsuitableness of the singing of songs to a heavy heart is very finely compared to the contrariety there is between vinegar and natron." Natron was and is still used by the Egyptians for washing linen: the value of soda in this respect is well known. The Egyptians use it (1.) instead of yeast for bread, (2.) instead of soap, (3.) as a cure for the toothache, being mixed with vinegar. Natron is found abundantly in the well-known soda lakes of Egypt described by Pliny, and referred to by Strabo, which are situated in the barren valley of *Bahr bela-ma* (the Waterless Sea), about fifty miles W. of Cairo.

**No.** NO-AMON.

**No-a-d'iah** (fr. Heb. = with whom *Jehovah* convenes, Ges.). 1. A Levite, son of Binnui, who with Meremoth, Eleazar, and Jozabad, weighed the vessels of gold and silver belonging to the Temple which were brought back from Babylon (Ezr. viii. 33).—2. The prophetess Noadiah joined Sanballat and Tobiah in their attempt to intimidate Nehemiah (Neh. vi. 14).

**No'ah** (Heb. *nôah* or *noach* = rest), in N. T. NOE, the tenth in descent from Adam, in the line of Seth; son of LAMECH 2, and grandson of Methuselah. Of his father Lamech all that we know is comprised in the words that he uttered on the birth of his son (Gen. v. 29), words the more significant when we contrast them with the saying of the other LAMECH 1, which have also been preserved (iv. 23, 24). In the reason which Lamech gives for calling his son Noah, there is a play upon the name which it is impossible to preserve in English. He called his name Noah (*rest*), saying, "this same shall comfort us" (Heb. *yênahâménû* or *yênachâménû*). It is plain that the name "rest" and the verb "comfort" are of different roots; Lamech merely plays upon the name after a fashion common in all ages and countries (so Mr. J. J. S. Perowne). Of Noah himself, from this time, we hear nothing more

till he is 600 years old, when he begat three sons, SHEM, HAM, and JAPHETH. Very remarkable, however, is the glimpse which we get of the state of society in the ante-diluvian world (vi. 1-4). The

Eag.-headed figure, supposed to be Nisroch.—From the N. W. Palace, Nimroud.—(Layard's *Ninroch*, I. 71.)

was worshipping when assassinated by his sons, Adrammelech and Sharezer (2 K. xix. 37; Is. xxxvii. 38). Rashi, in his note on Is. xxxvii. 38, explains Nisroch as "a beam, or plank, of Noah's ark."

narrative stands thus: "And it came to pass when men (the Adam) began to multiply on the face of the ground and daughters were born unto them; then the sons of God (the Elohim) saw the daughters of men (the Adam) that they were fair, and they took to them wives of all that they chose. And Jehovah said, My Spirit shall not for ever rule (or be humbled) in men (A. V. 'strive with man'), seeing that they are (or, in their error they are) but flesh, and their days shall be a hundred and twenty years. The *nēphīlīm* (A. V. 'GIANTS') were on the earth in those days; and also afterward when the sons of God (the Elohim) came in unto the daughters of men (the Adam), and children were born to them, these were the heroes which were of old, men of renown." Here a number of perplexing questions present themselves: (a.) Who were the sons of God? (b.) Who the daughters of men? (c.) Who the *nēphīlīm*? (GIANTS.) (d.) What is the meaning of "My Spirit shall not always rule, or dwell, or be humbled in men;" and (e.) of the words which follow, "But their days shall be a hundred and twenty years?" Questions a. and c. are answered directly under GIANTS. b. "The daughters of men" are variously regarded as women of inferior rank, female descendants of Cain, or of Adam, impious or wicked women, females of the human race, &c., according to the view taken of "the sons of God," with whom they are contrasted. d. In consequence of the grievous and hopeless wickedness of the world at this time, God resolves to destroy it. "My Spirit," He says, "shall not always 'dwell' (LXX., Vulgate, &c.) or 'bear away' (Fürst, &c.) in man—inasmuch as he is but flesh." The meaning of which seems to be that whilst God has put His Spirit in man, i. e. not only the breath of life, but a spiritual part capable of recognizing, loving, and worshipping Him, man had so much sunk down into the lowest and most debasing of fleshly pleasures, as to have almost extinguished the higher light within him. Gesenius translates: *My Spirit shall not be made low in man for ever*, i. e. the higher and divine nature shall not for ever be humiliated in the lower, shall not ever descend from heaven and dwell in flesh upon the earth (compare ver. 1, 2). Bush (*on Genesis*, vi. 3) translates: *My Spirit shall not always judge*, i. e. contend in judgment (compare Eccl. vi. 10); in other words, "My Spirit shall not perpetually keep up the process of judgment, rebuke, conviction, and condemnation." The A. V. translates this similarly, "My Spirit shall not always strive with man." Then follows: "But his days shall be a hundred and twenty years," which has been interpreted by some to mean, that still a time of grace shall be given for repentance, viz. 120 years before the Flood shall come; and by others, that the duration of human life should in future be limited to this term of years, instead of extending over centuries as before. This last seems the most natural interpretation of the Hebrew words. Nordheimer (*Hebrew Grammar*, i. 171) makes the whole passage mean: *My Spirit will not judge man always when he errs* (literally *in their erring*, A. V. "for that he also"); *he is but flesh and his days are few* (hence he is to be compassionated; compare Ps. lxxviii. 38, 39).—Of Noah's life during this age of almost universal apostasy we are told but little. It is merely said that he was a righteous man and perfect in his generations (i. e. among his contemporaries), and that he, like Enoch, walked with God. 2 Pet. ii. 5 styles him "a preacher of righteousness." Besides

this we are merely told that he had three sons, each of whom had married a wife; that he built the Ark in accordance with Divine direction; and that he was 600 years old when the Flood came. Both about the Ark and the Flood so many questions have been raised, that we must consider each of these separately.—*The Ark*. The precise meaning of the Hebrew word (*tēbāh*) is uncertain. The word only occurs here and in Exodus ii. 3. In all probability it is to the old Egyptian that we are to look for its original form. Bunsen, in his vocabulary, gives *tba*, a chest, *tpt*, a boat, and in the Coptic Version of Ex. ii. 3, *tebi* is the rendering of *tēbāh*. This chest or boat was to be of GOPHER (i. e. cypress) wood, a kind of timber which for its lightness and durability was employed by the Phenicians for building their vessels (so Mr. J. J. S. Perowne). The planks of the ark, after being put together, were to be protected by a coating of PITCH, or rather bitumen (SLIME), which was to be laid on both inside and outside, as the most effectual means of making it water-tight, and perhaps also as a protection against the attacks of marine animals. The ark was to consist of a number of "nests" or small compartments (A. V. "chambers"), doubtless for the convenient distribution of the different animals and their food. These were to be arranged in three tiers, one above another; "with lower, second, and third (stories) shalt thou make it." Means were also to be provided for letting light into the ark. In the A. V. we read, "A window shalt thou make to the ark, and in a cubit shalt thou finish it above." The original is obscure, and has been differently interpreted. The "window," or "light-hole" (Heb. *tsōhar*, literally *light*, a light, Ges.) was to be at the top of the ark apparently. If the words "unto a cubit shalt thou finish it above" refer to the window and not to the ark itself, they seem to imply that this aperture, or skylight, extended to the breadth of a cubit the whole length of the roof. But if so, it could not have been merely an open slit, for that would have admitted the rain. Are we then to suppose that some transparent, or at least translucent, substance was employed? It would almost seem so. A different Heb. word (*hallōn* or *challōn*) is used in ch. viii. 6, where it is said that Noah opened the window of the ark. Supposing then the *tsōhar* to be a skylight, or series of skylights running the whole length of the ark, the *hallōn* or *challōn* might be a single compartment of the larger window, which could be opened at will. But besides the window there was to be a door. This was to be placed in the side of the ark. Of the shape of the ark nothing is said; but its dimensions are given. It was to be 300 cubits in length, 50 in breadth, and 30 in height. Taking twenty-one inches for the cubit, the ark would be 525 feet long, 87½ feet broad, and 52½ feet high. This is very considerably larger than the largest British man-of-war. The steamship Great Eastern, however, is both longer and deeper than the ark, being 680 feet long (691 on deck), 83 broad, and 58 deep. It should be remembered that this huge structure was only intended to float on the water, and was not in the proper sense of the word a ship. It had neither mast, sail, nor rudder; it was in fact nothing but an enormous floating house, or oblong box rather. Two objects only were aimed at in its construction: the one was that it should have ample stowage, and the other that it should be able to keep steady upon the water. After having given Noah the necessary instructions for the building of the ark, God tells

him the purpose for which it was designed. The earth is to be destroyed by water. "And I, behold I do bring the flood—waters upon the earth—to destroy all flesh wherein is the breath of life . . . but I will establish my covenant with thee," &c. (Gen. vi. 17, 18). The inmates of the ark are then specified. They are to be Noah and his wife, and his three sons with their wives. Noah is also to take a pair of each kind of animal into the ark with him that he may preserve them alive; birds, domestic animals, and creeping things are particularly mentioned. He is to provide for the wants of each of these stores "of every kind of food that is eaten." It is added, "Thus did Noah; according to all that God (Elohim) commanded him, so did he." A remarkable addition to these directions occurs in the following chapter. The pairs of animals are now limited to one of *unclean* animals, whilst of *clean* animals and birds (ver. 2), Noah is to take to him "by sevens." It seems unnecessary to resort to the documentary hypothesis (see GENESIS, PENTATEUCH) to explain this addition, when the simple supposition of an additional or supplementary direction from God is both natural and sufficient to remove the difficulty. Are we, then, to understand that Noah literally conveyed a pair of all the animals of the world into the ark? This question virtually contains in it another, viz. whether the deluge was universal, or only partial? If it was only partial, then of course it was necessary to find room but for a comparatively small number of animals; and the dimensions of the ark are ample enough for the required purpose. The argument on this point has been well stated by Hugh Miller in his *Testimony of the Rocks*. Sir Walter Raleigh (250 years ago) proposed to allow in the ark "for 89 distinct species of beasts, or lest any should be omitted, for 100 several kinds;" and he calculated that "all these 280 beasts might be kept in one story, or room of the ark, in their several cabins; their meat in a second; the birds and their provision in a third, with space to spare for Noah and his family, and all their necessities." But our knowledge of the animal kingdom gives a far larger number of distinct species. Johnston's *Physical Atlas* (second edition, 1856) enumerated 1,658 different species of mammals. To these we must add the 6,266 birds of Lesson, and the 657 (or subtracting the sea-snakes, and perhaps the turtles) the 642 reptiles of Charles Bonaparte. Take the *clean* animals alone, of which seven were to be in the ark, Mr. Waterhouse in 1856 estimated the oxen at twenty species, the sheep at twenty-seven, the goats at twenty, the deer at fifty-one. Add to these the forty-eight species of antelopes only, multiply the whole by seven, and we have 1,162 individuals, a number more than four times greater than Raleigh's estimate. But it is not only the inadequate size of the ark to contain the progenitors of our existing species of animals, which is conclusive against a universal deluge (so Mr. Perowne). Another fact points with still greater force, if possible, in the same direction, and that is, the manner in which we now find these animals distributed over the earth's surface. We now know that every great continent has its own peculiar fauna; that the original centres of distribution must have been not one, but many; that the areas or circles around these centres must have been occupied by their pristine animals in ages long anterior to that of the Noachian Deluge. (But see MAN.) It is quite plain, then, that if all the animals of the world were literally gathered together in the ark

and so saved from the waters of a universal deluge, this could only have been effected (even supposing there was space for them in the ark) by a most stupendous miracle. But the narrative does not compel us to adopt so tremendous an hypothesis. We shall see more clearly when we come to consider the language used with regard to the Flood itself, that even that language, strong as it undoubtedly is, does not oblige us to suppose that the Deluge was universal (so Mr. Perowne, with many others; but see below).—*The Flood*. The ark was finished, and all its living freight was gathered into it as in a place of safety. Jehovah shut him in, says the chronicler, speaking of Noah. And then ensued a solemn pause of seven days before the threatened destruction was let loose. At last the Flood came; the waters were upon the earth. The narrative is vivid and forcible, though entirely wanting in that sort of description (of the death-struggle, the cry of despair, the agony of husband and wife, parent and child, the sadness of Noah, &c.) which in a modern historian or poet would have occupied the largest space. But one impression is left upon the mind with peculiar vividness, from the very simplicity of the narrative, and it is that of utter desolation. From vii. 17 to the end of the chapter a very simple but very powerful and impressive description is given of the appalling catastrophe. We are reminded six times in chs. vi.–viii. who the tenants of the ark were; the total and absolute blotting out of every thing else is not less emphatically dwelt on. The waters of the Flood increased for 190 days (40 + 150, comparing vii. 12 and 24). And then "God remembered Noah," and made a wind to pass over the earth, so that the waters were assuaged. The ark rested on the seventeenth day of the seventh month on the mountains of ARARAT. After this the waters gradually decreased till the first day of the tenth month, when the tops of the mountains were seen. Then Noah sent forth, first, the raven, which flew hither and thither, resting probably on the mountain-tops, but not returning to the ark; and next, after an interval of seven days (comp. ver. 10), the dove, "to see if the waters were abated from the ground" (i. e. the lower plain country). "But the dove found no rest for the sole of her foot, and she returned unto him into the ark." After waiting for another seven days he again sent forth the dove, which returned this time with a fresh olive-leaf in her mouth, a sign that the waters were still lower. And once more, after another interval of seven days, he sent forth the dove, and she "returned not again unto him any more," having found a home for herself upon the earth. On reading this narrative it is difficult, it must be confessed, to reconcile the language employed with the hypothesis of a partial deluge. The difficulty does not lie in the largeness of most of the terms used, but rather in the precision of one single expression. It is natural to suppose that the writer, when he speaks "of all flesh," "all in whose nostrils was the breath of life," refers only to his own locality. This sort of language is common enough in the Bible when only a small part of the globe is intended (compare Gen. xli. 57; Deut. ii. 25; 1 Chr. xiv. 17; Lk. ii. 1; Rom. i. 8; Col. i. 23, &c.). The real difficulty lies in the connecting of this statement with the district in which Noah is supposed to have lived, and the assertion that the waters prevailed fifteen cubits upward. If the Ararat on which the ark rested be the present mountain of the same name, the highest peak of which is more than 17,000 feet above the

sea, it would have been impossible for this to have been covered, the water reaching fifteen cubits, i. e. twenty-six feet above it, unless the whole earth were submerged. The plain meaning of the narrative is, that as far as the eye could sweep, not a solitary mountain reared its head above the waste of waters. But there is no necessity for assuming that the ark stranded on the high peaks of the mountain now called Ararat, or even that that mountain was visible. A lower mountain-range, e. g. the Zagros range, may more naturally be intended. We may also assume the inundation to have been partial, and may suppose it to have extended over the whole valley of the Euphrates, and eastward as far as the range of mountains running down to the Persian Gulf, or further. As the inundation is said to have been caused by the breaking up of the fountains of the great deep, as well as by the rain, some great and sudden subsidence of the land may have taken place, accompanied by an inrush of the waters of the Persian Gulf, similar to what occurred in the Runn of Cutch, on the eastern arm of the Indus, in 1819, when the sea flowed in, and in a few hours converted a tract of land, 2,000 square miles in area, into an inland sea or lagoon. In consequence of earthquakes in 1822 and 1835, an area of 100,000 square miles, on the coast of Chili, has been raised two feet above high-water mark in one part, and depressed as much in another (Fbn. art. Deluge). It has sometimes been asserted that the facts of geology are conclusive against the possibility of a universal deluge. Formerly, indeed, the existence of shells and corals at the top of high mountains was taken to be no less conclusive evidence the other way. They were constantly appealed to as a proof of the literal truth of the Scripture narrative. Even within the last fifty years geologists like Cuvier and Buckland have thought that the *superficial deposits* might be referred to the period of the Noachian Flood. Subsequent investigation, however, showed that if the received chronology were even approximately correct, this was out of the question, as these deposits must have taken place thousand of years before the time of Noah, and indeed before the creation of man. So far then, it is clear, there is no evidence now on the earth's surface in favor of a universal deluge. But is there any positive geological evidence against it? Hugh Miller and other geologists have maintained that there is. They appeal to the fact that in various parts of the world, such as Auvergne in France, and along the flanks of Etna, there are cones of loose scoriæ and ashes belonging to long extinct volcanoes, which must be at least triple the antiquity of the Noachian Deluge, and which yet exhibit no traces of abrasion by the action of water. These loose cones, they argue, must have been swept away had the water of the Deluge ever reached them. But this argument is by no means conclusive. The whole earth might have been submerged one year, or even much longer, without any trace of such submersion being now discernible. There is, however, other evidence conclusive against the hypothesis of a universal deluge, miracle apart. The first effect of the covering of the whole globe with water would be a complete change in its climate, the general tendency being to lower and equalize the temperature of all parts of its surface. At equal pace with this process would ensue the destruction of the great majority of marine animals. And this would take place, partly from the entire change in climatal conditions, too sudden and general to be escaped by

migration, and, in still greater measure, from the sudden change in the depth of the water. Great multitudes of marine animals can only live between tide-marks, or at depths less than fifty fathoms; and as by the hypothesis the land had to be depressed many thousands of feet in a few months, and to be raised again with equal celerity, it follows that the animals could not possibly have accommodated themselves to such vast and rapid changes. All the littoral animals, therefore, would have been killed. The race of acorn-shells and periwinkles would have been exterminated, and all the coral-reefs of the Pacific would at once have been converted into dead coral, never to grow again. But acorn-shells, periwinkles, and coral still survive, and there is good evidence that they have continued to exist and flourish for many thousands of years. On the other hand, Noah was not directed to take marine animals of any kind into the ark, nor indeed is it easy to see how they could have been preserved. Secondly, had the whole globe been submerged, the sea-water covering the land would at once have destroyed every fresh-water fish, mollusk, and worm; and as none of these were taken into the ark, the several species would have become extinct. Nothing of the kind has occurred. Thirdly, such experiments as have been made with regard to the action of sea-water upon terrestrial plants leave very little doubt that submergence in sea-water for ten or eleven months would have effectually destroyed not only the great majority of the plants, but their seeds as well. And yet it is not said that Noah took any stock of plants with him into the ark, or that the animals which issued from it had the slightest difficulty in obtaining pasture. There are, then, it must be confessed, very strong grounds for believing that no universal deluge ever occurred. Suppose the Flood, on the other hand, to have been local: suppose, e. g., the valley of the Euphrates to have been submerged; then the necessity for preserving all the species of animals disappears. For (1.) there was nothing to prevent the birds and many of the large mammals from getting away; and (2.) the number of species peculiar to that geographical area, and which would be absolutely destroyed by its being flooded, supposing they could not escape, is insignificant. All these considerations point with overwhelming force in the same direction, and compel us to believe, unless we suppose that a stupendous miracle was wrought, that the Flood of Noah (like other deluges of which we read) extended only over a limited area of the globe. (The preceding argument is abridged from Mr. Perowne.) Many authors, ancient and modern, have held that Noah's Flood was universal, and involved vast geological changes (Heidegger, Pelletier, Ray, Whiston, Haller, Sharon Turner, &c.). Some ancients and many moderns have held, as above, that it was universal in respect to the human race, but partial in respect to the globe (M. Poole, Stillingfleet, Bishop Patrick, Isaac Vossius, J. Pye Smith [in Kitto], Fairbairn, Ayre, &c.).—The word specially used to designate the Flood of Noah (*hamabbûl*) occurs in only one other passage of Scripture (Ps. xxix. 10). In Is. liv. 9, the Flood is spoken of as "the waters of Noah." In the N. T. our Lord gives the sanction of His own authority to the historical truth of the narrative (Mat. xxiv. 37; compare Lk. xvii. 26). 1 Pet. iii. 20 speaks of the "long-suffering of God," which "waited in the days of Noah." In 2 Pet. ii. 5 it is cited as an instance of the righteous judgment of God who spared not the old world, &c.—The tradi-

tions of many nations have preserved the memory of a great and destructive flood from which but a small part of mankind escaped. It is not always very clear whether they point back to a common centre, or whether they were of national growth. The traditions which come nearest to the Biblical account are those of the nations of Western Asia. Foremost among these is the Chaldean. It is preserved in a fragment of Berosus, and tells how Xisuthrus built a vessel in which he, his wife, and family, and personal friends, were saved from a great deluge, with different animals, birds, and quadrupeds. The details in regard to sending out birds, &c., resemble the Biblical account. Other notices of a flood may be found (a.) in the Phœnician mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned; (b.) in the Sybilline Oracles which mentioned the Deluge, after which Kronos, Titan, and Japetus ruled the world, each taking his portion, and remaining at peace till Noah's death, when Kronos and Titan engaged in war with one another, the account being partly borrowed no doubt from the Biblical narrative, and partly perhaps from some Babylonian story. To these must be added (c.) the Phrygian story of King Annakos or Nannakos (Enoch) in Iconium, who reached an age of more than 300 years, foretold the Flood, and wept and prayed for his people, seeing the destruction that was coming upon them. In the time of Septimius Severus (about A. D. 200), a medal was struck at Apamea, in Phrygia, commemorating the Flood, and representing a man and woman in an ark on the water, and the same pair also just come out on the land, with one bird sitting on the ark and another flying with a branch to it, and the Greek letters *Nô* or *Nôe* on the ark. In this cycle of tradition must be reckoned also (1.) the Syrian, related by Lucian, and connected with a huge chasm in the earth at the temple of ATARGATIS, near Hierapolis, into which the waters of the Flood are supposed to have drained; and (2.) the Armenian, quoted by Josephus. (ARARAT.) A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian represents the world as corrupted by Ahri-man, and the universal flood coming to wash away all impurity, and destroy Ahri-man's creatures. The Chinese represents Fâh-he with his wife, three sons, and three daughters, as having escaped the Flood, and becoming the author of Chinese civilization. The Indian tradition appears in various forms. Of these, the one which most remarkably agrees with the Biblical account is that contained in the Mahâbhârata—that Brahma announced to the pious Manu the approach of the Deluge, commanded him to build a ship and to put into it all kinds of seeds together with the seven Rishis, or holy beings; that Brahma himself, after the Deluge came, appeared as a horned fish, and drew the vessel after him many years till it was landed on the loftiest summit of Mount Himarat (i. e. the Himalaya), and then Manu, by the favor of Brahma, created the new race of mankind. The account of the Flood in the Koran is drawn, apparently, partly from Biblical and partly from Persian sources. In the main, no doubt, it follows the narrative in Genesis, but dwells at length on the testimony of Noah to the unbelieving. Another peculiarity of this version is, that Noah calls in vain to one of his sons to enter into the ark; he refuses, in the hope of escaping to a mountain, and is drowned before his father's eyes. A third cycle of traditions is to be found among the American

nations. These, as might be expected, show occasionally some marks of resemblance to the Asiatic legends. "Of the different nations that inhabit Mexico," says A. von Humboldt, "the following had paintings resembling the deluge of Coxcox, viz. the Aztecs, the Mixtecs, the Zapotecs, the Tlascaltecs, and the Mechoacans. The Noah, Xisuthrus, or Manu, of these nations is termed Coxcox, Teocipactli, or Tezpi. He saved himself with his wife Pochiquetzatl in a bark, or, according to other traditions, on a raft." A peculiarity of many of these American Indian traditions is, that the Flood, according to them, usually took place in the time of the First Man, who, together with his family, escape. The Fiji islanders have a legend that the islands were submerged by a great rain, but eight persons were saved in two large double canoes by Rokora, the god of carpenters, and Rokola, his head workman. One more cycle of traditions we shall notice—that, viz., of the Hellenic races. Hellas (GREECE) has two versions of a flood, one associated with Ogyges, and the other, in a far more elaborate form, with Deucalion, the one righteous man who escaped with his wives and children, and the animals he had put into the chest. Both, however, are of late origin; they were unknown to Homer and Hesiod. Herodotus, though he mentions Deucalion as one of the first kings of the Hellenes, says not a word about the Flood. Pindar is the first writer who mentions it. It must be confessed, that the later the narrative, the more definite the form it assumes, and the more nearly it resembles the Mosaic account. It seems tolerably certain that the Egyptians had no records of the Deluge, at least if we are to credit Manetho. Nor has any such record been detected on the monuments, or preserved in the mythology of Egypt.—*After the Flood.* Noah's first act after he left the ark was to build an altar, and to offer sacrifices, which were accepted (Gen. viii. 20 ff.). This is the first altar of which we read in Scripture, and the first burnt-sacrifice. Jehovah accepts the sacrifice of Noah as the acknowledgment on the part of man that he desires reconciliation and communion with God. Then follows the blessing of God (Elohim) upon Noah and his sons (ix.). All living creatures are now given to man for food; but express provision is made that the blood (in which is the life) shall not be eaten. Next, God makes provision for the security of human life. The blood of man, in which is his life, is yet more precious than the blood of beasts. (MURDER.) Hence is laid the first foundation of the civil power. Thus, with the beginning of a new world, God gives on the one hand a promise which secures the stability of the natural order of the universe, and, on the other hand, consecrates human life with a special sanctity as resting upon these two pillars—the brotherhood of men, and man's likeness to God. Of the seven precepts of Noah, as they are called, the observance of which was required of all Jewish proselytes, three only are here expressly mentioned, the abstinence from blood, the prohibition of murder, and the recognition of the civil authority. The remaining four—the prohibition of idolatry, of blasphemy, of incest, and of theft—rested apparently on the general sense of mankind. It is in the terms of the blessing and the covenant made with Noah after the Flood that we find the strongest evidence that in the sense of the writer it was universal, i. e. that it extended to *all the then known world*. The literal truth of the narrative obliges us to believe that *the whole human race*, ex-

cept eight persons, perished by the waters of the Flood. Noah is clearly the head of a new human family, the representative of the whole race. It is as such that God makes His covenant with him. The bow in the cloud, seen by every nation under heaven, is an unfailing witness to the truth of God. (RAIN-BOW.)—Noah now for the rest of his life betook himself to agricultural pursuits. He planted a vineyard. Whether in ignorance of its properties or otherwise, he drank of the juice of the grape till he became intoxicated, and shamefully exposed himself in his own tent. One son, Ham, mocked openly at his father's disgrace. The others, with dutiful care and reverence, endeavored to hide it. When he recovered from his intoxication, he declared that a curse should rest upon the sons of Ham. (CANAAN.) With this was joined a blessing on the other two. It is uncertain whether in the words "And let him dwell in the tents of Shem," the "him" = "God," or "Japheth." At first it seems more natural to suppose that Noah prays that God would dwell there. But the blessing of Shem has been spoken already. It is better therefore to refer the "dwell" to Japheth. What, then, is meant by his dwelling in the tents of Shem? Not, of course, that he should so occupy them as to thrust out the original possessors; nor even that they should melt into one people; but, as it would seem, that Japheth may enjoy the *religious privileges* of Shem. After this prophetic blessing we have only the sum of Noah's years, viz. 350 + 600 = 950. (CHRONOLGY.)

**No'ah** (Heb. *nô'ah*, *motion*, Ges.; *the flattering*, Fii.), one of the daughters of ZELOPHEAD (Num. xxvi. 33, xxvii. 1, xxxvi. 11; Josh. xvii. 3). **HEIR.**

**No-a'mon** (Heb. fr. Egyptian = *the portion of Amos*, Jablonsky; *the place of Amos*, Ges.; but see below) (Nah. iii. 8), **NO** (Heb.) (Jer. xlv. 25; Ez. xxx. 14-16), a city of Egypt, = THEBES, or Diospolis Magna. The second part of No-amon is the name of *Amen* (AMON), the chief divinity of Thebes. Mr. R. S. Poole thinks it most reasonable to suppose that No is a Shemitic name, and that Amon is added in Nahum (l. c.) to distinguish Thebes from some other place of the same name, or on account of the connection of Amen with that city. Jerome supposes No to be either Alexandria or Egypt itself. Champollion takes it to be Diospolis in Lower Egypt; but Gesenius well observes that it would not then be compared in Nahum to Nineveh. This and the evidence of the Assyrian record leave no doubt that it is Thebes. The description of No-amon, as "situate among the rivers, the waters round about it" (Nah. l. c.), applies well to Thebes.

**Nob** (Heb. *a height, hill?* Ges.; *a hill, a high place*, Fii.), a sacerdotal city in Benjamin, situated on some eminence near Jerusalem (1 Sam. xxiii. 11; Neh. xi. 32). That it was on one of the roads from the N. to the capital, and within sight of it, is certain from the illustrative passage in which Isaiah (x. 28-32) describes the approach of the Assyrian army. Here the poet sees the enemy pouring down from the N., and it is clearly implied that Nob was the last station in their line of march, whence the invaders could see Jerusalem, and whence they could be seen, as they "shook the hand" in proud derision of their enemies. Nob was one of the places where the Tabernacle, or Ark of Jehovah, was kept for a time during the days of its wanderings before a home was provided for it in Jerusalem (2 Sam. vi. 1, &c.). A company of the Benjamites settled here after the return from the exile (Neh. xi. 32). But the event for which Nob was most noted in the Scripture

annals, was a frightful massacre of the priests in Saul's reign (1 Sam. xxii. 17-19; ABIATHAR; AHIMELECH 1; DAVID; DOEG). All trace of the name disappeared long ago. In Jerome's time nothing remained to indicate where it had been. Geographers are not agreed as to its site. Von Raumer and Kiepert place Nob at *El-'Iadwiyeh*, not far from 'Anâta (Anathoth), and one mile N. W. of Jerusalem. But this beautifully situated village is in a valley, and Jerusalem is not to be seen from it. Porter (in Kitto) believes its site is on a low-peaked tell, where are cisterns hewn in the rock, large building-stones, &c., situated less than one mile S. of *Tuleil el-Fil* (Gibeah), and on the E. of the N. road, opposite *Sháfât*. The top of this hill affords an extensive view, and Mount Zion is distinctly seen. The Nob spoken of above is not to be confounded with another (not in the Scriptures) which Jerome mentions in the plain of Sharon, not far from Lydda.

**No'bah** (Heb. *a barking*, Ges.; *a cry, a loud call*, better *prominency*, i. e. a *prominent one*, Fii.), an Israelite warrior (Num. xxxii. 42), probably, like Jair, a Manassite, who during the conquest of the territory E. of Jordan possessed himself of KENATH and the villages or hamlets dependent upon it (Heb. "daughters"), and gave them his own name.

**No'bah** (see above), the name conferred by the conqueror of KENATH and its villages on his new acquisition (Num. xxxii. 42), but used afterward only in describing Gilead's pursuit of Zebah and Zalmunna (Judg. viii. 11).

\* **No'ble-man** [-bl-], the A. V. translation of—1. Gr. *basilikos*, literally *kingly, royal*; hence a *royal attendant, courtier, nobleman*, Rbn. *N. T. Lex.* (Jn. iv. 46, 49), elsewhere translated "king's" (Acts xii. 20), "royal" (ver. 21; Jas. ii. 8). Probably this "nobleman" was attached to the court of Herod Antipas.—2. Gr. *anthrôpos eugenês* = *a man well-born, noble, of high rank*, Rbn. *N. T. Lex.* (Lk. xix. 12). The adj. *eugenês* is also translated "noble" in Acts xvii. 11 and 1 Cor. i. 26.

**Nod** (Heb. *flight, wandering*, Ges.). **CAIN.**

**Nodab** (Heb. *nobility*, Ges.), the name of an Arab tribe mentioned only in 1 Chr. v. 19, in the account of the war of the Reubenites, the Gadites, and the half of the tribe of Manasseh, against the HAGARITES. (JETER; NAPHISH.) It has been supposed that Nodab was one of the sons of ISHMAEL. But it is probable that he was a grandson or other descendant of the patriarch, and that the name, in the time of the record, was that of a tribe sprung from such descendant.

**No'ë** (Gr. fr. Heb.) = the patriarch NOAH (Tob. iv. 12; Mat. xxiv. 37, 38; Lk. iii. 36, xvii. 26, 27).

**No'e-ba** (Gr.) = NEKODA 1 (1 Esd. v. 31; compare Ezr. ii. 48).

**No'gah** (Heb. *a shining, brightness*, Ges.), one of David's thirteen sons born in Jerusalem (1 Chr. iii. 7, xiv. 6).

**No'hah** (Heb. *rest*, Ges.), fourth son of Benjamin (1 Chr. viii. 2).

**Non** (Heb.) = NUN, Joshua's father (1 Chr. vii. 27).

**Noph** (Heb., see below) (Is. xix. 13; Jer. ii. 16; Ez. xxx. 13, 16), **MORH** (Hos. ix. 6), a city of Egypt, MEMPHIS. These forms are contracted from the ancient Egyptian common name, *men-nufu*, or *men-nefru* = *the good abode*, or perhaps *the abode of the good one*. The Hebrew forms are regarded as representing colloquial forms of the name, current with the Shemites, if not with the Egyptians also. Probably the epithet *good* refers to Osiris, whose sacred animal Apis (*calaf*) was here worshipped.

As the great upper Egyptian city (No) is characterized in Nahum as "situate among the rivers" (iii. 8), so in Hosea the lower Egyptian one is distinguished by its Necropolis, which stretches for twenty miles along the edge of the Libyan desert—"Noph shall bury them."

**Nophah** (Heb. *blat*, perhaps *windy place*, Ges.; *hill*, Fii.), a place mentioned only in Num. xxi. 30, in the remarkable song apparently composed by the Amorites after their conquest of Heshbon from the Moabites, and therefore of an earlier date than the Israelite invasion. It is named with Dibon and Medeba, and was possibly in the neighborhood of Heshbon. Ewald decides that Nophah = the NOBAH of Judg. viii. 11.

\* **North** (Heb. *tsaphon*; Gr. *borrhas*) is used in the Scriptures to denote that quarter of the heavens or earth, or that direction which is at the left hand of a person who faces the EAST (Gen. xiii. 14, xxviii. 14; Ex. xxvi. 20, 35; Lk. xiii. 29, &c.). "The land of the north," "the north country," &c. = ASSYRIA (Jer. iii. 18, &c.), BABYLONIA (BABEL) (vi. 22, &c.), &c., the approach or usual course of soldiers and travellers from these countries to Palestine being from the N. "The king of the north" in Dan. xi. 6 ff. = the king of SYRIA. ANTIOCHUS II.; EARTH; HEAVEN, &c.

\* **Nose** [*s* as *z*], the organ of smell. The Heb. *aph* = the human "nose" (Prov. xxx. 33, &c.), the "nose" or snout of an animal (Job xl. 24, &c.), the corresponding part of an idol (Ps. cxv. 6), &c. It is anthropopathically applied to God, like EAR, EYE, &c. The Hebrew word is often translated "anger" (Gen. xxvii. 45, &c.) or "wrath" (xxxix. 19, &c.), which shows itself in hard breathing. The Hebrew dual *appayim* (literally *the two breathing-holes*, Ges.) is usually translated "nostrils" (Gen. ii. 7, &c.). HOOK; NOSE-JEWEL.

**Nose-jewel** (Heb. *nezem*), a ring of metal, sometimes of gold or silver, passed usually through the right nostril, and worn by way of ornament by women in the East (Gen. xxiv. 22; Ex. xxxv. 22, "EAR-RING;" Is. iii. 21; Ez. xvi. 12, "jewel on the forehead"). Its diameter is usually an inch or an inch and a half, but sometimes as much as three inches and a half. Upon it are strung beads,

Modern Arab woman with nose-ring.—(Ayer.)

coral, or jewels. In Egypt it is now almost confined to the lower classes. ORNAMENTS, PERSONAL.

\* **Nostril**. NOSE.

\* **Novice** [-is], the A. V. translation of Gr. *neophytos* (literally *newly planted*, hence a *new convert* or *neophyte*, Rbn. *N. T. Lex.*) in 1 Tim. iii. 6 only. This passage determined that a "novice" should not be a bishop.

**Num'ber**. Like most Oriental nations, it is prob-

able that the Hebrews in their written calculations made use of the letters of the alphabet. (WRITING.) That they did so in post-Babylonian times we have conclusive evidence in the Maccabean coins (MON-ET); and probably this was the case also in earlier times. But though in all existing Hebrew MSS. of the O. T. the numerical expressions are written at length, yet the variations in the several versions between themselves and from the Hebrew text, added to the evident inconsistencies in numerical statement between certain passages of that text itself, seem to prove that some shorter mode of writing was originally in vogue, liable to be misunderstood, and in fact misunderstood by copyists and translators. (ABIAH 1; ARMY; CENSUS; CHRONOLOGY; JEHOIACHIN, &c.) These variations appear to have proceeded from the alphabetic method of writing numbers. But some at least of the numbers mentioned in Scripture are doubtless representative rather than determinative. Certain numbers, as 7, 10, 40, 100, were regarded as giving the idea of completeness. The notion of representative numbers in certain cases is extremely common among Eastern nations, who have a prejudice against counting their possessions accurately; it enters largely into many ancient systems of chronology, and is found in the philosophical and metaphysical speculations not only of the Pythagorean and other ancient schools of philosophy, both Greek and Roman, but also in those of the later Jewish writers, of the Gnostics, and also of such Christian writers as St. Augustine himself. We proceed to give some instances of numbers used (a), representatively, and thus probably by design indefinitely or (b), definitely, but, as we may say preferentially, i. e. because some meaning (which we do not in all cases understand) was attached to them. 1. *Seven*, as denoting either plurality or completeness, is so frequent as to make a selection only of instances necessary, e. g. *seven-fold* (Gen. iv. 24); *seven times*, i. e. completely (Lev. xxvi. 24; Ps. xii. 6); *seven* (i. e. many) *ways* (Deut. xxviii. 25). (DRAGON; FESTIVAL; SABBATH; SEVEN; WEEK.) 2. *Ten* as a preferential number is exemplified in the Ten Commandments and the law of Tithe. 3. *Seventy*, as compounded of 7 × 10, appears frequently, e. g. *seventy-fold* (Gen. iv. 24; Mat. xviii. 22). Its definite use appears in the offerings of seventy shekels (Num. vii. 13, 19 ff.); the seventy elders (xi. 16); seventy years of captivity (Jer. xxv. 11). (SEVENTY.) 4. *Five* appears in the table of punishments, of legal requirements (Ex. xxii. 1; Lev. v. 16, xxii. 14, xxvii. 15; Num. v. 7, xviii. 16), and in the five empires of Daniel (Dan. ii.). 5. *Four* is used in reference to the four winds (Dan. vii. 2); and the so-called four corners of the earth; the four creatures, each with four wings and four faces, of Ezekiel (i. 5 ff.); four rivers of Paradise (Gen. ii. 10); four beasts (Dan. vii., and Rev. iv. 6); the four equal-sided Temple-chamber (Ez. xl. 47). 6. *Three* was regarded, both by the Jews and other nations, as a specially complete and mystic number. 7. *Twelve* (3 × 4) appears in twelve tribes, twelve stones in the high-priest's breast-plate, twelve apostles, twelve foundation-stones, and twelve gates (Rev. xxi. 19-21). 8. *Forty* appears in many enumerations; forty days of Moses (Ex. xxiv. 18); forty years in the wilderness (Num. xiv. 34); forty days and nights of Elijah (1 K. xix. 8). 9. *One hundred*. 100 cubits' length of the Tabernacle-court (Ex. xxvii. 18); 100 men, i. e. a large number (Lev. x. xvi. 8); Gideon's 300 men (Judg. vii. 6); leader of 100 men (1 Chr. xii. 14); 100 stripes

(Prov. xvii. 10), &c. 10. Lastly, the mystic number 666 (Rev. xlii. 18), supposed by some to denote the Gr. *Latēinos* (= L. *Latinus*, i. e. *Latin*, sc. beast or kingdom), by others the Heb. *Nērōn Kēsar* (= *Nero Caesar* or emperor), &c. RIDDLE.

#### Num'ber-ing. CENSUS.

**Numbers** (Heb. *vāyēdābār*, from the first word [= "and spake," A. V.]; or *bēmidbār* [= "in the wilderness," A. V.] in i. 1), the fourth book of the Law or PENTATEUCH. It takes its name in the LXX. and Vulgate (whence our "Numbers") from the double numbering or census of the people. **A. Contents.** The book may be said to contain generally the history of the Israelites from the time of their leaving Sinai, in the second year after the Exodus, till their arrival at the borders of the Promised Land in the fortieth year of their journeyings. It consists of the following principal divisions:—I. The preparations for the departure from Sinai (i. 1-x. 10). II. The journey from Sinai to the borders of Canaan (x. 11-xiv. 45). III. A brief notice of laws given, and events which transpired, during the thirty-seven years' wandering in the wilderness (xv. 1-xix. 22). IV. The history of the last year, from the second arrival of the Israelites in Kadesh till they reach "the plains of Moab by Jordan near Jericho" (xx. 1-xxxvi. 18).—I. (a.) The object of the encampment at Sinai has been accomplished. It is now time to depart in order that the object may be achieved for which Israel has been sanctified. That object is the occupation of the Promised Land. Therefore Israel must be organized as Jehovah's army: and to this end a mustering of all who are capable of bearing arms is necessary. Hence the book opens with the numbering of the people, chs. i.-iv. These contain, first, the census of all the tribes or clans (ch. i.); secondly, the arrangement of the camp, and the order of march (ch. ii.); thirdly, the special and separate census of the Levites (chs. iii., iv.). (b.) Chs. v., vi. Certain laws apparently supplementary to the legislation in *LEVITICUS*. (c.) Chs. vii. 1-x. 10. Events occurring at this time, and regulations connected with them.—II. March from Sinai to the borders of Canaan, including—(a.) The order of march described (x. 14-28); the appeal of Moses to his father-in-law, Hobab, to accompany them in their journeys; and the chant which accompanied the moving and the resting of the ark (35, 36). (b.) An account of several of the stations and of the events which happened at them (x. 11-xii. 15); the sending of the spies from the wilderness of Paran (*et-Tih*), their report, the refusal of the people to enter Canaan, their rejection in consequence, and their rash attack upon the Amalekites, which resulted in a defeat (xii. 16-xiv. 45).—III. What follows must be referred apparently to the thirty-seven years of wanderings; but we have no notices of time or place (xv. 1-xix.). (**AARON**; **KORAH**, &c.)—IV. (a.) The narrative returns abruptly to the second encampment of the Israelites in Kadesh. Here Miriam dies, and the people murmur for water, and Moses and Aaron are not allowed to enter the Promised Land (xx. 1-13). They intended perhaps, as before, to enter Canaan from the south. They therefore desired a passage through the country of Edom. The Edomites refused the request, and turned out in arms to defend their border. The Israelites abandoned the attempt as hopeless and turned southward, keeping along the western borders of Idumea till they reached Ezion-geber (xx. 14-21). On their way southward they stop at Mount Hor, or rather at Moserah, on

the edge of the Edomite territory; and from this spot apparently Aaron, accompanied by Moses and Eleazar, quitted the camp to ascend the mountain. After Aaron's death, the march is continued southward. The passage (xxi. 1-8) which speaks of the Canaanite king of ARAD as coming out against the Israelites is clearly out of place, standing as it does after the mention of Aaron's death on Mount Hor (so Mr. J. J. S. Perowne, the original author of this article). Arad is in the south of Palestine. The attack therefore must have been made whilst the people were yet in the neighborhood of Kadesh. (b.) There is again a gap in the narrative. We are told nothing of the march along the eastern edge of Edom, but suddenly find ourselves transported to the borders of Moab. Here the Israelites successively encounter and defeat the kings of the Amorites and of Bashan (xxi. 10-35). Their successes alarm the king of Moab, who, distrusting his superiority in the field, sends for a magician to curse his enemies; hence the episode of BALAAM (xxii. 1-xxiv. 25). Other artifices are employed by the Moabites to weaken the Israelites, especially through the influence of the Moabitish women (xxv.). A second numbering of the Israelites takes place in the plains of Moab (xxvi.; CENSUS); various laws are given in regard to the inheritance of daughters (xxvii. 1-11), the daily sacrifice, sabbaths, festivals, and vows (xxviii.-xxx.); Joshua is appointed Moses' successor (xxvii. 12-23); the Midianites are conquered (xxxi.), and the country E. of the Jordan divided (xxxii.). The book concludes with a recapitulation of the various encampments of the Israelites in the desert (xxxiii. 1-49); the command to destroy the Canaanites (xxxiii. 50-56); the boundaries of the Promised Land, and the men appointed to divide it (xxxiv.); the appointment of the cities of the Levites and the cities of refuge (xxxv.); and further directions respecting heiresses (xxxvi.).—**B. Integrity.** This, like the other books of the PENTATEUCH, is supposed by many critics to consist of a compilation from two or three, or more, earlier documents. According to De Wette, the following portions are the work of the Elohist:—Ch. i. 1-x. 28; xlii. 2-16 (originally, though not in its present form); xv.; xvi. 1, 2-11, 16-23, 24 (?); xvii.-xix.; xx. 1-18, 22-29; xxv.-xxxi. (except perhaps xxvi. 8-11); xxxii. 5, 28-42 (ver. 1-4 uncertain); xxxiii.-xxxvi. The rest of the book is, according to him, by the Jehovist or later editor. Vaihinger finds traces of three distinct documents, which he ascribes severally to the pre-Elohist, the Elohist, and the Jehovist. To the first he assigns ch. x. 29-36; xi. 1-12, 16 (in its original form); xx. 14-21; xxi. 1-9, 13-35; xxxii. 33-42; xxxiii. 55, 56. To the Elohist belong ch. i. 1-x. 28; xi. 1-xii. 16; xlii. 1-xx. 13; xx. 22-29; xxi. 10-12; xxi. 1; xxv. 1-xxxi. 54; xxxii. 1-32; xxxiii. 1-xxxvi. 19. To the Jehovist, xi. 1-xii. 16; xlii. 2-xxiv. 25; xxxi. 8, &c. But the grounds on which this distinction of documents rests are in every respect most unsatisfactory. The use of the divine names, which was the starting-point of this criticism, ceases to be a criterion; and certain words and phrases, a particular manner or coloring, the narrative of miracles or prophecies, are supposed to decide whether a passage belongs to the earlier or the later document. In ch. xii. we have a remarkable instance of the jealousy with which the authority of Moses was regarded even in his own family. Considering the almost absolute nature of that authority, this is perhaps hardly to be wondered at. The pretext for the outburst of this feeling on

the part of Miriam and Aaron was that Moses had married an "ETHIOPIAN woman" (a woman of Cush). This was probably, as Ewald suggests, a second wife married after the death of ZIPPORAH. But there is no reason for supposing, as he does, that we have here a confusion of two accounts. It is not perhaps to be wondered at that the episode of Balaam (xxii. 2-xxiv. 25) should have been regarded as a later addition. The language is peculiar, as well as the general cast of the narrative. The prophecies are vivid and the diction of them highly finished: very different from the rugged, vigorous fragments of ancient poetry in ch. xxi. On these grounds, as well as on the score of the distinctly Messianic character of Balaam's prophecies, Ewald gives this episode to his Fifth Narrator, or the latest editor of the Pentateuch. This writer he supposes to have lived in the former half of the eighth century B. C., and hence he accounts for the reference to Assyria and the Cypriotes (the Kittim). The prophecies of Balaam therefore, on this hypothesis, were delivered after the occurrence of the event said to have been predicted, and put into his mouth by a clever, but not very scrupulous, writer of the time of Isaiah. But this sort of criticism scarcely merits a serious refutation, and rests entirely on the assumption that in prophecy there is no such thing as prediction. Even granting that this episode is not by the same writer as the rest of Numbers, there seems no valid reason to doubt its antiquity, or its rightful claim to the place which it at present occupies. There is nothing more remarkable in the early history of Israel than Balaam's appearance. Summoned from his home by the Euphrates, he stands by his red altar-fires, weaving his dark and subtle sorceries, or goes to seek for enchantment, hoping, as he looked down upon the tents of Israel among the acacia-groves of the valley, to wither them with his word, yet constrained to bless, and to foretell their future greatness.—Numbers is rich in fragments of ancient poetry, some of them of great beauty, and all throwing an interesting light on the character of the times in which they were composed, e. g. the blessing of the high-priest (vi. 24-26), and the chants which were the signal for the Ark to move when the people journeyed, and for it to rest when they were about to encamp. In ch. xxi. 14, 15, we have a passage cited from a book called the "Book of the Wars of Jehovah." This was probably a collection of ballads and songs composed on different occasions by the watch-fires of the camp, and for the most part, though not perhaps exclusively, in commemoration of the victories of the Israelites over their enemies. The fragment quoted from this collection is difficult, because the allusions in it are obscure. The Israelites had reached the Arnon, "which," says the historian, "forms the border of Moab, and separates between the Moabites and Amorites." "Wherefore it is said," he continues, "in the Book of the Wars of Jehovah,

'VAHEB in Sappah and the torrent-beds;  
Arnon and the slope of the torrent-beds  
Which turneth to where Ar lieth.  
And which leaneth upon the border of Moab.'"

The A. V. begins the above thus: "What he did in the RED SEA, and in the brooks of Arnon," &c. The next (ver. 17, 18) is a song sung on the digging of a well at a spot where they encamped, and which was hence called Beër = *The Well*. It runs as follows:—

"Spring up, O well! sing ye to it:  
Well, which the princes dug,

Which the nobles of the people bored  
With the sceptre-of-office, with their staves."

This song, first sung at the digging of the well, was afterward no doubt commonly used by those who came to draw water. The maidens of Israel chanted it one to another, verse by verse, as they toiled at the bucket, and thus beguiled their labor. Immediately following this "Song of the Well," comes a song of victory (ver. 27-30) composed after a defeat of the Moabites and the occupation of their territory. It is in a taunting, mocking strain; and is commonly considered to have been written by some *Israelitish* bard on the occupation of the Amorite territory. Yet the manner in which it is introduced would rather lead to the belief that we have here the translation of an old Amorite ballad, commemorating the conquest of Sihon from Moab. If the song is of Hebrew origin, then the former part of it is a biting taunt.—C. The alleged discrepancies between many statements in this and the other books of the Pentateuch, will be found discussed under DEUTERONOMY; EXODUS; LEVITICS; PENTATEUCH, &c. See also BIBLE; CANON; INSPIRATION; OLD TESTAMENT.

**NU-ME-NU-S** (L. fr. Gr. = *of* [or *from*] the *new moon*), son of Antiochus, was sent by Jonathan on an embassy to Rome and Sparta, to renew the friendly connections between these nations and the Jews, about B. C. 144 (1 Mc. xii. 16, 17). He was again dispatched to Rome by Simon, about B. C. 141 (xiv. 24).

**NUM** (Heb. *a fish*, Ges.; *posterity*, Fû.). 1. The father of the Jewish captain JOSHUA (Ex. xxxiii. 11, &c.). His genealogical descent from Ephraim is recorded in 1 Chr. vii.—2. The fourteenth letter of the Hebrew alphabet (Ps. cxix.). **WRITING.**

**Nurse.** It is clear, both from Scripture and from Greek and Roman writers, that in ancient times the position of the nurse, wherever one was maintained, was one of much honor and importance. (CHILD; DEBORAH 1; MEDICINE; see Gen. xxiv. 59, xxxv. 8; 2 Sam. iv. 4; 2 K. xi. 2; 3 Mc. i. 20.) The same term is applied to a foster-father or mother (e. g. Num. xi. 12; Ru. iv. 16; Is. xlix. 28). In great families male-servants, probably eunuchs in later times, were intrusted with the charge of the boys (2 K. x. 1, 5).

**NUTS.** The representative in the A. V. of the Hebrew words *bolnim* and *igôz*. 1. Among the good things of the land which the sons of Israel were to take as a present to Joseph in Egypt, mention is made of *bolnim* (Gen. xliii. 11). There can scarcely be a doubt (so Mr. Houghton) that the *bolnim* = the fruit of the pistachio-tree (*Pistacia vera*), though most modern versions are content with the general term *nuts*. Syria and Palestine have been long famous for pistachio-trees. The district around Aleppo is especially celebrated for the excellence of the pistachio-nuts; the town of Batna in the same district is believed to derive its name from this circumstance: BETONIM, a town of Gad (Josh. xiii. 26), has probably a similar etymology. There is scarcely any allusion to the occurrence of the *Pistacia vera* in Palestine amongst the writings of modern travellers. Dr. Hooker saw only two or three pistachio-trees in Palestine. These were outside the north gate of Jerusalem. But he says the tree is cultivated at Beirût and elsewhere in Syria. It grows from fifteen to thirty feet high; the male and female flowers are on separate trees; the fruit, which is a green-colored oily kernel, is enclosed in a brittle shell. Pistachio-nuts are much esteemed as an

article of diet both by Orientals and Europeans.—2. *Egôz* occurs only in Cant. vi. 11. The Hebrew word probably here refers to the *walnut-tree*. According

Pistachio-tree (*Pistacia vera*).

to Josephus the walnut-tree was formerly common, and grew most luxuriantly around the Lake of Genesaret. The European walnut, *Juglans regia*, is

Walnut-tree (*Juglans regia*).—(Fbn.)

allied to the black walnut and butternut of the United States. The hickory-nut, popularly called walnut in the United States, is the produce of different trees belonging to the genus *Carya*.

**Nym'phas** (L. fr. Gr. = *spouse* or *bridegroom*, Schl.; rather, *given by a nymph*, Wr.), a wealthy and zealous Christian in Laodicea (Col. iv. 15). His house was used as a place of assembly for the Christians.

## O

**Oak.** The six following words, which appear to be merely various forms of the same root primarily denoting *might* or *strength*, occur in the O. T. as the name of some species of oak: viz. *éyl*, *éláh*, *élón*, *ilán*, *alláh*, *allón*.—1. Heb. *éyl*, only in the singular in Gen. xiv. 6. It is uncertain whether it should be joined with Paran to form a proper name (A. V. "El-paran"), or taken separately, as the "terebinth," or the "oak," or the "grove," of Paran. Plural forms of *éyl* are *éylím*, *éylóh*, and (so some) *éylath*. *ELIM*, the second station of the Israelites after crossing the Red Sea, probably derived its name from the seventy palm-trees there; the name *éyl*, which more particularly = an "oak," being here put for any grove or plantation. Similarly the other plural form, *éylóh* (and *éylath* see *ELATH*), may refer, as Stanley conjectures, to the palm-grove at 'Akabab. The plural *éylím* occurs in Is. i. 29, where probably "oaks" are intended: in Is. lxi. 3, and Ez. xxxi. 14 (Heb. *élim* in Ezekiel), any strong flourishing "trees" may be denoted.—2. Heb. *éláh* ("oak" in Gen. xxxv. 4; Judg. vi. 11, 19; 2 Sam. xviii. 9 ff.; 1 K. xiii. 14; 1 Chr. x. 12; Is. i. 30; Ez. vi. 13: "ELAH" in 1 Sam. xvii. 2, &c.: "teal-tree" in Is. vi. 13: "elms" in Hos. iv. 13). There is much difficulty in determining the exact meanings of the several varieties of the term mentioned above. Celsius has endeavored to show that *éyl*, *éylím*, *éylón*, *éláh*, and *alláh*, all stand for the terebinth-tree (*Pistacia Terebinthus*; TURPENTINE-TREE), while *allón* denotes an oak. Rosenmüller gives the terebinth to *éyl* and *éláh*, and the oak to *alláh*, *allón*, and *éylón*. That various species of oak may well have deserved the appellation of mighty trees is clear from the fact, that noble oaks are to this day occasionally seen in PALESTINE and LEBANON. The terebinth in point of size and abundance cannot compete with some of the oaks of Palestine. Dr. Thomson (Thn. i. 375) remarks on this point: "There are more mighty oaks here in this immediate vicinity (*Mejdel es-Sheims* near Mount Hermon) than there are terebinths in all Syria and Palestine together." Two oaks (*Quercus pseudo-coccifera* and *Quercus Aegilops*) are well worthy of the name of mighty trees; though it is equally true that over a greater part of the country the oaks of Palestine are at present merely bushes. "Abraham's oak," near HEBRON, is said to be a *Quercus pseudo-coccifera* (Hamilton, in Fairbairn): its trunk measures twenty-two and a half feet around the lower part, and its branches cover a space eighty-nine feet in diameter (Rhn. ii. 81).—3. The Heb. *élón* (A. V., after the Targum, "PLAIN" 7) occurs frequently in the O. T., and probably = (so Mr. Houghton, with Gesenius, &c.) some kind of oak.—4. Chal. *ilán*, found only in Dan. iv. as the "tree" which Nebuchadnezzar saw in his dream.—5. Heb. *alláh* occurs only in Josh. xxiv. 26, and is correctly rendered "oak" by the A. V.—6. Heb. *allón*, uniformly rendered "oak" by the A. V., and always so understood by commentators (Gen. xxxv. 8; Is. ii. 13, vi. 13, &c.). It should be stated that *allón* (A. V. "oaks") occurs in Hos. iv. 13, as distinguished from the other form

*élâh* (A. V. "elms"); consequently it is necessary to suppose that two different trees are signified by the terms. Mr. Houghton believes that the difference is specific, and not generic—that two species of oaks are denoted by the Hebrew terms: *allôn*

may stand for an evergreen oak, as the *Quercus pseudo-coccifera*, and *élâh* for one of the deciduous kinds. The "oaks of Bashan" (Is. ii. 13; Ez. xxvii. 6; Zech. xi. 2) belong probably to the species known as *Quercus Egilops*, the Valonia oak, which

Abraham's Oak, near Hebron.—From a photograph by J. Graham.—(Ayre.)

is said to be common in Gilead and Bashan. Another species of oak, besides those named above, is the *Quercus infectoria*, which yields the gall-nuts of commerce, and is common in Galilee and Samaria.

Evergreen Oak of Palestine (*Quercus pseudo-coccifera*).

It is rather a small tree in Palestine, and seldom grows above thirty feet high, though in ancient times it might have been a noble tree. Sacrifices were offered under oaks (Is. i. 29; Hos. iv. 13); of oak-timber the Tyrians made oars (Ez. xxvii. 6), and idolaters images (Is. xliv. 14); under the shade of

oaks the dead were sometimes interred (Gen. xxxv. 8; see 1 Sam. xxxi. 13).

**Oath** (Heb. *dlâh*, *shêbû'âh*; Gr. *horkos*, *horkómōsia*). I. The principle on which an oath is held to be binding is incidentally laid down in Heb. vi. 16, viz. as an ultimate appeal to divine authority to ratify an assertion. There the Almighty is represented as promising or denouncing with an oath, i. e. doing so in the most positive and solemn manner (compare Gen. xxii. 16, xxiv. 7, &c.).—II. On the same principle, that oath has always been held most binding which appealed to the highest authority, both as regards individuals and communities. (a.) Thus believers in Jehovah appealed to Him, both judicially and extra-judicially (Gen. xxi. 23, xxxi. 53; Mat. xxvi. 63; Rom. i. 9, ix. 1, &c.). (b.) Appeals of this kind to authorities recognized respectively by adjuring parties were regarded as bonds of international security, and their infraction as being not only grounds of international complaint, but also offences against divine justice (2 Chr. xxxvi. 13; Ez. xvii. 13, 18).—III. As a consequence of this principle, (a.) appeals to God's name on the one hand, and to heathen deities on the other, are treated in Scripture as tests of allegiance (Ex. xxiii. 13, xxxiv. 6; Deut. xxix. 12, &c.). (b.) So also the sovereign's name is sometimes used as a form of obligation (Gen. xlii. 15; 2 Sam. xi. 11, xiv. 19).—IV. Other forms of oath, serious or frivolous, are mentioned, some of which are condemned by our Lord (Mat. v. 33, xxiii. 16–22; and see Jas. v. 12; compare Mat. xxvi. 63, 64).—As to the subject-matter of oaths the following cases may be mentioned :

—1. Agreement or stipulation for performance of certain acts (Gen. xiv. 22, xxiv. 2, 8, 9, &c.). 2. Allegiance to a sovereign, or obedience from an inferior to a superior (Eccl. viii. 2; 2 Chr. xxxvi. 13; 1 K. xviii. 10). 3. Promissory oath of a ruler (Josh. vi. 26; 1 Sam. xiv. 24, 28, &c.). Priests took no oath of office (Heb. vii. 21). 4. Vow made in the form of an oath (Lev. v. 4). 5. Judicial oaths. (a.) A man receiving a pledge from a neighbor was required, in case of injury happening to the pledge, to clear himself by oath of the blame of damage (Ex. xxii. 10, 11; 1 K. viii. 31; 2 Chr. vi. 22; compare Lev. vi. 2, 5; Deut. xix. 16-18). (b.) It appears that witnesses were examined on oath, and a false witness, or one guilty of suppression of the truth, was to be severely punished (Lev. v. 1; Prov. xxix. 24; Deut. xix. 16-19). (c.) A wife suspected of incontinence was required to clear herself by oath (Num. v. 19-22).—The forms of adjuration mentioned in Scripture are—1. Lifting up the hand. Witnesses laid their hands on the head of the accused (Gen. xiv. 22; Lev. xxiv. 14, &c.). 2. Putting the hand under the thigh of the person to whom the promise was made. It has been explained (a.) as having reference to the covenant of circumcision; (b.) as containing a principle similar to that of phallic symbolism; (c.) as referring to the promised Messiah. Probably (so Mr. Phillott) the two first explanations are closely connected, if not identical (Gen. xxiv. 2, xlvii. 29). The "thigh" here = the genital member, regarded as the most sacred part of the body, the symbol of the Creator, and the object of worship among all ancient nations (Ginsburg, in Kitto). 3. Oaths were sometimes taken before the altar, or, as some understand the passage, if the persons were not in Jerusalem, in a position looking toward the Temple (1 K. viii. 31; 2 Chr. vi. 22). 4. Dividing a victim and passing between or distributing the pieces (Gen. xv. 10, 17; Jer. xxxiv. 18). As the sanctity of oaths was carefully inculcated by the Law, so the crime of perjury was strongly condemned; and to a false witness the same punishment was assigned which was due for the crime to which he testified (Ex. xx. 7; Lev. xix. 12; Deut. xix. 16-19; Ps. xv. 4; Jer. v. 2, vii. 9; Ez. xvi. 59; Hos. x. 4; Zech. viii. 17). The Christian practice in the matter of oaths was founded in great measure on the Jewish. Thus the oath on the Gospels was an imitation of the Jewish practice of placing the hands on the book of the Law. Our Lord's prohibition of swearing has been understood by Christians generally as directed against profane and careless swearing. He himself answered under oath (Mat. xxvi. 63 f.; see above). The most solemn Mohammedan oath is made on the open Koran. Bedouin Arabs use various sorts of adjuration, one of which somewhat resembles the oath "by the Temple." The person takes hold of the middle tent-pole, and swears by the life of the tent and its owners. The stringent nature of the Roman military oath, and the penalties attached to infraction of it, are alluded to, more or less certainly, in several places in N. T., e. g. Mat. viii. 9; Acts xii. 19, xvi. 27, xxvii. 42. COVENANT; PUNISHMENTS; TRIAL.

**O-ba-di'ah** (fr. Heb. = *servant* [i. e. worshipper] of *Jehovah*, Ges., Ff.), also written **ABADIAS** and **ABDIAS**. 1. Ancestor of some enumerated in the genealogies of Judah (1 Chr. iii. 21).—2. One of the sons of Izrahiah, "chief men" of Issachar (vii. 3). A few Hebrew MSS. omit "and the sons of Izrahiah" in this verse, making Obadiah, &c., sons of Uzzi. The Syriac and Arabic versions retain

this phrase, but have "four" instead of "five" sons of Izrahiah.—3. Son of Azel, a descendant of Saul (viii. 38, ix. 44).—4. A Levite, son of Shemaiah, and descended from Jeduthun (ix. 16); = **ABDA** 2; probably = a porter, or (so Mr. Wright) a principal musician in the Temple-choir, in Nehemiah's time (Neh. xii. 25).—5. A Gadite captain who joined David in the wilderness (1 Chr. xii. 9).—6. One of the princes of Judah sent to teach in Jehoshaphat's reign (2 Chr. xvii. 7).—7. Son of Jehiel, of the sons of Joab, who came up in the second caravan with Ezra (Ezr. viii. 9).—8. A priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 5).—9. One of the twelve minor prophets. We know nothing of him except what we can gather from the short book which bears his name. The Hebrew tradition adopted by Jerome, and maintained by Abarbanel and Kimchi, that he = the Obadiah of Ahab's reign, is as destitute of foundation as another suggestion by Abarbanel, that he was a converted Edomite. The eleventh verse of his prophecy speaks of the conquest of Jerusalem and the captivity of Jacob. If this refers to the well-known Captivity by Nebuchadnezzar, he must have lived at the time of the Babylonian captivity, and have prophesied subsequently to B. C. 588. If, further, his prophecy against Edom found its first fulfilment in the conquest of that country by Nebuchadnezzar in B. C. 583, it must have been uttered at some time between B. C. 588 and 583 (so Mr. Meyrick, agreeing in respect to the date with Luther, Pfeiffer, Schnurrer, Rosenmüller, De Wette, Winer, Ewald, Henderson, Dr. S. Davidson, &c.). But why should Obadiah have been inserted between Amos and Jonah if his date is about B. C. 585? Schnurrer (and so Mr. Meyrick, Henderson, &c.) answers this question by saying that the prophecy of Obadiah is an amplification of the last five verses of Amos, and was therefore placed next after the Book of Amos. On the other hand, Jaeger, Hengstenberg, Caspari, Hävernick, Dr. W. L. Alexander (in Kitto), Prof. A. B. Davidson (in Fairbairn), &c., put Obadiah earlier, under King UZZIAH. In favor of this are urged the language of Obadiah (ver. 12-14) as of *warning*, his apparent priority to Jeremiah (compare Ob. 1, 3, 8, 9, 11, 16 with Jer. xlix. 7-22), and his traditional position between Amos and Jonah as if contemporary with them. Hofmann, Delitzsch, and Keil place Obadiah still earlier, under JEHORAM 2 of Judah; and Hitzig almost as much later than the Captivity, about B. C. 312!—The Book of Obadiah is a sustained denunciation of the Edomites, melting, as is the wont of the Hebrew prophets (compare Joel iii.; Am. ix.), into a vision of the future glories of Zion, when the arm of the Lord should have wrought her deliverance and have repaid double upon her enemies. Previous to the Captivity, the Edomites were in a relation to the Jews like that which the Samaritans afterward held. They were near neighbors and relatives. The Edomites are the types of those who ought to be friends and are not—of those who ought to be helpers, but in the day of calamity are found "standing on the other side." The prophet complains that they looked on and rejoiced in the destruction of Jerusalem, triumphed over her, and plundered her, and cut off the fugitives who were probably making their way through Idumea to Egypt. The last six verses are the most important part of Obadiah's prophecy. The vision presented to the prophet is that of Zion triumphant over the Idumeans and all her enemies, restored to her ancient possessions,

and extending her borders N. and S. and E. and W. He sees the house of Jacob and the house of Joseph consuming the house of Esau as fire devours stubble (ver. 18). The inhabitants of the city of Jerusalem, now captive at Sepharad, are to return to Jerusalem, and to occupy not only the city itself, but the southern tract of Judea (ver. 20). Those who had dwelt in the southern tract are to overrun and settle in Idumea. The former inhabitants of the plain country are also to establish themselves in Philistia. To the N. the tribe of Judah is to extend itself as far as the fields of Ephraim and Samaria, while Benjamin, thus displaced, takes possession of Gilead (ver. 19). The captives of the ten tribes are to occupy the northern region from the borders of the enlarged Judah as far as Sarepta, near Sidon (ver. 20). The question is asked, Have the prophet's denunciations of the Edomites been fulfilled, and has his vision of Zion's glories been realized? Typically, partially, and imperfectly they have been fulfilled, but they await a fuller accomplishment. The first fulfilment of the denunciation on Edom in all probability took place a few years after its utterance. Five years after the capture of Jerusalem, Nebuchadnezzar reduced the Ammonites and Moabites, and after their reduction made an expedition into Egypt. This he could hardly have done without at the same time reducing Idumea. A more full, but still only partial and typical, fulfilment would have taken place in the time of John Hyrcanus, who utterly reduced the Idumeans. Similarly the return from the Babylonish captivity would typically and imperfectly fulfil the promise of the restoration of Zion and the extension of her borders. The full completion of the prophetic descriptions of the glories of Jerusalem—the future golden age toward which the seers stretched their hands with fond yearnings—is to be looked for in the Christian, not in the Jewish Zion—in the anti-type rather than in the type (so Mr. Meyrick, with Luther, Thomas Scott, Dr. S. Davidson, &c.). Obadiah's style is perspicuous, but animated and often poetic; his language pure; his arrangement orderly.—The Book of Obadiah is a favorite study of the modern Jews. It is here especially that they read the future fate of their own nation and of the Christians. Those unversed in their literature may wonder where the Christians are found in the Book of Obadiah. But it is a fixed principle of Rabbinical interpretation that by Edomites are prophetically meant Christians, and that by Edom is meant Rome. Abarbanel has written a commentary on Obadiah, resting on this hypothesis as its basis. The first nine verses of Obadiah are so similar to Jer. xlix. 7, &c., that it is evident that one of the two prophets must have had the prophecy of the other before him. Which of the two wrote first is doubtful. Those who give an early date to Obadiah thereby settle the question. Those who place him later leave the question open, as he would in that case be a contemporary of Jeremiah. (BIBLE; CANON; INSPIRATION; PROPHET).—10. An officer of high rank in Ahab's court, described as "over the house," i. e. apparently, lord high chamberlain, or mayor of the palace (1 K. xviii. 3). His influence with the king must have been great to enable him to retain his position, though a devout worshipper of Jehovah, during the fierce persecution of the prophets by Jezebel. At the peril of his life he concealed a hundred of them in caves, and fed them there with bread and water. But he himself does not seem to have been suspected (ver. 4, 13). He

and Ahab, apparently the two chief persons in the kingdom, went through the land in search for grass to feed the horses and mules in the terrible drought. While on this errand, he was met by ELIJAH, and sent to the king to announce the prophet's approach (ver. 7-16). According to the Jewish tradition preserved in Ephrem Syrus, Obadiah the chief officer of Ahab = Obadiah the prophet, was of Shechem in the land of Ephraim, a disciple of Elijah, and the third captain of fifty sent by Ahaziah (2 K. i. 13).—11. Father of Ishmaiah, who was chief of Zebulun, in David's reign (1 Chr. xxvii. 19).—12. A Merarite Levite in Josiah's reign, and an overseer of the workmen in the restoration of the Temple (2 Chr. xxxiv. 12).

\* **O-ba-d'ia-lu** (fr. Heb.) = OBADIAH 10 (1 K. xviii. 3, margin).

**O'bal** (Heb. *bare district*, = EBAL, Fū.), a son of Joktan, and apparently the founder of an Arab tribe (Gen. x. 28), not yet identified. In 1 Chr. i. 22 the name is EBAL, which has been compared with the *Avalitæ* of Eastern Africa, and the *Gebanitæ* of S. Arabia.

**Ob-di'a** (Gr.), probably a corruption of *Obaia* = HABAJAH (compare 1 Esd. v. 38 with Ezr. ii. 61).

**O'bed** (Heb. *servant*, sc. God, Ges., Fū.). 1. Son of BOAZ and RUTH the Moabitess; father of Jesse, and grandfather of King David (Ru. iv. 17). The circumstances of his birth are given with much beauty in the Book of Ruth, and form a most interesting specimen of the religious and social life of the Israelites in the days of Eli, which a comparison of the genealogies of David, Samuel, and Abiathar shows to have been about the time of his birth. The name of Obed occurs only Ru. iv. 17, and in the four genealogies, Ru. iv. 21, 22; 1 Chr. ii. 12; Mat. i. 5; Lk. iii. 32.—2. A descendant of Jarha, the Egyptian servant and son-in-law of Sheshan in the line of Jerahmeel; grandson of Zabab, one of David's valiant men (1 Chr. ii. 37, 38).—3. One of David's valiant men (xi. 47).—4. One of the gate-keepers of the Temple; son of Shemaiah the first-born of Obed-edom (xxvi. 7).—5. Father of Azariah, one of the captains who joined with Jehoiada in making Joash king (2 Chr. xxiii. 1).

**O'bed-e-dom** (Heb. *servant Edom*, Ges.). 1. A Levite, apparently of the family of Kohath. He is described as a GITTITE (2 Sam. vi. 10, 11), i. e. probably (so Mr. Wright), a native of Gath-rimmon, in Manassch, which was assigned to the Kohathites (Josh. xxi. 45). After the death of Uzzah, the ark, which was being conducted from the house of Abinadab in Gibeah to the city of David, was carried aside into the house of Obed-edom, where it continued three months. It was brought thence by David (1 Chr. xv. 25; 2 Sam. vi. 12).—2. "Obed-edom the son of Jeduthun" (1 Chr. xvi. 38), a Merarite Levite, apparently a different person from No. 1 (so Mr. Wright, &c.), was a Levite of the second degree and a gate-keeper (A. V. "porter," "door-keeper,") for the Ark (xv. 18, 24), appointed to sound "with harps on the Sheminith to excel" (ver. 21, xvi. 5). There is one expression, however, which seems to imply that Obed-edom the gate-keeper and Obed-edom the Gittite may have been the same. After enumerating his eight sons, the chronicler (xxvi. 5) adds, "for God blessed him," referring, apparently, to 2 Sam. vi. 11. Some, still supposing No. 1 as not = No. 2, regard 1 Chr. xxvi. 4 ff. as referring to No. 1. Kitto supposes No. 1 = No. 2.—3. An officer (treasurer?) of the Tem-

ple under King Amaziah; probably a descendant of No. 1 or 2 (2 Chr. xxv. 24).

**O'beth** (Gr.) = **EBED** the son of Jonathan (1 Esd. viii. 32).

**O'bil** (Heb. *chief of the camels*, Ges.), an Ishmaelite, keeper of the herds of camels in the reign of David (1 Chr. xxvii. 30).

**Ob-la-tion** (fr. L.) = an OFFERING. SACRIFICE.

**O'both** (Heb. *water-skins*, Ges.; *hollow passes*, Fü.), an encampment of the Israelites, E. of Moab (Num. xxi. 10, xxxiii. 43); site unknown. WILDERNESS OF THE WANDERING.

**O-chal'el** (fr. Gr.) = **JEIEL** (1 Esd. i. 9; compare 2 Chr. xxxv. 9).

\* **O'chim** [-kim] (Heb. *dhim* or *ochim*, see below) occurs only in Is. xiii. 21, A. V. text "doleful creatures," margin "*ochim*, or *ostriches*." Gesenius makes the Hebrew properly = *howlings, shrieks*, hence *howling animals*, doleful creatures, probably owls. Dr. W. L. Alexander (in Kitto) says, "the view most commonly entertained is that a species of owl is intended." Dr. J. A. Alexander (*on Isaiah*, l. c.) translates, after the LXX., and Bochart, *howls* or *yells*. OWL.

**Oe-l-de-lus** [os-se-] (fr. Gr.), a corruption of **JOZABAD** in Ezr. x. 22 (1 Esd. iv. 22).

**O-el'na** [-si-] (fr. Gr.). "Sour (Tyre) and Ocina" are mentioned (Jd. ii. 28) among the places on the sea-coast of Palestine which were terrified at the approach of Holofernes. Its position agrees with that of the ancient Accno.

**Oe'ran** (Heb. *afflicted*, Ges.), an Asherite, father of Pagiel (Num. i. 13, ii. 27, vii. 72, 77, x. 26).

**O'ded** (Heb. *setting up again, erecting*, Ges.). 1. Father of Azariah the prophet, in the reign of Asa (2 Chr. xv. 1, 8). (**AZARIAH** 9).—2. A prophet of Jehovah in Samaria, at the time of Pekah's invasion of Judah, who secured the release of the captives from Judah (xxviii. 9).

**O-dol'am**, the Greek form of **ADULLAM** (2 Mc. xiii. 38 only).

**Oa-o-mar'kes** [-keez], margin **Od-o-mar'ra** (Gr. *Odómēra, Odoarrhēs*), the chief of a nomad tribe slain by Jonathan (1 Mc. ix. 66).

\* **Of-fence**, or **Of-fense** (fr. L.), the A. V. translation of—1. Heb. *hēt* or *chēt* (Eccl. x. 4 only), usually translated "sin" (Lev. xix. 17, xx. 20, &c.), once "fault" (Gen. xli. 9), once "punishment of sin" (Lam. iii. 39).—2. Heb. *michāhōl* (1 Sam. xxv. 31; Is. viii. 14), usually "stumbling-block" (Lev. xix. 14; Is. lvii. 14, &c.), also "ruin" (Ez. xviii. 30, xxi. 15 [Heb. 20]), &c. (**OFFEND**, to, 5).—3. Heb. verb *dāham*, partially in Hos. v. 15, A. V. "acknowledge offence," margin "be guilty," the latter being the usual translation. Gesenius, Henderson, &c., translate the verb in Hos. l. c. "suffer punishment." (**OFFEND**, to).—4. Gr. *hamartia* (2 Cor. xi. 7 only), elsewhere uniformly rendered "sin" (Mat. i. 21, iii. 6, &c.).—5. Gr. *paraptōma* (Rom. iv. 25, v. 15 ff.), also translated "trespass" (Mat. vi. 14, 15, &c.), "sin" (Eph. i. 7, &c.), "fault" (Gal. vi. 1; Jas. v. 16), "fall" (Rom. xi. 11, 12).—6. Gr. *proskomma* (Rom. xiv. 20 only), elsewhere translated "stumbling" (Rom. ix. 32 f.; 1 Pet. ii. 8 [Gr. 7]), or "stumbling-block" (Rom. xiv. 13; 1 Cor. viii. 9).—7. Gr. *proskopé* (2 Cor. vi. 3 only).—8. Gr. *skandalon* (Mat. xvi. 23, xviii. 7; Lk. xvii. 1; Rom. ix. 33, xvi. 17; Gal. v. 11; 1 Pet. ii. 8 [Gr. 7]), also rendered "things that offend" (Mat. xiii. 41), "stumbling-block" (Rom. xi. 9; 1 Cor. i. 23), "occasion to fall" (Rom. xiv. 13), "occasion of stumbling" (1 Jn. ii. 10).—9. Gr. adj. *aproskopos*, partially, rendered in A. V.

"void of offence" (Acts xxiv. 16), "without offence" (Phil. i. 10; both these in Robinson's, *N. T. Lex.* are translated *not made to stumble, not falling into sin, faultless*), and with a verb "give none offence" (1 Cor. x. 32, literally *be not causing to stumble or to fall*, i. e. do not lead into sin either Jews, Gentiles, or the Church).—It will thus be seen that "offence" in the A. V. has not only the meaning of a *sin, crime, or fault*, as now (Nos. 1, 3, 4, 5, and the first two passages under 9); but also that of a *stumbling-block*, i. e. a *cause or occasion of falling*, especially into sin and ruin; *that which entices one to wrong-doing, or brings one into difficulty, perplexity, or danger; that which disturbs, or produces disgust, shame, or indignation* (Nos. 2, 6, 7, 8, and last under 9). See the two next articles.

\* **Of-fend** (fr. L.), to, the A. V. translation of—1. Heb. *dāham* or *dāhem* (Jer. ii. 3, l. 7; Ez. xxv. 12; Hos. iv. 15, xiii. 1; Hab. i. 11), usually translated in A. V. "to be guilty" (Lev. iv. 13, 22, 27, &c.), or "to trespass" (v. 19, &c.), sometimes "to be desolate" (Ps. xxxiv. 21, 22 [Heb. 22, 23], Is. xxiv. 6, &c.; these and Jer. ii. 3 are translated by Gesenius *to bear one's guilt*, i. e. its consequences, *to suffer punishment*), &c. The kindred Heb. noun *ashmāh*, usually translated "trespass" (Lev. xxii. 16; 2 Chr. xxiv. 18, &c.) or "sin" (Lev. iv. 3, &c.), as translated in 2 Chr. xxviii. 13, once with other words, "we have offended against the Lord" (literally *the trespass of Jehovah being upon us*), and twice in the same verse "trespass." (**OFFENCE** 3).—2. Heb. *dāgad* once (Ps. lxxiii. 15), usually translated "to deal treacherously" (Judg. ix. 23; Is. xxiv. 16, &c.), also "to deal deceitfully" (Job vi. 15, &c.), "to transgress" (Ps. xxv. 3, &c.), &c.—3. Heb. *hābal* or *chābal* once (Job xxxiv. 31; here translated by Gesenius *to act perversely, to do corruptly*), also translated "to deal corruptly" in Neh. i. 7, elsewhere "to take a pledge of" (Prov. xx. 16, &c.), "to take to pledge" (Deut. xxiv. 6, 17, &c.), &c. This Heb. verb literally (so Gesenius) = *to tighten a cord, to twist; hence to bind; to bind by a pledge, or to take as a pledge; to pervert, &c.*—4. Heb. *hātā* or *chātā* (Gen. xx. 9, xl. 1; 2 K. xviii. 14; Jer. xxxvii. 18); literally *to miss the mark*, as an archer, &c., or *to misstep*; hence *to sin*, i. e. to err from the path of truth and duty, Ges.), usually translated "to sin" (Gen. xxix. 9; Ex. xxxii. 30 ff., &c.), also "to bear the blame" (Gen. xliii. 9, xlv. 32), &c.—5. Heb. noun *michāhōl* once, translated with other words "nothing shall offend them" (Ps. cxix. 165; margin "they shall have no stumbling-block"; literally *nothing is a stumbling-block to them*, Prof. J. A. Alexander, *on Ps. l. c.*). (**OFFENCE** 2).—6. Heb. *pāsha* once, passively in the phrase "a brother offended" (Prov. xviii. 19; translated by Gesenius *brethren breaking with one another*, offended, discordant); usually in the active voice translated "to transgress" (1 K. viii. 50, &c.), also "to rebel" (2 K. iii. 7, &c.), or "to revolt" (viii. 20, &c.).—7. Gr. *hamartanō* once (Acts xxv. 8: literally *to miss, to err from a mark or way; hence to do wrong, to sin*, Rbn. *N. T. Lex.*, almost uniformly translated "to sin" (Mat. xviii. 21; Lk. xv. 18, 21, &c.), sometimes "to trespass" (Mat. xviii. 15, &c.). (Compare **OFFENCE** 4).—8. Gr. *ptaiō* (Jas. ii. 10, iii. 2 twice; properly = *to stumble, to fall*), once translated "to stumble" (Rom. xi. 11), and once "to fall" (2 Pet. i. 10).—9. Gr. *skandalizō*, translated "to offend" or "to be offended" twenty-eight times in N. T., twice only otherwise, viz. in 1 Cor. viii. 13 "to make to offend." This Gr. verb, not found in classic writers, is used in the N. T. (according to Dr. Robin-

son's *N. T. Lex.*) tropically in a moral sense = to make stumble at or in any thing; (1.) to give or cause offence to any one, i. e. to offend, vex, scandalize, (Mat. xvii. 27; Jn. vi. 61; 1 Cor. viii. 13 twice), and passively to be offended, or vexed (Mat. xv. 12; Rom. xiv. 21; 2 Cor. xi. 29); also passively to be offended in or at any one, i. e. to take offence at one's character, words, or course, so as to desert and reject him (Mat. xi. 6, xiii. 57, xxvi. 31, 33 twice; Mk. vi. 3, xiv. 27, 29; Lk. vii. 28); (2.) causatively, to make one offend, or lead one into sin, i. e. to be a stumbling-block to another, to be a cause or occasion of his sin (Mat. v. 29, 30, xviii. 6, 8, 9; Mk. ix. 42, 43, 45, 47; Lk. xvii. 2), and passively to be made to offend, to be led into sin, i. e. to fall away from the truth or the Gospel (Mat. xiii. 21, xxiv. 10; Mk. iv. 17; Jn. xvi. 1). (Compare OFFENCE 8.) OFFENDER.

\* **Off-ender** (from OFFEND) has its ordinary meaning in the A. V., = a wrong-doer, a transgressor, a criminal (1 K. i. 21; Is. xxix. 21; Acts xxv. 11). JUDGE; OFFICER; PRISON; PUNISHMENTS; TRIAL.

**Offer-ing.** BURNT-OFFERING; FREE-WILL-OFFERING; MEAT-OFFERING; PEACE-OFFERING; SACRIFICE; SIN-OFFERING.

**Off-icer.** It is obvious that most, if not all, of the Hebrew words rendered "officer" (*nētib, sdris, pēkuddāh, pākīd, rab, shōtēr*, &c.) are either of an indefinite character, or are synonymous terms for functionaries known under other and more specific names, as "scribe," "EUNUCH," &c. (ARMY; CAPTAIN; GARRISON; GOVERNOR; KING.) Two Greek words are so rendered in the N. T. Of these, *hupēretēs* (literally a rover, hence any doer of hard work, servant, &c., L. & S.) is used to denote an inferior officer of a court of justice, a messenger or bailiff, like the Roman viator or lictor (Mat. v. 25; Jn. vii. 32, 45 f., xviii. 3, 12, 18, &c.). (MINISTER.) The other, *praktōr* (literally a doer), used only in Lk. xii. 58, was applied at Athens to officers whose duty it was to register and collect fines imposed by courts of justice; and for the judge to "deliver to the officer" implies his ascertaining the validity of the claim of indebtedness, and then giving the debtor in charge to the officer of the court that the payment may be enforced. (JUDGE; PUNISHMENTS; TRIAL.) The word "officers" (Gr. *hoi apo [or epi] tōn chreion* = those from [or over] the business) is used (1 Mc. x. 41, xiii. 37) in speaking of the revenue-officers of Demetrius. In Eccles. x. 2 (Gr. *leitourgoi*), the meaning is clearly the subordinates in a general sense to a supreme authority.

**Og** (Heb. *long-necked*, = *ANAK*?, Ges., Fü.), an Amoritic king of BASHAN, whose rule extended over sixty cities, of which the two chief were ASHTAROTH and EDREI (Josh. xiii. 12). He was one of the last representatives of the giant-race of Rephaim. (GIANTS 3.) According to Eastern traditions, he escaped the deluge by wading beside the ark, and lived 3,000 years; and one of his bones long served as a bridge over a river. He was, with his children and his people, defeated and exterminated by the Israelites at Edrei, immediately after the conquest of Sihon, who is represented by Josephus as his friend and ally. His sixty fenced cities were taken, and his kingdom assigned to the Reubenites, Gadites, and half the tribe of Manasseh (Deut. iii. 1-13; Num. xxxii. 33. Also Deut. i. 4, iv. 47, xxxi. 4; Josh. ii. 10, ix. 10, xiii. 12, 30; Ps. cxxxv. 11, cxxxvi. 20). The belief in Og's enormous stature is corroborated by an appeal to a relic still existing at the writing of Deut. iii. 11. This was an iron bedstead, or bier, preserved in "Rabbath of the

children of Ammon." (RABBAH 1.) Some have supposed that this was one of the common flat beds used sometimes on the housetops of Eastern cities, but made of iron instead of palm-branches, which would not have supported the giant's weight. (BEN.) Mr. Farrar, with Michaelis, &c., supposes the Hebrew words mean a "sarcophagus of black basalt;" but Schleusner, Gesenius, Fürst, Prof. Murphy (in Fairbairn), &c., sustain the A. V. rendering "bedstead of iron."

**O'had** (Heb. *union*, Ges.; *power*, Fü.), one of the six sons of Simeon (Gen. xlii. 10; Ex. vi. 15).

**O'hel** (Heb. a tent, tabernacle, house, Ges.), one of the last five of the seven sons of Zerubbabel (1 Chr. iii. 20). HASADIAH.

**Oil** (Heb. *yīshār, shemen*; Chal. *mēshah* or *mēshach*; Gr. *elaion*). I. Of the numerous substances, animal and vegetable, known to the ancients as yielding oil, the olive-berry (OLIVE) is the most frequently mentioned in the Scriptures. The best oil is made from fruit gathered about November or December, when it has begun to change color, but before it has become black. The berry in the more advanced state yields more oil, but of an inferior quality.—1.

**Gathering.** That neither the fruit nor the boughs of the tree might be injured, the fruit was either gathered by hand or shaken off carefully with a light reed or stick. After gathering and careful cleansing, the fruit was either at once carried to the press, which is recommended as the best course; or, if necessary, laid on tables with hollow trays made sloping, to allow the first juice to flow into other receptacles beneath, care being taken not to heap the fruit too much, and so prevent the free escape of the juice.—2.

**Pressing.** To make oil, the fruit was either bruised in a mortar, crushed in a press loaded with wood or stones, ground in a mill, or trodden with the feet. Special buildings used for grape-pressing were used also for olive-pressing, and contained both the press and the receptacle for the pressed juice. The "beaten" oil (Ex. xxvii. 20, xxix. 40; Lev. xxiv. 2; Num. xxviii. 5) was probably made by bruising in a mortar. These processes, and also the place and the machine for pressing, are mentioned in the Mishna. (See also Is. lxiii. 3; Lam. i. 15; Joel ii. 24, iii. 13; Mic. vi. 15; Hag. ii. 16.) Oil-mills are often made of stone, and turned by hand. Others consist of a cylinder enclosing a beam, which is turned by a camel or other animal. (WINEPRESS.)—3.

**Keeping.** Both olives and oil were kept in jars carefully cleansed; and oil was drawn out for use in horns or other small vessels. (CRUSE.) Oil of Tekoa was reckoned the best. Trade in oil was carried on with the Tyrians, by whom it was probably often reexported to Egypt, whose olives do not for the most part produce good oil. Oil to the amount of 20,000 *baths* (2 Chr. ii. 10), or 20,000 measures (*cors*, 1 K. v. 11), was furnished by Solomon to Hiram. Direct trade in oil was also carried on between Egypt and Palestine (Ezr. iii. 7; Is. xxx. 6, lvii. 9; Ez. xxvii. 17; Hos. xii. 1).—II.

Besides the use of olives themselves as food, common to all olive-producing countries, the principal uses of olive-oil may be thus stated. 1. **As food.** Dried wheat, boiled with either butter or oil, but more commonly the former, is a common dish for all classes in Syria. Oil was and is much used throughout Western Asia, instead of butter and lard, in cooking, &c. (FOON.)—2. **Cosmetic.** As is the case generally in hot climates, oil was used by the Jews for anointing the body, e. g. after the bath, and giving to the skin and hair a smooth and come-

ly appearance, e. g. before an entertainment. At Egyptian entertainments it was usual for a servant to anoint the head of each guest, as he took his seat (Deut. xxviii. 40; Ru. iii. 3; 2 Sam. xii. 30, &c.). (ANOINTING; MOURNING; OINTMENT; PERFUMES.)—3. *Funereal*. The bodies of the dead were anointed with oil by the Greeks and Romans, probably as a partial antiseptic, and a similar custom appears to have prevailed among the Jews. (ANOINTING; BURIAL.)—4. *Medicinal*. As oil is in use in many cases in modern medicine, it is not surprising that it was much used among the Jews and other ancient nations for medicinal purposes. Celsus repeatedly speaks of the use of oil, especially old oil, applied externally with friction in fevers, and in many other cases. Josephus mentions that among the remedies employed in the case of Herod, he was put into a sort of oil-bath. Isaiah (i. 6) alludes to the use of oil as ointment in medical treatment; and it thus furnished a fitting symbol for use by our Lord's disciples in performing miraculous cures (Mk. vi. 13). (ANOINTING, I. 3.)—5. *Oil for light*. The oil for "the light" was expressly ordered to be olive-oil, "beaten" (Ex. xxv. 6, xxxv. 8, &c.; see above, I. 2). The quantity for the longest night is said to have been one-half *log* = about two-fifths of a pint. (CANDLESTICK; LAMP.)—6. *Ritual*. a. Oil was poured on, or mixed with the flour or meal used in meat-offerings, &c. (Ex. xxix. 2, 3, 40; Lev. vi. 15, 21, vii. 10, 12, xiv. 10 ff.; Num. vi. 15, vii., viii. 8). On the other hand, certain offerings were to be devoid of oil; the sin-offering (Lev. v. 11), and the offering of jealousy (Num. v. 15). The principle on which both the presence and the absence of oil were prescribed is clearly, that as oil is indicative of gladness, so its absence denoted sorrow or humiliation (Is. lxi. 3; Joel ii. 19; Rev. vi. 6). b. Kings, priests, and prophets, were anointed with oil or OINTMENT.—7. a. As so important in his living, the Jew was required to include oil among his first-fruit offerings (Ex. xxii. 29, xxiii. 16; Num. xviii. 12; Deut. xviii. 4; 2 Chr. xxxi. 5). b. Tithes of oil were also required (Deut. xii. 17; 2 Chr. xxxi. 5, &c.).—8. Shields, if covered with hide, were anointed with oil or grease previous to use (Is. xxi. 15). Shields of metal were perhaps rubbed over in like manner to polish them. Of the substances which yield oil, besides the olive-tree, MYRRH is the only one specially mentioned in Scripture (Esth. ii. 12).

**Oil-tree.** The Hebrew words *'ets shemen* occur in Neh. viii. 15 (A. V. "pine-branches"), 1 K. vi. 23 ("olive-tree," marg. "trees of oil," or "oily trees"), and in Is. xli. 19 ("oil-tree"). From the passage in Nehemiah, where the *'ets shemen* is mentioned as distinct from the "olive-tree," it has been identified with the *zackum*-tree of the Arabs, which, according to Dr. J. D. Hooker, is the *Balanites Aegyptiaca*, a shrub or small tree, abundant in the plain of Jordan, and found all the way from the peninsula of India and the Ganges to Syria, Abyssinia, and the Niger. The *zackum*-oil is held in high repute by the Arabs for its medicinal properties. Dr. Hooker supposes the *Balanites Aegyptiaca* may possibly be the "Balm of Gilead." (SPICE 1.)—Mr. Tristram calls the *Balanites Aegyptiaca*, which he found near Jericho, "the false balsam," and describes it as "a thorny tree, with large olive-like fruit—the *zukkum* of the natives—from which the false balm of Gilead, a sort of oil, is extracted and sold to the pilgrims" (*Land of Israel*, pp. 202, 203). Gesenius, Fürst, &c., regard the *'ets shemen* as the wild olive or oleaster (*Eleagnus angustifolia*), a tree

bearing oblong fruit somewhat like an olive in appearance. OLIVE.

*Zackum-tree (Balanites Aegyptiaca) — "Oil-tree."*

**Ointment** (Heb. *shemen*, *rôkah* or *rôkach*, *mirkachath* or *mirkachath*, *mishhah* or *mishchah*, &c.; Gr. *muron*). The following list will point out the Scriptural uses of ointment:—1. *Cosmetic*. The Greek and Roman practice of ANOINTING the head and clothes on festive occasions prevailed also among the Egyptians, and appears to have had place among the Jews (Ru. iii. 3; Eccl. vii. 1, ix. 8; Prov. xxvii. 9, 16, &c.). Oil of myrrh, for like purposes, is mentioned Esth. ii. 12. Egyptian paintings represent servants anointing guests on their arrival at their entertainer's house, and alabaster vases exist which retain the traces of the ointment they were used to contain. (ALABASTER; OIL.)—2. *Funereal*. Ointments as well as OIL were used to anoint dead bodies and the clothes in which they were wrapped (Mat. xxvi. 12; Mk. xiv. 3, 8, xvi. 1; Lk. xxiii. 56; Jn. xii. 3, 7, xix. 40). (BURIAL.)—3. *Medicinal*. Ointment formed an important feature in ancient medical treatment (Is. i. 6). The mention of balm of Gilead and of eye-salve points to the same method of cure (Is. i. 6; Jer. viii. 22; Rev. iii. 18, &c.). (ANOINTING; MEDICINE.)—4. *Ritual*. Besides the OIL used in many ceremonial observances, a special ointment, made of pure myrrh and cassia (each 500 shekels = 250 ounces), sweet cinnamon and sweet calamus (each 250 shekels = 125 ounces), and a hin (about five quarts) of olive-oil, was appointed to be used in consecration (Ex. xxx. 23–25, xxi. 7, xxxvii. 29, xl. 9, 15). Strict prohibition was issued against using this unguent for any secular purpose, or on the person of a foreigner, and against imitating it in any way whatsoever (xxx. 32, 33). The weight of the oil in the mixture would be 12 lbs. 8 oz. English. A question arises, in what form were the other ingredients, and what degree of solidity did the whole attain? According to Maimonides, Moses, having reduced the solid ingredients to powder, steeped them in water till all the aromatic qualities were drawn forth. He then poured in the

oil, and boiled the whole till the water was evaporated. The residuum thus obtained was preserved in a vessel for use. Another theory supposes all the ingredients to have been in the form of oil or ointment, and the measurement by weight of all, except the oil, seems to imply that they were in some solid form, but whether in an unctuous state or in that of powder cannot be ascertained. A process of making ointment, consisting, in part at least, in boiling, is alluded to in Job xli. 31. Kings, and also in some cases prophets, were, as well as priests, anointed with oil or ointment; but Scripture only mentions the fact as actually taking place in the cases of Saul, David, Solomon, Jehu, and Joash. It is evident that the sacred oil was used in the case of Solomon, and probably in the cases of Saul and David. (ANOINTING.) A person whose business it was to compound ointments in general was called an "apothecary" (Ex. xxx. 25, 35, xxxvii. 29; Neh. iii. 8; Eccl. x. 1; Eccles. xxxviii. 9, xlix. 1), or "perfumer" (Ex. xxx. 25, marg.). The work was sometimes carried on by women "confectionaries" (1 Sam. viii. 13). In the Christian Church the ancient usage of anointing the bodies of the dead was long retained. The ceremony of Chrism or anointing was also added to baptism.

**Ol'-mus** (L.) = MESHULLAM of the sons of Bani (1 Esd. ix. 30; comp. Ezr. x. 29).

\* **Old Gate** (Neh. iii. 6, xii. 39), a gate of JERUSALEM, probably (so Kitto) at the N. E. corner. Others would place it in the middle of the N. wall.

**Old Tes'ta-ment.** This article (originally by Mr. Thrupp) treats (A) of the Text of the OLD TESTAMENT, (B) of its Interpretation, and (C) of the Quotations from the Old Testament in the New. (BIBLE; CANON; INSPIRATION.)—A. *Text of the Old Testament.* 1. *History of the Text.* After the completion of the Canon no additions to any part of the O. T. could be legitimately made, the sole object of those who transmitted and watched over it being thenceforth to preserve that which was already written. Of the care, however, with which the text was transmitted we have to judge, almost entirely, by the phenomena which it and the versions derived from it now present, rather than from any recorded facts respecting it. There can be little doubt that the text was ordinarily written on skins, rolled up into volumes, like the modern synagogue-rolls (Ps. xl. 7; Jer. xxxvi. 14; Zech. v. 1; Ez. ii. 9). The original character in which the text was expressed is that still preserved to us, with the exception of four letters, on the Maccabean coins (MONEY), and having a strong affinity to the Samaritan character. At what date this was exchanged for the present Aramaic or square character is still as undetermined, as it is at what date the use of the Aramaic language in Palestine superseded that of the Hebrew. The Old Jewish tradition, repeated by Origen and Jerome, ascribed the change to EZRA. (WRITING.) No vowel-points were attached to the text; they were, through all the early period of its history, entirely unknown. Convenience had indeed, at the time when the later books of the O. T. were written, suggested a larger use of the *matres lectionis* (L. = *mothers* [or *sources*] of correct reading, a name given to the consonants א [ALEPH], ך [vav or VAU], and ם [yod or JOU] from their being used to represent the vowels a, u, i, and thus guide to a correct pronunciation of words, Nordheimer's *Heb. Grammar*, § 9): it is thus that in those books we find them introduced into many words that had been previously

spelt without them. There is reason to think that in the text of the O. T., as originally written, the words were generally, though not uniformly, divided. Of the Phenician inscriptions, though the majority proceed continuously, some have a point after every word, except when the words are closely connected. The same point is used in the Samaritan manuscripts. The practice of separating words by spaces instead of points probably came in with the square writing. Of ancient date, probably, are also the separations between the lesser *parshiyóth* or sections; whether made, in the case of the more important divisions, by the commencement of a new line, or, in the case of the less important, by a blank space within the line. These lesser and earlier *parshiyóth*, of which there are in the Pentateuch 669, must not be confounded with the greater and later *parshiyóth*, or Sabbath-lessons, which are first mentioned in the Masorah. The name *parshiyóth* is in the Mishna applied to the divisions in the Prophets as well as to those in the Pentateuch. Hupfield has found that they do not always coincide with the *capitula* (L. = *chapters*, or *sections*) of Jerome. That they are nevertheless more ancient than his time is shown by the mention of them in the Mishna. In the absence of evidence to the contrary, their disaccordance with the *kátsin* (= *sections*) of the Samaritan Pentateuch, which are 966 in number, seems to indicate that they had an historical origin; and they may possibly date from the period when the O. T. was first transcribed in the square character. Of any logical division, in the written text, of the prose of the O. T. into *psúkin*, or verses, we find in the Talmud no mention; and even in the existing synagogue-rolls such division is generally ignored. In the poetical books, the *psúkin* mentioned in the Talmud correspond to the poetical lines, not to our modern verses; and it is probable both from some expressions of Jerome, and from the analogous practice of other nations, that the poetical text was written stichometrically. The two *earliest* documents which directly bear upon the history of the Hebrew text, are the SAMARITAN PENTATEUCH, and the SEPTAGINT. In the translations of Aquila and the other Greek interpreters, the fragments of whose works remain to us in the Hexapla, we have evidence of the existence of a text differing but little from our own: so also in the Targums of Onkelos and Jonathan. A few centuries later we have, in the Hexapla, additional evidence to the same effect in Origen's transcriptions of the Hebrew text. And yet more important are the proofs of the firm establishment of the text, and of its substantial identity with our own, supplied by the translation of Jerome, who was instructed by the Palestinian Jews, and mainly relied upon their authority for acquaintance not only with the text itself, but also with the traditional unwritten vocalization of it. This brings us to the middle of the Talmudic period. The learning of the schools formed in Jerusalem about the time of our Saviour by Hillel and Shammai was preserved, after the destruction of the city, in the academies of Jabneh, Sepphoris, Cesarea, and Tiberias. The great pillar of the Jewish literature of this period was R. Judah the Holy, to whom is ascribed the compilation of the *Mishna*, the text of the Talmud, and who died about A. D. 220. After his death there grew into repute the Jewish academies of Sura, Nahardea, and Pumbeditha, on the Euphrates. The twofold *Gemara*, or commentary, was now appended to the *Mishna*, thus completing the Talmud. The Jerusalem *Gemara* preceded

from the Jews of Tiberias, probably toward the end of the fourth century: the Babylonian from the academies on the Euphrates, perhaps by the end of the fifth. That along with the task of collecting and commenting on their various legal traditions, the Jews of these several academies would occupy themselves with the text of the sacred writings is in every way probable; and is indeed shown by various Talmudic notices. In these the first thing to be remarked is the entire absence of allusion to any such glosses of interpretation as those which, from having been previously noted on the margins of MSS., had probably been loosely incorporated into the Samaritan Pentateuch and the Septuagint. Interpretation, properly so called, had become the province of the Targumist (VERSIONS, ANCIENT [TARGUM]), not of the transcriber; and the result of the entire divorce of interpretation from transcription had been to obtain greater security for the transmission of the text in its purity. In place, however, of such glosses of interpretation had crept in the practice of reading some passages differently from the way in which they were written, in order to obtain a play of words, or to fix them artificially in the memory. But these traditional and confessedly apocryphal readings were not allowed to affect the written text. The care of the Talmudic doctors for the text is shown by the pains with which they counted up the number of verses in the different books, and computed which were the middle verses, words, and letters in the Pentateuch and in the Psalms. The scrupulousness with which the Talmudists noted what they deemed the truer readings, and yet abstained from introducing them into the text, indicates at once both their diligence in scrutinizing the text and their care in guarding it. Critical procedure is also evinced in their rejection of manuscripts which were found not to agree with others in their readings; and the rules given with reference to the transcription and adoption of manuscripts attest the care bestowed upon them. The Talmud further makes mention of the euphemistic *Keris* (or marginal readings), which are still noticed in our Bibles, e. g. at 2 K. vi. 25. It also reckons six instances of extraordinary points placed over certain words, e. g. over the Heb. *elāy* (A. V. "to him") at Gen. xviii. 9; and of some of them it furnishes mystical explanations. It is after the Talmudic period that Hupfeld places the introduction into the text of the two large points (: in Hebrew *Sôph-pânuḥ*) to mark the end of each verse. Coeval, perhaps, with the use of the *Sôph-pânuḥ* is that of the *Makkêph*, or hyphen, to unite words that are so closely conjoined as to have but one accent between them. Such modifications of the text as these were the precursors of the new method of dealing with it which constitutes the work of the Masoretic period. It is evident from the notices of the Talmud that oral traditions had been gradually accumulating respecting both the integrity of particular passages of the text itself, and also the manner in which it was to be read. This vast heterogeneous mass of traditions and criticisms, compiled and embodied in writing, forms what is known as the *Masôrâh*, i. e. *Tradition*. Buxtorf ranges its contents under the three heads of observations respecting the verses, words, and letters of the sacred text. As to the *verses*, the Masorets recorded how many were in each book, and the middle verse in each: also how many verses began with particular letters, or began and ended with the same word, or contained a particular number of words and letters, or particular words a

certain number of times, &c. As to the *words*, they recorded the *Keris* (Heb. *kêri* = a word read or a reading [now placed in the margin] to be used instead of that in the text) and *Chêthib* (Heb. *chêtib* = a word written, or a textual reading), where different words were to be read from those contained in the text, or where words were to be omitted or supplied. They noted that certain words were to be found so many times in the beginning, middle, or end of a verse, or with a particular construction or meaning. They noted also of particular words, and this especially in cases where mistakes in transcription were likely to arise, whether they were to be written *plênê* (= *fully*) or *defectivê* (= *defectively*), i. e. with or without the *mâtres lectionis* (see above): also their vocalization and accentuation, and how many times they occurred so vocalized or accented. As to the *letters*, they computed how often each letter of the alphabet occurred in the O. T.: they noted fifteen instances of letters stigmatized with the extraordinary points: they commented also on all the unusual letters, viz. the *majuscule* (L. *somewhat larger*), which they variously computed; the *minuscule* (*somewhat smaller*), of which they reckoned thirty-three; the *suspensæ* (*suspended*), four in number; and the *inversæ* (*inverted*), of which there are eight or nine. The most valuable feature of the *Masôrâh* is undoubtedly its collection of *Keris*. The first rudiments of this collection meet us in the Talmud. It seems clear that the *Keris* in all cases represent the readings which the Masorets themselves approved as correct. The *Masôrâh* furnishes also eighteen instances of what it calls "Correction of the scribes." The real import of this is doubtful. Furthermore the *Masôrâh* contains certain "Conjectures," which it does not raise to the dignity of *Keris*, respecting the true reading in difficult passages. The *Masôrâh* was originally preserved in distinct books by itself. A plan then arose of transferring it to the margins of the MSS. of the Bible. For this purpose large curtailments were necessary. The *Masôrâh* is now distinguished into the *Masora magna* (= *large Masôrâh*) and the *Masora parva* (= *small Masôrâh*), the latter being an abridgment of the former, including all the *Keris* and other compendious observations, and usually printed in Hebrew Bibles at the foot of the page. The *Masôrâh* itself was but one of the fruits of the labors of the Jewish doctors in the Masoretic period. A far more important work was furnishing the text with vowel-marks, by which the traditional pronunciation of it was imperishably recorded. That the insertion of the Hebrew vowel-points was post-Talmudic is shown by the absence from the Talmud of all reference to them. The vowel-marks are referred to in the *Masôrâh*; and as they are all mentioned by R. Judah Chiuḡ, in the beginning of the eleventh century, they must have been perfected before that date. (WRITING.) Contemporaneous with the written vocalization was the accentuation of the text. The import of the accents was, as Hupfeld has shown, essentially rhythmical: hence they had from the first both a logical and a musical significance. Besides the evidences of various readings contained in the *Keris* of the *Masôrâh*, we have two lists of different readings purporting or presumed to be those adopted by the Palestinian and Babylonian Jews respectively. The first of these was printed by R. Jacob ben Chayim in the Bomberg Bible (Venice, 1525-'6). The different readings are 216 in number, generally of but little importance. The other is the result of a collation of

MSS. made in the eleventh century by two Jews, R. Aaron ben Asher, a Palestinian, and R. Jacob ben Naphtali, a Babylonian. The differences, 864 in number, relate to the vowels, the accents, the *Mak-képh* (or hyphen), and once (Cant. viii. 6) to the division of one word into two. From the end of the Masoretic period onward, the *Másórâh* became the great authority by which the text given in all the Jewish MSS. was settled.—2. *Manuscripts.* The O. T. MSS. known to us fall into two main classes: Synagogue-rolls and MSS. for private use. Of the latter, some are written in the square, others in the rabbinic or cursive character. The synagogue-rolls contain, separate from each other, the Pentateuch, the *Haphtârâh*, or appointed sections of the Prophets, and the so-called *Migillôth*, viz. Canticles, Ruth, Lamentations, Ecclesiastes, and Esther. (BIBLE, III., IV.) The text of the synagogue-rolls is written without vowels, accents, or *noph-pâniks*: the greater *parshiyôth* are not distinguished, nor yet, strictly, the verses; these last are indeed often slightly separated, but the practice is against the ancient tradition. The rules prescribed for preparing the skin or parchment, and for writing these rolls, are exceedingly minute, and have probably contributed much to preserve the text in its integrity. The two modifications of the square character in which these rolls are written are distinguished by the Jews as the *Tam* and the *Velshe*, i. e., probably, the *Perfect* and the *Foreign*. The synagogue-rolls are not sold. Private MSS. in the square character are in the book-form, either on parchment or on paper, and of various sizes, from folio to 12mo. Some contain the Hebrew text alone; others add the Targum, or an Arabic or other translation, either interspersed with the text or in a separate column, occasionally in the margin. The upper and lower margins are generally occupied by the *Másórâh*, sometimes by rabbinical commentaries, &c. The date of a MS. is ordinarily given in the subscription; but as the subscriptions are often concealed in the *Másórâh* or elsewhere, it is occasionally difficult to find them: occasionally also it is difficult to decipher them. Even when found and deciphered, they cannot always be relied on. No satisfactory criteria have been yet established by which the ages of MSS. are to be determined. Few existing MSS. are supposed to be older than the twelfth century. Kennicott and Bruns assigned one of their collation (No. 590) to the tenth century; De Rossi dates it A. D. 1018; on the other hand, one of his own (No. 634) he adjudges to the eighth century. It is usual to distinguish in these MSS. three modifications of the square character: viz. a Spanish writing, upright and regularly formed; a German, inclined and sharp-pointed; and a French and Italian, intermediate between the two preceding. One important distinction between the Spanish and German MSS. consists in the difference of order in which the books are generally arranged. The former follow the *Másórâh*, placing the Chronicles before the rest of the Hagiographa: the latter conform to the Talmud, placing Jeremiah and Ezekiel before Isaiah, and Ruth, separate from the other *Migillôth*, before the Psalms. Private MSS. in the rabbinic character are mostly on paper, and are of comparatively late date. Of the 581 Jewish MSS. collated by Kennicott, not more than 102 give the O. T. complete; with those collated by De Rossi the case is similar. Kennicott and De Rossi collated 490 MSS. of Genesis, 549 of the *Migillôth* collectively, 495 of the Psalms, 172 (the fewest) of Ezra

and Nehemiah, 211 of Chronicles, more than 1,100 in all, the greatest number containing Esther. Since the days of Kennicott and De Rossi modern research has discovered various MSS. beyond the limits of Europe, many of them of little critical value. Those found in China are not essentially different from the MSS. previously known in Europe; that brought by Buchanan from Malabar is now supposed to be a European roll. It is different with some of the Hebrew and Rabbinic MSS. examined by Pinner at Odessa. One of these MSS. (A. No. 1), a Pentateuch roll, unpointed, brought from Derbend in Daghestan, appears by the subscription to have been written previously to the year A. D. 580; and, if so, is the oldest known Biblical Hebrew MS. in existence. Another of these MSS. (B. No. 3) containing the Prophets, on parchment, in small folio, although only dating, according to the inscription, from A. D. 916, and furnished with a *Másórâh*, is a yet greater treasure. Its vowels and accents are wholly different from those now in use, both in form and in position, being all above the letters: they have accordingly been the theme of much discussion among Hebrew scholars. In both these MSS. of Pinner the forms of the letters are remarkable; and similar peculiarities are found in some of the other Odessa MSS. The Samaritan MSS. collated by Kennicott, are all in the book-form, but sufficiently represent the text of the SAMARITAN PENTATEUCH.—3. *Printed Text.* The history of the printed text of the Hebrew Bible commences with the early Jewish editions of the separate books. First appeared the Psalter, in 1477, probably at Bologna, in 4to, with Kimchi's commentary interspersed among the verses. Only the first four psalms had the vowel-points, and these but clumsily expressed. At Bologna there subsequently appeared, in 1482, the Pentateuch, in folio, pointed, with the Targum and the commentary of Rashi; and the five *Migillôth* (BIBLE, III. 3, 6), in folio, with the commentaries of Rashi and Aben Ezra. From Soncino, near Cremona, issued in 1486 the Former and Later Prophets, in 2 vols., folio, unpointed, with Kimchi's commentary; also the *Migillôth*, with the prayers of the Italian Jews, in 4to. In 1487 the Hagiographa appeared at Naples in two volumes, pointed, but unaccentuated, with Rabbinical commentaries. Thus every separate portion of the Hebrew Bible was printed in Italy (at Bologna, Soncino, or Naples) before any complete edition of it appeared. The first entire Hebrew Bible was printed at Soncino in 1488. The edition is in folio, pointed, and accented. Nine copies only of it are now known, of which one belongs to Exeter College, Oxford, England. The earlier printed portions were perhaps the basis of the text. This was followed, in 1494, by the 4to or 8vo edition printed by Gerson at Brescia, remarkable as the edition from which Luther's German translation was made. This edition, along with the preceding, formed the basis of the first edition, with the *Másórâh*, Targums, and Rabbinical comments, printed by Bomberg at Venice in 1518, folio, under the editorship of the converted Jew, Felix del Prato, who appears to have used also MSS. in aid. This edition was the first to contain the *Masora magna*, and the various readings of Ben Asher and Ben Naphtali. After the Brescian, the next primary edition was that contained in the Complutensian Polyglot, published at Complutum (i. e. Alcalá, near Madrid), in Spain, at the expense of Cardinal Ximenes, in six volumes, folio, dated 1514-17, but not issued till 1522. The Hebrew is pointed, but unaccentuated:

it was taken from seven MSS., which are still preserved in the University Library at Madrid. To this succeeded an edition which has had more influence than any on the text of later times—the Second Rabbinical Bible, printed by Bomberg at Venice, 4 vols., folio, 1525–6. The editor was the learned Tunisian Jew, R. Jacob ben Chayim. The great feature of his work lay in the correction of the text by the precepts of the *Masorah*, in which he was profoundly skilled, and on which, as well as on the text itself, his labors were employed. The Royal or Antwerp Polyglot, printed by Plantin, 8 vols., folio, 1569–72, at the expense of Philip II. of Spain, and edited by Arias Montanus and others, took the Complutensian as the basis of its Hebrew text, but compared this with one of Bomberg's, so as to produce a mixture of the two. This text was followed both in the Paris Polyglot of Le Jay, 9 vols., folio, 1645, and in Walton's Polyglot, London, 6 vols., folio, 1657. A text compounded of several of the preceding was issued by the Leipsic Professor, Elias Hutter, at Hamburg, folio, 1587: it was intended for students, the servile letters being distinguished from the radicals by hollow type. A special mention is also due to the labors of the elder Buxtorf, who carefully revised the text after the *Masorah*, publishing it in 8vo at Basle, 1611, and again, after a fresh revision, in his valuable Rabbinical Bible, 2 vols., folio, 1618–19. Neither Hutter's nor Buxtorf's text was without its permanent influence; but the Hebrew Bible which became the standard to subsequent generations was that of Joseph Athias, a learned rabbi and printer at Amsterdam. His text was based on a comparison of the previous editions with two MSS.; one bearing date 1299, the other a Spanish MS. boasting an antiquity of 900 years. It appeared at Amsterdam, 2 vols., 8vo, 1661, with a preface by Leusden, professor at Utrecht; and again, revised afresh, in 1667. These Bibles were much prized for their beauty and correctness, and the States-General of Holland conferred on Athias a gold chain and medal. The progeny of the text of Athias was as follows:—*a.* That of Clodius, Frankfurt-on-Maine, 8vo, 1677; reprinted, with alterations, 8vo, 1692, 4to, 1716. *b.* That of Jablonski, Berlin, large 8vo or 4to, 1699; reprinted, but less correctly, 12mo, 1712. *c.* That of Van der Hooght, Amsterdam and Utrecht, 2 vols., 8vo, 1705. This edition, of good reputation for its accuracy, but above all for the beauty and distinctness of its type, deserves special attention as constituting our present *textus receptus* (= Received Text). *d.* That of Opitz, Kiel, 4to, 1709. *e.* That of J. H. Michaelis, Halle, 8vo and 4to, 1720. The modern editions of the Hebrew Bible now in use are all based on Van der Hooght.—4. *Critical Labors and Apparatus.* The history of the criticism of the text, already brought down to the period of the Masorets and their immediate successors, must be here resumed. In the early part of the thirteenth century, R. Meir Levita, a native of Burgos and inhabitant of Toledo, known by abbreviation as Haramah, by patronymic as Todrosius, wrote a critical work on the Pentateuch called *The Book of the Masorah the Hedge of the Law*, in which he endeavored, by a collation of MSS., to ascertain the true reading in various passages. At a later period R. Menahem de Lonzano collated ten MSS., chiefly Spanish, some of them five or six centuries old, with Bomberg's 4to Bible of 1544. The results were given in the work "Light of the Law," printed at Venice, 1618. They relate only to the Pentateuch. A more important work

was that of R. Solomon Norzi, of Mantua, in the seventeenth century, "Repairer of the Breach:" a copious critical commentary on the whole of the O. T., drawn up with the aid of MSS. and editions of the *Masorah*, Talmud, and all other Jewish resources within his reach. In 1746 expectations were raised by the *Prolegomena* of Houbigant, of the Oratory at Paris; and in 1753 his edition appeared, splendidly printed, in 4 vols., folio. The text was that of Van der Hooght, divested of points, and of every vestige of the *Masorah*. In the notes copious emendations were introduced from the Samaritan Pentateuch, twelve Hebrew MSS., the LXX., and other ancient versions, and much critical conjecture. In the same year, 1753, appeared at Oxford Kennicott's first Dissertation on the state of the Printed Text: the second followed in 1759. The result of these and of the author's subsequent annual reports was a subscription of nearly 10,000*l.* to defray the expenses of a collation of Hebrew MSS. throughout Europe, which was performed from 1760 to 1769, partly by Kennicott himself, but chiefly, under his direction, by Professor Bruns of Helmstadt and others. The collation extended in all to 521 Jewish and 16 Samaritan MSS., and 40 printed editions, Jewish works, &c.; of which, however, only about half were collated throughout, the rest in select passages. The fruits appeared at Oxford in 2 vols., folio, 1776–80; the text is Van der Hooght's, unpointed; the various readings are given below; comparisons are also made of the Jewish and Samaritan texts of the Pentateuch, and of the parallel passages in Samuel and Chronicles, &c. Expectation was disappointed. A large part of the various readings had reference to the omission or insertion of the *matres lectionis* (see above, under § 1), and many of the rest obviously represented only the mistakes of separate transcribers. The labors of Kennicott were supplemented by those of De Rossi, professor at Parma. His plan differed materially from Kennicott's: he confined himself to a specification of the various readings in select passages; but for these he supplied also the critical evidence from the ancient versions, and from all the various Jewish authorities. He collected in his library 1,031 MSS., of which he collated 617 (some of them before collated by Kennicott); he collated 134 extraneous MSS., that had escaped Kennicott's fellow-laborers; he recapitulated Kennicott's various readings, and examined well those of the printed editions. Thus for the passages on which it treats, the evidence in De Rossi's work (4 vols., 4to, Parma, 1784–8; another volume, 1798; without the text) may be regarded as almost complete. A small Bible, with the text of Reineccius, and a selection of the more important readings of Kennicott and De Rossi, was issued by Döderlein and Meisner at Leipsic, 8vo, 1793. It is printed (except some copies) on bad paper, and is reputed very incorrect. A better critical edition is that of Jahn, Vienna, 4 vols., 8vo, 1806. The first attempt to turn the new critical collations to public account was made by Boothroyd, in his unpointed Bible, with various readings and English notes, Pontefract (in Yorkshire, England), 4to, 1810–16, at a time when Houbigant's principles were still in the ascendant. This was followed by Rev. George Hamilton's *Code Criticus of the Hebrew Bible* (London, 1821, 8vo), modelled on the plan of the N. T. of Griesbach. The most important contribution toward the formation of a revised text that has yet appeared is Dr. Samuel Davidson's *Hebrew Text of the O. T. revised from Critical Sources*,

1855. It presents a convenient epitome of the more important various readings of the MSS., and of the *Masorah*, with the authorities for them. But comparatively little has yet been done for the systematic criticism of the Hebrew text from the ancient versions, or for any collection of the conjectural emendations of the Hebrew text proposed by various scholars during the last hundred years.—5. *Principles of Criticism*. The method of procedure required in the criticism of the O. T. is widely different from that practised in the criticism of the N. T. The Received Text of the O. T. is a far more faithful representation of the genuine Scripture, but, on the other hand, the means of detecting and correcting the errors contained in it are more precarious, the results are more uncertain, and the ratio borne by the value of the diplomatic evidence of MSS. to that of a good critical judgment and sagacity is greatly diminished. In endeavoring to establish the true text, we must first have recourse to the direct testimony of the MSS. Where the MSS. disagree, it has been laid down as a canon that we ought not to let the mere numerical majority preponderate, but should examine what is the reading of the earliest and best. The MSS. lead us for the most part only to our first sure standing-ground, the Masoretic text; in other words, to the average written text of a period later by a thousand or fifteen hundred years than the latest book of the O. T. In ascending upward from the Masoretic text, our first critical materials are the Masoretic *Keri*, valuable as witnesses to the preservation of many authentic readings, yet possibly, in particular instances, only unauthorized conjectures. A *Keri* therefore is not to be received in preference to a *Chethib*, unless confirmed by other sufficient evidence, external or internal; a difficult reading in the text is to be preferred to an easy one in the *Keri*, which latter may be but an arbitrary softening down of the genuine text. The express assertions of the *Masorah*, as also of the Targum, respecting the true reading in particular passages, are of course important. From these we ascend to the Latin version of Jerome. Dependent as he was, for his knowledge of the Hebrew text and every thing respecting it, on the Palestinian Jews, and accurate as are his renderings, Mr. Thrupe regards a Hebrew reading which can be shown to have been received by Jerome, if sanctioned or countenanced by the Targum, as so far to be preferred to one upheld by the united testimony of all MSS. whatever. Yet this Latin version itself needs critical revision. (VULGATE, THE.) The fragments of the Greek versions of Aquila, Symmachus, and Theodotion—the Syriac (VERSIONS, ANCIENT [SYRIAC]), though apparently made too much under the influence of the Septuagint—the Targums (VERSIONS, ANCIENT [TARGUM]), though too often paraphrastic—all furnish most important material for the correction of the Masoretic text; and their cumulative evidence, when they all concur in a reading different from the Masoretic, is very strong. The SEPTUAGINT itself, venerable for its antiquity, but on various accounts untrustworthy in the readings which it represents, must be treated for critical purposes in the same way as the Masoretic *Keri*. The presence of any Hebrew reading in it can pass for little, unless it can be independently shown to be probable that that reading is the true one; but in confirming a Masoretic reading against which later testimonies militate, the authority of the Septuagint, on account of its age, necessarily stands high. Similar remarks would seem to apply to the critical use of the SAMARITAN

PENTATEUCH: it is, however, doubtful whether that document be of any real additional value. In the case of the O. T., unlike that of the N. T., another source of emendations is generally allowed, viz. critical conjecture. The argument for this is, that the oldest version (the LXX.) is nearly two centuries younger than the latest book of the O. T.; and as the history of the Hebrew text seems to show that the care with which its purity has been guarded has been continually increasing, so its few corruptions would be most likely to occur in the earliest periods. The comparative purity of the Hebrew text is probably different in different parts of the O. T. In the revision of Dr. Davidson, who has generally restricted himself to the admission of corrections warranted by MS., Masoretic, or Talmudic authority, those in the book of Genesis do not exceed eleven; those in the Psalms are proportionately three times as numerous; those in the historical books and the Prophets are proportionately more numerous than those in the Psalms. (ABIJAH 1; AHAZIAH 2; ANAH; ARAUNAH; BASHMATH; CENSUS; DEUTERONOMY, B.; HEZEKIAH; JEOHACHIN; NUMBER, &c.) In all emendations of the text, whether made with the aid of the critical materials which we possess, or by critical conjecture, it is essential that the proposed reading be one from which the existing reading may have been derived: hence the necessity of attention to the means by which corruptions might be introduced into the text. One letter might be accidentally exchanged by a transcriber for another. Words, or parts of words, might be repeated; or they might be dropped, especially when they ended like those that preceded. Occasionally a letter may have travelled from one word, or a word from one verse, to another. Willful corruption of the text on polemical grounds has also been occasionally charged upon the Jews; but the allegation has not been proved, and their known reverence for the text militates against it. To the criticism of the vowel-marks the same general principles must be applied as to that of the consonants. Even Hitzig, who does not generally err on the side of caution, holds that the vowel-marks have in general been rightly fixed by the Masorets. On the whole, the Masoretic text is to be deemed worthy of confidence, yet emendations of it, which can be fairly established by sufficient evidence, are not to be refused.—B. *Interpretation of the Old Testament*. 1. *History of the Interpretation*. At the period of the rise of Christianity two opposite tendencies had manifested themselves in the interpretation of the O. T. among the Jews; the one to an extreme literalism, the other to an arbitrary allegorism. The former of these was mainly developed in Palestine, where the Law of Moses was, from the nature of things, most completely observed. The Jewish teachers, acknowledging the obligation of that law in its minutest precepts, but overlooking the moral principles on which those precepts were founded and which they should have unfolded from them, there endeavored to supply by other means the imperfections inherent in every law in its mere literal acceptance (Mat. xv., xxiii.) (PHARISEES.) On the other hand, at ALEXANDRIA the allegorizing tendency prevailed. Germs of it had appeared in the apocryphal writings, as where in Wis. xviii. 24 the priestly vestments of Aaron had been treated as symbolical of the universe; but it culminated in Philo, who, in the persons and things mentioned in the writings of Moses, traces, without denying the outward reality of the narrative, the mystical designations of different ab-

abstract qualities and aspects of the invisible. The Alexandrian interpreters were striving to vindicate for the Hebrew Scriptures a new dignity in the eyes of the Gentile world, by showing that Moses had anticipated all the doctrines of the philosophers of Greece. (PHILOSOPHY.) It must not be supposed that the Palestinian literalism and the Alexandrian allegorism ever remained entirely distinct. In fact the two extremes of literalism and arbitrary allegorism, in their neglect of the direct moral teaching and prophetic import of Scripture, had too much in common not to mingle readily the one with the other. And thus we may trace the development of the two distinct yet coexistent spheres of *Halâchâh* and *Haggâdâh*, in which the Jewish interpretation of Scripture, as shown by the later Jewish writings, ranged. The former (= *repetition, following*) embraced the traditional legal determinations for practical observance: the latter (= *discourse*) the unrestrained interpretation, of no authentic force or immediate practical interest. The earliest Christian non-apostolic treatment of the O. T. was necessarily much dependent on that which it had received from the Jews. The Alexandrian allegorism reappears the most fully in the fanciful epistle of Barnabas; but it influenced also the other writings of the sub-apostolic Fathers. Even the Jewish cabbalism passed to some extent into the Christian Church, and is said to have been largely employed by the Gnostics. But this was not to last. Irenæus, himself not altogether free from it, raised his voice against it; and Tertullian well laid it down as a canon that the words of Scripture were to be interpreted only in their logical connection, and with reference to the occasion on which they were uttered. In another respect all was changed. The Christian interpreters by their belief in Christ stood on a vantage-ground for the comprehension of the whole burden of the O. T. to which the Jews had never reached; and thus, however they may have erred in the details of their interpretations, they were generally conducted by them to the right conclusions in regard of Christian doctrine. The view held by the Christian Fathers, that the whole doctrine of the N. T. had been virtually contained and foreshadowed in the Old, generally induced the search in the O. T. for such Christian doctrine rather than for the old philosophical dogmas. Their general convictions were doubtless here more correct than the details which they advanced; and it would be easy to multiply from the writings of Justin, Tertullian, or Irenæus, typical interpretations that could no longer be defended. It was at ALEXANDRIA that definite principles of interpretation were first laid down by the most illustrious and influential teachers in the Christian Church. Clement of Alexandria, who probably died about A. D. 220, led the way. He held that in the Jewish law a fourfold import was to be traced; literal, symbolical, moral, prophetic. Of these the second was the relic of the philosophical element that others had previously engrafted on the Hebrew Scriptures. Clement was succeeded by his scholar Origen. With him biblical interpretation showed itself more decidedly Christian; and while the wisdom of the Egyptians, moulded anew, became the permanent inheritance of the Church, the distinctive symbolical meaning which philosophy had placed upon the O. T. disappeared. Origen recognizes, in Scripture, as it were, a body, soul, and spirit, answering to the body, soul, and spirit of man: the first serves for the edification of the simple, the second for that of the more advanced,

the third for that of the perfect. The reality and the utility of the first, the letter of Scripture, he proves by the number of those whose faith is nurtured by it. The second, which is in fact the moral sense of Scripture, he illustrates by the interpretation of Deut. xxv. 4 in 1 Cor. ix. 9. The third, however, is that on which he principally dwells, showing how the Jewish Law, spiritually understood, contained a shadow of good things to come (Rom. xi. 4, 5; 1 Cor. x. 11; Gal. iv. 21-31; Heb. viii. 5). Both the spiritual and (to use his own term) the psychical meaning he held to be always present in Scripture: the bodily not always. Origen's own expositions of Scripture were, no doubt, less successful than his investigations of the principles on which it ought to be expounded. Yet as the appliances which he brought to the study of Scripture made him the father of biblical criticism, so of all detailed scriptural commentaries his were the first; a fact not to be forgotten by those who would estimate aright their several merits and defects. The value of Origen's researches was best appreciated by Jerome, who lived about A. D. 331-420. He adopted and repeated most of Origen's principles; but he exhibited more judgment in the practical application of them: he devoted more attention to the literal interpretation, the basis of the rest, and he brought also larger stores of learning to bear upon it. With Origen he held that Scripture was to be understood in a threefold manner, literally, tropologically (i. e. morally), mystically: the first meaning was the lowest, the last the highest. But elsewhere he gave a new threefold division of Scriptural interpretation, identifying the ethical with the literal or first meaning, making the allegorical or spiritual meaning the second, and maintaining that, thirdly, Scripture was to be understood "according to the blessedness of things to come." The influence of Origen's writings was supreme in the Greek Church for 100 years after his death. Toward the end of the fourth century, Diodorus, bishop of Tarsus, previously a presbyter at Antioch, wrote an exposition of the whole of the O. T., attending only to the letter of Scripture. Of the disciples of Diodorus, Theodore of Mopsuestia pursued an exclusively grammatical interpretation into a decided rationalism, rejecting the greater part of the prophetic reference of the O. T., and maintaining it to be only applied to our Saviour by way of accommodation. Chrysostom, another disciple of Diodorus, followed a sounder course, rejecting neither the literal nor the spiritual interpretation, but bringing out with much force from Scripture its moral lessons. He was followed by Theodoret, who interpreted, with diligence and soberness, both literally and historically, and also allegorically and prophetically. In the Western Church the influence of Origen, if not so unqualified at the first, was yet permanently greater than in the Eastern. Hilary of Poitiers is said by Jerome to have drawn largely from Origen in his Commentary on the Psalms. But in truth, as a practical interpreter, he greatly excelled Origen; carefully seeking out not what meaning the Scripture might bear, but what it really intended, and drawing forth the evangelical sense from the literal with cogency, terseness, and elegance. Here too Augustine, though he lacked acquaintance with Hebrew, stood somewhat in advance of Origen; carefully preserving in its integrity the literal sense of the historical narrative of Scripture as the substructure of the mystical, lest otherwise the latter should prove to be but a building in the air. But whatever advances had

been made in the treatment of O. T. Scripture by the Latins since the days of Origen were unhappily not perpetuated. We may see this in the *Morals* of Gregory (Pope of Rome, A. D. 590-604) on the Book of Job; the last great independent work of a Latin Father. Three senses of the sacred text are here recognized and pursued in separate threads: the historical and literal, the allegorical, and the moral. But the three have hardly any mutual connection: the very idea of such a connection is ignored. The allegorical interpretation is entirely arbitrary; and the moral interpretation differs from the allegorical only in its aim, to edify the Church by referring the language to the inward workings of the soul instead of setting forth by it the history of Christ. Such was the general character of the interpretation which prevailed through the middle ages, during which Gregory's work stood in high repute. The mystical sense of Scripture was entirely divorced from the literal. The first impulse to the new investigation of the literal meaning of the text of the O. T. came from the great Jewish commentators, mostly of Spanish origin, of the eleventh and following centuries; Rashi († 1105), Aben Ezra († 1167), Kimchi († 1240), and others. Following in the wake of these, the converted Jew Nicolaus of Lyre, near Evreux, in Normandy († 1341), produced his *Postillæ Perpetuæ* on the Bible, in which, without denying the deeper meanings of Scripture, he justly contended for the literal as that on which they all must rest. Exception was taken to these a century later by Paul of Burgos, also a converted Jew († 1435), who upheld, by the side of the literal, the traditional interpretations, to which he was probably at heart exclusively attached. But the very arguments by which he sought to vindicate them showed that the recognition of the value of the literal interpretation had taken firm root. The Restoration of Letters and the Reformation helped it forward. Luther held that the best philologist was also the best theologian. That grammatical scholarship is not indeed the only qualification of a sound theologian, the German commentaries of the last hundred years have abundantly shown; yet immense service has been rendered to the interpretation of the O. T. by the labors and learning of modern German scholars, both neological and evangelical, as well as by the studies and practical skill of the theologians and exegetes of Great Britain and America.—2. *Principles of Interpretation.* From the foregoing sketch it appears that the interpretation of the O. T. has been very generally regarded as embracing the discovery of its literal, moral, and spiritual meaning. It has given occasion to misrepresentation to speak of the existence in Scripture of more than a single sense; rather, then, let it be said that there are in it three elements, co-existing and coalescing with each other, and generally requiring each other's presence in order that they may be severally manifested. Correspondingly too there are three portions of the O. T. in which the respective elements, each in its turn, shine out with peculiar lustre. The literal (and historical) element is most obviously displayed in the historical narrative: the moral is specially honored in the Law, and in the hortatory addresses of the Prophets: the predictions of the Prophets bear emphatic witness to the prophetic or spiritual. Still, generally, in every portion of the O. T. the presence of all three elements may by the student of Scripture be traced. In perusing the story of the journey of the Israelites through the wilderness, he has the historical element in the actual occurrence of the facts

narrated; the moral, in the warnings which God's dealings with the people and their own several disobediences convey; and the spiritual in the prefiguration by that journey, in its several features, of the Christian pilgrimage through the wilderness of life. If the question be asked, Are the three several elements in the O. T. mutually coextensive? Mr. Thrupp replies, They are certainly coextensive in the O. T., taken as a whole, and in the several portions of it, largely viewed; yet not so that they are all to be traced in each several section. The historical element may occasionally exist alone. On the other hand there are passages of direct and simple moral exhortation, e. g. a considerable part of the Book of Proverbs, into which the historical element hardly enters. Occasionally also, as in Psalm ii., the prophetic element, though not altogether divorced from the historical and the moral, yet completely overshadows them. That we should use the N. T. as the key to the true meaning of the O. T., and should seek to interpret the latter as it was interpreted by our Lord and His apostles, is in accordance both with the spirit of what the earlier Fathers asserted respecting the value of the tradition received from them, and with the appeals to the N. T. by which Origen defended and fortified the threefold method of interpretation. But here it is the analogy of the N. T. interpretations that we must follow; for it were unreasonable to suppose that the whole of the O. T. would be found completely interpreted in the New. With these preliminary observations we may glance at the several branches of the interpreter's task. First, then, Scripture has its outward form or body, all the several details of which he will have to explore and to analyze. He must ascertain the thing outwardly asserted, commanded, foretold, prayed for, or the like; and this with reference, so far as is possible, to the historical occasion and circumstances, the time, the place, the political and social position, the manner of life, the surrounding influences, the distinctive character, and the object in view, alike of the writers, the persons addressed, and the persons who appear upon the scene. Taken in its wide sense, the outward form of Scripture will itself, no doubt, include much that is figurative. To the outward form of Scripture thus belong all metonymies, in which one name is substituted for another; and metaphors, in which a word is transformed from its proper to a cognate signification; so also all prosopopeias, or personifications; and even all anthropomorphic and anthropopathic descriptions of God, which could never have been understood in a purely literal sense, at least by any of the right-minded among God's people. It is difficult, perhaps impossible, to draw the exact line where the province of spiritual interpretation begins and that of historical ends. On the one hand the spiritual significance of a passage may occasionally, perhaps often, throw light on the historical element involved in it: on the other hand the very large use of figurative language in the O. T., and more especially in the prophecies, prepares us for the recognition of the yet more deeply figurative and essentially allegorical import which runs through the whole. Yet no unhalloved or unworthy task can it ever be to study, even for its own sake, the historical form in which the O. T. comes to us clothed. Even by itself it proclaims to us the historical workings of God, and reveals the care where-with He has ever watched over the interests of His Church. Above all, the history of the O. T. is the

indispensable preface to the historical advent of the Son of God in the flesh. We need hardly labor to prove that the N. T. recognizes the general historical character of what the O. T. records. Of course, in reference to that which is not related as plain matter of history, there will always remain the question how far the descriptions are to be viewed as definitely historical, how far as drawn, for a specific purpose, from the imagination. Such a question presents itself, for example, in the Book of Job. It is one which must plainly be in each case decided according to the particular circumstances. In examining the extent of the historical element in the prophecies, both of the prophets and the psalmists, we must distinguish between those which we either definitely know or may reasonably assume to have been fulfilled at a period not entirely distant from that at which they were uttered, and those which reached far beyond in their prospective reference. The former, once fulfilled, were thenceforth annexed to the domain of history (Is. xvii.; Ps. cvii. 33). With the prophecies of more distant scope the case stood thus. A picture was presented to the prophet's gaze, embodying an outward representation of certain future spiritual struggles, judgments, triumphs, or blessings; a picture suggested in general by the historical circumstances of the present (Zech. vi. 9-15; Ps. v., lxxii.), or of the past (Ez. xx. 35, 36; Is. xi. 15, xlviii. 21; Ps. xcix. 6 ff.), or of the near future, already anticipated and viewed as present (Is. xlix. 7-26; Ps. lvii. 6-11), or of all these variously combined, altered, and heightened by the imagination. But it does not follow that that picture was ever outwardly brought to pass: the local had been exchanged for the spiritual, the outward type had merged in the inward reality before the fulfilment of the prophecy took effect. Respecting the rudiments of interpretation, let the following here suffice:—The knowledge of the meanings of Hebrew words is gathered (a.) from the context, (b.) from parallel passages, (c.) from the traditional interpretations preserved in Jewish commentaries and dictionaries, (d.) from the ancient versions, (e.) from the cognate languages, Chaldee, Syriac, and Arabic. The syntax must be almost wholly gathered from the O. T. itself; and for the special syntax of the poetical books, while the importance of a study of the Hebrew parallelism is now generally recognized, more attention needs to be bestowed than has been bestowed hitherto on the centralism and inversion often marking the poetical structure and language. (POETRY, HEBREW.)—A few brief rules for the right interpretation of Scripture may here be added from Bishop Ellicott and Mr. Ayre: "Interpret"—(a) "grammatically," i. e. by finding the signification of the Hebrew, &c., words in themselves (as above), and then their sense as combined in sentences according to the fundamental principles of language; (b) "historically," i. e. with reference to the connected historical or other external facts, the time, place, customs, &c.; (c) "contextually," i. e. in conformity with the general scope and meaning of the context, and the position and purpose of the writer; (d) "minutely," i. e. giving due weight to every word, however small, every peculiarity of expression, style, arrangement, &c.; (e) "according to the analogy of faith," i. e. in harmony with the Christian faith, or the grand system of truth revealed in the Scriptures in regard to the nature, character, works, and government of God; the person, office, and kingdom of CHRIST; the origin, de-

pendence, duty, need, privilege, and destiny of MAN, &c.—From the outward form of the O. T. we proceed to its moral element or soul. It was with reference to this that St. Paul declared that all Scripture was given by inspiration of God, and was profitable for doctrine, for reproof, for correction, for instruction in righteousness (2 Tim. iii. 16); and it is in the implicit recognition of the essentially moral character of the whole, that our Lord and His apostles not only appeal to its direct precepts (e. g. Mat. xv. 4, xix. 17-19), and set forth the fullness of their bearing (e. g. ix. 13), but also lay bare moral lessons in O. T. passages which lie rather beneath the surface than upon it (xix. 5, 6, xxii. 32; Jn. x. 34, 35; Acts vii. 48, 49; 1 Cor. ix. 9, 10; 2 Cor. viii. 13-15). With regard more particularly to the Law, our Lord shows in His Sermon on the Mount how deep is the moral teaching implied in its letter; and in His denunciation of the Pharisees, upbraids them for their omission of its weightier matters—judgment, mercy, and faith. The history, too, of the O. T. finds frequent reference made in the N. T. to its moral teaching (Lk. vi. 3; Rom. iv., ix. 17; 1 Cor. x. 6-11; Heb. iii. 7-11, xi.; 2 Pet. ii. 15, 16; 1 Jn. iii. 12). The interpreter of the O. T. will have, among his other tasks, to analyze in the lives set before him the various yet generally mingled workings of the spirit of holiness and of the spirit of sin. The moral errors by which the lives of even the greatest saints were disfigured are related, and that for our instruction, but not generally criticised. The O. T. sets before us just those lives—the lives generally of religious men—which will best repay our study, and most strongly suggest the moral lessons that God would have us learn; and herein it is that, in regard of the moral aspects of the O. T. history, we may most surely trace the overruling influence of the Holy Spirit by which the sacred historians wrote.—But the O. T. has further its spiritual, and, therefore, prophetic element. Our attention is here first attracted to the avowedly predictive parts of the O. T., of the prospective reference of which, at the time that they were uttered, no question can exist, and the majority of which still awaited their fulfilment when the Redeemer of the world was born. With Christ the new era of the fulfilment of prophecy commenced. A marvellous amount there was in His person of the verification of the very letter of prophecy—partly that it might be seen how definitely all had pointed to Him; partly because His outward mission, up to the time of His death, was but to the lost sheep of the house of Israel, and the letter had not yet been finally superseded by the spirit. Yet the significance of such prophecies as Zech. ix. 9 could not be exhausted by the mere outward verification. (IMMANUEL.) Hence the entire absence from the N. T. of any recognition, by either Christ or His apostles, of such prospective outward glories as the prophecies, literally interpreted, would still have implied. The language of the ancient prophecies is everywhere applied to the gathering together, the privileges, and the triumphs of the universal body of Christ (Jn. x. 16, xi. 52; Acts ii. 39, xv. 15-17; Rom. ix. 25, 26, 32, 33, x. 11, 13, xi. 25-27; 2 Cor. vi. 16-18; Heb. xii. 22, &c.). Even apart, however, from the authoritative interpretation thus placed upon them, the prophecies contain within themselves, in sufficient measure, the evidence of their spiritual import (Is. ii. 2; Ez. xlvii.; Zech. xiv. 10, &c.). The substance of these prophecies is the glory of the Redeemer's

spiritual kingdom: the form is derived from the outward circumstances of the career of God's ancient people, which had passed, or all but passed, away before the fulfilment of the promised blessings commenced. Nor was even the form in which the announcement of the new blessings had been clothed to be rudely cast aside: the imagery of the prophets is on every account justly dear to us, and from love, no less than from habit, we still speak the language of Canaan. But then arises the question, Must not this language have been divinely designed from the first as the language of God's Church? The typical import of the Israelitish tabernacle and ritual worship is implied in Heb. ix. ("the Holy Ghost this signifying"), and is almost universally allowed; and it is not easy to tear asunder the events of Israel's history from the ceremonies of Israel's worship; nor, yet, again, the events of the preceding history of the patriarchs from those of the history of Israel. The N. T. itself implies the typical import of a large part of the O. T. narrative (1 Cor. x. xv. 27; Eph. v. 31, 32; Heb. ii. 8, iv. 4, vii., &c.). In the O. T. itself we have, and this even in the latest times, events and persons expressly treated as typical (Ps. cxviii. 22; Zech. iii., vi. 9 ff., &c.). A further testimony to the typical character of the history of the O. T. is furnished by the typical character of the events related even in the New. All our Lord's miracles were essentially typical. So, too, the outward fulfilments of prophecy in the Redeemer's life were types of the deeper though less immediately striking fulfilment which it was to continue to receive ideally. It is not unlikely that there is an unwillingness to recognize the spiritual element in the historical parts of the O. T., arising from the fear that the recognition of it may endanger that of the historical truth of the events recorded. Nor is such danger altogether visionary; for one-sided and prejudiced contemplation will be ever so abusing one element of Scripture as thereby to cast a slight upon the rest. But this does not affect its existence. Of another danger besetting the path of the spiritual interpreter of the O. T., we have a warning in the unedifying puerilities into which some have fallen. Against such he will guard by foregoing too curious a search for mere external resemblance between the O. T. and the N. T., though withal thankfully recognizing them wherever they present themselves. The spiritual interpretation must rest upon both the literal and the moral; and there can be no spiritual analogy between things which have naught morally in common. One consequence of this principle will of course be, that we must never be content to rest in any mere outward fulfilment of prophecy. However remarkable the outward fulfilment be, it must always guide us to some deeper analogy, in which a moral element is involved. Another consequence of the foregoing principle of interpretation will be that that which was forbidden or sinful cannot, so far as it was sinful, be regarded as typical of that which is free from sin, though it may have originated the occasion for the exhibition of some striking type (Mat. xii. 39, 40; compare Jon. i., &c.). So, again, that which was tolerated rather than approved may contain within itself the type of something imperfect, in contrast to that which is more perfect (Gal. v. 22 ff.; compare Gen. xvi., xxi., &c.).—C. *Quotations from the O. T. in the N. T.* These form one of the outward bonds of connection between the two parts of the Bible. They are manifold in kind. Some contain prophe-

cies or involve types of which the N. T. writers designed to indicate the fulfilment. Others are introduced as direct logical supports to the doctrines which they were enforcing. Often the N. T. writers have quoted the O. T. rather for illustration than for support, variously applying and adapting it, and making its language the vehicle of their own independent thoughts. It may not be easy to distribute all the quotations into their distinctive classes; but among those in which a prophetic or typical force is ascribed in the N. T. to the passage quoted, may fairly be reckoned all that are introduced by our Lord Himself and His companion apostles with an intimation that the Scripture was "fulfilled." In the quotations of all kinds from the O. T. in the N. T. we find a continual variation from the *letter* of the older Scriptures. To this variation three causes may have contributed:—First, all the N. T. writers quoted from the *SKRITAGINT*; correcting it, indeed, more or less by the Hebrew, especially when it was needful for their purpose; occasionally deserting it altogether; still abiding by it to so large an extent as to show that it was the primary source whence their quotations were drawn. Secondly, the N. T. writers must have frequently quoted from memory (so Mr. Thrupp; but see Jn. xiv. 26). (*INSPIRATION.*) Thirdly, combined with this, there was an alteration of conscious or unconscious design. Sometimes the object of this was to obtain increased force (Rom. xiv. 11; compare Is. xiv. 23, &c.). Sometimes an O. T. passage is abridged, and in the abridgment so adjusted, by a little alteration, as to present an aspect of completeness, and yet omit what is foreign to the immediate purpose (Acts i. 20; 1 Cor. i. 31). At other times a passage is enlarged by the incorporation of a passage from another source: thus in 1 K. iv. 18, 19, although the contents are professedly those read by our Lord from Is. lxi., we have the words "to set at liberty them that are bruised" introduced from Is. lvi. 6 (LXX.); similarly in Rom. xi. 8, Deut. xxix. 4 is combined with Is. xxix. 10. In some cases still greater liberty of alteration is assumed (Rom. x. 11; compare Is. xxviii. 16, xlix. 23, &c.). In some places, again, the actual words of the original are taken up, but employed with a new meaning (Heb. x. 37; compare Hab. ii. 3). Almost more remarkable than any alteration in the quotation itself, is the circumstance that in Mat. xxvii. 9, Jeremiah should be named as the author of a prophecy really delivered by ZECCHARIAH: the reason being that the prophecy is based upon that in Jer. xviii., xix., and that without a reference to this original source the most essential features of the fulfilment of Zechariah's prophecy would be misunderstood. The above examples will sufficiently illustrate the freedom with which the apostles and evangelists interwove the older Scriptures into their writings. It could only result in failure, were we to attempt any merely mechanical account of variations from the O. T. text which are essentially not mechanical. *PROPHET.*

*Ol'ive* (Heb. *zayith*; Gr. *elaia*). No tree is more closely associated with the history and civilization of man. Many of the Scriptural associations of the olive-tree are singularly poetical. Its foliage is the earliest that is mentioned by name, when the waters of the flood began to retire (Gen. viii. 11). It is also the most prominent tree in the earliest allegory (Judg. ix. 8, 9). With David it is the emblem of prosperity and the divine blessing (Ps. lii. 8, cxlviii. 3). So with the later prophets it is the

symbol of beauty, luxuriance, and strength; and hence the symbol of religious privileges (Jer. xi. 16; Hos. xiv. 6). We must bear in mind, in reading this imagery, that the olive was among the most abundant and characteristic vegetation of Judea. Thus after the Captivity, when the Israelites kept the Feast of Tabernacles, we find them, among other branches for the booths, bringing "olive-branches" from the "mount" (Neh. viii. 15). "The mount" is doubtless the famous Olivet, or Mount of Olives, the *Olivetum* of the Vulgate. (GETHSEMANE; OLIVES, MOUNT OR.) In Zech. iv. 3, 11-14, and Rev. xi. 3, 4, we find the olive-tree used as a representative or symbol of "the two anointed ones" and "the two witnesses." And in the argumentation of St. Paul concerning the relative positions of the Jews and Gentiles in the counsels of God, this tree supplies the basis of one of his most forcible allegories (Rom. xi. 16-25). The Gentiles are the "wild olive" grafted in upon the "good olive," to which once the Jews belonged, and with which they may again be incorporated. Perhaps the very stress of the allegory is that the grafting of a bad branch on a good stock is *contrary to nature*.—The olive-tree grows freely almost everywhere on the shores of the

Olive (*Olea Europaea*).—(Fbn.)

Mediterranean, but it was peculiarly abundant in Palestine (Deut. vi. 11, viii. 8, xxviii. 40). Olive-yards are a matter of course in descriptions of the country, like vineyards and corn-fields (Judg. xv. 5; 1 Sam. viii. 14). The kings had very extensive ones (1 Chr. xxvii. 28). Even now the tree is very abundant in the country. Almost every village has its olive-grove. Certain districts may be specified (near Jerusalem, Gaza, Shechem, Lebanon, &c.) where at various times this tree has been very luxuriant. The cultivation of the olive-tree had the closest connection with the domestic life of the Israelites (2 Chr. ii. 10), their trade (Ez. xxvii. 17; Hos. xii. 1), and even their public ceremonies and

religious worship. (ANOINTING; OIL.) The olive-wood is hard and solid, with a fine grain, and a pleasing yellowish tint. In Solomon's Temple the cherubim were "of olive-tree" (1 K. vi. 23), as also the doors (81, 32) and the posts (33). The berries (Jas. iii. 12; 2 Esd. xvi. 29), which produce the oil, were sometimes gathered by shaking the tree (Is. xxiv. 13), sometimes by beating it (Deut. xxiv. 20). Then followed the treading of the fruit (Deut. xxxiii. 24; Mic. vi. 15). Hence the mention of "oil-fats" (Joel ii. 24). The flowers are white and abundant, but the least ruffling of a breeze is apt to cause the flowers to fall (Job xv. 33). The fruit is not usually gathered till late in the autumn. (OIL.) The locust is noticed as a formidable enemy of the olive (Am. iv. 9). Not unfrequently hopes were disappointed, and "the labor of the olive failed" (Hab. iii. 17). The tree thrives best in warm and sunny situations. It is of a moderate height, with knotty gnarled trunks, and a smooth ash-colored bark. It grows slowly, but lives to an immense age. Its look is singularly indicative of tenacious vigor; and this is the force of what is said in Scripture of its "greenness," as emblematic of strength and prosperity. The leaves, too, are not deciduous. Those who see olives for the first time are occasionally disappointed by the dusty color of their foliage; but those who are familiar with them find an inexpressible charm in the rippling changes of their slender gray-green leaves.

**Olives, Mount of.** The exact expression "the Mount of Olives" occurs in the O. T. in Zech. xiv. 4 only; in the other places of the O. T. in which it is referred to, the form employed is the "ascent of the olives" (2 Sam. xv. 30, A. V. "the ascent of Mount Olivet"), or simply "the Mount" (Neh. viii. 15), "the mount facing Jerusalem" (1 K. xi. 7), or "the mountain which is on the east side of the city" (Ez. xi. 23). In the N. T. the usual form is "the Mount of Olives" (Gr. *oros tón elaión*; Mat. xxi. 1, &c.). In Acts i. 12 the A. V. has "the mount called Olivet" (Gr. *oros to kaloumenon elaiónos*). The Mount of Olives is the well-known eminence on the east of JERUSALEM, now usually called *Jebel el-Tûr* (Ar. = *mount of the summit*), sometimes *Jebel ez-Zeitûn* (Ar. = *mount of olives*), intimately connected with some of the gravest events of Biblical history; the scene of the flight of David and the triumphal progress of the Son of David, of the idolatry of Solomon, and the agony and betrayal of Christ. The position of the Mount of Olives may be amply settled by the account of David's flight, as related in 2 Sam. xv., with the elucidations of the LXX. and Josephus (*Ant.* vii. 9). David's object was to place the Jordan between himself and Absalom. He therefore flies by the road called "the road of the wilderness" (2 Sam. xv. 23). This leads him across the Kidron, past the well-known olive-tree (LXX.), which marked the path, up the toilsome ascent of the mount—elsewhere exactly described as facing Jerusalem on the east (1 K. xi. 7; Ez. xi. 23; Mk. xiii. 3)—to the summit, where was a consecrated spot at which he was accustomed to worship God. At this spot he again performed his devotions—it must have seemed for the last time—and took his farewell of the city, "with many tears, as one who had lost his kingdom." He then turned the summit, and after passing BETHANIM, continued the descent through the "dry and thirsty land" until he arrived "weary" at the bank of the river (Jos. vii. 9, §§ 2-6; 2 Sam. xvi. 14, xxvii. 21, 22). This is the earliest mention of the Mount of

Olives, and a complete introduction to it. The remaining references to it in the Old Testament are but slight. The "high places" which Solomon constructed for the gods of his numerous wives, were in the mount "facing Jerusalem" (1 K. xi. 7)—an

expression which applies to the Mount of Olives only, as indeed all commentators apply it. During the next four hundred years we have only the brief notice of Josiah's iconoclasm at this spot (2 K. xxiii. 13, 14). Another two hundred years and we

The Mount of Olives.—From Bartlett's *Walks about Jerusalem*.—(Fbn.)

find it the great repository for the vegetation of the district, planted thick with olive, and the bushy myrtle, and the feathery palm. "Go out" of the city "into the mount"—was the command of Ezra for the celebration of the first anniversary of the Feast of Tabernacles after the Return from Babylon—"and fetch olive-branches, and 'oil-tree'-branches, and myrtle-boughs, and palm-leaves, and branches of thick trees to make booths, as it is written" (Neh. viii. 15). The cultivated and umbrageous character implied in this description, as well as in the name of the mount, is retained till the N. T. times. At this point in the history it will be convenient to describe the situation and appearance of the Mount of Olives. It is not so much a "mount" as a ridge, of rather more than a mile in length, running in general direction N. and S.; covering the whole eastern side of the city. At its northern end the ridge bends round to the W., so as to form an enclosure to the city on that side also. But there is this difference, that whereas on the N. a space of nearly a mile of tolerably level surface intervenes between the walls of the city and the rising ground, on the E. the mount is close to the walls, parted only by that which from the city itself seems no parting at all—the narrow ravine of the Kidron. It is this portion which is the real Mount of Olives of the history. The northern part is, though geologically continuous, a distinct mountain. We will therefore confine ourselves to this portion. In general height it is not very much above the city: 300 feet higher than the Temple mount, nearly 200 above "Mount Zion." The word "ridge" is indeed hardly accurate. There is nothing "ridge-like" in the appearance of the Mount of Olives, or of any other of the limestone hills of this district of Palestine; all is rounded, swelling, and regular in form. At a distance its outline is almost horizontal, gradually sloping away at its southern end; but when seen from below the eastern wall of Jerusalem, it divides itself into three,

or rather perhaps four, independent summits or eminences. Proceeding from N. to S. these occur in the following order:—Galilee, or *Viri Galilæi*; Mount of the Ascension; Prophets, subordinate to the last, and almost a part of it; Mount of Offence. 1. Of these the central one, distinguished by the minaret and domes of the Church of the Ascension, and the hamlet (*Kefr et-Tûr*) of wretched hovels round it, is in every way the most important. Three paths lead from the valley to the summit. The first passes under the north wall of the enclosure of GETHSEMANE, and follows the line of the depression between the centre and the northern hill. The second parts from the first about fifty yards beyond Gethsemane, and striking off to the right up the very breast of the hill, surmounts the projection on which is the traditional spot of the Lamentation over Jerusalem, and thence proceeds directly upward to the village. The third leaves the other two at the N. E. corner of Gethsemane, and making a considerable detour to the south, visits the so-called "Tombs of the Prophets," and, following a very slight depression which occurs at that part of the mount, arrives in its turn at the village. Of these three paths the first, which follows the natural shape of the ground, is unquestionably older than the others, which deviate in pursuit of certain artificial objects. Every consideration favors its being the road taken by David in his flight. It is, with equal probability, that usually taken by our Lord and His disciples in their morning and evening transit between Jerusalem and BETHANY, and that also by which the apostles returned to Jerusalem after the Ascension. The central hill, which we are now considering, purports to contain the sites of some of the most sacred and impressive events of Christian history. During the middle ages most of these were protected by an edifice of some sort; and to judge from the reports of the early travellers, the mount must at one time have been thickly covered

with churches and convents. The majority of these sacred spots now command little or no attention; but three still remain, sufficiently sacred—if authentic—to consecrate any place. These are: (1.) Gethsemane, at the foot of the mount. (2.) The spot from which our Saviour ascended, on the summit. (3.) The place of the Lamentation of Christ over Jerusalem, half-way up. (1.) Of these, GETHSEMANE is the only one which has any claim to be authentic. (2.) The first person who attached the Ascension of Christ to the Mount of Olives seems to have been the Empress Helena (A. D. 325). Eusebius states that she erected, as a memorial of that event, a sacred house of assembly on the highest part of the mount, where there was a cave which a sure tradition testified to be that in which the Saviour had imparted mysteries to His disciples. But neither this account, nor that of the same author when the cave is again mentioned, does more than name the Mount of Olives, generally, as the place from which Christ ascended: they fix no definite spot thereon. It took nearly three centuries to harden and narrow this general recognition of the connection of the Mount of Olives with Christ, into an invention in contradiction of the Gospel narrative of the Ascension (Lk. xxiv. 50, 51). (3.) The traditional spot of the Lamentation over Jerusalem (Lk. xix. 41–44) is not more happily chosen than that of the Ascension. It is on a protuberance which projects from the slope of the breast of the hill, about 300 yards above Gethsemane. Stanley (pp. 187–190) shows that the road of our Lord's "Triumphal entry" must have been, not the short and steep path over the summit used by small parties of pedestrians, but the longer and easier route round the southern shoulder between the summit which contains the "the Tombs of the Prophets," and that called the "Mount of Offence;" this latter route presenting two views of Jerusalem, first, of the S. W. portion or Zion, from a point where the multitude shouted "Hosanna;" and, again, after an interval, of the Temple buildings, from a spot where Christ wept over the city. 2. We have spoken of the central and principal portion of the mount. Next to it, on the southern side, separated from it by a slight depression, up which the path mentioned above as the third takes its course, is a hill which appears neither to possess, nor to have possessed, any independent name. It is remarkable only for the fact that it contains the singular catacomb (see cut, under JEHOSEPHAT, VALLEY OF) known as the "Tombs of the Prophets," probably in allusion to the words of Christ (Mat. xxiii. 29). 3. The most southern portion of the Mount of Olives is that usually known as the "Mount of Offence," *L. Mons Offensionis*, though by the Arabs called *Baten el-Hawa* (= *the bag of the wind*). It rises next to that last mentioned; and in the hollow between the two, more marked than the depressions between the more northern portions, runs the road from Bethany, which was, without doubt, the road of Christ's entry to Jerusalem. The title "Mount of Offence," or "of Scandal," was bestowed on the supposition that it is the "Mount of Corruption" on which Solomon erected the high places for the gods of his foreign wives (2 K. xxiii. 13; 1 K. xi. 7). The southern summit is considerably lower than the centre one, and much more definitely separated from the surrounding portions of the mountain than the others are. It is also sterner and more repulsive in its form. On the steep ledges of its western face is the village of *Silwad*.

(SILWAM.) On a half-isolated spur or promontory on its eastern side is what Dr. Barclay and others regard as the site of ΒΕΤΘΡΑΓΕ. 4. The remaining summit is that on the N. of the "Mount of Ascension"—the *Karem es-Seyad* (Ar. = *Vineyard of the Sportsman*); or, as it is called by the modern Latin and Greek Christians, the *Viri Galilæi* (L. = *men of Galilee*; see below). This is a hill of exactly the same character as the Mount of the Ascension, and nearly its equal in height. The summits of the two are about 400 yards apart. It stands directly opposite the N. E. corner of Jerusalem, and is approached by the path between it and the Mount of Ascension, which strikes at the top into a cross-path leading to *el-'Isdwiye* (Gebim or Nob?) and *'Anata* (Anathoth). The Arabic name well reflects the fruitful character of the hill, on which there are several vineyards, besides much cultivation of other kinds. The Christian name is due to the singular tradition, that here the two angels addressed the apostles after our Lord's ascension—"Ye men of Galilee!" This idea, so incompatible, on account of the distance, even with the traditional spot of the Ascension, is of late existence and inexplicable origin. The presence of the crowd of churches and other edifices on traditional sacred spots must have rendered the Mount of Olives, during the early and middle ages of Christianity, entirely unlike what it was in the time of the Jewish kingdom or of our Lord. Except the high places on the summit, the only buildings then to be seen were probably the walls of the vineyards and gardens, and the towers and presses which were their invariable accompaniment. But though the churches are nearly all demolished, there must be a considerable difference between the aspect of the mountain now and in those days when it received its name from the abundance of its olive-groves. It does not now stand so preëminent in this respect among the hills in the neighborhood of Jerusalem. It is only in the deeper and more secluded slope leading up to the northern summit that these venerable trees spread into anything like a forest. The cedars, commemorated by the Talmud, and the date-palms implied in the name Bethany, have fared still worse: there is not one of either to be found within many miles. This change is no doubt due (so Mr. Grove, original author of this article) to natural causes, variations of climate, &c.; but the army of Titus are stated by Josephus to have stripped the country round Jerusalem of every stick or shrub for the banks constructed during the siege. Two religious ceremonies performed there must have done much to increase the numbers who resorted to the mount. The appearance of the new moon was probably watched for, certainly proclaimed, from the summit. The second ceremony referred to was burning the Red Heifer. (PURIFICATION.) This ceremonial was enacted on the central mount, and in a spot so carefully specified that it would seem not difficult to fix it. It was due E. of the sanctuary, and at such an elevation on the mount that the officiating priest, as he slew the animal and sprinkled her blood, could see the façade of the sanctuary through the E. gate of the Temple. To this spot a viaduct was constructed across the valley on a double row of arches, so as to raise it far above all possible proximity with graves or other defilements. It was probably demolished by the Jews themselves on the approach of Titus, or even earlier, when Pompey led his army by Jericho and over the Mount of Olives. This would account

satisfactorily for its not being alluded to by Josephus.

**Ol'-vet** (2 Sam. xv. 30; Acts i. 12), probably derived from the Vulgate (*L. olivetum* = a place planted with olives), in the latter of these two passages. OLIVES, MOUNT OF.

**O-lym'pas** (fr. Gr. = given by *Olympus* or by *heaven*), a Christian at Rome (Rom. xvi. 15), perhaps of the household of Philologus; according to Pseudo-Hippolytus, one of the seventy disciples (?), and a martyr at Rome (A. D. 69?).

**O-lym'pi-us** (L. fr. Gr. = *Olympian*, of [or from] *Olympus*), one of the chief epithets of the Greek deity Zeus (*JUPITER*), so called from Mount Olympus in Thessaly, the abode of the gods (2 Mc. vi. 2).

**Om-a-c'rus** = AMRAM of the sons of Bani (1 Esd. ix. 34; compare Ezr. x. 34).

**O'mar** (Heb. *eloquent, talkative?* Ges.; *mountaineer*, Fū.), son of Eliphaz the firstborn of Esau; a "duke" or phylarch of Edom (Gen. xxxvi. 11, 15; 1 Chr. i. 36). The name is supposed to survive in that of the tribe of *Amir* Arabs, east of the Jordan.

**O'me-ga**, or **O-me'ga** (Gr. = *great O*), the last letter of the Greek alphabet, as ALPHA is the first. It is used metaphorically to denote the end of any thing: "I am Alpha and Omega, the beginning and the ending . . . the first and the last" (Rev. i. 8, 11).

**O'mer** (Heb., literally a *heap*? a *handful*, Ges.). WEIGHTS AND MEASURES.

**Om'ri** (Heb. *pupil of Jehovah?* Ges.). 1. Originally "captain of the host" to Elah; afterward himself king of Israel, and founder of the third dynasty. When Elah was murdered by ZIMRI at Tirzah, Omri was engaged in the siege of Gibbethon, in Dan, which had been occupied by the Philistines. As soon as the army heard of Elah's death, they proclaimed Omri king. Thereupon he broke up the siege of Gibbethon, and attacked Tirzah, where Zimri was holding his court as king of Israel. The city was taken, and Zimri perished in the flames of the palace, after a reign of seven days. Omri, however, was not allowed to establish his dynasty without a struggle against Tibni, whom "half the people" (1 K. xvi. 21) desired to raise to the throne, and who was bravely assisted by his brother Joram (so LXX.). The civil war lasted four years (1 K. xvi. 15, 23). After the defeat and death of Tibni and Joram, Omri reigned six years in Tirzah; but at the end of that time he transferred his residence, probably from the proved inability of Tirzah to stand a siege, to the mountain *Skómérón* or SAMARIA, which he bought for two talents of silver from a rich man called Shemer. At Samaria Omri reigned for six years more. He seems to have been a vigorous and unscrupulous ruler, anxious to strengthen his dynasty by intercourse and alliances with foreign states. His dynasty (AHAB; AHAZIAH 1; JEHOHAM 1) occupied the throne of Israel about half a century. (BEN-HADAD; ISRAEL, KINGDOM OF; JEHU.) —2. A son of Becher the son of Benjamin (1 Chr. vii. 8). —3. A descendant of Pharez the son of Judah (ix. 4). —4. Son of Michael, and chief of Isachar in David's reign (xxvi. 18).

**On** (Heb. *ability, power, strength*, Ges., Fū.), son of Peleth; a Reubenite chief who took part with Korah, Dathan, and Abiram, in their revolt against Moses (Num. xvi. 1). His name does not again appear in the narrative of the conspiracy, nor is he alluded to when reference is made to the final catastrophe. There is a Rabbinical tradition that

he was prevailed upon by his wife to withdraw from his accomplices.

**On** (Heb. fr. Egyptian = *sun*, Cyril of Alexandria, Ges., Fū.; see below), a town of Lower Egypt, which is called in the Bible BETH-SHEMESH (Jer. xliii. 13), corresponding to the ancient Egyptian sacred name *hara* (= the abode of the sun), and On, corresponding to the common name *an*, and perhaps also spoken of as IR-HA-HERES. It is also known as Heliopolis (fr. Gr. *Héliopolis* = city of the sun). The ancient Egyptian common name is written *an*, or *an-t*, and perhaps *anu*; but the essential part of the word is *an*, and probably no more was pronounced. There were two towns called *an*: Heliopolis, distinguished as the northern, *an-mehet*; and Hermonthis, in Upper Egypt, as the southern, *an-res*. Heliopolis, or On, was on the E. side of the Pelusiac branch of the Nile, just below the point of the Delta, and about twenty miles N. E. of Memphis. It was before the Roman time the capital of the Heliopolite nome, which was included in Lower Egypt. Now its site is above the point of the Delta, which is the junction of the Phatmetic, or Damietta branch and the Bolbitine, or Rosetta, and about ten miles N. E. of Cairo. In the earliest times it must have been subject to the first dynasty (EGYPT) so long as their sole rule lasted, which was perhaps for no more than the reigns of Menes and Athothis (so Mr. R. S. Poole, original author of this article); it doubtless next came under the government of the Memphites, of the third, fourth, and sixth dynasties: it then passed into the hands of the Diospolites of the twelfth dynasty, and the Shepherds of the fifteenth. During the long period of anarchy that followed the rule of the twelfth dynasty, when Lower Egypt was subject to the Shepherd kings, Heliopolis must have been under the government of the strangers. With the accession of the eighteenth dynasty, it was probably recovered by the Egyptians, and thenceforward held by them. The chief object of worship at Heliopolis was the sun, under the forms *ra* (the sun simply), whence the sacred name of the place, *ha-ra* (the abode of the sun), and *atum* (the setting sun, or sun of the nether world). The temple of the sun, described by Strabo, is now only represented by the single beautiful obelisk, which is of red granite, sixty-eight feet two inches high above the pedestal, and bears a dedication, showing that it was sculptured in or after his thirtieth year (B. C. about 2050) by Sesertesen I., first king of the twelfth dynasty (B. C. about 2080-2045). Heliopolis was anciently famous for its learning, and Eudoxus and Plato studied under its priests; but, from the extent of the mounds, it seems to have been always a small town. The first mention of this place in the Bible is in the history of Joseph, to whom Pharaoh gave "to wife Asenath the daughter of Poti-pherah, priest of On" (Gen. xli. 45, 50, xlv. 20). According to the LXX., On was one of the cities built for Pharaoh by the oppressed Israelites, for it mentions three "strong cities" instead of the two "treasure cities" of the Hebrews, adding On to Pithom and Raamses. Heliopolis lay at no great distance from the land of Goshen and from Raamses, and probably Pithom also. Isaiah has been supposed to speak of On when he prophesies that one of the five cities in Egypt that should speak the language of Canaan should be called IR-HA-HERES, which may mean the City of the Sun, whether we take *heres* to be a Hebrew or an Egyptian word; but the reading "a city of destruction" seems preferable, and we

have no evidence that there was any large Jewish settlement at Heliopolis, although there may have been at one time, from its nearness to the town of Onias. (ONIAS, THE CITY OF.) Jeremiah (xliii. 13) speaks of On under the name Beth-shemesh (*the house of the sun*). Perhaps it was on account of the many false gods of Heliopolis, that, in Ez. xxx.

ter and fled to Rome, where in the midst of its vast population he could hope to be concealed, and to baffle the efforts often made in such cases for retaking the fugitive. Whether Onesimus had any other motive for the flight than the natural love of liberty, we have not the means of deciding. It has been very generally supposed that he had committed

Plain and Obelisk of Heliopolis or On.—(Fbn.)

17, On is written AVEN, by a change in the punctuation, and so = *vanity*, and especially the vanity of idolatry. After the age of the prophets we hear no more in Scripture of Heliopolis. Local tradition, however, points it out as a place where our Lord and the Virgin came, when Joseph brought them into Egypt, and a very ancient sycamore is shown as a tree beneath which they rested.

**Onam** (Heb. *strong, stout*, Ges.; *ability, power*, Fū.). 1. Son of Shobal the son of Seir (Gen. xxxvi. 23; 1 Chr. i. 40).—2. Son of Jerahmeel by his wife Atarah (ii. 26, 28).

**Onan** (Heb. = ONAM, Ges., Fū.), second son of Judah by the Canaanitess, "the daughter of Shua" (Gen. xxxviii. 4; 1 Chr. ii. 3). On the death of Er the first-born, it was Onan's duty to marry his brother's widow (TAMAR 1) and perpetuate his race (MARRIAGE, II. ii. 1); but he found means to prevent the consequences of marriage, and "what he did was evil in the eyes of Jehovah, and He slew him also," as He had slain his elder brother (Gen. xxxviii. 9). His death took place before Jacob's family went down into Egypt (xvi. 12; Num. xxvi. 13).

**Ones'i-mus** (L. fr. Gr. = *useful, profitable*, L. & S., Rbn. *N. T. Lex.*), the servant or slave in whose behalf Paul wrote the Epistle to PHILEMON. (PHILEMON, EPISTLE to.) He was a native, or certainly an inhabitant of Colosse, since Paul in writing to the Church there speaks of him (Col. iv. 9) as "one of you." Slaves were numerous in Phrygia, and "Phrygian" itself was almost = "slave." Onesimus was one of this unfortunate class of persons, as is evident both from the manifest implication in Phn. 16, and from the general tenor of the epistle (so Prof. Hackett, with commentators generally). (SERVANT; SLAVE.) The man escaped from his mas-

some offence, as theft or embezzlement, and feared the punishment of his guilt; but this is uncertain. Though it may be doubted whether Onesimus heard the Gospel for the first time at Rome, he was unquestionably led to embrace the Gospel there through the apostle's instrumentality (ver. 10). After his conversion, the most happy and friendly relations sprung up between the teacher and the disciple. The situation of the apostle as a captive and an indefatigable laborer for the promotion of the Gospel (Acts xxviii. 30, 31) must have made him keenly alive to the sympathies of Christian friendship and dependent upon others for various services of a personal nature, important to his efficiency as a minister of the Word. Onesimus ap-

pears to have supplied this twofold want in an eminent degree. Whether Paul desired his presence as a personal attendant or as a minister of the Gospel, is not certain from ver. 13 of the epistle. Little can be said of Onesimus except what we have in the *N. T.* Some of the later Fathers assert that he was set free and became bishop of Berea in Macedonia. The Onesimus mentioned by Ignatius as bishop of Ephesus is regarded by Prof. Hackett and others as a different person. Onesimus is said to have died as a martyr at Rome, under Nero.

**On-e-siph'o-rus** (L. fr. Gr. = *profit-bringing*, Rbn. *N. T. Lex.*) is named twice only in the *N. T.* In 2 Tim. i. 16-18 Paul mentions him in terms of grateful love, as having a noble courage and generosity in his behalf, amid his trials as a prisoner at Rome, when others from whom he expected better things had deserted him (compare iv. 16). In 2 Tim. iv. 19 he singles out "the household of Onesiphorus" as worthy of a special greeting. It has been made a question whether Onesiphorus was still living when 2 Timothy was written, because in both instances Paul speaks of "the house" or "household," and not separately of Onesiphorus himself. Prof. Hackett thinks it probable that other members of the family were also active Christians; and as Paul wished to remember them at the same time, he grouped them together (iv. 19), and thus delicately recognized the common merit, as a sort of family distinction. It is evident from 2 Tim. i. 18, that Onesiphorus had his home at Ephesus; but he himself may possibly have been with Paul at Rome when the latter wrote to Timothy. An uncertain tradition makes him Bishop of Corone in Messenia.

**On-i-a-res** [-reez] (Gr. fr. *Onia Areios* = *Arrus to Onias*), a name introduced into the Greek and

Syriac texts of 1 Mc. xii. 20 (19, A. V.) by a very old corruption. The true reading (see above) is given in the margin of the A. V. AREUS; ONIAS 2.

**O-ni'as** (Gr. fr. Heb. *oniyah* ? Wr.; *strength of Jehovah*, Walton's Polyglott), the name of five high-priests, of whom only two (1 and 3) are mentioned in the A. V., but an account of all is here given to prevent confusion.—1. Son and successor of Jaddua; entered on the office about the time of the death of Alexander the Great, and was high-priest about B. C. 330–309, or, according to Eusebius, 300. According to Josephus he was father of Simon the Just. (ECCLESIASTICUS § 4; SIMON 2.)—2. Son of Simon the Just. He was a minor at his father's death (about B. C. 290) and the high-priesthood was occupied in succession by his uncles Eleazar and Manasseh to his exclusion. He entered on the office at last about B. C. 240, and his neglect for several years to remit the annual tribute of twenty talents to Ptolemy Euergetes threatened to precipitate the rupture with Egypt, which afterward opened the way for Syrian oppression. Onias retained the high-priesthood till his death, about B. C. 226, when he was succeeded by his son Simon II.—3. Son of Simon II.; succeeded his father as high-priest, about B. C. 198. Seleucus Philopator was informed by Simon, governor of the Temple, of the riches contained in the sacred treasury, and attempted to seize them by force. At the prayer of Onias, according to 2 Mc. iii., the sacrilege was averted; but the high-priest was obliged to appeal to the king for support against the machinations of Simon. Not long afterward Seleucus died (B. C. 175), and Onias found himself supplanted in the favor of Antiochus Epiphanes by his brother JASON 4, who received the high-priesthood from the king. Jason, in turn, was displaced by his youngest brother (No. 4), who procured the murder of Onias (about B. C. 171). (ANDRONICUS 1; MENELAUS.) Mr. Westcott supposes him the Onias who wrote to AREUS the Spartan king (1 Mc. xii. 19 ff.). (GREECE; SPARTA.) How powerful an impression he made is seen from the account of the dream of Judas Maccabeus before his great victory (2 Mc. xv. 12–16).—4. Youngest brother of Onias III., bearing the same name, which he afterward exchanged for MENELAUS.—5. Son of Onias III.; sought a refuge in Egypt from the sedition and sacrilege which disgraced Jerusalem. The immediate occasion of his flight was the triumph of “the sons of Tobias,” gained by the interference of Antiochus Epiphanes. Onias, receiving the protection of Ptolemy Philometer, endeavored to give a unity to the Hellenistic Jews which seemed impossible for the Jews of Palestine. With this object he founded the temple at Leontopolis. (See the next article.)

**O-ni'as, the City of, the Region of O-ni'as**, the city in which stood the temple built by ONIAS 5, and the region of the Jewish settlements in Egypt. Ptolemy mentions the city as the capital of the Heliopolite nome. (ON.) In the spurious letters given by Josephus in the account of the foundation of the temple of Onias, it is made to have been at Leontopolis in the Heliopolite nome, and called a strong place of Bubastis. Leontopolis was not in the Heliopolite nome, but in Ptolemy's time was the capital of the Leontopolite, and the mention of it is altogether a blunder. There is probably also a confusion as to the city Bubastis. The site of the city of Onias is to be looked for in some one of those N. of Heliopolis which are called *Tel-el-Yahood* (the Mound of the Jews), or *Tel-el-Yahodeeyeh*

(the Jewish Mound). Sir Gardner Wilkinson thinks there is little doubt that it is one which stands in the cultivated land near *Shibbeen*, twelve miles a little E. of N. from Heliopolis. From the account of Josephus, and the name given to one of them, “the Camp of the Jews,” these settlements appear to have been of a half-military nature. The easternmost part of Lower Egypt was always chosen for great military settlements, in order to protect the country from the incursions of her enemies beyond that frontier. (SIN; TAHFANHES; ZOAN.) Probably the Jewish settlements were established for the same purpose (so Mr. R. S. Poole, original author of this article); but their history is very obscure. Both the Jews of Palestine and those of ALEXANDRIA must have looked on the worshippers at the temple of Onias as schismatics.

**On'ions** [un'yunz], the English equivalent of the Hebrew *bētsādīm*, which occurs only in Num. xi. 5, as one of the good things of Egypt of which the Israelites regretted the loss. The onion is a well-known bulbous plant, the *Allium Cepa* of botanists. Onions have been from time immemorial a favorite article of food among the Egyptians. The onions of Egypt are much milder in flavor and less pungent than those of this country.

**O'no** (Heb. *strong*, Ges.; *rich, gain-bringing*, Fii.), also written ONUS, a city of Benjamin, not in the catalogues of Joshua, but first found in 1 Chr. viii. 12, where Shamed or Shamer is said to have built Ono and Lon with their “daughter villages” (A. V. “towns”). The men of Lod, Hadid, and Ono (725 “children” in Ezr. ii. 33; 721 in Neh. vii. 37) returned from the Captivity with Zerubbabel. A plain (PLAIN 2) was attached to the town, and bore its name, “the plain of Ono” (Neh. vi. 2), perhaps identical with the “valley of craftsmen” (xi. 36). The Talmud makes it three miles from Lod (*Ludd*). The village of *Kefr 'Ana*, between four and five miles N. of *Ludd*, is suggested by Van de Velde as identical with Ono. Porter (in Kitto) approves this suggestion; Mr. Grove raises doubts from the orthography and the distance. Winer remarks that *Beit Unia* is more suitable in its orthography; but *Beit Unia* is nearly twenty miles E. from *Ludd*.

**O'nos** (fr. Gr.) = Ono (1 Esd. v. 22).

**On'y-cha** [on'e-ka] (fr. Gr. *onux*; Heb. *shēhēleth* or *shēcheleth*), according to many of the old versions, denotes the operculum (i. e. the horny lid which closes the aperture of the shell) of some species of *Strombus*, a genus of gasteropodous Mollusca. The Hebrew word occurs only in Ex. xxx. 34, as one of the ingredients of the sacred perfume. In Eccles. xxiv. 15, Wisdom is compared to the pleasant odor yielded by “galbanum, onyx and sweet storax.” There can be little doubt (so Mr. Houghton) that the *onux* (Gr. = *nail, or claw*) of the LXX. and of Dioscorides and the *onyx* of Pliny = the operculum of a *Strombus*, perhaps *Strombus lentiginosus*. The Arabs call the mollusk “the devil's claw” from its claw-shaped and serrated operculum. The *Unguis odoratus*, or *Blatta Byzantina*,—for under both these terms apparently the devil-claw is alluded to in old English writers on *Materia Medica*—has by some been supposed no longer to exist. Dr. Lister laments its loss, believing it to have been a good medicine “from its strong aromatic smell.” Bochart believes some kind of bdellium is intended. Duns (*Bib. Nat. Science*) supposes it some gum or resin, perhaps benzoin. Gosse (in Fbn.) suggests that all marine creatures except fishes with fins and scales were ex-

CLEAN, and could not have been touched by the priests or used in the sanctuary, and therefore concludes it was probably some gum-resin.

A *Strombus Diana*.

B The Operculum.

**Onyx** (L. fr. Gr., lit. = *nail* or *claw*; Heb. *shôham*). The A. V. uniformly renders the Hebrew *shôham* by "onyx;" the Vulgate too is consistent with itself, the *sardonys* (Job xxviii. 16) being merely a sort of *onyx*; but the testimonies of ancient interpreters generally are diverse and ambiguous. There is nothing in the contexts of the several passages (Gen. ii. 12; Ex. xxv. 7, xxviii. 9, 20, xxxv. 9, 27, xxxix. 6, 13; 1 Chr. xxix. 2; Job xxviii. 16; Ez. xxviii. 13) where the Hebrew term occurs to help us to determine its signification. Josephus expressly states that the shoulder-stones of the high-priest were formed of two large sardonyses, an onyx being, in his description, the second stone in the fourth row of the breastplate. Some (Bellermaun, Winer, Rosenmüller) believe the "BERYL" is intended. Other interpretations of *shôham* have been proposed, but all are mere conjectures. Mr. Houghton thinks the balance of authority is in favor of some sort of onyx. The onyx is a silicious gum, consisting of parallel layers of CHALCEDONY of different colors, as brown and white, &c. It has been much used for cameos. (SARDONYX.) The Hebrew *yahûlôm* (in A. V. "DIAMOND") is by several ancient versions translated "onyx;" and this is approved by Gesenius, Dr. W. L. Alexander (in Kitto), &c. As to the "onyx" of Eccles. xxiv. 15, see ONYCHA.

**Ophel** (Heb. *a hill*, Ges.; see below), a part of ancient JERUSALEM. The name is derived by the lexicographers from a root of similar sound, which has the force of a *swelling* or *tumor*. (EMERODS.) It does not come forward till a late period of O. T. history. Jotham built much "on the wall of Ophel" (2 Chr. xxvii. 3). Manasseh, among his other defensive works, "compassed about Ophel" (xxiii. 14). From the catalogue of Nehemiah's repairs to the wall of Jerusalem, it appears to have been near the "water-gate" (Neh. iii. 26) and the "great tower that lieth out" (ver. 27). Lastly, the former of these two passages, and Neh. xi. 21, show that Ophel was the residence of the NETHINIM. In the passages of his history parallel to those quoted above, Josephus either passes it over altogether, or else refers to it in merely general terms. But in his account of the last days of Jerusalem he mentions it four times as Ophla (Jos. B. J. ii. 17, § 9, v. 4, § 2, v. 6, § 1, vi. 6, § 3). From his references it appears that Ophel was outside the S. wall of the Temple, and that it lay between the central valley of the city, which debouches above the spring of Siloam on the one hand, and the E. portico of the

Temple on the other. Ophel, then, was the swelling declivity by which the Mount of the Temple slopes off on its southern side into the Valley of Hinnom—a long narrowish rounded spur or promontory, which intervenes between the mouth of the central valley of Jerusalem (the Tyropœon) and the Kidron, or Valley of Jehoshaphat. Half-way down it on its eastern face is the "Fount of the Virgin," so called; and at its foot the lower outlet of the same spring—the Pool of SILOAM. How much of this declivity was covered with the houses of the Nethinim, or with the suburb which would naturally gather round them, and where the "great tower" stood, we have not at present the means of ascertaining.

**O'phir** (Heb., see below). 1. The eleventh in order of the sons of JOKTAN, coming immediately after Sheba (Gen. x. 29; 1 Chr. i. 23). So many important names in the genealogical table in Gen. x.—e. g. Sidon, Canaan, Asshur, Aram (Syria), Mizraim (the two Egypts, Upper and Lower), Sheba, Caphtorim, and Philistim (the Philistines)—represent the name of some city, country, or people, that it is reasonable to infer the same in the case of all the names in the table (so Mr. Twisleton, original author of these two articles). But there is one marked peculiarity common to the sons of Joktan with the Canaanites alone, that precise geographical limits are assigned to their settlements. Thus it is said (ver. 29, 30) that the dwelling of the sons of Joktan was "from MESHA, as thou goest unto SEPHAR a mountain of the east." The peculiar wording of these geographical limits forbids the supposition that Mesha and Sefhar belonged to very distant countries, or were comparatively unknown; and as many of the sons of Joktan are by common consent admitted to represent settlements in ARABIA, it is an obvious inference that *all* the settlements corresponding to the names of the other sons are to be sought for in Arabia. Hence, as Ophir is one of those sons, it may be regarded as a fixed point in discussions concerning the place Ophir mentioned in the Book of Kings, that the author of Gen. x. regarded Ophir the son of Joktan as corresponding to some city, region, or tribe in Arabia.—*Etymology*. There is, seemingly, no sufficient reason to doubt that the word Ophir is Shemitic. Gesenius suggests that it means *a fruitful region*. Baron von Wrede made a small vocabulary of Hittaritic words in the vernacular tongue, and amongst these he gives *ofir* = *red*. Still it is unsafe to accept the use of a word of this kind on the authority of any one traveller, however accurate.—2. A seaport or region from which the Hebrews in the time of Solomon obtained gold, in vessels which went thither in conjunction with Tyrian ships from EZION-GEBER, near Elath, on that branch of the Red Sea now called the Gulf of 'Akabah. The gold was proverbial for its fineness, so that "gold of Ophir" is several times used as = *fine gold* (Ps. xlv. 10; Job xxviii. 16; Is. xiii. 12; 1 Chr. xxix. 4); and in Job xxii. 24 the word "Ophir" by itself = *gold of Ophir*, and *gold* generally. In addition to gold, the vessels brought from Ophir almug-wood and precious stones. The precise geographical situation of Ophir has long been a subject of doubt and discussion. Calmet regarded it as in Armenia; Sir Walter Raleigh thought it was one of the Molucca Islands; and Arias Montanus found it in Peru. The three opinions which have found supporters in our own time were formerly represented, amongst other writers, by Huet, Bruce, and the historian Robert-

son, who placed Ophir in Africa; by Vitringa and Reland, who placed it in India; and by Michaelis, Niebuhr the traveller, Gosselin, and Vincent, who placed it in Arabia. Of other distinguished geographical writers, Bochart admitted two Ophirs, one in Arabia and one in India, i. e. at Ceylon; while D'Anville, equally admitting two, placed one in Arabia and one in Africa. Sir J. Emerson Tennant adopts the opinion, sanctioned by Josephus, that Malacca was Ophir. But the two countries which have mostly divided the opinions of the learned have been India and Arabia. Among the moderns, Ritter, Ewald, Max Müller, &c., have favored India; Scetzen, Winer, Fürst, Knobel, Kalisch, Fairbairn, &c., have favored Arabia. In favor of Arabia, are these considerations:—(1.) Gen. x. 29 contains what is equivalent to an intimation that Ophir (see No. 1) was in Arabia. (2.) The names of three places in Arabia agree sufficiently with the word Ophir: viz. Aphar, now *Zafār* or *Saphar*, which was the metropolis of the Sabæans; Doffir, mentioned by Niebuhr the traveller, as a considerable town of Yemen; and *Zafar* or *Zafāri*, now *Dofar*, a city on the southern coast of Arabia. (3.) In antiquity, Arabia was represented as a country producing gold by four writers at least, viz. Agatharchides, Artemidorus (copied by Strabo), Diodorus Siculus, and Pliny the Elder. (4.) Eupolemus, a Greek historian, who lived before the Christian era, expressly states, as quoted by Eusebius, that Ophir was an island with gold-mines in the Erythrean Sea. (5.) On the supposition that, notwithstanding all the ancient authorities on the subject, gold really never existed either in Arabia, or in any island along its coasts, Ophir was an Arabian emporium, into which gold was brought as an article of commerce, and was exported into Judea.—The following considerations are urged in behalf of India: (1.) *Sofir* is the Coptic name for India; and *Sophir*, or *Sophira* is the word used for the place of Ophir by the LXX. and by Josephus. And Josephus positively states that it was a part of India, though he places it in the Golden Chersonese, which was the Malay peninsula. (2.) All the three imports from Ophir, gold, precious stones, and almug-wood, are essentially Indian. (3.) Assuming that the ivory, peacocks, and apes, brought to Ezion-geber once in three years by the navy of Tarshish (TARSHISH) and Hiram's navy (1 K. x. 22), were brought from Ophir, they also collectively point to India rather than Arabia. (4.) Two places in India agree to a certain extent in name with Ophir; one at the mouths of the Indus, where Indian writers placed a people named the *Abhira*, and the other, the *Sompara* of Ptolemy, the *Ouppara* of Arrian's Periplus, where the town of Goa is now situated.—The following pleas have been urged in behalf of Africa: (1.) Of the three countries, Africa, Arabia, and India, Africa is the only one containing districts which have supplied gold in any great quantity. (2.) On the E. coast of Africa, near Mozambique, there is a port called by the Arabians *Sofala*, which as the liquids *l* and *r* are easily interchanged, was probably the Ophir of the ancients. (3.) On the supposition that 1 K. x. 22 applies to Ophir, *Sofala* has still stronger claims in preference to India. Peacocks, indeed, would not have been brought from it; but the peacock is too delicate a bird for a long voyage in small vessels, and the Heb. *tuciyim* probably = *parrots*. (PEACOCKS.) Both ivory and apes might have been supplied in abundance from the district of which *Sofala* was the emporium. (4.) On the

same supposition respecting 1 K. x. 22, it can, according to the traveller Bruce, be proved by the laws of the monsoons in the Indian Ocean, that Ophir was at *Sofala*; inasmuch as the voyage to *Sofala* from Ezion-geber would have been performed exactly in three years. From the above statement it appears that the Bible in all its direct notices of Ophir as a place does not supply sufficient data for an independent opinion on this disputed point. The passages in the historical books which mention Ophir by name are only five (1 K. ix. 26–29, x. 11, xxii. 48; 2 Chr. viii. 18, ix. 10). In addition to these passages, the following verse has very frequently been referred to Ophir: “For the king (i. e. Solomon) had at sea a navy of Tarshish with the navy of Hiram: once in three years came the navy of Tarshish bringing gold and silver, ivory, and apes, and peacocks” (1 K. x. 22; comp. 2 Chr. ix. 21). But there is not sufficient evidence to show that the fleet mentioned in this verse was identical with the fleet mentioned in 1 K. ix. 26–29, x. 11, as bringing gold, almug-trees, and precious stones from Ophir; or, if so, that the fleet went *only* to Ophir. If the five passages above-mentioned are carefully examined, it will be seen that all the information given respecting Ophir is, that it was a place or region, accessible by sea from Ezion-geber on the Red Sea, from which imports of gold, almug-trees, and precious stones were brought back by the Tyrian and Hebrew sailors. Under these circumstances it is well to revert to Gen. x. It is reasonably certain that the author of that chapter regarded Ophir as the name of some city, region, or tribe in Arabia. And it is almost equally certain that the Ophir of Genesis is the Ophir of the Books of Kings and Chronicles. Hence the *burden of proof* lies on any one who denies Ophir to have been in Arabia. But all that can be advanced against Arabia falls very short of such proof. In weighing the evidence on this point, the assumption that ivory, peacocks, and apes were imported from Ophir must be dismissed from consideration. In one view of the subject, and accepting the statement in 2 Chr. ix. 21 that “the king's ships went to Tarshish,” they might have connection with TARSHISH; but they have a very slight bearing on the position of Ophir. Hence it is not here necessary to discuss the law of monsoons in the Indian Ocean. Moreover, the resemblance of names of places in India and Africa to Ophir, cannot reasonably be insisted on; for there is an equally great resemblance in the names of some places in Arabia. The name *Sofala*, indeed, is merely Ar. = Heb. *Shiphêlâh*, i. e. *plain* or *low country*. (PLAIN 6; SEPHELA.) Reland has shown that there is no proof of the use of *Sophir* as the Coptic word for Ophir except in late Coptic, and this may have come from the views represented in Josephus. Josephus cannot be compared in authority with Gen. x.; he differs from Eupolemus; and he appears inconsistent with himself, translating (Jos. ix. 1, § 4) the Ophir of 1 K. xxii. 49 and the Tarshish of 2 Chr. xx. 36 as *Pontus* and Thrace. Further, the objections based on the assertion that sandal-wood (assumed to be = almug-wood), precious stones, and gold, are not productions of Arabia, are not conclusive. (1.) In the Periplus attributed to Arrian, sandal-wood is mentioned as one of the imports into Omana, an emporium on the Persian Gulf; and therefore a sea-port would not necessarily be in India, because sandal-wood was obtained from it. But the suggestion that almug-wood = sandal-wood first came in the last century from Celsius, the

Swedish botanist, in his *Hierobotanicon*; who at the same time recounted thirteen meanings proposed by others. Since the time of Celsius, the meaning of *sandal-wood* has been defended by Sanscrit etymologies, but Mr. Twisleton regards the reasons adduced to show that sandal-wood = albug-wood as too weak to justify the founding of any argument upon them. (ALGUM-TREES.) (2.) Precious stones take up such little room, and can be so easily concealed, if necessary, and conveyed from place to place, that there is no difficulty in supposing they came from Ophir, simply as from an emporium, even admitting that there were no precious stones in Arabia. (3.) As to GOLD, far too great stress seems to have been laid on the negative fact that no gold nor trace of gold-mines has been discovered in Arabia. Sir Roderick Murchison and Sir Charles Lyell concur in stating that, although no rock is known to exist in Arabia from which gold is obtained at the present day, yet the peninsula has not undergone a sufficient geological examination to warrant the conclusion that gold did not exist there formerly or that it may not yet be discovered there. Under these circumstances there is no sufficient reason to reject the accounts of the ancient writers adduced as witnesses for the former existence of gold in Arabia; and certainly there is nothing to prevent Ophir having been an Arabian emporium for gold. The Periplus, attributed to Arrian, gives an account of several Arabian emporia: e. g. the Emporium Musa, only twelve days from *Aphar*, the metropolis of the Sabeans (see above); at the modern *Aden*; at *Zafâr* or *Zafâri* (SEPHAR), &c. There do not, however, appear to be sufficient data for determining in favor of any one emporium or of any one locality rather than another in Arabia as having been the Ophir of Solomon. Mr. Forster relies on an *Ofor* or *Ofir*, in Sale and D'Anville's maps, as the name of a city and district in the mountains of *Omân*; but he does not quote any ancient writer or modern traveller as an authority for the existence of such an *Ofir*. Niebuhr the traveller says that Ophir was probably the principal port of the kingdom of the Sabeans, that it was situated between *Aden* and *Dafar* (or *Zafar*), and that perhaps even it was *Cane*. Gosselin, on the other hand, thinks it was *Doffir*, the city of Yemen already adverted to. Dean Vincent agrees with Gosselin in confining Ophir to Sheba. On the whole, however, though there is reason to believe that Ophir was in Arabia, there does not seem to be adequate information to enable us to point out the precise locality which once bore that name. In conclusion, it may be observed that objections against Ophir being in Arabia, grounded on the fact that no gold has been discovered in Arabia in the present day, seem decisively answered by the parallel case of Sheba (Ps. lxxii. 15; Ez. xxvii. 22). Now, of two things one is true. Either the gold of Sheba and the precious stones sold to the Tyrians by the merchants of Sheba were the natural productions of Sheba, and in this case the assertion that Arabia did not produce gold falls to the ground; or the merchants of Sheba obtained precious stones and gold in such quantities by trade, that they became noted for supplying them to the Tyrians and Jews. Exactly similar remarks may apply to Ophir.

**Ophni** (Heb. *mouldy*, Ges.), a town of Benjamin, apparently in the northeastern portion of the tribe (Josh. xviii. 24 only). It is doubtless the Gophna of Josephus, a place which at the time of Vespasian's invasion was apparently second only to Jerusalem in importance (Jos. B. J. iii. 8, § 5), and which still

survives in the modern *Jifna* or *Jufna*, a village two and a half miles N. W. of Bethel.

**Ophrah** (Heb. *female fawn*, Ges.), the name of two places in central Palestine—1. In the tribe of Benjamin (Josh. xviii. 23). It appears to be mentioned again (1 Sam. xiii. 17) in describing the routes taken by the spoilers who issued from the Philistine camp at Michmash. Jerome places it five miles E. of Bethel. Dr. Robinson suggests its identity with *et-Taiyibeh*, a small village on the crown of a conical and very conspicuous hill, four miles E. N. E. of *Baitin* (Bethel). Stanley and Van de Velde accept this suggestion. In the absence of any similarity in the name, and of any more conclusive evidence, it is impossible absolutely to adopt this identification (so Mr. Grove, with Porter in Kitto). (APHEREMA; EPHRAIM 2, 3; EPHRAIM.)—2. More fully "Ophrah of the Abi-ezrites," the native place of GIDEON (Judg. vi. 11); the scene of his exploits against Baal (24); his residence after his accession to power (ix. 5), and the place of his burial in the family sepulchre (viii. 32). Here also he deposited the ephod made or enriched with Ishmaelite ornaments, which made it a place of pilgrimage and resort (27). The indications in the narrative of the position of Ophrah are but slight. It was probably in Manasseh (vi. 15), and not far from Shechem (ix. 1, 5). Van de Velde suggests a site called *Erfar*, about eight miles S. E. of *Nâbulus* (Shechem); and Schwarz "the village *Erafa*" (*Arrâbeh*), "N. of *Sânûr*" (BETHULIA). The former of them is altogether out of the territory of Manasseh. Of the latter, nothing either for or against can be said (so Mr. Grove).

**Oph'rah** (see above), son of Meonothai (1 Chr. iv. 14).

\* **Or**. Besides the common use of this word, to connect and mark an alternative, as in the phrases "bad or good" (Gen. xxiv. 50), "Paul, or Apollos, or Cephas" (1 Cor. iii. 22 f.), "we or an angel" (Gal. i. 8), &c., "or" is also used in the A. V. in the now obsolete sense of *ere* or *before* in the phrase "or ever" (Ps. xc. 2; Dan. vi. 24; Acts xxiii. 15, &c.).

\* **Or'a-cle** [-kl], the A. V. translation of—1. Heb. *dêbîr* = (so Ges.) the inner sanctuary of the TABERNACLE or TEMPLE, also called the "holy of holies" (1 K. vi. 5, 16 ff., vii. 49, viii. 6, 8; 2 Chr. iii. 16, iv. 20, v. 7, 9; Ps. xxviii. 2).—2. Heb. *dâbâr* once (2 Sam. xvi. 23, marg. "word"), usually and literally translated "word" (Gen. xv. 1, 4, xxiv. 30, 52, &c.), also "saying," "speech," &c.—3. Gr. *logion* = (so Rbn. N. T. Lex.) something uttered, e. g. from God, a divine communication, utterance, or oracle (Acts vii. 38; Rom. iii. 2; Heb. v. 12; 1 Pet. iv. 11). DIVINATION; IDOLATRY; INSPIRATION; MAGIC; PROPHET.

**Or'a-tor** (L. = a speaker, orator, pleader). 1. In Is. iii. 3, A. V. "eloquent orator," margin "skilful of speech" literally = *skilful in whisper*, or *incantation*. (DIVINATION.)—2. The title (Gr. *rhêtôr*) applied to TERTULLUS, who appeared as the advocate of the Jewish accusers of St. Paul before Felix (Acts xxiv. 1). TRIAL.

**Orchard**. GARDEN.

\* **Or-dain**, to (fr. L. *ordo* = order), the A. V. translation of—1. Heb. *yâsad* (1 Chr. ix. 22; Ps. viii. 2 [Heb. 3]; marg. in both "founded"), elsewhere translated "to found" (Ps. xxiv. 2; Is. xiv. 32, &c.), "lay the foundation" (1 K. xvi. 34; Ps. cii. 25 [Heb. 26], &c.), "establish" (Ps. lxxviii. 69; Hab. i. 12; marg. "founded" in both), "appoint" (Esth. i. 8), &c.—2. Heb. *cân* (Ps. viii. 3 [Heb. 4]), elsewhere translated "to establish" (Ex. xv. 17; Ps.

xcix. 4, &c.), or "stablish" (2 Sam. vii. 13, &c.), "prepare" (Ps. ix. 7 [Heb. 8], cvii. 36, &c.), "fashion" (Ps. cxix. 73, &c.), &c.—3. Chal. *mēndh* or *mēnd* (Dan. ii. 24), usually translated "to set" (Ezr. vii. 25, &c.), once "to number" (Dan. v. 26), also "MENE" (25).—4. Heb. *nāthan* (2 K. xiii. 5; Jer. i. 5, marg. "gave"), literally and usually "to give" (Gen. i. 2; iii. 6, 12, &c., &c.), sometimes "to put" (Ex. xxv. 16, 21, &c.), "appoint" (Ezr. viii. 20, &c.), "set" (Gen. ix. 13; Deut. i. 8, &c.), "deliver" (Judg. i. 2, ii. 23, &c.), &c.—5. Heb. *ʾamad* (2 Chr. xi. 15), elsewhere translated "to raise up" (Ex. ix. 16, marg. "made thee stand"), "make stand" (Ps. xxx. 7 [Heb. 8], &c.), "set" (2 Chr. xix. 5, 8, &c.), "appoint" (Neh. vi. 7, &c.), &c.—6. Heb. *ʾarach* (Ps. cxxxii. 17; Is. xxx. 33), elsewhere "to set in order" (Ex. xl. 4, &c.), "lay in order" (Lev. i. 7 ff., &c.), "prepare" (Num. xxiii. 4; Ps. xxiii. 5, &c.), "put in array" (2 Sam. x. 8 ff., &c.), "order" (Lev. xxiv. 3, 4, &c.), &c.—7. Heb. *pā'al* (Ps. vii. 13 [Heb. 14]), elsewhere literally "to make" (Ex. xv. 17; Prov. xvi. 4, &c.), "do" (Deut. xxxii. 27; Job xi. 8, &c.), "work" (Num. xxiii. 23, &c.), once "to commit" (Hos. vii. 1).—8. Heb. *kūm* (Esth. ix. 27), always translated "to stablish" (21), "confirm" (29, 31, 32, &c.), "enjoin" and "decree" (31), "strengthen" (Ps. cxix. 28), &c.—9. Heb. *sūm* or *sīm* (1 Chr. xvii. 9; Ps. lxxxi. 5 [Heb. 6]; Hab. i. 12), usually and literally "to put" (Gen. xxviii. 18, xl. 15, &c.), also "to set" (xxviii. 22; 1 K. ii. 15, &c.), "make" (Gen. xiii. 16, xiv. 9; Josh. vi. 18, &c.), "appoint" (Ex. xxi. 13; 2 K. x. 24, &c.), &c.—10. Heb. *shāphath* (Is. xxvi. 12), elsewhere "to set" (2 K. iv. 38; Ez. xxiv. 3), "bring" (Ps. xxii. 15 [Heb. 16]).—11. Heb. *ʾadāh* (Num. xxviii. 6; 1 K. xii. 32, 33), usually "to make" (Ex. xxxvi. 6 ff.; 1 K. xii. 31, &c.), or "do" (xxiii. 12, 24, &c.), also "to appoint," "prepare," "provide," &c.—12. Gr. *diatasso* (1 Cor. vii. 17, ix. 14; Gal. iii. 19) = *to arrange throughout, to dispose in order*, Rbn. *N. T. Lex.*; elsewhere translated "to command" (Mat. xi. 1; Lk. viii. 55, xvii. 9, 10; Acts xviii. 2, xxiii. 31, xxiv. 23), "appoint" (Lk. iii. 13; Acts vii. 44, xx. 13; Tit. i. 5), "set in order" (1 Cor. xi. 34), "give order" (xvi. 1).—13. Gr. *kathistēmi* (Tit. i. 5; Heb. v. 1, viii. 3) = *to set down, to set, to place*, Rbn. *N. T. Lex.*; usually translated "to make" (Mat. xxiv. 45, 47, xxv. 21, 23; Lk. xii. 14, 42, 44; Acts vii. 10, 27, 35; Rom. v. 19 [twice]; Heb. vii. 28; 2 Pet. i. 8), also once "to appoint" (Acts vi. 3), "to conduct" (xvii. 15), "to set" (Heb. ii. 7), "to be," i. e. *to be set, or to set one's self* (Jas. iii. 6, iv. 4).—14. Gr. *kataskewazo* (Heb. ix. 6) = *to prepare fully*, Rbn. *N. T. Lex.*; usually translated "to prepare" (Mat. xi. 10; Mk. i. 2; Lk. i. 17, vii. 27; Heb. xi. 7; 1 Pet. iii. 20), also "to build" (Heb. 3, 4 [twice]), "make" (ix. 2).—15. Gr. *krinō* (Acts xvi. 4) = *to separate, discriminate, select, hence to judge, decide, determine*, Rbn. *N. T. Lex.*; translated "to judge" more than eighty times in *N. T.* (Mat. vii. 1, 2 [twice each], &c.), also "to determine" (Acts iii. 13, xx. 16, xxvii. 1; 1 Cor. ii. 2; 2 Cor. ii. 1; Tit. iii. 12), "decree" (1 Cor. vii. 37), "think" (Acts xxvi. 8), "conclude" (xxi. 25), "my sentence is" (xv. 19), "to esteem" (Rom. xiv. 5 [twice]), "condemn" (Jn. iii. 17, 18; Acts xiii. 27; Rom. xiv. 22), "damn" (2 Th. ii. 12), "avenge" (Rev. xviii. 20), "sue at the law" (Mat. v. 40), "go to law" (1 Cor. vi. 1, 6), "call in question" (Acts xxiii. 6, xxiv. 21).—16. Gr. *horizō* (Acts x. 42, xvii. 31) = *to bound, mark out, limit, determine, appoint*, Rbn. *N. T. Lex.*; elsewhere "to determine" (Lk. xxii.

22; Acts xi. 29, xvii. 26), "determinate," i. e. *determined* (ii. 23), "to declare" (Rom. i. 4), "to limit" (Heb. iv. 7).—17. Gr. *poieō* (Mk. iii. 14) is translated "to make" more than 100 times in *N. T.* (Mat. iii. 3, iv. 19, &c.), and "to do" much oftener (v. 19, 44, 46, 47 [twice], &c.), all the various renderings (so Robinson) coming under one or the other of these two primary ones. Thus "to bring forth" (Mat. iii. 8, 10, &c.), "shoot out" (Mk. iv. 32), "cause" (Mat. v. 32, &c.), "yield" (Jas. iii. 12), "ordain," come under the meaning *to make* (comp. Mat. iv. 19; Mk. i. 17, &c.).—18. Gr. *proorizō* (1 Cor. ii. 7) = *to bound or limit beforehand, to predetermine*, Rbn. *N. T. Lex.* (compare No. 16 above); elsewhere translated "to determine before" (Acts iv. 28), "to predestinate" (Rom. viii. 29, 30; Eph. i. 5, 11).—19. Gr. *tasō* (Acts xiii. 48; Rom. xiii. 1) = *to order, set in order, arrange*, Rbn. *N. T. Lex.* (compare No. 12 above); elsewhere translated "to appoint" (Mat. xxviii. 16; Acts xxii. 10, xxviii. 23), "set" (Lk. vii. 8), "determine" (Acts xv. 2), "addict" (1 Cor. xvi. 15).—20. Gr. *tilhēmi* (Jn. xv. 16; 1 Tim. ii. 7) = *to set, put, place, lay*, Rbn. *N. T. Lex.*; usually translated "to put" (Mat. v. 15, &c.), or "lay" (xxvii. 60, &c.), also "to make" (xxii. 44, &c.), "appoint" (xxiv. 51; 2 Tim. i. 11, &c.), &c.—21. Gr. *cheirotoneō* (Acts xiv. 23) = *to stretch out the hand, to hold up the hand, as in voting, hence to vote by holding up the hand, in N. T. to choose by vote, to appoint*, Rbn. *N. T. Lex.*; also translated "to choose" (2 Cor. viii. 19).—22. Gr. *ginomai* (Acts i. 22, A. V. "be ordained to be") = *to begin to be, to come into existence, i. e. to arise, happen, become, or (in the aorist and perfect tenses) simply to be or exist*, Rbn. *N. T. Lex.* This verb occurs about 700 times in the *N. T.*, and is oftenest translated "to be done" (Mat. i. 22, vi. 10, &c.), "to come to pass" (vii. 28, ix. 10, &c.), "to be come" (viii. 16, xiv. 23, &c.), "to arise" (viii. 24, xiii. 21, &c.), "to be" (v. 45, vi. 16, &c.), "to be made" (iv. 3, xxiii. 15, &c.), "to become" (xiii. 22, 32, &c.).—23. Gr. *prographō* = *to write before, hence to announce, declare, set forth, prescribe, appoint*, Rbn. *N. T. Lex.* This verb occurs five times in *N. T.*, viz. twice in Rom. xv. 4, A. V. "were written aforetime were written;" Gal. iii. 1, A. V. "hath been evidently set forth;" Eph. iii. 3, A. V. "wrote afore;" Jude 4, A. V. "who were before ordained."—24. Gr. *proitoimazō* (Eph. ii. 10, A. V. "hath before ordained") = *to prepare beforehand, to appoint or ordain beforehand*, Rbn. *N. T. Lex.*; elsewhere only in Rom. ix. 23, A. V. "had afore prepared."—Three times also (2 Chr. xxiii. 18, xxix. 27; Rom. vii. 10) the word "ordained" in the A. V. has no Hebrew or Greek representative, and is therefore printed in italics.—It will be seen from the above that "to ordain" is used as the representative of many different Hebrew and Greek terms, and usually in a general sense (= *to order, constitute, appoint*), without involving any technical or ceremonial significance. APOSTLE; BISHOP; ELDER; LAW, &c.

#### \* Ordinance. LAW; LAW OF MOSES.

**O'reb** (Heb.), the *raven* or *crow*, the companion of ZEEB, the *wolf*. One of the chieftains of the Midianite host which invaded Israel, and was defeated and driven back by GIDEON. The title given to them (A. V. "princes") distinguishes them from Zebah and Zalmunna, the other two chieftains, who are called "kings," and were evidently superior in rank to Oreb and Zeeb. They were killed not by Gideon himself, or the people under his immediate conduct, but by the men of Ephraim, who rose at his entreaty and intercepted the flying horde at the fords of the

Jordan. This was the second Act of this great Tragedy. It is but slightly touched upon in the narrative of Judges, but the terms in which Isaiah (x. 26) refers to it are such as to imply that it was a truly awful slaughter. He places it in the same rank with the two most tremendous disasters recorded in the history of Israel—the destruction of the Egyptians in the Red Sea, and of the army of Sennacherib (comp. Ps. lxxxiii.). The slaughter was concentrated round the rock at which Oreb fell, and which was long known by his name (Judg. vii. 25; Is. x. 26).

**O'reb** (L.) = HOREB, i. e. Mount Horeb (2 Esd. ii. 33). SINAI.

**O'reb** (Heb. *raven*, Ges.), the **Rock**. The "raven's crag," the spot, E. of Jordan, at which the Midianite chieftain OREB, with thousands of his countrymen, fell by the hand of the Ephraimites, and which probably acquired its name therefrom (Judg. vii. 25; Is. x. 26). Perhaps the place called *Orbo*, said in the *Bereshith Rabba* to have been in the neighborhood of Beth-shean, may have some connection with it.

**O'ren** (Heb. *pine*, Ges.; "ASH," A. V.; *strength*, power, Fü.), a son of Jerahmeel the first-born of Hezron (1 Chr. ii. 25).

**Or'gan** (Gen. iv. 21; Job xxi. 12, xxx. 31; Ps. cl. 4). The Hebrew word *'ugáb* or *'uggáb*, thus rendered in our version, probably denotes a pipe or perforated wind-instrument, as the root of the word indicates. In Gen. iv. 21 it appears to be a general term for all wind-instruments. In Job xxi. 12 are enumerated the three kinds of musical instruments which are possible, under the general terms of the timbrel, harp, and *organ*. Our translators adopted "organ" from the Vulgate, which has uniformly *organum*, i. e. the double or multiple pipe. According to the Jewish interpreters, the Chaldee, and Jerome, it was the bagpipe (so Winer). (DULCIMER.) Joel Bril, Kitto, Prof. Lorimer (in Fairbairn), &c., identify it with the Pandean pipes, or syrinx, an instrument of unquestionably ancient origin, and common in the East, consisting of a combination of reed-pipes of different lengths and thicknesses. Russell describes those he met with in Aleppo as having from five to twenty-three reeds. MUSIC; MUSICAL INSTRUMENTS.

**O-ri'on** (Gr., a celebrated hunter in ancient heathen mythology, said to have been transported to heaven, where he gave name to a constellation). That the constellation known to the Hebrews by the name *csil* (Job ix. 9, xxxviii. 31; Am. v. 8) is the well-known equatorial constellation which the Greeks called *Orion*, and the Arabs "the giant," there seems little reason to doubt (so Mr. Wright, with Gesenius, Fürst, and most ancient interpreters). The "giant" of Oriental astronomy was NIMROD, the mighty hunter, who was fabled to have been bound in the sky for his impiety. The two dogs and the hare, which are among the constellations in the neighborhood of Orion, made his train complete. There is possibly an allusion to this belief in "the bands of *csil*" (Job xxxviii. 31). Some Jewish writers, the Rabbis Isaac Israel and Jonah among them, identified the Hebrew *csil* with the Arabic *sohail*, by which was understood either Sirius (the dog-star) or Canopus (a star in the constellation Argo, 52½° S. lat.). Mr. E. S. Poole (after Aben Ezra) regards *csil* as the constellation *Scorpio* (the *Scorpion*), or the bright star in it called Antares or *Cor Scorpionis* (the *Scorpion's heart*). ASTRONOMY.

**Or-na-ments, Per-son-al.** The number, variety,

and weight of the ornaments ordinarily worn upon the person form one of the characteristic features of Oriental costume, both in ancient and modern times. The monuments of ancient Egypt exhibit the hands of ladies loaded with rings, ear-rings of very great size, anklets, armlets, bracelets of the most varied character, richly ornamented necklaces, and chains of various kinds. There is sufficient evidence in the Bible that the inhabitants of Palestine were equally devoted to finery. Is. iii. 18–23 supplies us with a detailed description of the articles with which the luxurious women of that day were decorated, and the picture is filled up by incidental notices in other places (Is. 10; Jer. ii. 32; Hos. ii. 13; 1 Tim. ii. 9, 10, &c.). The notices in the early books of the Bible, imply the weight and abundance of the ornaments worn at that period. Eliezer decorated Rebekah with "a golden *nose-ring*" (A. V. "ear-ring") of half a shekel weight, and two bracelets for her hands of ten shekels weight of gold" (Gen. xxiv. 22); and he afterward added "*trinkets* of silver and *trinkets* of gold" (A. V. "jewels," ver. 53). Ear-rings were worn by Jacob's wives, apparently as charms, for they are mentioned in connection with idols:—"They gave unto Jacob all the strange gods, which were in their hand, and their ear-rings which were in their ears" (xxxv. 4). The ornaments worn by the patriarch Judah were a "signet" suspended by a *string* round the neck, and a "staff" (xxxviii. 18); the staff itself was probably ornamented. The ring is first noticed when Joseph was made ruler of Egypt: "Pharaoh took off his *signet-ring* from his hand and put it upon Joseph's hand, and put a gold chain about his neck" (xli. 42), the latter being probably a "simple gold chain in imitation of string, to which a stone scarabæus (*a beetle*, a sacred insect), set in the same precious metal, was appended" (Wilkinson, ii. 339). The number of personal ornaments worn by the Egyptians, particularly by the females, is incidentally noticed in Ex. iii. 22 (compare xi. 2). The golden ear-rings worn by the "wives, sons, and daughters" of the Israelites furnished gold for the golden calf (xxxii. 2 ff.). Both men and women contributed for the work of the Tabernacle "bracelets, and ear-rings, and rings, and tablets, all jewels of gold" (xxxv. 22). The profusion of these ornaments was such as to supply sufficient gold for making the sacred utensils for the Tabernacle, while the laver of brass was constructed out of the brazen *mirrors* which the women carried about with them (Ex. xxxviii. 8). The Midianites appear to have been as prodigal as the Egyptians in the use of ornaments (Num. xxxi. 50, 52; Judg. viii. 26). The poetical portions of the O. T. contain numerous references to the ornaments worn by the Israelites in the time of their highest prosperity. The appearance of the bride is thus described in Cant. i. 10, 11:—"Thy cheeks are comely with rows of *jewels* (with beads, so Mr. Bevan; with rows or strings of pearls, or beads of gold or silver, so Gesenius; with rows of pearls, so Fürst), thy neck with chains of *gold* (with perforated [pearls], so Mr. Bevan; with strings of pearls, gems, corals, &c., or necklaces, so Gesenius, Fürst); we will make thee borders (same Hebrew word as is translated above 'rows of *jewels*' in A. V. and 'beads' by Mr. Bevan) of gold with studs of silver." Her neck rising tall and stately "like the tower of David builded for an armory," was decorated with various ornaments hanging like the "thousand bucklers, all shields of mighty men," on the walls of the armory (Cant. iv. 4); her hair falling gracefully over her neck is de-

scribed figuratively as a "chain" (iv. 9): and "the roundings" (not as in the A. V. "the joints") of her thighs are likened to the *pendant* of an ear-ring, which tapers gradually downward (vii. 1). So again we read of the bridegroom:—"his eyes are . . . fitly set," as though they were gems filling the sockets of rings (v. 12): "his hands (are as) gold rings set with the BERYL," i. e. the fingers when curved are like gold rings, and the nails dyed with henna resemble gems. Lastly, the yearning after close affection is expressed thus:—"Set me as a seal upon thine heart, as a seal upon thine arm" (viii. 6). Of the terms used in the Proverbs Mr. Bevan (after Gesenius) explains the "ornament" of the A. V. in i. 9, iv. 9, as more specifically a *wreath* or *garland*; the "chains" of i. 9 as the *drops* of which the necklace was formed; the "jewel of gold in a swine's snout" of xi. 22 as a *nose-ring*; the "jewel" of xx. 15 as a *trinket*, and the "ornament" of xxv. 12 as an *ear-pendant*. He also explains Is. iii. 18-23, already referred to, thus:—(18) "In that day the Lord will take away the bravery of their *anklets* and their *lace caps*, and their *necklaces*; (19) the *ear-pendants*, and the *bracelets*, and the *light veils*; (20) the *turbans*, and the *step-chains*, and the *girdles*, and the *scent-bottles*, and the *amulets*; (21) the rings and the *nose-rings*; (22) the *state-dresses* and the *cloaks*, and the *shawls*, and the *purses*; (23) the *mirrors*, and the fine linen *shirts*, and the *turbans*, and the *light dresses*." AMULETS; ANKLET; ARMLET; BRACELET; CHAIN; CROWN; DRESS; EAR-RINGS; GIRDLE; GOLD; HAIR; HANDICRAFT; HEAD-DRESS; MIRROR; NOSE-JEWEL; PAINT; PEARL; RING; SEAL; SIGNET; STONES, PRECIOUS; TABLETS, &c.

**Or'nan** (Heb. *active, nimble*, Ges.; *strong one, hero*, Fu.) = ARAUNA the Jebusite (1 Chr. xxi. 15, 18, 20-25, 28; 2 Chr. iii. 1).

**Or'pah** (Heb. *mane, forelock*, or (so Sim.) = OPHRAH, Ges.), a Moabite woman, wife of Chilion son of Naomi, and thereby sister-in-law to RUTH. On the death of their husbands Orpah accompanied her sister-in-law and her mother-in-law on the road toward Bethlehem. But her resolution failed her. At Naomi's suggestion, "Orpah kissed her mother-in-law," and went back "to her people and to her gods" (Ru. i. 4, 14).

\* **Or'phan**. ALMS; CHILD; HEIR; LAW OF MOSES; WIDOW.

**Or-tho'si-as** (Gr. *straight, made straight*, Walton's Polyglott; rather, fr. Phœnician = *light of uprightness* or *of wisdom*, Wr.). Tryphon, when besieged by Antiochus Sidetes in Dora, fled by ship to Orthosias (1 Mc. xv. 37). Orthosias is described by Pliny (v. 17) as N. of Tripolis, and S. of the river Eleutherus, near which it was situated (Str. xvi. p. 753). It was the northern boundary of Phœnicia, 1,130 stadia from the Orontes (id. p. 760). Shaw identifies the Eleutherus with the modern *Nahr el-Bārid*, on the north bank of which, corresponding to the description of Strabo, he found "ruins of a considerable city, whose adjacent district pays yearly to the Pashas of Tripolis a tax of fifty dollars by the name of *Or-tosa*." Dr. Robinson also, who, with Mr. Porter, identifies the Eleutherus with the modern *Nahr el-Kebir*, regards these ruins as the site of the ancient Orthosias. They are on the Mediterranean coast in N. lat. 34½° (Rbn. iii. 582).

**O-sal-as** [-za yas] (Gr.), a corruption of JESHAIAH (1 Esd. viii. 48).

**O-se'a** = HOSHEA, king of Israel (2 Esd. xiii. 40).

**O-se-as** = the Prophet HOSEA (2 Esd. i. 39).

\* **O-se'e** (Gr.) = HOSEA the prophet (Rom. ix. 25).

**O-she'a** (fr. Heb.) = HOSHEA, the original name of JOSHUA the son of Nun (Num. xiii. 8, 16).

**Os'pray**, or **Os'prey** (Heb. *ozniyāh*; Gr. *haliaetus*; L. *haliaetus*). The Hebrew word occurs only in Lev. xi. 13, and Deut. xiv. 12, as the name of some unclean bird which the law of Moses disallowed as food to the Israelites. The English "ospray" is a corruption of "OSSIFRAGE." The old versions and many commentators favor the A. V. interpretation. There is, however, some difficulty in identifying the *haliaetus* of Aristotle and Pliny, on account of some statements these writers make with respect to the habits of this bird. The general description they give would suit either the ospray (*Pandion Haliaetus*).

Ospray (*Pandion Haliaetus*).

*tus*) or the white-tailed eagle (*Haliaetus albicilla*). But Pliny's description (x. 3) points to the ospray, which is a powerful bird of prey, often weighing five pounds, and is known as the fishing eagle, bald buzzard, fish-hawk, &c. The ospray often plunges entirely under the water in pursuit of fish. It belongs to the *Falconidae*, or falcon family (genus *Falco* of Linnæus). It has a wide geographical range in Europe, North America, &c., and is occasionally seen in Egypt.

**Os'si-frage** (fr. L. = *bone-breaker*; Heb. *peres*; Gr. *grups*; L. *gryps*). There is much to be said in

Lammergeyer (*Gypaetus barbatus*) — "Ossifrage" of A. V.

favor of this translation of the A. V. The word occurs, as the name of an unclean bird, in Lev. xi. 13, and Deut. xiv. 12. If much weight is to be allowed to etymology, the Heb. *peres* (= breaker) may well be represented by the ossifrage, or bone-breaker (*Gypaëtus barbatus*), known as the *Lammergeyer*, or bearded vulture, one of the largest of the birds of prey. This formidable bird attacks the wild goat, young deer, sheep, calves, &c. It is found in the highest mountains of Europe, Asia, and Africa, and is not uncommon in the East. The English word ossifrage has been applied to some of the *Falconidae* or falcon family, as the young of the sea-eagle or white-tailed eagle, *Haliaeetus albicilla*; but the ossifraga of the Latins evidently points to the *Lammergeyer*, one of the *Vulturidae* or vulture family. OSPRAY.

**Ostrich.** There can be no doubt (so Mr. Houghton) that the Hebrew words *bath hayya'andh*, *ya'en*, and *rändn*, denote this bird of the desert.—1. *Bath hayya'andh* occurs in Lev. xi. 16 and Deut. xiv. 15, in the list of unclean birds; also in Job xxx. 29; Is. xiii. 21, xxxiv. 13, xliii. 20; Jer. l. 39; Mic. i. 8. The A. V. erroneously renders the Hebrew expression, which signifies *daughter of greediness* or *daughter of shouting*, by "owl," or, as in the margin, by "daughter of owl." In Job xxx. 29, and in Is. xxxiv. 13, and xliii. 20, the margin of the A. V. correctly reads "ostriches." Bochart considers that *bath hayya'andh* denotes the female ostrich only, and that *tahmds* or *tachmds*, the following word in the Hebrew text, is to be restricted to the male bird. In all probability, however, this latter word is intended to signify a bird of another genus. (NIGHT-HAWK.) The loud crying of the ostrich seems to be referred to in Mic. i. 8.—2. *Ya'en* occurs only in the plural, *ye'enim*, A. V. "ostriches," in Lam. iv. 3, where the context shows that the ostrich is intended.—3. *Rändn*. The plural *rändnim* alone occurs in Job xxxix. 13; where, however, it is clear from the whole passage (ver. 13–18) that ostriches are intended by the word. The Hebrew of ver. 13 is: *Cenäph-rändnim ne'eläsah; im-ehrah häsidah* (or *chäsidah*) *vëndsäb*; the A. V. translates "*Gavest thou the goodly wings unto the peacocks? or wings and feathers unto the ostrich?*" in the margin, "or, the feathers of the stork and ostrich." Here *vëndnim* appears to be translated "peacocks" (PEACOCK), while "ostrich" in the A. V. margin appears to answer to *nölsah* (elsewhere rendered "feathers"), and "ostrich" in the A. V. text seems to be the translation of *häsidah* or *chäsidah* (elsewhere translated "STORK"). This verse has been translated more than twenty different ways, and the exact meaning is doubtful. Rosenmüller translates, "The wing of the ostrich exults: truly its wing and plumage is like the stork's." Gesenius (and with him Fürst, in substance) renders, "The wing of the ostrich exults: but are her pinions and feathers pious?" i. e. is she affectionate toward her young like the stork? Mr. Barnes (*on Job*, l. c.) would render, "A wing of exulting fowls moves joyfully! Is it the wing and plumage of the pious bird?"—The ostrich (*Struthio Camelus* of naturalists) is a native of Africa and of the Arabian and Syrian deserts. Ostriches are polygamous: the hens lay their eggs promiscuously in one nest, which is merely a hole scratched in the sand; the eggs are then covered over to the depth of about a foot, and are, in the case of those birds which are found within the tropics, generally left for the greater part of the day to the heat of the sun, the parent-birds taking their turns at incubation during

the night. But in those countries which have not a tropical sun, ostriches frequently incubate during the day, the male taking his turn at night, and watching over the eggs with great care and affection, as is evidenced by the fact that jackals and other of the smaller carnivorous quadrupeds are occasionally found dead near the nest, having been killed by the

Ostrich.

ostrich in defence of the eggs or young. The habit of the ostrich leaving its eggs to be matured by the sun's heat is usually appealed to in order to confirm the Scriptural account, "she leaveth her eggs to the earth;" but this is probably the case only with the tropical birds. And even if the Hebrews were acquainted with the habits of the tropical ostriches, how can it be said that "she forgetteth that the foot may crush" the eggs, when they are covered a foot deep or more in sand? Mr. Houghton believes the true explanation of this passage to be found in the fact that the ostrich deposits some of her eggs not in the nest, but around it; these lie about on the surface of the sand, to all appearance forsaken; they are, however, designed for the nourishment of the young birds. Dr. Shaw (*Travels in Barbary*) states that "upon the least distant noise or trivial occasion, she forsakes her eggs or her young ones, to which, perhaps, she never returns; or, if she does, it may be too late, either to restore life to the one, or to preserve the life of the others. . . . The Arabs meet sometimes with whole nests of these eggs undisturbed, some of which are sweet and good, others addled and corrupted; others again have their young ones of different growths according to the time, it may be presumed, they have been forsaken by the dam. They oftener meet a few of the little ones, no bigger than well-grown pullets, half-starved, straggling and moaning about, like so many distressed orphans, for their mother." The Arabs have a proverb, "Stupid as an ostrich." But travellers have frequently testified to its sagacity. "So wary is the bird," says Mr. Tristram, "and so open are the vast plains over which it roams, that no ambuscades or artifices can be employed, and the vulgar resource of dogged perseverance is the only mode of pursuit." The ostrich lives on vegetable food, especially seeds and grain; but it swallows greedily stones, iron, copper, glass, wood, hair, leather, &c., and its indiscriminating

voracity not unfrequently causes its death. In this respect it may be regarded as "stupid." The ostrich makes a doleful and hideous noise, which sometimes closely resembles the roar of a lion. The ostrich is the largest of all known birds, and perhaps the swiftest of all cursorial animals. It attains a height of from 7 to 11 feet. Its speed has been calculated by Dr. Livingstone at 26 miles an hour. Its pace, ordinarily from 20 to 26 inches, becomes, when terrified,  $11\frac{1}{2}$  to 13, or even 14 feet in length. Its strength is enormous. Its wings, useless for flight, are extended when the bird is pursued, and act then as sails before the wind. The feathers so much prized are the long white plumes of the wings. The best come to us from Barbary and the W. coast of Africa. BEAST 5; OCHIM.

**Oth'ni** (Heb. *lion of Jehovah*, Ges.), a Levite, son of Shemaiah, the first-born of Obed-edom (1 Chr. xxvi. 7).

**Oth'ni-el** (Heb. *lion of God*), son of Kenaz, and younger brother of CALEB 1 (Josh. xv 17; Judg. i. 13, iii. 9; 1 Chr. iv. 13). But these passages all leave it doubtful whether Kenaz was his father, or, as is more probable, the more remote ancestor and head of the tribe, whose descendants were called Kenezites (Num. xxxii. 12, &c.), or sons of Kenaz. If Jephunneh was Caleb's father, then, probably, he was father of Othniel also. The first mention of Othniel is on occasion of the taking of Kirjath-sepher, or DEBIR. Debir was included in the mountainous territory near Hebron, in Judah, assigned to Caleb the Kenezite (Josh. xiv. 12, 14); and to stimulate the valor of the assailants, Caleb promised to give his daughter Achsah to whosoever should assault and take the city. Othniel won the prize. The next mention of him is in Judg. iii. 9, as the first judge of Israel after the death of Joshua, and their deliverer from the oppression of Chushan-rishathaim. This, with his genealogy (1 Chr. iv. 13, 14), which assigns him a son, Hathath, is all that we know of Othniel. But two questions of some interest arise concerning him; the one his exact relationship to Caleb, the other the time and duration of his judgeship.—(1.) As regards his relationship to Caleb, the doubt arises from the uncertainty whether the words in Judg. iii. 9, "Othniel the son of Kenaz, Caleb's younger brother," indicate that Othniel himself, or that Kenaz, was the brother of Caleb. The most natural rendering makes Othniel to be Caleb's brother (so Lord A. C. Hervey, with the Vulgate, Kittó, Winer, Rosenmüller, Keil, &c.). But Bush, Fairbairn, Ayre, &c., with the LXX., regard Othniel as nephew of Caleb.—(2.) And this leads to the second question suggested above, viz. the time of Othniel's judgeship. Supposing Caleb to be about the same age as Joshua, we should have to reckon about 25 years from Othniel's marriage with Achsah till the death of Joshua at the age of 110 years ( $85 + 25 = 110$ ). And if we take Africanus's allowance of 30 years for the elders after Joshua, in whose lifetime "the people served the Lord" (Judg. ii. 7), and then allow 8 years for Chushan-rishathaim's dominion, and 40 years of rest under Othniel's judgeship, and suppose Othniel to have been 40 years old at his marriage, we obtain ( $40 + 25 + 30 + 8 + 40 =$ ) 143 years as Othniel's age at his death. This, we are quite sure, cannot be right. Nor does any escape from the difficulty very readily offer itself. If we judge only by ordinary probabilities, we shall suppose Othniel to have survived Joshua not more than 20,

or at the outside, 30 years (so Lord A. C. Hervey, original author of this article). The chronological difficulties are, however, mitigated essentially by the view that Othniel was Caleb's nephew. JUDGE; JUDGES.

**Oth-o-ni'as** (Gr.) = MATTANIAH in Ezr. x. 27 (1 Esd. ix. 28).

**Ov'en** [uv'n] (Heb. *tannûr*; Gr. *klibanos*). The Eastern oven is of two kinds—fixed and portable. The former is found only in towns, where regular bakers are employed (Hos. vii. 4). The latter is adapted to the nomad state, and is the article generally intended by the Hebrew *tannûr*. It consists of a large jar made of clay, about three feet high, and widening toward the bottom, with a hole for the extraction of the ashes. Each household possessed such an article (Ex. viii. 3); and it was only in times of extreme dearth that the same oven sufficed for several families (Lev. xxvi. 26). It was heated with dry twigs and "GRASS" (Mat. vi. 30), or wood (1 K. xvii. 12; Is. xlv. 15; Jer. vii. 18), sometimes with DUNG; and the loaves were placed both inside and outside of it. BREAD; COAL; FIRE; FURNACE; HANDICRAFT; HEARTH; HOUSE.

**Owl**, the representative in the A. V. of—1. Heb. *bath hayya'andh*. (OSTRICH.)—2. Heb. *yanshûph*, or *yanshûph*, the name of some unclean bird in Lev. xi. 17 and Deut. xiv. 16, mentioned also in Is. xxxiv. 11 as one of the birds of desolate Edom. The A. V. translates *yanshûph* by "owl" or "great owl." The Chaldee and Syriac (with Bochart) favor some kind of owl; and perhaps the etymology of the

Egyptian Ibis (*Ibis religiosa*).

word points to a nocturnal bird. The LXX. and Vulgate read *ibis*, i. e. the *Ibis religiosa*, the sacred bird of Egypt. On the whole, the evidence is inconclusive, though it is in favor of the *Ibis religiosa*, and probably the other Egyptian species (*Ibis falcinellus*) may be included under the term. The ibis is an aquatic bird allied to the curlews.—3. Heb. *côs*, an unclean bird (Lev. xi. 17; Deut. xiv. 16; Ps. cii. 6). There is good reason for believing that the A. V. is correct in its rendering of "owl" or "little owl." Most of the old versions and paraphrases favor some species of "owl" as the proper translation of *côs*; Bochart is inclined to think that we should understand the PELICAN. But the ancient versions are against this theory. The passage in Ps. cii. 6 points decidedly to some kind of owl (so Mr. Houghton). The LXX. translate the Hebrew

by *nuktikorax*, which doubtless = the different species of *horned owl*, known in Egypt and Palestine. The *Otus Ascalaphus*, here figured, abounds in the

Eagle-Owl of Palestine (*Otus Ascalaphus*).

ruins of Thebes, &c.; it is the great owl of all Eastern ruins, and the Egyptian and Asiatic representative of the great horned owl of England (*Bubo maximus*). An allied species, the long-eared owl (*Otus vulgaris*), is the most abundant of the owls in Southern Europe and the Levant (so Gosse, in Fairbairn).—4. Heb. *kippōz*, only in Is. xxxiv. 15: "There (i. e. in Edom) shall the *kippōz* (A. V. 'great owl') make her nest, and lay, and hatch, and gather under her shadow." It is a hopeless affair to attempt to identify the animal denoted by this word; the LXX. and Vulgate give "hedgehog." We cannot think, with Bochart, Gesenius, Fürst, Rosenmüller, &c., that a darting serpent is

*Athene meridionalis*.

intended, for the whole context (Is. xxxiv. 15) seems to point to some *bird*. We are content to believe that *kippōz* may denote some species of owl, and to retain the reading of the A. V. till other evidence be forthcoming (so Mr. Houghton, Mr. Gosse, in Fairbairn, &c.). The cut represents the *Athene meridionalis*, the commonest owl in Palestine.—5. Heb. *lilith*. The A. V. renders this word by "screech

owl" in the text of Is. xxxiv. 14, and by "night-monster" in the margin. Most modern interpreters (so Dr. W. L. Alexander, in Kitto) adopt the rendering "screech-owl." According to the Rabbins the *lilith* was a nocturnal spectre in the form of a beautiful woman that carried off children at night and destroyed them. With the *lilith* may be compared the *ghule* of the Arabian fables. The old versions support the opinion of Bochart that a spectre is intended. If, however, some animal be denoted by the Hebrew term, the screech-owl (*Strix fluminea*) may well be supposed to represent it, for this bird is found in the Bible lands, and is, as is well known, a frequent inhabitant of ruined places (so Mr. Houghton). NIGHT-HAWK; OCHIM.

**Ox** (Gr.), an ancestor of Judith (Jd. viii. 1).

**OX**, the representative in the A. V. of several Hebrew words, the most important of which have been already noticed. (BULL.) It may be added that the Heb. *allūph* (= an ox, bullock, as tamed and accustomed to the yoke, Ges.) is translated "ox" in Jer. xi. 19, and Ps. cxliv. 14; the kindred Heb. *elep* (= an ox, cow, as tame and wonted to the yoke, Ges.; ALFPH) is used only in the plural to denote "oxen" (Ps. viii. 7 [8 Heb.]; Prov. xiv. 4; Is. xxx. 24) and "kine," i. e. cows (Deut. vii. 13, xxviii. 4, 18, 51); the plural of the Gr. *tauros* is twice translated "oxen" in the N. T. (Mat. xxii. 4; Acts xiv. 13); and the Gr. *bous* (= an ox or cow, a male or female of the ox kind, Rbn. N. T. Lxx., L. & S.) is uniformly translated "ox" and "oxen" (Lk. xiii. 15, xiv. 5, 19, &c.).—We propose in this article to give a general review of what relates to the ox tribe (*Bovidae*), so far as the subject has a Biblical interest. It will be convenient to consider (1.) the ox in an economic point of view, and (2.) its natural history. —(1.) There was no animal in the rural economy of the Israelites, or indeed in that of the ancient Orientals generally, that was held in higher esteem than the ox; and deservedly so, for the ox was the animal upon whose patient labors depended all the ordinary operations of farming. Oxen were used for ploughing (Deut. xxii. 10; 1 Sam. xiv. 14, &c.); for treading out "corn" (Deut. xxv. 4; Hos. x. 11, &c.); for draught purposes, when they were generally yoked in pairs (Num. vii. 3; 1 Sam. vi. 7, &c.); as beasts of burden (1 Chr. xii. 40); their flesh was eaten (Deut. xiv. 4; 1 K. i. 9, &c.; Food); they were used in the sacrifices (SACRIFICE); they supplied MILK, BUTTER, &c. (Deut. xxxii. 14; Is. vii. 22; 2 Sam. xvii. 29). (HERD.) Connected with the importance of oxen in the rural economy of the Jews is the strict code of laws which was mercifully enacted by God for their protection and preservation. The ox that threshed the corn was by no means to be muzzled (Deut. xxv. 4; 1 Cor. ix. 9 ff.; 1 Tim. v. 18; AGRICULTURE); he was to enjoy rest on the Sabbath as well as his master (Ex. xxxiii. 12; Deut. v. 14). The law which prohibited the slaughter of any "CLEAN" animal, excepting as "an offering unto the Lord before the Tabernacle," during the time that the Israelites abode in the wilderness (Lev. xvii. 1-6), no doubt contributed to the preservation of their oxen and sheep. It seems clear from Prov. xv. 17, and 1 K. iv. 23, that cattle were sometimes stall-fed (BARN; FOOD; MANGER), though as a general rule it is probable that they fed in the plains or on the hills of Palestine. The cattle that grazed at large in the open country would no doubt often become fierce and wild, for it is to be remembered that in primitive times the lion and other wild beasts of prey roamed about Palestine. Hence

the force of the Psalmist's complaint of his enemies (Ps. xxii. 13).—(2.) The monuments of Egypt exhibit representations of a long-horned breed of oxen, a short-horned, a polled, and what appears to be a variety of the zebu (*Bos Indicus*, Linn.). Some have identified this latter with the *Bos Dante* (the *Bos elegans et parvus Africanus* of Belon). The Abyssinian breed is depicted on the monuments at Thebes drawing a car or cart. The drawings on Egyptian monuments show that the cattle of ancient Egypt were fine, handsome animals (see cuts under AGRICULTURE); doubtless these may be taken as a sample of the cattle of Palestine in ancient times. There are now fine cattle in Egypt; but the Palestine cattle appear to have deteriorated, in size at least, since Biblical times. "Herds of cattle," says Schubert, "are seldom to be seen; the bullock of the neighborhood of Jerusalem is small and insignificant; beef and veal are but rare dainties." The buffalo (*Bubalus Bubalus*) is not uncommon in Palestine; the Arabs call it *jâmûs*.

**Ox-goad.** GOAD.

**Ozem** (fr. Heb. = *strength, power*, Fû., Ges.). 1. Sixth son of Jesse, the next eldest above David (1 Chr. ii. 15).—2. Son of Jerahmeel (ii. 25).

**O-zî'as** (Gr. = UZZIAH, LXX., Ges., &c.). 1. Son of Micha of the tribe of Simeon, one of the "governors" of Bethulia, in the history of Judith (Jd. vi. 15, vii. 23, viii. 10, 28, 36).—2. Uzzi, ancestor of Ezra (2 Esd. ii. 2).—3. UZZIAH, king of Judah (Mat. i. 8, 9).

**Ozî-el** (Gr. = UZZIEL), an ancestor of Judith (Jd. viii. 1).

**Oz'ni** (Heb. *furnished with ears, attentive*, Ges.; *hearing by Jah*, Fû.), a son of Gad (Num. xxvi. 16), and founder of the family of the OZNITES. EZBON.

**Oz'nites** = descendants of OZNI (Num. xxvi. 16).

**O-zo'ra.** "Nathan, and Adaiab, Machnôdebai," in Ezr. x. 39, 40, is corrupted into "Nathanias; and of the sons of Ozora" (1 Esd. ix. 34).

## P

**Pa'a-ral** (Heb. *opening*, Cruden, Ges.). In 2 Sam. xxiii. 35, "Paarai the Arbite" is one of David's mighty men. In 1 Chr. xi. 37, he is called "NAARAI the son of Ezbai," and this, in Kennicott's opinion, is the true reading.

**Pa'dan** (Heb. *paddan* = a plain, low region, Ges.; see below) = PADAN-ARAM (Gen. xlviii. 7).

**Pa'dan-a'ram** (Heb.; see above and below). By this name, more properly *Paddan-aram* (= the table-land of ARAM), according to Fürst and Gesenius, the Hebrews designated the tract of country which they otherwise called ARAM-NAHARAIM (= *Aram of the two rivers*), the Greek MESOPOTAMIA (Gen. xxiv. 10), and "the field (A. V. 'country') of Aram" (A. V. "Syria," Hos. xii. 13 [A. V. 12]). The term was perhaps more especially applied to that portion which bordered on the Euphrates, to distinguish it from the mountainous districts in the N. and N. E. of Mesopotamia. Gesenius makes Padan-aram = "Mesopotamia with the desert on the W. of the Euphrates; opposed to the mountainous region along the Mediterranean." Dr. Beke would identify Padan-aram with the tract between the Abana and the Pharpar, in the region of DAMASCUS; but his view has not found much favor among Biblical scholars. (HARAN.) If the derivation from *Ar. fadda, to plough*, be correct, *Padan-aram* is the arable land of Syria; "either an upland vale in the

hills, or a fertile district immediately at their feet" (Stl. p. 128, n.). Padan-aram plays an important part in the early history of the Hebrews. The family of their founder had settled there, and were long looked upon as those with whom alone the legitimate descendants of ABRAHAM might intermarry. (ISAAC; JACOB.) It is elsewhere called PADAN simply (Gen. xlviii. 7).

**Pa'don** (Heb. *deliverance*, Ges.), ancestor of a family of Nethinim who returned with Zerubbabel (Ezr. ii. 44; Neh. vii. 47).

**Pa'gi-el** (Heb. *event of God*, Ges.), son of Ocran, and chief of Asher at the Exodus (Num. i. 18, ii. 27, vii. 72, 77, x. 26).

**Pa'hath-mo'ab** (Heb. *governor of MOAB*), head of one of the chief houses of the tribe of Judah. Of the individual, or the occasion of his receiving so singular a name, nothing is known certainly. But as we read in 1 Chr. iv. 22, of a family of Shilonites, of the tribe of Judah, who in very early times "had dominion in Moab," it may be conjectured that this was the origin of the name (so Lord A. C. Hervey, original author of this article). It is perhaps a slight corroboration of this conjecture that as we find in Ezr. ii. 6, that the sons of Pahath-moab had among their number "children of Joab," so also in 1 Chr. iv. we find these families who had dominion in Moab very much mixed with the sons of Caleb, among whom, in 1 Chr. ii. 64, iv. 14, we find the house of Joab. However, as regards the name Pahath-moab, this early and obscure connection of the families of Shelah the son of Judah with Moab seems to supply a not improbable origin for the name itself, and to throw some glimmering upon the association of the children of Joshua and Joab with the sons of Pahath-moab. That this family was of high rank in the tribe of Judah we learn from their appearing fourth in order in the two lists (Ezr. ii. 6; Neh. vii. 11), and from their chief having signed second, among the lay princes, in Neh. x. 14. It was also the most numerous (2,818) of all the families specified, except the Benjamite house of Senaah (Neh. vii. 38). The chief in Nehemiah's time was Hashub, who repaired two portions of the wall of Jerusalem (iii. 11, 23). Two hundred of its males accompanied Elihoenai in Ezra's caravan (Ezr. viii. 4), and eight "sons of Pahath-moab" are named as having taken strange wives (x. 30).

**Pa'l** (Heb.) = PAU (1 Chr. i. 50).

**Paint** (as a cosmetic). The use of cosmetic dyes has prevailed in all ages in Eastern countries. We have abundant evidence of the practice of painting the eyes both in ancient Egypt (Wilkinson, ii. 342) and in Assyria (Layard's *Nineveh*, ii. 328); and in modern times no usage is more general. It does not appear, however, to have been by any means universal among the Hebrews. The notices of it are few; and in each instance it seems to have been used as a meretricious art, unworthy of a woman of high character. Thus Jezebel "put her eyes in painting" (2 K. ix. 30, margin); Jeremiah says of the harlot city, "Though thou rentest thy eyes with painting" (Jer. iv. 30); and Ezekiel again makes it a characteristic of a harlot (Ez. xxiii. 40). The expressions used in these passages are worthy of observation, as referring to the mode in which the process was effected. It is thus described by Chandler (*Travels*, ii. 140): "A girl, closing one of her eyes, took the two lashes between the forefinger and thumb of the left hand, pulled them forward, and then thrusting in at the external corner a bodkin which had been immersed in the soot, and extract-

ing it again, the particles before adhering to it remained within, and were presently ranged round the organ." The eyes were thus literally "put in paint," and were "rent" open in the process. A broad line was also drawn round the eye, as represented in the accompanying cut. The effect was an apparent en-

"Eye ornamented with Kohl, as represented in ancient paintings" (Lane, p. 87, new ed.).

largement of the eye; and the expression in Jer. iv. 30 has been by some understood in this sense. The term used for the application of the dye was *cāhal* or *cāchal*, to smear, and Rabbinical writers described the paint itself under a cognate term. These words still survive in *kohl*, the modern Oriental name for the powder used. The Bible gives no indication of the substance out of which the dye was formed. The old versions (the LXX., Chaldee, Syriac, &c.) agree in pronouncing the dye to have been produced from antimony. Antimony is still used for the purpose in Arabia and Persia, but in Egypt the *kohl* is a soot produced by burning either a kind of frankincense or the shells of almonds. The dye-stuff was moistened with oil, and kept in a small jar, which we may infer to have been made of horn, from the proper name Keren-happuch = *horn for paint* (Job xlii. 14). The probe with which it was applied was made of wood, silver, or ivory, and had a blunted point. Whether the custom of staining the hands and feet, particularly the nails, now so prevalent in the East, was known to the Hebrews, is doubtful. The plant, *henna*, which is used for that purpose, was certainly known (Cant. i. 14; A. V. "CAMPHIRE"), and the expressions in Cant. v. 14 may possibly refer to the custom. CEILING; COLONS; HANDICRAFT; HOUSE; IDOL; IDOLATRY; PICTURE.

**Pal ace.** There are few tasks more difficult than to restore an ancient building of which we possess nothing but two verbal descriptions; and these difficulties are very much enhanced when one account is written in Hebrew, the scientific terms in which are, from our ignorance, capable of the widest latitude of interpretation; and the other, though written in a language of which we have a more definite knowledge, was composed by a person who never could have seen the buildings he was describing. The site of the Palace of Solomon was almost certainly in the city itself, on the brow opposite to the Temple, and overlooking it. It is impossible, of course, to be at all certain what was either the form or the exact disposition of such a palace, but as we have the dimensions of the three principal buildings given in the book of Kings, and confirmed by Josephus, we may, by taking these as a scale, ascertain pretty nearly that the building covered somewhere about 150,000 or 160,000 square feet. Whether it was a square of 400 feet each way, or an oblong of about 550 feet by 300, as represented in the annexed diagram, must always be more or less a matter of conjecture (so Mr. Fergusson, original author of this article). The form here adopted seems to suit better not only the exigencies of the site, but the known disposition of the parts.—The principal building situated within the Palace was, as in all Eastern palaces, the great hall of state and audience, here called the "House of the Forest of Lebanon." Its dimensions were 100 cubits, or 150 feet long, by half that, or 75 feet in width. Accord-

ing to 1 K. vii. 2 it had "four rows of cedar pillars with cedar beams upon the pillars;" but it is added in the next verse that "it was covered with cedar above the beams that lay on forty-five pillars, fifteen in a row." This would be easily explicable if the description stopped there, and so Josephus took it. He evidently considered the hall, as he afterward described the *Stoa basilica* or Royal Porch of the Temple, as consisting of four rows of columns, three standing free, but the fourth built into the outer wall (Jos. xi. 5); and his expression that the ceiling of the palace-hall was in the Corinthian manner (vii. 5, § 2) does not mean that it was of that order, which was not then invented, but after the fashion of what was called in his day a Corinthian *œcus*, viz. a hall with a clerestory. If we, like Josephus, are contented with these indications, the section of the hall was certainly as shown in fig. 2, A (p. 780). But the Bible goes on to say (ver. 4) that "there were windows in three rows, and light was against light in three ranks," and in the next verse it repeats, "and light was against light in three ranks." Josephus escapes the difficulty by saying it was lighted by windows in three divisions, which might be taken as an extremely probable description if the Bible were not so very specific regarding it; and we must therefore adopt some such arrangement as that shown in fig. 2, B. On the whole it appears probable that this is the one nearest the truth, as it admits of a clerestory, to which Josephus evidently refers, and shows the three rows of columns which the Bible description requires. Besides the clerestory there was probably a range of openings under the cornice of the walls, and then a range of open doorways, which would thus make the three openings required by the Bible description. Another difficulty in attempting to restore this hall arises from the number of pillars being uneven ("15 in a row"); and if we adopt the last theory (fig. 2, B), we have a row of columns in the centre both ways. The probability is that it was closed, as shown in the plan, by a wall at one end, which would give 15 spaces to the 15 pillars, and so provide a central space in the longer dimension of the hall in which the throne might have been placed. If the first theory be adopted, the throne may have stood either at the end, or in the centre of the longer side; but, judging from what we know of the arrangement of Eastern palaces, we may be almost certain that the latter is the correct position.—Next in importance to the building just described is the hall or porch of judgment (1 K. vii. 7), which Josephus distinctly tells us (Jos. vii. 5, § 1) was situated opposite to the centre of the longer side of the great hall. Its dimensions were 50 cubits, or 75 feet square (Josephus says 30 in one direction at least), and its disposition can easily be understood by comparing the descriptions we have with the remains of the Assyrian and Persian examples. It must have been supported by four pillars in the centre, and had three entrances: the principal opening from the street and facing the judgment-seat; a second from the court-yard of the Palace, by which the councillors and officers of state might come in; and a third from the Palace, reserved for the king and his household, as shown in the plan.—The third edifice is merely called "the Porch." Its dimensions were 50 by 30 cubits, or 75 feet by 45. Josephus does not describe its architecture; and we are unable to understand the description contained in the Bible, owing apparently to our ignorance of

the synonyms of the Hebrew architectural terms. Its use, however, cannot be considered as doubtful, as it was an indispensable adjunct to an Eastern palace. It was the ordinary place of business of the palace, and the reception-room where the king

be grouped with the ladies of the harem, and requiring a residence of her own.—There is still another building mentioned by Josephus, as a temple, supported by massive columns, and situated opposite the Hall of Judgment. It may thus have

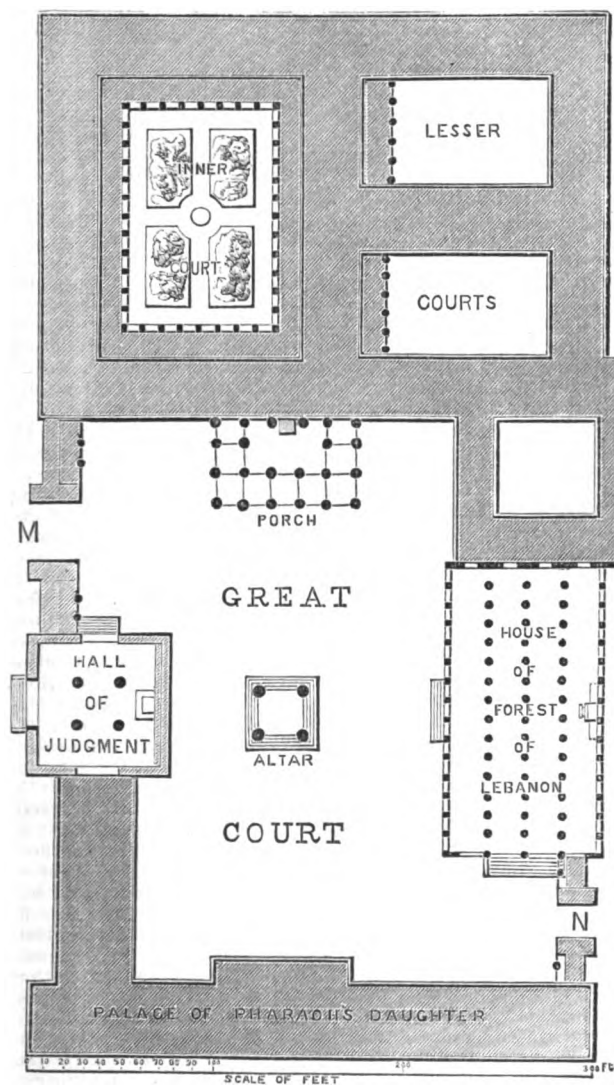

Fig. 1. Diagram Plan of Solomon's Palace, by J. Ferguson Esq.

received ordinary visitors, and sat, except on great state occasions, to transact the business of the kingdom. Behind this, we are told, was the inner court, adorned with gardens and fountains, and surrounded by cloisters for shade; and besides this were other courts for the residence of the attendants and guards, and in Solomon's case, for the three hundred women of his harem: all of which are shown in the plan with more clearness than can be conveyed by a verbal description.—Apart from this palace, but attached, as Josephus tells us, to the Hall of Judgment, was the palace of Pharaoh's daughter—too proud and important a personage to

be grouped with the ladies of the harem, and requiring a residence of her own.—There is still another building mentioned by Josephus, as a temple, supported by massive columns, and situated opposite the Hall of Judgment. It may thus have been outside, in front of the palace in the city; but more probably was, as shown in the plan, in the centre of the great court. It could not have been a temple in the ordinary acceptance of the term, as the Jews had only one temple, and that was situated on the other side of the valley; but it may have been an altar covered by a baldachin or canopy; and so it has been represented in the plan (fig. 1). If the site and disposition of the Palace were as above indicated, it would require two great portals: one leading from the city to the great court, shown at M (fig. 1); the other to the Temple and the king's garden at N. This last was probably situated where the bridge afterward joined the Temple to the city and palace.—The recent discoveries at Nineveh have enabled us to understand many of the architectural details of this palace, which were before almost wholly inexplicable. We are told, e. g., that the walls of the halls of the palace were wainscotted with three tiers of stone, apparently versicolored marbles, hewn and polished, and surmounted by a fourth course, elaborately carved with representations of leafage and flowers. Above this the walls were plastered and ornamented with colored arabesques. At Nineveh the walls were, like these, wainscotted to a height of about eight feet, but with alabaster, a peculiar product of the country, and these were separated from the painted space above by an architectural band; the real difference being that the Assyrians revelled in sculptural representations of men and animals. These modes of decoration were forbidden to the Jews by the second commandment. Some difference may also be due to the fact that the soft alabaster, though admirably suited to bassi-relievi, was not suited for sharp deeply-cut foliage sculpture, like that described by Josephus; while, at the same time, the hard material used by the Jews might induce them to limit their ornamentation to one band only. It is probable, however, that a considerable amount of color was used in the decoration of these palaces (Jer. xxii. 14). It may also be added that in the East all buildings, with scarcely an exception, are adorned with color internally, generally the three primitive colors used in

all their intensity, but so balanced as to produce the most harmonious results. ARCHITECTURE; CEIL-

ING; GOVERNOR; HIGH-PRIEST; HOUSE; KING; PRETORIUM; SHUSHAN.

**Pa'lal** (Heb. *judge*, Ges.), son of Uzai; assisted in restoring the walls of Jerusalem in Nehemiah's time (Neh. iii. 25).

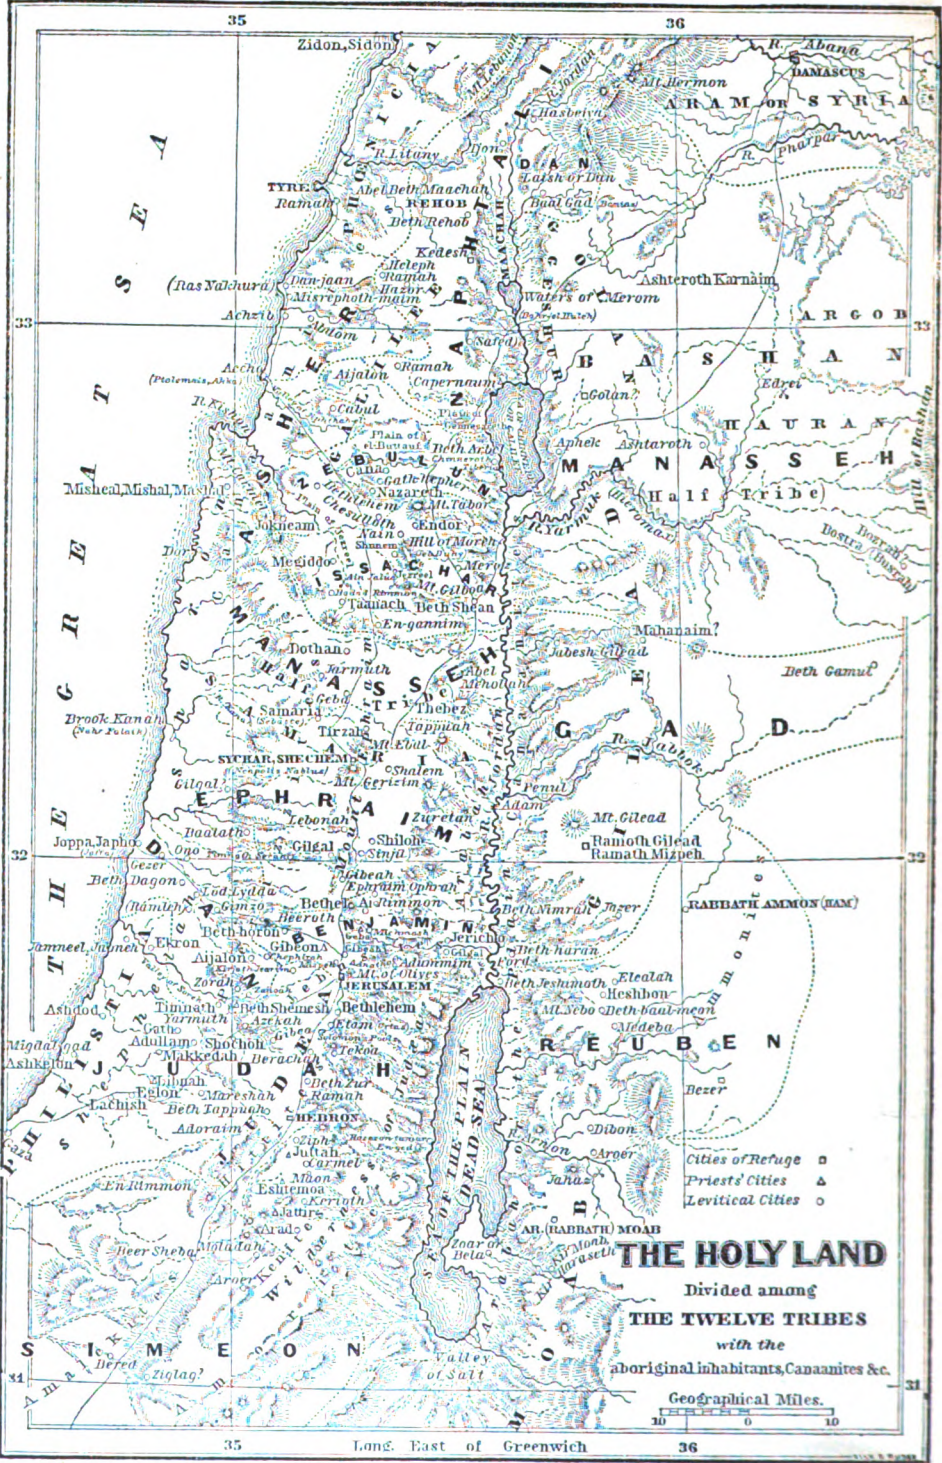

**Pal-es-ti'na** and **Pal'es-tine** [*i* as in *vine*] (L. *Palæstina*, *Palæstine*; Gr. *Palaistinê*; all from Hebrew, see below). These two forms occur in the A. V. but four times in all, always in poetical passages; the first in Ex. xv. 14, and Is. xiv. 29, 31; the second, Joel iii. 4. In each case the Hebrew is *Peleseth* (= *land of strangers* or *sojourners*, Ges., a word found, besides the above, only in Ps. lx. 8, lxxxiii. 7, lxxxvii. 4, and cviii. 9, in all which our translators have rendered it by "PHILISTIA" or "Philistines." Palestine, in the A. V., really means nothing but Philistia. The original Hebrew word *Peleseth* to the Hebrews signified merely the long and broad strip of maritime plain inhabited by their encroaching neighbors; nor does it appear that at first it signified more to the Greeks. As lying next the sea, and as being also the high-road from Egypt to Phenicia and the richer regions N. of it, the Philistine plain became sooner known to the western world than the country further inland, and was called by them *Syria Palæstina* = Philistine Syria. From thence it was gradually extended to the country further inland, till in the Roman and later Greek authors, both heathen and Christian, it became the usual appellation for the whole country of the Jews, both W. and E. of Jordan. The word is now so commonly employed in our more familiar language to designate the whole country of Israel, that, although biblically a misnomer, it has been chosen here as the most convenient heading under which to give a general description of the HOLY LAND, embracing those points which have not been treated under the separate headings of cities or tribes. This description will most conveniently divide itself into two parts:—I. *The Names* applied to the country of Israel in the Bible and elsewhere. II. *The Land*: its situation, aspect, climate, physical characteristics, in connection with its history: its structure, botany, and natural history. *The History* of the country is so fully given under its various headings throughout the work, that it is unnecessary to recapitulate it here. (CHRONOLOGY; HEBREW; ISRAEL, KINGDOM OF; JERUSALEM; JUDAH, KINGDOM OF; JUDGE; MACCABEES, &c.) It may, however, here be stated that Palestine, now under the Turkish government, forms part of two great pashalics—(1.) *Sidon* (sometimes called *Beirut*, the pasha's official residence being at this place), embracing the whole of W. Palestine, and including the sub-pashalics of 'Akka and Jerusalem; (2.) *Damascus*, embracing all E. of the Jordan. The population of Palestine W. of Jordan is estimated

by Porter (in Kitto) at 724,000, and of the part E. of Jordan at 100,000; of these about 80,000 are Christians (Maronites, Greeks, Armenians, &c.), 12,000 Jews, and the rest Mohammedans, Druzes, &c.—I. *The Names*. Palestine, then, is designated in the Bible by more than one name:—1. During the Patriarchal period, the Conquest, and the age of the Judges, and also where those early periods are referred to in the later literature (as Ps. cv. 11), it is spoken of as "CANAAN," or more frequently "the land of Canaan," meaning thereby the country W. of the Jordan, as opposed to "the land of GILEAD" on the E. Other designations, during the same early period, are "the land of the Hebrews" (Gen. xl. 15 only—a natural phrase in the mouth of Joseph); "the land of the Hittites" (Josh. i. 4—a remarkable expression, occurring here only in the Bible). The name *Ta-netz* (i. e. *Holy Land*), in the inscriptions of Rameses II., and Thothmes III., is believed by M. Brugsch to refer to Palestine; but this is contested by M. de Rougé. 2. During the Monarchy the name usually, though not frequently, employed is, "land of Israel" (1 Sam. xiii. 19; 2 K. v. 2, 4, &c.). It is Ezekiel's favorite expression. The pious and loyal aspirations of Hosea find vent in the expression, "land of Jehovah," A. V. "the Lord's land" (Hos. ix. 3). In Zech. ii. 12 it is "the holy land;" and in Dan. xi. 41, "the glorious land." In Am. ii. 10 alone it is "the land of the Amorite." Occasionally it appears to be mentioned simply as "The Land:" as in Ru. i. 1; Jer. xxii. 27; 1 Mc. xiv. 4; Lk. iv. 26, and perhaps even xxiii. 44. 3. Between the Captivity and the time of our Lord the name "JUDEA" had extended itself from the southern portion to the whole of the country, even that beyond Jordan (Mat. xix. 1; Mk. x. 1). In Jd. xi. 19 it is applied to the portion between the plain of Esdraelon and Samaria, as in Lk. xxiii. 5; though it is also used in the stricter sense of Judea proper (Jn. iv. 3, vii. 1). In this narrower sense it is employed throughout 1 Mc. (see especially ix. 50, x. 30, 38, xi. 34). In Heb. xi. 9 Palestine is "the land of promise;" and in 2 Esd. xiv. 31, "the land of Sion." 4. The Roman division of the country hardly coincided with the Biblical one, and it does not appear that the Romans had any distinct name for that which we understand by Palestine. It was included in the province of SYRIA; JUDEA in their phrase lay between Idumea on the S. and the territory of the free cities (Scythopolis, Sebaste [Samaria], Joppa, Azotus, &c.) on the N. and W.; Perea was the district E. of the Jordan. 5. Soon after the Christian era we find the name *Palæstina* (Palestine) in possession of the country. Ptolemy (A. D. 161) thus applies it. 6. Josephus usually employs the an-

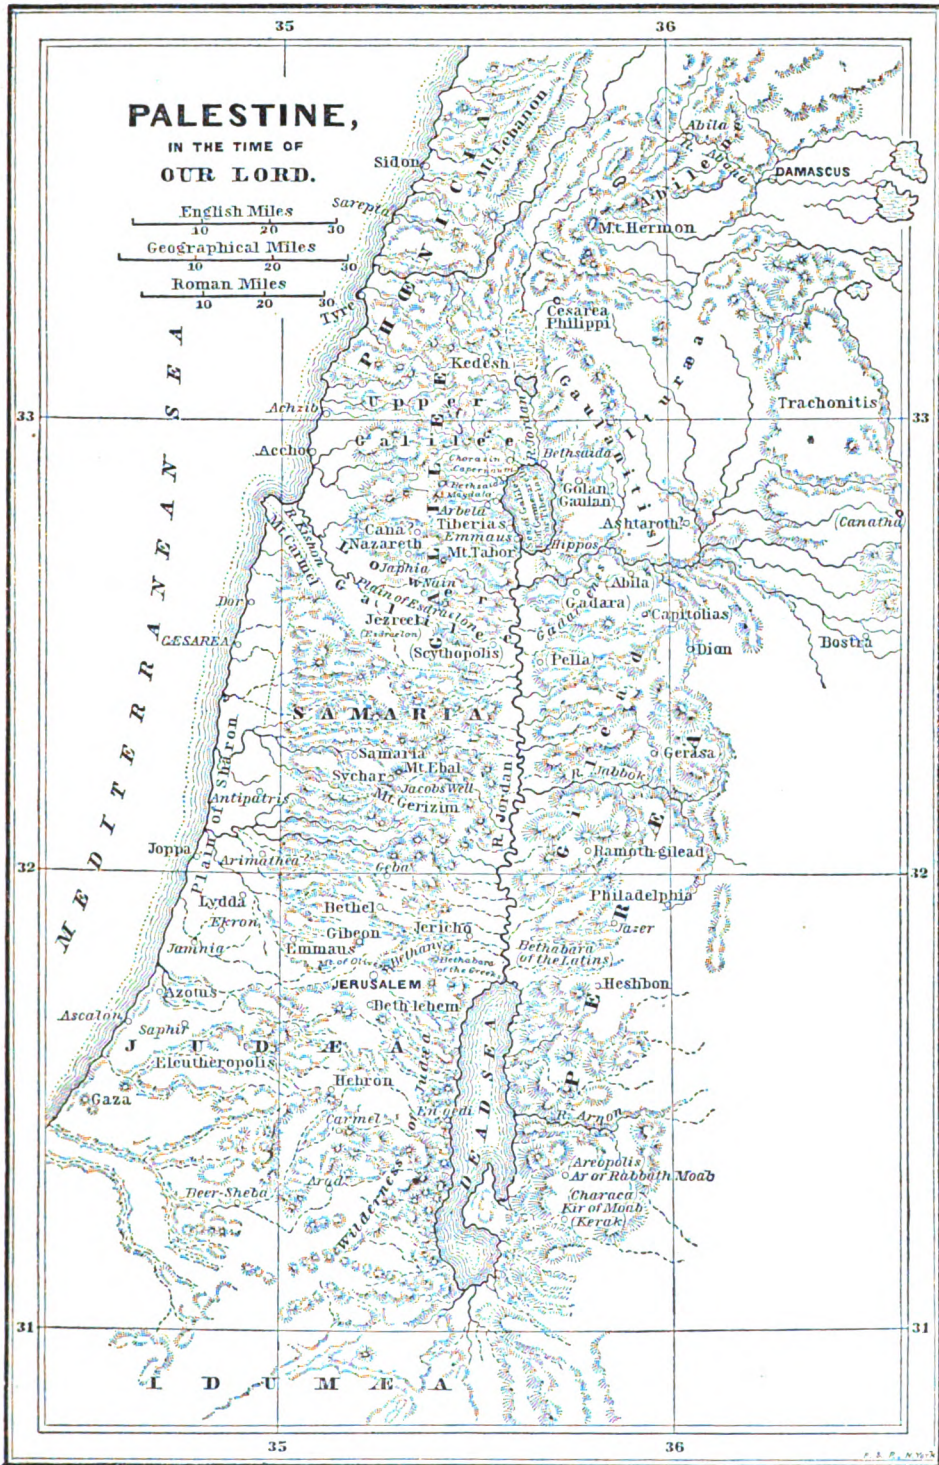

cient name "Canaan" in reference to the events of the earlier history, but when speaking of the country in reference to his own time styles it Judea. The Talmudists and other Jewish writers use the title of the "Land of Israel." 7. The name most frequently used throughout the middle ages, and down to our own time, is *Terra Sancta* (L.) = the Holy Land.—II. *The Land*. The Holy Land is not in size or physical characteristics proportioned to its moral and historical position, as the theatre of the most momentous events in the world's history. It is less than 140 miles in length from Dan to Beersheba, and barely 40 in average breadth (= Connecticut and Rhode Island), on the very frontier of the East, hemmed in between the Mediterranean Sea on the one hand and the enormous trench of the Jordan valley on the other, by which it is effectually cut off from the mainland of Asia behind it. On the N. it is shut in by the high ranges of Lebanon and Anti-Lebanon, and by the chasm of the *Litány*. On the S. it is no less enclosed by the arid and inhospitable deserts of the upper part of the peninsula of Sinai. 1. Its position on the map of the world—as the world was when the Holy Land first made its appearance in history—is remarkable. (a.) It is on the very outpost—on the extremest western edge of the East, with a broad desert between it and the vast tracts of Arabia and Mesopotamia in its rear. On the shore of the Mediterranean it stands, as if it had advanced as far as possible toward the West, separated therefrom by that which, when the time arrived, proved to be no barrier, but the readiest medium of communication—the wide waters of the "Great Sea." Thus it was open to all the gradual influences of the rising communities of the West, while it was saved from the retrogression and decrepitude which have ultimately been the doom of all purely Eastern states whose connections were limited to the East only. (b.) There was, however, one channel, and but one, by which it could reach and be reached by the great Oriental empires. The only road by which the two great rivals of the ancient world could approach one another—by which alone Egypt could get to Assyria, and Assyria to Egypt—lay along the broad flat strip of coast which formed the maritime portion of the Holy Land, and thence by the Plain of the Lebanon to the Euphrates. Through this channel the catastrophe (*CAPTIVITY*) actually came. (c.) After this the Holy Land became (like the Netherlands in Europe) the arena on which in successive ages the hostile powers who contended for the empire of the East, fought their battles. Here the Seleucidæ routed, or were routed by, the Ptolemies; here the Romans vanquished the Parthians, Persians, and Jews; here the armies of England, France, and Germany fought the hosts of Saladin. 2. It is essentially a mountainous country. Not that it contains independent mountain-chains, like Greece, but every part of the highland is in greater or less undulation. It contains also a remarkable arrangement of plains. The mass of hills which occupies the centre of the country is bordered or framed on both sides, E. and W., by a broad belt of lowland, sunk deep below its own level. The slopes or cliffs which form, as it were, the retaining walls of this depression, are furrowed and cleft by the torrent-beds which discharge the waters of the hills, and form the means of communication between the upper and lower level. On the W. this lowland interposes between the mountains and the sea, and is the Plain of Philistia and of Sharon. On the E. it is the broad bottom of the Jordan valley, deep

down in which rushes the river of Palestine to the Dead Sea. 3. Such is the first general impression of the physiognomy of the Holy Land. It is a physiognomy compounded of the three main features already named—the plains, the highland hills, and the torrent-beds. About half-way up the coast the maritime plain is suddenly interrupted by a long ridge thrown out from the central mass, rising considerably above the general level, and terminating in a bold promontory on the very edge of the Mediterranean. This ridge is Mount Carmel. On its upper side, the plain, as if to compensate for its temporary displacement, invades the centre of the country and forms an undulating hollow right across it from the Mediterranean to the Jordan valley. This central lowland, which divides with its broad depression the mountains of Ephraim from the mountains of Galilee, is the plain of Esdraelon or Jezreel, the great battle-field of Palestine. N. of Carmel the lowland resumes its position by the sea-side till it is again interrupted and finally put an end to by the northern mountains which push their way out to the sea, ending in the white promontory of the *Ras Nakhûra* (Ladder of Tyre). Above this is the ancient Phenicia. 4. The country thus roughly portrayed, and which, as before stated, is less than 140 miles in length, and not more than 40 in average breadth, is to all intents and purposes the whole Land of Israel. The northern portion is GALILEE; the centre, SAMARIA; the south, JUDEA. For the land E. of the Jordan, see AMMON; ARAM; ARGOB; BASHAN; GAD 1; GILEAD 1; HAURAN; ITUREA; MANASSEH 1; MOAB; REUBEN, &c. 5. Small as the Holy Land is on the map, and when contrasted either with modern states or with the two enormous ancient empires of Egypt and Assyria between which it lay, it seems even smaller to the traveller as he pursues his way through it. There are numerous eminences in the highlands which command the view of both frontiers at the same time—the eastern mountains of Gilead with the Jordan at their feet on the one hand, on the other the Western Sea. Hermon, the apex of the country on the north, is said to have been seen from the southern end of the Dead Sea: it is certainly plain enough from many a point nearer the centre. It is startling to find that from the top of the hills of *Neby Samvil*, Bethel, Tabor, Gerizim, or *Safed*, the eye can embrace at one glance, and almost without turning the head, such opposite points as the Lake of Galilee and the Bay of 'Akko, the farthest mountains of the *Haurân*, and the long ridge of Carmel, the ravine of the Jabbok, or the green windings of Jordan, and the sand-hills of Jaffa. 6. The highland district, thus surrounded and intersected by its broad lowland plains, preserves from N. to S. a remarkably even and horizontal profile. Its average height may be taken as 1,500 to 1,800 feet above the Mediterranean. It can hardly be denominated a plateau, yet so evenly is the general level preserved, and so thickly do the hills stand behind and between one another, that, when seen from the coast or the western part of the maritime plain, it has quite the appearance of a wall. This general monotony of profile is, however, accentuated at intervals by certain centres of elevation.—Hebron, Jerusalem, with the Mount of Olives and *Neby Samvil*, Bethel, *Sinjal*, Ebal and Gerizim, Little Hermon and Tabor, *Safra*, *Jebel Jermuk* (see profile-section A). Between these elevated points runs the watershed of the country, sending off on either hand—to the Jordan valley on the E. and the Mediterranean on the W.—the

long tortuous arms of its many torrent-beds. 7. The valleys on the two sides of the watershed differ considerably in character. Those on the E., owing to the depth of the Jordan valley, and the proximity of the watershed to it, are extremely steep and rug-

ged (see profile-section B). This is the case during the whole length of the southern and middle portions of the country. It is only when the junction between the Plain of Esdrælon and the Jordan valley is reached, that the slopes become gradual and

A. Profile-section of Palestine from the Dead Sea to Mount Harmon along the line of the Jordan.

B. Profile-section of Palestine from Jaffa to the mountains of Moab.

the ground fit for the manoeuvres of any thing but detached bodies of foot-soldiers. But, rugged and difficult as they are, they form the only access to the upper country from this side, and every man or body of men who reached the territory of Judah, Benjamin, or Ephraim, from the Jordan valley, must have climbed one or other of them. 8. The western valleys are more gradual in their slope. The level of the external plain on this side is higher, and, therefore, the fall less, while at the same time the distance to be traversed is much greater. Here, again, the valleys are the only means of communication between the lowland and the highland. From Jaffa and the central part of the plain there are two of these roads "going up to Jerusalem:" the one to the right by *Ramleh* and the *Wady 'Aly*; the other to the left by *Lydda*, and thence by the Beth-horons, or the *Wady Suleimán*, and Gibeon. The former of these is modern, but the latter is the scene of many a famous incident in the ancient history. 9. Further south, the communication between the mountains of Judah and the lowland of Philistia are comparatively unexplored. They were doubtless the scene of many a foray and repulse during the lifetime of Samson and the struggles of the Danites, but there is no record of their having been used for the passage of any important force either in ancient or modern times. N. of Jaffa the passes are few. These western valleys, though easier than those on the eastern side, present great difficulties to the passage of any large force encumbered by baggage. In fact, these mountain-passes really formed the security of Israel. The armies of Egypt and Assyria, as they traced and retraced their path between Pelusium and Carchemish, must have looked at the long wall of heights which closed in the broad level roadway they were pursuing, as belonging to a country with which they had no concern. It was to them a natural mountain-fastness, the approach to which was beset with difficulties, while its bare and soilless hills were hardly worth the trouble of

conquering, in comparison with the rich green plains of the Euphrates and the Nile, or even with the boundless cornfield through which they were marching. In the later days of the Jewish nation, and during the Crusades, Jerusalem became the great object of contest; and then, the battle-field of the country, which had originally been Esdrælon, was transferred to the maritime plain at the foot of the passes communicating most directly with the capital. 10. When the highlands of the country are more closely examined, a considerable difference will be found to exist in the natural condition and appearance of their different portions. The south, as being nearer the arid desert, and farther removed from the drainage of the mountains, is drier and less productive than the north. The tract below Hebron, which forms the link between the hills of Judah and the desert, was known to the ancient Hebrews by a term originally derived from its dryness (*Negeb*). This was "the South" country. As the traveller advances north of this tract, there is an improvement; but perhaps no country equally cultivated is more monotonous, bare, or uninviting in its aspect, than a great part of the highlands of Judah and Benjamin during the largest portion of the year. The spring covers even those bald gray rocks with verdure and color, and fills the ravines with torrents of rushing water; but in summer and autumn the country from Hebron up to Bethel looks dreary and desolate. Rounded hills of moderate height fill up the view on every side, their coarse gray stone continually discovering itself through the thin coating of soil. The valleys of denudation which divide these monotonous hills are also planted with figs or olives, but oftener cultivated with wheat, or barley, or *dourra* (MILLET), the long reed-like stalks of which remain on the stony ground till the next seed-time, and give a singularly dry and slovenly look to the fields. The general absence of fences in the valleys does not render them less desolate to an English or American eye; and where a fence is now and then encountered, it is either a stone-

wall trodden down or dilapidated, or a hedge of the prickly-pear cactus, gaunt, irregular, and ugly, without being picturesque. Often the track rises and falls for miles together over the edges of the white strata upturned into almost a vertical position; or over sheets of bare rock spread out like flagstones, and marked with fissures which have all the regularity of artificial joints; or along narrow channels through which the feet of centuries of travellers have with difficulty retained their hold on the steep declivities; or down flights of irregular steps hewn or worn in the solid rock of the ravine, and strewn thick with innumerable loose stones. Even the gray villages—always on the top or near the top of the hills—do but add to the dreariness of the scene by the forlorn look which their flat roofs and lack of windows present to a European or American, and by the poverty and ruin so universal among them. At Jerusalem this reaches its climax. To the W. and N. W. of the highlands, where the sea-breezes are felt, there is considerably more vegetation. 11. Hitherto we have spoken of the central and northern portions of Judea. Its eastern portion—a tract some nine or ten miles in width by about thirty-five in length—which intervenes between the centre and the abrupt descent to the Dead Sea, is far more wild and desolate, and that not for a portion of the year only, but throughout it. This must have been always what it is now—an uninhabited desert, because uninhabitable. 12. No descriptive sketch of this part of the country can be complete which does not allude to the caverns characteristic of all limestone districts, but here astonishingly numerous. Every hill and ravine is pierced with them, some very large and of curious formation—perhaps partly natural, partly artificial—others mere grottoes. Many of them are connected with most important and interesting events of the ancient history of the country. Especially is this true of the district now under consideration. (ADULLAM; ARBELA; CAVE; EN-GEDI; MAKKEDAH; MACHPELAH.) 13. The bareness and dryness which prevail more or less in Judea, are owing partly to the absence of wood, partly to its proximity to the desert, and partly to a scarcity of water, arising from its distance from the Lebanon. (FOUNTAIN; WELL.) 14. But to this discouraging aspect there are happily some important exceptions. The valley of *Urtās*, S. of Bethlehem, contains springs which in abundance and excellence rival even those of *Nāblus*; the huge "Pools of Solomon" are enough to supply a district for many miles round them; and the cultivation now going on in that neighborhood shows what might be done with a soil which requires only irrigation and a moderate amount of labor to evoke a boundless produce. In other places are also examples of excellent vineyards, and plantations of olive and fig trees. 15. It is obvious that in the ancient days of the nation, when Judah and Benjamin possessed the teeming population indicated in the Bible, the condition and aspect of the country must have been very different. In no country do the ruined towns bear so large a proportion to those still existing. There is hardly a hill-top without vestiges of some fortress or city. (AGRICULTURE; CENSUS.) But, besides this, forests appear to have stood in many parts of Judea until invasions and sieges caused their fall; and all this vegetation must have reacted on the moisture of the climate, and, by preserving the water in many a ravine and natural reservoir where now it is rapidly dried by the fierce sun of the early summer,

must have influenced materially the look and the resources of the country. (FOREST.) 16. Advancing northward from Judea, the country becomes gradually more open and pleasant. Plains of good soil occur between the hills, at first small, but afterward comparatively large. The hills assume here a more varied aspect than in the southern districts, springs are more abundant and more permanent, until, at last, when the district of *Jebel Nāblus* is reached—the ancient Mount Ephraim—the traveller encounters an atmosphere and an amount of vegetation and water which, if not so transcendently lovely as the representations of enthusiastic travellers would make it, is yet greatly superior to any thing he has met with in Judea, and even sufficient to recall much of the scenery of the West. 17. Perhaps the springs are the only objects which in themselves, and apart from their associations, really strike a traveller from the West with astonishment and admiration. Such glorious fountains as those of *'Ain Jalūd* (Jezreel), *Tell el-Kādy* (Dan), *Baniās* (CESARĒA PHILIPPI), *Jenin* (EN-GANNIM), &c., are very rarely to be met with out of irregular, rocky, mountainous countries. But, added to their natural impressiveness, is the consideration of the prominent part which many of these springs have played in the history. 18. The valleys which lead down from the upper level in this district to the valley of the Jordan, are less precipitous, because the level from which they start in their descent is lower, while that of the Jordan valley is higher; and they have lost that savage character which distinguishes the naked clefts of the Wadys *Succinūt* and *Kelt* (near Jericho), of the *'Ain Jidy* or *Zuweirah* (W. of the Dead Sea), and have become wider and shallower. Fine streams run through many of these valleys. The mountains, though bare of wood and but partially cultivated, have none of that arid, worn look which renders those E. of Hebron so repulsive. 19. Hardly less rich is the extensive region which lies N. W. of the city of *Nāblus*, between it and Carmel, in which the mountains gradually break down into the Plain of Sharon. 20. But with all its richness, and all its advance on the southern part of the country, there is a strange dearth of natural wood about this central district. Olive-trees are indeed to be found everywhere, but they are artificially cultivated for their fruit, and the olive is not a tree which adds to the look of a landscape. It is this dearth of natural non-fruit-bearing trees in the district which makes the wooded sides of Carmel and the park-like scenery of the adjacent slopes and plains so remarkable. 21. No sooner, however, is the Plain of Esdrelon passed, than a considerable improvement is perceptible. The low hills which spread down from the mountains of Galilee, and form the barrier between the plains of *'Akka* and Esdrelon, are covered with timber, of moderate size, it is true, but of thick, vigorous growth, and pleasant to the eye. Eastward of these hills rises the round mass of Tabor, dark with its copses of oak, and set off by contrast with the bare slopes of *Jebel ed-Duky* (the so-called "Little Hermon") and the white hills of Nazareth. N. of Tabor and Nazareth is the plain of *el-Buttāf*, an upland tract hitherto very imperfectly described, but apparently similar to Esdrelon, though much more elevated. Beyond this, the amount of natural growth increases at every step, until toward the N. the country becomes what even in England or America would be considered as well timbered. 22. The notices of this romantic district in the

Bible are but scanty; in fact, till the date of the N. T., when it had acquired the name of Galilee, it may be said, for all purposes of history, to be hardly mentioned. In the great Roman conquest, or rather destruction, of Galilee, which preceded the fall of Jerusalem, the contest penetrated but a short distance into the interior. 23. From the present appearance of this district we may, with some allowances, perhaps gain an idea of what the more southern portions of the central highlands were during the earlier periods in the history. There is little material difference in the natural conditions of the two regions. It seems fair to believe that the hills of Shechem, Bethel, and Hebron, when Abram first wandered over them, were not very inferior to those of the districts W. and N. W. of the Sea of Galilee, from which oak and other wood is supplied to the towns on the coast. 24. The causes of the present bareness of the face of the country are two, which, indeed, can hardly be separated. The first is the destruction of the timber in that long series of sieges and invasions which began with the invasion of Shishak (B. C. about 970) and has not yet come to an end. This, at once, made the climate more arid, and, doubtless, diminished the rain-fall. The second is the decay of the terraces necessary to retain the soil on the steep slopes of the round hills. 25. In the Holy Land the hill tops are, throughout, selected for habitation. A town in a valley is a rare exception; while scarce a single eminence of the multitude always in sight but is crowned with its city or village, inhabited or in ruins, often so placed as if not accessibility but inaccessibility had been the object of its builders. And indeed such was their object. These groups of naked forlorn structures piled irregularly one over the other on the curve of the hill-top, are the lineal descendants, if indeed they do not sometimes contain the actual remains, of the "fenced cities, great and walled up to heaven," so frequently mentioned in the records of the Israelite conquest. They bear witness to the general insecurity of the country, and to the treacherous nature of the alluvial "sand" of the plain under the sudden rush of the winter torrents from the hills as compared with the "rock" of the hills themselves (Mat. vii. 24-27). 26. These hill-towns were not what gave the Israelites their main difficulty in the occupation of the country. Wherever strength of arm and fleetness of foot availed, there those hardy warriors, fierce as lions, sudden and swift as eagles, sure-footed and fleet as the wild deer on the hills (1 Chr. xii. 8; 2 Sam. i. 23, ii. 18), easily conquered. It was in the plains, where the horses and chariots of the Canaanites and Philistines had space to manœuvre, that they failed in dislodging the aborigines (Judg. i. 19-35). Thus in this case the ordinary conditions of conquest were reversed—the conquerors took the hills, the conquered kept the plains. To a people so exclusive as the Jews there must have been a constant satisfaction in the elevation and inaccessibility of their highland regions. This is evident in every page of their literature, which is tinged throughout with a highland coloring. 27. But the hills were occupied by other edifices besides the "fenced cities." The tiny white domes perched here and there on the summits of the eminences, and marking the holy ground in which some Mohammedan saint is resting, are the successors of the "HIGH PLACES" or sanctuaries so constantly denounced by the prophets, and which were set up "on every high hill and under every green tree" (Jer. ii. 20; Ez. vi. 13). 28.

From the mountainous structure of the Holy Land and the extraordinary variations in the level of its different districts, arises a further peculiarity, viz. the extensive views of the country which can be obtained from various commanding points. The number of *panoramas* which present themselves to the traveller in Palestine is truly remarkable. To speak of the W. of Jordan only—for E. of it all is at present more or less unknown—the prospects from the height of *Beni Na'im*, near Hebron, from the Mount of Olives, from *Neby Samu'el*, from Bethel, from Gerizim or Ebal, from *Jenin*, Carmel, Tabor, *Safed*, the Castle of *Baniās*, the *Kubbet en-Nasr* above Damascus, are known to many travellers. Their peculiar charm resides in their wide extent, the number of spots historically remarkable which are visible at once, the limpid clearness of the air, which brings the most distant objects comparatively close, and the consideration that in many cases the feet must be standing on the same ground, and the eyes resting on the same spots which have been stood upon and gazed at by the most famous patriarchs, prophets, and heroes, of all the successive ages in the eventful history of the country. These views are a feature in which Palestine is perhaps approached by no other country, certainly by no country whose history is at all equal in importance to the world. 29. A few words must be said in general description of the maritime lowland, which intervenes between the sea and the highlands, and of which detailed accounts will be found under the heads of its great divisions. This region, only slightly elevated above the level of the Mediterranean, extends without interruption from *el-Arish*, south of Gaza, to Mount Carmel. It naturally divides itself into two portions, each of about half its length:—the lower one the wider; the upper one the narrower. The lower half is the Plain of the Philistines—Philistia, or, as the Hebrews called it, the *Shephelah* (SEPELEA) or Lowland. The upper half is the SHARON or Saron of the Old and New Testaments, the "Forest country" of Josephus and the LXX. Viewed from the sea this maritime region appears as a long low coast of white or cream-colored sand, its slight undulations rising occasionally into mounds or cliffs, which in one or two places (e. g. *Jaffa*) almost aspire to the dignity of headlands. 30. Such is its appearance from without. But from within, when traversed, or overlooked from some point on those blue hills, the prospect is very different. The Philistine Plain is on an average fifteen or sixteen miles in width from the coast to the first beginning of the belt of hills, which forms the gradual approach to the highland of the mountains of Judah. The plain is in many parts almost a dead level, in others gently undulating in long waves; here and there low mounds or hillocks, each crowned with its village, and more rarely still a hill overtopping the rest, like *Tell es-Sâfiéh* (Blanchegarde; Gath?), the seat of some fortress of Jewish or Crusading times. The larger towns, as *Gaza* and *Ashdod*, which stand near the shore, are surrounded with huge groves of olive, sycamore and palm, as in the days of David (1 Chr. xxvii. 28). The whole plain appears to consist of brown loamy soil, light, but rich, and almost without a stone. It is to this absence of stone that the disappearance of its ancient towns and villages is to be traced. Now, as when the Philistines possessed it, one enormous field of wheat covers the wide expanse between the hills and the sand dunes of the sea-shore, without interruption of any kind—no break or hedge, hardly even

a single olive-tree. Its fertility is marvellous; for the prodigious crops which it raises are produced, and probably have been produced almost year by year, for the last forty centuries, without any of the appliances which we find necessary for success. 31. The Plain of Sharon is much narrower than Philistia. It is about ten miles wide from the sea to the foot of the mountains, which are here more abrupt than those of Philistia, and without the intermediate hilly region there occurring. At the same time it is more undulating and irregular than the former, and crossed by streams from the central hills, some of them of considerable size, and containing water during the whole year. The soil is extremely rich, varying from bright red to deep black, and producing enormous crops of weeds or grain, as the case may be. 32. The tract of white sand already mentioned as forming the shore line of the whole coast, is gradually encroaching on this magnificent region. In the S. it has buried Ashkelon, and in the N. between Cesarea and Jaffa the dunes are said to be as much as three miles wide and 300 feet high. Probably the Jews never permanently occupied more than a small portion of this region. Its principal towns were, it is true, allotted to the different tribes (Josh. xv. 45-47; xvi. 3, GEZER; xvii. 11, DOR, &c.); but this was in anticipation of the intended conquest (xiii. 3-6). (PHILISTINES.) 33. In the Roman times this region was considered the pride of the country, and some of the most important cities of the province stood in it—CESAREA, ANTIPATRIS, Diospolis (= LYDDA). The one ancient port of the Jews, the "beautiful" city of JOPPA, occupied a position central between the *Shephelah* and Sharon. Roads led from these various cities to each other, to Jerusalem, Neapolis, and Sebaste in the interior, and to Ptolemais and Gaza on the N. and S. The commerce of Damascus, and, beyond Damascus, of Persia and India, passed this way to Egypt, Rome, and the infant colonies of the West; and that traffic and the constant movement of troops backward and forward must have made this plain one of the busiest and most populous regions of Syria at the time of Christ. 34. The characteristics already described are hardly peculiar to Palestine. Her hilly surface and general height, her rocky ground and thin soil, her torrent-beds wide and dry for the greater part of the year, even her belt of maritime lowland—these she shares with other lands, though it would perhaps be difficult to find them united elsewhere. But there is one feature in which she stands alone—the Jordan—the one river of the country. 35. Properly to comprehend this, we must cast our eyes for a few moments N. and S., outside the narrow limits of the Holy Land. From N. to S.—from Antioch to 'Akabah at the tip of the eastern horn of the Red Sea, Syria is cleft by a deep and narrow trench running parallel with the coast of the Mediterranean, and dividing, as if by a fosse or ditch, the central range of maritime highlands from those further E. At two points only in its length is the trench interrupted—by the range of Lebanon and Hermon, and by the high ground S. of the Dead Sea. Of the three compartments thus formed, the northern is in the valley of the Orontes; the southern is the *Wady el-'Arâbâh*; while the central one is the valley of the Jordan, the 'ARABAH of the Hebrews, the *Aulôn* of the Greeks, and the *Ghôr* of the Arabs. The central of its three divisions is the only one with which we have at present to do. The river is elsewhere described in detail (JORDAN); but it, and the valley through which it rushes down its extraordinary descent,

must be here briefly characterized. 36. The Valley begins with the river at its remotest springs of *Hâsbeiya* on the N. W. side of Hermon, and accompanies it to the lower end of the Dead Sea, a length of about 150 miles. During the whole of this distance its course is straight, and its direction nearly due N. and S. The springs of *Hâsbeiya* are 1,500 feet above the level of the Mediterranean, and the northern end of the Dead Sea is 1,317 feet below it, so that between these two points the valley falls with more or less regularity through a height of more than 3,000 feet. But though the river disappears at this point, the valley still continues its descent below the waters of the Dead Sea till it reaches a further depth of 1,308 feet. So the bottom of this extraordinary crevasse is more than 2,600 feet below the surface of the ocean. 37. In width the valley varies. In its upper and shallower portion, as between *Bânîds* and the lake of *Hûleh*, it is about five miles across. Between the *Hûleh* and the Sea of Galilee, as far as we have any information, it contracts, and becomes more of an ordinary ravine or glen. It is in its third and lower portion that the valley assumes its more definite and regular character. During the greater part of this portion, it is about seven miles wide from the one wall to the other. The eastern mountains preserve their straight line of direction, and their massive horizontal wall-like aspect, during almost the whole distance. The western mountains are more irregular in height, their slopes less vertical, and their general line is interrupted. N. of Jericho they recede in a kind of wide amphitheatre, and the valley becomes twelve miles broad, a breadth which it thenceforward retains to the southern extremity of the Dead Sea. 38. Buried as it is between such lofty ranges, and shielded from every breeze, the climate of the Jordan valley is extremely hot and relaxing. Its enervating influence is shown by the inhabitants of Jericho. Whether there was any great amount of cultivation and habitation in this region in the times of the Israelites the Bible does not say; but the palms of JERICHO, and of ABILA (ABEL-SHITTIM), and the extensive balsam and rose gardens of Jericho are spoken of by Josephus, who calls the whole district a "divine spot." 39. All the irrigation necessary for the towns, or for the cultivation which formerly existed, or still exists, in the *Ghôr*, is obtained from the torrents and springs of the western mountains. For all purposes to which a river is ordinarily applied, the Jordan is useless. Alike useless for irrigation and navigation, it is in fact, what its Arabic name (*Sheri'at el-Kebîr*) signifies, nothing but a "great watering-place." 40. But though the Jordan is so unlike a river in the Western sense of the term, it is far less so than the other streams of the Holy Land. It is at least perennial, while, with few exceptions, they are mere winter torrents, rushing and foaming during the continuance of the rain, and quickly drying up after the commencement of summer. For fully half the year, these "rivers," or "brooks," are often mere dry lanes of hot white or gray stones, or tiny rills working their way through heaps of parched boulders. (BROOK 4; RIVER 2.) 41. How far the Valley of the Jordan was employed by the ancient inhabitants of the Holy Land as a medium of communication between the northern and southern parts of the country we can only conjecture. The ancient notices of this route are very scanty. (a.) From 2 Chr. xxviii. 15, we find that the captives taken from Judah by the army of the northern kingdom were sent back from Samaria to Jerusalem by way of

Jericho. It would seem, however, to have been the usual road from the north to Jerusalem (comp. Lk. xvii. 11 with xix. 1). (b.) Pompey brought his army and siege-train from Damascus to Jerusalem (B. C. 40), past Scythopolis and Pella, and thence by Koreæ (*Kerava* at the foot of *Wady Ferrah*?) to Jericho. (c.) Vespasian marched from Emmaus, on the edge of the plain of Sharon, not far E. of *Ramleh*, past Neapolis (*Nāblus*), down to Koreæ, and thence to Jericho. (d.) Antoninus Martyr (about A. D. 600), and possibly Willibald (A. D. 722) followed this route to Jerusalem. (e.) Baldwin I. is said to have journeyed from Jericho to Tiberias with a caravan of pilgrims. (f.) In our own times the whole length of the valley has been traversed by De Bertou, and by Dr. Anderson (geologist to the American expedition), but apparently by few if any other travellers. 42. Monotonous and uninviting as much of the Holy Land will appear from the above description to readers accustomed to the constant verdure, the succession of flowers, the ample streams and the varied surface of our own country—we must remember that its aspect to the Israelites after that weary march of forty years through the desert, and even by the side of the brightest recollections of Egypt that they could conjure up, must have been very different. They entered the country at the time of the Passover, when it was arrayed in the full glory and freshness of its brief springtide, before the scorching sun of summer had had time to wither its flowers and embrown its verdure. Taking all these circumstances into account, and allowing for the bold metaphors of Oriental speech, those wayworn travellers could have chosen no fitter words to express what their new country was to them than—"a land flowing with milk and honey, the glory of all lands." 43. Again, the variations of the seasons may appear to us slight, and the atmosphere dry and hot; but after the monotonous climate of Egypt, the "rain of heaven" must have been a most grateful novelty in its two seasons, the former and the latter—the occasional snow and ice of the winters of Palestine, and the burst of returning spring, must have had double the effect which they would produce on those accustomed to such changes. (DEW; FROST; WIND.) 44. The contrast with EGYPT would tell also in another way. In place of the huge ever-flowing river whose only variation was from low to high, and from high to low again, and which lay at the lowest level of that level country, they found themselves in a land of constant and considerable undulation, where the water, either of gushing spring, or deep well, or flowing stream, could be procured at the most varied elevations, requiring only to be judiciously husbanded and skilfully conducted to find its own way through field or garden. (AGRICULTURE.) 45. It will be seen that, beneath the apparent monotony, there is a variety in the Holy Land really remarkable. There is the variety due to the difference of level between the different parts of the country. There is the variety of climate and of natural appearances, partly from the proximity of the snow-capped Hermon and Lebanon on the north and of the torrid desert on the south. There is also the variety inevitably produced by the presence of the sea—"the eternal freshness and liveliness of ocean." 46. Each of these is continually reflected in the Hebrew literature. The contrast between the highlands and lowlands appears in "going up" to Judah, Jerusalem, Hebron; "going down" to Jericho, Capernaum, Lydda, Cesarea, Gaza, and Egypt. More

than this, the difference is marked in the topographical terms which so abound in, and are so peculiar to, this literature. "The mountain of Judah," "the mountain of Israel," "the mountain of Naphtali," are the names by which the three great divisions of the highlands are designated. The predominant names for the towns of the same district (GIBEAH, GEBÄ, GABA, GIBEON—RAMAH, RAMATHAIM—MIZPEH, ZOPHIM, ZEPHATHAH) all reflect its elevation. On the other hand, the great lowland districts have each their peculiar name—*Shéphelâh* (SEPHELA), SHARON, ARABAH. 47. The differences in climate are no less often mentioned. The Psalmists, Prophets, and historical Books, are full of allusions to the fierce heat of the mid-day sun and the dryness of summer; no less than to the various accompaniments of winter—the rain, snow, frost, ice, and fogs of Jerusalem and the upper country. Even the sharp alternations between the heat of the days and the coldness of the nights, which strike every traveller in Palestine, are mentioned. 48. In the preceding description allusion has been made to many of the characteristic features of the Holy Land. But one defect is even more characteristic—its lack of monuments and personal relics of the nation who possessed it for so many centuries, and gave it its claim to our veneration and affection. In Egypt and Greece, and also in Assyria, as far as our knowledge at present extends, we find a series of buildings, reaching down from the most remote and mysterious antiquity, a chain, of which hardly a link is wanting, and which records the progress of the people in civilization, art, and religion, as certainly as the buildings of the mediæval architects do that of the various nations of modern Europe. We possess also a multitude of objects of use and ornament, belonging to these nations, and pertaining to every station, office, and act in their official, religious, and domestic life. But in Palestine there does not exist a single edifice, or part of an edifice, of which we can be sure that it is of a date anterior to the Christian era. And as with the buildings so with other memorials. With one exception, the museums of Europe do not possess a single piece of pottery or metal work, a single weapon or household utensil, an ornament or a piece of armor, of Israelite make, which can give us the least conception of the manners or outward appliances of the nation before the date of the destruction of Jerusalem by Titus. The coins form the single exception. (MONET.) The following buildings are Jewish in character, though carried out with foreign details:—The tombs of the Kings and of the Judges: the buildings known as the tombs of Absalom, Zechariah, St. James, and Jehoshaphat; the monolith at Siloam—all near Jerusalem (see cut under JEHOSEPHAT, VALLEY OF, and TOMB), the ruined synagogues at *Meirôn* and *Kefr Brim* (a few miles S. W. and W. of Lake Merôm). But there are two edifices which seem to bear a character of their own, and do not so clearly betray the style of the West. These are the enclosure round the sacred cave at Hebron (MACPPELAH); and portions of the western, southern, and eastern walls of the *Haram* at JERUSALEM, with the vaulted passage below the *Aksa*. (TEMPLE.) M. Rénan has named two circumstances which must have had a great effect in suppressing art or architecture amongst the ancient Israelites, while their very existence proves that the people had no genius in that direction. These are (1.) the prohibition of sculptured representations of living creatures, and (2.) the command not to build a temple anywhere

but at Jerusalem.—*The Geology.* Of the geological structure of Palestine our information is but imperfect and indistinct. 1. The main sources of our knowledge are (a.) the observations contained in the *Travels of Russegger*, an Austrian geologist and mining engineer, who visited this among other countries of the East in 1836-'8; (b.) the Report of H. J. Anderson, M. D., an American geologist, formerly Professor in Columbia College, N. Y., who accompanied Captain Lynch in his exploration of the Jordan and the Dead Sea in 1848; and (c.) the Diary of Mr. H. Poole, who visited Palestine on a mission for the British government in 1855. None of these contain any thing approaching a complete investigation, either as to extent or to detail of observations. 2. From the reports of these observers it appears that the Holy Land is a much-disturbed mountainous tract of limestone of the secondary period (jurassic and cretaceous); the southern offshoot of the chain of Lebanon; elevated considerably above the sea-level; with partial interruptions from tertiary and basaltic deposits. It is part of a vast mass of limestone, stretching in every direction except west, far beyond the limits of the Holy Land. The whole of Syria is cleft from north to south by a straight crevasse of moderate width, but extending in the southern portion of its centre division to a truly remarkable depth (2,625 feet) below the sea-level. (SEA, THE SALT.) This crevasse, which contains the principal water-course of the country, is also the most exceptional feature of its geology. It may have been volcanic in its origin; the result of an upheaval from beneath, which has tilted the limestone back on each side, leaving this huge split in the strata; the volcanic force having stopped short at that point in the operation, without intruding any volcanic rocks into the fissure. Or it may have been excavated by the gradual action of the ocean during the immense periods of geological operation. The latter appears to be the opinion of Dr. Anderson; but further examination is necessary before a positive opinion can be pronounced. 3. The limestone consists of two strata, or rather groups of strata. The upper one, which usually meets the eye, over the whole country from Hebron to Hermon, is a tolerably solid stone, varying in color from white to reddish brown, with very few fossils, inclining to crystalline structure, and abounding in caverns. Its general surface has been formed into gently-rounded hills, separated by narrow valleys of denudation occasionally spreading into small plains. 4. This limestone is often found crowned with chalk, rich in flints, the remains of a deposit which probably once covered a great portion of the country. 5. Near Jerusalem the mass of the ordinary limestone is often mingled with large bodies of dolomite (magnesian limestone). It is not stratified. 6. The lower stratum is in two divisions or series of beds—the upper, dusky in color, contorted and cavernous like that just described, but more ferruginous—the lower one dark gray, compact and solid, and characterized by abundant fossils of *cidaris*, an extinct echinus or sea-hedgehog, the spines of which are the well-known “olives” of the convents. The ravine by which one descends from the Mount of Olives to Jericho, cuts through the strata already mentioned. The lower formation differs entirely in character from the upper. Instead of smooth, commonplace, swelling outlines, every thing here is rugged, pointed, and abrupt. 7. After the limestone of Palestine had received the general form which its surface still retains, it was

pierced and broken by large eruptions of lava pushed up from beneath, which has broken up and overflowed the stratified beds, and now appears in the form of basalt or trap. 8. On the west of Jordan these volcanic rocks have been hitherto found only N. of the mountains of Samaria. They are first encountered on the southwestern side of the Plain of Esdrælon. N. of Tabor and W. of Tiberias they abound over a district about twenty miles in diameter. There seem to have been two centres of eruption: one, the most ancient, at or about the *Kurn Hattin* (the traditional Mount of Beatitudes), whence the stream flowed over the declivities of the limestone toward the Lake of Gennesaret; the other—more recent—more to the north, in the neighborhood of *Safed*. 9. The volcanic action which in pre-historic times projected this basalt, has left its later traces in the ancient records of the country, and is even still active in the form of earthquakes. (EARTHQUAKE.) The rocks between Jerusalem and Jericho show many an evidence of these convulsions. Two earthquakes only are recorded as having affected Jerusalem itself—that in the reign of Uzziah, and that at the time of the crucifixion, when “the rocks were rent and the rocky tombs torn open” (Mat. xxvii. 51). 10. But in addition to earthquakes, the hot salt and fetid springs which are found at TIBERIAS, Callirhoë (LASHA ?), and other spots along the valley of the Jordan, and round the basins of its lakes, and the rock-salt, nitre, and sulphur of the Dead Sea are all evidences of volcanic or plutonic action. 11. In the Jordan valley the basalt is frequently encountered. Here, as before, it is deposited on the limestone, which forms the substratum of the whole country. On the western side of the lower Jordan and Dead Sea no volcanic formations have been found. 12. The most extensive and remarkable developments of igneous rocks are on the E. of the Jordan. Over a large portion of the surface from Damascus to the latitude of the south of the Dead Sea, and even beyond that, they occur in the greatest abundance all over the surface. (ARGOB.) The limestone, however, still underlies the whole. 13. The tertiary and alluvial beds are chiefly remarkable in the neighborhood of the Jordan, as forming the floor of the valley, and as existing along the course, and accumulated at the mouths, of the torrents which deliver their tributary streams into the river, and into the Dead Sea. 14. The floor of the JORDAN valley is described by Dr. Anderson as exhibiting throughout more or less distinctly the traces of two independent terraces. The upper one is much the broader of the two. It extends back to the face of the limestone mountains which form the walls of the valley on the east and west. Below this, varying in depth from 50 to 150 feet, is the second terrace, which reaches to the channel of the Jordan, and, in Dr. Anderson's opinion, has been excavated by the river itself before it had shrunk to its present limits, when it filled the whole space between the eastern and western faces of the upper terrace. The inner side of both the upper and lower terrace is furrowed out into conical knolls, by the torrents of the rains descending to the lower level. All along the channel of the river are found mounds and low cliffs of conglomerates, and breccias of various ages, and more various composition. 15. Round the margin of the Dead Sea the tertiary beds assume larger and more important proportions than by the course of the river. The marls, gypsites, and conglomerates continue along the base of the western cliff as

far as the *Wady Sebbeh*, where they attain their greatest development. S. of this they form a sterile waste of brilliant white marl and bitter salt flakes ploughed by the rain-torrents into pinnacles and obelisks. At the southeastern corner of the sea, sandstones begin to display themselves in great profusion, and extend northward beyond *Wady Zurka Mu'in*. 16. A notice of the rich alluvial soil of the wide plains which form the maritime portion of the Holy Land, and also that of Esdrælon, Gennesaret, and other similar plains, will complete our sketch of the geology. The former of these districts is a region of from eight to twelve miles in width, intervening between the central highlands and the sea. It is formed of washings from those highlands, brought down by the heavy rains which fall in the winter months. The soil is a light loamy sand, red in some places, and deep black in others. The actual coast is formed of a very recent sandstone, full of marine shells, which is disintegrated by the waves and thrown on the shore as sand, stopping in many places the outflow of the streams, and causing them to form marshes on the plain. 17. The plain of GENNESARET is under similar conditions, except that its outer edge is bounded by the lake instead of the ocean. It has abundant running water, and a rich soil from the decay of the volcanic rocks on the neighboring heights. 18. The plain of ESDRÆLON lies between two ranges of highland, with a third (the hills separating it from the plain of *'Akka*), at its N. W. end. The soil of this plain is also volcanic, though not so purely so as that of Gennesaret. 19. Bitumen, or asphaltum (the "SLIME" of Gen. xi. 3), is only met with in the valley of Jordan. At *Hāsheiya* it is obtained from pits or wells sunk through a mass of bituminous earth to a depth of about 180 feet. It is also found in small fragments on the shore of the Dead Sea, and occasionally, though rarely, very large masses of it are discovered floating in the water. 20. Sulphur is found on the W. and S. and S. E. portions of the shore of the Dead Sea. Nitre is rare. Rock-salt abounds in large masses. The salt-mound of *Khashm Udsun* at the southern end of the Dead Sea is an enormous pile, 5 miles long by 2½ broad, and some hundred feet in height. (BRIMSTONE; COAL; METALS; MINES; SALT; SEA, THE SALT.)—*The Botany* (abridged and modified from the original article by Dr. J. D. Hooker). The Botany of Syria and Palestine differs but little from that of Asia Minor, which is one of the most rich and varied on the globe. What differences it presents are due to a slight admixture of Persian forms on the eastern frontier, of Arabian and Egyptian on the southern, and of Arabian and Indian tropical plants in the low torrid depression of the Jordan and Dead Sea. On the other hand, Palestine forms the southern and eastern limit of the Asia Minor flora, and contains a multitude of trees, shrubs, and herbs, that advance no further S. and E. Owing, however, to the geographical position and mountainous character of Asia Minor and Syria, the main features of their flora are essentially Mediterranean-European, and not Asiatic. As elsewhere throughout the Mediterranean regions, Syria and Palestine were evidently once thickly covered with forests, which on the lower hills and plains have been either entirely removed, or else reduced to the condition of brushwood and copse; but which still abound on the mountains, and along certain parts of the sea-coast. The flora of Syria, so far as it is known, may be roughly classed under three

principal Botanical regions, corresponding with the physical character of the country. These are (I.) the western or sea-board half of Syria and Palestine, including the lower valleys of the Lebanon and Anti-Lebanon, the plain of Coësyria, Galilee, Samaria, and Judea. (II.) The desert or eastern half, which includes the eastern flanks of Anti-Lebanon, the plain of Damascus, the Jordan and Dead Sea valley. (III.) The middle and upper mountain regions of Mount Casius, and of Lebanon above 3,400 feet, and of Anti-Lebanon above 4,000 feet. These Botanical regions present no definite boundary-line. (I.) *Botany of Western Syria and Palestine*. The flora throughout this district is made up of such a multitude of different families and genera of plants, that it is not easy to characterize it by the mention of a few. Among trees, oaks are by far the most prevalent, and are the only ones that form continuous woods, except the *Pinus maritima* and *Pinus Halepensis* (Aleppo Pine). The most prevalent oak is the *Quercus pseudo-coccifera*, an evergreen oak, erroneously called holly by many travellers, and *Quercus ilex* by others. This is perhaps the commonest plant in all Syria and Palestine, covering as a low dense bush many square miles of hilly country everywhere, but rarely or never growing in the plains. It seldom becomes a large tree, except in the valleys of Lebanon, or where, as in the case of the famous oak of Mamre, it is allowed to attain its full size. The only other oaks that are common are the *Quercus infectoria* (a gall-oak), and *Quercus Agilops*. The *Quercus infectoria* is a small deciduous-leaved tree, found here and there in Galilee, Samaria, and Lebanon. *Quercus Agilops* is the Valonia oak; a low, very stout-trunked, sturdy tree, common in Galilee, especially on Tabor and Carmel, and regarded by Dr. Hooker as the oak of Bashan. The trees of the genus *Pistacia* rank next in abundance to the oak, and of these there are three species in Syria, two wild and most abundant, *Pistacia Lentiscus* (the lentisk or MASTICH TREE), and *Pistacia Terbinthus* (the terbinth or TURPENTINE-TREE), but the third, *Pistacia vera*, which yields the well-known pistachio-nut, is very rare, and chiefly seen in cultivation. (NCTS 1.) The Carob, or Locust-tree, *Ceratonia Siliqua*, ranks perhaps next in abundance to the foregoing trees. (HCSSKs.) The Oriental Plane is far from uncommon, and though generally cultivated, it is to all appearance wild in the valleys of Lebanon and Anti-Lebanon. (PLANE-TREE; CHESTNUT-TREE.) The Sycamore-fig is common in the neighborhood of towns, and attains a large size. (SYCAMORE.) Poplars, especially the aspen and white poplar, are extremely common by streams. (POPLAR.) The Walnut is more common in Syria than in Palestine. (NCTS 2.) Of large native shrubs or small trees almost universally spread over the district are, *Arbutus Andrachne* (Oriental arbutus), which is common in the hilly country from Hebron northward; *Crataegus Aronia* (a species of thorn), which grows equally in dry rocky exposures, as on the Mount of Olives, and in cool mountain-valleys, and yields a large yellow or red haw abundantly sold in the markets. Cypressess are common about villages. (CYPRESS 2.) *Zizyphus Spina-Christi*, Christ's Thorn—often called jujube—the *Nubk* of the Arabs, is most common on dry open plains, as that of Jericho. The *Palurus aculeatus*, also called Christ's Thorn, resembles it a good deal, but is much less common; it abounds in Anti-Lebanon. (THORNS 5.) *Styrax officinalis*, which used to yield the famous Storax, abounds in the

hilly parts of the country. (POPLAR.) *Tamarisk* is common, but seldom attains a large size. *Oleander* (*Nerium Oleander*) is an evergreen shrub, of great beauty and abundance, lining the banks of the streams and lakes in gravelly places, and bearing a profusion of blossoms; supposed by some (so Wood's *Botany*) to be alluded to in Ps. i. 3. xxxvii. 33. (BAY-TREE.) Other still smaller but familiar shrubs are *Phyllirea*; *Rhamnus Alaternus*, and others of that genus (buckthorns); *Rhus Coriaria* (hide or elm-leaved sumach, whose bark is said to be used in tanning all the leather in Turkey [so *Penny Cyclopædia*]); several leguminous shrubs, as *Anagyris fetida*, *Calycotome* and *Genista*; *Coloneaster*; the common bramble, dog-rose and hawthorn (THORNS AND THISTLES); *Elaeagnus* (Oleaster, or wild olive); *Lycium Europæum*; *Agnus castus* (*Vitez agnus-castus*); sweet bay (*Laurus nobilis*); *Ephedra*; *Clematis*; Gum-Cistus (see below); the caper-plant (*Capparis spinosa*; see HYSSOP). Of planted trees and large shrubs, the first in importance is the VINE, which is most abundantly cultivated all over the country, and produces, as in the time of the Canaanites, enormous bunches of grapes. Next to the vine, or even in some respects its superior in importance, ranks the OLIVE, which nowhere grows in greater luxuriance and abundance than in Palestine, where the olive-orchards have from time immemorial formed a prominent feature of the country. It is perhaps most skillfully and carefully cultivated in the neighborhood of Hebron. The FIG forms another most important crop in Syria and Palestine, and one apparently greatly increasing in extent. The quince, APPLE, ALMOND (NUTS 2), walnut, peach, and apricot, are all most abundant field or orchard crops. The POMEGRANATE grows everywhere as a bush: but like the orange, and other less common plants, is more often seen in gardens than in fields. The BANANA is only found near the Mediterranean. Dates are not frequent: they are most common at Haifa (under Mount Carmel) and Jaffa, where the fruit ripens. Of the well-known palm-grove of Jericho no tree is standing. (PALM-TREE.) The *Opuntia*, or Prickly Pear (*Cactus Opuntia*, Linn.), though a native of America, is most abundant throughout Syria. It is in general use for hedging, and its well-known fruit is extensively eaten by all classes. Of dye-stuffs the *Carthamus* (Safflower) and Indigo are both cultivated; and of textiles, FLAX, Hemp, and COTTON. The Carob (*Ceratonia Siliqua*) has already been mentioned among the conspicuous trees. (HUSKS.) The *Cistus* or Rock-rose is the shrub from which Gum-Ladanum was collected in the islands of Candia and Cyprus. (MYRRH 2.) The plants contained in Western Syria and Palestine probably number not less than 2,000 or 2,500, of which perhaps 500 are British wild flowers. The most abundant natural families of plants in West Syria and Palestine are—(1.) *Leguminosæ*, (2.) *Compositæ*, (3.) *Labiatæ*, (4.) *Crucifera*; after which come (5.) *Umbellifera*, (6.) *Caryophyllæ*, (7.) *Boraginæ*, (8.) *Scrophularinæ*, (9.) *Graminæ*, and (10.) *Liliacæ*.—(1.) *Leguminosæ* (leguminous or pod-bearing plants) abound in all situations, especially the genera *Trifolium* (clover, trefoil, &c.), *Trigonella* (LEEKs), *Medicago*, *Lotus*, *Vicia* (the vetches; TARES), and *Orobis*, in the richer soils, and *Astragalus* in enormous profusion in the drier and more barren districts. LENTILES, peas, &c., are cultivated. (AGRICULTURE; GARDEN.) Of the shrubby *Leguminosæ* there are a few species of *Genista* (JUNIPER), *Cytisus*, *Ononis*, *Retama*, *Ana-*

*gyris*, *Calycotome*, *Coronilla*, and *Acacia*. (SHITTAN-TREE.) One species, *Ceratonia Siliqua* (HUSKS), is arboreal.—(2.) *Compositæ* (plants with dense-headed flowers, as daisies, sun-flowers, thistles, asters, &c.). No family of plants more strikes the observer than the *Compositæ*, from the vast abundance of thistles and centauries, and other spring-plants of the same tribe, which swarm alike over the richest plains and most stony hills, often towering high above all other herbaceous vegetation. We can only mention the genera *Centaurea*, *Ficinia*, *Onopordum*, *Cirsium*, *Cynara*, and *Carduus*, as being eminently conspicuous for their numbers or size. (THORNS AND THISTLES; WORMWOOD, &c.).—(3.) *Labiatæ* (labiate plants, including HYSSOP, lavender, marjoram, MINT, sage, &c.) form a prominent feature everywhere, and one all the more obtrusive from the fragrance of many of the genera.—(4.) Of *Crucifera* (cruciferous plants, including the cabbage, turnip, MUSTARD, radish, &c.) there is little to remark. Among the most noticeable are the gigantic mustard, which differs from the common mustard (*Sinapis nigra*) only in size, and the *Anastatica Hierochuntica*, or rose of Jericho. (ROSE).—(5.) *Umbellifera* (umbelliferous plants, including ANISE, dill, CORIANDER, CUMMIN, &c.) present little to remark on save the abundance of fennels and *Bupleurums*. The numerous plants of this order often form a large proportion of the tall rank herbage at the edges of copse-wood and in damp hollows. The gray and spiny *Eryngium*, so abundant on all the arid hills, belongs to this order.—(6.) *Caryophyllæ* (caryophyllaceous plants, including the campion, chickweed, pink, sweet-william, &c.) are not a very conspicuous order, though the abundance of pinks, *Silene* and *Saponaria*, is a marked feature to the eye of the botanist.—(7.) The *Boraginæ* (plants of the borage and heliotrope tribes) are for the most part annual weeds; but some, as the buglosses, are among the most beautiful plants of the country.—(8.) Of *Scrophularinæ* the principal genera are *Scrophularia* (figworts), *Veronica*, *Linaria* (snapdragons), and *Verbascum* (mulleins), the last the most abundant and often gigantic.—(9.) *Graminæ* (the *Grasses*), though very numerous in species, seldom afford a sward as in moister and colder regions. To this order belong also the cultivated cereal plants or "CORN" of the Scriptures, WHEAT, RYE, BARLEY, MILLET, &c. (AGRICULTURE; FOOD; GRASS; HAY, &c.).—(10.) *Liliacæ* (liliaceous or lily-like plants). The variety and beauty of this order in Syria (LILY) is perhaps nowhere exceeded, and especially of the bulb-bearing genera, as tulips, fritillaries, squills, gageas, &c. The GARLIC, LEEKS, ONIONS, hyacinth, &c., also belong to this order.—Of other natural orders, *Geraniacæ* (geraniums) are very numerous and beautiful; *Rutacæ* (RUE, &c.) are common; *Rosacæ* (ROSE, &c.) are not so abundant as in more northern climates; but one remarkable plant, *Poterium spinosum*, covers whole tracts of arid, hilly country. (BUSH.) Botanists place under this order the ALMOND, APPLE, apricot, peach, quince, and other cultivated fruits (see above) as well as brambles (BUSH), THORNS, &c. For other plants, see ASH; BOX-TREE; FITCHES; FLAX; HEATH; HEMLOCK; JUNIPER; MALLOWS; MANDRAKE; MULBERRY-TREES; MYRRH; MYRTLE; NETTLE; PINE-TREE; SPICES; TARES; WILLOWS, &c.—Ferns are extremely scarce, owing to the dryness of the climate, and most of the species belong to the Lebanon flora. One of the most memorable plants of this region, and, indeed, in the whole world, is the celebrated Papyrus of the an-

cients (*Papyrus Antiquorum*). (REED 2.) Of other Cryptogamic plants little is known. *Cucurbitaceae* (CUCUMBERS, MELON, GOURD, &c.), though not included under any of the above heads, are a very frequent order in Syria. The plants of the various orders above-named unite with others to give to the herbage of Palestine that showy character for which it is famous. In the spring and early summer the ground is almost carpeted with gay and delicate flowers.—(II.) *Botany of Eastern Syria and Palestine.* Little or nothing being known of the flora of the range of mountains E. of the Jordan and Syrian desert, we must confine our notice to the valley of the Jordan, that of the Dead Sea, and the country about Damascus. Nowhere can a better locality be found for showing the contrast between the vegetation of the eastern and western districts of Syria than in the neighborhood of Jerusalem. To the W. and S. of that city the valleys are full of the dwarf oak, two kinds of *Pistacia*, besides *Smilax* (sarsaparilla), *Arbutus*, rose, Aleppo Pine, *Rhamnus*, *Phyllirea*, bramble, and *Crataegus Aronia* (see above); but beyond the Mount of Olives not one of these appears. For the first few miles eastward the olive-groves continue, and here and there a carob and lentisk or sycamore occurs, but beyond Bethany these are scarcely seen. On descending 1,000 feet below the level of the sea to the valley of the Jordan, the sub-tropical and desert vegetation of Arabia and W. Asia is encountered in full force. Many plants, wholly foreign to the western district, suddenly appear, and the flora is that of the whole dry country as far E. as the Punjab on the border of India. The commonest plant is the *Zizyphus Spina-Christi*, or *nubb* of the Arabs, forming bushes or small trees. (THORNS.) Scarcely less abundant, and as large, is the *Balanites Aegyptiaca*. (OIL-TREE.) Tamarisks are most abundant. *Acacia Farnesiana* (a leguminous plant allied to the SHITTAH-TREE) is very abundant, and celebrated for the delicious fragrance of its yellow flowers. *Capparis spinosa*, the common caper-plant, flourishes everywhere in the Jordan valley. (HYSSOP.) *Alhagi Maurorum* is extremely common (MANNA); as is the prickly *Solanum Sodomæum*, with purple flowers and globular yellow fruits, commonly known as the Dead Sea apple. On the banks of the Jordan itself the arboreal and shrubby vegetation chiefly consists of *Populus Euphratica* (a species of poplar found all over Central Asia, but not W. of Jordan), tamarisk, *Oxyris alba*, *Periploca* (a genus of twining shrubs), *Acacia vera* (the true acacia; see SHITTAH-TREE), *Prosopis Stephaniana* (also leguminous), *Arundo Donax* (REED), *Lycium*, and *Capparis spinosa* (caper). As the ground becomes saline, *Atriplex Halimus* (MALLOWs) and large *Statice* (sea-pinks) appear in vast abundance, with very many succulent, shrubby, salt-marsh plants of the genera *Salsola*, *Salicornia*, &c. Other very tropical plants of this region are *Zygophyllum coccineum*, *Boerhavia*, *Indigofera* (indigo-plant); several *Astragali*, *Cassias*, *Gymnocarpum*, and *Nitraria*. At the same time thoroughly European forms are common, especially in wet places, as dock, MINT, *Veronica Anagallis* (a smooth, succulent plant, sometimes found in the United States, on the borders of brooks and pools), and *Sium* (a genus of umbelliferous aquatic plants). The small valley of En-gedi ('*Ain Jidy*') is particularly celebrated for the tropical character of its vegetation. Here the *Salvadora Persica*, supposed by some to be the mustard-tree of Scripture, grows. (MCSTARD.) The shores immediately around the

Dead Sea present abundance of vegetation, almost wholly of a saline character, but including non-saline plants, as tamarisks, *Solanum Sodomæum*, and immense brakes of *Arundo Donax*. (REED.—(III.) *Flora of the Middle and Upper Mountain Regions of Syria.* The oak forms the prevalent arboreal vegetation of this region below 5,000 feet. The *Quercus pseudo-coccifera* and *infretoria* are not seen much above 3,000 feet, nor the *Valonia* oak at so great an elevation; but above these heights some magnificent species of oak are found. At the same elevation junipers become common (JUNIPER; CEDAR), but the species have not been satisfactorily made out. But the most remarkable plant of the upper region is certainly the CEDAR. From the heat and extreme dryness of the climate during much of the year, the sterile limestone-soil on the highest summits, and other causes, no part of Lebanon presents a vegetation at all similar, or even analogous, to that of the Alps of Europe, India, or North America. At the elevation of 4,000 feet on Lebanon many plants of the middle and northern latitudes of Europe commence, among which the most conspicuous are hawthorn, dwarf elder, dog-rose, ivy, butcher's broom, a variety of the berberry, honeysuckle, maple, and jasmine. A little higher, at 5,000 to 7,000 feet, occur *Coloneaster*, *Rhododendron ponticum*, primrose, *Daphne Oleoides*, *Poterium*, and several other roses (see above, under I.), *Juniperus communis*, *felidissima* (or *exceles*), and cedar. Still higher, at 7,000–10,000 feet, there is no shrubby vegetation, properly so called, but some small, rounded, harsh, prickly bushes, incline on the *Astragalus Tragacantha*, which yields gum tragacanth most abundantly. At 8,000–9,000 feet the beautiful silvery *Vicia canescens* (a leguminous plant of the vetch kind; TARES) forms large tufts of pale blue, where scarcely any thing else will grow. The most boreal forms, confined to the clefts of rocks, or the vicinity of patches of snow above 9,000 feet, are *Draba* (*Draba* is a genus of cruciferous plants), *Arenaria* (sandwort), one small *Potentilla* (or plant of the cinquefoil kind), a *Festuca* (fescue grass), an *Arabis* like *alpina* (also a cruciferous plant), and the *Oxyria reniformis* (mountain sorrel), the only decidedly Arctic type in the whole country. No doubt, Cryptogamic plants are sufficiently numerous in this region, but none have been collected except ferns, among which are *Cystopteris fragilis*, *Polypodium vulgare* (common polypod), *Nephrodium palidum*, and *Polystichum angulare*.—*Zoology* (abridged and modified from the original article by Messrs. Houghton and Tristram). It will be sufficient in this article to give a general survey of the fauna of Palestine, more particular information being given in the articles which treat of the various animals under their respective names.—*Mammals.* The *Cheiroptera* (bats) are probably represented in Palestine by the species known to occur in Egypt and Syria, but we want precise information on this point. (BAT.) Of the *Insectivora* (animals which feed on insects) we find hedgehogs (*Eriacus Europæus*) and moles (*Talpa vulgaris*, *Talpa cæca* [?]), said to be numerous and destructive (MOLE): doubtless the family of *Soricide* (Shrews) is also represented, but we lack information. Of the *Carnivora* (beasts of prey) are still in Lebanon, the Syrian BEAR (*Ursus Syriacus*), and the panther (*Leopardus varius*; LEOPARD). Jackals and foxes (FOX) are common; the HYENA and WOLF are also occasionally observed; the badger (*Meles Taxus*) is also said to occur in Palestine (Mr. H. Poole mentions it as found in

abundance at Hebron, though naturalists had previously denied the existence of this burrowing quadruped in Palestine [BADGER-SKINS]; the lion is no longer a resident in Palestine or Syria. (FERRET; WEASEL.) A species of squirrel (*Sciurus Syriacus*), termed by the Arabs *Orkidann* (the leaper), and noticed on the lower and middle parts of Lebanon; two kinds of HARE, *Lepus Syriacus*, and *Lepus Aegyptius*; rats and mice, which are said to abound (MOUSE); the jerboa (*Dipus Aegyptius*); the porcupine (*Hystrix cristata*); the short-tailed field-mouse (*Arvicola agrestis*), may be considered as the representatives of the *Rodentia* (gnawing animals). Of the *Pachydermata* (thick-skinned animals), the wild boar (*Sus Scrofa*), frequently met with on Tabor and little Hermon, appears to be the only living wild example. (BEHEMOTH; SWINE; UNICORN.) The Syrian hyrax (CONY) is now but rarely seen. There does not appear to be at present any wild ox in Palestine. (BULL.) Dr. Thomson states that wild goats (Ibex?) are still (see 1 Sam. xxiv. 2) frequently seen in the rocks of En-gedi. The gazelle (*Gazella Dorcas*) occurs not unfrequently in the Holy Land, and is the antelope of the country. The Arabs hunt the gazelles with greyhound and falcon. (PYGARG.) The FALLOW-DEER (*Dama vulgaris*) is said to be not unfrequently observed. (HART; HIND; ROE; ROEBUCK.) Of domestic animals we need only mention the Arabian or one-humped CAMEL, ASS, MULE, HORSE, all of which are in general use. The buffalo (*Bubalus Buffalo*) is common. (BULL.) The ox of the country is small and unsightly in the neighborhood of Jerusalem, but in the richer pastures the cattle, though small, are not unsightly; the common SHEEP of Palestine is the broad-tail (*Ovis laticaudatus*), with its varieties; the GOAT is extremely common everywhere. (CHAMOIS.) Cats and dogs (so Porter, in Kitto) are considered common property, tolerated, but not often domesticated, as among us. (CAT; DOG.)—*Birds*. Mr. Tristram has catalogued and described 322 species of birds (230 land birds, and 92 waders and waterfowl) as found in Palestine, 260 of which are in European lists, and 27 appear peculiar to Palestine and adjacent districts (Fbn.). Vultures, eagles, falcons, kites, owls of different kinds, represent the *Raptorial* order or birds of prey. (EAGLE; GIER-EAGLE; GLEDE; HAWK; KITE; NIGHT-HAWK; OSPRAY; OSSIFRAGE; OWL; VULTURE, &c.) Of the smaller birds may be mentioned, among others, the *Merops Persicus* (Persian bee-eater), the *Upupa Epops* (hoopoe; LAPWING), the *Sitta Syriaca* or Dalmatian nuthatch, several kinds of *Silviadæ* (warblers), the *Cinnyris Osea* (Hosea's sun-bird), the *Ixos xanthopygius* (Palestine nightingale—the finest songster in the country),—the *Amydrus Tristramii* (glossy starling), discovered by Mr. Tristram in the gorge of the Kidron; the hopping thrush (*Crateropus chalybeus*), in the open wooded district near Jericho; the jay of Palestine (*Garrulus melanocephalus*); kingfishers (*Ceryle rudis*, and perhaps *Alcedo ispida*) abound about the Lake of Tiberias and in the streams above the *Hülch*; the RAVEN, and CROW; the *Pastor roseus* (locust-bird or rose-colored starling, the *smurmur* of the Arabs); the common CUCKOO; several kinds of doves (DOVE; TURTLE-DOVE); sand-grouse (*Pterocles*), partridges, francolins, quails, the great bustard, storks, both the black and white kinds, seen often in flocks of some hundreds; herons, curlews, pelicans, sea-swallows (*Sterna*), gulls, &c., &c. "Domestic fowls are not numerous in Palestine. A few barn-door fowls may be seen in the vil-

lages; but ducks, geese, and turkeys are extremely rare" (so Porter, in Kitto). (BITTERN; COCK; CORMORANT; CRANE; HEN; HERON; OSTRICH; PARTRIDGE; PEACOCK; PELICAN; SPARROW; STORK; SWALLOW; SWAN, &c.)—*Reptiles*. Several kinds of lizards occur. The *Lacerta Stello*, Linn., *hardon* of the Arabs, or starry lizard, is very common in ruined walls, and is killed by the Turks, as they think it mimics them saying their prayers. (LIZARD.) The *Waran el hard* (*Psammosaurus Scincus*; "TORTOISE?") is very common in the deserts. The common Greek tortoise (*Tentudo Graeca*) Dr. Wilson observed at the sources of the Jordan; fresh-water tortoises (probably *Emus Caspica*) are found abundantly in the upper part of the country in the streams of Esdrelon and of the higher Jordan valley, and in the lakes. (TORTOISE.) The CHAMELEON (*Chameleo vulgaris*) is common; the crocodile (LEVIATHAN) does not occur in Palestine; the *Monitor Nivoticus* (monitor of the Nile, an allied reptile which grows to the length of five or six feet) has doubtless been confounded with it. In the S. of Palestine especially geckoes and other reptiles of various kinds abound. Of *Ophidians*, there are some species of *Echidna*; a *Naiâ*, several *Tropidonoti*, a *Coronella*, a *Coluber (trivirgatus?)* occur; and on the southern frontier the *Cerastes Hasselquistii* (horned viper) has been observed. (ADDER; ASP; SERPENT; VIPER.) Frogs (*Rana esculenta*) abound in the marshy pools of Palestine; and are of a large size, but are not eaten by the inhabitants. (FROG.) The tree-frog (*Hyla*) and toad (*Bufo*) are also very common.—*Fishes*. The principal kinds which are caught off the shores of the Mediterranean are supplied by the families *Sparidae* (gilt-head, bream, &c.), *Percidae* (perch), *Scomberidae* (mackerel, &c.), *Rainadæ* (ray), and *Pleuronectidae* (flatfish, flounder, sole, &c.). The Sea of Galilee has been always celebrated for its FISH. Burckhardt says, the most common species are the binny (*Cyprinus Lepidotus*, allied to the gold-fish and carp), said sometimes to weigh seventy pounds, and the *mesht*, described as a foot long and five inches broad, with a flat body like the sole, undoubtedly one of the *Labridæ* (wrasse family), and perhaps = *Chronius Niloticus*.—*Molluscs* are numerous. The land-shells may be classified in four groups. In the north of the country the prevailing type is that of the Greek and Turkish mountain region, numerous species of the genus *Clausilia*, and of opaque *Bulimi* and *Pupæ* predominating. On the coast and in the plains the common shells of the E. Mediterranean basin abound, e. g. *Helix Pisana*, *Helix Syriaca*, &c. In the south, in the hill country of Judea, occurs a very interesting group, chiefly confined to the genus *Helix* (SNAIL kind), three subdivisions of which may be typified by *Helix Boissieri*, *Helix Setzena*, *Helix tuberculosa*, recalling, by their thick, calcareous, lustreless coating, the prevalent types of Egypt, Arabia, and Sahara. In the valley of the Jordan the prevailing group is a subdivision of the genus *Bulimus*, rounded, semi-pellucid, and lustrous, very numerous in species, mostly peculiar to the district. (COLORS, Purple, Blue; ONYCHA; PEARL.)—Of the *Crustacea* (crabs, &c.) we know scarcely any thing.—"Insects are so numerous in some parts of the land as to become almost a plague" (Porter, in Kitto). (FLEA; FLY; GNAT; HORNET, &c.) The *Lepidoptera* (butterflies, moths, caterpillars, &c.) are as numerous and varied as might be expected in a land of flowers. All the common butterflies of Southern Europe, or nearly allied congeners, are plentiful in the cultivated plains and on the hill-sides. (MOTH.) Bees

are common. (BEK.) At least three species of scorpions have been distinguished. (SCORPION.) Spiders are common. (SPIDRR.) Locusts occasionally visit Palestine, and do infinite damage. (CATERPILLAR; LOCUST; PALMER-WORM.) Ants are numerous. (ANT.)—Of the *Annelida* (earth-worms, leeches, &c.) we have no information. (HORSE-LEECH; LEECH; WORM.) Of some other divisions of the animal kingdom we are completely ignorant. (CORAL; SPONGE.)—It has been remarked that in its physical character Palestine presents on a small scale an epitome of the natural features of all regions, mountainous and desert, northern and tropical, maritime and inland, pastoral, arable, and volcanic. This fact, which has rendered the allusions in the Scriptures so varied as to afford familiar illustrations to the people of every climate, has had its natural effect on the zoology of the country. In no other district, not even on the southern slopes of the Himalaya, are the typical fauna of so many distinct regions and zones brought into such close juxtaposition.—*The Climate.* 1. *Temperature.* At Jerusalem, January is the coldest month, and July and August the hottest, though June and September are nearly as warm. In January the average temperature is 49°·1 Fahrenheit, and greatest cold 28°; in July and August the average is 78°·4; with greatest heat 92° in the shade and 143° in the sun. The extreme range in a single year was 52°; the mean annual temperature 65°·6. Though varying so much during the different seasons, the climate is on the whole pretty uniform from year to year. The isothermal line of mean annual temperature of Jerusalem passes through California, Alabama (a little N. of Mobile), Gibraltar, and near Madeira, and the Bermudas. According to Dr. Barclay, there is a close analogy in temperature and the periodicity of the seasons between Palestine and California. The heat, though extreme during the four midsummer months, is much alleviated by a sea-breeze from the N. W., which blows with great regularity from 10 A. M. till 10 P. M. The heat is rarely oppressive at Jerusalem, except when the sirocco blows. (WIND.) During January and February snow often falls to the depth of a foot or more, though it may not make its appearance for several years together. Thin ice is occasionally found on pools or sheets of water, but this is of rare occurrence. (FROST.) 2. *Rain.* Dr. Barclay's observations show that the greatest fall of rain at Jerusalem in a single year was 85 inches and the smallest 44, the mean being 61·6 inches. The greatest fall in any one month (December, 1850) was 33·8 inches, and the greatest in three months (December, 1850–February, 1851) 72·4. But the average rain-fall of London during the whole year is only 25 inches, and in the wettest parts of England, e. g. Cumberland and Devon, it rarely exceeds 60 inches. The annual rain-fall at Fort Crawford, Wisconsin, is 30 inches; at Cambridge, Massachusetts, 38 inches (*New American Cyclopædia*); at New Haven, Connecticut, 44 inches; at Charleston, South Carolina, 48 inches (Prof. D. Olmsted). As in the time of our Saviour (Lk. xii. 54), the rains at Jerusalem, &c., come chiefly from the S. or S. W. They commence at the end of October or beginning of November, and continue with greater or less constancy till the end of February or middle of March, and occasionally, though rarely, till the end of April. Between April and November there is, with the rarest exceptions, an uninterrupted succession of fine weather, and skies without a cloud. Thus the year divides itself into

two seasons—"winter and summer"—"cold and heat"—"seed-time and harvest." During the summer the dews are very heavy, and often saturate the traveller's tent as if a shower had passed over it. The nights, especially toward sunrise, are very cold, and thick fogs or mists are common all over the country. Thunder-storms of great violence are frequent during the winter months. (DEW; RAIN; THUNDER.) 3. So much for the climate of Jerusalem. In the lowland districts, the heat is much greater and more oppressive, owing to the quantity of vapor in the atmosphere, the absence of any breeze, the sandy nature of the soil, and the manner in which the heat is confined and reflected by the enclosing heights; perhaps also to the internal heat of the earth, due to the depth below the sea-level of the greater part of the Jordan valley, and the remains of volcanic agency in this very depressed region. The harvest in the Jordan valley is fully a month in advance of that on the highlands, and the fields of wheat are still green on the latter when the grain is being threshed in the former. 4. The climate of the maritime lowland exhibits many of the characteristics of that of the Jordan valley, but, being much more elevated, and exposed on its western side to the sea-breeze, is not so oppressively hot. This district retains much tropical vegetation. Here, also, the harvest is in advance of that of the mountain districts. In the winter months, however, the climate of these regions is very similar to that of the south of France, or the maritime districts of the north of Italy. The preceding article is principally abridged from the original article written, except the *Botany and Zoology*, by Mr. Grove.

**Pal'm** (Heb. *distinguished*, Ges.), second son of Reuben, and father of Eliab (Ex. vi. 14; Num. xxvi. 5, 8; 1 Chr. v. 3); founder of the family of **PALLU-ITES**.

**Pal'm-ites** (fr. Heb.), the = the descendants of **PALLU** (Num. xxvi. 5).

\* **Palm** [palm]. **HAND**; **PALM-TREE**.

\* **Palm'er-ist** [palm-] = the *Palma Chrinti* (*palm of Christ*), or castor-oil plant (Jon. iv. 6, marg.). **GOUD** 1.

**Palm'er-worm** [palm'er-wurm] (i. e. the pilgrim-worm, a voracious, hairy caterpillar, the larva of some butterfly or moth), the A. V. translation of the Heb. *gāzām* (Joel i. 4, ii. 25; Am. iv. 9). Bochart has endeavored to show that *gāzām* denotes some species of **LOCUST**. The Chaldee and Syriac (and so Gesenius and Oedmann) understand some locust larva by the Hebrew word. Tychsen identifies the *gāzām* with the *Gryllus cristatus*, Linn., a South African species of cricket. Mr. Houghton prefers, with Michaelis, Gosse (in Fairbairn), &c., to follow the LXX. (Gr. *kampē*) and Vulgate (L. *cruca*) in rendering the Hebrew word by **CATERPILLAR**. Caterpillars are the larva or immature forms of lepidopterous insects (butterflies, moths, &c.), various sorts of which often do great damage to fruit-trees and other vegetation.

\* **Pal'm-oi** (Heb., see below), a marginal reading in Dan. viii. 13, A. V. text "that certain." It is properly used (so Gesenius) when one points out a person, as with his finger, without calling him by name, like our expressions, "such a one," "Mr.," &c.

**Palm-tree** [palm-] (Heb. *tāmār*; Gr. *phoenix*). Under this generic term many species are botanically included; but we have here only to do with the Date-palm, the *Phoenix dactylifera* of Linnæus. It grew very abundantly in many parts of the Levant,

but was regarded by the ancients as peculiarly characteristic of Palestine and the neighboring regions. The palm-tree is diœcious (i. e. the male and female flowers grow on different trees) and endogenous (i. e. growing from within outward, like the cornstalk).

Date-palm (*Phoenix dactylifera*).—(Fbn.)

The date-palm attains a height of from thirty or forty to seventy or eighty feet. It seldom bears fruit till six or eight (or even ten) years after it is planted, but continues to be productive for 100 years, yielding an average crop of perhaps 100 lbs. for a year (so Dr. Hamilton in Fairbairn). The Arabs feed their camels on the abortive fruit and the date-stones ground down. "From the leaves they make couches, baskets, bags, mats, brushes, and fly-traps; from the trunk, cages for their poultry, and fences for their gardens; and other parts of the tree furnish fuel. From the fibrous webs at the bases of the leaves thread is procured, which is twisted into ropes and rigging; and from the sap, which is collected by cutting off the head of the palm, and scooping out a hollow in its stem, a spirituous liquor is prepared" (*Bennett's Botany*, quoted in Fairbairn). The following places may be enumerated from the Bible as having some connection with the palm-tree, either in the derivation of the name, or in the mention of the tree as growing on the spot. (1.) At ELIM were "twelve wells (fountains) of water, and three-score and ten palm-trees" (Ex. xv. 27; Num. xxxiii. 9). (2.) ELATH (Deut. ii. 8; 1 K. ix. 26; 2 K. xiv.

22, xvi. 6; 2 Chr. viii. 17, xxvi. 2) may likewise mean *the palm-trees*. (3.) No place in Scripture is so closely associated with the subject before us as JERICHO, "the city of palm-trees." Its rich palm-groves are connected with two very different periods—with that of Moses, Joshua, &c. (Deut. xxxiv. 3; Judg. i. 16, iii. 13; 2 Chr. xxviii. 15) on the one hand, and that of the evangelists on the other. What the extent of these palm-groves may have been in the desolate period of Jericho we cannot tell; but they were renowned in the time of the Gospels and Josephus. The Jewish historian mentions the luxuriance of these trees again and again. Herod the Great took great interest in the palm-

Fruit of Date-palm.—(Fbn.)

groves of Jericho. (4.) HAZEON-TAMAR (*the felling of the palm-tree*) is mentioned in the history both of Abraham (Gen. xiv. 7) and of Jehoshaphat (2 Chr. xx. 2); = EN-GEDI. (5.) BAAL TAMAR had the same element in its name, and doubtless the same characteristic in its scenery (Judg. xx. 33). It could not have been far from "the palm-tree of Deborah" (Judg. iv. 5), and may have been (so Stanley) identical with it. (6.) TAMAR (*the palm*) is set before us in the vision of Ezekiel (Ez. xlvii. 19, xlviii. 28). (7.) There is little doubt that Solomon's TADMOR, afterward the famous Palmyra, on another desert frontier far to the N. E. of Tamar, is primarily the same word. (8.) BETHANY (*the house of dates*) reminds us that the palm grew in the neighborhood of the Mount of Olives. This helps our realization of our Saviour's entry into Jerusalem, when the people "took branches of palm-trees and went forth to meet Him" (Jn. xii. 13; comp. Neh. viii. 15). (9.) PHENICIA or PHENICE (Acts xi. 19, xv. 3, xx. 2) is in all probability derived from the Greek *phoiniz* = a palm. (10.) PHENICE (Gr. *Phoiniz*) in the island of Crete, the harbor which St. Paul was prevented by the storm from reaching (xxvii. 12), has doubtless the same derivation.—From the passages where there is a literal reference to the palm-tree, we may pass to the emblematical uses of it in Scripture.

Under this head may be classed the following:—(1.) The striking appearance of the tree, its uprightness and beauty, would naturally suggest the giving of its name occasionally to women ("TAMAR," Gen. xxxviii. 6; 2 Sam. xlii. 1, xiv. 27). (2.) We have notices of the employment of this form in decorative art, both in the real Temple of Solomon (2 Chr. iii. 6; 1 K. vi. 29, 32, 35, vii. 36), and in the visionary temple of Ezekiel (Ez. xl. 16 ff., xli. 18 ff.). This work seems to have been in relief. It was a natural and doubtless customary kind of ornamentation in Eastern architecture. Jeremiah compares the idols of the heathen (rigid and motionless?) to the palm-tree (Jer. x. 4, 5). (3.) With a tree so abundant in Judea, and so marked in its growth and appearance, as the palm, it seems rather remarkable that it does not appear more frequently in the imagery of the O. T. There is, however, in Psalm xcii. 12 the familiar comparison, "The righteous shall flourish like the palm-tree," which suggests a world of illustration, whether respect be had to the orderly and regular aspect of the tree, its fruitfulness, the perpetual greenness of its foliage, or the height at which the foliage grows, as far as possible from earth and as near as possible to heaven. Perhaps no point is more worthy of mention, if we wish to pursue the comparison, than the elasticity of the fibre of the palm, and its determined growth upward even when loaded with weights. (4.) The passage in Rev. vii. 9, where the glorified of all nations are described as "clothed with white robes and palms in their hands," might seem to us a purely classical image, drawn from the Greek GAMES, the victors in which carried palms in their hands. But palm-branches were used by Jews in token of victory and peace (1 Mc. xiii. 61; 2 Mc. x. 7, xiv. 4; comp. Jn. xii. 13, and 2 Ead. ii. 44-47).—The industrial and domestic uses of the palm (see above) are very numerous: but there is no clear allusion to them in the Bible. That the ancient Orientals, however, made use of WINE and HONEY obtained from the palm-tree is evident from Herodotus, Strabo, and Pliny. It is indeed possible that the honey mentioned in some places may be palm-sugar. (In 2 Chr. xxxi. 5 the margin has "dates.") There may also in Cant. vii. 8, "I will go up to the palm-tree, I will take hold of the boughs thereof," be a reference to climbing for fruit. So in ii. 3 and elsewhere (e. g. Ps. i. 3) the fruit of the palm may be intended: but this cannot be proved. It is curious that this tree, once so abundant in Judea, is now comparatively rare, except in the Philistine plain, and in the old Phenicia about *Beirut*. A few years ago there was just one palm-tree at Jericho; but that is now gone (so Dr. Howson). Old trunks are washed up in the Dead Sea. In Vespasian's medal (JERUSALEM) the daughter of Judea is mourning under a palm-tree.

**Palsy** [pawl'ze], contracted from *paralysis* (L.) fr. Gr. *paraluxis* (literally = *a loosening aside*, then *a disabling the nerves* of a part of the body, afterward also of the whole body, L. & S., Celsus). MEDICINE.

**Pal'ti** (Heb. *deliverance of Jehorah*, Ges.), a Ben-jamite, one of the twelve spies; son of Raphu (Num. xiii. 9).

**Pal'ti-el** (Heb. *deliverance of God*), son of Azzan, and prince of Issachar (Num. xxxiv. 26); one of the twelve appointed to divide Canaan among the tribes W. of Jordan.

**Pal'tite** (fr. Heb. = *descendant of Pelet* or *one from Pelet*? perhaps a corruption of PELONITE), the.

Helez "the Paltite" is named in 2 Sam. xxiii. 26 among David's "thirty" valiant men.

**Pam-phyli-a** [-fil-] (L. fr. Gr. = *every tribe*, i. e. a people made up of various tribes, Hdt.), one of the coast-regions in the S. of Asia Minor, having CILICIA on the E., PISIDIA on the N., and LYCIA on the W. In the invasion of Greece under Xerxes B. C. 480, while Cilicia contributed one hundred ships and Lycia fifty, Pamphylia sent only thirty. The name probably then embraced little more than the crescent of comparatively level ground between the Taurus Mountains and the sea. Pamphylia came under the Roman sway after the death of ATTALUS, king of ASIA, B. C. 133. In St. Paul's time not only was Pamphylia a regular province, but the Emperor Claudius had united Lycia with it, and probably also a good part of Pisidia. It was in Pamphylia that St. PAUL first entered Asia Minor, after preaching the Gospel in Cyprus. He and Barnabas sailed up the river Cestrus to PERGA (Acts xiii. 13). Here John Mark left them (ib., xv. 38). Here they preached the Gospel on their return from the interior (xiv. 24, 25). We may conclude, from Acts ii. 10, that there were many Jews in the province (comp. 1 Mc. xv. 23); and possibly Perga had a synagogue. The two missionaries finally left Pamphylia by its chief seaport, ATTALIA. Many years afterward St. Paul sailed near the coast, through "the sea of Cilicia and Pamphylia" (Acts xxvii. 5).

**Pan.** Of the six Hebrew words so rendered in the A. V., viz. *ciyôr* (translated usually "LAVER"), *mahâbath* or *machâbath*, *mas'éth*, *sir*, *pârûr*, *tsélâhâh* or *tsélâchâh*, two, viz. *mahâbath* or *machâbath* and *mas'éth*, seem to imply a shallow pan or plate, such as is used by Bedouins and Syrians for baking or dressing rapidly their cakes of meal, such as were used in legal oblations (ALTAR; BREAD): the others, especially *sir* (usually translated "CALDRON" or "POT"), a deeper vessel or caldron for boiling meat, placed during the process on three stones.

**Pan'ag** (Heb., of uncertain etymology, Ges.; see below), perhaps an article of commerce exported from Palestine to Tyre (Ez. xxvii. 17 only). A comparison of the passage in Ezekiel with Gen. xliii. 11, leads to the supposition (so Mr. Bevan) that *panmag* = some of the spices grown in Palestine. The LXX., in rendering it *kasia* (= *cassia*), favors this opinion. Hitzig observes that a similar term occurs in Sanscrit (*pannaga*) for an aromatic plant. The Syriac version understands by it *millet* (*Panicum miliaceum*). Gesenius says, "perhaps a kind of *pastry* or *sweet cake*." Fairbairn (on Ez. i. c.), Henderson, and the A. V. favor its being the name of a place where fine wheat grew (comp. MINNITH).

**Pap'per** (fr. PAPHROS). WRITING.

\* **Pap'per-reeds**, the A. V. translation of Heb. plural *'ârôth* (Is. xix. 7 only). Gesenius, Rosenmüller, Fürst, J. A. Alexander (on Is. i. c.), Barnes, Ayre, &c., make *'ârôth* = *naked places*, without trees, i. e. meadows or grassy places on the banks of the Nile. The Hebrew here translated "brooks" in the A. V. is the singular *yêôr*, applied to the Nile. BROOK 2; REED 2; WRITING.

**Paphos** (Gr., said to have been named from its founder, son of Pygmalion), a town at the W. end of CYPRUS, connected by a road with SALAMIS at the E. end. According to Greek writers, Paphos was founded about the time of the Trojan war (1184 B. C.). PAUL and Barnabas travelled, on their first missionary expedition, "through the isle," from Salamis to Paphos (Acts xiii. 6). At Paphos ELYMAS was struck blind, and Sergius Paulus became a believer.

The great characteristic of Paphos was the licentious worship of Aphrodite or Venus, who was here fabled to have risen from the sea. (ASHTORETH.) Her temple, however, was at "Old Paphos," now called *Kuklia*. The harbor and the chief town were at "New Paphos," at some little distance. The place is still called *Baffa*.

**Pa-py'rus** (L. fr. Gr. *papyrus*). REED 2.

**Para-ble** (Heb. *māshāl*; Gr. *parabolē*; L. *parabola*). The distinction between the Parable and one cognate form of teaching has been discussed under the article **FABLE**, originally, like this, by Prof. Plumptre. Something remains to be said (I.) as to the word, (II.) as to the Parables of the Gospels, (III.) as to the laws of their interpretation. (I.) The word *parable*, in Gr. *parabolē*, does not of itself imply a narrative. The juxtaposition of two things, differing in most points, but agreeing in some, is sufficient to bring the comparison thus produced within the etymology of the word. In Hellenistic Greek, however, it acquired a wider meaning, co-extensive with that of the Hebrew *māshāl*, for which the LXX. writers, with hardly an exception, make it the equivalent. That word (= *similitude*) had a large range of application, and was applied sometimes to the shortest proverbs (1 Sam. x. 12, xxiv. 13; 2 Chr. vii. 20, A. V. "proverb" in these), sometimes to dark prophetic utterances (Num. xxiii. 7, 18, xxiv. 3; Ez. xx. 49, A. V. "parable" in these), sometimes to enigmatic maxims (Ps. lxxviii. 2, A. V. "parable;" Prov. i. 6, A. V. "proverb"), or metaphors expanded into a narrative (Ez. xii. 22, A. V. "proverb"). (POETRY, HEBREW; PROVERBS, BOOK OR; RIDDLE.) In the N. T. the word *parabolē* is used with a like latitude. While attached most frequently to the illustrations, which have given it a special meaning, it is also applied to a short saying or "proverb" (Lk. iv. 23), to a mere comparison without a narrative (Mat. xxiv. 32), to the figurative character of the Levitical ordinances (Heb. ix. 9, A. V. "figure"), or of single facts in patriarchal history (xi. 19, A. V. "figure"). II. The Parable differs from the Myth in being the result of a conscious deliberate choice, not the growth of an unconscious realism, personifying attributes, appearing, no one knows how, in popular belief. It differs from the ALLEGORY, in that the latter, with its direct personification of ideas or attributes, and the names which designate them, involves really no comparison. The virtues and vices of mankind appear, as in a drama, in their own character and costume. The allegory is self-interpreting. The parable demands attention, insight, sometimes an actual explanation. It differs lastly from the proverb, in that it must include a similitude of some kind, while the proverb may assert, without a similitude, some wide generalization of experience. To understand the relation of the parables of the Gospels to our Lord's teaching, we must go back to the use made of them by previous or contemporary teachers. They appear frequently in the Gemara and Midrash (VERSIONS, ANCIENT [TARGUM]), and are ascribed to Hillel, Shammai, and other great Rabbis of the two preceding centuries. Later Jewish writers have seen in this employment of parables a condescension to the ignorance of the great mass of mankind, who cannot be taught otherwise. For them, as for women or children, parables are the natural and fit method of instruction. It may be questioned, however, whether this represents the use made of them by the Rabbis of our Lord's time. The language of the Son of Sirach confines them to the scribe who de-

votes himself to study (Eccl. xxxviii. 33, xxxix. 2, 3). For the great mass of men the scribes and teachers of the Law probably had simply rules and precepts, often, perhaps, burdensome (Mat. xxiii. 3, 4), forms of prayer (Lk. xi. 1), appointed times of fasting and hours of devotion (Mk. ii. 18). The parable was made the instrument for teaching the young disciple to discern the treasures of wisdom of which the "accursed" multitude were ignorant. The teaching of our Lord at the commencement of His ministry was, in every way, the opposite of this. The Sermon on the Mount may be taken as the type of the "words of grace" which He spake, "not as the scribes." So for some months He taught in the synagogues and on the sea-shore of Galilee, as He had before taught in Jerusalem, and as yet without a parable. But then, there comes a change. The direct teaching was met with scorn, unbelief, hardness, and He seems for a time to abandon it for that which took the form of parables. The question of the disciples (Mat. xiii. 10) implies that they were astonished. Their Master was speaking to the multitude in the parables and dark sayings which the Rabbis reserved for their chosen disciples. Here, for them, were two grounds of wonder. Here, for us, is the key to the explanation which He gave, that He had chosen this form of teaching because the people were spiritually blind and deaf (xiii. 13), and in order that they might remain so (Mk. iv. 12). Two interpretations have been given of these words. (1.) Spiritual truths, it has been said, are in themselves hard and uninviting. Men needed to be won to them by that which was more attractive. The parable was to educate those who were children in age or character. (2.) Others, again, have seen in this use of parables something of a penal character. Men have set themselves against the truth, and therefore it is hid from their eyes, and presented to them in forms not easy for them to recognize it. To the inner circle of the chosen it is given to know the mysteries of the kingdom of God. To those who are without, all these things are done in parables.—Neither view is wholly satisfactory. Each contains a partial truth. The worth of parables, as instruments of teaching, lies in their being at once a test of character, and in their presenting each form of character with that which, as a penalty or blessing, is adapted to it. They withdraw the light from those who love darkness. They protect the truth which they enshrine from the mockery of the scoffer. They leave something even with the careless which may be interpreted and understood afterward. They reveal, on the other hand, the seekers after truth. These ask the meaning of the parable, and will not rest until the teacher has explained it. In this way the parable did its work, found out the fit hearers and led them on. Each parable may have been repeated with greater or less variation (e. g. of the Pounds and Talents, Mat. xxv. and Lk. xix.; of the Supper, Mat. xxii. and Lk. xiv.). Probably there were many of which we have no record (Mat. xiii. 34; Mk. iv. 33). In those which remain it is possible to trace something like an order. (A.) There is the group which have for their subject the laws of the Divine Kingdom. Under this head we have—1. The Sower (Mat. xiii.; Mk. iv.; Lk. viii.). 2. The Wheat and the Tares (Mat. xiii.). 3. The Mustard-Seed (xiii.; Mk. iv.). 4. The Seed cast into the Ground (iv.). 5. The Leaven (Mat. xiii.). 6. The Hid Treasure (xiii.). 7. The Pearl of Great Price (xiii.). 8. The Net cast into the Sea (xiii.). (B.) The next parables,

uttered some months afterward, are of a different type and occupy a different position. They are drawn from the life of men rather than from the world of nature. Often they occur, not, as in Mat. xiii., in discourses to the multitude, but in answers to questions of the disciples or other inquirers. They are such as—9. The Two Debtors (Lk. vii.). 10. The Merciless Servant (Mat. xviii.). 11. The Good Samaritan (Lk. x.). 12. The Friend at Midnight (xi.). 13. The Rich Fool (xii.). 14. The Wedding Feast (xii.). 15. The Fig-Tree (xiii.). 16. The Great Supper (xiv.). 17. The Lost Sheep (Mat. xviii.; Lk. xv.). 18. The Lost Piece of Money (xv.). 19. The Prodigal Son (xv.). 20. The Unjust Steward (xvi.). 21. The Rich Man and Lazarus (xvi.). 22. The Unjust Judge (xviii.). 23. The Pharisee and the Publican (xviii.). 24. The Laborers in the Vineyard (Mat. xx.). (C.) Toward the close of our Lord's ministry, the parables are again theocratic, but the phase of the Divine Kingdom, on which they chiefly dwell, is that of its final consummation. To this class we may refer—25. The Pounds (Lk. xix.). 26. The Two Sons (Mat. xxi.). 27. The Vineyard let out to Husbandmen (xxi.; Mk. xii.; Lk. xx.). 28. The Marriage-Feast (Mat. xxii.). 29. The Wise and Foolish Virgins (xxv.). 30. The Talents (xxv.). 31. The Sheep and the Goats (xxv.). The greater part of the parables of the first and third groups belong to St. Matthew, emphatically the Evangelist of the kingdom. Those of the second are found for the most part in St. Luke. III. Lastly, there is the law of interpretation. It has been urged by some writers, by none with greater force or clearness than by Chrysostom, that there is a scope or purpose for each parable, and that our aim must be to discern this, not to find a special significance in each circumstance or incident. It may be questioned, however, whether this canon of interpretation is likely to lead us to the full meaning of this portion of our Lord's teaching. In the great patterns of interpretation which He himself has given us, there is more than this. Not only the sower, and the seed, and the several soils have their counterparts in the spiritual life, but the birds of the air, the thorns, the scorching heat, have each of them a significance. The explanation of the wheat and tares, given with less fulness, is equally specific. It may be inferred from these two instances that we are, at least, justified in looking for a meaning even in the seeming accessories of a parable. But no such interpretation can claim authority. The very form of the teaching makes it probable that there may be, in any case, more than one legitimate explanation. The outward fact in nature, or in social life, may correspond to spiritual facts at once in God's government of the world, and in the history of the individual soul. A parable may be at once ethical, and in the highest sense of the term prophetic. There is thus a wide field open to the discernment of the interpreter. There are also restraints upon the mere fertility of his imagination. (1.) The analogies must be real, not arbitrary. (2.) The parables are to be considered as parts of a whole, and the interpretation of one is not to override or encroach upon the lessons taught by others. (3.) The direct teaching of Christ presents the standard to which all our interpretations are to be referred, and by which they are to be measured. JESUS CHRIST.

**Par'a-dise** (Heb. *pardês*; Gr. *paradeisos*; L. *paradisi*; see below). Questions as to the nature and locality of Paradise as = the garden of Gen. ii. and

iii. are discussed under EDEN 1. It remains to trace the history of the word and the associations connected with it, as it appears in the later books of the O. T. and in the language of Christ and His apostles. The word itself, though it appears in the above form in Neh. ii. 8, and in Eccl. ii. 5, and Cant. iv. 13, may be classed, with hardly a doubt, as of Aryan rather than of Shemitic origin. It first appears in Greek as coming straight from Persia. Greek lexicographers classify it as a Persian word. Modern philologists accept the same conclusion with hardly a dissentient voice (so Prof. Plumptre, original author of this article). Gesenius, Fürst, &c., compare the Sanscrit *parādēpa* (= a region of surpassing beauty), Armenian *pardēn* (= a garden [or park] around the house), &c. In Xenophon the word occurs frequently, and we get vivid pictures of the scene which it implied. A wide, open park, enclosed against injury, yet with its natural beauty unspoiled, with stately forest-trees, many of them bearing fruit, watered by clear streams, on whose banks roved large herds of antelopes or sheep—this was the scenery which connected itself in the mind of the Greek traveller with the word *paradeisos*, and for which his own language supplied no precise equivalent. Through the writings of Xenophon, and the general admixture of Orientalisms in the later Greek after the conquests of Alexander, the word gained a recognized place, and the LXX. chose it for a new use which gave it a higher worth, and secured for it a more perennial life. They applied the word to the garden of Eden (Gen. ii. 15, iii. 23; Joel ii. 3), and used it whenever there was any allusion to the fair region which had been the first blissful home of man. The valley of the Jordan was "as the paradise of God" (Gen. xiii. 10; compare Ez. xxxi. 1-9). "Paradise," with no other word to qualify it, became the bright region which man had lost, which was guarded by the flaming sword. Soon a new hope sprang up. There was a paradise still into which man might hope to enter. It is a matter of some interest to ascertain with what associations the word was connected in the minds of the Jews of Palestine and other countries at the time of our Lord's teaching, what sense therefore we may attach to it in the writings of the N. T. In this as in other instances we may distinguish three modes of thought, each with marked characteristics, yet often blended together in different proportions, and melting one into the other by hardly perceptible degrees. Each has its counterpart in the teaching of Christian theologians. The language of the N. T. stands apart from and above all. (1.) To the Idealist school of ALEXANDRIA, of which Philo is the representative, paradise was nothing more than a symbol and an allegory. Spiritual perfection was the only paradise. The trees that grew in it were the thoughts of the spiritual man; their fruits were life, and knowledge, and immortality. The four rivers from one source are the four virtues of the later Platonists, each derived from the same source of goodness. (2.) The Rabbinic schools of Palestine, on the contrary, had their descriptions, definite and detailed, a complete topography of the unseen world. It was far off in the distant East, further than the foot of man had trod. It was a region of the world of the dead, of *Shēd* (HELL), in the heart of the earth. Gehenna was on one side, with its flames and torments. Paradise on the other, the intermediate home of the blessed. Or, again, paradise was neither on the earth, nor within it, but above it, in the third HEAVEN, or in some higher orb. Or there

were two paradises, the upper and the lower—one in heaven, for those who had attained the heights of holiness—one in earth, for those who had lived but decently, and the heavenly paradise was sixty times as large as the whole lower earth. Each had seven palaces with their appropriate dwellers. Angels there arrayed the righteous dead in new robes of glory, and placed on their heads diadems of gold and pearls. Paradise had no night. Its pavement was of precious stones. Fragrant, healing plants grew on the banks of its streams. From this lower paradise the souls rose on Sabbaths and feast-days to the higher, where every day Jehovah held council with His saints. (3.) Out of the discussions and theories of the Rabbis, there grew a broad popular belief, fixed in the hearts of men, accepted without discussion, blending with their best hopes. Their prayer for the dying or the dead was that his soul might rest in paradise, in the garden of Eden. The belief of the Essenes, as reported by Josephus, may be accepted as a fair representation of the thoughts of those who, like them, were not trained in the Rabbinical schools, living in a simple and more child-like faith. To them, accordingly, paradise was a far-off land, a region where there was no scorching heat, no consuming cold, where the soft west-wind from the ocean blew for evermore. The visions of 2 Esd. ii. 19, &c., though not without an admixture of Christian thoughts and phrases, may represent this phase of feeling.—It is with this popular belief, rather than with that of either school of Jewish thought, that the language of the N. T. connects itself. The old word is kept, and is raised to a new dignity or power. It is significant, indeed, that the word "paradise" nowhere occurs in the public teaching of our Lord, or in His intercourse with His own disciples. Connected as it had been with the thoughts of a sensuous happiness, it was not the fittest or best word for those whom He was training to rise out of sensuous thoughts to the higher regions of the spiritual life. For them, accordingly, "the kingdom of Heaven," "the kingdom of God," are the terms most dwelt on. With the thief dying on the cross the case was different. We can assume nothing in the robber-outlaw but the most rudimentary forms of popular belief. The answer to his prayer gave him what he needed most, the assurance of immediate rest and peace. The word Paradise spoke to him, as to other Jews, of repose, shelter, joy—the greatest contrast possible to the thirst, and agony, and shame of the hours upon the cross (Lk. xxiii. 42, 43). There is a like significance in the general absence of the word from the language of the Epistles. Here also it is found nowhere in the direct teaching. It occurs only in passages that are apocalyptic, and, therefore, almost of necessity symbolic (2 Cor. xii. 3; Rev. ii. 7). The thing, though not the word, appears in the closing visions of Rev. xxii. (4.) The eager curiosity which prompts men to press on into the things behind the veil, has led them to construct hypotheses more or less definite as to the intermediate state, and these have affected the thoughts which Christian writers have connected with the word paradise. Patristic and later interpreters follow in the footsteps of the Jewish schools. To Origen and others of a like spiritual insight, paradise = a region of life and immortality—the third heaven. The word enters largely, as might be expected, into the apocryphal literature of the early Church. Where the true Gospels are most reticent, the mythical (Gospel of Nicodemus; Acts of Philip)

are most exuberant. (5.) The creed of Islam presented to its followers the hope of a sensuous paradise, and the Persian word was transplanted through it into the languages spoken by them (Arabic, &c.). HEAVEN; LIFE; RESURRECTION; SAVIOUR, &c.

**Pa'rah** (Heb. *heifer-town*, Ges.), a city of Benjamin, named only in the lists of the conquest (Josh. xviii. 23). In the *Onomasticon* ("Aphra") it is specified by Jerome only, as five miles E. of Bethel. No traces of the name have yet been found in that position; but the name *Fārah* exists further to the S. E., attached to the *Wady Fārah*, and to a site of ruins at its junction with the *Wady Suweinit*, six or seven miles N. E. of Jerusalem, and may represent the ancient Parah. ENOX.

**Pa'ran** (Heb. probably = *region with caverns*, Ges.), **El-pa'ran** (fr. Heb. = OAK [or terebinth] of Paran, Ges.). 1. It is shown under KADESH that the name Paran corresponds probably in general outline with the desert *Et-Tih*. Speaking generally, the wilderness of SINAI (Num. x. 12, xii. 16), in which the march-stations of TABERAH and HAZEROth (*Hudhera*?) are probably included toward its N. E. limit, may be said to lie S. of the *Et-Tih* range, the wilderness of Paran N. of it, and the one to end where the other begins. That of Paran is a stretch of chalky formation, the chalk being covered with coarse gravel, mixed with black flint and drifting sand. In this wide tract, which extends N. to join "the wilderness of BEER-SHEBA" (Gen. xxi. 21, compare 14), and E. probably to the wilderness of ZIN, ISHMAEL dwelt, Nabal fed his flocks in CARMEL 2, near where David took refuge in "the wilderness of Paran" (1 Sam. xxv. 1 ff.). Between the wilderness of Paran and that of Zin no strict demarcation exists in the narrative, nor do the natural features of the region, so far as yet ascertained, yield a well-defined boundary. The name of Paran seems, as in the story of Ishmael, to have predominated toward the western extremity of the northern desert frontier of *Et-Tih*, and in Num. xxxiv. 4 the wilderness of Zin, not Paran, is spoken of as the southern border of the land or of the tribe of Judah (Josh. xv. 3). Chedorlaomer, when he smote the peoples S. of the Dead Sea, returned round its southwestern curve to "El-paran" (Gen. xiv. 6).—Was there, then, a Paran proper, or definite spot to which the name was applied? From Deut. i. 1 it would seem there must have been. This is confirmed by 1 K. xi. 18, from which we further learn the fact of its being an inhabited region; and the position required by the context here is one between Midian and Egypt. If we are to reconcile these passages by the aid of the personal history of Moses, it seems certain that the local Midian of the Sinaitic peninsula must have lain near the Mount Horeb itself (Ex. iii. 1, xviii. 1-5). The site of the "Paran" of Hadad the Edomite must then have lain to the N. W. or Egyptian side of Horeb. This brings us, if we assume any principal mountain, except *Serbal*, of the whole Sinaitic group, to be "*the Mount of God*," so close to the *Wady Feirdn* that the similarity of name, supported by the recently expressed opinion of eminent geographers (Ritter, Stanley, &c.), may be taken as establishing substantial identity (so Mr. Hayman). Burckhardt describes this wady as narrowing in one spot to 100 paces, and adds that the high mountains adjacent, and the thick woods which clothe it, contribute with the bad water to make it unhealthy, while it is for productiveness the finest valley in the whole peninsula, containing four miles

of gardens and date-groves. At *Feirân* in *Wady Feirân* are the ruins of the ancient town of Pharan or Faran, which had a Christian population and a bishop as early as A. D. 400 and for centuries afterward. Remarkable ancient inscriptions, found on

the rocks of this region, especially in the *Wady Mukatleb* (= *written valley*), about twenty miles N.W. of *Feirân*, have been by some considered as the work of the Israelites during their forty years' sojourn, by others as the work of Christian pilgrims

Ruins of *Feirân* in *Wady Feirân*.—From Laborde, *Voyage de l'Arabie Pétrée*.—(Fbn.)

from Egypt to Mount Sinai in the fourth century, by others (perhaps preferably) as made by the native inhabitants of the mountains (Rbn. i. 126 ff.). (WILDERNESS OF THE WANDERING.)—2. "Mount" Paran occurs only in two poetic passages (Deut. xxxiii. 2; Hab. iii. 3), in one of which SINAI and Seir appear as local accessories, in the other, Teman and (ver. 7) Cushan and Midian. Not unlikely, if *Wady Feirân* = the Paran proper, the name "Mount" Paran may have been either assigned to the special member (the northwestern) of the Sinaitic mountain-group which lies adjacent to the wady, or to the whole Sinaitic cluster. That special member is the five-peaked ridge of *Serbâl*.

**Par'bar** (Heb., see below), a word occurring in Hebrew and A. V. only in 1 Chr. xxvi. 18. From this passage, and from the context, it would seem (so Mr. Grove) that Parbar was some place on the west side of the TEMPLE enclosure, the same side with the causeway and the gate SHALLECHETH. The latter was close to the causeway, and we know from its remains that the causeway was at the extreme north of the western wall. Parbar therefore must have been S. of Shallecheth. As to the meaning of the name, the Rabbis generally translate it *the outside place*; while modern authorities take it as = Heb. *parvârim* in 2 K. xxiii. 11 (A. V. "suburbs"). Mr. Grove would therefore identify the Parbar with the suburb mentioned by Josephus in describing Herod's Temple, as lying in the deep valley which separated the west wall of the Temple from the city opposite it; in other words, the southern end of the Tyropœon. Parbar is possibly (so Mr. Grove) an ancient Jebusite name. Gesenius (edited by Robinson, 1854) makes Parbar (and so *parvârim* in 2 K. xxiii. 11) "probably = the open porticoes surrounding the courts of the Temple, from which was the entrance to the cells or chambers," and traces it to the Persian.

\* **Parched** [parcht] usually = *scorched*, or *having*

*the surface baked or burnt*, as "parched corn," i. e. wheat (Lev. xxiii. 14; Ru. ii. 14, &c.), "parched places" (Jer. xvii. 6). In Is. xxxv. 7 the Heb. *shârâb*, in A. V. "parched ground," = the *mirage* (= Ar. *serâb*; so Gesenius, Fürst, J. A. Alexander, Barnes, &c.), an optical phenomenon common in the deserts of Arabia and Africa, &c., in which the heated sands appear to be a pool or lake of water; and the expression, "the mirage shall become a pool," signifies that the apparent lake shall become a real lake, or the sand-pool a pool of water, the change being refreshing and joyous.

**Parch'ment.** NEW TESTAMENT; OLD TESTAMENT; WRITING.

\* **Par'don.** ATONEMENT; FAITH; JUSTIFICATION; KING; LAW; SAVIOUR, &c.

**Par'lor**, or **Par'lour** (fr. Fr., properly a room for *speaking* or conversation), a word in English usage = the common room of the family, and hence probably in A. V. = the king's audience-chamber, so used in reference to Egion (Judg. iii. 20-25). It is the A. V. translation of three Hebrew words (viz. *heder* or *cheder*, 1 Chr. xxviii. 11; *lishâh*, 1 Sam. ix. 22; *âliyâh*, Judg. iii. 20 ff.), each usually translated "chamber." HORSE.

**Par-mash'ta** (Heb. = Sansc. for *superior*, Ges.), one of Haman's ten sons slain by the Jews in Shushan (Esth. ix. 9).

**Par'me-nas** (Gr. *abiding, permanent*, Schl.), one of the seven deacons, "men of honest report, full of the Holy Ghost and wisdom" (Acts vi. 5). There is a tradition that he suffered martyrdom at Philippi in the reign of Trajan. DEACON.

**Par'nach** [-nak] (Heb., probably = *nimble* or *delicate*, Ges.), father or ancestor of Eliashaph prince of Zebulun (Num. xxxiv. 25).

**Pa'rosh** (Heb. a *flca*, Ges.). Descendants of Pa-rosh, in number 2,172, returned from Babylon with Zerubbabel (Ezr. ii. 3; Neh. vii. 8). Another detachment of 150 males, with Zechariah at their

head, accompanied Ezra (Ezr. viii. 3). Seven of the family had married foreign wives (x. 25). They assisted in building the wall of Jerusalem (Neh. iii. 25), and sealed the covenant with Nehemiah (x. 14). In the last-quoted passage the name Parosh may denote the family or its representative, and not an individual.

**Par-shan'da-tha**, or **Par-shan-da'tha** (Heb. fr. Chal. = *interpreter of the law*? more probably fr. Pers., Ges.; fr. old Pers. = *given by prayer*, Fñ.), the eldest of Haman's ten sons slain by the Jews in Shushan (Esth. ix. 7).

\* **Part**, in Neh. iii. 9-18, the A. Y. translation of Heb. *pelech* (= *circle, circuit, district*, Ges.), used with reference to Jerusalem, Beth-haccerem, Mizpah, Beth-zur, and Keilah. Gesenius understands here by the Hebrew translated in A. V. "part of Jerusalem," the *circuit or district round Jerusalem*, &c., over which a particular "ruler" (Heb. *sar* = *a prefect, leader, chief*; see CAPTAIN 1) had jurisdiction. Wilton (in Fairbairn) supposes the Hebrew here means *a rounded summit, a mound or knoll*, with reference to the hill or two hills ("half parts") on which the cities were built.

**Parthians** (= *people of Parthia*; Gr. *Parthoi*; L. *Parthi*; from a Scythian word denoting *exiles* or *banished persons*, the Parthians having been driven out of Scythia by the other Scythians [so Isidorus]) occurs only in Acts ii. 9, where it designates Jews settled in Parthia. Parthia Proper was the region stretching along the southern flank of the mountains which separate the great Persian desert from the desert of *Kharezem*. It lay S. of Hyrcania, E. of Media, and N. of Sagartia, and was S. E. of the Caspian Sea, in the modern province of *Khorassan*. The ancient Parthians are called a "Scythic" race, and probably (so Rawlinson) belonged to the great Turanian family. (TONGUES, CONFUSION OF.) Really nothing is known of them till about the time of Darius Hystaspis, when they are found in the district which so long retained their name, and appear as faithful subjects of the Persian monarchs. Herodotus speaks of them as contained in the 16th satrapy of Darius. They served against Greece in the army of Xerxes. In the final struggle between the Greeks and Persians they remained faithful to the latter, serving at Arbela; but offering only a weak resistance to Alexander when, on his way to Bactria, he entered their country. In the division of Alexander's dominions they fell to the share of Eumenes, and Parthia for a while was counted among the territories of the Seleucidæ. About B. C. 236, however, they revolted, and under Arsaces succeeded in establishing their independence. Thus began the great Parthian empire. Parthia, in the mind of the writer of the Acts, would designate this empire, which extended from India to the Tigris, and from the Chorasmian (now *Kharezem*) desert to the shores of the Southern Ocean. Hence the prominent position of the name Parthians in the list of those present at Pentecost. Parthia was a power almost rivalling Rome—the only existing power which had tried its strength against Rome and not been worsted in the encounter. The Parthians defeated the Roman army under Crassus near Carrhæ (HARAN), B. C. 53. They took JERUSALEM B. C. 40. Their armies were composed of clouds of horsemen, all expert riders; their chief weapon was the bow. They shot their arrows with wonderful precision while their horses were in full career; and were proverbial for inflicting injury with these weapons on their pursuers. For 150

years Rome especially dreaded them. Trajan attacked them A. D. 114-116, and deprived them of a considerable portion of their territories (Armenia, Mesopotamia, &c.). In the next reign (Hadrian's) the Parthians recovered these losses; but their military strength was now on the decline; and in A. D. 226 the last of the Arsacidæ was forced to yield his kingdom to the revolted PERSIANS, who, under Artaxerxes, son of Sassan, succeeded in reëstablishing their empire. The Parthian dominion lasted for nearly five centuries. Its success is to be regarded as the subversion of a tolerably advanced civilization by a comparative barbarism—the substitution of Tartar coarseness for Aryan polish and refinement.

**Partridge**, the A. V. translation of the Heb. *kôrd* (1 Sam. xxvi. 20, and Jer. xvii. 11 only). This translation is supported by many of the old versions. The "hunting this bird upon the mountains" (1 Sam. xxvi. 20) entirely agrees with the habits of two well-known species of partridge, viz. *Caccabis saxatilis* (the Greek partridge, which frequents rocky and hilly ground covered with brushwood) and *Caccabis Heyii* (Hey's partridge, or the little desert partridge, which abounds [so Trm.] on the slopes of the Dead Sea basin). It will be seen by the marginal reading that the passage in Jeremiah may be interpreted thus:—"As the partridge gathereth young which she hath not brought forth." It has been asserted that the partridge is in the habit of stealing the eggs from the nests of its congeners and of sitting upon them, and that when the young are hatched they forsake their false parent. This is a mere fable, in which, however, the ancient Orientals may have believed. The explanation of the rendering of the text of the A. V. is obviously as follows (so Mr. Houghton):—"Partridges were often "hunted" in ancient times as they are at present, either by hawking or by being driven from place to place till they become fatigued, when they are knocked down by the clubs or *zerwaltys* of the Arabs. Thus, nests were no doubt constantly disturbed, and many destroyed: as, therefore, is a partridge which is driven from her eggs, so is he that enricheth himself by unjust means—"he shall leave them in the midst of his days." The expression in Eccles. xi. 30, "like as a partridge taken (and kept) in a cage," clearly refers, as Shaw has observed, to "a decoy

Greek Partridge (*Caccabis saxatilis*).

partridge." The common European partridge (*Perdix cinerea*), as well as the Barbary (*Caccabis petrosa*) and red-leg (*Caccabis rufa*), do not occur in Palestine (so Mr. Houghton). In America none of the above

species are found; but the name partridge is given to different birds more or less closely allied to them, in New England to the ruffed grouse (*Bonasa umbellus*), in the Middle and Southern States to the American QUAIL (*Ortyx Virginianus*), &c. (*New Amer. Cyc.*) The flesh of all the birds of this name is highly esteemed for food.

**Pa-ra'ah** (Heb. *blossoming*, Ges.), the father of Jehoshaphat, Solomon's commissary in Issachar (1 K. iv. 17).

**Par-va'im** (fr. Heb. = OPHIR, Boch., &c.; contracted from SEPHARVAIM, Harenberg, Knobel; fr. Sansc. = *Oriental regions*, Wilford, Ges.), the name of an unknown place or country whence the gold was procured for the decoration of Solomon's Temple (2 Chr. iii. 6).

**Pa'sach** [-sak] (Heb. *cut up or off*, Ges.), son of Japhlet; a chief of Asher (1 Chr. vii. 33).

**Pas-dan'mim** (Heb.) = EPHESE-DANNIM (1 Chr. xi. 13).

**Pa-se'ah** (Heb. *lame*, Ges.). 1. Son of Eshton, in the genealogies of Judah (1 Chr. iv. 12).—2. Ancestor of certain Nethinim who returned with Zerubbabel (Ezr. ii. 49); = PHASEAH.—3. Father or ancestor of the Jehoiada who assisted in repairing the "old gate" of Jerusalem under Nehemiah (Neh. iii. 6); perhaps = No. 2.

**Pash'ur** (Heb. *prosperity round about*, Ges.). 1. Name of one of the families of priests of the chief house of Malchijah (Jer. xxi. 1, xxxviii. 1; 1 Chr. ix. 12, xxiv. 9; Neh. xi. 12). In Nehemiah's time this family appears to have become a chief house, and its head the head of a course (Ezr. ii. 38; Neh. vii. 41, x. 3). Six "sons of Pashur" in Ezra's time were husbands of foreign wives (Ezr. x. 22). The family was named probably from Pashur the son of Malchijah, who in the reign of Zedekiah was one of the chief princes of the court (Jer. xxxviii. 1). He was sent, with others, by Zedekiah to Jeremiah when Nebuchadnezzar was preparing his attack upon Jerusalem (xxi.). Somewhat later, Pashur joined with several other chief men in petitioning the king that Jeremiah might be put to death as a traitor, and casting him into the "dungeon" where he nearly perished (xxxviii.).—2. Another priest, "the son of IMMER," and "chief governor of the house of the Lord," showed himself as hostile to Jeremiah, in the reign of Jehoiakim, as his namesake the son of Malchijah did afterward, and put him in the stocks by the gate of Benjamin. For this indignity to God's prophet, Pashur was told by Jeremiah that his name was changed to MAGOR-MISADIB (*Terror on every side*), and that he and all his house should be carried captives to Babylon and there die (xx. 1-6).—3. Father of GEDALIAH 4 (xxxviii. 1); perhaps = No. 2.

**Pas'sage** (Heb. *'eber, ma'abâr, ma'ebdârâh*), in plural (Jer. xxii. 20), probably = the mountain-region of ABARIM, E. of Jordan. It also denotes a river-ford or a mountain-gorge or pass (1 Sam. xiii. 23; Is. xvi. 2, &c.).

\* **Pas-sen-gers**, the A. V. translation of the Heb. pl. participle *'ôl-rim* = *passers by*, Ges. (Prov. ix. 15 [A. V. "passengers who go right on their ways," literally *passers by on the way*, they that pass by the way, Ges.]; Ez. xxxix. 11 twice, 14, 15). "The valley of the passengers" (ver. 11) designates the valley where Gog's multitude was to be buried, ironically (so Fbn. on Ez. l. c.), because the persons buried in it had only intended to pass through the land and return after they had made all their own. HAMON-GOG.

\* **Pas'sion** (fr. L.; Gr. *pas-chô, pathein*) = *suffering*, applied to the suffering of the Lord JESUS CHRIST on the cross (Acts i. 3 only).

**Pass'o-ver** (Heb. *pesah or pesach* = *a passing over, sparing, deliverance*, Ges.; Gr. *pascha*), the first of the three great annual festivals of the Israelites, celebrated in the month Abib or Nisan, from the 14th to the 21st. The following are the principal passages in the Pentateuch relating to the Passover:—Ex. xii. 1-51, xiii. 8-10, xxiii. 14-19, xxxiv. 18-26; Lev. xxiii. 4-14; Num. ix. 1-14, xxviii. 16-25; Deut. xvi. 1-6.—I. *Institution and First Celebration of the Passover*. When the chosen people were about to be brought out of Egypt, the word of the Lord came to Moses and Aaron, commanding them to instruct all the congregation of Israel to prepare for their departure by a solemn religious ordinance. On the tenth day of Abib, the head of each family was to select from the flock either a lamb or a kid, a male of the first year, without blemish. If his family was too small to eat the whole of the lamb, he was permitted to invite his nearest neighbor to join the party. On the fourteenth day of the month, he was to kill his lamb while the sun was setting (so Mr. Clark, original author of this article).<sup>1</sup> He was then to take the blood in a basin, and with a sprig of hyssop to sprinkle it on the two side-posts and the lintel of the door of the house. The lamb was then thoroughly roasted, whole. It was expressly forbidden that it should be boiled, or that a bone of it should be broken. Unleavened bread and bitter herbs were to be eaten with the flesh. No male who was uncircumcised was to join the company. Each one was to have his loins girt, to hold a staff in his hand, and to have shoes on his feet. He was to eat in haste, and it would seem that he was to stand during the meal. The number of the party was to be calculated as nearly as possible, so that all the flesh of the lamb might be eaten; but if any portion of it happened to remain, it was to be burned in the morning. No morsel of it was to be carried out of the house. The legislator was further directed to inform the people of God's purpose to smite the first-born of the Egyptians, to declare that the Passover was to be to them an ordinance forever, to give them directions respecting the order and duration of the festival in future times, and to enjoin upon them to teach their children its meaning, from generation to generation. When the message was delivered to the people they bowed their heads in worship. The lambs were selected, on the fourteenth they were slain, and the blood sprinkled, and in the following evening, after the fifteenth day of the month had commenced, the first paschal meal was eaten. At midnight the first-born of the Egyptians were smitten. (PLAGUES, THE TEN, 10.) The king and his people were now

<sup>1</sup> The expression in Ex. xii. 6 and Lev. xxiii. 5, &c., A. V. "In the evening," or "at even," margin "between the two evenings," has been variously interpreted. The Karaites and Samaritans, with Aben Ezra, Gesenius, and most modern commentators, understand by it the space between the setting of the sun and the moment when the stars become visible or darkness sets in. But the Pharisees and Rabbins, including Rashi, Kimchi, Saadia, &c. make it mean the space from afternoon (when the sun begins to decline from its vertical or noontide point toward the W.) to the disappearing of the sun. Hence the daily sacrifice might be killed at 12.30, p. m., on a Friday. But as the paschal lamb was slain after the daily sacrifice, it generally took place from 2.30 to 5.30, p. m. (So Dr. Ginsburg, in Kitto. For a different and apparently less correct interpretation of the Rabbinist view, see the article DAY, JOSEPHUS [B. J. vi. 9, § 3] says they slay the lambs from the ninth to the eleventh hour, i. e. from 3 to 5, p. m.)

urgent that the Israelites should start immediately, and readily bestowed on them supplies for the journey. In such haste did the Israelites depart, on that very day (Num. xxxiii. 3), that they packed up their kneading-troughs containing the dough prepared for the morrow's provisions, which was not yet leavened.—II. *Observance of the Passover in later times.* 1. In Exodus xii. and xiii. there are not only distinct references to the observance of the festival in future ages (e. g. xii. 2, 14, 17, 24–27, 42, xiii. 2, 5, 8–10), but several injunctions which were evidently not intended for the first passover, and which indeed could not possibly have been observed (e. g. xii. 16). In the later notices of the festival in the books of the Law particulars are added which appear as modifications of the original institution (Lev. xxiii. 10–14; Num. xxviii. 16–25; Deut. xvi. 1–6). Hence it is not without reason that the Jewish writers (Mishna, &c.) have laid great stress on the distinction between “the Egyptian Passover” and “the perpetual Passover.” 2. The following was the general order of the observances of the Passover in later times according to the direct evidence of Scripture:—On the 14th of Nisan every trace of leaven was put away from the houses, and on the same day every male Israelite, not laboring under bodily infirmity or ceremonial impurity, was to appear before the Lord at the national sanctuary with an offering of money in proportion to his means (Ex. xxiii. 15; Deut. xvi. 16, 17). Devout women sometimes attended, as Hannah and Mary (1 Sam. i. 7; Lk. ii. 41, 42). As the sun was setting (see note <sup>1</sup>), the lambs were slain, and the fat and blood given to the priests (2 Chr. xxxv. 5, 6). The lamb was then roasted whole, and eaten with unleavened bread and bitter herbs; no portion of it was left until the morning. The same night, after the 15th of Nisan had commenced, the fat was burned by the priest and the blood sprinkled on the altar (xxx. 16, xxxv. 11). On the 15th, the night being passed, there was a holy convocation, and during that day no work might be done, except the preparation of necessary food (Ex. xii. 16). On this and the six following days an offering in addition to the daily sacrifice was made of two young bullocks, a ram, and seven lambs of the first year, with meat-offerings, for a burnt-offering, and a goat for a sin-offering (Num. xxviii. 19–23). On the 16th of the month, “the morrow after the sabbath” (i. e. after the day of holy convocation), the first sheaf of harvest was offered and waved by the priest before the Lord, and a male lamb was offered as a burnt sacrifice with a meat and drink offering. Nothing necessarily distinguished the four following days of the festival, except the additional burnt and sin offerings, and the restraint from some kinds of labor. (FESTIVALS.) On the seventh day, the 21st of Nisan, there was a holy convocation, and the day appears to have been one of peculiar solemnity. As at all the festivals, cheerfulness was to prevail during the whole week, and all care was to be laid aside (Deut. xxvii. 7). 3. (a.) *The Paschal Lamb.* After the first Passover in Egypt there is no trace of the lamb having been selected before it was wanted. In later times, we are certain that it was sometimes not provided before the 14th of the month (Lk. xxii. 7–9; Mk. xiv. 12–16). The law formally allowed the alternative of a kid (Ex. xii. 5), but a lamb was preferred, and was probably nearly always chosen. It was to be faultless and a male, in accordance with the established estimate of animal perfection (see Mal. i. 14). (BLEMISH.) Either the head of the family, or any

other person who was not ceremonially unclean (2 Chr. xxx. 17), took it into the court of the Temple on his shoulders. The Mishna gives a particular account of the arrangement made in the court of the Temple for killing the lambs in regular order, receiving and throwing out the blood, &c. As the paschal lamb could be legally slain, and the blood and fat offered, only in the national sanctuary (Deut. xvi. 2), it of course ceased to be offered by the Jews after the destruction of Jerusalem. The spring festival of the modern Jews strictly consists only of the feast of unleavened bread. (b.) *The Unleavened Bread.* There is no reason to doubt that the unleavened bread eaten in the Passover and that used on other religious occasions were of the same nature. It might be made of wheat, spelt, barley, oats, or rye, but not of rice or millet. It appears to have been usually made of the finest wheat flour, in clean vessels, and with all possible expedition. It was probably formed into dry, thin biscuits, not unlike those used by the modern Jews. (c.) *The Bitter Herbs and the Sauce.* According to the Mishna the BITTER HERBS (Ex. xii. 8) might be endive, chicory, wild lettuce, or nettles. These plants were important articles of food to the ancient Egyptians. The sauce into which the herbs, the bread, and the meat were dipped as they were eaten (Jn. xiii. 26; Mat. xxvi. 23) is not mentioned in the Pentateuch. According to Bartenora it consisted of only vinegar and water; but others describe it as a mixture of vinegar, figs, dates, almonds, and spice. (d.) *The Four Cups of Wine.* There is no mention of wine in connection with the Passover in the Pentateuch; but the Mishna strictly enjoins that there should never be less than four cups of it provided at the paschal meal even of the poorest Israelite. Two of them appear to be distinctly mentioned in Lk. xxii. 17–20. “The cup of blessing” (1 Cor. x. 16) was probably the latter one of these, and is generally considered to have been the third of the series, after which a grace was said; though a comparison of Lk. xxii. 20 (where it is called “the cup after supper”) with the Mishna (Pes. x. 7), and the designation “cup of the Hallel,” might rather suggest that it was the fourth and last cup. (e.) *The Hallel.* The service of praise (Heb. *hallel* = praise; see HALLELUJAH) sung at the Passover is not mentioned in the Law. It consisted of the series of Psalms, cxiii.–cxviii. The first portion, comprising Ps. cxiii. and cxiv., was sung in the early part of the meal, and the second part after the fourth cup of wine. This is supposed to have been the “hymn” sung by our Lord and His apostles (Mat. xxvi. 30; Mk. xiv. 26). (f.) *Mode and Order of the Paschal Meal.* Adopting as much from Jewish tradition as is not inconsistent or improbable, the following appears to have been the usual custom:—All work, except that belonging to a few trades connected with daily life, was suspended for some hours before the evening of the 14th Nisan. The Galileans desisted from work the whole day; the Jews of the south only after the middle of the tenth hour, i. e. 3.30 p. m. It was not lawful to eat any ordinary food after mid-day. No male was admitted to the table unless he was circumcised, even if he was of the seed of Israel (Ex. xii. 48). Neither, according to the letter of the law, was any one of either sex admitted who was ceremonially unclean (Num. ix. 6); but this rule was on special occasions liberally applied (2 Chr. xxx.). The Rabbins expressly state that women were permitted, though not commanded, to partake; but the Karaites, in more recent times, excluded all but

full-grown men. It was customary for the number of a party to be not less than ten. It was perhaps generally under twenty, but might be 100, if each could have a piece of the lamb as large as an olive. When the meal was prepared the family was placed round the table, the head of the family taking a place of honor, probably somewhat raised above the rest. There is no reason to doubt that the ancient Hebrews sat as at their ordinary MEALS. Our Lord and His apostles conformed to the usual custom of their time, and reclined (Lk. xxii. 14, &c.). When the party was arranged, the first cup of wine was filled, and a blessing was asked by the head of the family on the feast, as well as a special one on the cup. The bitter herbs were then placed on the table, and a portion of them eaten, either with or without the sauce. The unleavened bread was handed round next, and afterward the lamb was placed on the table in front of the head of the family. Before the lamb was eaten the second cup of wine was filled, and the son, in accordance with Ex. xii. 26, asked his father the meaning of the feast. In reply, an account was given of the sufferings of the Israelites in Egypt, and of their deliverance, with a particular explanation of Deut. xxvi. 5, and the first part of the Hallel (Ps. cxiii., cxiv.) was sung. This being gone through, the lamb was carved and eaten. The third cup of wine was poured out and drunk, and soon afterward the fourth. The second part of the Hallel (Ps. cxv.-cxviii.) was then sung. A fifth wine-cup appears to have been occasionally produced, but perhaps only in later times. What was termed the greater Hallel (Ps. cxx.-cxxxviii.) was sung on such occasions. The meal being ended, it was unlawful for any thing to be introduced in the way of dessert. The Israelites who lived in the country appear to have been accommodated at the feast by the inhabitants of Jerusalem in their houses, so far as there was room for them (Lk. xxii. 10-12; Mat. xxvi. 18). Those who could not be received into the city encamped without the walls in tents, as the pilgrims now do at Mecca. (g.) *The first Sheaf of Harvest.* The offering of the omer, or sheaf, is mentioned nowhere in the Law except Lev. xxiii. 10-14. It is there commanded that when the Israelites reached the land of promise, they should bring, on the 16th of the month, "the morrow after the sabbath" (i. e. the day of holy convocation), the first sheaf of the harvest to the priest, to be waved by him before the Lord. The sheaf was of barley, as the grain first ripe (2 K. iv. 42). (FIRST-FRUIT.) (h.) *The Hagigah or Chagigah.* The daily sacrifices are enumerated in the Pentateuch only in Num. xxviii. 19-23, but reference is made to them in Lev. xxiii. 8. Besides these public offerings, there was another sort of sacrifice connected with the Passover, as well as with the other great festivals, called in the Talmud *Hagigah* or *Chagigah* (= festivity). It was a voluntary peace-offering made by private individuals. The victim might be from the flock or the herd, male or female, but without blemish. The offerer laid his hand upon its head, and slew it at the door of the sanctuary. The blood was sprinkled on the altar, and the fat of the inside, with the kidneys, was burned by the priest. The breast was given to the priest as a wave-offering, and the right shoulder as a heave-offering (Lev. iii. 1-5, vii. 29-34). What remained of the victim might be eaten by the offerer and his guests on the day on which it was slain, and on the day following; but if any portion was left till the third day it was burned (16-18). The eating of this free-will peace-offering was an occasion of social

festivity connected with the festivals, and especially with the Passover. The principal day for sacrificing this at the Passover was the 15th Nisan, but it might be on any day of the festival, except the Sabbath. It might be boiled or roasted (2 Chr. xxxv. 13). (i.) *Release of Prisoners.* It is a question whether the release of a prisoner at the Passover (Mat. xxvii. 15; Mk. xv. 6; Lk. xxiii. 17; Jn. xviii. 39) was a custom of Roman origin resembling what took place at the *lectisternium* (L. = the feast of the gods, when food was placed before their images lying on couches in the streets), and, in later times, on the birthday of an emperor; or an old Hebrew usage belonging to the festival, which Pilate allowed the Jews to retain. (k.) *The Second, or Little Passover.* When the Passover was celebrated the second year, in the wilderness, certain men were prevented from keeping it, owing to their being defiled by contact with a dead body, and they came anxiously to Moses to inquire what they should do. He was accordingly instructed to institute a second Passover, to be observed on the 14th of the following month, for the benefit of any who had been hindered from keeping the regular one in Nisan (Num. ix. 11). The Talmudists called this the Little Passover. According to them, the rites of this lasted only one day, the *Hallel* was sung only when the lamb was slaughtered, and it was not necessary for leaven to be put out of the houses. (l.) *Observances of the Passover recorded in Scripture.* Of these, seven are of chief historical importance:—1. The first Passover in Egypt (Ex. xii.). 2. The first kept in the desert (Num. ix.). 3. That celebrated by Joshua at Gilgal (Josh. v. 1). 4. That which Hezekiah observed on the occasion of his restoring the national worship, in the second month, the proper time for the Little Passover (2 Chr. xxx.). 5. The Passover of Josiah in the eighteenth year of his reign (2 Chr. xxxv.). 6. That celebrated by Ezra after the return from Babylon (Ezr. vi.). 7. The last Passover of our Lord's life. (PURIM.)—III. *The Last Supper.* 1. Whether or not the meal at which our Lord instituted the sacrament of the Eucharist (LORD'S SUPPER) was the paschal supper according to the Law, is a question of great difficulty. No point in the Gospel history has been more disputed. If we had nothing to guide us but the three first Gospels, no doubt of the kind could well be raised, though the narratives may not be free from difficulties in themselves (Mat. xxvi.; Mk. xiv.; Lk. xxii.).<sup>2</sup> If the supper was eaten on the evening of the 14th of Nisan, the apprehension, trial, and crucifixion of our Lord must have occurred on Friday the 15th, the day of holy convocation, the first of the seven days of the Passover week; the weekly Sabbath on which He lay in the tomb was the 16th; and the Sunday of the resurrection was the 17th. (JESUS CHRIST.) On the other hand, if we had no information but that which is to be gathered from St. John's Gospel, we could not hesitate to infer that the evening of the supper was that of the 13th of

<sup>2</sup> They speak, in accordance with Jewish usage, of the day of the supper as that on which "the Passover must be killed," and as "the first day of unleavened bread" (Mat. xxvi. 17, &c.). Josephus likewise calls the 14th of Nisan the first day of unleavened bread (B. J. v. 3, § 1), and speaks of the festival of the Passover as lasting eight days (Ant. ii. 15, § 1). But he elsewhere calls the 15th of Nisan "the commencement of the feast of unleavened bread" (Ant. iii. 10, § 5). Either mode of speaking was evidently allowable: in one case regarding it as a fact that the eating of unleavened bread began on the 14th; in the other, distinguishing the feast of unleavened bread, lasting from the first day of holy convocation to the concluding one, from the paschal meal.

Nisan, the day preceding that of the paschal meal (Jn. xiii. 1, 2, 29, xviii. 28, xix. 14, 31). If the last supper was on the 13th of Nisan, our Lord must have been crucified on the 14th, the day on which the paschal lamb was slain and eaten; He lay in the grave on the 15th (which was a "high day" or double Sabbath, because the weekly Sabbath coincided with the day of holy convocation); and the Sunday of the resurrection was the 16th. 2. The reconciliations which have been attempted fall under three principal heads:—(i.) Those which regard the supper at which our Lord washed the feet of His disciples (Jn. xiii.) as having been a distinct meal eaten one or more days before the regular Passover, of which our Lord partook in due course according to the synoptical narratives. (ii.) Those in which it is endeavored to establish that the meal was eaten on the 13th, and that our Lord was crucified on the evening of the true paschal supper. (iii.) Those in which the most obvious view of the first three narratives is defended, and in which it is attempted to explain the apparent contradictions in St. John, and the difficulties in reference to the law. (i.) The first method (of Maldonat, Lightfoot, Bengel, Kaiser) has the advantage of furnishing the most ready way of accounting for St. John's silence on the institution of the Holy Communion; but any explanation founded on the supposition of two meals appears to be rendered untenable by the context. (ii.) The current of opinion in modern times<sup>3</sup> has set in favor of taking the more obvious interpretation of the passages in St. John, that the supper was eaten on the thirteenth, and that our Lord was crucified on the fourteenth. Those who thus hold that the supper was eaten on the thirteenth day of the month have devised various ways of accounting for the circumstance, of which the following are the most important:—(a.) It is assumed that a party of the Jews, probably the Sadducees and those who inclined toward them, used to eat the Passover one day before the rest, and that our Lord approved of their practice (Iken, Carpov, &c.). (b.) It has been conjectured that the great body of the Jews had gone wrong in calculating the true Passover-day, placing it a day too late, and that our Lord ate the Passover on what was really the fourteenth, but what commonly passed as the thirteenth (Beza, Bucer, Calovius, Scaliger). (c.) Calvin supposed that on this occasion, though our Lord thought it right to adhere to the true legal time, the Jews ate the Passover on the fifteenth instead of the fourteenth, in order to escape from the burden of two days of strict observance (the day of holy convocation and the weekly Sabbath) coming together. (See also Note<sup>4</sup> below). (d.) Grotius thought that the meal was a memorial passover (like the paschal feast of the modern Jews, and such as might have been observed during the Babylonian captivity), not a sacrificial Passover. (e.) A view which has been received with favor far more generally than either of the preceding is, that the Last Supper was instituted by Christ for the occasion, in order that He might Himself suffer on the proper evening on which the paschal lamb was slain (Clement, Origen, Erasmus, Calmet, Kuinoel, Neander, Winer, Alford). Erasmus and others have called it an "anticipatory Passover;" but if this view is to stand, it seems better, in a formal treat-

ment of this subject, not to call it a Passover at all. (iii.) They who take the facts as they appear to lie on the surface of the synoptical narratives<sup>4</sup> start from a simpler point. They have to show that the passages in St. John may be fairly interpreted in such a manner as not to interfere with their own conclusion. (a.) Jn. xiii. 1, 2. Does the Gr. *pro tēs heortēs* (A. V. "before the feast") limit the time only of the proposition in the first verse, or is the limitation to be carried on to verse 2, so as to refer to the supper? In the latter case the natural conclusion is, that the meal was one eaten before the paschal supper. Others take *pascha* ("passover") to mean the seven days of unleavened bread as not including the eating of the lamb, and justify this limitation by Lk. xxii. 1; but not a few of those who take this side of the main question (Olshausen, Wieseler, Tholuck, &c.) regard the first verse as complete in itself. Tholuck remarks that *deipnou ginomenou* (Tischendorf reads *ginomenou*), while *supper was going on* (not as in the A. V., "supper being ended") is very abrupt if we refer it to any thing except the Passover. On the whole, Neander himself admits that nothing can safely be inferred from Jn. xiii. 1, 2, in favor of the supper having taken place on the thirteenth. (b.) Jn. xiii. 29. It is urged that the things of which they had "need against the feast," might have been the provisions for the *Hagigah* or *Chagigah*, perhaps with what else was required for the seven days of unleavened bread. The usual day for sacrificing the *Hagigah* or *Chagigah* (see above, II. 3, h), was the fifteenth, which was then commencing. But there is another difficulty in the disciples thinking it likely either that purchases could be made, or that alms could be given to the poor, on a day of holy convocation. Probably the letter of the law in regard to trading was habitually relaxed in the case of what was required for religious rites or for burials. (c.) Jn. xviii. 28. The Jews refused to enter the *prætorium* ("judgment-hall") lest they should be defiled, and so disqualified from eating the Passover. Neander and others deny that this passage can possibly refer to any thing but the paschal supper. But it is alleged that the words "that they might eat the Passover" may either be taken in a general sense as = *that they might go on keeping the passover*, or that "the Passover" here may be understood specifically = the *Hagigah* or *Chagigah* (Lk. xxii. 1, compare Deut. xvi. 2; 2 Chr. xxxv. 7, 9).<sup>5</sup> (d.) Jn. xix. 14. "The preparation of the Passover" at first sight would seem as if it must be the *preparation for the Passover* on the fourteenth, a time set apart for making ready for the paschal week, and for the paschal supper in particular. It is naturally so understood by those who advocate the notion that the last supper was eaten on the thirteenth. But

<sup>3</sup> Lightfoot, Bochart, Reland, Schoettgen, Tholuck, Olshausen, Stier, Lange, Hengstenberg, Robinson, Davidson, Fairbairn.

<sup>4</sup> Fairbairn (article "Passover," &c.) takes the expression, "that they might eat the Passover," in its limited sense, and supposes these Jews were unexpectedly prevented, by the circumstances connected with the treachery of Judas, and its detection and exposure by our Lord, involving the necessity of prompt action, and then by the difficulties (want of evidence, &c.) attending the trial and condemnation of Jesus, from eating the Passover at the regular time on the evening previous, and were willing, in their determined hatred toward Him, to put off the meal to the verge, or even beyond, the legal time, in order to secure the desired result (Mat. xxiii. 34), yet were anxious to eat the Passover almost immediately. This irregularity belonged only to the high-priest and the small faction directly associated with him.

<sup>5</sup> Lücke, Ideler, Tittmann, Bleek, De Wette, Neander, Tischendorf, Winer, Ebrard, Alford, Elliott; of earlier critics, Erasmus, Grotius, Suicer, Carpov.

they who take the opposite view affirm that, though there was a regular "preparation" for the Sabbath, there is no mention of any "preparation" for the festivals (Bochart, Reland, Tholuck, Hengstenberg). Mk. xv. 42 explains "the preparation, that is, the day before the Sabbath." It seems to be essentially connected with the Sabbath itself (Jn. xix. 31). The phrase in Jn. xix. 14 may thus be understood as the preparation of the Sabbath which fell in the Passover week. If these arguments are admitted, the day of the preparation mentioned in the Gospels might have fallen on the day of holy convocation, the fifteenth of Nisan. (e.) Jn. xix. 31. "That Sabbath-day was a high day." Any Sabbath in the Passover week might be considered "a high day." But it is assumed by those who fix the supper on the thirteenth that the term was applied, owing to the fifteenth being "a double Sabbath," from the coincidence of the day of holy convocation with the weekly festival. Those, on the other hand, who identify the supper with the paschal meal, contend that the special dignity of the day resulted from its being that on which the omer was offered, and from which were reckoned the fifty days to PENTECOST. (f.) The difficulty of supposing that our Lord's apprehension, trial, and crucifixion took place on the day of holy convocation has been strongly urged. If many of the Rabbinical maxims for the observance of such days which have been handed down to us were then in force, these occurrences certainly could not have taken place. But the statements which refer to Jewish usage in regard to legal proceedings on sacred days are very inconsistent with each other. Some of them made the difficulty equally great whether we suppose the trial to have taken place on the fourteenth or the fifteenth. In others there are exceptions permitted which seem to go far to meet the case before us. But we have proof that the Jews did not hesitate, in the time of the Roman domination, to carry arms and to apprehend a prisoner on a solemn feast-day. We find them at the feast of Tabernacles, on the "great day of the feast," sending out officers to take our Lord, and rebuking them for not bringing Him (Jn. vii. 32-45). St. Peter also was seized during the Passover (Acts xii. 3, 4). And, again, the reason alleged by the rulers for not apprehending Jesus was, not the sanctity of the festival, but the fear of an uproar among the multitude which was assembled (Mat. xxvi. 5). On the whole, notwithstanding the express declaration of the Law and of the Mishna that the days of holy convocation were to be observed precisely as the Sabbath, except in the preparation of food, it is highly probable that considerable license was allowed in regard to them, as we have already observed (II. 2 above; FESTIVALS). 3. There is a strange story preserved in the Gemara (*Sanhedrin*, vi. 2), that our Lord having vainly endeavored during forty days to find an advocate, was sentenced, and, on the fourteenth of Nisan, stoned, and afterward hanged. As we know that the difficulty of the Gospel narratives had been perceived long before this statement could have been written, and as the two opposite opinions on the chief question were both current, the writer might easily have taken up one or the other. The statement cannot be regarded as worth any thing in the way of evidence. Not much use can be made in the controversy of the testimonies of the Fathers; but few of them attempted to consider the question critically. 4. It must be admitted that the narrative of St. John, as far as the mere succession of events is

concerned, bears consistent testimony in favor of the last supper having been eaten on the evening before the Passover. That testimony, however, does not appear to be so distinct, and so incapable of a second interpretation, as that of the synoptical Gospels, in favor of the meal having been the paschal supper itself, at the legal time (see especially Mat. xxvi. 17; Mk. xiv. 1, 12; Lk. xxii. 7).—IV. *Meaning of the Passover.* 1. Each of the three great FESTIVALS contained a reference to the annual course of nature. (AGRICULTURE.) Two at least of them—the first and the last—also commemorated events in the history of the chosen people. It must be admitted that the relation to the natural year expressed in the Passover was less marked than that in Pentecost or Tabernacles, while its historical import was deeper and more pointed. That part of its ceremonies which has a direct agricultural reference—the offering of the omer—holds a very subordinate place. 2. The deliverance from Egypt was regarded as the starting-point of the Hebrew nation. The Israelites were then raised from the condition of bondmen under a foreign tyrant to that of a free people owing allegiance to no one but Jehovah (Ex. xix. 4). The prophet in a later age spoke of the event as a *creation* and a *redemption* of the nation. God declares Himself to be "the creator of Israel" (Is. xliii. 1, 15-17, &c.). The Exodus was thus looked upon as the birth of the nation; the Passover was its annual birthday feast. It was the yearly memorial of the dedication of the people to Him who had saved their first-born from the destroyer, in order that they might be made holy to Himself. 3. (a.) The paschal lamb must of course be regarded as the leading feature in the ceremonial of the festival. Some Protestant divines during the last two centuries (Calov, Carpzov) have denied that it was a sacrifice in the proper sense of the word. But most of their contemporaries (Cudworth, Bochart, Vitringa), and nearly all modern critics, have held that it was in the strictest sense a sacrifice. The chief characteristics of a sacrifice are all distinctly ascribed to it. It was offered in the holy place (Deut. xvi. 5, 6); the blood was sprinkled on the altar, and the fat was burned (2 Chr. xxx. 16, xxxv. 11). The language of Ex. xii. 27, xxiii. 18, and of Num. ix. 7, and Deut. xvi. 2, 5, with 1 Cor. v. 7, seems to decide the question beyond doubt. As the original institution of the Passover in Egypt preceded the establishment of the priesthood and the regulation of the Tabernacle-service, it necessarily fell short in several particulars of the observance of the festival according to the fully developed ceremonial law (see II. 1). The head of the family slew the lamb in his own house, not in the holy place; the blood was sprinkled on the doorway, not on the altar. But when the Law was perfected, certain particulars were altered to assimilate the Passover to the accustomed order of religious service. It has been conjectured that the imposition of the hands of the priest was one of these particulars, though it is not recorded (Kurtz). But whether this was the case or not, the other changes stated seem abundantly sufficient for the argument. It can hardly be doubted that the paschal lamb was regarded as the great annual peace-offering of the family, a thank-offering for the existence and preservation of the nation (Ex. xiii. 14-16), the typical sacrifice of the elected and reconciled children of the promise. A question has been raised regarding the purpose of the sprinkling of the blood on the lintels and door-posts. Some

have considered it meant as a mark to guide the destroying angel. Others suppose it was merely a sign to confirm the faith of the Israelites in their safety and deliverance. Surely neither of these views can stand alone. The sprinkling must have been an act of faith and obedience which God accepted with favor. That it also denoted the purification of the children of Israel from the abominations of the Egyptians, and so had the accustomed significance of the sprinkling of blood under the Law (Heb. ix. 22), is evidently in entire consistency with this view. No satisfactory reason has been assigned for the command to choose the lamb four days before the paschal supper. That the lamb was to be roasted and not boiled, has been supposed to commemorate the haste of the departure of the Israelites (Bähr, and most Jewish authorities). Kurtz conjectures that the lamb was to be roasted with fire, the purifying element, because the meat was thus left pure, without the mixture even of the water which would have entered into it in boiling. It is not difficult to determine the reason of the command, "not a bone of him shall be broken." The lamb was to be a symbol of unity; the unity of the family, the unity of the nation, the unity of God with His people whom He had taken into covenant with Himself. Our Saviour's body was the type of a still higher unity (Jn. xix. 36). (b.) The unleavened bread ranks next in importance to the paschal lamb. The notion has been very generally held, both by Christian and Jewish writers, that it was intended to remind the Israelites of the unleavened cakes which they were obliged to eat in their hasty flight (Ex. xii. 34, 39); but there is no intimation to this effect in the sacred narrative. It has been considered by some (Ewald, Winer, and the modern Jews) that the unleavened bread and the bitter herbs alike owe their meaning to their being regarded as unpalatable food; but this seems wholly inconsistent with the pervading joyous nature of the festival. The "bread of affliction" (Deut. xvi. 3) may mean bread commemorative in itself, or with other elements of the feast, of the past affliction of the people (Bähr, Kurtz, Hofmann). Unleavened bread was not peculiar to the Passover, but seems to have had a peculiar sacrificial character, according to the Law. St. Paul's reference to the subject (1 Cor. v. 6-8) appears to furnish the true meaning of the symbol. Fermentation is decomposition, a dissolution of unity. The pure dry biscuit would be an apt emblem of unchanged duration, and, in its freedom from foreign mixture, of purity also. (c.) The bitter herbs are generally understood by the Jewish writers to signify the bitter sufferings which the Israelites had endured (Ex. i. 14). But it has been remarked by Aben Ezra that these herbs are a good and wholesome accompaniment for meat, and are now, and appear to have been in ancient times, commonly so eaten (see above, II. 3, c.). (d.) The offering of the omer (FIRST-FRUIT), though immediately connected with the course of the seasons, bore a distinct analogy to its historical significance. It may have denoted a deliverance from winter, as the lamb signified deliverance from the bondage of Egypt, which might well be considered as a winter in the history of the nation. Again, the consecration of the first-fruits, the first-born of the soil, is an easy type of the consecration of the first-born of the Israelites. 4. No other shadow of good things to come contained in the Law can vie with the festival of the Passover in expressiveness and completeness. Its

outline, considered in reference to the great deliverance of the Israelites which it commemorated, and many of its minute details, have been appropriated as current expressions of the truths which God has revealed to us in the fulness of time in sending His Son upon earth (Isa. liii. 7; Jn. i. 29; 1 Cor. v. 8; Heb. xi. 28, &c.). The crowning application of the paschal rites to the truths of which they were the shadowy promises appears to be afforded by the fact that our Lord's death occurred during the festival. According to the divine purpose, the true Lamb of God was slain at nearly the same time as "the Lord's Passover," in obedience to the letter of the Law. As compared with the other festivals, the Passover was remarkably distinguished by a single victim essentially its own, sacrificed in a very peculiar manner. In this respect, as well as in the place it held in the ecclesiastical year, it had a formal dignity and character of its own. It was the representative festival of the year, and in this unique position it stood in a certain relation to circumcision as the second sacrament of the Hebrew Church (Ex. xii. 44). "EASTER," once inconsistently used in the A. V. (Acts xii. 4) as the translation of the Gr. *pascha* = "passover," is celebrated as the anniversary of the Resurrection of JESUS CHRIST, on the first Sunday after the fourteenth day of the calendar moon which happens upon or next after March 21.

\* **Pas'tor** (L. *one that pastures or feeds, a herdsman*, or usually *shepherd*), the A. V. translation of —1. Heb. participle *ro'eh* = *one feeding a flock*, or *pasturing, a shepherd, herdsman* (Jer. ii. 8, iii. 15, x. 21, xii. 10, xvii. 16, xxii. 22, xxiii. 1, 2), also translated "feeding" (Gen. xxxvii. 2; Job i. 14), "which fed" (Gen. xlviii. 15), "that fed" (1 Chr. xxvii. 29), "that feed" (Jer. xxiii. 2), "keeper" (Gen. iv. 2), "herdsman" (xiii. 7, 8, &c.), &c., but usually "shepherd" (xlix. 24; Ex. ii. 17, 19; Ps. xxiii. 1; Is. xlii. 20; Jer. vi. 3; Ez. xxxiv. 2 ff., &c.). —2. Gr. *poimén* once (Eph. iv. 11), elsewhere uniformly "SHEPHERD;" in LXX. = No. 1; applied in N. T. to one who tends flocks or herds (Mat. ix. 36, xxv. 32, &c.), to the Lord JESUS CHRIST, the Great "Shepherd" (xxvi. 31; Jn. x. 2, 11 ff.; Heb. xiii. 20; 1 Pet. ii. 25, &c.), and to the spiritual guide or minister of a church (Eph. iv. 11 only). BISHOP; ELDER; MINISTER; ORDAIN, TO.

\* **Pas'ture** (fr. L.). To all who, like the early patriarchs, have their chief wealth in flocks and herds, an abundance of pasture and of water is of the greatest importance. ABRAHAM, ISAAC, JACOB, &c., had to move from place to place at different times in order to find a supply of these essentials. PALESTINE was, and still is, in many parts, especially in the S. of JUDAH and on the E. of the Jordan (AMMON; BASHAN; GILEAD; MOAB, &c.), well adapted to grazing. (AGRICULTURE; DESERT; GOAT; GRASS; HAY; HERD; OX; SHEEP; SHEPHERD, &c.) "Pasture" is also figuratively applied to spiritual nourishment or that which is adapted to satisfy the highest wants of the people or "flock" of God (Ps. xxiii. 2; Jn. x. 9). PASTOR.

**Pat'a-ra** (Gr., from its founder *Patarus*, a reputed son of Apollo, Str.), a city on the southwestern shore of LYCIA, not far from the left bank of the river Xanthus, famous for its oracle and temple of Apollo. (DIVINATION; IDOLATRY; PYTHON.) The coast here is very mountainous and bold. Immediately opposite is the island of RHODES. Patara was practically the seaport of the city of Xanthus, ten miles distant. St. Paul, at the close of his third missionary

journey, found here a ship bound to Phenicia (Acts xxi. 1, 2). Patara was afterward the seat of a bishop. The old name remains on the spot, and there are considerable ruins, especially of a theatre, baths, a triple arch of a city-gate, &c. Sand-hills have blocked up the harbor.

**Pa-the'us** (fr. Gr.) = ΠΕΘΑΪΑΗ the Levite (1 Esd. ix. 23; compare Ezr. x. 23).

**Path'ros** (Heb. fr. Egyptian = *region of the south*, i. e. *Upper Egypt*, Ges.; but see below), gentile noun **Path-ra'sim** (Heb. = *people of Pathros*), a part of Egypt, and a Mizraite tribe. In the list of the Mizraites, the Pathrusim occur after the Naphtuhim, and before the Casluhim; the latter being followed by the notice of the Philistines, and by the Caphthorim (Gen. x. 13, 14; 1 Chr. i. 12). Pathros is mentioned in Is. xi. 11, in Jer. xlv. 1, 15, and Ez. xxix. 14, xxx. 13-18. From the place of the Pathrusim in the list of the Mizraites, they might be supposed to have settled in Lower Egypt, or the more northern part of Upper Egypt. If the original order were Pathrusim, Caphthorim, Casluhim, then the first might have settled in the highest part of Upper Egypt, and the other two below them. The occurrences in Jeremiah seem to favor the idea that Pathros was part of Lower Egypt, or the whole of

that region. The notice by Ezekiel of Pathros as the land of the birth of the Egyptians seems to favor the idea that it was part of or all Upper Egypt. Pathros has been connected with the Pathvrite nome, the Phaturite of Pliny, in which THEBES was situate (Bochart, &c.). This identification may be as old as the LXX. The discovery of the Egyptian name of the town after which the nome was called puts the inquiry on a safer basis. It was written *ha-hat-her* = *the abode of Hat-her*, the Egyptian Venus. It may perhaps have sometimes been written *p-ha hat-her*, in which case the *p-h* and *t-h* would have coalesced in the Hebrew form, as did *t-h* in Caphtor. It seems reasonable to consider Pathros a part of Upper Egypt, and to trace its name in that of the Pathvrite nome; but this is only a very conjectural identification, which future discoveries may overthrow (so Mr. R. S. Poole).

**Path-ra'sim** (see above). **PATHROS.**

**Pat'mos** (Gr.), a bare and rugged island to which JOHN THE APOSTLE was banished in the reign of Domitian (Rev. i. 9). Patmos is divided into two nearly equal parts, a northern and a southern, by a very narrow isthmus, where, on the east side, are the harbor and the town. On the hill to the S., crowning a commanding height, is the celebrated

Patmos, Harbor of La Scala, the Town of Patmos on the height.—From Schubert, *Reise im Morgenland*.—(Fbr.)

monastery, which bears the name of "John the Divine." Half-way up the ascent is the cave or grotto where tradition says that St. John received the REVELATION. Patmos is one of the Sporades, and is in that part of the *Ægean* called the Icarian Sea. It must have been conspicuous on the right when St. Paul was sailing (Acts xx. 15, xxi. 1) from SAMOS to COS.

**Patri-arch.** The name *Patriarch* (fr. Gr. *patri-archês* = *the father and ruler* of a family, tribe, &c.) is applied in the N. T. to Abraham (Heb. vii. 4), to the sons of Jacob (Acts vii. 8, 9), and to David (Acts ii. 29); and is apparently intended to be equivalent to the phrase, the "head" or "prince of a tribe," so often found in the O. T. It is used in this sense by the LXX. in 1 Chr. xxiv. 31, xxvii. 22, and 2 Chr. xxiii. 20, xxvi. 12. In common usage the title of patriarch is assigned especially to those whose lives are recorded in Scripture previous to the time of Moses. The patriarchal times are naturally divided into the ante-diluvian and post-diluvian periods. 1. In the former the Scrip-

ture record contains little except the list of the line from SETH, through ENOS, CAINAN, MAHALALEEL, JARED, ENOCH 2, METHUSELAH, and LAMECH 2, to NOAH; with the ages of each at their periods of generation and at their deaths. (CHRONOLOGY.) To some extent parallel to this, is given the line of Cain; ENOCH 1, IRAD, MEHUJAEI, METHUSELAH, LAMECH 1, and the sons of Lamech, JABAL, JUBAL, and TUBAL-CAIN. To the latter line are attributed the first signs of material civilization, the building of cities, the division of classes, and the knowledge of mechanical arts; while the only moral record of their history obscurely speaks of violence and bloodshed. The one distinction of the former line is their knowledge of the true God, seen especially in Enoch and Noah. (GIANTS.)—One of the main questions raised as to the ante-diluvian period turns on the longevity assigned to the patriarchs. With the single exception of Enoch (whose departure from the earth at 365 years of age is exceptional in every sense), their ages vary from 777 (Lamech) to 969 (Methuselah). After the flood this longevity

gradually disappears. To SHEM are assigned 600 years; to ARPHAXAD 438; to SALAH 433; to EBER 464; to PELEG 239; to REU 239; to SERUG 230; to NAHOR (1) 148; to TERAH 205; to ABRAHAM 175; to ISAAC 180; to JACOB 147; to JOSEPH 110. This statement of ages is clear and definite. To suppose, with some, that the name of each patriarch denotes a clan or family, and his age its duration, appears to be a mere evasion of difficulty. It must either be accepted, as a plain statement of fact, or regarded as purely fabulous, like the legendary assignment of immense ages to the early Indian or Babylonian or Egyptian kings. In the acceptance of the literal meaning, it is not easy to say how much difficulty is involved. Very great effects are produced on the duration of life, both of men and animals, by even slight changes of habit and circumstances. The constant attribution in all legends of great age to primeval men is at least as likely to be a distortion of fact, as a mere invention of fancy. If the divine origin of Scripture be believed (INSPIRATION), its authority must be accepted in this, as in other cases; and the list of the ages of the patriarchs be held to be (what it certainly claims to be) a statement of real facts (so Mr. Barry, original author of this article). 2. In the post-diluvian periods more is gathered as to the nature of the patriarchal history. It is at first general in its scope. The "Covenant" given to Noah is one, free from all condition, and fraught with natural blessings, extending to all alike. But the history soon narrows itself to that of a single tribe or family, and afterward touches the general history of the ancient world and its empires, only so far as it bears upon this. (GENESIS.) In this last stage the principle of the patriarchal dispensation is most clearly seen. It is based on the sacredness of family ties and paternal authority. This authority, as the only one which is natural and original, is inevitably the foundation of the earliest form of society, and is probably seen most perfectly in wandering tribes, where it is not affected by local attachments and by the acquisition of wealth. In Scripture this authority is consecrated by an ultimate reference to God, as the God of the patriarch, i. e. the Father both of him and his children. At the same time, this faith was not allowed to degenerate, as it was prone to do, into an appropriation of God, as the mere tutelary God of the tribe. (JEHOVAH.) Still the distinction and preservation of the chosen family, and the maintenance of the paternal authority, are the special purposes, which give a key to the meaning of history, and of the institutions recorded. (CHILD; FIRST-BORN; IDOLATRY; MARRIAGE; MURDER.) The type of character, formed under this dispensation, is one imperfect in intellectual and spiritual growth, because not yet tried by the subtler temptations, or forced to contemplate the deeper questions of life; but it is one remarkably simple, affectionate, and free, such as would grow up under a natural authority, derived from God and centring in Him, yet allowing, under its unquestioned sacredness, a familiarity and freedom of intercourse with Him, which is strongly contrasted with the stern and awful character of the Mosaic dispensation. To contemplate it from a Christian point of view is like looking back on the unconscious freedom and innocence of childhood, with that deeper insight and strength of character which are gained by the experience of manhood. We see in it the germs of the future, of the future revelation of God, and the future trials and development of man. It is on this fact that the

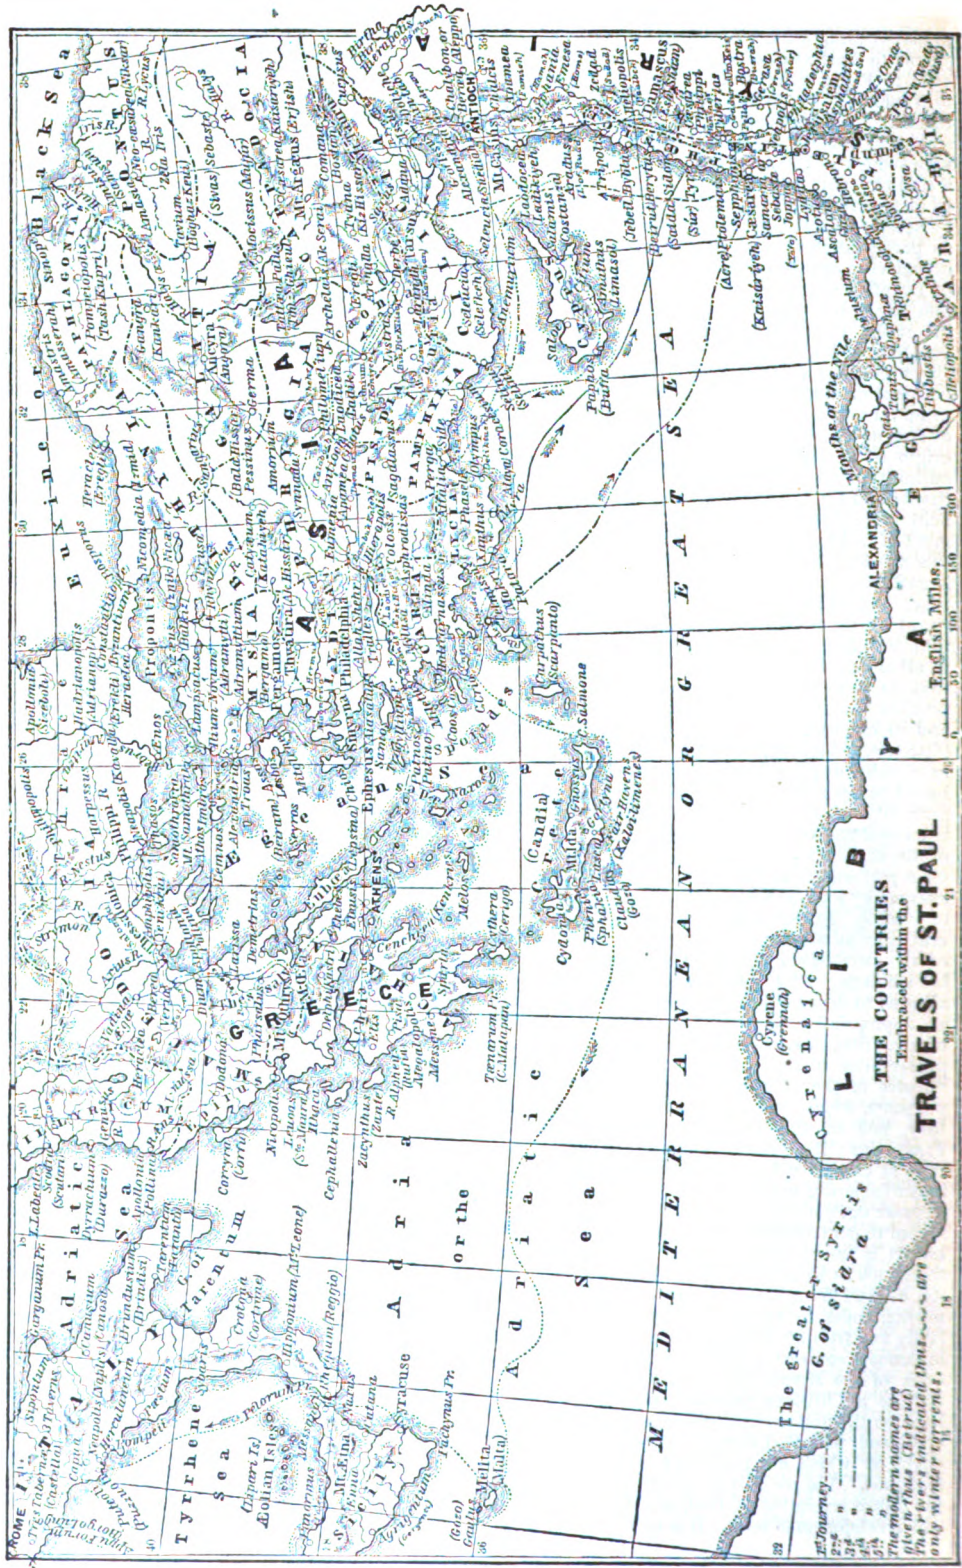

typical interpretation of its history depends (Gal. iv. 21-31; Heb. vii. 1-17; OLD TESTAMENT, B., 2). In the ante-diluvian period, we may recognize the main features of the history of the world, the division of mankind into the two great classes, the struggles between the power of evil and good, the apparent triumph of the evil, and its destruction in the final judgment. In the post-diluvian history of the chosen family, is seen the distinction of the true believers, possessors of a special covenant, special revelation, and special privileges, from the world without. In it is therefore shadowed out the history of the Jewish nation and the Christian Church, as regards the freedom of their covenant, the gradual unfolding of their revelation, and the peculiar blessings and temptations which belong to their distinctive position.

**Pat'ro-bas** (Gr. *one who walks in his father's footsteps*, Schl.; *one who lives like his father*, Wr., Wolf), a Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 14). An uncertain tradition makes him one of the seventy disciples, bishop of Puteoli, and a martyr. Like many other names in Rom. xvi., this was borne by at least one member of the emperor's household (Suetonius, *Galba*, 20; Martial, *Ep.* ii. 32, 3).

**Pa-tre'cius**, or **Pa-tre-cius** (L. fr. Gr. = *famous from his father*), father of Nicanor, the adversary of Judas Maccabeus (2 Mc. viii. 9).

**Pa'm** (Heb. *a bleating, loving* = PAI, Ges.), the capital of Hadar, king of Edom (Gen. xxxv. 39); in 1 Chr. i. 50, PAI. Its position is unknown.

**Paul** (Gr. *Paulos*; fr. L. *Paulus* [= *little, small*]), a common Roman surname; see below), the apostle of Jesus Christ to the Gentiles.—*Original Authorities.* Nearly all the original materials for the Life of St. Paul are contained in the ACTS OF THE APOSTLES, and in the Pauline Epistles. (ROMANS, EPISTLE TO THE, &c.) Out of a comparison of these authorities the biographer of St. Paul has to construct his account of the really important period of the apostle's life (so Mr. Davies, original author of this article). The early traditions of the Church appear to have left almost untouched the space of time for which we possess those sacred and abundant sources of knowledge; and they aim only at supplying a few particulars in the biography beyond the points at which the narrative of the Acts begins and terminates.—*Prominent points in the Life.* Foremost of all is his *Conversion*. This was the main root of his whole life, outward and inward. Next after this, we may specify his *Labors at Antioch*. From these we pass to the *First Missionary Journey*, in the eastern part of Asia Minor. *The Visit to Jerusalem* was a critical point, both in the history of the Church and of the apostle. *The introduction of the Gospel into Europe*, with the memorable visits to Philippi, Athens, and Corinth, was the boldest step in the carrying out of St. Paul's mission. A third great missionary journey, chiefly characterized by a long *stay at Ephesus*, is further interesting from its connection with four leading Epistles. This was immediately followed by the *apprehension of St. Paul at Jerusalem*, and his *imprisonment at Cæsarea*. And the last event of which we have a full narrative is the *Voyage to Rome*.—*Saul of Tarsus, before his Conversion.* Up to the time of his going forth as an avowed preacher of Christ to the Gentiles, the apostle was known by the name of SAUL, the Jewish name received from his Jewish parents. But though a Hebrew of the Hebrews, he was born in a Gentile city.

Of his parents we know nothing, except that his father was of the tribe of Benjamin (Phil. iii. 5), and a Pharisee (Acts xxiii. 6), that he had acquired by some means the Roman franchise ("I was free born," xxii. 28), and was settled in Tarsus.<sup>1</sup> "I am a Jew of TARSUS, a city in Cilicia, a CITIZEN of no mean city" (xxi. 39). At Tarsus he must have learned to use the Greek language with freedom and mastery in both speaking and writing. At Tarsus also he learned that trade of "tentmaker" (xviii. 3), at which he afterward occasionally wrought with his own hands. There was a goat's-hair cloth called *Cilicium*, manufactured in Cilicia, and largely used for tents. Saul's trade was probably that of making tents of this haircloth. (EDUCATION.) St. Paul in his defence before his countrymen at Jerusalem (xxii.) tells them that though born in Tarsus, he had been "brought up" in Jerusalem. We may imagine him arriving there, perhaps at some age between ten and fifteen, already a Hellenist, speaking Greek and familiar with the SEPTUAGINT, possessing, besides the knowledge of his trade, the elements of Gentile learning—to be taught at Jerusalem "according to the perfect manner of the law of the fathers." He learned, he says, "at the feet of GAMALIEL." He who was to resist so stoutly the usurpations of the Law, had for his teacher one of the most eminent of all the doctors of the Law. Saul was yet "a young man" (vii. 58), when the Church experienced that sudden expansion which was connected with the ordaining of the seven appointed to serve tables (DEACON), and with the special power and inspiration of STEPHEN. Amongst those who disputed with Stephen were some "of them of Cilicia." We naturally think of Saul as having been one of these, when we find him afterward keeping the clothes of those suborned witnesses who, according to the Law (Deut. xvii. 7), were the first to cast stones at Stephen. "Saul," says the sacred writer, significantly, "was consenting unto his death" (Acts viii. 1). He was the most unwearied and unrelenting of persecutors (3).<sup>2</sup>—*Saul's Conversion*. The persecutor was to be converted. Having undertaken to follow up the believers "unto strange cities," Saul naturally turned his thoughts to Damascus. What befell him as he journeyed thither, is related in detail three times in the Acts, first by the historian in his own person (ix.), then in the two addresses made by St. Paul at Jerusalem and before Agrippa (xxii., xxvi.). These three narratives are not repetitions of one another: there are differences between them which some consider irreconcilable. Of the three narratives, that of the historian himself must claim to be the most purely historical: St. Paul's subsequent accounts were likely to be affected by the purpose for which he introduced them. St. Luke's statement is in Acts ix. 8-19, where, however, according to the best authorities, the words "It is hard for thee to kick against the pricks," included in the Vulgate

and English version, ought to be omitted. The sudden light from heaven; the voice of Jesus speaking with authority to His persecutor; Saul struck to the ground, blinded, overcome; the three days' suspense; the coming of Ananias as a messenger of the Lord; and Saul's baptism;—these were the leading features, in the eyes of the historian, of the great event, and in these we must look for the chief significance of the conversion. According to the speeches, the phenomenon occurred at mid-day, and the light shone round, and was visible to, Saul's companions as well as himself. All fell to the ground (second speech); but the others may have risen before Saul, or "stood" still afterward in greater perplexity, though not seeing or hearing what Saul saw and heard. They probably heard sounds, but not, like Saul, an articulate voice (first speech). After the question, "Why persecutest thou Me?" the second speech adds, "It is hard for thee to kick against the goads" (A. V. "pricks"). Then both speeches supply a question ("Who art thou, Lord?") and answer ("I am Jesus [of Nazareth], whom thou persecutest"). With regard to the visit of Ananias, there is no collision between ch. ix. and the first speech, which only attributes additional words to Ananias. The second speech ceases to give details of the vision after the words, "I am Jesus whom thou persecutest. But rise and stand on thy feet." St. Paul here adds, from the mouth of Jesus, an exposition of the purpose for which He had appeared to him. If we bear in mind the motive and purpose of St. Paul's address before Agrippa, we shall not suppose he is violating the strict truth, when he adds to the words which Jesus spoke to him at the moment of the light and sound, without interposing any reference to a later occasion, that fuller exposition of the meaning of the crisis through which he was passing, which he was not to receive till afterward. What Saul actually heard from Jesus on the way was afterward interpreted to his mind into these definite expressions. For we must not forget that the whole transaction was essentially a *spiritual* communication. That the Lord Jesus manifested Himself as a living person to the man Saul, and spoke to him so that His very words could be understood, is the substantial fact declared to us. Comparing with the narrative Acts ix. 17, xxii. 14, and 1 Cor. xv. 8, we conclude, either that Saul had an instantaneous vision of Jesus as the flash of light blinded him, or that the "seeing" was that apprehension of His presence which would go with a real conversation. How Saul "saw" and "heard" we are unable to determine. That the light, and the sound or voice, were both different from any ordinary phenomena with which Saul and his companions were familiar, is unquestionably implied in the narrative. It is also implied that they were specially significant to Saul, and not to those with him. We gather therefore that there were real outward phenomena, through which Saul was made inwardly sensible of a Presence revealed to him alone. He gave himself up, without being able to see his way, to the disposal of Him whom he now knew to have vindicated His claim over him by the very sacrifice which formerly he had despised. The only mention in the Epistles of St. Paul of the outward phenomena attending his conversion is in 1 Cor. xv. 8, "Last of all He was seen of me also." But in Gal. i. 15, 16, he speaks distinctly of his conversion itself: "When it pleased God, who separated me from my mother's womb, and called me by His grace, to re-

<sup>1</sup> A story is mentioned by Jerome that St. Paul's parents lived at Gischala (now *el-Jah*) in Galilee, and that, having been born there, the infant Saul emigrated with his parents to Tarsus on the taking of that city by the Romans; but Gischala was not taken till a much later time, and the apostle declares he was born in Tarsus (Acts xxii. 3).

<sup>2</sup> Conybeare & Howson (*Life and Epistles of St. Paul*, i. 78) consider it probable that, if Saul was not a member of the SANHEDRIM at the time of Stephen's death, he was elected into it soon after (Acts xxvi. 10). If so, and if the rule laid down by Maimonides and the Jerusalem Gemara then prevailed, viz. that members of that body must have been married and the fathers of children, probably his wife and children did not long survive, as they are never alluded to in the Scriptures.

veal His Son in me, that I might preach Him among the heathen. . . ." What words could express more exactly than these the spiritual experience which occurred to Saul on the way to Damascus? The manifestation of Jesus as the Son of God is clearly the main point in the narrative. It would be groundless to assume that the new convictions of that mid-day immediately cleared and settled themselves in Saul's mind. It is sufficient to say that he was then *converted*, or turned round. For a while, no doubt, his inward state was one of awe and expectation. Thus entering Damascus as a servant of the Lord Jesus, he sought the house of Judas whom he had, perhaps, intended to persecute. The fame of Saul's coming had preceded him; and Ananias, "a devout man according to the law," but a believer in Jesus, when directed by the Lord to visit him, wonders at what he is told concerning the notorious persecutor. He obeys, however; and going to Saul in the name of "the Lord Jesus, who had appeared to him in the way," he puts his hands on him that he may receive his sight and be filled with the Holy Ghost. Thereupon Saul's eyes are immediately purged, and his sight is restored. Every word in the address of Ananias to him (Acts xxii. 14; comp. ix. 17) strikes some chord which we hear sounded again and again in St. Paul's Epistles. After the recovery of his sight, Saul received the washing away of his sins in baptism. He then broke his three days' fast, and was strengthened. He was at once received into the fellowship of the disciples, and began without delay the work to which Ananias had designated him; and to the astonishment of all his hearers he proclaimed Jesus in the synagogues, declaring Him to be the Son of God. The narrative in the Acts tells us simply that he was occupied in this work, with increasing vigor, for "many days," up to the time when imminent danger drove him from Damascus. From Gal. i. 17, 18, we learn that the many days were at least a good part of "three years," and that Saul, not thinking it necessary to procure authority to preach from the apostles that were before him, went after his conversion into Arabia, and returned from thence to Damascus. We know nothing whatever of this visit to Arabia—to what district Saul went, how long he stayed, or for what purpose he went there. For all we know to the contrary, he may have gone to Antioch or Tarsus or anywhere else, or remained silent at Damascus for some time after returning from Arabia. Now that we have arrived at Saul's departure from Damascus, we are again upon historical ground, and have the double evidence of St. Luke in the Acts, and of the apostle in 2 Cor. According to the former, the *Jews* lay in wait for Saul, intending to kill him, and watched the gates of the city that he might not escape from them. Knowing this, the disciples took him by night and let him down in a basket from the wall. According to 2 Cor. xi. 32, the ethnarch under ARETAS the king watched for him, desiring to apprehend him. There is no difficulty in reconciling the two statements. We might similarly say that our Lord was put to death either by the Jews or by the Roman governor. Having escaped from Damascus, Saul betook himself to Jerusalem, and there "assayed (ASSAY) to join himself to the disciples; but they were all afraid of him, and believed not that he was a disciple." BARNABAS assured the apostles and Church at Jerusalem—from some personal knowledge, we must presume—of the facts of Saul's conversion and subsequent behavior at Damascus. Barnabas' introduction removed the fears of the

apostles, and Paul "was with them coming in and going out at Jerusalem." His Hellenistical education made him, like Stephen, a successful disputant against the "Grecians;" and the former persecutor became the object of a murderous hostility. He was therefore again urged to flee: and by way of Cesarea betook himself to his native city Tarsus. In Gal. i. 17 ff., St. Paul adds that his motive for going up to Jerusalem rather than anywhere else was that he might see Peter; that he abode with him fifteen days; that the only apostles he saw were Peter and James, the Lord's brother; and that afterward he came into the regions of Syria and Cilicia, remaining unknown by face, though well known for his conversion, to the churches in Judea which were in Christ.—*St. Paul at Antioch.* While Saul was at Tarsus, a movement was going on at ANTIOCH, which raised that city to an importance second only to that of Jerusalem in the early history of the Church. In the life of the Apostle of the Gentiles, Antioch claims a most conspicuous place. There the preaching of the Gospel to the Gentiles first took root, and from thence it was afterward propagated. There came to Antioch, when the persecution which arose about Stephen scattered the disciples who had been assembled at Jerusalem, men of Cyprus and Cyrene, eager to tell the good news concerning the Lord Jesus. Until Antioch was reached, the word was spoken "to none but unto Jews only" (Acts xi. 19). But here the Gentiles also (Gr. *hoi Hellenes* = *the Greeks*, not, as in the A. V., "the GRECIANS") were among the hearers of the word. A great number believed; and when this was reported at Jerusalem, Barnabas was sent on a special mission to Antioch. As the work grew under his hands, and "much people was added unto the Lord," Barnabas felt the need of help, and went to Tarsus to seek Saul. Possibly at Damascus, certainly at Jerusalem, he had been a witness of Saul's energy and devotedness, and skill in disputation. He longed for him as a helper, and succeeded in bringing him to Antioch. There they labored together "a whole year," mixing with the constant assemblies of the believers, and "teaching much people." All this time, as St. Luke would give us to understand, Saul was subordinate to Barnabas ("Barnabas and Saul," Acts xi. 30, xii. 25, xiii. 2, 7). In the mean time, according to the usual method of the Divine government, facts were silently growing, which were to suggest and occasion the future developments of faith and practice, and of these facts the most conspicuous was the unprecedented accession of Gentile proselytes at Antioch. An opportunity soon occurred, of which Barnabas and Saul joyfully availed themselves, for proving the affection of these new disciples toward their brethren at Jerusalem. There came "prophets" from Jerusalem to Antioch: "and there stood up one of them, named AGABUS, and signified by the Spirit that there should be great dearth throughout all the world." It is obvious that the fulfilment followed closely upon the intimation of the coming famine. For the disciples at Antioch determined to send contributions immediately to Jerusalem; and the gift was conveyed to the elders of that Church by the hands of Barnabas and Saul. We see in the relations between the Mother-Church and that of Antioch, of which this visit is illustrative, examples of the deep feeling of the necessity of union which dwelt in the heart of the early Church. Having discharged their errand, Barnabas and Saul returned to Antioch, bringing with them another helper, John surnamed MARK, sister's son to Barnabas. The work of proj b-

esying and teaching was resumed. Antioch was in constant communication with Cilicia, with Cyprus, with all the neighboring countries. The question must have forced itself upon hundreds of the "Christians" at Antioch, "What is the meaning of this faith of ours, of this baptism, of this incorporation, of this kingdom of the Son of God, *for the world*?" The Gospel is not for Judea alone: here are we called by it at Antioch. Is it meant to stop here?" Something of direct expectation seems to be implied in what is said of the leaders of the Church at Antioch, that they were "ministering to the Lord, and fasting," when the Holy Ghost spoke to them. Without doubt they knew it for a seal set upon previous surmises, when the voice came clearly to the general mind, "Separate me Barnabas and Saul for the work whereunto I have called them." Every thing was done with orderly gravity in the sending forth of the two missionaries. Their brethren, after fasting and prayer, laid their hands on them, and so they departed.—*The first Missionary Journey*. Much must have been hid from Barnabas and Saul as to the issues of the journey on which they embarked. But one thing was clear to them, that *they were sent forth to speak the word of God*. The first characteristic feature of St. Paul's teaching was the absolute conviction that he was only the bearer of a Heavenly message. As soon as Barnabas and Saul reached Cyprus, they began to "announce the word of God." The second fact to be observed is, that for the present they delivered their message in the synagogues of the Jews only. They trod the old path till they should be drawn out of it. But when they had gone through the island, from Salamis to Paphos, they were called upon to explain their doctrine to an eminent Gentile, SERGIUS PAULUS, the proconsul. A Jew, named Bar-jesus, or ELYMAS, a "sorcerer" and false prophet (DIVINATION; MAGIC), had attached himself to the governor, and had no doubt interested his mind, for he was an intelligent man, with what he had told him of the history and hopes of the Jews. Accordingly, when Sergius Paulus heard of the strange teachers who were announcing to the Jews the advent of their true Messiah, he wished to see them and sent for them. The impostor, instinctively hating the apostles, and seeing his influence over the proconsul in danger of perishing, did what he could to withstand them. Then Saul, "who is also called Paul," denouncing Elymas in remarkable terms, declared against him God's sentence of temporary blindness. (Compare St. Peter's denunciation of Simon Magus, Acts viii. 20 ff.) The blindness immediately falls upon him; and the proconsul, moved by the scene and persuaded by the teaching of the apostle, becomes a believer. This point is made a special crisis in the history of the apostle by the writer of the Acts. Saul now becomes Paul, and begins to take precedence of Barnabas. Nothing is said to explain the change of name. No reader could resist the temptation of supposing that there must be some connection between Saul's new name and that of his distinguished Roman convert. But it does not seem probable that St. Paul would either have wished, or have consented, to change his own name for that of a distinguished convert. Saul may have borne from infancy the other name of Paul. (Compare "Simeon" also named "Niger," "Barsabas" named "Justus," "John" named "Marcus" [A. V. "Mark"].) In that case he would be Saul among his own countrymen, Paul among the Gentiles. The conversion of Sergius Paulus may be said, perhaps, to mark the beginning of the work

among the Gentiles; otherwise, it was not in Cyprus that any change took place in the method hitherto followed by Barnabas and Saul in preaching the Gospel. Their public addresses were as yet confined to the synagogues; but it was soon to be otherwise. From Paphos "Paul and his company" set sail for the mainland, and arrived at Perga in Pamphylia. Here the heart of their companion John failed him, and he returned to Jerusalem. From Perga they travelled on to Antioch in Pisidia. (ANTIOCH 2.) Here "they went into the synagogue on the Sabbath-day, and sat down." Small as the place was, it contained its colony of Jews, and with them proselytes who worshipped the God of the Jews. What took place here in the synagogue and in the city, is interesting to us, not only on account of its bearing on the history, but also because it represents more or less exactly what afterward occurred in many other places. The apostles of Christ sat still with the rest of the assembly, whilst the Law and the Prophets were read. They and their audience were united in reverence for the sacred books. Then the rulers of the synagogue sent to invite them, as strangers but brethren, to speak any word of exhortation which might be in them to the people. Paul stood up, and beckoning with his hand, he spoke. The speech is given in Acts xiii. 16-41. The speaker starts from the Jewish covenant and promises, names Jesus as the promised Son of David, declares His resurrection the fulfilment of all God's promises of Life, proclaims as from God Himself the forgiveness of sins and full justification through Jesus, and concludes by drawing from the prophets a warning against unbelief. The discourse produced a strong impression; and the hearers (not "the Gentiles") requested the apostles to repeat their message on the next Sabbath. During the week so much interest was excited by the teaching of the apostles, that on the Sabbath-day "almost the whole city came together, to hear the Word of God." It was this concern of the Gentiles which appears to have first alienated the minds of the Jews from what they had heard. They were filled with envy. The Jewish envy once roused became a power of deadly hostility to the Gospel; and these Jews at Antioch set themselves to oppose bitterly the words which Paul spoke. The new opposition brought out new action on the part of the apostles. Rejected by the Jews, they became bold and outspoken, and turned from them to the Gentiles. Henceforth, Paul and Barnabas knew it to be their commission,—not the less to present their message to Jews first; but in the absence of an adequate Jewish medium to deal directly with the Gentiles. But this expansion of the Gospel work brought with it new difficulties and dangers. At Antioch now, as in every city afterward, the unbelieving Jews used their influence with their own adherents among the Gentiles, and especially the women of the higher class, to persuade the authorities or the populace to persecute the apostles, and to drive them from the place. With their own spirits raised, and amid much enthusiasm of their disciples, Paul and Barnabas now travelled on to Iconium, where the occurrences at Antioch were repeated, and from thence to the Lycaonian country which contained the cities Lystra and Derbe. Here they had to deal with uncivilized heathens. At LYSTRA the healing of a cripple took place, the narrative of which runs very parallel to the account of the similar act done by Peter and John at the gate of the Temple. The same truth was to be conveyed to the inhabitants of

Jerusalem, and to the heathens of Lycaonia. The act was received naturally by these pagans. They took the apostles for gods, calling Barnabas, who was of the more imposing presence, Zeus (JUPITER), and Paul, who was the chief speaker, Hermes (MERCURUS). This mistake, followed up by the attempt to offer sacrifices to them, gives occasion to the recording of an address, in which we see what the apostles would say to an ignorant pagan audience. Although the people of Lystra had been so ready to worship Paul and Barnabas, the repulse of their idolatrous instincts appears to have provoked them, and, persuaded into hostility by Jews who came from Antioch and Iconium, they attacked Paul with stones, and thought they had killed him. He recovered, however, as the disciples were standing round him, and went again into the city. The next day he left it with Barnabas, and went to Derbe, and thence they returned once more to Lystra, and so to Iconium and Antioch. In order to establish the Churches after their departure, they solemnly appointed "elders" in every city. Then they came down to the coast, and from Attalia they sailed home to Antioch in Syria, where they related the successes which had been granted to them, and especially the "opening of the door of faith to the Gentiles." And so the First Missionary Journey ended.—*The Council at Jerusalem* (Acts xv.; Gal. ii.). Upon that missionary journey follows most naturally the council held at Jerusalem to determine the relations of Gentile believers to the Law of Moses. In following this portion of the history we encounter two of the greater questions which the biographer of St. Paul has to consider. One of these is historical, What were the relations between the Apostle Paul and the Twelve? The other is critical, How is Gal. ii. to be connected with the narrative of the Acts? The relations of St. Paul and the Twelve will best be set forth in the narrative. But we must explain here why we accept St. Paul's statements in the Galatian Epistle as additional to the history in Acts xv. The first impression of any reader would be that the two writers refer to the same event. On looking more closely into both, the second impression may possibly be that of a certain incompatibility between the two. But the visit does not coincide better with any other mentioned in the Acts—as the second (xi. 30) or fourth (xviii. 22). The view that St. Paul refers to a visit not recorded in the Acts, is a perfectly legitimate hypothesis; and it is recommended by the vigorous sense of Paley. But where are we to place the visit? The only possible place for it is some short time before the visit of ch. xv. But the language of ch. xv. implies that the visit there recorded was the first paid by Paul and Barnabas to Jerusalem, after their great success in preaching the Gospel among the Gentiles. Granting the considerable differences between Acts xv. and Gal. ii., there are, after all, *no plain contradictions* between the two narratives, taken to refer to the same occurrences. We proceed, then, to combine the two narratives. Whilst Paul and Barnabas were staying at Antioch, "certain men from Judea" came there and taught the brethren that the Gentile converts must be circumcised. This doctrine was vigorously opposed by the two apostles, and it was determined that the question should be referred to the apostles and elders at Jerusalem. Paul and Barnabas themselves, and certain others, were selected for this mission. In Gal. ii. 2, St. Paul says that he went up "by revelation," i. e. receiving a

private intimation from the Divine Spirit as well as a public commission from the Church at Antioch. On their way to Jerusalem they announced to the brethren in Phenicia and Samaria the conversion of the Gentiles; and the news was received with great joy. At Jerusalem "they were received by the Church, and by the apostles and elders; and they declared all things that God had done with them" (Acts xv. 4). St. Paul adds that he communicated his views "privately to them which were of reputation," through anxiety as to the success of his work (Gal. ii. 2). The apostles and the Church in general, it appears, would have raised no difficulties; but certain believers who had been Pharisees maintained the same doctrine which had caused the disturbance at Antioch. In either place St. Paul would not give way to such teaching for a single hour (ii. 5). It became necessary, therefore, that a formal decision should be come to upon the question. The apostles and elders<sup>\*</sup> came together, and there was much disputing. Arguments would be used on both sides; but St. Peter with Barnabas and Paul appealed to what was stronger than arguments,—the course of *facts*, through which the will of God had been manifestly shown. After they had done, St. James, with incomparable simplicity and wisdom, binds up the testimony of recent facts with the testimony of ancient prophecy, and gives a practical judgment upon the question. The judgment was a decisive one. The injunction that the Gentiles should abstain from pollutions of idols and from fornication, explained itself. The abstinence from things strangled and from blood is desired as a concession to the customs of the Jews, who were to be found in every city, and for whom it was still right, when they had believed in Jesus Christ, to observe the Law. St. Paul had completely gained his point. The older apostles, James, Cephas, and John, perceiving the grace which had been given him (his effectual apostleship), gave to him and Barnabas the right hand of fellowship. At this point it is very important to observe precisely what was the matter at stake between the contending parties. The case stood thus: Circumcision and the ordinances of the Law were witnesses of a separation of the chosen race from other nations. The Jews were proud of that separation. But the Gospel of the Son of Man proclaimed that the time had come in which the separation was to be done away, and God's good-will manifested to all nations alike. It spoke of a union with God, through trust, which gave hope of a righteousness that the Law had been powerless to produce. Therefore to insist upon Gentiles being circumcised would have been to deny the Gospel of Christ. If there was to be simply an enlarging of the separated nation by the receiving of individuals into it, then the other nations of the world remained as much on the outside of God's covenant as ever. Then there was no Gospel to mankind; no justification given to men. The loss, in such a case, would have been as much to the Jew as to the Gentile. St. Paul felt this the most strongly; but St. Peter also saw that if the Jewish believers were thrown back on the Jewish Law, and gave up the free and absolute grace of God, the Law became a mere burden, just as heavy

\* The apostles and elders are mentioned on account of their rank. It is evident from ver. 23, that the other Christians at Jerusalem were also present, and gave their sanction to the decrees enacted; see also ver. 12, compared with ver. 22" (Hackett, on Acts, xv.; so also Lechler, in Lange's Comm., &c.).

to the Jew as it would be to the Gentile. The only hope for the Jew was in a Saviour who *must* be the Saviour of mankind. It implied therefore no difference of belief when it was agreed that Paul and Barnabas should go to the heathen, while James and Cephas and John undertook to be the apostles of the Circumcision. The judgment of the Church was immediately recorded in a letter addressed to the Gentile brethren in Antioch and Syria and Cilicia. This letter, speaking affectionately of Barnabas and Paul, was intrusted to "chosen men" of the Jerusalem Church, "Judas surnamed Barsabas, and Silas, chief men among the brethren." So Judas and Silas came down with Paul and Barnabas to Antioch, and comforted the Church there with their message, and when Judas returned, "it pleased Silas to abide there still." It is usual to connect with this period of the history that rebuke of St. Peter which St. Paul records in Gal. ii. 11-14. The connection of subject makes it convenient to record the incident in this place, although it is possible that it took place before the meeting at Jerusalem, and perhaps most probable that it did not occur till later, when St. Paul returned from his long tour in Greece to Antioch (Acts xviii. 22, 23). This withstanding of St. Peter was no opposition of Pauline to Petrine views; it was a faithful rebuke of blamable moral weakness.—*Second Missionary Journey.* The most resolute courage, indeed, was required for the work to which St. Paul was now publicly pledged. He would not associate with himself in that work one who had already shown a want of constancy. This was the occasion of what must have been a most painful difference between him and his comrade in the faith and in past perils, Barnabas (xv. 35-40). (MARK.) SILAS, or Silvanus, becomes now a chief companion of the apostle. The two went together through Syria and Cilicia, visiting the churches, and so came to Derbe and Lystra. Here they find Timotheus (TIMOTHY), who had become a disciple on the former visit of the apostle. Him St. Paul took and circumcised. Paul and Silas were actually delivering the Jerusalem decree to all the churches they visited. They were no doubt triumphing in the freedom secured to the Gentiles. Yet at this very time our apostle had the wisdom and largeness of heart to consult the feelings of the Jews by circumcising Timothy (1 Cor. ix. 20). St. Luke now steps rapidly over a considerable space of the apostle's life and labors. "They went throughout Phrygia and the region of Galatia" (Acts xvi. 6). At this time St. Paul was founding "the churches of Galatia" (Gal. i. 2). He himself gives us hints of the circumstances of his preaching in that region, of the reception he met with, and of the ardent, though unstable, character of the people (iv. 13-15). It is not easy to decide as to the meaning of the words "through infirmity of the flesh." Undoubtedly, their grammatical sense implies that "weakness of the flesh"—an illness—was the occasion of St. Paul's preaching in Galatia. On the other hand, the form and order of the words are not what we should have expected if the apostle meant to say this; and Prof. Jowett prefers to assume an inaccuracy of grammar, and to understand St. Paul as saying that it was *in* weakness of the flesh that he preached to the Galatians. In either case St. Paul must be referring to a more than ordinary pressure of that bodily infirmity which he speaks of elsewhere as detracting from the influence of his personal address. It is hopeless to attempt to determine positively what this infirmity was. St. Paul

at this time had not indulged the ambition of preaching his Gospel in Europe. His views were limited to the peninsula of Asia Minor. Having gone through Phrygia and Galatia, he intended to visit the western coast (ASIA); but "they were forbidden by the Holy Ghost to preach the word" there. Then, being on the borders of Mysia, they thought of going back to the N. E. into Bithynia; but again the Spirit of Jesus "suffered them not." So they passed by Mysia, and came down to Troas. Here St. Paul saw in a vision a man of MACEDONIA, who besought him, saying, "Come over into Macedonia and help us." The vision was at once accepted as a Heavenly intimation; the help wanted by the Macedonians was believed to be the preaching of the Gospel. At this point the historian, speaking of St. Paul's company, substitutes "we" for "they." He says nothing of himself; we can only infer that St. LUKE, to whatever country he belonged, became a companion of St. Paul at Troas. The party, thus reinforced, immediately set sail from Troas, touched at Samothrace, then landed on the continent at Neapolis, and from thence journeyed to PHILIPPI. Philippi was no inapt representative of the Western world. A Greek city, it had received a body of Roman settlers, and was politically a COLONY. There were Jews at Philippi; and when the Sabbath came round, the apostolic company joined their countrymen at the place by the riverside where prayer was wont to be made. The narrative in this part is very graphic (Acts xvi. 13). The first convert in Macedonia was an Asiatic woman (LYDIA), who already worshipped the God of the Jews; but she was a very earnest believer, and besought the apostle and his friends to honor her by staying in her house. They could not resist her urgency, and during their stay at Philippi they were the guests of Lydia (ver. 40). But a proof was given before long that the preachers of Christ were come to grapple with the powers in the spiritual world to which heathenism was then doing homage. A female slave, who brought gain to her masters by her powers of prediction when she was in the possessed state (DEMONIACS; DIVINATION), beset Paul and his company, following them as they went to the place of prayer, and crying out, "These men are servants of the Most High God, who publish to you (or to us; A. V. 'which shew unto us') the way of salvation." Paul was vexed by her cries, and addressing the spirit in the girl, he said, "I command thee in the name of Jesus Christ to come out of her." The girl's masters saw that now the hope of their gains was gone. Paul and Silas were dragged before the magistrates, the multitude clamoring loudly against them, upon the vague charge of "troubling the city," and introducing observances which were unlawful for Romans. If the magistrates had desired to act justly, they might have doubted how they ought to deal with the charge. But the pretors or *dumviri* (L. *two men*, i. e. two associated magistrates) of Philippi were very unworthy representatives of the Roman magistracy. They yielded without inquiry to the clamor of the inhabitants, caused the clothes of Paul and Silas to be torn from them, and themselves to be beaten, and then committed them to prison. The jailer, having received their commands, "thrust them into the inner prison, and made their feet fast in the stocks." This cruel wrong was to be the occasion of the signal appearance of the God of righteousness and deliverance. The narrative tells of the loud songs of praise, the earthquake, the opening

of the prison-doors, the jailer's terror, his conversion, and baptism (xvi. 26-34). In the morning the magistrates, having heard of what had happened, or having repented of their injustice, or having done all they meant to do by way of pacifying the multitude, sent word to the prison that the men might be let go. But St. Paul denounced plainly their unlawful acts, informing them moreover that those whom they had beaten and imprisoned without trial, were Roman citizens. The magistrates, in great alarm, saw the necessity of humbling themselves. They came and begged them to leave the city. Paul and Silas consented to do so, and, after paying a visit to "the brethren" in the house of Lydia, they departed. Leaving St. Luke, and perhaps Timothy, for a short time, at Philippi, Paul and Silas travelled through Amphipolis and Apollonia, and stopped again at THESSALONICA. At this important city there was a synagogue of the Jews. True to his custom, St. Paul went in to them, and for three Sabbath-days proclaimed Jesus to be the Christ. Again, as in Pisidian Antioch, the envy of the Jews was excited. They stirred up the lower class to tumultuary violence. The mob assaulted the house of Jason, with whom Paul and Silas were staying as guests, and, not finding them, dragged Jason himself and some other brethren before the magistrates. In this case the magistrates seem to have acted wisely and justly, in taking security of Jason and the rest, and letting them go. After these signs of danger, the brethren immediately sent away Paul and Silas by night. The Epistles to the Thessalonians were written very soon after the apostle's visit, and contain more particulars of his work in founding that Church than we find in any other Epistle. (THESSALONIANS, FIRST [AND SECOND] EPISTLE TO.) When Paul and Silas left Thessalonica, they came to BEREÄ. Here they found the Jews more "noble" (i. e. in their disposition) than those at Thessalonica had been. Accordingly, they gained many converts, both Jews and Greeks; but the Jews of Thessalonica, hearing of it, sent emissaries to stir up the people, and it was thought best that St. Paul should himself leave the city, whilst Silas and Timothy remained behind. Some of "the brethren" went with St. Paul as far as ATHENS, where they left him, carrying back a request to Silas and Timothy that they would speedily join him. There he witnessed the most profuse IDOLATRY side by side with the most pretentious PHILOSOPHY. To idolaters and philosophers he felt equally urged to proclaim his Master and the Living God. So he went to his own countrymen and the proselytes in the synagogue, and declared to them that the Messiah had come; but he also spoke, like another Socrates, with people in the market, and with the followers of the two great schools of philosophy, EPICUREANS and STOICS, naming to all Jesus and the Resurrection. The philosophers encountered him with a mixture of curiosity and contempt. But any one with a novelty was welcome to those who "spent their time in nothing else but either to hear or to tell some new thing." They brought him, therefore, to the AREOPAGUS, that he might make a formal exposition of his doctrine to an assembled audience. Here the apostle delivered that instructive and wonderful discourse, reported in Acts xvii. 22-31. St. Paul, it is well understood, did not begin with calling the Athenians (as in the A. V.) "too superstitious." "I perceive you," he said, "to be eminently religious." He had observed an altar (ALTAR, C, 2) inscribed "To the unknown

God." It meant, no doubt, "To some unknown God." "I come," he said, "as the messenger of that unknown God." His teaching here laid hold of the deepest convictions, and encountered the strongest prejudices of Greeks. He could speak to men as God's children, and subjects of God's educating discipline, and was only bringing them further tidings of Him whom they had been always feeling after. He presented to them the Son of Man as acting in the power of Him who had made all nations, and who was not far from any single man. He began to speak of Him as risen from the dead, and of the power of a new life which was in Him for men; but his audience would not hear of Him who thus claimed their personal allegiance. The apostle gained but few converts at Athens, and he soon took his departure and came to CORINTH. Athens still retained its old intellectual predominance; but Corinth was the political and commercial capital of Greece. Here, as at Thessalonica, he chose to earn his own subsistence by working at his trade of tent-making. This trade brought him into close connection with AQUILA and PRISCILLA. Laboring thus on the six days, the apostle went to the synagogue on the Sabbath, and there, by expounding the Scriptures, sought to win both Jews and proselytes to the belief that Jesus was the Christ. He was testifying with unusual effort and anxiety, when Silas and Timothy came from Macedonia, and joined him. We are left in some uncertainty as to what the movements of Silas and Timothy had been, since they were with Paul at Berea. From Acts xvii. 15, 16, compared with 1 Th. iii. 1, 2, Paley reasonably argues that Silas and Timothy had come to Athens, but had soon been dispatched thence, Timothy to Thessalonica, and Silas to Philippi, or elsewhere. From Macedonia they came together, or about the same time, to Corinth; and their arrival was the occasion of writing 1 Thessalonians. This is the first extant example of that work by which the apostle Paul has served the Church of all ages in as eminent a degree as he labored at the founding of it in his lifetime. It is notorious that the order of the Epistles in the book of the N. T. is not their real, or chronological order. The two Epistles to the Thessalonians belong—and these alone—to the present Missionary Journey. The Epistles to the Galatians, Romans, and Corinthians, were written during the next journey. Those to Philemon, the Colossians, Ephesians, and Philippians, belong to the captivity at Rome. With regard to the Pastoral Epistles, there are considerable difficulties, which require to be discussed separately. —Two general remarks relating to St. Paul's Letters may find a place here. (1.) There is no reason to assume that the extant Letters are all that the apostle wrote. (2.) We must be on our guard against concluding too much from the contents and style of any Epistle, as to the fixed bent of the apostle's whole mind at the time when it was written.—The First Epistle to the Thessalonians was probably written soon after his arrival at Corinth, and before he turned from the Jews to the Gentiles. It was drawn from St. Paul by the arrival of Silas and Timothy. The largest portion of it consists of an impassioned recalling of the facts and feelings of the time when the apostle was personally with them. (THESSALONIANS, FIRST EPISTLE TO THE.) What interval of time separated the Second Letter to the Thessalonians from the First, we have no means of judging, except that the later one was certainly written before St. Paul's departure from

Corinth. (THESSALONIANS, SECOND EPISTLE TO THE.)—We return now to the apostle's preaching at Corinth. When Silas and Timotheus came, he was testifying to the Jews with great earnestness, but with little success. (CRISPUS.) So, "when they opposed themselves and blasphemed, he shook out his raiment," and said to them, in words of warning taken from their own prophets (Ez. xxxiii. 4): "Your blood be upon your own heads; I am clean, and henceforth will go to the Gentiles." The apostle went, as he threatened, to the Gentiles, and began to preach in the house of a proselyte named Justus. Corinth was the chief city of the province of Achaia, and the residence of the proconsul. During St. Paul's stay, we find the proconsular office held by GALLIO. Before him the apostle was summoned by his Jewish enemies, who hoped to bring the Roman authority to bear upon him as an innovator in religion. But Gallio perceived at once, before Paul could "open his mouth" to defend himself, that the movement was due to Jewish prejudice, and refused to go into the question. "If it be a question of words and names and of your law," he said to the Jews, speaking with the tolerance of a Roman magistrate, "look ye to it; for I will be no judge of such matters." Then the Corinthian spectators, either favoring St. Paul, or actuated only by anger against the Jews, seized on the principal person of those who had brought the charge, and beat him before the judgment-seat. Gallio left these religious quarrels to settle themselves. The apostle, therefore, was not allowed to be "hurt," and remained some time longer at Corinth unmolested. Having founded the Church at Corinth, and gathered into it many, chiefly Gentiles, humble and simple (1 Cor. xii. 2, x. 1, i. 27, &c.), St. Paul took his departure for Jerusalem, wishing to attend a festival there. Before leaving Greece, he cut off his hair at Cenchrea, in fulfilment of a vow (Acts xviii. 18). He may have followed in this instance, for some reason not explained to us, a custom of his countrymen. (NAZARITE; VOWS.) When he sailed from the Isthmus, Aquila and Priscilla went with him as far as EPHESUS. Paul paid a visit to the synagogue at Ephesus, but would not stay. Leaving Ephesus, he sailed to Cesarea, and from thence went up to Jerusalem and "saluted the Church." It is argued, from considerations founded on the suspension of navigation during the winter months, that the festival was probably the PENTECOST. From Jerusalem, almost immediately, the apostle went down to Antioch, thus returning to the same place from which he had started with Silas.—*Third Missionary Journey, including the stay at Ephesus* (Acts xviii. 23–xxi. 17). We may connect with this short visit of St. Paul to Jerusalem a very serious raising of the whole question, What was to be the relation of the new kingdom of Christ to the law and covenant of the Jews? To vindicate the *freedom*, as regarded the Jewish law, of believers in Christ; but to do this, for the very sake of maintaining the *unity of the Church*—was to be the earnest labor of the apostle for some years. The great Epistles which belong to this period, those to the Galatians, Corinthians, and Romans, show how the "Judaizing" question exercised at this time the apostle's mind. St. Paul "spent some time" at Antioch, and during this stay, as we are inclined to believe, his collision with St. Peter (Gal. ii. 11–14), spoken of above, took place. When he left Antioch, he "went over all the country of Galatia and Phrygia in order, strengthening all the disciples," and giving orders concerning the

collection for the saints (1 Cor. xvi. 1). Probably the *Epistle to the Galatians* (GALATIANS, EPISTLE TO THE) was written soon after this visit, and sent from Ephesus. This was the goal of the apostle's journeyings through Asia Minor. He came down upon Ephesus from the upper districts of Phrygia. With reference to the spread of the Church Catholic, Ephesus occupied a more central position than Antioch, Corinth, or Rome. It was the meeting-place of Jew, Greek, Roman, and Oriental. A new element in the preparation of the world for the kingdom of Christ presents itself at the beginning of the apostle's work at Ephesus. He finds there certain disciples—about twelve in number—of whom he is led to inquire, "Did ye receive the Holy Ghost when ye believed?" They answered, No, we did not even hear of there being a Holy Ghost. Unto what then, asked Paul, were ye baptized? And they said, Unto John's baptism. Then said Paul, John baptized with the baptism of repentance, saying to the people that they should believe on Him who was coming after him, that is, on Jesus. Hearing this, they were baptized into the name of the Lord Jesus, and when Paul had laid his hands upon them, the Holy Ghost came upon them, and they began to speak with tongues and to prophesy" (Acts xix. 1–7).—It is obvious to compare this incident with the apostolic act of Peter and John in Samaria, and to see in it an assertion of the full apostolic dignity of Paul. But besides this bearing of it, we see in it indications which suggest more than they distinctly express, as to the spiritual movements of that age. These twelve disciples are mentioned immediately after APOLLOS, who also had been at Ephesus just before St. Paul's arrival, and who had taught diligently concerning Jesus, knowing only the baptism of John. What the exact belief of Apollos and these twelve "disciples" was concerning the character and work of Jesus, we have no means of knowing. The apostle now went into the synagogue, and for three months spoke openly, disputing and persuading concerning "the kingdom of God." At the end of this time the obstinacy and opposition of some of the Jews led him to give up frequenting the synagogue, and he established the believers as a separate society, meeting "in the school of Tyrannus." This continued for two years. During this time, many things occurred, of which the historian of the Acts chooses two examples, the triumph over magical arts (EPHESUS, § 3; EXORCIST; MAGIC), and the great disturbance raised by the silversmiths who made shrines for Artemis (DIANA; EPHESUS, § 2); and amongst which we are to note further the writing of 1 Corinthians. Whilst St. Paul was at Ephesus his communications with the Church in Achaia were not altogether suspended. There is strong reason to believe that a personal visit to Corinth was made by him, and a letter sent, neither of which is mentioned in the Acts. The visit is inferred from 2 Cor. xii. 14, xiii. 1. The visit he is contemplating is plainly that mentioned in Acts xx. 2, which took place when he finally left Ephesus. If that was the *third*, he must have paid a *second* during his residence at Ephesus. The obvious sense of 2 Cor. ii. 1, xii. 21, xiii. 2, implies a short visit, which we should place in the first half of the stay at Ephesus. And there are no strong reasons why we should not accept that obvious sense. Whether 1 Corinthians was written before or after the tumult excited by Demetrius cannot be positively asserted. He makes an allusion, in that Epistle, to a "battle with wild beasts" fought at Ephesus (1 Cor. xv. 32), which is usually under-

stood figuratively, and is by many connected with that tumult. But this connection is without much reason. And as it would seem from Acts xx. 1 that St. Paul departed immediately after the tumult, probably the Epistle was written not long before the raising of this disturbance. There were two external inducements for writing this Epistle. (1.) St. Paul had received information from members of Chloe's household (1 Cor. i. 11) concerning the state of the Church at Corinth. (2.) That Church had written him a letter, of which the bearers were Stephanas and Fortunatus and Achaicus, to ask his judgment upon various points (vii. 1, xvi. 17). (For a detailed description see *Corinthians*, FIRST EPISTLE TO THE.) But we must observe in this Epistle how loyally the apostle represents Jesus Christ the Crucified as the Lord of men, the Head of the body with many members, the Centre of Unity, the Bond of men to the Father. We should mark at the same time how invariably he connects the power of the Spirit with the Name of the Lord Jesus. He meets all the evils of the Corinthian Church, the intellectual pride, the party spirit, the loose morality, the disregard of decency and order, the false belief about the Resurrection, by recalling their thoughts to the Person of Christ and to the Spirit of God as the Breath of a common life to the whole body. We observe also here, more than elsewhere, the *fact*, universally recognized and admired, with which the apostle discusses the practical problems brought before him. What St. Paul here tells us of his own doings and movements refers chiefly to the nature of his preaching at Corinth (i., ii.); to the hardships and dangers of the apostolic life (iv. 9-13); to his cherished custom of working for his own living (ix.); to the direct revelations he had received (xi. 23, xv. 8); and to his present plans (xvi.). He bids the Corinthians raise a collection for the Church at Jerusalem by laying by something on the first day of the week, as he had directed the churches in Galatia to do. He says that he shall tarry at Ephesus till Pentecost, and then set out on a journey toward Corinth through Macedonia, so as perhaps to spend the winter with them. He expresses his joy at the coming of Stephanas and his companions, and commends them to the respect of the Church. Having dispatched this Epistle he stayed on at Ephesus, where "a great door and effectual was opened to him, and there were many adversaries." We have now no information as to his work there, until that tumult occurred which is described in Acts xix. 24-41. St. Paul is only personally concerned in this tumult in so far as it proves the deep impression which his teaching had made at Ephesus, and the daily danger in which he lived. He had been anxious to depart from Ephesus, and this interruption of the work which had kept him there determined him to stay no longer. He set out therefore for Macedonia, and proceeded first to Troas (2 Cor. ii. 12), where he might have preached the Gospel with good hope of success. But a restless anxiety to obtain tidings concerning the Church at Corinth urged him on, and he advanced into Macedonia, where he met Titus, who brought him the news for which he was thirsting. The receipt of this intelligence drew from him a letter which reveals to us what manner of man St. Paul was when the fountains of his heart were stirred to their inmost depths. (*CORINTHIANS*, SECOND EPISTLE TO THE.) Every reader may perceive that, on passing from the First Epistle to the Second, the scene is almost entirely changed. In the *First*, the faults and difficulties of the Corinthian Church

are before us. The apostle writes of these, with spirit indeed and emotion, as he always does, but without passion or disturbance. In the *Second*, he writes as one whose personal relations with those whom he addresses have undergone a most painful shock. What had occasioned this excitement? We have seen that Timothy had been sent from Ephesus to Macedonia and Corinth. He had rejoined St. Paul when he wrote this Second Epistle, for he is associated with him in the salutation (2 Cor. i. 1). We have no account, either in the Acts or in the Epistles, of this journey of Timothy, and some have thought it probable that he never reached Corinth. Let us suppose, however, that he arrived there soon after the First Epistle, conveyed by Stephanas and others, had been received by the Corinthian Church. He found that a movement had arisen in the heart of that Church which threw (let us suppose) the case of the incestuous person (1 Cor. v. 1-5) into the shade. This was a deliberate and sustained attack upon the apostolic authority and personal integrity of the Apostle of the Gentiles. When some such attack was made openly upon the apostle, the Church had not immediately called the offender to account; the better spirit of the believers being cowed, apparently, by the confidence and assumed authority of the assailants of St. Paul. A report of this melancholy state of things was brought to the apostle by Timothy or by others. He immediately sent off Titus to Corinth, with a letter containing the sharpest rebukes, *using* the authority which had been denied, and threatening to enforce it speedily by his personal presence (2 Cor. ii. 2, 3, vii. 8). As soon as the letter was gone, he began to repent of having written it. He speaks of what he had suffered:—"Out of much affliction and anguish of heart I wrote to you with many tears" (ii. 4); "I had no rest in my spirit" (ii. 13); "our flesh had no rest, but we were troubled on every side; without were fightings, within were fears" (vii. 5). It appears that he could not bring himself to hasten to Corinth so rapidly as he had intended (i. 15, 16); he would wait till he heard news which might make his visit a happy instead of a painful one (ii. 1). When he had reached Macedonia, Titus, as we have seen, met him with reassuring tidings. The offender had been rebuked by the Church, and had made submission (ii. 6, 7); the old spirit of love and reverence toward St. Paul had been awakened, and had poured itself forth in warm expressions of shame and grief and penitence. The cloud was now dispelled; fear and pain gave place to hope and tenderness and thankfulness. But even now the apostle would not start at once for Corinth. He may have had important work to do in Macedonia. But another letter would smooth the way still more effectually for his personal visit; and he accordingly wrote the Second Epistle, and sent it by the hands of Titus and two other brethren to Corinth.<sup>4</sup> The particular nature of this Epistle, as an appeal to facts in favor of his own apostolic authority, leads to the mention of many interesting features of St. Paul's life. His summary, in xi. 23-28, of the hardships and dangers through which he had gone, proves to us how little the history in the

<sup>4</sup> The hypothesis given above, upon which Mr. Davies has interpreted 2 Cor., is advocated by Ewald, and has been held, in whole or in part, according to De Wette, by Bleek, Credner, Olshausen, and Neander (?); but the ordinary account—that the incestuous person of 1 Cor. v. 1 is the offender, and 1 Cor. the letter which proved so sharp and wholesome a medicine—is retained by Stanley, Alford, Davidson, Dr. W. L. Alexander (in Elitto), Conybeare & Howson, &c.

Acts is to be regarded as a complete account of what he did and suffered. The daily burden "of the care of all the churches" seems to imply a wide and constant range of communication. The mention of "visions and revelations of the Lord," and of the "thorn (or rather *stake*) in the flesh," side by side, is peculiarly characteristic both of the mind and of the experiences of St. Paul. As an instance of the visions, he alludes to a trance fourteen years before, in which he had been caught up into paradise, and had heard unspeakable words. But he would not, even inwardly with himself, glory in visions and revelations without remembering how the Lord had guarded him from being puffed up by them. A *stake* (A. V. "thorn," Gr. *skolops*) in the flesh was given him, a messenger of Satan to buffet him, lest he should be exalted above measure. The different interpretations which have prevailed of this *skolops* have a certain historical significance. (1.) Roman Catholic divines have inclined to understand by it strong *sensual temptation*. (2.) Luther and his followers take it to mean temptations to *unbelief*. But neither of these would be "infirmities" in which St. Paul could "glory." (3.) It is almost the unanimous opinion of modern divines—and the authority of the ancient fathers on the whole is in favor of it—that the *skolops* represents some vexatious *bodily infirmity* (comp. Gal. iv. 14).—After writing this Epistle, St. Paul travelled through Macedonia, perhaps to the borders of Illyricum (Rom. xv. 19), and then carried out the intention of which he had spoken so often, and arrived himself at Corinth. "When he had gone over those parts (Macedonia), and had given them much exhortation, he came into Greece, and there abode three months" (Acts xx. 2, 3). There is only one incident which we can connect with this visit to Greece, but that is a very important one—the writing of another great Epistle, addressed to the Church at Rome. (ROMANS, EPISTLE TO THE.) That this was written at this time from Corinth appears from passages in the Epistle itself, and has never been doubted. The letter is a substitute for the personal visit which he had longed "for many years" to pay; and, as he would have made the visit, so now he writes the letter, *because he is the Apostle of the Gentiles*. Of this office, to speak in common language, St. Paul was proud. All the labors and dangers of it he would willingly encounter; and he would also jealously maintain its dignity and its powers. He held it of Christ, and Christ's commission should not be dishonored. He represents himself grandly as a priest, appointed to offer up the faith of the Gentile world as a sacrifice to God (Rom. xv. 16). He then proceeds to speak of the extent and independence of his apostolic labors. It is in harmony with this language that he should address the Roman Church as consisting mainly of Gentiles: but we find that he speaks to them as to persons deeply interested in Jewish questions. Before his departure from Corinth, St. Paul was joined again by St. Luke, as we infer from the change in the narrative from the third to the first person (Acts xx. 5). We have seen already that he was bent on making a journey to Jerusalem, for a special purpose and within a limited time. With this view he was intending to go by sea to Syria. But made aware of some plot of the Jews for his destruction, he determined to evade their malice by changing his route. Several brethren were associated with him in this expedition, the bearers, no doubt, of the collections made in all the churches for the poor at Jerusalem.

These were sent on by sea, and probably the money with them, to TROAS, where they were to await St. Paul. He, accompanied by St. Luke, went northward through Macedonia. During the stay at Troas there was a meeting on the first day of the week "to break bread," and Paul was discoursing earnestly and at length with the brethren. He was to depart the next morning, and midnight found them listening to his earnest speech. A youth named Eutychus, sitting in the window, and gradually overpowered by sleep, fell into the street or court from the third story, and was taken up dead. The meeting was interrupted by this accident, and Paul went down and fell upon him and embraced him, saying, "Be not disturbed, his life is in him." His friends then appear to have taken charge of him, while Paul went up again, first presided at the breaking of bread, afterward took a meal, and continued conversing until daybreak, and so departed. Whilst the vessel, which conveyed the rest of the party, sailed from Troas to Assos, Paul gained some time by making the journey by land. At Assos he went on board again. Coasting along by Mitylene, Chios, Samos, and Trogyllium, they arrived at MILETUS. At Miletus, however, there was time to send to Ephesus; and the elders of the Church were invited to come down to him there. This meeting is made the occasion for recording another characteristic and *representative* address of St. Paul (xx. 18–35). It is in great part an appeal to their memories of him and of his work. He refers to his labors and dangers and *unreserve* among them; mentions his receiving inspired warnings of bonds and afflictions awaiting him at Jerusalem; declares his one guiding principle, to discharge the ministry which he had received of the Lord Jesus, to testify the Gospel of the grace of God. He exhorts them with unusual earnestness and tenderness, and expresses, in conclusion, that anxiety as to practical industry and liberality which has been increasingly occupying his mind. "And when he had thus spoken, he kneeled down and prayed with them all: and they all wept sore, and fell on Paul's neck, and kissed him, sorrowing most of all for the words which he spake, that they should see his face no more. And they accompanied him to the ship." The course of the voyage from Miletus was by Coos and Rhodes to Patara, and from Patara in another vessel past Cyprus to TYRE. Here Paul and his company spent seven days. From Tyre they sailed to Ptolemais (ACCHO), where they spent one day, and from Ptolemais proceeded, apparently by land, to CESAREA 1. In this place was settled PHILIP THE EVANGELIST, one of the seven, and he became the host of Paul and his friends. Philip had four unmarried daughters, who "prophesied," and who repeated, no doubt, the warnings already heard. They now "tarried many days" at Cesarea. During this interval the prophet AGABUS (xi. 28) came down from Jerusalem, and crowned the previous intimations of danger with a prediction expressively delivered. At this stage a final but unavailing effort was made to dissuade Paul from going up to Jerusalem, by the Christians of Cesarea, and by his travelling companions. "And when he would not be persuaded, we ceased, saying, The will of the Lord be done." So, after a while, they went up to Jerusalem, and were gladly received by the brethren. This is St. Paul's fifth and last visit to Jerusalem.—*St. Paul's Imprisonment: Jerusalem and Cesarea.* He who was thus conducted into Jerusalem by a company of anxious friends was widely

known as one who had taught with preëminent boldness that a way into God's favor was opened to the Gentiles, and that this way did not lie through the door of the Jewish Law. He had, moreover, actually founded numerous and important communities, composed of Jews and Gentiles together, which stood simply on the name of Jesus Christ, apart from circumcision and the observance of the Law. He had thus roused against himself the bitter enmity of that unfathomable Jewish pride which was almost as strong in some of those who had professed the faith of Jesus, as in their unconverted brethren. He was now approaching a crisis in the long struggle, and the shadow of it had been made to rest upon his mind throughout his journey to Jerusalem. He came "ready to die for the name of the Lord Jesus," but he came expressly to prove himself a faithful Jew, and this purpose emerges at every point of the history. St. Luke does not mention the contributions brought by Paul and his companions for the poor at Jerusalem. But it is to be assumed that their first act was to deliver these funds into the proper hands. This might be done at the interview on the following day with "James and all the elders." As on former occasions, the believers at Jerusalem could not but glorify God for what they heard; but they had been alarmed by the prevalent feeling concerning St. Paul. To dispel this impression, they ask him to do publicly an act of homage to the Law and its observances. They had four men who were under the NAZARITE VOW. The completion of this vow involved (Num. vi. 13-21) a considerable expense for the offerings to be presented in the Temple; and it was a meritorious act to provide these offerings for the poorer Nazarites. St. Paul was requested to put himself under the vow with those other four, and to supply the cost of their offerings. He at once accepted the proposal. It appears that the whole process undertaken by St. Paul required seven days to complete it. Toward the end of this time certain Jews from "Asia" who had come up for the Pentecostal feast, and who had a personal knowledge both of Paul himself and of his companion Trophimus, a Gentile from Ephesus, saw Paul in the Temple. They immediately set upon him, and stirred up the people against him, crying out, "Men of Israel, help: this is the man that teacheth all men everywhere against the people, and the Law, and this place; and further brought Greeks also into the Temple, and hath polluted this holy place." The latter charge had no more truth in it than the first: it was only suggested by their having seen Trophimus with him, not in the Temple, but in the city. They raised, however, a great commotion: Paul was dragged out of the Temple, of which the doors were immediately shut, and the people, having him in their hands, were proposing to kill him. But tidings were soon carried to the commander of the force which was serving as a garrison in Jerusalem, that "all Jerusalem was in an uproar;" and he, taking with him soldiers and centurions, hastened to the scene of the tumult, rescued Paul from the violence of the multitude, made him his own prisoner, causing him to be chained to two soldiers, and then proceeded to inquire who he was and what he had done. The inquiry only elicited confused outcries, and the "chief captain" (ARMY II.; LYSIAS 2) seems to have imagined that the apostle might be a certain Egyptian pretender who had recently stirred up a considerable rising of the people. The account in Acts

xxi. 34-40 tells us with graphic touches how St. Paul obtained leave and opportunity to address the people in a discourse which is related at length. This discourse was spoken in Hebrew, i. e. in the native dialect of the country (SHAMITIC LANGUAGE, § 15), and was on that account listened to with the more attention. It is described by St. Paul himself, in his opening words, as his "defence," addressed to his brethren and fathers. He adopts the historical method. A zealous Israelite, like his hearers, he had changed his course because the God of his fathers had turned him from one path into another. (See above, p. 811.) He describes another revelation of which we read nothing elsewhere. After the visit to Damascus, he went up again to Jerusalem, and, while praying in the Temple, fell into a trance, in which he was bidden to leave Jerusalem quickly, because the people there would not receive his testimony concerning Jesus. His own impulse was to stay at Jerusalem where he was well known as having persecuted those of whom he was now one; but the Lord commanded, "Depart: for I will send thee far hence to the Gentiles." Until this hated word had been spoken, the Jews had listened to the speaker. "Away with such a fellow from the earth," the multitude now shouted; "it is not fit that he should live." The Roman commander, seeing the tumult that arose, might well conclude that St. Paul had committed some heinous offence; and carrying him off, he gave orders that he should be forced by scourging to confess his crime. Again the apostle took advantage of his Roman citizenship to protect himself from such an outrage. The Roman officer was bound to protect a CITIZEN, and to suppress tumult; but it was also a part of his policy to treat with deference the religion and the customs of the country. St. Paul's present history is the resultant of these two principles. The chief captain set him free from bonds, but on the next day called together the chief priests and the SANHEDRIM, and brought Paul as a prisoner before them. We need not suppose that this was a regular legal proceeding: it was probably an experiment of policy and courtesy. If, on the one hand, the commandant of the garrison had no power to convoke the Sanhedrim; on the other hand he would not give up a Roman citizen to their judgment. As it was, the affair ended in confusion, and with no semblance of a judicial termination. The incidents selected by St. Luke from the history of this meeting form striking points in the biography of St. Paul, but they are not easy to understand. St. Paul appears to have been put upon his defence, and with the peculiar habit, mentioned elsewhere also (xiii. 9), of looking steadily when about to speak, he began to say, "Men and brethren, I have lived in all good conscience (or, I have lived a conscientiously loyal life) unto God, until this day." Here the high-priest Ananias commanded them that stood by him to smite him on the mouth. With a fearless indignation, Paul exclaimed, "God shall smite thee, thou whited wall: for sittest thou to judge me after the Law, and commandest me to be smitten contrary to the Law?" The bystanders said, "Revilest thou God's HIGH-PRIEST?" Paul answered, "I knew not, brethren, that he was the high-priest; for it is written, Thou shalt not speak evil of the ruler of thy people." How was it possible for him not to know that he who spoke was the high-priest? The least objectionable solutions seem to be, that for some reason or other,—either because his sight

was not good, or because he was looking another way,—he did not know whose voice it was that ordered him to be smitten; and that he wished to correct the impression which he saw was made upon some of the audience by his threatening protest, and therefore took advantage of the fact that he really did not know the speaker to be the high-priest, to explain the deference he felt to be due to the person holding that office. The next incident which St. Luke records seems to some, who cannot think of the apostle as remaining still a Jew, to cast a shadow upon his rectitude. He perceived, we are told, that the council was divided into two parties, the Sadducees and Pharisees, and therefore he cried out, "Men and brethren, I am a Pharisee, the son of a Pharisee; concerning the hope and resurrection of the dead I am called in question." This declaration, whether so intended or not, had the effect of stirring up a fierce dissension, and some of the Pharisees actually took Paul's side.—Those who impugn the authenticity of the Acts point triumphantly to this scene as an utterly impossible one: others consider that the apostle is to be blamed for using a disingenuous artifice. But it is not so clear that St. Paul was using an artifice at all, at least for his own interest, in identifying himself as he did with the professions of the Pharisees. The creed of the Pharisee, as distinguished from that of the Sadducee, was unquestionably the creed of St. Paul. His belief in Jesus seemed to him to supply the ground and fulfilment of that creed. He wished to lead his brother Pharisees into a deeper and more living apprehension of their own faith. The immediate consequence of the dissension in the assembly was that Paul was like to be torn in pieces, and was carried off by the Roman soldiers. In the night he had a vision of the Lord standing by him and encouraging him: "Be of good cheer, Paul: for as thou hast testified of me at Jerusalem, so must thou bear witness also at Rome." The next day more than forty of the Jews bound themselves under a curse neither to eat nor to drink until they had killed Paul. The plot was discovered, and St. Paul was hurried away from Jerusalem. The chief captain, Claudius Lysias, determined to send him to CESAREA, to FELIX the governor, or PROCURATOR, of JUDÆA. He therefore put him in charge of a strong guard of soldiers, who took him by night as far as Antipatris. From thence a smaller detachment conveyed him to Cesarea, where they delivered up their prisoner to the governor. Felix asked of what province the prisoner was: and being told that he was of Cilicia, he promised to give him a hearing when his accusers should come. In the mean time he ordered him to be guarded in the government-house, which had been the palace of Herod the Great.—*Imprisonment at Cesarea.* St. Paul was henceforth, to the end of the period embraced in the Acts, if not to the end of his life, in Roman custody. This custody was in fact a protection to him, without which he would have fallen a victim to the animosity of the Jews. He seems to have been treated throughout with humanity and consideration. The governor before whom he was now to be tried, according to Tacitus and Josephus, was a mean and dissolute tyrant. The orator or counsel retained by the Jews and brought down by Ananias and the elders, when they arrived in the course of five days at Cesarea, begins the proceedings of the trial professionally by complimenting the governor. (TERTULLUS.) The charge he goes on to set forth against Paul shows

precisely the light in which he was regarded by the fanatical Jews—"a pestilent (fellow), and a mover of sedition among all the Jews throughout the world, and a ringleader of the sect of the Nazarenes, who hath also gone about to profane the Temple." St. Paul met the charge in his usual manner. He was glad that his judge had been for some years governor of a Jewish province; "because it is in thy power to ascertain that, not more than twelve days since, I came up to Jerusalem to worship." The emphasis is upon his coming up to worship. He denied positively the charges of stirring up strife and of profaning the Temple. But he admitted that "after the way which they call a sect or heresy" he worshipped the God of his fathers, believing all things written in the Law and the prophets. Again he gave prominence to the hope of a resurrection, which he held, as he said, in common with his accusers. His loyalty to the faith of his fathers he had shown by coming up to Jerusalem expressly to bring alms for his nation, and offerings, and by undertaking the ceremonies of purification in the Temple. What fault, then, could any Jew possibly find in him?—The apostle's answer was straightforward and complete. He had *not* violated the Law of his fathers; he was still a true and loyal Israelite. Felix made an excuse for putting off the matter, and gave orders that the prisoner should be treated with indulgence, and that his friends should be allowed free access to him. After a while, he heard him again with his wife DRUSILLA; but St. Paul began to reason concerning righteousness, temperance, and the coming judgment, in a manner which alarmed Felix and caused him to put an end to the conference. He saw him frequently afterward, however, and allowed him to understand that a bribe would procure his release. But St. Paul would not resort to this method of escape, and remained in custody until FELIX left the province. The unprincipled governor had good reason to seek to ingratiate himself with the Jews; and to please them, he handed over Paul, as an untried prisoner, to his successor FESTUS. Upon his arrival in the province, Festus went up without delay from Cesarea to Jerusalem, and the leading Jews seized the opportunity of asking that Paul might be brought up there for trial, intending to assassinate him by the way. But Festus would not comply with their request. He invited them to follow him on his speedy return to Cesarea, and a trial took place there, closely resembling that before Felix. Festus saw that Paul had committed no offence against the Law, but was anxious, if he could, to please the Jews. "They had certain questions against him," Festus says to Agrippa, "of their own superstition (or religion), and of one Jesus, who was dead, whom Paul affirmed to be alive. And being puzzled for my part as to such inquiries, I asked him whether he would go to Jerusalem to be tried there." This proposal, not a very likely one to be accepted, was the occasion of St. Paul's APPEAL to CÆSAR. The appeal having been allowed, Festus reflected that he must send with the prisoner a report of "the crimes laid against him." He therefore took advantage of an opportunity which offered itself in a few days to seek some help in the matter. The Jewish prince AGRIPPA (HEROD AGRIPPA II.) arrived with his sister BERENICE on a visit to the new governor. To him Festus communicated his perplexity, together with an account of what had occurred before him in the case. Agrippa, who must have known something of the sect of the Nazarenes, and had probably heard of Paul himself, expressed a desire to hear him

speak. Paul therefore was to give an account of himself to Agrippa; and when he had received from him a courteous permission to begin, he stretched forth his hand and made his defence. In this discourse (Acts xxvi.), we have the second explanation from St. Paul himself of the manner in which he had been led, through his Conversion, to serve the Lord Jesus instead of persecuting His disciples; and the third narrative of the Conversion itself. (See p. 811.) He declares his commission from Jesus and his obedience to the heavenly vision, and reiterates that the testimony on account of which the Jews sought to kill him was in exact accordance with Moses and the prophets, who had taught that Christ should suffer, be the first to rise from the dead, and show light unto the people and the Gentiles. Interrupted discourteously, yet with a compliment, by Festus, he affirms that he speaks the sober truth. Then, with an appeal of mingled dignity and solicitude, he turns to the king. He was sure the king understood him. "King Agrippa, believest thou the prophets?—I know that thou believest." Agrippa's answer, literally rendered, appears to be, "Thou art briefly persuading me to become a Christian;" and it is generally supposed to be ironical. "I would to God," is Paul's earnest answer, "that whether by a brief process or a long one, not only thou but all who hear me to-day might become such as I am, with the exception of these bonds." He was wearing a chain on the hand he held up in addressing them. With this prayer, it appears the conference ended. Festus and the king, and their companions, consulted together, and came to the conclusion that the accused was guilty of nothing that deserved death or imprisonment. And Agrippa's final answer to the question of Festus was, "This man might have been set at liberty, if he had not appealed unto Cesar."—*The Voyage to Rome*. No formal trial of St. Paul had yet taken place. After a while arrangements were made to carry "Paul and certain other prisoners," in the custody of a centurion named JULIUS, into Italy; and amongst the company, whether by favor or from any other reason, we find the historian of the Acts. The narrative of this voyage is accordingly minute and circumstantial in a degree which has excited much attention. The nautical and geographical details of St. Luke's account have been submitted to an apparently thorough investigation by several competent critics, especially by Mr. Smith of Jordanhill (*Voyage and Shipwreck of St. Paul*), and by Dr. Howson (*Conybeare & Howson, Life and Epistles of St. Paul*, ch. xxiii.). The result of this investigation has been, that several errors in the received version have been corrected, the course of the voyage has been laid down to a very minute degree with great certainty, and the account in the Acts is shown to be written by an accurate eye-witness, not himself a professional seaman, but well acquainted with nautical matters. The centurion and his prisoners, among whom Aristarchus (Col. iv. 10) is named, embarked at Cesarea on board a ship of Adramyttium, and set sail for the coast of Asia. The next day they touched at Sidon, where Julius allowed Paul to go on shore to visit his friends. The westerly winds compelled the vessel to run N. under the lee of Cyprus. Off the coast of Cilicia and Pamphylia they would find northerly winds, which enabled them to reach Myra in Lycia. Here they were put on board a ship of Alexandria bound for Italy. In this they worked slowly to windward, keeping near the coast, till they came over against Cnidus. The wind being still con-

trary, they ran southward under the lee of Crete, then worked along the coast to FAIR HAVENS. The autumnal equinox (Fasts; ATONEMENT, DAY OF) being now past, St. Paul advised to winter there; but it was resolved to make for PHENICE 2, a harbor sheltered from the S. W. winds as well as from the N. W. (*looking toward the S. W. and N. W.*, i. e. as observed from the water and toward the land which encloses [Howson]; *looking down the S. W. and N. W.* [Smith, Alford]; "which lieth toward the S. W. and N. W." [A. V.]). With a light breeze from the S. they were sailing toward Phenice, when a violent N. E. wind (EUROCLYDON) compelled them to let the vessel drive before the wind. Passing under the lee of Clauda, they got the boat on board and undergirded the vessel. (SHIP.) Fearing lest they should be driven upon the Syrtis (A. V. "QUICKSANDS"), they sent down on deck the gear connected with the fair-weather sails, and stood out to sea, "with storm-sails set and on the starboard tack" (Smith). For many days the storm was violent, and all began to despair of safety. But one morning Paul related a vision, assuring them there should be no loss of life, but of the ship. On the fourteenth night, as they were drifting through the sea (ADRIA), about midnight, the sailors perceived indications, probably the roar of breakers, that the land was near. Their suspicions were confirmed by soundings. They therefore anchored, and waited anxiously for daylight. Through St. Paul's means, the intention of the sailors to desert the ship was frustrated, and the company refreshed themselves with a good meal. Then they lightened the ship by casting out what remained of the provisions on board (Gr. *ton silon*; A. V. and most, "wheat"). After daylight they ran the ship aground where "two seas met." The centurion, disallowing the soldiers' counsel to kill the prisoners, ordered that those who could swim should cast themselves first into the sea and get to land, and that the rest should follow with the aid of spars, &c. By this combination of humanity and discipline, the whole 276 were saved according to St. Paul's assurances. The land on which the wreck took place was found to belong to MALTA. (MELITA.) The inhabitants of the island received the wet and exhausted voyagers with no ordinary kindness, and immediately lighted a fire to warm them. The apostle was helping to make the fire, and had gathered a bundle of sticks and laid them on the fire, when a viper came out of the heat and fastened on his hand. When the natives saw the creature hanging from his hand they believed him to be poisoned by the bite, and said amongst themselves, "No doubt this man is a murderer, whom, though he has escaped from the sea, yet Vengeance suffers not to live." But when they saw no harm came of it they changed their minds and said that he was a god. This circumstance, as well as the honor in which he was held by Julius, would account for St. Paul being invited with some others to stay at the house of PUBLIUS, the chief man of the island. By him they were courteously entertained for three days. St. Paul healed the father of Publius and many other sick persons, and was highly honored by the people. After a three months' stay in Malta the soldiers and their prisoners left in an Alexandrian ship for Italy. They touched at Syracuse, where they stayed three days, and at Rhegium, from which place they were carried with a fair wind to PUTEOLI, where they left their ship and the sea. At Puteoli they found "brethren," for it was an important place, and especially a chief port for the traffic between Alexan-

dria and Rome; and by these brethren they were exhorted to stay a while with them. Permission seems to have been granted by the centurion; and whilst they were spending seven days at Puteoli news of the apostle's arrival was sent on to Rome. At APPII FORUM and the THREE TAVERNS he was met by Christians from Rome, and on this "he thanked God and took courage."—*St. Paul at Rome*. On their arrival at Rome the centurion delivered up his prisoners into the proper custody, that of the pretorian prefect. Paul was at once treated with special consideration, and was allowed to dwell by himself with the soldier who guarded him. He was now free "to preach the Gospel to them that were at Rome also;" and proceeded without delay to act upon his rule—"to the Jew first." He invited the chief persons amongst the Jews to come to him, and explained to them that though he was brought to Rome to answer charges against him by the Jews in Palestine, he had really done nothing disloyal to his nation or the Law, nor desired to be considered as hostile to his countrymen. The Roman Jews replied that they had received no tidings to his prejudice. The sect of which he had implied he was a member they knew to be everywhere spoken against; but they were willing to hear what he had to say. Their attitude may be accounted for, as the Church at Rome consisted mainly of Gentiles, the real Jews there had been persecuted and sometimes entirely banished, and curiosity may have led them to listen to St. Paul. (ROMANS, EPISTLE TO THE.) On an appointed day therefore a large number came expressly to hear him expound his belief. But, as of old, the reception of his message by the Jews was not favorable. He turned therefore again to the Gentiles, and he "dwelt two whole years in his own hired house, and received all that came in unto him, preaching the kingdom of God, and teaching those things which concern the Lord Jesus Christ, with all confidence, no man forbidding him." These are the last words of the Acts. But St. Paul's career is not abruptly closed. Before he himself fades out of our sight in the twilight of ecclesiastical tradition, we have letters written by himself, which contribute some particulars to his external biography, and give us a far more precious insight into his convictions and sympathies.—*Period of the Later Epistles*. To that imprisonment to which St. Luke has introduced us—the imprisonment which lasted for such a tedious time, though tempered by much indulgence—belongs the noble group of Letters to Philemon, to the Colossians, to the Ephesians, and to the Philippians. The three former of these were written at one time and sent by the same messenger. (COLOSSIANS, EPISTLE TO THE; EPHESIANS, EPISTLE TO THE; PHILEMON, EPISTLE TO.) Whether that to the Philippians was written before or after these, we cannot determine; but the tone of it seems to imply that a crisis was approaching, and therefore it is commonly regarded as the latest of the four. (PHILIPPIANS, EPISTLE TO THE.) In this Epistle St. Paul twice expresses a confident hope that before long he may be able to visit the Philippians in person (Phil. i. 25, ii. 24). Whether this hope was fulfilled or not belongs to a question which has been the occasion of much controversy. According to the general opinion, the apostle was liberated from his imprisonment and left Rome, soon after the writing of the letter to the Philippians, spent some time in visits to Greece, Asia Minor, and Spain, and returned again as a prisoner to Rome, and was put to death there. In

opposition to this view, it is maintained by some that he was never liberated, but was put to death at Rome at an earlier period than is commonly supposed. The arguments adduced in favor of the common view are, (1.) the hopes expressed by St. Paul of visiting Philippi (Phil. i. 25, ii. 24) and Colosse (Phn. 22); (2.) a number of allusions in the Pastoral Epistles, and their general character; and (3.) the testimony of ecclesiastical tradition. The arguments for the single imprisonment aim to show that there is no proof of a liberation or departure from Rome, and in relation to his hopes allege Acts xx. 25. The decision must turn mainly upon the view taken of the Pastoral Epistles. (TIMOTHY, EPISTLES TO; TITUS, EPISTLE TO.) The difficulties which have induced such critics as De Wette and Ewald to reject these Epistles, are not inconsiderable, but are overpowered by the much greater difficulties attending any hypothesis which assumes these Epistles to be spurious. We are obliged therefore to recognize the modifications of St. Paul's style, the developments in the history of the Church, and the movements of various persons, which have appeared suspicious in the Epistles to Timothy and Titus, as nevertheless historically true. And then without encroaching on the domain of conjecture, we draw the following conclusions:—(1.) St. Paul must have left Rome, and visited Asia Minor and Greece; for he says to Timothy (1 Tim. i. 3), "I besought thee to abide still at Ephesus, when I was setting out for Macedonia." After being once at Ephesus, he was purposing to go there again (iv. 13), and he spent a considerable time at Ephesus (2 Tim. i. 18). (2.) He paid a visit to Crete, and left Titus to organize churches there (Tit. i. 5). He was intending to spend the winter at one of the places named Nicopolis (iii. 12). (3.) He travelled by Miletus, Troas, where he left a cloak or case, and some books, and Corinth (2 Tim. iv. 13, 20). (4.) He is a prisoner at Rome "suffering unto bonds as an evil-doer" (ii. 9), and expecting to be soon condemned to death (iv. 6). At this time he felt deserted and solitary, having only Luke of his old associates, to keep him company; and he was very anxious that Timothy should come to him without delay from Ephesus, and bring Mark with him (i. 15, iv. 16, 9-12). Clement of Rome mentions that St. Paul preached in both the East and the West, and that before his martyrdom he went "to the goal of the West," i. e. probably Spain (Rom. xv. 28), or some country yet more to the West. Muratori's Fragment on the Canon names his "departing from the city into Spain." Chrysostom says, "After being in Rome, he went away again unto Spain." We conclude, then, that after a wearing imprisonment of two years or more at Rome, St. Paul was set free, and spent some years in various journeyings eastward and westward. Toward the close of this time he pours out the warnings of his less vigorous but still brave and faithful spirit in the Letters to Timothy and Titus. The first to Timothy and that to Titus were evidently written at very nearly the same time. After these were written, he was apprehended again and sent to Rome. The apostle appears now to have been treated, not as an honorable state prisoner, but as a felon (2 Tim. ii. 9). But he was at least allowed to write this Second Letter to his "dearly beloved son" Timothy; and though he expresses a confident expectation of his speedy death, he yet

\* Some (Savile's *Introduction of Christianity into Britain*, and Morgan's *St. Paul in Britain*) maintain that the Apostle Paul visited Britain; but while such a visit is not impossible, the evidence is by no means conclusive (Ayre.)

thought it sufficiently probable that it might be delayed for some time, to warrant him in urging Timothy to come to him from Ephesus. Meanwhile, though he felt his isolation, he was not in the least daunted by his danger. He was more than ready to die (iv. 6), and had a sustaining experience of not being deserted by his Lord. Once already, in this second imprisonment, he had appeared before the authorities; and "the Lord then stood by him and strengthened him," and gave him a favorable opportunity for the one thing always nearest to his heart, the public declaration of his Gospel. This Epistle, surely no unworthy utterance at such an age and in such an hour even of a St. Paul, brings us, it may well be presumed, close to the end of his life. (HEBREWS, EPISTLE TO THE; JAMES, EPISTLE OF, IV. a.) For what remains, we have the concurrent testimony of ecclesiastical antiquity, that he was beheaded at Rome, about the same time that St. Peter was crucified there. Dionysius, bishop of Corinth (A. D. 170), says that Peter and Paul went to Italy and taught there together, and suffered martyrdom about the same time. Caius of Rome, supposed to be writing within the second century, names St. Peter's grave on the Vatican, and St. Paul's on the Ostian way. Eusebius adopts the tradition that St. Paul was beheaded under Nero at Rome.—*Chronology of St. Paul's Life.* It is usual to distinguish between the internal or absolute, and the external or relative, chronology of St. Paul's life. The former is that which we have hitherto followed. It remains to mention the points at which the N. T. history of the apostle comes into contact with the outer history of the world. There are two principal events which serve as fixed dates for determining the Pauline chronology—the death of Herod Agrippa, and the accession of Festus. Now, it has been proved almost to a certainty that Felix was recalled from Judea and succeeded by Festus in the year 60. In the autumn, then, of A. D. 60 St. Paul left Cesarea. In the spring of 61 he arrived at Rome. There he lived two years, i. e. till the spring of 63, in his own hired house. After this we depend upon conjecture; but the Pastoral Epistles give us reasons for deferring the apostle's death until 67, with Eusebius, or 68, with Jerome. Similarly we can go *backward* from A. D. 60. St. Paul was two years at Cesarea (Acts xxiv. 27); therefore he arrived at Jerusalem on his last visit by the Pentecost of 58. Before this he had wintered at Corinth (xx. 2, 3), having gone from Ephesus to Greece. He left Ephesus, then, in the latter part of 57, and as he stayed three years at Ephesus (xx. 31), he must have come thither in 54. Previously to this journey he had spent "some time" at Antioch (xviii. 23). We can only add together the time of a hasty visit to Jerusalem, the travels of the second missionary journey, which included a year and a half at Corinth, another indeterminate stay at Antioch, the third visit to Jerusalem, another long residence at Antioch (xiv. 28), the first missionary journey, again an intermediate stay at Antioch (xii. 25)—until we come to the second visit to Jerusalem, which nearly synchronized with the death of Herod Agrippa, in A. D. 44. Within this interval of some ten years the most important date to fix is that of the third visit to Jerusalem; and there is a great concurrence of the best authorities in placing this visit in either 50 or 51. St. Paul himself (Gal. ii. 1) places this visit "fourteen years after" either his conversion or the first visit. In the former case we have 37 or 38 for the date of the conversion. The conversion was

followed by three years (i. 18) spent in Arabia and Damascus, and ending with the first visit to Jerusalem; and the space between the first visit (40 or 41) and the second (44 or 45) is filled up by an indeterminate time, presumably two or three years, at Tarsus (Acts ix. 30), and one year at Antioch (xi. 26). The date of the martyrdom of Stephen can only be conjectured, and is variously placed between A. D. 30 and the year of St. Paul's conversion. In the account of the death of Stephen, St. Paul is called "a young man" (vii. 58). It is not improbable, therefore, that he was born between A. D. 0 and A. D. 5, so that he might be past sixty years of age when he calls himself "Paul the aged" in Phn. 9.—*Personal Appearance and Character.* We have no very trustworthy sources of information as to the personal appearance of St. Paul. Some early pictures and mosaics ascribe to him a short stature, a long face with high forehead, an aquiline nose, close and prominent eyebrows. Other characteristics mentioned are baldness, gray eyes, a clear complexion, and a winning expression. In his speeches and letters we perceive the warmth and ardor of his nature, his deeply affectionate disposition, the tenderness of his sense of honor, the courtesy and personal dignity of his bearing, his perfect fearlessness, his heroic endurance; we perceive the rare combination of subtlety, tenacity, and versatility in his intellect; we perceive also a practical wisdom and a tolerance seldom united with such a temperament. The principle which harmonized all these endowments and directed them to a practical end, was a knowledge of Jesus Christ in the Divine Spirit. Personal allegiance to Christ as to a living Master, with a growing insight into the relation of Christ to each man and to the world, carried the apostle forward on a straight course. The conviction that he had been intrusted with a Gospel concerning a Lord and Deliverer of men was what sustained and purified his love for his own people, whilst it created in him such a love for mankind that he only knew himself as the servant of others for Christ's sake.

\* **Paulus, Ser'gi-us.** SERGIUS PAULUS.

**Pavement.** GABRATH.

**Pa-vil'lon** (= TEXT), the A. V. translation of three Hebrew words. 1. *Sôc*, properly an *enclosed place*, also rendered "tabernacle," "covert," and "den," once only "pavilion" (Ps. xxvii. 5). 2. *Succûh*, from the same root (1 K. xx. 12, 16, &c.), usually "tabernacle" and "booth." (COTTAGE 3; SUC-COTH; TABERNACLES, FEAST OF.) 3. *Shaphrîr*, and *Shaphrîr*, used only in Jer. xlii. 10, to signify *glory* or *splendor*, hence, probably, the splendid covering of the royal throne (A. V. "royal pavilion;" *an arched roof, canopy*, Fû.).

\* **Pe** (Heb. *pé*, prob. = *mouth*, Ges.), the seventeenth letter of the Hebrew alphabet (Ps. cxix.). **WRITING.**

\* **Peace**, the usual translation of—1. Heb. *shâlôm* = (so Gesenius) *wholeness, soundness*, i. e. (a.) *health, weal, welfare, prosperity, good* of every kind (Gen. xxix. 6, margin; Judg. vi. 23; 1 K. ii. 33; Ps. xxxvii. 11, 37; Is. lii. 7, &c.); (b.) *peace*, as opposed to war (Lev. xxvi. 6; Judg. iv. 17, &c.); (c.) *concord, friendship* (Ps. xxviii. 3, xli. 9, margin [Heb. 10]; Ob. 7, &c.).—2. Chal. *shêlâm* = No. 1 (Ezr. iv. 17; Dan. vi. 25 [Heb. 26], &c.).—3. Gr. *eirênê* = A. V. Robinson, *N. T. Lex.* *peace*, (a.) properly in a civil sense, the opposite of war and commotion (Lk. xiv. 32, &c.), applied also to *peace* or *concord* among individuals (xii. 51, &c.), and tropically to *peace* of

mind, *quietness, tranquillity*, arising from reconciliation with God and a sense of the divine favor (Rom. v. 1, xv. 13, &c.); (b.) a state of *peace, rest, quiet, safety* (Lk. xi. 21; 1 Th. v. 3, &c.); (c.) *peace, welfare, prosperity, happiness*, every kind of *good*, = No. 1 (Lk. i. 79, x. 5, 6; Rom. xv. 33, &c.). "Peace be unto you" was a common Eastern form of salutation (Jn. xx. 19, 21, 26, &c.); hence "your peace" (Mat. x. 13) = the *peace* or *good* you wish for others in your salutation of them. **SALUTATION.**

\* **Peace-offer-ing** (Heb. *shelem*, pl. *sheldmim*), a **SACRIFICE** offered as a testimonial of seeking peace and favor with God (Lev. iii., vii. 11 ff., &c.). Peace-offerings were of three kinds: (1.) of thanksgiving or praise; (2.) votive, or for a vow; (3.) voluntary or free-will offerings. Peace-offerings were eucharistic and bloody, and were voluntarily offered from the herd or flock, male or female. With them were offered "unleavened cakes mingled with oil, and unleavened wafers anointed with oil, and cakes mingled with oil, of fine flour, fried," and "leavened bread" (vii. 12, 13). From the peace-offering the fat was burned upon the altar; but the breast as a **WAVE-OFFERING** before the Lord, and the right shoulder as a **heave-offering**, were given to the priest (30 ff.); but the rest of the flesh was to be eaten by the offerer—on the same day, if of the first kind above—on that day and the next, if of the second or third kind—before the Lord (15 ff.). This meal was the distinctive feature of this sacrifice, and indicated a state of peace and friendship with God.

**Peacocks.** 1. Among the natural products of the land of **TARSHISH** which Solomon's fleet brought home to Jerusalem, mention is made of "peacocks:" for there can be no doubt (so thinks Mr. Houghton, with Gesenius, Fürst, &c.) that the A. V. is correct in thus rendering the Heb. pl. *tuciyim*, which occurs only in 1 K. x. 22, and 2 Chr. ix. 21; most of the old versions, with several of the Jewish Rabbis, favoring this translation. Some writers, however (Huet, &c.), have proposed the rendering "parrots." Keil concludes that the *Aves Numidice* (Guinea Fowls; *Numida Meleagris* of naturalists) are meant. Gesenius cites many authorities to prove that the Hebrew word is to be traced to the Tamul or Malabaric *togei* = *peacock*, which opinion has been recently confirmed by Sir E. Tennent. The peacock (*Pavo cristatus*) is a well-known gallinaceous bird, remarkable for the splendid colors of its long tail-coverts or rump-feathers (not properly its tail, which is shorter than a turkey's). It is a native of the East Indies.—2. Heb. pl. *rendnim*. **OSTRICH** 3.

**Pearl** (Heb. *gdhish*). The Hebrew word occurs, in this form, only in Job xxviii. 18, where the price of wisdom is contrasted with that of "CORAL" and "pearls" (so A. V.); and the same word, with the syllable *d* prefixed, is found in Ez. xiii. 11, 13, xxxviii. 22, with the Heb. pl. *abney* = *stones*, i. e. *stones of ice*, A. V. "hailstones." Gesenius, Fürst, Rosenmüller, and commentators generally, understand by the Heb. *gdhish*, not "pearls," but **CRYSTAL**, on account of its resemblance to ice. But "pearls" (*Gr. margarites*, pl. *margaritai*) are frequently mentioned in the N. T. (Mat. xiii. 45, 46; 1 Tim. ii. 9; Rev. xvii. 4, xviii. 12, 16, xxi. 21). Pearls are formed inside the shells of various species of *Mollusca* by the deposit of the nacreous substance around some foreign body as a nucleus. They consist of carbonate of lime and animal matter, are hard and smooth, and have a peculiar bluish or silvery-white lustre. Pearls held the highest rank

among precious stones in the ancient world, and for an obvious reason: their beauty is entirely due to nature, and is susceptible of no improvement from art (King). The "pearl of great price" is doubtless a fine specimen yielded by the pearl oyster (*Avicula margaritifera*), still found in abundance in the Persian Gulf, which has long been celebrated for its pearl fisheries. In Mat. vii. 6 "pearls" meta-

Pearl-Oyster (*Avicula margaritifera*).—(Fbn.)

phorically = any thing of value. **CROWN; ORNAMENTS, PERSONAL; RUBIES; STONES, PRECIOUS.**

**Ped'a-hel** (Heb. whom *God delivers*, Ges.), son of Ammihud, and prince of Naphtali; one of the twelve appointed to divide the land of Canaan (Num. xxxiv. 28).

**Pe-dah'zur** (fr. Heb. = whom *the rock* [i. e. God] *delivers*, Ges.), father of Gamaliel, the chief of Manasseh at the Exodus (Num. i. 10, ii. 20, vii. 54, 59, x. 23).

**Pe-dal'ah** [-da'yah] (Heb. whom *Jehovah delivers*, Ges.). 1. Father of Zebudah, Jehoiakim's mother (2 K. xxiii. 36).—2. Brother of **SALATHIEL**, or **Shealtiel**, and father of **ZERUBBABEL**, who is usually called the "son of Shealtiel," being, as Lord A. C. Hervey conjectures, in reality his uncle's successor and heir, in consequence of the failure of issue in the direct line (1 Chr. iii. 17–19).—3. Son or descendant of Parosh, assisted Nehemiah in repairing the walls of Jerusalem (Neh. iii. 25).—4. Apparently a priest or Levite; one of those who stood on the left hand of Ezra when he read the Law to the people (viii. 4).—5. A Benjamite, ancestor of Sallu (xi. 7).—6. A Levite, one of the "treasurers" in Nehemiah's time (xiii. 13); = No. 4?—7. Father of Joel, prince of Manasseh in David's reign (1 Chr. xxvii. 20).

\* **Ped'i-gree** = **GENEALOGY** (Num. i. 18, &c.).

\* **Peel, to** (Heb. *marat*). In Is. xviii. 2, 7, the A. V. has "a nation scattered and peeled," margin "outspread and polished." Gesenius (edited by Robinson, 1854) translates a *people drawn out and smooth*, i. e. tall and naked, sc. the Ethiopians. Prof. J. A. Alexander (on *Isaiah*) translates a *nation drawn and shorn*, and says the last word "is applied by some to the Egyptian and Ethiopian practice of shaving the head and beard, while others understand it as a figure for robbery and spoliation." The latter is the meaning here of the A. V. "peeled," i. e. stripped, plundered.—In Ez. xxix. 18 the A. V. has "every shoulder was peeled," i. e. had the skin worn off or rubbed off by carrying heavy burdens of earth for the banks or mounds raised during the long siege of Tyre (Fürst, Prof. Plumptre, &c.). Gesenius translates this, *every shoulder is made smooth or made bald*. **PILLED.**

**Pe'kah** (Heb. *open-eyed*, or = **PEKAHIAH**, Ges.), son

of Remaliah; originally a captain of PEKARIAH, king of Israel, murdered his master, seized the throne, and became the eighteenth sovereign of the northern kingdom. His native country was probably Gilead, as fifty Gileadites joined him in the conspiracy against Pekahiah (so Bishop Cotton). Under his predecessors Israel had been much weakened through the payment of enormous tribute to the Assyrians (see especially 2 K. xv. 20), and by internal wars and conspiracies. Pekah seems steadily to have applied himself to the restoration of its power. For this purpose he sought a foreign alliance, and fixed his mind on the plunder of the sister-kingdom of Judah. He must have made the treaty by which he proposed to share its spoil with Rezin, king of Damascus, when Jotham was still on the throne of Jerusalem (xv. 37); but its execution was long delayed, probably in consequence of that prince's righteous and vigorous administration (2 Chr. xxvii.). When, however, AHAS succeeded to the crown of David, the allies no longer hesitated, and formed the siege of Jerusalem. The history of the war is found in 2 K. xvi. and 2 Chr. xxviii. It is famous as the occasion of the great prophecies in Is. vii.-ix. (ISAIAH.) Its chief result was the capture of the Jewish port of ELATH on the Red Sea; but the unnatural alliance with Damascus and Samaria was punished through the final overthrow of the ferocious confederates by TIGLATH-PILESER. The kingdom of Damascus was finally suppressed, and Rezin put to death, while Pekah was deprived of at least half his kingdom, including all the northern portion, with that E. of Jordan. Pekah himself, now an Assyrian vassal, was of course compelled to abstain from further attacks on Judah. HOSHEAH the son of Elah conspired against him, and put him to death. Pekah reigned twenty years, but his government was no improvement, morally and religiously, on that of his predecessors. ISRAEL, KINGDOM OF.

**Pek-ah-h'ah** (fr. Heb. = *Jehovah has opened his eyes*, Ges.), son and successor of MENAHEM, was the seventeenth king of the separate kingdom of Israel. After a reign of scarcely two years a conspiracy was organized against him by PEKAH, who, at the head of fifty Gileadites, attacked him in his palace, murdered him and his friends ARGOB and ARIEH, and seized the throne (so Bishop Cotton). ISRAEL, KINGDOM OF.

**Pek'od** (Heb., see below), an appellative applied to the Chaldeans twice, viz. in Jer. i. 21, and Ez. xxiii. 23. Authorities are undecided as to the meaning of the term. It is apparently connected with the root *pakad* = *to visit*, and in its secondary senses *to punish*, and *to appoint a ruler*: hence Pekod may be applied to Babylon in Jer. i. as significant of its impending punishment, as in the margin of the A.V. "visitation." But this sense will not suit the other passage, and hence Gesenius here assigns to it the meaning of *prefect*, officer. The LXX. treats it as the name of a district in Ezekiel, and as a verb (= *to avenge* or *punish*) in Jeremiah.

**Pel-ai'ah** [-la'yah], or **Pel-a-i'ah** (Heb. whom *Jehovah makes distinguished*, Ges.) 1. Son of Elioenai, of the royal line of Judah (1 Chr. iii. 24).—2. One of the Levites who assisted Ezra in expounding the Law (Neh. viii. 7). He afterward sealed the covenant with Nehemiah (x. 10).

**Pel-a-il'ah** (fr. Heb. = whom *Jehovah judges*, Ges.), a priest, son of Amzi, and ancestor of Adaiah (Neh. xi. 12).

**Pel-a-ti'ah** (fr. Heb. = whom *Jehovah delivers*,

Ges.). 1. Son of Hananiah the son of Zerubbabel (1 Chr. iii. 21).—2. One of the captains of the Simeonites, who, in Hezekiah's reign, made an expedition to Mount Seir, and smote the Amalekites (iv. 42).—3. A chief or family who sealed the covenant with Nehemiah (Neh. x. 22).—4. Son of Benaiiah; one of the princes of the people against whom Ezekiel was directed to utter the words of doom recorded in Ez. xi. 5-12. His sudden death appears in verse 13.

**Pe'leg** (Heb. *division*, part, Ges.; see below), son of EBER, and brother of JOKTAN (Gen. x. 25, xi. 16). The only incident connected with his history is the statement that "in his days was the earth divided"—an event which was embodied in his name. (CHRONOLOGY II.) This refers to a division of the family of Eber himself, the younger branch of whom (the Joktanids) migrated into Southern Arabia, while the elder remained in Mesopotamia. TONGUES, CONFUSION OF.

**Pe'let** (Heb. *deliverance*, Ges.). 1. Son of Jaddai in the genealogy of Judah (1 Chr. ii. 47).—2. A Benjamite, son of AZMAVETH 3 (xii. 3).

**Pe'leth** (Heb. *swiftness*, Ges.). 1. Father of On the Reubenite, who joined Dathan and Abiram in their rebellion (Num. xvi. 1).—2. Son of Jonathan and descendant of Jerahmeel (1 Chr. ii. 33).

**Pe'le-thites** (Heb. *pelethi* = a public runner, courier; with the article collectively *happēlēthi* = the public runners, couriers, Ges.; according to Ewald, Fū., &c. = PHILISTINES; see below), mentioned only in the phrase rendered in the A. V. "the CHERETHITES and the Pelethites." These two collectives designate a force that was evidently David's body-guard. Their names have been supposed either to indicate their duties or to be Gentile nouns. Gesenius renders them "executioners and runners." On the other hand, the LXX. and Vulgate retain their names untranslated; and the Syriac and Targum of Jonathan translate them differently from the rendering above and from each other. The Egyptian monuments indicate (so Mr. R. S. Poole) that kings of the nineteenth and twentieth dynasties had in their service mercenaries of a nation called *Shayretana*, which Rameses III. conquered, under the name "*Shayretana* of the Sea." The name *Shayretana*, of which the first letter was also pronounced *Kh*, is almost letter for letter the same as the Hebrew Cherethim; and since the *Shayretana* were evidently cognate to the Philistines, their identity with the Cherithim cannot be doubted (compare 1 Sam. xxx. 14; Ez. xxv. 16; Zeph. ii. 5). The Egyptian *Shayretana* of the Sea are probably the Cretans. The Pelethites have not yet been similarly traced in Egyptian geography; but Mr. Poole supposes that both the Cherethites and Pelethites were of the Philistine stock.

**Pe'il'as** (L.) = BEDEIAH (1 Esd. ix. 34: compare Ezr. x. 35).

**Pel'i-can**, the A. V. translation of Heb. *kdath*. This is mentioned among the unclean birds (Lev. xi. 18; Deut. xiv. 17). The suppliant psalmist compares his condition to "a *kdath* in the wilderness" (Ps. cii. 6). As a mark of the desolation that was to come upon Edom, it is said that "the *kdath* and the bitter should possess it" (Is. xxxiv. 11). The same words are spoken of Nineveh (Zeph. ii. 14). In these two last places the A. V. has "CORMORANT" in the text, and "pelican" in the margin. The best authorities favor the pelican as the bird denoted by *kdath*. The Hebrew name, from a word meaning *to vomit*, doubtless refers to this bird's habit of press-

ing its under-mandible against its breast, to assist it in disgorging the contents of its capacious pouch for its young. This is probably the origin of the fable about the pelican feeding its young with its own blood, the red nails on the upper mandible com-

Pelican (*Pelecanus Onocrotalus*).—(Fbn.)

pleting the delusion. The common pelican of the Eastern continent (*Pelecanus Onocrotalus*) is a large web-footed water-fowl, able to swim and fly well, voracious and adroit in catching fish, of which its pouch will hold a considerable number. The common pelican and another (*Pelecanus crispus*) are often observed in Palestine, Egypt, &c. Mr. Houghton supposes the psalmist (Ps. cii. 6) refers to the pelican's general aspect as it sits in apparent melancholy mood, with its bill resting on its breast. The pelican, after filling its pouch with fish and mollusks, often retires inland, miles away from water, and consumes its supply.

**Pe'l'o-nite** (fr. Heb. = *one from a place called Palon*, otherwise unknown, Ges.; see below), **the**. Two of David's "valiant men," Helez and Ahijah, are called Pelonites (1 Chr. xi. 27, 36). From 1 Chr. xxvii. 10, it appears that the former was of the tribe of Ephraim, and "Pelonite" would therefore be an appellation from his place of birth or residence. In 2 Sam. xxiii. 26 Helez is called "the PALTITE," i. e. as Bortheau (on 1 Chr. xi.) conjectures, of Beth-palet, or Beth-phelet, in the south of Judah. But probably "Pelonite" is the correct reading. "Ahijah the Pelonite" appears in 2 Sam. xxiii. 34 as "Eliam the son of ANITHOPHEL the Gilonite, and Mr. Wright supposes the former a corruption of Abithophel. Compare PALMONI.

\* **Pe-la'si-um** [-she-] (L.), a city of EGYPT (Ez. xxx. 15, margin); = **SIN**.

**PEN**. WRITING.

**Pe-ni'el** (Heb. *face of God*, Ges.), the name which Jacob gave to the place in which he had wrestled with God: "He called the name of the place **Pe-niel**, for I have seen God face to face" (Gen. xxxii. 30). In xxxii. 31, and other passages, the name is changed to **PENUEL**, which perhaps was the original form.

**Pe-nin'nah** (Heb. *coral*, Ges.), one of the two wives of ELKANAH (1 Sam. i. 2). **HANNAH**.

**Pen'ny**, **Pen'ny-worth**. In the A. V. "penny," either alone or in the compound "pennyworth," occurs as the rendering of the Greek *denarion* = the Roman **DENARIUS** (Mat. xviii. 28, xx. 2, 9, 10, 13,

xxii. 19; Mk. vi. 37, xii. 15, xiv. 5; Lk. vii. 41, x. 35, xx. 2, 4; Jn. vi. 7, xii. 5; Rev. vi. 6). The **denarius** was the chief Roman silver coin, from the beginning of the coinage of the city to the early part of the third century. It was at first ten times the *as* (FARTHING 2), afterward sixteen times. In the time of **AUGUSTUS** its weight was about sixty grains, and its value in United States silver money about fifteen cents. Nero reduced its weight to about fifty-two grains (so Mr. R. S. Poole). **DRACHM**; **MONEY**, II. 2; **TIBERICUS**; **WAGES**.

**Pen'ta-teuch**<sup>1</sup> (fr. Gr. adj. *pentateuchos* = *the five-fold*, sc. book; L. *Pentateuchus*), **the**, a name given to the five books commonly called the Five Books of MOSES, viz. **GENESIS**, **EXODUS**, **LEVITICUS**, **NUMBERS**, and **DEUTERONOMY**. The present Jews usually call the whole by the Hebrew name of *Tôrâh* = "the **LAW**," or *Tôrâh Mōsheh* = "the **LAW OF MOSES**." The Rabbinical title is "the five-fifths of the **LAW**." The division of the whole work into five parts has by some writers been supposed to be original. Others, with more probability, think that the division was made by the Greek translators; for the titles of the several books are not of Hebrew but of Greek origin. The Hebrew names are merely taken from the first words of each book, and in the first instance only designated particular *sections* and not whole books. The MSS. of the Pentateuch form a single roll or volume, and are divided not into books, but into the larger and smaller sections called *Parshiyôth* and *Sedarim*. (**BIBLE**.) For the several names and contents of the Five Books we refer to the articles on each Book, where questions affecting their integrity and genuineness are also discussed.—I. *Different opinions respecting the Authorship of the Pentateuch*. The unity of the work in its existing form is now generally recognized. It is not a mere collection of loose fragments carelessly put together at different times, but bears evident traces of design and purpose in its composition. Ewald, Knobel, Lengerke, &c., have maintained that the Book of Joshua constitutes an integral portion of this work; but this is an arbitrary assumption. (**JOSHUA**, Book of.) One portion at least of the Pentateuch—Deut. xxiv., which gives the account of Moses' death—was not written by him. So early as the second century we find the author of the Clementine Homilies calling in question the authenticity of the Mosaic writings. Aben Ezra († 1167), in his *Commentary* on Dent. i. 1, threw out some doubts as to the Mosaic authorship of certain passages, e. g. Gen. xii. 6, and Deut. iii. 10, 11, xxxi. 9. For centuries, however, the Pentateuch was generally received in the Church without question as written by Moses. Spinoza (*Tract. Theol.-Polit.*, published in 1679) maintained that the elders wrote down and communicated to the people the commands of Moses, and that later they were collected and assigned to suitable passages in Moses' life. He attributed the present form of the Pentateuch to Ezra. Other writers (Vitringa, Le Clerc, Richard Simon) suggested that Genesis was composed of written documents earlier than Moses' time. In 1753 there appeared at Brussels a work in French (*Conjectures respecting the Original Memoirs of which Moses appears to have availed himself in composing the Book of Genesis*), written by Astruc, Doctor and Professor of Medicine in the Royal College at Paris, and Court Physician to Louis XIV.

<sup>1</sup> This article has been abridged and materially altered from the original article of Rev. J. J. S. Perowne.

He claimed that throughout Genesis, and as far as Ex. vi., traces were to be found of two original documents, each characterized by a distinct use of the names of God; the one by the name *Elohim*, and the other by the name *Jehovah*. Besides these two principal documents, he supposed Moses to have made use of ten others in the composition of the earlier part of his work. But this "documentary hypothesis," as it is called, was too conservative for some critics. Vater and A. T. Hartmann maintained that the Pentateuch consisted merely of a number of fragments loosely strung together without order or design. This has been called the "fragmentary hypothesis." Both of these have now been superseded in Germany by the "supplementary hypothesis," which has been adopted with various modifications by De Wette, Bleek, Stähelin, Tuch, Lengerke, Hupfeld, Knobel, Bunsen, Kurtz, Delitzsch, Schultz, Vaihinger, and others. They all alike recognize two documents in the Pentateuch. They suppose the narrative of the Elohist, the more ancient writer, to have been the foundation of the work, and that the Jehovist or later writer making use of this document, added to and commented upon it, sometimes transcribing portions of it intact, and sometimes incorporating the substance of it into his own work. (GENESIS.) But though thus agreeing in the main, they differ widely in the application of the theory. Thus, e. g., De Wette distinguishes between the Elohist and the Jehovist in the first four books, and attributes Deuteronomy to a different writer altogether. Stähelin, on the other hand, declares for the identity of the Deuteronomist and the Jehovist; and supposes the last to have written in the reign of Saul, and the Elohist in the time of the Judges. Hupfeld finds, in Genesis at least, traces of three authors, an earlier and a later Elohist, and the Jehovist, besides a final editor. Delitzsch recognizes two distinct documents as the basis of the Pentateuch, especially in its earlier portions; but he maintains that Deuteronomy is the work of Moses, to whom he also assigns the Book of the Covenant (Ex. xix.-xxiv.). The documents were written, in his view, soon after the occupation of Canaan, one perhaps by Eleazar the priest, the other perhaps by Joshua or one of the elders on whom Moses' spirit rested. Ewald distinguishes seven different authors in the great Book of Primitive History (comprising the Pentateuch and Joshua), besides the author of the Blessing of Moses in Deut. xxxiii., and three editors of the work. On the other side, however, stands an array of names scarcely less distinguished for learning, who maintain not only that there is a unity of design in the Pentateuch—which is granted by many of those before mentioned—but that this can only be explained on the supposition of a single author, who must have been Moses. This is the ground taken by Hengstenberg, Hävernick, Drechsler, Ranke, Wette, Keil, Prof. Douglas (in Fairbairn), Prof. Bartlett (in *B. S.*), &c.—II. *Testimony of the Pentateuch itself with regard to its authorship.* 1. We find on reference to Ex. xxiv. 3, 4, that "Moses came and told the people all the words of Jehovah and all the judgments," and subsequently "wrote down all the words of Jehovah." These were written on a roll called "the book of the covenant" (ver. 7), and "read in the audience of the people." These "words" and "judgments" were no doubt the Sinaitic legislation so far as it had been given, and which constituted in fact the covenant between Jehovah and the people. Upon the renewal of this

covenant after the idolatry of the Israelites, Moses was again commanded by Jehovah to "write these words" (xxxiv. 27). "And," it is added, "he wrote upon the tables the words of the covenant, the ten commandments." Leaving Deuteronomy aside for the present, there are only two other passages in which mention is made of writing any part of the Law, viz. Ex. xvii. 14, where Moses is commanded to write the defeat of Amalek in a book (or rather in the book, one already in use for the purpose); and Num. xxxiii. 2, where we are informed that Moses wrote the journeyings of the children of Israel in the desert, and the various stations at which they encamped. It obviously does not follow from these statements that Moses wrote all the rest of the first four books which bear his name. Nor on the other hand does this specific testimony with regard to certain portions justify us in coming to an opposite conclusion. So far nothing can be determined positively one way or the other (so Mr. Perowne). In Deut. xxxi. 9-12 we are told that "Moses wrote this Law," and delivered it to the custody of the priests, with a command that it should be read before all the people at the end of every seven years, on the Feast of Tabernacles. In ver. 24 it is further said, that when "he had made an end of writing the words of this Law in a book till they were finished," he delivered it to the Levites to be placed in the side of the ark of the covenant of Jehovah, that it might be preserved as a witness against the people. Such a statement is no doubt decisive, but the question is, how far does it extend? Do the words "this Law" (compare Deut. xvii. 18, xxvii. 3, 8; Josh. viii. 32) comprise all the Mosaic legislation as contained in the last four books of the Pentateuch, or must they be confined only to Deuteronomy? Mr. Perowne, Dr. S. Davidson, &c., regard the latter as the only tenable view, and claim that the direct evidence from the Pentateuch itself is not sufficient to establish the Mosaic authorship of every portion of the Five Books. Certain parts of Exodus, Leviticus, and Numbers, and the whole of Deuteronomy to the end of ch. xxx., with the Song of Moses, ch. xxxii., are all that are expressly said to have been written by Moses. Prof. S. C. Bartlett (in *B. S.* xx. 813 ff.) argues that this testimony to the agency of Moses in the production of the Pentateuch cannot fairly be restricted to the portions thus indicated; for—(a.) The Pentateuch nowhere alludes to any other authorship than that of Moses. (b.) The definite ascription of certain portions of the narrative to him involves no denial in regard to the remainder (compare Jn. xix. 35, xxi. 20-24). (c.) The reasons for making a record in these instances were equally operative throughout. (d.) There are very distinct indications that these passages were but parts of a larger whole, composed by Moses (Ex. xvii. 14, xxiv. 4, 7; Deut. xvii. 18, 19, xxviii. 58, 61, xxix. 20, 21, 27, xxx. 10, xxxi. 9-11, 24, xviii. 2, compare Num. xviii. 20; Deut. xxiv. 8, 9, compare Lev. xiii. 4, &c.; Ex. xxv. 16, 21, 22, xxxv. 1; Num. xxix. 40, xxx. 1, xxxvi. 13; Lev. xxvii. 34, &c.). "The book of the law" commonly in the O. T. (so Prof. Bartlett, &c.; in Ezra and Nehemiah, according to Mr. Perowne, &c.) = the Pentateuch. (e.) These portions of avowed Mosaic authorship include and fully indorse the main portions of the whole Pentateuch. From them can be gathered an outline of the whole narrative from the time of the dispersion of the nations, together with the leading features of the whole Law. The testimony of the

volume thus makes Moses responsible for the main contents of the Pentateuch. 2. Is there any evidence to show that Moses did *not* write portions of the work which goes by his name? We have already referred to the last chapter of Deuteronomy, which gives an account of his death. Mr. Perowne regards it as improbable that Moses wrote the words in praise of himself in Ex. xi. 3, or those in Num. xii. 3 (MEEK 1), but just what we might expect from the friend and disciple who pronounced his eulogium after his death (Deut. xxxiv. 10). "With historical faithfulness and unaffected simplicity Moses makes these remarks about his own person; they are historical facts; and he relates them with the same objective impartiality with which Xenophon speaks of himself in the *Anabasis*, or Cesar in his *Commentaries*," says Kalisch (quoted by Prof. Bartlett) in respect to Ex. xi. 3. Jahn, Rosenmüller, Kurtz, &c., prefer to consider Num. xii. 3 added by a later hand; but Calvin, Hengstenberg, &c., regard this statement as made by Divine direction, as important in its connection, and as recorded by Moses like Ex. xi. 3. Compare also like words of commendation in Neh. xiii. 6 ff., especially ver. 14; Ps. vii. 8, xxvi. 1, xxxv. 13, 14; Dan. x. 2, 3, 11, 19; Jn. xiii. 23, xix. 26, xx. 2, xxi. 7, 20-24; 2 Cor. xi. 5-xii. 11; 1 Th. ii. 10, &c. 3. Other evidence, to a critical eye not a whit less convincing (so Mr. Perowne), points in the same direction. The Book of Genesis has indeed a unity of plan, a coherence of parts, a shapeliness and an order, which satisfy us that as it stands it is the creation of a single mind. But it bears also manifest traces of having been based upon an earlier work; and that earlier work itself seems to have had imbedded in it fragments of still more ancient documents. Such a theory does not in the least militate against the divine authority of the book. The history contained in Genesis could not have been narrated by Moses from personal knowledge; but whether he was taught by immediate divine suggestion, or was directed by the Holy Spirit to the use of earlier documents, is immaterial in reference to the INSPIRATION of the work. The question may therefore be safely discussed on critical grounds alone. The language of ch. i. 1-ii. 3 is totally unlike that of the section which follows, ii. 4-iii. 23. This last is not only distinguished by a peculiar use of the Divine names—for here and nowhere else in the whole Pentateuch, except Ex. ix. 30, have we the combination of the two, *Jehovah Elohim* (A. V. "the Lord God")—but also by a mode of expression peculiar to itself. It is also remarkable for preserving an account of the CREATION distinct from that contained in the first chapter. Fully admitting that there is no contradiction, the representation is so different that Mr. Perowne and others believe it far more natural to conclude that it was derived from some other, though not antagonistic source. Take another instance. Chapter xiv. is beyond all doubt (so Mr. Perowne, with Ewald, Bunsen, &c.) an ancient monument—papyrus-roll it may have been, or inscription on stone—which has been copied and transplanted in its original form into our present Book of Genesis. Archaic it is in its whole character: distinct too, again, from the rest of the book in its use of the name of God (Heb. *El 'elyôn*, A. V. "the Most High God"). We believe, then (so Mr. Perowne), that at least these two portions of Genesis—ch. ii. 4-iii. 24, and ch. xiv.—are original documents, preserved, it may have been, like the gene-

alogies, which are also a very prominent feature of the book, in the tents of the patriarchs, and made use of either by the Elohist or the Jehovist for his history.—We come now to a more ample examination of the question as to the distinctive use of the Divine names. Mr. Perowne believes, with Astruc, &c., that this early portion of the Pentateuch, extending from Gen. i. to Ex. vi., contains two original documents characterized by their separate use of the Divine names and by other peculiarities of style. Throughout this portion of the Pentateuch the name *Jehovah* prevails in some sections, and *Elohim* in others. There are a few sections (as the advocates of the document theories admit) where both names are employed indifferently; and there are sections of some length in which neither the one nor the other occurs. The style and idiom of the *Jehovah* sections, it is claimed, are not the same as the style and idiom of the *Elohim* sections. After Ex. vi. 2-vii. 7, the name *Elohim* almost ceases to be characteristic of whole sections; the only exceptions to this rule being Ex. xiii. 17-19 and xviii. If, as Hengstenberg and those who agree with him maintain, the use of the Divine names is to be accounted for throughout by a reference to their etymology—if the author uses the one when his design is to speak of God as the Creator and the Judge, and the other when his object is to set forth God as the Redeemer—then it still cannot but appear remarkable (so Mr. Perowne) that only up to a particular point do these names stamp separate sections of the narrative, whereas afterward all such distinctive criterion fails.<sup>2</sup> Still Mr. Perowne admits that this phenomenon of the distinct use of the Divine names would scarcely of itself prove the point, that there are two documents which form the groundwork of the existing Pentateuch; but he introduces other evidence pointing the same way, and claims that we find the same story told by the two writers, and their two accounts manifestly interwoven; and that certain favorite words and phrases distinguish the one writer from the other. (1.) In proof of the first, Mr. Perowne

<sup>2</sup> "The names (so Prof. Bartlett in *B. S.* xxi. 748 ff.) have different shades of meaning, which regulated their earlier, and to some degree their later use." (See the article *JEHOVAH* in this Dictionary.) "In describing the work of creation (Gen. i. 1-ii. 3) God is named by the more general term (*Elohim*). In setting forth His relation to man (Gen. ii.) He is designated by His more special name (*Jehovah*), and this is coupled with the former (A. V. "Lord God") to identify the God of creation as the same who was afterward revealed to Israel." This compound name appears in Gen. iii. 1; but in the whole conversation with the serpent (iii. 1-5) only *Elohim* ("God") is used: "It would have been," says Kalisch, "a profanation to put the holy name of God in the tempter's mouth, or to pronounce it before his ears. The identity of *JEHOVAH* and *Elohim* having been once impressed, it was not necessary to repeat this composition, except on peculiar occasions." "It is ridiculous to assert," says Prof. Bartlett, "that there must be such peculiar exigencies in every instance as to require the one term preëminently, or that such a writer, intent on other thoughts, must always be pondering subtle shades of fitness in the selection of two terms, either of which is adequate. It is precisely as with the two principal names of the Saviour in the N. T. *Jesus* was the personal name, *CHRIST* the official. Now, in the first chapter of Matthew, we have the first three times, the second twice, both together twice, indiscriminately used. But are we to force this nice distinction through the whole N. T., or even any one writer of it? By no means. The narrators commonly use the personal name, even where the transactions were seemingly official. The epistolary (and later) writers commonly use the official name, even where the personal epithet would be in strictness more appropriate: and while frequently using the names, single and conjoined, with undoubted discrimination, they more commonly used them much alike." Compare also the mode in which "JACOB" and "ISRAEL" are used in the last chapters of Genesis to denote the same individual.

brings forward the history of Noah. He thus separates the two supposed documents, and arranges them in parallel columns:—

## JEHOVAH.

Gen. vi. 5. And Jehovah saw that the wickedness of ~~men~~ was great in the earth, and that every imagination of the thoughts of his heart was only evil continually. And it repented Jehovah. &c.

7. And Jehovah said, I will blot out man whom I have created from off the face of the ground.

vii. 1. And Jehovah said to Noah. . . . Thee have I seen righteous before me in this generation.

vii. 2. Of all cattle which is clean thou shalt take to thee by evens, male and his female, and of all cattle which is not clean, two, male and his female.

3. Also of fowl of the air by evens, male and female, to preserve seed alive on the face of all the earth.

vii. 4. For in yet seven days I will send rain upon the earth forty days and forty nights, and I will blot out all the substance which I have made from off the face of the ground.

vii. 5. And Noah did according to all that Jehovah commanded him.

## ELOHIM.

Gen. vi. 12. And Elohim ~~saw~~ the earth, and beheld it was corrupt; for all flesh had corrupted his way upon the earth.

13. And Elohim said to Noah, The end of all flesh is come before me, for the earth is filled with violence because of them, and behold I will destroy them with the earth.

vi. 9. Noah a righteous man was perfect in his generation. With Elohim did Noah walk.

vi. 19. And of every living thing of all flesh, two of all shalt thou bring into the ark to preserve alive with thee: male and female shall they be.

20. Of fowl after their kind, and of cattle after their kind, of everything that creepeth on the ground after his kind, two of all shall come unto thee that thou mayest preserve (them) alive.

vi. 17. And I, behold I do bring the flood, waters upon the earth, to destroy all flesh wherein is the breath of life. from under heaven, all that is in the earth shall perish.

vi. 22. And Noah did according to all that Elohim commanded him: so did he.

In the rest of the narrative of the Flood, Mr. Perowne traces the two documents thus—vii. 1, 6, on the Jehovah side, answer to vi. 18, vii. 11 on the Elohim side; vii. 7-9, 17, 28, to vii. 13-16, 18, 21, 22; viii. 21, 22, to ix. 8-11. (2.) Again, Mr. Perowne and many others claim that these duplicate narratives are characterized by peculiar modes of expression; and that generally, the Elohist and Jehovistic sections have their own distinct and individual coloring. But Keil argues that these alleged characteristic words and phrases are either (a.) in some respect different, or (b.) not used exclusively by either writer, or (c.) found only in one or two passages. Moreover, the alleged diversities in regard to ideas, expression, &c., are arrived at for the most part by an artificial separation, aided by the hypothesis of manifest interpolations and elaborations of the *Elohim* document by the supplementer or Jehovist. Dr. S. Davidson (*Introduction to O. T.* I. 58 ff.) cuts up Gen. xxviii. into four sections (1-9, 10-12, 13-16, 17-22), and assigns them to four different writers, viz. the Elohist, younger Elohist, redactor, younger Elohist; Vaihinger divides this chapter into five sections, assigning ver. 1-12, 16 a, 17-22, to the Elohist, and the remainder (13-15, 16 b) to the Jehovist. Davidson divides Gen. xxi. into thirteen sections, assigned to four writers; Vaihinger makes but two (or three) sections, and two writers only. In ch. xxxv. Davidson has fifteen sections and four writers; Vaihinger assigns the whole to one writer, or perhaps two; Knobel makes ten sections. In ch. xli. Davidson makes forty sections for his different writers; Knobel twenty sections; while Vaihinger assigns the whole of chs. xl.-xlv. to the Elohist. Verses and

half-verses are summarily removed by the theorists from their connection, and arbitrarily assigned to another document, e. g. v. 29, vii. 16 b, xii. 4 b, &c. (See *B. S.* xxi. 743 ff.; Cassell's *Bible Dictionary*, art. Pentateuch.) Mr. Perowne concludes, from the arguments summarily stated and answered above, that, besides some smaller independent documents, two original historical works form the basis of the present Book of Genesis and of the earlier chapters of Exodus. That the Elohist is the earlier of these he regards as established by Ex. vi. 2, 3 (JEHOVAH), as well as by the matter and style of the document itself. He supposes that both are in the main as old as the time of Moses. Whether Moses himself was the author of either of these works is a different question. But Prof. Douglas (in Fairbairn) claims that "there are gaps in the fundamental (*Elohim*) document which need to be filled up, and there are references in it to the so-called later or supplementary matter, which we therefore believe to be a composition as early as the other." In other words, neither of the supposed documents is complete without the other, and therefore the whole work cannot be a mere compilation from previously existing documents. 4. Mr. Perowne holds that certain references of time and place clearly prove that the work, in its present form, is later than the time of Moses. Thus he regards Gen. xii. 6 (comp. xiii. 7), "And the Canaanite was then in the land," as implying that the state of things was different in the time of the writer, and hence as written after the occupation of the land by the Israelites. But the passage may imply—not that the Canaanite was not in the land in the writer's time, which, understood absolutely, would make the writer live after Solomon and Ezra (1 K. ix. 20, 21; Ezr. ix. 1)—but that the tribe of Canaanites then dwelt at or near Sichem in the interior of the land, though afterward (Num. xiii. 29) by the sea and the Jordan—or that the Canaanites already dwelt there, having migrated from the south—or that they dwelt there then, though their land was to be possessed by Abraham's seed according to the promise in the next verse. And Gen. xiii. 7 may mention that "the Canaanite and the Perizzite dwelled then in the land," to account for either the insufficiency of pasture, or the danger of strife between Lot's and Abram's herdsmen in the presence of such neighbors. The principal notices of time and place which have been alleged as bespeaking for the Pentateuch a later date are the following:—(a.) References of time. Ex. vi. 26, 27, need not be regarded as a later addition, for it obviously sums up the genealogical register given just before, and refers back to ver. 13. But Mr. Perowne and others think it more naturally reconcilable with some other authorship than that of Moses (comp. II. 2, above). Again, Ex. xvi. 33-36, though it must have been introduced after the rest of the book was written, may have been added by Moses himself, supposing him to have composed the rest of the book. Moses there directs Aaron to lay up the manna before Jehovah, and then we read: "As Jehovah commanded Moses, so Aaron laid it up before the Testimony" (i. e. the Ark) "to be kept. And the children of Israel did eat manna forty years, until they came to a land inhabited; they did eat manna until they came unto the borders of the land of Canaan." Then follows the remark, "Now an omer is the tenth part of an ephah." It is clear, then (so Mr. Perowne), that this passage was written not only after the Ark was made, but after the Israelites had entered the Promised Land. The obvious intention of the writer is to tell when the

manna *ceased* (comp. Josh. v. 12), not, as Hengstenberg contends, how long it *continued*. Still these passages are not absolutely irreconcilable with the Mosaic authorship of the book. Verse 35 may be a later gloss only, as Le Clerc and Rosenmüller believed. The difficulty is greater with a passage in Genesis. The genealogical table of Esau's family (ch. xxxvi.) can scarcely be regarded as a later interpolation. It does not interrupt the order and connection of the book; on the contrary, it is a most essential part of its structure; it is one of the ten "generations" or genealogical registers which form, so to speak, the backbone of the whole. Here the remark (ver. 31), "And these are the kings that reigned in the land of Edom, before there reigned any king over the children of Israel," is understood by many to imply that when written, kings had already begun to reign over Israel. Hengstenberg, Michaelis, Delitzsch, &c., explain this by reference to the prophecy just delivered (xxxv. 11; compare xvii. 5, 6, 16, and xxvii. 29, 40), promising a line of kings to descend from Jacob. Dr. S. Davidson (*Introduction to the O. T.*, 621) admits the probability of this explanation and of the consistency of the passage with the Mosaic authorship of Genesis. Mr. Perowne and others suppose this verse may have been inserted later from the genealogical table in 1 Chr. i. 43; and if so, it may have been introduced by Ezra in his revision of the Law.—Lev. xviii. 28,—"That the land spue not you out also, when ye defile it, as it spued out the nations that were before you," is also regarded as assuming the occupation of the Land of Canaan by the Israelites. The great difficulty connected with this passage, however, is that it is not a supplementary remark of the writer's, but that the words are the words of God directing Moses what he is to say to the children of Israel (ver. 1). But this difficulty is removed thus by Prof. Douglas (in Fairbairn), Prof. Bartlett, &c.: The phrase "as it spued out" here = *as it will have spued out*, for a verb in the same mode and tense is properly translated in Is. iv. 4 "shall have washed away," and both passages are anticipatory or prophetic from the mouth of God (comp. Lev. xviii. 24). The expression "to this day," or "unto this day" (Gen. xix. 37, 38, xxii. 14, xxvi. 33, &c.), does not necessarily imply a later time than that of Moses, for it may be used of one's lifetime (xlvi. 15) or a shorter period (Deut. xxix. 4, comp. 2; Josh. vi. 25). Deut. iii. 14 may be (so Prof. Bartlett, &c.) a parenthesis added by a later hand, as Ezra; but Prof. Douglas (in Fairbairn) argues the appropriateness of "unto this day" here, because of the great difficulty of changing the name of an entire district and of the probability of permanence if in the great revolution then taking place the name remained attached for the first few months to the new conquest. (b.) In several instances older *names of places* (so Mr. Perowne) give place to those which came later into use in Canaan. In Gen. xiv. 14, and in Deut. xxxiv. 1, occurs the name of the well-known city of Dan. (DAN 2.) In Josh. xiv. 15 (comp. xv. 13, 54) and Judg. i. 10 we are told that the name of *Hebron* before the conquest of Canaan was Kirjath-arba. In Gen. xxiii. 2 this name again occurs, and the explanation is added (Mr. Perowne supposes by some one who wrote later than the occupation of Canaan) "the same is Hebron" (comp. xiii. 18). Keil, Hengstenberg, &c., regard Hebron as the original name, and Kirjath-arba as the name in the interval between Abraham and Moses, and Hebron as again current from Moses' time. Another

instance is the occurrence of *HORMAH* in Num. xiv. 45, xxi. 1-3, compared with Judg. i. 17. Mr. Perowne claims that there is abundant evidence in the Pentateuch itself to show that, though the main bulk of it is Mosaic, certain detached portions of it are of later growth; but nothing can be more natural (in his view) than to suppose such later additions were made by Ezra and Nehemiah.—III. The evidence lying outside of the Pentateuch itself, which bears upon its authorship and the probable date of its composition, is of three kinds: first, direct mention of the work as already existing in the later books of the Bible; secondly, the existence of a book substantially the same as the present Pentateuch amongst the Samaritans; and, lastly, allusions less direct, such as historical references, quotations, and the like, which presuppose its existence. 1. We have direct evidence for the authorship of the Law in Josh. i. 7, 8, viii. 31, 34, xxiii. 6 (comp. xxiv. 26), in all which places Moses is said to have written it. The Book of Judges does not speak of the Book of the Law. No direct mention of it occurs in the Books of Samuel. The first mention of the Law of Moses after the establishment of the monarchy is in David's charge to his son Solomon, on his deathbed (1 K. ii. 3). The allusion seems to be to parts of Deuteronomy, and therefore favors the Mosaic authorship of that book (comp. viii. 9, 53). In 2 K. xi. 12, "the testimony" is put into the hands of Joash at his coronation. This must have been a book containing either the whole of the Mosaic Law, or at least the Book of Deuteronomy. In the Books of Chronicles far more frequent mention is made of "the Law of Jehovah," or "the book of the Law of Moses"—a fact which may be accounted for partly by the priestly character of those books (comp. 1 Chr. xvi. 40, xxii. 12, 13; 2 Chr. xii. 1, xiv. 4, xv. 3, xvii. 9, xxv. 4, xxxi. 3, 4, 21, xxxiii. 8, xxxiv. 14, xxxv. 26). In Ezra and Nehemiah mention is several times made of the Law of Moses (Ezr. iii. 2, vi. 18, vii. 6; Neh. i. 7 ff., viii. 1 ff., ix. 3, 14, xiii. 1-3), and here there can be doubt that our present Pentateuch is meant; for we have no reason to suppose that any later revision of it took place. At this time, then, the existing Pentateuch was regarded as the work of Moses. The Books of Chronicles, though undoubtedly based upon ancient records, are probably in their present form as late as the time of Ezra. Hence it might be supposed that if the reference is to the present Pentateuch in Ezra, the present Pentateuch must also be referred to in Chronicles. But this does not follow (so Mr. Perowne). The Book of Ezra speaks of the Law as it existed in the time of the writer; the Books of Chronicles speak of it as it existed long before. Hence the author of the latter (who may have been Ezra), in making mention of the Law of Moses, refers of course to that recension of it (*substantially*, no doubt, the same book) which existed at the particular periods over which his history travels. In Dan. ix. 11, 13, the Law of Moses is mentioned; and here again a book differing in nothing from our present Pentateuch is probably meant. In the Prophets and in the Psalms, though there are many allusions to the Law, evidently as a written document, there are none as to its authorship. But the evidence from the historical books of the O. T. is unquestionably strong. (1.) in favor of an early existence of the main body of the Pentateuch, particularly of Genesis and the legal portions of the remaining books, (2.) as showing a universal belief among the Jews that the work was written by Moses. This ascription to Moses of the Pentateuch

in its present form is likewise sanctioned by the Lord Jesus Christ and the writers of the N. T. "Moses" is spoken of as the beginning of "the Scriptures" (Lk. xxiv. 27). Moses "wrote" and left "writings" concerning Christ (Jn. i. 45, v. 46, 47). "Moses and the prophets" are referred to alike as portions of the Scriptures (Lk. xvi. 29, 31, xxiv. 27; Acts xxvi. 22); in other passages, "the Law and the prophets" (Mat. vii. 12, xxii. 40; Lk. xvi. 16; Acts xxiv. 14; Rom. iii. 21, &c.), or "the law of Moses and the prophets" (Acts xxviii. 23). The threefold division of the Jewish Scriptures—"the Law of Moses—the Prophets—the Psalms"—is mentioned by our Saviour (Lk. xxiv. 44), "the law of Moses" here and elsewhere in the N. T. unquestionably denoting the present Pentateuch (comp. Acts xv. 21; 2 Cor. iii. 15). (BIBLE, III. 1.) Jesus Christ and His apostles did not err in their testimony on this subject through ignorance or in accommodation to Jewish prejudices, or "the traditions of the elders." They bore witness to the truth and to the truth only (Jn. xviii. 37). The Scriptures ascribe the Pentateuch or "the Law" to Moses (i. 17). 2. Conclusive proof of the early composition of the Pentateuch, it has been argued, exists in the fact that the Samaritans had their own copies of it, not differing very materially from those possessed by the Jews, except in a few passages which had probably been purposely tampered with and altered, e. g. Ex. xii. 40 and Deut. xxvii. 4. The Samaritans, it is said, must have derived their Book of the Law from the Ten Tribes, whose land they occupied; but the Ten Tribes would not accept religious books from the Two; hence the Pentateuch must have existed in its present form before the separation of Israel from Judah. If this point could be satisfactorily established, we should have a limit of time in one direction for the composition of the Pentateuch. It could not have been later than the times of the earliest kings. It must have been earlier than the reign of Solomon, and indeed than that of Saul. History leaves us altogether in doubt as to the time at which the Pentateuch was received by the Samaritans. Copies of it *might* have been left in the northern kingdom after Shalmaneser's invasion, though this is hardly probable; or they might have been introduced thither during the religious reforms of Hezekiah or Josiah. But the Samaritan Pentateuch agrees so remarkably with the existing Hebrew Pentateuch, and that too in those passages which are (in the view of Mr. Perowne and others) interpolations and corrections as late as the time of Ezra, that we must look for some other period to which to refer the adoption of the Books of Moses by the Samaritans. This we find after the Babylonish exile, at the institution of the rival worship on GERIZIM. Till the return from Babylon there is no evidence that the Samaritans regarded the Jews with any extraordinary dislike or hostility. But the manifest distrust and suspicion with which Nehemiah met their advances when he was rebuilding the walls of Jerusalem, provoked their wrath. From this time forward they were declared and open enemies. A full discussion of this question would be out of place here. We incline (so Mr. Perowne) to the view of Prideaux, that the Samaritan Pentateuch was in fact a transcript of Ezra's revised copy. The same view is virtually adopted by Gesenius. 3. We are now to consider evidence of a more indirect kind, which bears not so much on the Mosaic authorship as on the early existence of the work as a whole. This last circumstance, however, if satisfactorily made

out, is, indirectly at least, an argument that Moses wrote the Pentateuch.\* Hengstenberg has tried to show that all the later books, by their allusions and quotations, presuppose the existence of the Books of the Law. He traces, moreover, the influence of the Law upon the whole life, civil and religious, of the nation after their settlement in the land of Canaan. Now, beyond all doubt, there are numerous most striking references, both in the Prophets and in the Books of Kings, to passages which are found in our present Pentateuch. It is established in the most convincing manner that the legal portions of the Pentateuch already existed in writing before the separation of the two kingdoms. Even as regards the historical portions, there are often in the later books almost verbal coincidences of expression, which render it more than probable that these also existed in writing. Compare from Joel the following passages:—ii. 2 with Ex. x. 14; ii. 3 with Gen. ii. 8, 9 (compare xiii. 10); ii. 17 with Num. xiv. 13; ii. 20 with Ex. x. 19; iii. 1 (ii. 28, A. V.) with Gen. vi. 12; ii. 13 with Ex. xxxiv. 6; iv. (iii.) 18 with Num. xxv. 1. Again, from Amos:—ii. 2 with Num. xxi. 28; ii. 7 with Ex. xxiii. 6 and Lev. xx. 3; ii. 8 with Ex. xxii. 25, &c.; ii. 9 with Num. xiii. 32, &c.; iii. 7 with Gen. xviii. 17; iv. 4 with Lev. xxiv. 3 and Deut. xiv. 28, xxvi. 12; v. 12 with Num. xxxv. 31 (compare Ex. xxiii. 6 and Am. ii. 7); v. 17 with Ex. xii. 12; v. 21, &c. with Num. xxix. 35 and Lev. xxiii. 36; vi. 1 with Num. i. 17; vi. 6 with Gen. xxxvii. 25?; vi. 8 with Lev. xxvi. 19; vi. 14 with Num. xxxiv. 8; viii. 6 with Ex. xxi. 2 and Lev. xxv. 89; ix. 13 with Lev. xxvi. 3-5 (compare Ex. iii. 8). Again, from Hosea:—i. 2 with Lev. xx. 5-7; ii. 1 (i. 10) with Gen. xxii. 17, xxiii. 12; ii. 2 (i. 11) with Ex. i. 10; iii. 2 with Ex. xxi. 32; iv. 8 with Lev. vi. 17, &c., and vii. 1, &c.; iv. 10 with Lev. xxvi. 26; iv. 17 with Ex. xxxii. 9, 10; v. 6 with Ex. x. 9; v. 2 with Gen. xvii. 18; vii. 8 with Ex. xxxiv. 12-16; xii. 6 (A. V. 5) with Ex. iii. 15; xii. 10 (9) with Lev. xxiii. 43; xii. 15 (14) with Gen.

\* An argument for the antiquity and genuineness of the Pentateuch was elaborated by the late Dr. Jahn in an essay on its language and style written just before his death in 1816. After leaving out of the account most of the words which occur only once in the Hebrew Bible as well as those which, from the nature of the case, must be found either in the Pentateuch only, or in the later books only, he enumerated about 400 words and phrases peculiar to the Pentateuch or but very seldom employed elsewhere, and about 400 words and phrases in the later books which either do not occur at all, or but very rarely, in the Pentateuch. Jahn's list, as Hengstenberg remarks, requires a revision, as Hebrew learning has made great progress since his time. "Yet after all allowances are made, the greater portion of the words in his enumeration are perfectly in point. Not a few words and phrases to which he makes no allusion might swell the number" (so Prof. B. B. Edwards, *in B. S.*, II. 388 f.). Other arguments may be drawn from the progressiveness of the legislation as recorded in the Pentateuch and of Divine revelation as a whole. The Pentateuch contains statutes suited to the case of the Israelites in the Wilderness and prospective changes or modifications of these for them in Canaan (e. g. Num. v. 1-4, xv. 1-31; Deut. vii. 1-5, xii.). It provides legislation for cases as they arise (e. g. Num. ix. 6 ff., xv. 32 ff., xxvii. 1-11, xxxvi. 1-12); but there is no growth of law and of legislation after the time of Moses. On the other hand, there is progress in Divine revelation from Genesis to Malachi. The author of the Pentateuch does not teach the IMMORTALITY of the soul (LAW OF MOSES, II. c. p. 537) with the clearness of David (Ps. xvi. 11, &c.; compare Ex. iii. 6 and Mat. xxii. 32, &c.), or the particulars respecting the MESSIAH as these appear in the Psalms and the Prophets (Ps. ii., xlv., lxxii.; Is. xl., lili. &c.; compare Gen. iii. 15, xii. 1-3, &c.), which is unaccountable on the supposition that the Pentateuch was composed in their time. (See Horne's *Introduction*, edited by Ayre, II. 605 ff., and Ayre's *Treasury of Bible Knowledge*, article Pentateuch.)

ix. 5. From 1 Kings:—xx. 42 with Lev. xxvii. 29; xxi. 3 with Lev. xxv. 23 and Num. xxxvi. 8; xxi. 10 with Num. xxxv. 30 (compare Deut. xvii. 6, 7, xix. 15); xxii. 17 with Num. xxvii. 16, 17. From 2 Kings:—iii. 20 with Ex. xxix. 38, &c.; iv. 1 with Lev. xxv. 39, &c.; v. 27 with Ex. iv. 6 and Num. xii. 10; vi. 18 with Gen. xix. 11; vi. 28 with Lev. xxvi. 29; vii. 2, 19 with Gen. vii. 11; vii. 3 with Lev. xiii. 46 (compare Num. v. 3).<sup>4</sup> But now, if, as appears from the examination of all the extant Jewish literature, the Pentateuch existed as a canonical book; if, moreover, it was a book so well known that its words had become household words among the people; and if the prophets could appeal to it as a recognized and well-known document—how are we to explain the surprise and alarm in the mind of JOSIAH (2 Chr. xxxiv. 14 ff.), betraying as it does such utter ignorance of the Book of the Law, and of the severity of its threatenings—except on the supposition that, as a written document, it had well-nigh perished? This must have been the case (so Mr. Perowne), and it is not so extraordinary a fact perhaps as it appears at first sight. It is true that in the reign of JEHOSHAPHAT pains had been taken to make the nation at large acquainted with the Law; but that was 300 years before; and in such an interval great changes must have taken place. It is true that in the reign of Ahaz the prophet Isaiah directed the people to turn “to the Law and to the Testimony” (Is. viii. 20); and Hezekiah, who succeeded Ahaz, had no doubt reigned in the spirit of the prophet’s advice. But the next monarch (Manasseh) was guilty of outrageous wickedness, and filled Jerusalem with idols. How great a desolation might one wicked prince effect, especially during a lengthened reign! To this we must add, that at no time, in all probability, were there many copies of the Law existing in writing. It was probably then the custom, as it still is in the East, to trust largely to the memory for its transmission. The ritual would easily be perpetuated by the mere force of observance, though much of it, doubtless, became perverted, and some part of it perhaps obsolete, through the neglect of the priests. The command of Moses, which laid upon the king the obligation of making a copy of the Law for himself, had of course long been disregarded. Here and there perhaps only some prophet or righteous man possessed a copy of the sacred book. The bulk of the nation were without it. The oral transmission of the Law and the living witness of the prophets had superseded the written document, till at last it had become so scarce as to be almost unknown (so Mr. Perowne; but see EDUCATION). On carefully weighing all the evidence hitherto adduced, Mr. Perowne concludes that we can hardly question, without a literary skepticism, which would be most unreasonable, that the Pentateuch is to a very considerable extent as early as the time of Moses, though it may have undergone many later revisions and corrections, the last of these being certainly as late as the time of Ezra. He supposes that the first *composition* of the Pentateuch as a whole could not have taken place till after the Israelites entered Canaan, but that Joshua and the elders associated with him provided for its formal arrangement, custody, and transmission, while the

whole work did not assume its present shape till its revision was undertaken by Ezra after the Babylonian captivity. But evidence, both internal and external,—from the Pentateuch itself and from the other Scriptures, both of the O. and N. T., from its full correspondence with the known history and peculiarities of the Hebrew nation, from its universal reception as the work of Moses by Jews and Christians, Samaritans and heathens, from the most ancient times, from the utter unsatisfactoriness of any other theory of its origin, and the manifold and irreconcilable differences and inconsistencies of those who dispute its Mosaic authorship,—sustains the view that the Pentateuch as a whole was written by Moses or under his direction, and is a part of the inspired word of God. Says Prof. G. C. M. Douglas (in Fairbairn, article Pentateuch), “A person may hold the common opinion that Moses wrote the Pentateuch, and yet along with this may also hold (rightly or wrongly) that there are elements in it which are not from the hand of Moses, but which have come to be incorporated with it by accidents to which all very ancient books are liable.” (For further information, see the articles on the several books; also ABRAHAM; ADULTERY; AHOLIBAMAH; ANRAM 1; ANAH; ARGOB; ARMY; ASSYRIA; BASHEMATH; BEER-SHEBA; BETHEL 1; BIBLE; BLOOD, AVENGER OF; CANAAN 1; CANON; CENSUS; CHRONOLOGY; CITY OF REFUGE; CONGREGATION; CREATION; DAY; DIVORCE; EARTH; EGYPT; ELDER; ESAU; EXODUS, THE; FESTIVALS; FIRMAMENT; GENEALOGY; GOD; GOSHEN; HAM; HAYOTH-JAIR; HEAVEN; HEBREW; HOBAB; INSPIRATION; ISAAC; JACOB 1; JAPHETH; JEHOVAH; JETHRO; JOSEPH 1; KORAH 4; LAW OF MOSES; LEVITES; MAN; MARRIAGE; MIRACLES; NOAH; OLD TESTAMENT; PASS-OVER; PATRIARCH; PRIEST; PROPHET; SABBATH; SACRIFICE; SEA, THE SALT; SHEMA; SLAVE; SODOM; TABERNACLE; TITHES; TONGUES, CONFUSION OF; WILDERNESS OF THE WANDERING; WRITING, &c.)—IV. It is of importance to consider separately the question in regard to DEUTERONOMY. All modern critics allow that the Book of the Covenant in Exodus, perhaps a great part of Leviticus, and some part of Numbers were written by Israel’s greatest leader and prophet. But Deuteronomy, it is alleged, is in style and purpose so utterly unlike the genuine writings of Moses, that it is quite impossible to believe that he is the author. But how, then, set aside the express testimony of the book itself? How explain the fact that Moses is there said to have written all the words of this Law, to have consigned it to the custody of the priests, and to have charged the Levites sedulously to preserve it by the side of the Ark? Only by the bold assertion that the fiction was invented by a later writer, who chose to personate the great Lawgiver in order to give the more color of consistency to his work! But, besides the fact that Deuteronomy claims to have been written by Moses, other evidence establishes the great antiquity of the book. 1. It is remarkable for its allusions to Egypt, which are just what would be expected supposing Moses to have been the author. In Deut. xx. 5 there is an allusion to Egyptian regulations in time of war; in xxv. 2 to the Egyptian bastinado; in xi. 10 to the Egyptian mode of irrigation. Again, among the curses threatened are the sicknesses of Egypt, xxviii. 60 (compare vii. 15). According to xxviii. 68, Egypt is the type of all the oppressors of Israel. The remembrance of Egyptian bondage is used as a motive in enforcing the obligations of the Book (v. 15, xxiv.

<sup>4</sup> Says Prof. B. B. Edwards (*In B. S. II. 398*), “In four of the earlier prophets, Isaiah (i.—xxxix.), Micah, Hosea, and Amos, there are more than 800 traces of the existence of the Pentateuch in its present form.” (See Tuch’s *Commentary on Genesis*.)

18, 22; compare Lev. xix. 34). Lastly, references to the sojourning in Egypt are numerous (Deut. vi. 21-23; vii. 8, 18, xi. 3, xvii. 16). The phraseology of the book, and the archaisms found in it, stamp it as of the same age with the rest of the Pentateuch. 2. A fondness for the use of figures is another peculiarity of Deuteronomy (xxix. 17, 18, xxviii. 13, 44, i. 31, 44, viii. 6, xxviii. 29, 49). The results are most surprising when we compare Deuteronomy with the Book of the Covenant (Ex. xix.-xxiv.) on the one hand, and with Ps. xc. (which is said to be Mosaic) on the other. (Compare Ex. xxiv. 17 with Deut. iv. 24, ix. 3; Ex. xix. 4 with Deut. xxxii. 11; Ps. xc. 17 with Deut. ii. 7, xiv. 29, xvi. 15, &c.) In addition to all these peculiarities which are arguments for the Mosaic authorship of the Book, we have here, too, the evidence strong and clear of post-Mosaic times and writings. The attempt, by a wrong interpretation of 2 K. xxii. and 2 Chr. xxxiv. to bring down Deuteronomy as low as the time of Manasseh, fails utterly. A century earlier the Jewish prophets borrow their words and their thoughts from Deuteronomy (e. g. Am. ii. 9, iv. 11, ix. 7; Hos. iv. 18, viii. 12, 13, xi. 3, xiii. 6; Is. i. 2; Mic. vi. 4, 8, 13-16). Since, then, not only Jeremiah and Ezekiel, but Amos and Hosea, Isaiah and Micah, speak in the words of Deuteronomy as well as in words borrowed from other portions of the Pentateuch, we see at once how untenable is the theory of those who, like Ewald, maintain that Deuteronomy was composed during the reign of Manasseh, or, as Vaihinger does, during that of Hezekiah. But, in truth, the Book speaks for itself. No imitator could have written in such a strain. We scarcely need the express testimony of the work to its own authorship. But, having it, we find (so Mr. Perowne) all the internal evidence conspiring to show that it came from Moses, excepting the concluding part. It is not probable that it was written before the three preceding books, because the legislation in Exodus and Leviticus, as being the more formal, is manifestly the earlier, whilst Deuteronomy is the spiritual interpretation and application of the Law. But the letter is always before the spirit; the thing before its interpretation.

**Pen'te-cost** (fr. Gr. *pentecosté* = the fiftieth sc. day from the second day of the feast of unleavened bread or the Passover) (Acts ii. 1, xx. 16; 1 Cor. xvi. 8), also called "the feast of harvest, the first-fruits of thy labors" (Ex. xxiii. 16); "the feast of weeks" (xxiv. 22; Deut. xvi. 10); "the day of the first-fruits" (Num. xxviii. 26, compare Lev. xxiii. 17); the second of the great FESTIVALS of the Hebrews. It fell in due course on the sixth day of Sivan, and its rites, according to the Law, were restricted to a single day. The most important passages in the O. T. relating to it are, Ex. xxiii. 16, Lev. xxiii. 15-22, Num. xxviii. 26-31, Deut. xvi. 9-12.—I. The time of the festival was calculated from the second day of the PASSOVER, the sixteenth of Nisan. The Law prescribes that a reckoning should be kept from "the morrow after the Sabbath"<sup>1</sup> to the morrow after the completion of the seventh week, which would of course be the fiftieth day

<sup>1</sup> It has been generally held that the "Sabbath" here = the first day of holy convocation of the Passover, the fifteenth of Nisan, mentioned Lev. xxiii. 7 (compare 24, 32, 39). Some have made the "Sabbath" here = the seventh day of the week, or the Sabbath of creation, as the Jewish writers have called it; and thus the day of Pentecost would always fall on the first day of the week. But Bähr proves from Josh. v. 11 and Lev. xxiii. 14 that the omer was offered on the sixteenth Nisan. (PASSOVER, II. 3 g.)

(Lev. xxiii. 11, 15, 16; Deut. xvi. 9). The fifty days formally included the period of grain-harvest, commencing with the offering of the first sheaf of the barley-harvest in the Passover, and ending with that of the two first loaves which were made from the wheat-harvest, at this festival. The offering of these two loaves was the distinguishing rite of the day of Pentecost. They were to be leavened. Each loaf was to contain the tenth of an ephah (i. e. about 3½ quarts) of the finest wheat-flour of the new crop (Lev. xxiii. 17). The flour was to be the produce of the land. The loaves, with a peace-offering of two lambs of the first year, were to be waved before the Lord and given to the priests. At the same time a special sacrifice was to be made of seven lambs of the first year, one young bullock, and two rams, as a burnt-offering (accompanied by the proper meat and drink-offerings), and a kid for a sin-offering (xxiii. 18, 19). Besides these offerings, if we adopt the interpretation of the Rabbinical writers, an addition was made to the daily sacrifice of two bullocks, one ram, and seven lambs, as a burnt-offering (Num. xxviii. 27). At this, as well as the other festivals, a free-will-offering was to be made by each person who came to the sanctuary, according to his circumstances (Deut. xvi. 10). It would seem that its festive character partook of a more free and hospitable liberality than that of the Passover, which was rather of the kind which belongs to the mere family-gathering. In this respect it resembled the Feast of Tabernacles. The Levite, the stranger, the fatherless, and the widow, were to be brought within its influence (xvi. 11, 14). The mention of the gleanings to be left in the fields at harvest for "the poor and the stranger," in connection with Pentecost, may perhaps have a bearing on the liberality which belonged to the festival (Lev. xxiii. 22). At Pentecost (as at the Passover) the people were to be reminded of their bondage in Egypt, and they were especially admonished of their obligation to keep the divine Law (Deut. xvi. 12).—II. Of the information from Jewish writers respecting the observance of Pentecost, the following particulars appear worthy of notice: The flour for the loaves was sifted with peculiar care twelve times over. They were made either the day before, or, in the event of a Sabbath preceding the day of Pentecost, two days before the occasion. Each loaf was seven palms long, four broad, and four fingers high. The two lambs for a peace-offering were to be waved by the priest, before they were slaughtered, along with the loaves, and afterward the loaves were waved a second time along with the shoulders of the lambs. One loaf was given to the high-priest, and the other to the ordinary priests who officiated. The bread was eaten that same night in the Temple, and no fragment of it was suffered to remain till the morning. Although, according to the Law, the observance of Pentecost lasted but a single day, the Jews in foreign countries, since the Captivity, have prolonged it to two days. (FIRST-FRUIT.)—III. Doubts have been cast on the common interpretation of Acts ii. 1, according to which the Holy Ghost was given to the apostles on the day of Pentecost. Lightfoot contends that the passage means, *when the day of Pentecost had passed*. He supposes that Pentecost fell that year on the Sabbath, and that the disciples on the ensuing Lord's day "were all with one accord in one place;" but Neander maintains the common interpretation. The question on what day of the week this Pentecost fell, must of course be determined by the mode in which the doubt is

solved regarding the day on which the Last Supper was eaten. (PASSOVER III.) If it was the legal paschal supper, on the fourteenth of Nisan, and the Sabbath during which our Lord lay in the grave was the day of the omer, Pentecost must have followed on the Sabbath. But if the Supper was eaten on the thirteenth, and He was crucified on the fourteenth, the Sunday of the Resurrection must have been the day of the omer, and Pentecost must have occurred on the first day of the week.—IV. There is no clear notice in the Scriptures of any historical significance belonging to Pentecost. But most of the Jews of later times have regarded the day as the commemoration of the giving of the Law on Mount Sinai (Ex. xix., xx.).—V. If the feast of Pentecost stood without an organic connection with any other rites, we should have no certain warrant in the O. T. for regarding it as more than the divinely appointed solemn thanksgiving for the yearly supply of the most useful sort of food. But it was, as we have seen, essentially linked on to the Passover, that festival which, above all others, expressed the fact of a race chosen and separated from other nations. It was not an insulated day. It stood as the culminating point of the Pentecostal season, the interval between the Passover and Pentecost being evidently regarded as a religious season (so Mr. Clark, original author of this article). If the offering of the omer (PASSOVER, II. 3, g) was a supplication for the Divine blessing on the harvest which was just commencing, and the offering of the two loaves was a thanksgiving for its completion, each rite was brought into a higher significance in consequence of the omer forming an integral part of the Passover.

**Pe-nu'el** (Heb. = PENIEL), the usual, and possibly the original, form of the name of a place which first appears as PENIEL (Gen. xxxii. 30, 31). From this narrative it is evident that it lay somewhere between the JABBOK and SUCCOTH 1 (compare xxxii. 22 with xxxiii. 17, and Judg. viii. 5, 8). GIDEON destroyed the tower of Penuel and slew the men of the city (Judg. viii. 8, 9, 17); Jeroboam rebuilt or fortified Penuel (1 K. xii. 25). Its site is unknown.

**\*Pe-nu'el** (see above). 1. In the genealogies of Judah "the father (or founder) of GEDOR" (1 Chr. iv. 4).—2. A Benjamite chief who dwelt at Jerusalem; son of Shashak (viii. 25).

**Pe'or** (Heb. *opening, defile*, Ges.). 1. A mountain in Moab, to the top of which the Prophet BALAAM was conducted by Balak for his final conjurations (Num. xxiii. 28 only). Peor—or, more accurately, "the Peor"—was "facing JESHIMON." The same is said of PISGAH. In the *Onomasticon* it is stated to be above the town of Libias (the ancient BETH-ARAM), and opposite Jericho.—2. In four passages (Num. xxv. 18 twice, xxxi. 16; Josh. xxii. 17) Peor is a contraction for BAAL-PEOR.

**Per-a-zim** (Heb. *breaches, defeats*, Ges.), **Mount**. A name which occurs in Is. xxviii. 21 only—unless the place which it designates = the BAAL-PERAZIM mentioned as the scene of one of David's victories over the Philistines. The commentators almost unanimously take the reference to be to David's victories above alluded to, at Baal-perazim, and Gibeon (Gesenius, Strachey); or to the former of these on the one hand, and Joshua's slaughter of the Canaanites at Gibeon and Beth-horon on the other (Eichhorn, Rosenmüller, Michaelis).

**\*Per-dit-ion** [-dish'un]. DAMNATION 1.—Son of perdition = one doomed to perdition, Rbn. N. T. *Lex.* ANTICHRIST; JUDAS ISCARIOT.

**\*Pe'res** (Chal.) (Dan. v. 28). **MENE, &c.**

**Pe'resh** (Heb. *dung*, Ges.), son of Machir by his wife Maachah (1 Chr. vii. 16).

**Pe'rez** (fr. Heb.) = PHAREZ, the son of Judah. The "children of Perez" appear to have been a family of importance for many centuries (1 Chr. xxvii. 3; Neh. xi. 4, 6).

**Pe'rez-uz'za** (1 Chr. xiii. 11); and

**Pe'rez-uz'zah** (2 Sam. vi. 8) (both fr. Heb. = "the breach of Uzza" or "of Uzzah," A. V. margin; *defeat of Uzah*, Ges.; *Uzzah's breaking*, Mr. Grove), the title which David conferred on NACHON'S THRESHING-FLOOR (CHIDON), in commemoration of the sudden death of UZZAH. The situation of the spot is not known.

**\*Per'fect** (fr. L.), the A. V. translation of various Hebrew, Chaldee, and Greek words, the principal of which are—1. Heb. *cdlil* (Ez. xvi. 14, xxvii. 3, xxviii. 12), once translated "perfection" (Lam. ii. 15), "all" (Ex. xxviii. 31, xxxix. 22), "wholly" (Lev. vi. 22, 23 [Heb. 15, 16]; Num. iv. 6; 1 Sam. vii. 9), "utterly" (Is. ii. 18), &c. Of kindred words, the verb *cdlal* is translated "to perfect" (Ez. xxvii. 4), "to make perfect" (11); the plural noun *mich-lôth* (2 Chr. iv. 21 only) is translated "perfect," margin "perfections of;" and *michlâl* (Ps. l. 2 only) is "perfection."—2. Heb. *shâlôm* (Deut. xxv. 15 twice; 1 K. viii. 61, xi. 4, xv. 3, 14; 2 K. xx. 3; 1 Chr. xii. 38, xxviii. 9, xxxix. 9, 19; 2 Chr. xv. 17, xvi. 9, xix. 9, xxv. 2; Prov. xi. 1 margin; Is. xxxviii. 3), also translated "perfected" (2 Chr. viii. 16), "made ready" (1 K. vi. 7), "whole" (Deut. xxvii. 6; Josh. viii. 31; Am. i. 6, 9), "full" (Gen. xv. 16; Ru. ii. 12), "just" (Prov. xi. 1), "peaceable" (Gen. xxxiv. 21), "quiet" (Nah. i. 12, margin "at peace"). Of kindred words *shâlôm* is usually translated "PEACE," and *shelem* "PEACE-OFFERING."—3. Heb. noun *tachlith* once (Ps. cxxxix. 22), twice "perfection" (Job xi. 7, xxviii. 3), twice "end" (Neh. iii. 21; Job xxvi. 10). The kindred noun *tichlâh* is translated "perfection" (Ps. cxix. 96 only).—4. Heb. *tâm* (Job i. 1, 8, ii. 8, viii. 20, ix. 20, 21, 22; Ps. xxxvii. 37, lxxiv. 4 [Heb. 5]), also translated "upright" (Prov. xxix. 10), "undefiled" (Cant. v. 2, vi. 9), "plain" (Gen. xxv. 27).—5. Heb. noun *tôm*, kindred to No. 4, once translated "perfect" (Ps. ci. 2), once "full" (Job xxi. 23), once "perfection" (Is. xlvii. 9), usually "integrity" (Gen. xx. 5 [margin "simplicity," or "sincerity"], 6; 1 K. ix. 4; Ps. vii. 8 [Heb. 9], xxv. 21, xxvi. 1, 11, xli. 12 [Heb. 13], lxxviii. 72; Prov. xix. 1, xx. 7), also with a preposition "in simplicity" (2 Sam. xv. 11; 1 K. xxii. 34 margin; 2 Chr. xviii. 33 margin [text in both "at a venture"]), "uprightly" (Prov. ii. 7, x. 9), "uprightness" (Job iv. 6; Prov. xxviii. 6), "upright" (Prov. x. 29, xiii. 6); used in plural in "URIM AND THUMMIM."—6. Heb. *tâmim*, kindred to No. 4 and 5 (Gen. vi. 9, xvii. 1; Lev. xxii. 21; Deut. xviii. 13, xxxii. 4; 1 Sam. xiv. 41; 2 Sam. xxii. 31, 33; Job xxxvi. 4, xxxvii. 16; Ps. xviii. 30, 32 [Heb. 31, 33], xix. 7 [Heb. 8], ci. 2, 6, cxix. 1 margin; Prov. ii. 21, xi. 5; Ez. xxviii. 15), usually translated "without blemish" (Ex. xi. 5, xxix. 1; often in Lev., Num., and Ez.), sometimes "without spot" (Num. xix. 2, xxviii. 3, 9, 11, xix. 17, 26), also "undefiled" (Ps. cxix. 1), "upright" (Gen. vi. 9 margin, xvii. 1 margin; Deut. xviii. 13 margin; 2 Sam. xxii. 24, 26; Job xii. 4; Ps. xviii. 23, 25 [Heb. 24, 26], xxxvii. 18; Prov. xi. 20, xxviii. 10), uprightly" (Ps. xv. 2, lxxxiv. 11 [Heb. 12]; Prov. xxviii. 18; Am. v. 10), "sincere" (Gen. xvii. 1 margin; Deut. xviii. 13 margin; Ps. cxix. 1 mar-

gin), "sincerity" (Josh. xxiv. 14), "sincerely" (Judg. ix. 16, 19), "whole" (Lev. iii. 9; Josh. x. 13; Prov. i. 12; Ez. xv. 5), "complete" (Lev. xxiii. 15), "full" (xxv. 30), "sound" (Ps. cxix. 80), "innocent" (1 Sam. xiv. 41 margin).—7. Gr. adv. *akribós* once (Lk. i. 3), translated once "perfectly" (1 Th. v. 2), twice "diligently" (Mat. ii. 8; Acts xviii. 25), once "circumspectly" (Eph. v. 15). The kindred noun *akribia* is translated "perfect manner" (Acts xxii. 3 only); the comparative adjective *akribesteron* (used adverbially) is translated "more perfect" (xxiv. 24), and "more perfectly" (xviii. 26, xxiii. 15, 20); the superlative *akribestatos* is translated "most straitest" (xxvi. 5).—8. Gr. *artios* (2 Tim. iii. 17 only). Several kindred compounds also occur, viz. the verb *katartizó*, translated "to make perfect" (Heb. xiii. 21; 1 Pet. v. 10), (in passive) "to be perfect" (Lk. vi. 40; 2 Cor. xiii. 11), "to perfect" (Mat. xxi. 16; 1 Th. iii. 10), (in passive) "to be perfectly joined together" (1 Cor. i. 10), "to mend" (Mat. iv. 21; Mk. i. 19), "to restore" (Gal. vi. 1), "to prepare" (Heb. x. 5), (in passive) "to be fitted" (Rom. ix. 22), "to frame" (Heb. xi. 3); the noun *katarisis*, translated "perfection" (2 Cor. xiii. 9 only); and the noun *katarisinos*, translated "perfecting" (Eph. iv. 12).—9. Gr. participle *peplérōmenos* (Rev. iii. 2), from the verb *plērōō*, usually translated "to fulfil" (Mat. i. 22, ii. 15, 17, 23, iii. 15, and often in the Gospels, Acts, &c.), also "to fill" (Lk. ii. 40, iii. 5; Jn. xii. 3, xvi. 6; Acts ii. 2, v. 3, 28, xiii. 52; Rom. i. 29, xv. 13, 14; 2 Cor. vii. 4; Eph. i. 23, iii. 19, iv. 10, v. 18; Phil. i. 11; Col. i. 9; 2 Tim. i. 4), "to fill up" (Mat. xxiii. 32), (in passive) "to be full" (xiii. 48; Jn. xv. 11, xvi. 24; Phil. iv. 18; 1 Jn. i. 4; 2 Jn. 12), (in passive) "to be complete" (Col. ii. 10, iv. 12), "to end" (Lk. vii. 1; Acts xix. 21), "to accomplish" (Lk. ix. 31), "to supply" (Phil. iv. 19), &c.—10. Gr. *teleios* (Mat. v. 48 twice, xix. 21; Rom. xii. 2; 1 Cor. ii. 6, xiii. 10; Eph. iv. 13; Phil. iii. 15; Col. i. 28, iv. 12; Heb. ix. 11; Jas. i. 4 twice, 17, 25, iii. 2; 1 Jn. iv. 18), once translated "of full age" (Heb. v. 14), and once "men" (1 Cor. xiv. 20). Of kindred words, the noun *teleiotes* is once translated "perfectness" (Col. iii. 14), and once "perfection" (Heb. vi. 1); *teleiotes* is translated "finisher" (Heb. xii. 2 only); the verb *teleinó*

is translated "to make perfect" (Jn. xvii. 23; 2 Cor. xii. 9; Heb. ii. 10, v. 9, vii. 19, ix. 9, x. 1, xi. 40, xii. 23; Jas. ii. 22; 1 Jn. iv. 17, 18), "to perfect" (Lk. xiii. 32; Heb. x. 14; 1 Jn. ii. 5, iv. 12), (in passive) "to be perfect" (Phil. iii. 12), "to finish" (Jn. iv. 34, v. 36, xvii. 4; Acts xx. 24), "to fulfil" (Lk. ii. 43; Jn. xix. 28), "to consecrate" (Heb. vii. 28); the noun *teleiōsis* is once translated "performance" (Lk. i. 45), and once "perfection" (Heb. vii. 11); the compound verb *telephoréo* is translated "to bring fruit to perfection" (Lk. viii. 14 only); the compound verb *epiteléō* is once translated "to perfect" (2 Cor. vii. 1), once "to make perfect" (Gal. iii. 3), elsewhere "to do" (Lk. xiii. 32), "to perform" (Rom. xv. 28; 2 Cor. viii. 11; Phil. i. 6), "to be a performance" (2 Cor. viii. 11), "to finish" (viii. 6), "to accomplish" (Heb. ix. 6; 1 Pet. v. 9), "to make" (Heb. viii. 5). FAITH; LOVE; SANCTIFICATION, &c.

\* **Per-fec-tion** (fr. L.). PERFECT.

**Per-fumes**. The free use of perfumes was peculiarly grateful to the Orientals (Prov. xxvii. 9), whose olfactory nerves are more than usually sensitive to the offensive smells engendered by the heat of their climate. The Hebrews manufactured their perfumes chiefly from SPICES imported from Arabia, though to a certain extent also from aromatic plants growing in their own country. The modes in which they applied them were various. (ALABASTER; ORNAMENTS, PERSONAL, &c.) Perfumes entered largely into the Temple-service, in the two forms of INCENSE and OINTMENT (Ex. xxx. 22-38). Nor were they less used in private life: not only were they applied to the person, but to garments (Ps. xlv. 8; Cant. iv. 11), and to articles of furniture, such as beds (Prov. vii. 17). On the arrival of a guest the same compliments were probably paid in ancient as in modern times (Dan. ii. 46). When a royal personage went abroad in his litter, attendants threw up "pillars of smoke" about his path (Cant. iii. 6). The use of perfumes was omitted in times of mourning, whence the allusion in Is. iii. 24.

**Per'ga** (L. fr. Gr.; compare PERGAMOS), an ancient and important city of PAMPHYLIA, situated on the river Cestrus, sixty stadia from its mouth, and celebrated in antiquity for the worship of Artemis (DIANA), whose temple stood on a hill outside the

Perge, Part of the Ancient Wall.—From Texier and Pullan, *Byzantine Architecture*.—(Fbn.)

town. The Cestrus was navigable to Perge; and St. Paul landed here on his voyage from Paphos (Acts xiii. 13). He visited Perge again on his return from the interior of Pamphylia, and preached the

Gospel there (xiv. 25). There are still extensive remains of Perge at a spot called by the Turks *Eski-Külesi*.

**Per'ga-mos** (Gr.; popularly derived from Perge-

mus, son of Pyrrhus, who settled there; but apparently connected with Gr. *purgos* = a tower, and Eng. *burgh*, in names of places, L. & S.), a city of Mysia, about three miles N. of the river *Bakyr-t-hai*, the Caicus of antiquity, and twenty miles from its present mouth. The name was originally given to a remarkable hill, presenting a conical appearance when viewed from the plain, and strongly fortified by nature and art. The local mythological legends attached a sacred character to this place. Lysimachus, one of Alexander's successors, deposited in the temple or castle there an enormous sum—9,000 talents—in the care of an Asiatic eunuch named Phileterus. In the troublous times which followed, this officer betrayed his trust, declared himself independent (about B. C. 283), and retaining the treasure transmitted it at the end of twenty years to his nephew Eumenes. Eumenes was suc-

ceeded by his cousin Attalus, founder of the Attalic dynasty of Pergamene kings, who by allying himself with the rising Roman power laid the foundation of the future greatness of his house. His successor, Eumenes II., was rewarded for his fidelity to the Romans in their wars with ANTIOCHUS THE GREAT and Perseus by a gift of all the territory which the former had possessed N. of the Taurus range. The Attalic dynasty terminated B. C. 133, when Attalus III., dying at an early age, made the Romans his heirs. His dominions formed the province of ASIA Proper. The sumptuousness of the Attalic princes had raised Pergamos to the rank of the most splendid city in Asia. It was a sort of union of a pagan cathedral-city, a university-town, and a royal residence. Its library rivalled that of ALEXANDRIA. The impulse given to the art of preparing sheepskins for writing has left its record in

Pergamos.—(Kitto.)

the name *parchment* (L. *charta pergamena*, i. e. *paper of Pergamos*). But the great glory of the city was the Nicephorium, a grove of extreme beauty, laid out as a thank-offering for a victory over Antiochus, in which was an assemblage of temples, probably of Jupiter, Minerva, Apollo, Æsculapius, Bacchus, and Venus. Under the Attalic kings, Pergamos became a city of temples, devoted to a sensuous worship; and being in its origin, according to pagan notions, a sacred place, might not unnaturally be viewed by Jews and Jewish Christians as one "where was the throne of Satan" (Rev. ii. 13). After the extinction of its independence, the sacred character of Pergamos seems to have been put even more prominently forward. Æsculapius, the god of medicine, was called "the Pergamene god." His grove was recognized by the Roman senate in the reign of Tiberius as possessing the rights of sanctuary. From this notoriety of the Pergamene Æsculapius, from the title "Savior" being given to him, from the *serpent* being his characteristic emblem, and from the fact that the medical practice of antiquity included charms and incantations among its agencies, it has been supposed that the expressions

"the throne of Satan" and "where Satan dwelleth" have an especial reference to this one pagan deity, and not to the whole city as a sort of focus of idolatrous worship. But although undoubtedly the Æsculapius worship of Pergamos was the most famous, yet an inscription of the time of Marcus Antoninus distinctly puts Jupiter, Minerva, Bacchus, and Æsculapius in a coördinate rank, as all being special tutelary deities of Pergamos. It seems unlikely, therefore (so Mr. Blakesley), that the expressions above quoted should be so interpreted as to isolate one of them from the rest. The charge against a portion of the Pergamene Church that some among them were of the school of Balaam, whose policy was to put a stumbling-block before the children of Israel, by inducing them to eat things sacrificed to idols and to commit fornication (Rev. ii. 14), is in both its particulars very inappropriate to the Æsculapian ritual. It points rather to the worship of Bacchus and Venus. (ANTIPAS 2; NICOLAÏTANS.) The remains of Pergamos (theatre, baths, fragments of temples, church of St. John, &c.) are magnificent. The modern town, *Bergama* or *Bergamos*, has about 20,000 inhabitants,

including 1,600 to 2,000 Christians, who have several churches (Rev. H. Christmas, in Fairbairn).

**Pe-ri'da** (Heb. *kərdel*, Ges.), ancestor of certain "children of Solomon's servants" who returned from Babylon with Zerubbabel (Neh. vii. 57); = **PERUDA**.

**Per'iz-zite**, the, and **Per'iz-zites** (both fr. Heb. sing. = *a countryman, rustic*, Ges.; often used collectively), one of the nations inhabiting the Land of Promise before and at the time of its conquest by Israel. They are continually mentioned in the formula so frequently occurring to express the Promised Land (Gen. xv. 20; Ex. iii. 8, 17, xxiii. 23, xxxiii. 2, xxxiv. 11; Deut. vii. 1, xx. 17; Josh. iii. 10, ix. 1, xxiv. 11; Judg. iii. 5; Ezr. ix. 1; Neh. ix. 8). "The Canaanite and the Perizzite" appear with somewhat greater distinctness on several occasions (Gen. xiii. 7, xxxiv. 30; Judg. i. 4, 5; 2 Esd. i. 21). The notice in Judges locates them in the southern part of the Holy Land. Josh. xvii. 15-18 seems to speak of them as occupying, with the

Rephaim, or "giants," the "forest country" on the western flanks of Mount Carmel. They are mentioned as a tribe of mountaineers in Josh. xi. 3, xii. 8; and are catalogued among the old population whom Solomon reduced to bondage (1 K. ix. 20; 2 Chr. viii. 7).

\* **Per'ju-ry**. **LAW OF MOSES; OATH; PUNISHMENTS.**

**Per-sep'o-lis** (Gr. *city of the Persians*), mentioned only in 2 Mc. ix. 2, was the capital of PERSIA Proper, and the occasional residence of the Persian court from the time of Darius Hystaspis, who seems to have been its founder, to the invasion of Alexander the Great, who wantonly burned it. The temples, which were of stone, may have escaped destruction or have been soon restored, since they were still the depositories of treasure in the time of Antiochus Epiphanes. Pasargadæ, the more ancient capital, was (so Rawlinson) at *Murg-Aub*, where the tomb of CYRUS may still be seen; Persepolis was forty-two miles S. of this, near *Isakhcr*, on the site now

Persepolis.

called the *Chehl-Minar* or Forty Pillars. Here, on a platform hewn out of the solid rock, the sides of which face the four cardinal points, are the remains of two great palaces, built respectively by Darius Hystaspis and his son Xerxes, besides a number of other edifices, chiefly temples. They are of great extent and magnificence, covering many acres. At the foot of this rock, in the plain now called *Merdasht*, probably stood the ancient town, built chiefly of wood, and now altogether effaced. After the time of Antiochus Epiphanes it disappeared from history as an inhabited place.

**Per'se-us** [pronounced in Greek or Latin *per'suse*; compare Menestheus, Nereus] (Gr.), eldest son of Philip V. and last king of Macedonia. After his father's death (b. c. 179) he continued the preparations for the renewal of the war with Rome, which was seen to be inevitable. In b. c. 168 he was defeated by Lucius Æmilius Paulus at Pydna, and shortly afterward surrendered with his family to his conquerors. He graced the triumph of Paulus, and died in honorable retirement at Alba. The defeat of Perseus put an end to the independence of Macedonia, and extended even to Syria the terror of the Roman name (1 Mc. viii. 5).

**Per'sia** [-sha; in Latin -she-a; compare Asia] (L.; Gr. *Persis*; Heb. *Pāras*; derived by some [so Gesenius] fr. Zend *pārs* = *pure, splendid*; by others

fr. Heb. *pārdāsh* = *horse*, since Persia abounds in horses; by Herodotus from their legendary scunder *Perseus*, son of Perseus and Andromeda) was strictly the name of a tract of no very large dimensions on the Persian Gulf, which is still known as *Fars*, or *Farsistan*, a corruption of the ancient appellation. This tract was bounded on the W. by Susiana or Elam, on the N. by Media, on the S. by the Persian Gulf, and on the E. by Carmania, the modern *Akerman*. It was generally arid and unproductive, with some fertile spots. The worst part, toward the S., on the borders of the gulf, is like ARABIA in climate and soil. Above this miserable region is a tract very far superior to it, consisting of rocky mountains—the continuation of Zagros, among which are fertile valleys and plains, especially toward the N., in the vicinity of Shiraz. Here is an important stream, the *Bendamis*, which flowing through the beautiful valley of *Merdasht*, and by the ruins of PERSEPOLIS, is then separated into numerous channels for irrigation, and, after fertilizing a large tract of country (the district of *Kurjan*), ends its course in the salt-lake of *Baktigan*. Vines, oranges, and lemons are abundant in this region. Further N. an arid country again succeeds, the outskirts of the Great Desert, which extends from *Kerman* to *Mazenderan*, and from *Kashan* to Lake *Zerrah*. The chief towns were Pasargadæ, the ancient, and Per-

sepolis, the later capital. While *Fars* is the original Persia, the name is more commonly applied, both in Scripture and by profane authors, to the entire tract which came by degrees to be included within the Persian Empire. This empire extended at one time from India on the E. to Egypt and Thrace on the W., and included, besides portions of Europe and Africa, the whole of Western Asia between the Black Sea, the Caucasus, the Caspian, and the Jaxartes on the N., and the Arabian Desert, Persian Gulf, and Indian Ocean on the S. The only passage in Scripture where Persia designates the tract which has been called above "Persia Proper" is Ez. xxxviii. 5 (so Rawlinson). Elsewhere the empire is intended (2 Chr. xxxvi. 20; Esth. i. 3, &c.).

**PERSIANS.**  
*Persian* [-shan], pl. *Persians* [-shanz] (Heb. *Parsi*; Gr. *Perses*, pl. *Persai*; see **PERSIA**), the name of the people who inhabited "Persia Proper," and who thence conquered a mighty empire. There is reason to believe (so Prof. Rawlinson, original author of this article) that the Persians were of the same race as the **MEDES**, both being branches of the great Aryan stock.—1. *Character of the Nation.* The Persians were a people of lively and impressive minds, brave and impetuous in war, witty, passionate, for Orientals truthful, not without some spirit of generosity, and of more intellectual capacity than the generality of Asiatics. In the times anterior to Cyrus they were noted for the simplicity of their habits, which offered a strong contrast to the luxuriousness of the Medes; but from the date of the Median overthrow, this simplicity began to decline. They adopted the flowing Median robe (of silk?) in lieu of the old national costume—a close-fitting tunic

tioned any other god. Occasionally, however, they indicate a slight and modified polytheism. Oromasdes is "the chief of the gods," so that there are other gods besides him; and the highest of these is evidently *Mithra*, who is sometimes invoked to protect the monarch, and beyond a doubt = the sun. Entirely separate from these—their active resister and antagonist—was *Ahriman* (Arimanius) = the *Death-dealing*—the powerful, and (probably) self-existing Evil Spirit, from whom war, disease, frost, hail, poverty, sin, death, and all other evils, had their origin. (Noah.) Worship was confined to *Auramazda* and his good spirits; *Ahriman* and his demons were only feared and hated. The original Persian worship was simple. They were not destitute of temples, but had probably no altars, sacrifices, or priests, and certainly no images. Processions were formed, and religious chants—prayer and praise intermixed—were sung in their temples, whereby the favor of *Auramazda* and his good spirits was supposed to be secured. From the first entrance of the Persians, as immigrants, into their new territory, they were probably brought into contact with a form of religion very different from their own. Magianism, the religion of the Scythic or Turanian population of Western Asia, had long been dominant over the greater portion of the region between Mesopotamia and India. The essence of this religion was worship of the elements—more especially of fire. The simplicity of the Aryan religion was speedily corrupted by its contact with this powerful rival. There was a short struggle for preëminence, after which the rival systems came to terms. Dualism was retained, with the names of *Auramazda* and *Ahriman*, and the special worship of the sun and moon under the appellations of *Mithra* and *Homa*, but to this was superadded the worship of the elements and the whole ceremonial of Magianism, including the **DIVINATION** to which the **MAOI** made pretence. The worship of other deities, as *Tanata* or *Anaitis*, was a still later addition.—3. *Language.* The language of the ancient Persians was closely akin to the Sanscrit, or ancient language of India. We find it in its earliest stage in the *Zendavesta*—the sacred book of the whole Aryan race. Modern Persian is its degenerate representative, largely impregnated with Arabic.—4. *Division into Tribes, &c.* Herodotus tells us that the Persians were divided into ten tribes, of which three were noble, three agricultural, and four nomadic.—5. *History.* In remote antiquity it would appear that the Persians dwelt in the region E. of the Caspian, or possibly in a tract still nearer India. The general line of their progress seems to have been from E. to W., down the course of the Oxus, and then along the southern shores of the Caspian Sea, to Rhages and Media. These movements were doubtless anterior to B. C. 880, at which time the Assyrian kings seem first to have come in contact with Aryan tribes E. of Mount Zagros. If they are to be identified with the *Bartu* or *Partu* of the Assyrian monuments, we may say that from the middle of the ninth to the middle of the eighth century B. C. they occupied Southeastern Armenia, but by the end of the eighth century had removed into the country, which thenceforth went by their name. The leader of this last migration seems to have been Achemenes, who was recognized as king of the newly-occupied territory, and founded the famous dynasty of the Achemenidae, about B. C.

Median Dress.

Old Persian Dress.

and trousers of leather. Polygamy was common among them. They were fond of the pleasures of the table. In war they fought bravely, but without discipline.—2. *Religion.* Like the other Aryans, the Persians worshipped one Supreme God, whom they called *Auramazda* (Oromasdes, Ormazd, Ormuzd)—a term signifying (as is believed) the *Great Giver of Life*. The royal inscriptions rarely men-

700. The crown appears to have descended in a right line through Teispes, Cambyzes I., Cyrus I., and Cambyzes II., the father of Cyrus the Conqueror. The Persians became tributary to the Medes about B. C. 630, or a little earlier. After about seventy or eighty years of subjection, the Persians, under CYRUS, revolted from the Medes, engaged in a bloody struggle with them, and finally succeeded, not only in establishing their independence, but in changing places with their masters, and becoming the ruling people. The probable date of the revolt is B. C. 558. Its success, by transferring to Persia the dominion previously in the possession of the Medes, placed her at the head of an empire, the bounds of which were the Halys on the W., the Euxine on the N., Babylonia on the S., and on the E. the salt-desert of Iran. As usual in the East, this success led on to others. Cyrus defeated Crœsus, and added the Lydian empire to his dominions. This conquest was followed closely by the submission of the Greek settlements on the Asiatic coast, and by the reduction of Caria, Caunus, and Lycia. The empire was soon after extended greatly toward the N. E. and E. Cyrus rapidly overran the flat countries beyond the Caspian, after which he seems to have pushed his conquests still further to the E., adding to his dominions the districts of Herat, Cabul, Candahar,

Persian Warriors.—From Persepolis.

Seistan, and Beloochistan, which were thenceforth included in the empire. In B. C. 539 or 538, Babylon was attacked, and after a stout defence fell. (BABEL.) This victory first brought the Persians into contact with the Jews. The conquerors found in Babylon an oppressed race—like themselves, abhorers of idols—and professors of a religion in which to a great extent they could sympathize. (CAPTIVITY.) This race Cyrus restored to their own country by the remarkable edict recorded in Ezr. i. 2-4. He was slain in an expedition against the Massagette or the Derbices, after a reign of twenty-nine years. Under his son and successor, Cambyzes III., the conquest of Egypt took place (B. C. 525). This prince appears to be the AHAŠERUS of Ezr. iv. 6. In the absence of Cambyzes with the army, a conspiracy was formed against him at court, and a Magian priest, Gomates (*Gaumata*) by name, professing to be Smerdis (*Bardiya*), the son of Cyrus, whom his brother, Cambyzes, had put to death secretly, obtained quiet possession of the throne. Cambyzes, then in Syria, despairing of the recovery of his crown, ended his life by suicide. His reign had lasted seven years and five months. Gomates the Magian (ARTAXERXES 1) found himself thus, without a struggle, master of Persia (B. C. 522). He destroyed the national temples, substituting for them the fire-altars, and abolished the religious chants and other worship of the Oromasdians. He reversed

the policy of Cyrus with respect to the Jews, and forbade by an edict the further building of the Temple (Ezr. iv. 17-22). Darius, the son of Hystaspes (DARIUS 2), headed a revolt against him, which in a short time was crowned with complete success. Gomates was slain, having reigned seven months. The first efforts of Darius were directed to the re-establishment of the Oromasdian religion in all its purity. Appealed to, in his second year, by the Jews, who wished to resume the construction of their Temple, he not only allowed them, confirming the decree of Cyrus, but assisted the work by grants from his own revenues, whereby the Jews were able to complete the Temple as early as his sixth year (vi. 1-15). During the first part of the reign of Darius the tranquillity of the empire was disturbed by numerous revolts in Babylon, Media, Sagartia, Persia Proper, &c. His courage and activity, however, seconded by the valor of his Persian troops and the fidelity of some satraps, carried him successfully through these and other similar difficulties; and after five or six years of struggle, he became as firmly seated on his throne as any previous monarch. He divided the empire into twenty satrapies, built magnificent palaces at PERSEPOLIS and Susa (SHRSHAN), conquered Thrace, Pæonia, and Macedonia, toward the W., and a large portion of India on the E., &c. On the whole, he must be pronounced, next to Cyrus, the greatest of the Persian monarchs.<sup>1</sup> The latter part of his reign was, however, clouded by reverses. His son-in-law Mardonius suffered great losses in Thrace and in a tempest off Mount Athos; and these disasters were followed shortly by the defeat of his army under Datis and Artaphernes at Marathon (GREECE); and before any attempt could be made to avenge that blow, Egypt rose in revolt (B. C. 486), massacred its Persian garrison, and declared itself independent. In the palace at the same time there was dissension; and when, after a reign of thirty-six years, the fourth Persian monarch died (B. C. 485), leaving his throne to a young prince of strong and ungoverned passions, it was evident that the empire had reached its highest point of greatness, and was already verging toward its decline. The first act of Xerxes (probably the AHAŠERUS of Esther) was to reduce Egypt to subjection (B. C. 484), after which he began at once to make preparations for his invasion of GREECE. This well-known expedition ended disastrously for the invaders. During the rest of the reign of Xerxes, and during part of that of his son and successor, Artaxerxes, Persia continued at war with the Greeks, who destroyed her fleets, plundered her coasts, and stirred up revolt in her provinces; but in B. C. 449 a peace was concluded between the two powers, who then continued on terms of amity for half a century. A conspiracy in the seraglio having carried off Xerxes (B. C. 465), Artaxerxes his son, called by the Greeks *Makrocheir* (= Longimanus [L.] = Long-handed), succeeded him, after an interval of seven months, during which the conspirator Artabanus occupied the throne. This Artaxerxes, who reigned forty years, is beyond a doubt the ARTAXERXES 2 who stood in such a friendly relation toward Ezra (Ezr. vii. 11-28) and Nehemiah

<sup>1</sup> The great inscription of Darius at Behistun (see map, under EUPHRATES) is engraved in three languages (old Persian, Babylonian, and a Scythic or Tartar dialect) on a precipitous rock, connected with the Zagros chain, 300 feet above its base, the rock being 1,700 feet high. It records the deeds of Darius and the glories of his royal house, and was executed, according to Col. Rawlinson, in the fifth year of his reign, B. C. 516. The Persian inscription, with an English translation, is given in Rawlinson's *Hdt.* ii. 490 ff.

(Neh. ii. 1-9, &c.). Under his rule the disorders of the empire seem to have increased rapidly. He is the last Persian king who had any special connection with the Jews, and the last but one mentioned in Scripture. His successors were Xerxes II., Sogdianus, Darius Nothus, Artaxerxes Mnemon, Artaxerxes Ochus, and Darius Codomannus, who is probably the "DARIUS THE PERSIAN" of Nehemiah (xii. 22). These monarchs reigned from B. C. 424 to B. C. 330. None were of much capacity, though Ochus reconquered Egypt. The younger Cyrus attempted to dethrone his brother Artaxerxes Mnemon. After his failure, eunuchs and women governed the kings; patriotism and loyalty were alike dead; and Greek mercenaries were largely employed in the Persian armies. The collapse of the empire under the attack of ALEXANDER THE GREAT requires no description here. On the division of Alexander's dominions among his generals, Persia fell to the Seleucidæ (SYRIA), under whom it continued till after the death of ANTIOCHUS EPIPHANES, when the conquering PARTHIANS advanced their frontier to the Euphrates, and the Persians became included among their subject tribes (B. C. 164). Still their nationality was not obliterated. In A. D. 226, the Persians shook off the yoke of their oppressors, and once more became a nation under the rule of the Sassanidæ, a dynasty which continued till A. D. 641, when the Mohammedans conquered the country. (ARABIA.) Since then Persia has been overrun at different times by Tartars, Afghans, &c. Modern Persia is one of the most important of the Asiatic powers. The present ruling dynasty dates from the close of the eighteenth century. The monarch is called *Shah*.

**Per'sis** (Gr. *a destroying, taking, or a female Persian?*), a Christian woman at Rome (Rom. xvi. 12) whom St. Paul salutes.

**Pe-ru'da** (Heb. *kernel*, Ges.) = PERIDA (Ezr. ii. 55).

**Pes'ti-lence.** MEDICINE; PLAGUE.

\* **Pes'tils** (2 Chr. xxiv. 14 margin) = pestles.

**PESTLE; MORTAR.**

\* **Pes'tle** [pes'sl] (Prov. xxvii. 22). MORTAR.

**Pet'er** (fr. Gr. *Petros* [= ΠΕΤΡΟΣ] = *a stone or piece of rock*, L. & S., Rbn. *N. T. Lex.*), one of the Twelve Apostles. His original name was SIMON, i. e. *hearer*. He was the son of Jonas (Mat. xvi. 17; Jn. i. 13, xxi. 16; BAR-JONA; JONA),<sup>1</sup> and was brought up in his father's occupation, a fisherman on the sea of Tiberias. (FISH.) He and his brother ANDREW were partners of John (JOHN THE APOSTLE) and JAMES 1, the sons of Zebedee, who had hired servants; and from various indications in the sacred narrative we are led to the conclusion (so Mr. Cook, original author of this article) that their social position brought them into contact with men of education. The apostle did not live, as a mere laboring man, in a hut by the sea-side, but first at BETHSAIDA, and afterward in a house at CAPERNAUM, belonging to himself or his mother-in-law, which must have been rather a large one, since he received in it not only our Lord and his fellow-disciples, but multitudes who were attracted by the miracles and preaching of Jesus (Mat. ix. 27, &c.). It is not probable that he and his brother were wholly uneducated. (EDUCATION.) The statement in Acts iv. 13, that "the council perceived they (i. e. Peter and John) were unlearned and ignorant men," is not incompatible with this assumption, the word rendered "unlearned" being nearly equivalent

to "laymen," i. e. men of ordinary education, as contrasted with those who were specially trained in the schools of the Rabbis. The language of the apostle was of course the form of Aramaic spoken in Northern Palestine, a sort of *patois*, partly Hebrew, but more nearly allied to the Syriac. (GALILEE; SEMITIC LANGUAGES.) It is doubtful whether our apostle was acquainted with GREEK in early life. Within a few years after his call he seems to have conversed fluently in Greek with Cornelius. The style of both of Peter's Epistles indicates a considerable knowledge of Greek—it is pure and accurate, and in grammatical structure equal to that of Paul. That may, however, be accounted for by the fact, for which there is very ancient authority, that Peter employed an interpreter in the composition of his Epistles, if not in his ordinary intercourse with foreigners. It is on the whole probable that he had some rudimental knowledge of Greek in early life, which may have been afterward extended when the need was felt. (TONGUES, GIFT OF.) That he was an affectionate husband, married in early life to a wife who accompanied him in his apostolic journeys, are facts inferred from Scripture, while very ancient traditions, recorded by Clement of Alexandria, and by other early but less trustworthy writers, inform us that her name was Perpetua, that she bore a daughter, or perhaps other children, and suffered martyrdom. It is uncertain at what age he was called by our Lord. The general impression of the Fathers is that he was an old man at the date of his death, A. D. 64, but this need not imply that he was much older than our Lord. He was probably between thirty and forty years of age at his call. That call was preceded by a special preparation. He and his brother Andrew, together with their partners James and John, the sons of Zebedee, were disciples of JOHN THE BAPTIST (Jn. i. 35). They were in attendance upon him when they were first called to the service of Christ. The circumstances of that call are recorded with graphic minuteness by John. This first call led to no immediate change in Peter's external position. He and his fellow-disciples looked henceforth upon our Lord as their teacher, but were not commanded to follow him as regular disciples. They returned to Capernaum, where they pursued their usual business, waiting for a further intimation of His will. The second call is recorded by the other three Evangelists (Mat. iv. 18 ff.; Mk. i. 16 ff.; Lk. v. 1-11); the narrative of Luke being apparently supplementary to the brief, and, so to speak, official accounts given by Matthew and Mark. It took place on the Sea of Galilee near Capernaum—where the four disciples, Peter and Andrew, James and John, were fishing. Peter and Andrew were first called. Our Lord then entered Simon Peter's boat and addressed the multitude on the shore; after this discourse He wrought the miracle by which He foreshadowed the success of the apostles as fishers of men. The call of James and John followed. Immediately after that call our Lord went to the house of Peter, where He wrought the miracle of healing on Peter's wife's mother. (JESUS CHRIST; MIRACLES.) Some time was passed afterward in attendance upon our Lord's public ministrations in Galilee, Decapolis, Perea, and Judea. The special designation of Peter and his eleven fellow-disciples took place some time afterward, when they were set apart as our Lord's immediate attendants (Mat. x. 2-4; Mk. iii. 13-19; Lk. vi. 13). They appear then first to have received

<sup>1</sup> A tradition makes his mother's name Johanna.

formally the name of apostles (APOSTLE), and from that time Simon bore publicly, and, as it would seem, all but exclusively, the name Peter, which had hitherto been used rather as a characteristic appellation than as a proper name. From this time, there can be no doubt, that Peter held the first place among the apostles, to whatever cause his precedence is to be attributed. The precedence did not depend upon priority of call, or it would have devolved upon his brother Andrew, or that other disciple who first followed Jesus. It seems scarcely probable that it depended upon seniority. The special designation by Christ alone accounts in a satisfactory way for the facts that he is named first in every list of the apostles, is generally addressed by our Lord as their representative, and on the most solemn occasions speaks in their name (Jn. vi. 68-69; Mat. xvi. 13 ff.). *First among equals* Peter held no distinct office, and certainly never claimed any powers which did not equally belong to all his fellow-apostles. The distinction which Peter received in Mat. xvi. 18, 19,<sup>2</sup> and it may be his consciousness of ability, energy, zeal, and absolute devotion to Christ's person, seemed to have developed a natural tendency to rashness and forwardness bordering upon presumption. On this occasion the exhibition of such feelings brought upon him the strongest reproof ever addressed to a disciple by our Lord (ver. 23). It is remarkable that on other occasions when Peter signalized his faith and devotion, he displayed at the time, or immediately afterward, a more than usual deficiency in spiritual discernment and consistency (xvii. 3, xiv. 30, 31). Toward the close of our Lord's ministry Peter's characteristics became especially prominent. Together with his brother, and the two sons of Zebedee, he listened to the last awful predictions and warnings delivered to the disciples, in reference to the second advent (Mat. xxiv. 3; Mk. xiii. 3, who alone mentions these names; Lk. xxi. 7). At the Last Supper Peter seems to have been particularly earnest in the request that the traitor might be pointed out. After the Supper his words drew out the meaning of the significant, almost sacramental act of our Lord in washing His disciples' feet (Jn. xiii. 4 ff.). Then, too, he made those repeated prot-

<sup>2</sup> The views of Mat. xvi. 18 are—1. That our Lord spoke of Himself, and not of Peter, as the rock on which the Church was to be founded (Glass, Dathie, &c.). 2. That our Lord addresses Peter as the type or representative of the Church, in his capacity of chief disciple (Augustine, &c.). 3. That the rock was not the person of Peter, but his confession of faith (Hilary, &c.). 4. That Peter himself was the rock on which the Church would be built, as the representative of the apostles, as professing in their name the true faith, and as intrusted specially with the duty of preaching it, and thereby laying the foundation of the Church (Pearson, Hammond, Bengel, Rosenmüller, Schleusner, Kuhn, Bloomfield, &c.). This view (so Mr. Cook) is borne out by the facts that Peter on the day of Pentecost, and during the whole period of the establishment of the Church, was the chief agent in all the work of the ministry, in preaching, in admitting both Jews and Gentiles, and laying down the terms of communion. The Roman Catholic view makes Peter the representative of Christ, not personally, but in virtue of an office essential to the permanent existence and authority of the Church. But Peter did not retain, even admitting that at first he held, any primacy of rank after completing his own special work; never exercised any authority over, or independently of, the other apostles; certainly did not transmit whatever position he ever held to any of his colleagues after his decease. The promise respecting the keys also (Mat. xvi. 19) was literally fulfilled when Peter preached at Pentecost, admitted the first converts to baptism, communicated the Holy Ghost to the Samaritans, and received Cornelius, the representative of the Gentiles, to the Church. Whatever privileges may have belonged to him personally, died with him. (APOSTLE.)

estations of unalterable fidelity, so soon to be falsified by his miserable fall. It seems evident that, with some diversity of circumstances, both the protestation and warning were thrice repeated (Mat. xxvi. 33-35; Mk. xiv. 29-31; Lk. xxii. 33, 34; Jn. xiii. 38-38). The fiery trial soon came. After the agony of Gethsemane, when Peter, James, and John were, as on former occasions, selected to be with our Lord, and all three alike failed to prepare themselves by prayer and watching, the arrest of Jesus took place. Peter drew his sword, alone against the armed throng, and wounded the servant of the high-priest, probably the leader of the band. When this bold but unauthorized attempt at rescue was reprov'd, he followed his Master with John into the high-priest's house. There he sat in the outer hall. His faith, which from first to last was bound up with hope, his special characteristic, was for the time powerless against temptation. Thrice, each time with greater vehemence, the last time with blasphemous asseveration, he denied his Master.<sup>3</sup> Yet it needed but a glance of his Lord's eye to bring him to himself. His repentance was instantaneous and effectual. On the morning of the Resurrection we have proof that Peter, though humbled, was not crushed by his fall. He and John were the first to visit the sepulchre; he was the first who entered it. We are told by Luke and by Paul that Christ appeared to him first among the apostles. On that occasion, however, he is called by his original name, Simon, not Peter: the higher designation was not restored until he had been publicly reinstituted, so to speak, by his Master. That reinstitution took place at the Sea of Galilee (Jn. xxi.), an event of the very highest import. Slower than John to recognize their Lord, Peter was the first to reach him: he brought the net to land. The thrice-repeated question of Christ, referring doubtless to the three protestations and denials, was thrice met by answers full of love and faith. He then received the formal commission to feed Christ's sheep, rather as one who had forfeited his place, and could not resume it without such an authorization. Then followed the prediction of his martyrdom, in which he was to find the fulfilment of his request to be permitted to follow the Lord. With this event closes the first part of Peter's history. Henceforth, he and his colleagues were to establish and govern the Church founded by their Lord, without the support of His presence. The first part of the ACTS OF THE APOSTLES is occupied by the record of transactions, in nearly all of

<sup>3</sup> "There were three denials. As to the first, all is plain. Peter was sitting in the hall or court of the palace, warming himself by the fire, when he was taxed by a maid-servant, the portress, who came up to him, with being of Jesus' company. He denied, and retreated from the fire to the porch or vestibule; and the cock crew: but the alarmed apostle did not heed it. As to the second denial, he was lingering in the porch; but his retreat had somewhat attracted attention. And so several persons charged him, the portress again (now probably returned to the door), another maid, a male-servant, according to the first three Evangelists. This is just what we might expect: several in such a group were likely to speak at once; and so St. John, who was present, tells us, 'they said.' Then, as to the third denial, a while after, the bystanders recognized Peter, who had perhaps gone back to the fire, as a Galilean: his provincial accent betrayed him; and a kinsman of Malchus, whose ear he had cut off, identified him as one of those seen with Jesus in the garden. The words of the denial he thereupon gave are differently reported; but as St. Matthew tells us 'he began to curse and to swear,' it is obvious that he did not just utter a single sentence, but denied repeatedly with a volley of imprecations. It was then that the cock crew again; and the Lord turned and looked upon Peter" (Rev. J. Ayre, in Fairbairn, &c.)

which Peter stands forth as the recognized leader of the apostles; it being, however, equally clear that he neither exercises nor claims any authority apart from them, much less over them. Peter points out to the disciples the necessity of supplying the place of Judas, states the qualifications of an Apostle, but takes no special part in the election (Acts i.). He is the most prominent person in the greatest event after the Resurrection, when on the day of Pentecost the Church was first invested with the plenitude of gifts and powers (ii.). The first miracle after Pentecost was wrought by him, John being joined with him in that; and when the people ran together to Solomon's porch, he was the speaker (iii.). The boldness of Peter and John, of Peter especially as the spokesman, when "filled with the Holy Ghost" he confronted the full assembly, headed by Annas and Caiaphas, produced a deep impression, enhanced as the words came from ignorant and unlearned men. The words spoken by both apostles, when commanded not to speak at all nor teach in the name of Jesus, have ever since been the watchwords of martyrs (iv. 19, 20). This first miracle of healing was soon followed by the first miracle of judgment. Peter was the minister in that transaction (v.; ANANIAS). He is not specially named in connection with the appointment of deacons (vi.; DEACONS); but when the Gospel was first preached beyond the precincts of Judea, he and John were at once sent by the apostles to the converts at Samaria (viii. 14 ff.). Henceforth he remains prominent, but not exclusively prominent, among the propagators of the Gospel. At Samaria he was confronted with SIMON MAGUS, the first teacher of heresy. About three years later (compare Acts ix. 28, and Gal. i. 17, 18) we have two accounts of the first meeting of Peter and PAUL. This interview was followed by other events marking Peter's position—a general apostolical tour of visitation to the Churches hitherto established (Acts ix. 32), in the course of which two great miracles were wrought on ENEAS and TABITHA, and in connection with which is recorded the baptism of Cornelius (x.). That was the crown and consummation of Peter's ministry. In this great act both he and his fellow-apostles saw an earnest of the admission of the Gentiles into the Church on the single condition of spiritual repentance. The establishment of a Church in great part of Gentile origin at Antioch, and the mission of Barnabas, set the seal upon the work thus inaugurated by Peter (xi.). This transaction was soon followed by the imprisonment of our apostle by Herod Agrippa (xii.). His miraculous deliverance marks the close of this second great period of his ministry. The special work assigned to him was completed. From that time we have no continuous history of him. He left Jerusalem, but it is not said where he went. He probably remained in Judea; six years later we find him once more at Jerusalem, when the apostles and elders came together to consider the question whether converts should be circumcised. Peter took the lead in that discussion, and urged with remarkable cogency the principles settled in the case of Cornelius. His arguments, adopted and enforced by James, decided that question at once and for ever. (PAUL.) It is a disputed point whether the meeting between PAUL and Peter, of which we have an account in Gal. ii. 1-10, took place at this time. The great majority of critics believe that it did, and this hypothesis, though not without difficulties, seems more probable

than any other which has been suggested. The only point of real importance was certainly determined before the apostles separated, the work of converting the Gentiles being henceforth specially intrusted to Paul and Barnabas, while the charge of preaching to the circumcision was assigned to the elder apostles, and more particularly to Peter (Gal. ii. 7-9). This arrangement cannot, however, have been an exclusive one. Paul always addressed himself first to the Jews in every city: Peter and his old colleagues undoubtedly admitted and sought to make converts among the Gentiles. It may have been in full force only when the old and new apostles resided in the same city. Such at least was the case at Antioch, where Peter went soon afterward. There the painful collision took place between the two apostles (ii. 11 ff.); the most remarkable, and, in its bearings upon controversies at critical periods, one of the most important events in the history of the Church. (PAUL.)—From this time until the date of his Epistles, we have no distinct notices in Scripture of Peter's abode or work. Peter was probably employed for the most part in building up and completing the organization of Christian communities in Palestine and the adjoining districts. There is, however, strong reason to believe that he visited Corinth at an early period. The name of Peter as founder, or joint founder, is not associated with any local Church save those of Corinth, Antioch, and Rome, by early ecclesiastical tradition. That of Alexandria may have been established by Mark, after Peter's death. That Peter preached the Gospel in the countries of Asia, mentioned in his first Epistle, appears from Origen's own words to be a mere conjecture. From that Epistle, however, it is to be inferred that toward the end of his life, Peter either visited, or resided for some time at BABYLON, which at that time, and for some hundreds of years afterward, was a chief seat of Jewish culture. More important in its bearings upon later controversies is the question of Peter's connection with Rome. It may be considered as a settled point that he did not visit Rome before the last year of his life. There is no notice of his labors or presence in that city in the Epistle to the Romans. The date given by Eusebius rests on a miscalculation, and is irreconcilable with the notices of him in the Acts of the Apostles. The evidence for his martyrdom there is complete (so Mr. Cook), while there is a total absence of any contrary statement in the writings of the early Fathers. Clement of Rome, writing before the end of the first century, speaks of it, but does not mention the place, that being of course well known to his readers. Ignatius, in his Epistle to the Romans (iv.) speaks of Peter in terms which imply a special connection with their Church. In the second century, Dionysius of Corinth, in the Epistle to Soter, bishop of Rome (Eusebius, *H. E.* ii. 25), states as a fact universally known and accounting for the intimate relations between Corinth and Rome, that Peter and Paul both taught in Italy, and suffered martyrdom about the same time. Irenæus, a disciple of Polycarp, who was a hearer of the Apostle John, bears distinct witness to Peter's presence at Rome. In the next century there is the testimony of Caius, the liberal and learned Roman presbyter (who speaks of Peter's tomb in the Vatican), of Origen, Tertullian, &c. In short, the

\* He gives A. D. 42, and says Peter remained at Rome twenty years. In this he is followed by Jerome (who gives twenty-five years) and by most Roman Catholic writers.

Churches most nearly connected with Rome, and those least affected by its influence, which was as yet but inconsiderable in the East, concur in the statement that Peter was a joint founder of that Church, and suffered death in that city.\* The time and manner of the apostle's martyrdom are less certain. The early writers imply, or distinctly state, that he suffered at or about the same time with Paul, and in the Neronian persecution. All agree that he was crucified (compare Jn. xxi. 18, 19). Origen says that at his own request he was crucified with his head downward. A legend relates that, when the persecution began, the Christians at Rome persuaded him to flee, but at the gate he met our Lord, who to his inquiry, "Whither goest thou?" answered, "I go to Rome, there once more to be crucified;" upon which Peter returned at once and was crucified. Thus closes the apostle's life.\* Some additional facts, not perhaps unimportant, may be accepted on early testimony. His wife accompanied him in his wanderings. Clement of Alexandria says that "Peter and Philip had children, and that both took about their wives, who acted as their coadjutors in ministering to women at their own houses." Peter's wife is believed to have suffered martyrdom, and to have been supported in the hour of trial by her husband's exhortation. The apostle is said to have employed interpreters. Basilides, an early Gnostic, professed to derive his system from Glaucias, one of these interpreters. (TONGUES, GIFT OF.) Of far more importance is the statement that Mark wrote his Gospel under the teaching of Peter, or that he embodied in that Gospel the substance of our apostle's oral instructions. The fact is doubly important in its bearings upon the Gospel, and upon the character of our apostle. (MARK, GOSPEL OF.) The only written documents which Peter has left, are the First Epistle, about which no doubt has ever been entertained in the Church; and the Second, which has, both in early times and in our own, been a subject of earnest controversy.—*First Epistle.* The external evidence of authenticity is of the strongest kind. Referred to in the Second Epistle (iii. 1); known to Polycarp and frequently alluded to in his Epistle to the Philippians; recognized by Papias (in Euseb. H. E. iii. 39); repeatedly quoted by Irenæus, Clement of Alexandria, Tertullian, and Origen: it was accepted without hesitation by the universal Church. (CANON.) The internal evidence is equally strong. It was addressed to the Churches of Asia Minor, which had for the most part been founded by Paul and his companions. Supposing it to have been written at BABYLON, it is a probable conjecture (so Mr. Cook) that Silvanus (SILAS), by whom it was

transmitted to those Churches, had joined Peter after a tour of visitation, either in pursuance of instructions from Paul, then a prisoner at Rome, or in the capacity of a minister of high authority in the Church, and that his account of the condition of the Christians in those districts determined the apostle to write the Epistle. The assumption that Silvanus was employed in the composition of the Epistle is not borne out by the expression, "by Silvanus, I have written unto you," such words according to ancient usage applying rather to the bearer than to the writer or amanuensis. Still it is highly probable that Silvanus would be consulted by Peter throughout, and that they would together read the Epistles of Paul, especially those addressed to the Churches in those districts. We have thus a solution of the difficulty arising from correspondences both of style and modes of thought in the writings of two apostles who differed so widely in gifts and acquirements. The objects of the Epistle, as deduced from its contents, coincide with these assumptions. They were:—1. To comfort and strengthen the Christians in a season of severe trial. 2. To enforce the practical and spiritual duties involved in their calling. 3. To warn them against special temptations attached to their position. 4. To remove all doubt as to the soundness and completeness of the religious system which they had already received. Such an attestation was especially needed by the Hebrew Christians, who were wont to appeal from Paul's authority to that of the elder apostles, and above all to that of Peter. The last, which is perhaps the very principal object, is kept in view throughout the Epistle, and is distinctly stated (1 Pet. v. 12). The harmony of its teaching with that of Paul is sufficiently obvious, nor is the general arrangement or mode of discussing the topics unlike that of the apostle of the Gentiles; still the indications of originality and independence of thought are at least equally conspicuous, and the Epistle is full of what the Gospel narrative and the discourses in the Acts prove to have been characteristic peculiarities of Peter. He dwells more frequently than Paul upon the future manifestation of Christ, upon which he bases nearly all his exhortations to patience, self-control, and the discharge of all Christian duties. The apostle's mind is full of one thought, the realization of Messianic hopes. In this he is the true representative of Israel, moved by those feelings which were best calculated to enable him to do his work as the apostle of the circumcision. But while Peter thus shows himself a genuine Israelite, his teaching is directly opposed to Judaizing tendencies. He belongs to the school, or, to speak more correctly, is the leader of the school, which at once vindicates the unity of the Law and Gospel, and puts the superiority of the latter on its true basis, that of spiritual development. The apostle of the circumcision says not a word in this Epistle of the perpetual obligation, the dignity or even the bearings of the Mosaic Law. He is full of the O. T.; his style and thoughts are charged with its imagery, but he contemplates and applies its teaching in the light of the Gospel; he regards the privileges and glory of the ancient people of God entirely in their spiritual development in the Church of Christ.—The *Second Epistle* of Peter presents questions of far greater difficulty than the former. We have few references, and none of a very positive character, in the writings of the early Fathers; the style differs materially from that of the First Epistle, and

\* Many Protestants disbelieve the traditions altogether, and deny that Peter ever visited Rome at all. e.g. Ellendordf (translated by Rev. E. G. Smith, in B. S. xv. 560 ff., xvi. 82 ff.). Says Dr. W. L. Alexander (in Kitto), "Whilst it is admitted as certain that Peter suffered martyrdom, in all probability by crucifixion, and as probable that this took place at Rome, it has, nevertheless, been made pretty clear that he never was for any length of time resident in that city, and morally certain that he never was bishop in the church there."

\* The old Greek mosaics, the early Christian sculpture, and the early pictures represent Peter "as a man of larger and stronger form (than PAUL), as his character was harsher and more abrupt. The quick impulses of his soul revealed themselves in the flashes of a dark eye. The complexion of his face was pale and sallow; and the short hair, which is described as entirely gray at the time of his death, curled black and thick round his temples and his chin, when the two apostles stood together at Antioch, twenty years before their martyrdom" (Conybeare & Howson, i. 224-5).

the resemblance amounting to a studied imitation, between this Epistle and that of Jude (JUDE, EPISTLE OF), seems scarcely reconcilable with the position of Peter. Doubts as to its genuineness were entertained by the greatest critics of the early Church; in the time of Eusebius it was reckoned among the disputed books, and was not formally admitted into the Canon until the year 393, at the Council of Hippo. The contents of the Epistle seem quite in accordance with its asserted origin. The salutation is followed by an enumeration of Christian blessings and exhortation to Christian duties, with special reference to the maintenance of the truth already communicated (i. 1-13). Referring then to his approaching death, the apostle assigns as grounds of assurance to believers his personal testimony as eye-witness of the Transfiguration, and the sure word of prophecy, i. e. the testimony of the Holy Ghost (14-21). The danger of being misled by false prophets is dwelt on throughout ch. ii., their covetousness and gross sensuality combined with pretences to spiritualism are described, while the overthrow of all opponents of Christian truth is predicted (ii. 1-29) in connection with prophecies touching Christ's second advent, the destruction of the world by fire, and the promise of new heavens and a new earth wherein dwell eth righteousness. After an exhortation to attend to Paul's teaching, and an emphatic warning, the Epistle closes with ascribing glory to our Lord and Saviour Jesus Christ. We may now give briefly the answers to the objections above stated:—1. With regard to its recognition by the early Church, it was not likely to be quoted frequently; it was addressed to a portion of the Church not at that time much in intercourse with the rest of Christendom: the documents of the primitive Church are far too scanty to give weight to the argument from omission. Although it cannot be proved to have been referred to by any author earlier than Origen, yet passages from Clement of Rome, Irenæus, Justin Martyr, Theophilus of Antioch, and Irenæus, suggest an acquaintance with this Epistle. Eusebius and Photius state that Clement of Alexandria wrote a commentary on all the disputed Epistles, in which this was certainly included. Didymus (fourth century) refers to it very frequently in his great work on the Trinity. It was certainly included in the collection of Catholic Epistles known to Eusebius and Origen. The silence of the Fathers is accounted for more easily than its admission into the Canon after the question as to its genuineness had been raised. There must have been positive attestation from the Churches to which it was first addressed. We know that the autographs of apostolic writings were preserved with care. All motive for forgery is absent. 2. The difference of style may be admitted. The only question is, whether it is greater than can be satisfactorily accounted for, supposing that the apostle employed a different person as his amanuensis. If we admit that some time intervened between the composition of the two works, that in writing the first the apostle was aided by Silvanus, and in the second by another, perhaps by Mark, that the circumstances of the Churches addressed by him were considerably changed, and that the second was written in greater haste, not to speak of a possible decay of faculties, the differences may be regarded as insufficient to justify more than hesitation in admitting its genuineness. The resemblance to the Epistle of Jude may be admitted without affecting our judgment unfavorably. • Supposing, as

some eminent critics have believed, that this Epistle was copied by Jude, we should have the strongest possible testimony to its authenticity; but if we accept the more general opinion of modern critics, that the writer of this Epistle copied Jude, it is incredible that a forger should imitate the least important of the apostolic writings, while Peter might choose to give the stamp of his personal authority to a document bearing so powerfully on practical and doctrinal errors in the Churches which he addressed, and, from his humility, his impressionable mind, and his self-forgetfulness when doing his Master's work, that part of this Epistle which treats of the same subjects would naturally be colored by Jude's style as the First Epistle is by Paul's. 3. The doubts as to its genuineness appear to have originated with the critics of Alexandria, where, however, the Epistle itself was formally recognized at a very early period. They rested entirely, so far as can be ascertained, on the difference of style. The opinions of modern commentators may be summed up under three heads. Many (the so-called liberal school in Germany, and some able writers in England) reject the Epistle altogether as spurious. A few consider that the first and last chapters were written by Peter or under his dictation, but that the second chapter was interpolated. But a majority (Nitzsche, Platt, Guericke, Pott, Augusti, Olshausen, Sier, Thiersch, &c.) support the genuineness and authenticity of this Epistle. (BIBLE; INSPIRATION; NEW TESTAMENT.)—Some apocryphal writings of very early date obtained currency in the Church as containing the substance of the apostle's teaching. The Preaching or Doctrine of Peter, probably identical with a work called the Preaching of Paul, or of Paul and Peter, quoted by Lactantius, may have contained some traces of the apostle's teaching. Another work, called the Revelation or Apocalypse of Peter, was held in much esteem for centuries.—The name *Cephas* occurs in Jn. i. 42; 1 Cor. i. 12, iii. 22, ix. 5, xv. 5; Gal. ii. 9, i. 18, ii. 10, 14 (the last three according to the Greek text of Lachmann and Tischendorf). It must have been the word actually pronounced by our Lord in Mat. xvi. 18, and on subsequent occasions when the apostle was addressed by Him or other Hebrews by his new name. By it he was known to the Corinthian Christians.

**Peth-a-h'ah** (fr. Heb. = whom *Jehovah* sets free, Ges.). 1. A priest, over the nineteenth course in David's reign (1 Chr. xxiv. 16).—2. A Levite in Ezra's time, who had married a foreign wife (Ezr. x. 23); probably the same who took part in the solemn service at the fast (Neh. ix. 5).—3. Son of Meshezabeel and descendant of Zerah; "at the king's (Darius's?) hand in all matters concerning the people," i. e. the Jews (xi. 24).

**Pe'thor** (Heb. *a table?* Ges.), a town of Mesopotamia where BALAAM resided (Num. xxii. 5; Deut. xxiii. 4); position unknown.

**Pe-thu'el** (Heb., probably = *man of God*, Ges.), father of the prophet JOEL (Joel i. 1).

\* **Pe'tra** (Gr. *rock*), the Greek translation of SELA, the name of the celebrated Edomite city (Is. xvi. 1 margin).

**Pe-ul'thal** (fr. Heb. = *wages of Jehovah*, Ges.), eighth son of OBED-EDOM (1 Chr. xxvi. 5).

**Pha'ath Mo'ab** (Gr.) = PAATH-MOAB (1 Esd. v. 11).

**Phae-a-reth** (fr. Gr.) = POCHERETH of Zebaim (1 Esd. v. 34).

**Phal'sar** (fr. Gr.) = PASHUR 1 (1 Esd. ix. 22).

**Phal-dal'us** [-da'yus] (fr. Gr.) = PEDAIAN 4 (1 Esd. ix. 44).

**Pha-le'as** (fr. Gr.) = PADON (1 Esd. v. 29).

**Pha'lee** (fr. Gr.) = PELEG (Lk. iii. 35).

**Phal'm** (L. fr. Heb.) = PALLU (Gen. xlv. 9).

**Phal'ti** (L. fr. Heb. = PALTÍ), the son of Luish of Gallim, to whom Saul gave MICHAL in marriage after his mad jealousy had driven DAVID forth as an outlaw (1 Sam. xiv. 44); afterward separated from Michal by Ish-bosheth and Abner at David's requirement (2 Sam. iii. 15 ff., A. V. "Phaltiel").

**Phal'ti-el** (L. fr. Heb. = PALTIEL) = PHALTI (2 Sam. iii. 15).

**Pha-nu'el**, or **Phan'u-el** (L. fr. Heb. = PENUEL, Rbn. *N. T. Lex.*), an Asherite, father of ANNA the prophetess (Lk. ii. 36).

**Phar'a-cim** [-sim] (fr. Gr.), ancestor of certain servants of the Temple who returned with Zorobabel, according to 1 Esd. v. 31; not in Ezra and Nehemiah.

**Pharaoh** [-ro] (Heb. *Par'oh*; Gr. *Pharao*; fr. Egyptian *Ouro*, with masc. art. *Pouro* = the king, Ges.; but see below), the common title of the native kings of Egypt in the Bible, corresponding to *p-ra* or *ph-ra* (= the Sun) of the hieroglyphics (so Mr. R. S. Poole, original author of this article, after the Duke of Northumberland and General Felix). As several kings are mentioned only by the title "Pharaoh" in the Bible, it is important to discriminate them.—1. *The Pharaoh of ABRAHAM* (Gen. xii.). The Scripture narrative does not afford us any clear indications for the identification of this Pharaoh. At the time when Abraham went into Egypt, according to Hales's as well as Usher's CHRONOLOGY, it is generally held that the country, or at least Lower Egypt, was ruled by the Shepherd kings, of whom the first and most powerful line was the fifteenth dynasty, the undoubted territories of which would be first entered by one coming from the E. The date at which Abraham visited Egypt Mr. Poole makes about B. C. 2081, which would accord with the time of Salatis, the head of the fifteenth dynasty, according to his reckoning.—2. *The Pharaoh of JOSEPH* (Gen. xl., &c.) was a despotic monarch, ruling all Egypt, who followed Egyptian customs, but did not hesitate to set them aside when he thought fit; who seems to have desired to gain complete power over the Egyptians; and who favored strangers. These particulars support the idea that he was an Egyptianized foreigner rather than an Egyptian. Baron Bunsen supposed that he was Sesertesen I., the head of the twelfth dynasty, on account of the mention in a hieroglyphic inscription of a famine in that king's reign. This identification, although receiving some support from a statement of Herodotus, that Sesostria, a name reasonably traceable to Sesertesen, divided the land and raised his chief revenue from the rent paid by the holders, must be abandoned, since the calamity recorded does not approach Joseph's famine in character, and the age is almost certainly too remote. If we turn to the old view that Joseph's Pharaoh was one of the Shepherd kings, we are struck with the fitness of all the circumstances of the Biblical narrative. It is stated by Eusebius that the Pharaoh to whom Jacob came was the Shepherd Apophis. Apophis belonged to the fifteenth dynasty, which was certainly of Shepherds, and the most powerful foreign line. This dynasty, according to Mr. Poole's view of Egyptian chronology, ruled for either 284 years (Africanus), or 259 years 10 months (Josephus), from about B. C. 2080. According to Hales's chronology, which Mr. Poole would slightly modify, Joseph's government fell under this dynasty, com-

mencing about B. C. 1876, during the reign of the last but one or perhaps the last king of the dynasty, possibly in the time of Apophis, who ended the line according to Africanus. This dynasty is said to have been of Phenicians. This king Mr. Poole regards as having reigned from Joseph's appointment (or, perhaps, somewhat earlier) until Jacob's death, at least twenty-six years, from B. C. about 1876 to 1850, and as having been the fifth or sixth king of the fifteenth dynasty. Wilkinson identifies this Pharaoh with Osirtasen I., of his sixteenth dynasty of Tanites, and places his date about B. C. 1740 (Rev. H. Constable, in Fairbairn).—3. *The Pharaoh of the Oppression*. The first persecutor of the Israelites (Ex. i., &c.) may be distinguished as the Pharaoh of the Oppression, especially as he commenced, and probably long carried on, the persecution. The general view is that he was an Egyptian, a king of the eighteenth or nineteenth dynasty. The chief points in favor of this are the name of the city Raameses, whence it has been argued that one of the oppressors was a king Rameses, and the probable change of line. The first king of this name known was head of the nineteenth dynasty, or last king of the eighteenth. Manetho says the Israelites left Egypt in the reign of Menptah, who was great-grandson of the first Rameses, and son and successor of the second. The view that this Pharaoh was of the beginning or middle of the eighteenth dynasty seems at first sight extremely probable, especially if the Pharaoh of Joseph was a Shepherd king; but Mr. Poole, in accordance with his view of Hebrew CHRONOLOGY, would rather make him a Shepherd king (comp. the "Assyrian," Is. lii. 4) of the sixteenth or seventeenth dynasty, whose reign, he supposes, commenced a little before the birth of MOSES, which he places B. C. 1732, and lasted upward of forty years, perhaps much more. (PHARAOH'S DAUGHTER 1.) Wilkinson supposes him Amosis or Ames, the first of the eighteenth dynasty of Theban or Diospolitan kings, and makes his date B. C. 1755; Lord Prudhoe makes the "new king" (Ex. i. 8) Rameses I., and the Pharaoh of Ex. i. 11 Rameses II. (so Mr. Constable, in Fairbairn).—4. *The Pharaoh of the Exodus* (Ex. v. &c.). What is known of him (PLAGUES, THE TEN; EXODUS, THE) is rather biographical than historical. It does not add much to our means of identifying the line of the oppressors excepting by the indications of race his character affords. His character finds its parallel among the Assyrians rather than the Egyptians. Mr. Poole says that he was reigning for about a year or more before the Exodus, which he places B. C. 1652. Wilkinson, who places the Exodus B. C. 1495, supposes him Thothmes III., the fourth or fifth monarch of the eighteenth dynasty, of Theban kings; Manetho, according to Africanus, makes him Amos, the first of that line; Lord Prudhoe makes him Pthahmen, the last of that dynasty (so Mr. Constable, in Fairbairn). (LEPER).—5. *Pharaoh, father-in-law of Mered*. In the genealogies of Judah, mention is made of "BITHIAH the daughter of Pharaoh, which MERED took" (1 Chr. iv. 18). Mr. Poole, supposing that Mered lived before, or not much after, the Exodus, thinks it perhaps less probable that an Egyptian Pharaoh would have given his daughter in marriage to an Israelite, than that a Shepherd king would have done so, before the oppression; but allows that Bithiah may have been taken captive after the Exodus. The date and the circumstances, however, are all unknown.—6. *Pharaoh, brother-in-law of Hadad the Edomite* (1 K. xi.

18 ff.). (HADAD 4.) For the identification of this Pharaoh we have his being contemporary with David and Solomon, and the name of his wife (TAHPENES); the history of Egypt at this time is extremely obscure, neither the monuments nor Manetho giving us clear information as to the kings. It appears that toward the latter part of the twentieth dynasty the high-priests of Amen (AMON), the god of Thebes, gained great power, and at last supplanted the Ramesses family, at least in Upper Egypt. At the same time a line of Tanite kings, Manetho's twenty-first dynasty, seems to have ruled in Lower Egypt. Mr. Poole supposes that the Pharaoh or Pharaohs spoken of in the Bible as ruling in the time of David and Solomon were Tanites, as Tanis was nearest to the Israelite territory. According to Africanus, the list of the twenty-first dynasty is as follows:—Smendes, 26 years; Psusennes, 46; Nephelcheres, 4; Amethnothis, 9; Osochor, 6; Psinaches, 9; Psusennes, 14; but Eusebius gives the second king 41, and the last 35 years, and his numbers make up the sum of 130 years, which Africanus and he agree in assigning to the dynasty. If we take the numbers of Eusebius, Osochor would probably be the Pharaoh to whom Hadad fled, and Psusennes II. the father-in-law of Solomon; but the numbers of Africanus would substitute Psusennes I., and probably Psinaches (so Mr. Poole).—7. *Pharaoh, father-in-law of Solomon* (1 K. iii. 1). The mention that the queen was brought into the city of David, while Solomon's house, and the Temple, and the city-wall, were building, shows that the marriage took place not later than the eleventh year of the king, when the Temple was finished, having been commenced in the fourth year (vi. 1, 37, 38). It must have taken place between about twenty-four and eleven years before Shishak's accession. Mr. Poole thinks it certain that Solomon's father-in-law was not the Pharaoh who was reigning when Hadad left Egypt. Both Pharaohs cannot yet be identified in Manetho's list. This Pharaoh led an expedition into Palestine, and took Gezer (ix. 16). (PHARAOH'S DAUGHTER 3.)—The next kings of Egypt mentioned in the Bible are SHISHAK, probably ZERAH, and So. The first and second of these were of the twenty-second dynasty, if Zerah = Userken, and the third was doubtless one of the two Shebecks of the twenty-fifth dynasty, which was of Ethiopians.—8. *Pharaoh, the opponent of Sennacherib* (Is. xxxvi. 6), Mr. Poole identifies with the Sethos whom Herodotus mentions as the opponent of Sennacherib, and who may be the Zet of Manetho, the last king of his twenty-third dynasty.—TIRHAKAH, as an Ethiopian, whether then ruling in Egypt or not, is, like So, apparently not called Pharaoh.—9. *Pharaoh-necho* (Jer. xli. 2), or *Pharaoh-nechoh* (2 K. xxiii. 29–xxiv. 7). The first mention in the Bible of a proper name with the title Pharaoh is in the case of Pharaoh-necho, who is also called Necho simply. His name is written in hieroglyphics *Neku*. This king was of the Saite twenty-sixth dynasty, of which Manetho makes him either the fifth ruler (Africanus) or the sixth (Eusebius). Herodotus calls him Nekos, and assigns to him a reign of sixteen years, which is confirmed by the monuments. He seems to have been an enterprising king, as he is related to have attempted to complete the canal connecting the Red Sea with the Nile, and to have sent an expedition of Phœnicians to circumnavigate Africa, which was successfully accomplished. At the commencement of his reign (b. c. 610) he made war against the king of Assyria, and, being encountered on his way by JOSIAH, defeated and slew the king of Judah at

Megiddo (2 K. xxiii. 29, 30; 2 Chr. xxxv. 20–24). Necho seems to have soon returned to Egypt: perhaps he was on his way thither when he deposed JEHOIAKIM king (2 K. xxiii. 30–34; 2 Chr. xxxvi. 1–4). The army was probably posted at Carchemish, and was there defeated by NEBUCHADNEZZAR in the fourth year of Necho (b. c. 607), that king not being, as it seems, then at its head (Jer. xli. 1, 2, 6, 10). This battle led to the loss of all the Asiatic dominions of Egypt (2 K. xxiv. 7).—10. *Pharaoh-hophra*, the next king of Egypt mentioned in the Bible, was the second successor of Necho, from whom he was separated by the six years' reign of Psammetichus II. The name Hophra is in hieroglyphics *Wah-(p) ra-hat*, and the last syllable is equally omitted by Herodotus, who writes Apries, and by Manetho, who writes Uaphris. He came to the throne about b. c. 589, and ruled nineteen years. Herodotus makes him the son of Psammetichus II., whom he calls Psammis, and great-grandson of Psammetichus I. Herodotus relates his great prosperity, until his army against Cyrene was routed, when the Egyptians revolting set up Amasis as king, who defeated him in battle, took him prisoner, and afterward delivered him to the Egyptians by whom he was strangled. In the Bible it is related that ZEDEKIAH, the last king of Judah, was aided by Pharaoh against Nebuchadnezzar, in fulfilment of a treaty, and that an army came out of Egypt, so that the Chaldeans were obliged to raise the siege of Jerusalem. The city was first besieged in the ninth year of Zedekiah, b. c. 590, and was captured in his eleventh year, b. c. 588. It was evidently continuously invested for a length of time before it was taken, so that most probably Pharaoh's expedition took place b. c. 590 or 589. There may, therefore, be some doubt whether Psammetichus II. be not the king here spoken of; but the siege may have lasted some time before the Egyptians could have heard of it and marched to relieve the city, and Hophra may have come to the throne as early as b. c. 590. The Egyptian army returned without effecting its purpose (Jer. xxvii. 5–8; Ez. xvii. 11–18; comp. 2 K. xxv. 1–4). Ezekiel (xxix.–xxxii.) speaks of his arrogance and of his overthrow by Nebuchadnezzar. Jeremiah (xli. 30, xli. 25, 26) yet more distinctly prophesied his end.—No subsequent Pharaoh is mentioned in Scripture, but there are predictions doubtless referring to the misfortunes of later princes until the second Persian conquest, when the prophecy "there shall be no more a prince of the land of Egypt" (Ex. xxx. 13) was fulfilled.

**Pharaoh's (see above) Daughter; Pharaoh, the Daughter of.** Three Egyptian princesses, daughters of Pharaohs, are mentioned in the Bible.—1. The preserver of MOSES, daughter of the PHARAOH 8 who first oppressed the Israelites (Ex. ii. 5–10). She appears from her conduct toward Moses to have been heiress to the throne (Heb. xi. 23 ff.). Artapanus, or Artabanus, an historian of uncertain date, calls this princess Merrhis, and her father, the oppressor, Palmanothes, and relates that she was married to Chenephres, who ruled in the country above Memphis. The tradition is apparently of little value.—2. BITHIAH, wife of Mered an Israelite, daughter of PHARAOH 5 of an uncertain date (1 Chr. iv. 18).—3. A wife of Solomon; most probably daughter of a king of the twenty-first dynasty (1 K. iii. 1, vii. 8, ix. 24). Some have supposed the Song of Solomon (CANTICLES) was written on the occasion of this marriage. She was at first brought into the city of

David (1 K. iii. 1; JERUSALEM); afterward a house was built for her (1 K. vii. 8, ix. 24; PALACE), because David's house had been rendered holy by the ark having been there (2 Chr. viii. 11). PHARAOH 7.

**Pharaoh, the Wife of.** The wife of one Pharaoh, the king who received Hadad the Edomite, is mentioned in Scripture. She is called "queen," and named TAHFENES. PHARAOH 6.

**Phar-a-tho'ni** (fr. Gr. *Pharathōn* = PIRATHON), one of the cities of Judea fortified by Bacchides during his contests with Jonathan Maccabeus (1 Mc. ix. 50). It doubtless represents an ancient PIRATHON, though hardly that of the Judges.

**Pha'res** [-reez] (Gr.) = PHAREZ or PEREZ, the son of Judah (Mat. i. 3; Lk. iii. 33; ESD. v. 5).

**Pha'rez** (fr. Heb. *perets* = *abreach*, Ges.). 1. Twin son, with Zarah, or ZERAH 1, of JUDAH and TAMAR 1 his daughter-in-law; = PHARES or PEREZ. The circumstances of his birth are detailed in Gen. xxxviii. In the genealogical lists, his name comes before his brother's (xvi. 12; Num. xxvi. 20, 21; 1 Chr. ii. 4, 6). The house also which he founded (PHARZITES) was far more numerous and illustrious than that of the Zarhites (Ru. iv. 12, 18; 1 Chr. iv. 1, ix. 4; CALEB; DAVID, &c.). Its remarkable fertility is alluded to in Ru. iv. 12, "Let thy house be like the house of Pharez, whom Tamar bare unto Judah." Of Pharez's personal history or character nothing is known. After the death, therefore, of Er and Onan without children, Pharez occupied the rank of Judah's second son (SHELAH), and moreover, from two of his sons sprang two new chief houses, those of the Hezronites and Hamulites. From Hezron's second son Ram, or Aram, sprang David and the kings of Judah, and eventually Jesus Christ. (GENEALOGY OF JESUS CHRIST.) In the reign of David the house of Pharez seems to have been eminently distinguished. A considerable number of his mighty men (Jahobeam, the Bethlehemites, Paltites, Tekoites, Ithrites, Joab, Abishai, &c.) seem to have been of the same house; and the royal house itself was the head of the family.—2. (fr. L.) = PAROSH (1 ESD. viii. 36; comp. EZR. viii. 3).

**Pha-ri'tra** (Gr.) = PERIDA or PERUDA (1 ESD. v. 33).

**Phar'i-see**, pl. **Phar'i-sees** (fr. L. *Pharisæus*; Gr. *Pharisaios*; so called from the Aram. form of Heb. participle *pārūsh*, pl. *pārūshim* = *separated*). The Pharisees were a religious party or school amongst the Jews at the time of Christ. The name does not occur either in the O. T. or in the Apocrypha; but it is usually considered that the Pharisees were essentially the same with the ASSIDEANS mentioned in 1 Mc. ii. 42, vii. 13-17, and in 2 Mc. xiv. 6. (ESSENES.)—**Authorities.** The sources of information respecting the Pharisees are mainly threefold: (1.) The writings of Josephus, who was himself a Pharisee (*Life* 2), profess to give direct accounts of their opinions (*B. J.* ii. 8, §§ 2-14; *Ant.* xviii. 1, § 2, and compare xiii. 6, § 9, and 10, §§ 5, 6, xvii. 2, § 4, xiii. 16, § 2, and *Life* 38). The value of Josephus's accounts would be much greater, if he had not accommodated them, more or less, to Greek ideas. (2.) The New Testament, including St. Paul's Epistles, in addition to the Gospels and Acts of the Apostles. (3.) The first portion of the Talmud called the Mishna, or "second law." This is by far the most important source of information respecting the Pharisees. It is a digest of the Jewish traditions, and a compendium of the whole ritual law, reduced to writing in its present form by Rabbi Jehudah the Holy, a Jew of great wealth and influence, who flourished in the

second century. He succeeded his father Simeon as patriarch of Tiberias, and held that office at least thirty years. His death some place in a year a little antecedent to 194 A. D.; others place it as late as 220 A. D., when he would have been about eighty-one years old. There is no reasonable doubt that although it may include a few passages of a later date, the Mishna was composed, as a whole, in the second century, and represents the traditions which were current amongst the Pharisees at the time of Christ (so Mr. Twissleton, original author of this article). (VERSIONS, ANCIENT [TARGUM].) Referring to the Mishna for details, it is proposed in this article I. to give a general view of the peculiarities of the Pharisees; to notice their opinions II. on a future life, and III. on free-will; IV. to make some remarks on the proselytizing spirit attributed to them at the time of Christ. I. The fundamental principle of the Pharisees common to them with all orthodox modern Jews is, that by the side of the written law regarded as a summary of the principles and general laws of the Hebrew people, there was an oral law to complete and to explain the written Law. It was an article of faith that in the Pentateuch there was no precept, and no regulation, ceremonial, doctrinal, or legal, of which God had not given to Moses all explanations necessary for their application, with the order to transmit them by word of mouth. The classical passage in the Mishna on this subject is the following:—"Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue" (*Pirke Abóth*, i.). It is not to be supposed that all the traditions which bound the Pharisees were believed to be direct revelations to Moses on Mount Sinai. In addition to such revelations, which were not disputed, although there was no proof from the written law to support them, and in addition to interpretations received from Moses, which were either implied in the written law or to be elicited from it by reasoning, there were three other classes of traditions:—

(1.) Opinions on disputed points, which were the result of a majority of votes; (2.) Decrees by prophets and wise men in different ages, carrying prohibitions farther than the written law or oral law of Moses, in order to protect the Jewish people from temptations to sin or pollution; (3.) Legal decisions of proper ecclesiastical authorities on disputed questions, some of which were attributed to Moses, some to Joshua, some to Ezra, some also to Rabbis of later date, as Hillel and Gamaliel. Viewed as a whole, they treated men like children, formalizing and defining the minutest particulars of ritual observances. The expressions of "bondage," of "weak and beggarly elements," and of "burdens too heavy for men to bear," faithfully represent the impression produced by their multiplicity. An elaborate argument might be advanced for many of them individually, but the sting of them consisted in their aggregate number, which would tend to quench the fervor and freshness of a spiritual religion. They varied in character, one class consisting of those which, admitting certain principles, were points reasonable to define; another, of points defined which were superfluously particularized; a third, of points defined where the discussion of them at all was superstitious and puerile. In order, however, to observe regulations on points of this kind, mixed with others less objectionable, and with some which, regarded from a certain point of view, were in themselves individually not unreasonable, the

Pharisees formed a kind of society. A member was called a *hâbêr* or *châbêr*, and those among the middle and lower classes who were not members were called "the people of the land," or the vulgar. Each member undertook, in the presence of three other members, that he would remain true to the laws of the association. One important condition was that a member should refrain from every thing not tithed (compare Mat. xxiii. 23; Lk. xviii. 12). It was a matter of vital importance to a Pharisee that he should be well acquainted with the Pharisæal regulations concerning what was CLEAN and UNCLEAN; for, as among the modern Hindoos (some of whose customs are very similar to those of the Pharisees), every one technically unclean is cut off from almost every religious ceremony, so, according to the Levitical law, every unclean person was cut off from all religious privileges, and was regarded as defiling the sanctuary of Jehovah (Num. xix. 20). On principles precisely similar to those of the Levitical laws (Lev. xx. 25, xxii. 4-7), it was possible to incur these awful religious penalties either by *eating* or by *touching* what was unclean in the Pharisæal sense. In reference to *eating*, independently of the slaughtering of holy sacrifices, which is the subject of two other treatises, the Mishna contains one treatise called *Hôlin* or *Chôlin*, which is specially devoted to the slaughtering of fowls and cattle for domestic use. One point in its first section is by itself vitally distinctive, "that *any thing* slaughtered by a heathen should be deemed unfit to be eaten, like the carcass of an animal that had died of itself, and like such carcass should pollute the person who carried it." For the guidance of Jewish slaughterers most minute regulations are laid down. In reference likewise to *touching* what is unclean, the Mishna abounds with prohibitions and distinctions no less minute (compare "Touch not, taste not, handle not," Col. ii. 21; also Mat. xv. 11; Lk. xi. 37-40). It would be a great mistake to suppose that the Pharisees were wealthy and luxurious, much more that they had degenerated into the vices which were imputed to some of the Roman popes and cardinals during the 200 years preceeding the Reformation. Josephus compared the Pharisees to the Stoics. He says that they lived frugally, in no respect giving in to luxury, but following the leadership of reason in what it had selected and transmitted as a good (Jos. xviii. 1, § 3). Although there would be hypocrites among them, it would be unreasonable to charge all the Pharisees as a body with hypocrisy, in the sense in which we now use the word. They must be regarded as having been some of the most intense formalists whom the world has ever seen (compare Lk. vii. 36 ff., xviii. 9-14). It was alleged against them, on the highest spiritual authority, that they "made the word of God of none effect by their traditions." This would be true in the largest sense, from the purest form of religion in the O. T. being almost incompatible with such endless forms (Mic. vi. 8); but it was true in another sense, from some of the traditions being decidedly at variance with genuine religion. (ATONEMENT, DAY OF; CORBAN; DIVORCE; FASTS; FRONTELETS; PASSOVER; SABBATH; VOW, &c.)—II. In regard to a future state, Josephus presents the ideas of the Pharisees in such a light to his Greek readers, that whatever interpretation his ambiguous language might possibly admit, he obviously would produce the impression on Greeks that the Pharisees believed in the transmigration of souls. "They say that every soul is imperishable, but that the soul

of good men only passes over (or transmigrates) into another body, while the soul of bad men is chastised by eternal punishment" (Jos. B. J. ii. 8, § 14). And two passages in the Gospels might countenance this idea: one in Mat. xiv. 2, where Herod the tetrarch is represented as thinking that Jesus was John the Baptist risen from the dead (though a different color is given to Herod's thoughts in Lk. ix. 7-9); and another in Jn. ix. 2, where the question is put to Jesus whether the blind man himself had sinned, or his parents, that he was born blind? Notwithstanding these passages, however, there does not appear to be sufficient reason for doubting that the Pharisees believed in a resurrection of the dead very much in the same sense as the early Christians. This is most in accordance with St. Paul's statement to the chief priests and council (Acts xxiii. 6; PAUL); and it is likewise almost implied in Christ's teaching, which does not insist on the doctrine of a future life as any thing new (Mat. xxii. 30; Mk. xii. 25; Lk. xx. 34-36). On this head the Mishna is an illustration of the ideas in the Gospels, as distinguishing from any mere transmigration of souls; and the peculiar phrase, "the world to come" (compare Mk. x. 30, &c.; ETERNAL 4), frequently occurs in it.—III. In reference to the opinions of the Pharisees concerning the freedom of the will, a difficulty arises from the very prominent position which they occupy in the accounts of Josephus, whereas nothing vitally essential to the peculiar doctrines of the Pharisees seems to depend on those opinions, and some of his expressions are Greek, rather than Hebrew. "There were three sects of the Jews," he says, "which had different conceptions respecting human affairs, of which one was called Pharisees, the second Sadducees, and the third Essenes. The Pharisees say that some things, and not all things, are the work of fate; but that some things are in our own power to be and not to be. But the Essenes declare that fate rules all things, and that nothing happens to man except by its decree. The Sadducees, on the other hand, take away fate, holding that it is a thing of naught, and that human affairs do not depend upon it; but in their estimate all things are in the power of ourselves, as being ourselves the causes of our good things, and meeting with evils through our own inconsiderateness" (Jos. xiii. 5, § 9). Josephus also says of the Pharisees, "When they determine that all things are done by fate, they do not take away the freedom from men of acting as they think fit; since their notion is, that it hath pleased God to make a temperament, whereby what He wills is done, but so that the will of man can act virtuously or viciously" (xviii. 1, § 3, Whiston's translation). "These ascribe all to fate (or providence), and to God; and yet allow that to act what is right or the contrary, is principally in the power of men; although fate does coöperate in every action" (B. J. ii. 8, § 14, Whiston's translation). In reference to this point, the opinion of Graetz seems not improbable, that the real difference between the Pharisees and SADDUCEES was at first practical and political. He conjectures that the wealthy and aristocratical Sadducees in their wars and negotiations with the Syrians entered into matters of policy and calculations of prudence, while the zealous Pharisees, disdaining worldly wisdom, laid stress on doing what seemed to be right, and leaving the event to God; and that this led to differences in formal theories and metaphysical statements.—IV. In reference to the spirit of proselytism among the

Pharisees, there is indisputable authority for the statement that it prevailed to a very great extent at the time of Christ (Mat. xxiii. 15); and attention is now called to it on account of its probable importance in having paved the way for the early diffusion of Christianity. Jews at the time of Christ had become scattered over the fairest portions of the civilized world. (CAPTIVITY; DISPERSION, &c.) On the day of Pentecost, Jews are said to have been assembled with one accord in one place at Jerusalem, "from every region under heaven." Admitting that this was an Oriental hyperbole (compare Jn. xxi. 25), there must have been some foundation for it in fact (Acts ii. 5-11). Now, it is not unlikely, though it cannot be *proved* from Josephus (xx. 2, § 3), that missions and organized attempts to produce conversions, although unknown to Greek philosophers, existed among the Pharisees. But, at any rate, the then existing regulations or customs of synagogues afforded facilities which do not exist now either in synagogues or Christian churches for presenting new views to a congregation (Acts xvii. 2; Lk. iv. 16). (SYNAGOGUE.) Under such auspices the proselytizing spirit of the Pharisees inevitably stimulated a thirst for inquiry, and accustomed the Jews to theological controversies. Thus there existed precedents and favoring circumstances for efforts to make proselytes, when the greatest of all missionaries (PAUL), a Jew by race, a Pharisee by education, a Greek by language, and a Roman citizen by birth, preaching the resurrection of Jesus to those who for the most part already believed in the resurrection of the dead, confronted the elaborate ritual-system of the written and oral law by a pure spiritual religion: and thus obtained the coöperation of many Jews themselves in breaking down every barrier between Jew, Pharisee, Greek, and Roman, and in endeavoring to unite all mankind by the brotherhood of a common Christianity. PROSELYTE.

**Pha'rosh** (fr. Heb.) = PAROSH (Ezr. viii. 3).

**Phar'par** (fr. Heb., probably = *swift*, Ges.), the second of the two "rivers of DAMASCUS"—"ABANA and Pharpar"—mentioned by Naaman (2 K. v. 12). The two principal streams in the district of Damascus are the *Barada* (probably = Abana) and the '*Awaj*' (probably = Pharpar):—in fact, there are no others worthy of the name of "river." The northern and principal branch of the '*Awaj*' takes its rise in a deep valley beneath the brow of Hermon, where are a number of small fountains whose waters unite beside a village called '*Arny*', the name of which it bears during the first part of its course. It thence runs first E., then S. by *Kefr Hawwar* to *Sasa*, whence, having received another stream from the W., it flows in a general easterly direction, ultimately ending in the *Bahret Hijaneh*, the most southerly of the three lakes or swamps of Damascus, about forty miles nearly E. S. E. of the point at which it started. A deep ravine E. of Hermon, sending a little tributary into the '*Awaj*', is called *Wady Barbar*, perhaps a relic of the name Pharpar (Porter, *Damascus*, i. 299 ff., and in Kitto).

**Phar'zites** (fr. Heb.), the = the descendants of PHAREZ, the son of Judah (Num. xxvi. 20).

**Pha-se'ah** (fr. Heb.) = PASKAH 2 (Neh. vii. 51).

**Pha-se'lls** (Gr.), a town on the coast of Asia Minor, on the confines of LYCIA and PAMPHYLIA, and hence ascribed by ancient writers sometimes to one and sometimes to the other. Its commerce was considerable in the sixth century B. C., for in the reign of Amasis it was one of a number of Greek towns

which carried on trade somewhat in the manner of the Hanseatic confederacy in the middle ages. In later times Phaselis was distinguished as a resort of the Pamphylian and Cilician pirates. Phaselis itself stood on a rock of 50 or 100 feet elevation above the sea, and was joined to the main by a low isthmus, in the middle of which was a lake, now a pestiferous marsh. On the eastern side of this were a closed port and a roadstead, and on the western a larger artificial harbor, formed by a mole run out into the sea. The remains of this may still be traced to a considerable extent below the surface of the water. The Phaselites having joined the piratical league, lost their independence and their town-lands in the war waged by the Roman consul Publius Servilius Isauricus in 77-75 B. C. In the interval between the growth of the Cilician piracy and the Servilian expedition the Romans are represented as writing to Phaselis and other places, requiring that Simon the high-priest and the Jewish people should not be harmed, and that all Jewish fugitive criminals among them should be delivered up to Simon for punishment (1 Mc. xv. 23).

**Phas'l-rom** (Gr.). An Arab tribe, "the children of Phasion" (1 Mc. ix. 66), were defeated by Jonathan.

**Phas'sa-ron** = PASHUR (1 Esd. v. 25).

**Ph'e-be** (L. *Phæbe*, fr. Gr. *Phoibē* = *pure, bright, radiant*; an epithet of DIANA or of the moon), a "servant of the Church at CENCHREA," commended to the Roman Christians by the Apostle Paul as "a succorer of many and of myself also" (Rom. xvi. 1, 2). DEACONESS.

**Ph'e-ni'ce**, or **Ph'e-nice** [-nis] (L. *Phœnice*, fr. Gr. *Phoinikē* = *date-land*, L. & S.; see PALM-TREE). 1. The country or region commonly known as PHENICIA (Acts xi. 19, xv. 3).—2. (Gr. *Phoinix* = *date-palm*, PALM-TREE.) Phenice, more properly *Phœnix* or *Phœnix*, a town or haven in Crete on the southern coast (Acts xxvii. 12). The haven lay "toward the S. W. and N. W.," i. e. (so Meyer) the harbor formed such a curve, that one shore stretched away toward the N. W. and another toward the S. W. Another explanation is given under PAUL (p. 822). Mr. James Smith, of Jordanhill, and others place Phenice at the modern *Lutro*, where (so Captain Spratt) "is the only bay W. of FAIR HAVENS, in which a vessel of any size could find shelter during the winter months."

**Ph'e-ni' el-a** [fee-nish'e-ah or fee-nish'yah] (L. *Phœnicia*, fr. Gr. = *date-land* or *palm-land* = PHENICE), a tract of country of which TYRE and SIDON were the principal cities, to the N. of PALESTINE, along the coast of the Mediterranean Sea; bounded by that sea on the W., and by the mountain-range of LEBANON on the E. The native name of Phenicia was *Kēna'an* (CANAAN) or *Knā*, signifying *lowland*, so named in contrast to the adjoining ARAM, i. e. *highland*, the Hebrew name of SYRIA. The length of coast to which the name of Phenicia was applied varied at different times, and may be regarded under different aspects before and after the loss of its independence. 1. What may be termed Phenicia Proper was a narrow, undulating plain, extending from the pass of *Rās el-Beydā* or *Abyad*, the *Promontorium Album* (= *White Promontory*) of the ancients, about six miles S. of Tyre, to the *Nahr el-Awaly*, the ancient Boetrenus, two miles N. of Sidon. The plain is only twenty-eight miles in length. Its average breadth is about a mile; but near Sidon the mountains retreat to a distance of two miles, and near Tyre to a distance of five miles.

2. A still longer district, which afterward became fairly entitled to the name of Phenicia, extended up the coast to a point marked by the island of Aradus (ARVAD), and by Antaradus toward the N.; the southern boundary remaining the same as in Phenicia Proper. Phenicia, thus defined, is estimated to have been about 120 miles in length; while its breadth, between Lebanon and the sea, never exceeded twenty miles, and was generally much less. Scarcely sixteen geographical miles farther N. than Sidon was Berytus (BEROTHAN?), with a roadstead so well suited for the purposes of modern navigation that, under the modern name of *Beirut*, it has eclipsed both Sidon and Tyre as an emporium for Syria. Still farther N. was Byblus (GEBAL, now *Jebeil*), inhabited by seamen and calkers. Then came Tripolis (now *Tarbulus*), said to have been founded by colonists from Tyre, Sidon, and Aradus, with three distinct towns, a furlong apart. Toward the extreme point N. was Aradus itself (ARVAD), situated, like Tyre, on a small island near the mainland, and founded by exiles from Sidon. The whole of Phenicia Proper is well watered by various streams from the adjoining hills, the two largest being *Nahr el-Kdsimtyeh* (called *el-Litany* in its upper part; probably the ancient Leontes), a few miles N. of Tyre, and the Bostrenus already mentioned. The soil is fertile (PALESTINE, *Botany*, &c.), except between the Bostrenus and *Beirut*. The havens of Tyre and Sidon afforded water of sufficient depth for all the requirements of ancient navigation, and Lebanon, in its extensive forests, furnished what then seemed a nearly inexhaustible supply of timber for ship-building.—In reference to the period when the PHENICIANS had lost their independence, scarcely any two Greek and Roman writers give precisely the same geographical boundaries to Phenicia. Ptolemy makes the river Eleutherus (probably the *Nahr el-Kebir*) the N. boundary, and the river Chorseus (a small stream S. of Dor) the S. boundary. Strabo represents Phenicia as the district between Orthosia (ORTHOSIAS) and Pelusium (SIN). In the O. T., the word Phenicia does not occur. In the Apocrypha, it is not defined, though "PHENICE" (= Phenicia) is spoken of as being, with CELOSRIA, under one military commander (2 Mc. iii. 5, 8, viii. 8, x. 11; 3 Mc. iii. 15). In the N. T. "Phenice" occurs in the A. V. of Acts xi. 19, xv. 3, and "Phenicia" only in xxi. 2; but not one of these passages affords a clew as to how far the writer deemed Phenicia to extend.

**Phœnicians** [fee-nish'yanz] = the race who in earliest recorded history inhabited PHENICIA, and who were the great maritime and commercial people of the ancient world. Without dwelling on matters which belong more strictly to the articles TYRE and SIDON, it may be proper to touch on certain points connected with the language, race, trade, and religion of the Phœnicians, which may tend to throw light on Biblical history and literature.—I. The Phœnician *language* belonged to that family of languages now generally called Shemitic. (SEMITIC LANGUAGES.) It is in fact so closely allied to Hebrew, that Phœnician and Hebrew, though different dialects, may be practically regarded as the same language. This may be shown in the following way:—1. Testimony is borne to the kinship of the two languages by Augustine and Jerome, in whose time Phœnician or Carthaginian was still a living language. 2. A passage of Carthaginian preserved in the *Pœnulus* of Plautus, and accompanied by a Latin translation as part of the play, is intelligible through Hebrew to Hebrew scholars. 3. Very many Phœ-

nician and Carthaginian names of places and persons, destitute of meaning in Greek and Latin, become significant in Hebrew. 4. The Phœnician inscriptions preserved to the present day can all be interpreted, with more or less certainty, through Hebrew. Such inscriptions are of three kinds:—1st, on gems and seals; 2dly, on coins of the Phœnicians and of their colonies; 3dly, on stone.—II. Concerning the original *race* to which the Phœnicians belonged, nothing can be known with certainty, because they are found already established along the Mediterranean Sea at the earliest dawn of authentic history, and for centuries afterward there is no record of their origin. According to Herodotus (vii. 89), they said of themselves in his time that they came in days of old from the shores of the Red Sea; and in this there would be nothing improbable, as they spoke a language cognate to that of the Arabians, who inhabited the E. coast of that sea. Still neither the truth nor the falsehood of the tradition can now be proved. But there is one point respecting their race which can be proved to be in the highest degree probable, and which has peculiar interest as bearing on the Jews, viz. that the Phœnicians were of the same race as the Canaanites. This remarkable fact, which, taken in connection with the language of the Phœnicians, leads to some interesting results, is rendered probable by the following circumstances:—1. The native name of PHENICIA was Canaan = *Iowland*. This name was well given to the narrow slip of plain between the Lebanon and the Mediterranean Sea, in contrast to the elevated mountain-range adjoining. 2. Augustine states that the peasants in his part of Africa (the Carthaginian Phœnicians), if asked of what race they were, would answer, in Punic or Phœnician, "Canaanites." 3. The names of persons and places in the land of Canaan—not only when the Israelites invaded it, but likewise previously, when "there were yet but a few of them," and Abraham is said to have visited it—were Phœnician or Hebrew: e.g. Abimelech = *Father of the king* (Gen. xx. 2); Melchizedek = *King of righteousness* (xiv. 18); Kirjath-sepher = *city of the book* (Josh. xv. 15).—III. In regard to the Phœnician *trade*, as connected with the Israelites, the following points are worthy of notice: 1. Up to the time of David, not one of the twelve tribes seems to have possessed a single harbor on the sea-coast; they could not therefore become a commercial people. But when DAVID had conquered Edom, an opening for trade was afforded to the Israelites. The command of Ezion-geber near Elath, in the land of Edom, enabled them to engage in the navigation of the Red Sea. As they were novices, however, at sailing, as the navigation of the Red Sea, owing to its currents, winds, and rocks, is dangerous even to modern sailors, and as the Phœnicians, during the period of the independence of Edom, were probably allowed to trade from Ezion-geber, it was politic in SOLOMON to permit the Phœnicians of Tyre to have docks, and build ships at Ezion-geber on condition that his sailors and vessels might have the benefit of their experience. (HIRAM; OPHIR; TARSHISH.) 2. After the division into two kingdoms, the curtain falls on any commercial relation between the Israelites and Phœnicians until it is intimated that Israelites were sold as slaves by Phœnicians. It was a custom in antiquity, when one nation went to war against another, for merchants to be present in one or other of the hostile camps, in order to purchase prisoners of war as slaves (1 Mc. iii. 41; 2 Mc. v. 14). Now, this practice is alluded to in a threatening manner

against the Phenicians by the prophets (Joel iii. 4, and Am. i. 9, 10), about 800 B. C. The circumstances which led to this state of things may be thus explained. After the division of the two kingdoms, there is no trace of any friendly relation between the kingdom of Judah and the Phenicians (comp. 1 K. xvi. 31). Jehoshaphat's attempt to renew the trade of the Jews in the Red Sea failed, and in the reign of Jehoram, Jehoshaphat's son, Edom revolted from Judah, and established its independence; so that if the Phenicians wished to dispatch trading-vessels from Ezion-geber, Edom was the power which it was mainly their interest to conciliate, and not Judah. Under these circumstances, the Phenicians seem not only to have purchased and sold again as slaves, and probably in some instances to have kidnapped, inhabitants of Judah, but even to have sold them to their enemies the Edomites. 3. The only other notice in the O. T. of trade between the Phenicians and the Israelites is in Ezekiel's account of the trade of Tyre (Ez. xxvii. 17). While this account supplies valuable information respecting the various commercial dealings of the most illustrious of Phenician cities, it likewise makes direct mention of the exports to it from Palestine. (BALM; HONEY; OIL; WHEAT.) Heeren (*Historical Researches*, ii. 117) suggests, that the fact of Palestine being, as it were, the granary of Phenicia, explains in the clearest manner the lasting peace between the two countries. (COLORS; COMMERCE; GLASS.)

IV. The religion of the Phenicians is a subject of vast extent and considerable perplexity in details, but of its general features as bearing upon the religion of the Hebrews there can be no doubt. As opposed to Monotheism, it was a Pantheistical personification of the forces of nature, and in its most philosophical shadowing forth of the Supreme powers, it may be said to have represented the male and female principles of production. In its popular form, it was especially a worship of the sun, moon, and five planets, or, as it might have been expressed according to ancient notions, of the seven planets—the most beautiful, and perhaps the most natural, form of idolatry ever presented to the human imagination. These planets, however, were not regarded as lifeless globes of matter, obedient to physical laws, but as intelligent animated powers, influencing the human will, and controlling human destinies. (ASHERAH; ASHTORETH; BAAL, &c.) It will be proper here to point out certain effects which the circumstance of their being worshipped in Phenicia produced upon the Hebrews. 1. Their worship was a constant temptation to Polytheism and IDOLATRY. It can scarcely be doubted that the Phenicians, as a great commercial people, were more generally intelligent, and as we should now say civilized, than the inland agricultural population of Palestine. When the simple-minded Jews, therefore, came in contact with a people more versatile, and, apparently, more enlightened than themselves, but who nevertheless, either in a philosophical or in a popular form, admitted a system of Polytheism,

an influence would be exerted on Jewish minds, tending to make them regard their exclusive devotion to their own one God, Jehovah, however transcendent His attributes, as unsocial and morose. (SOLOMON; AHAB, &c.) 2. The Phenician religion was likewise in other respects deleterious to the inhabitants of Palestine, being in some points essentially demoralizing. For example, it sanctioned the dreadful superstition of burning children as sacrifices to a Phenician god (Jer. xix. 5, comp. xxxii. 35). Again, parts of the Phenician religion, especially the worship of Astarte (ASHTORETH), tended to encourage dissoluteness in the relations of the sexes, and even to sanctify impurities of the most abominable description. (HARLOT; SODOMITE.)—V. The most important intellectual invention of man, that of letters, was universally asserted by the Greeks and Romans to have been communicated by the Phenicians to the Greeks (Hdt. v. 57, 58). It was an easy step from this to believe, as many of the ancients believed, that the Phenicians invented letters (Lucan, *Pharsalia*, iii. 220, 221). SHEMITIC LANGUAGES; WRITING.

**Pher'es-ites** (fr. Gr.) = PERIZZITES (1 Esd. viii. 69; compare Ezr. ix. 1).

**Pher'e-zite, Pher'e-zites** (fr. Gr.) = PERIZZITE, PERIZZITES (Jd. v. 16; 2 Esd. i. 21).

\* **Phl-be'seth** = PI-BESETH (Ez. xxx. 17, in some copies).

**Ph'chol** [-kol] (L. fr. Heb. = *mouth of all*, i. e. all-commanding, Ges.), chief captain of the army of ABIMELECH, king of the Philistines of Gerar in the days of both Abraham (Gen. xxi. 22, 23) and Isaac (xxvi. 26). Phichol may be (so Kitto, Ayre, &c.) an official title borne by different persons (compare ABIMELECH, RAB-MAG, &c.).

**Phil-a-del'phi-a** [-fe-ah; in L. pron. fil-a-del-fi'ah] (L. fr. Gr. = city of brotherly love, L. & S.), a town on the confines of LYDIA and Phrygia *Katak-kau-mené* (i. e. *entirely burnt*), built by Attalus II. Philadelphus, king of PERGAMOS, probably as a mart for the great wine-producing region (the *Katak-kau-mené*), which was 500 stades (about 60 miles) long and 400 broad. It was situated on the lower slopes of Mt. Tmolus, on the southern side of the valley of the *Aim-é-ghiu Sou* (a river, probably = the Cogamus of antiquity), and was 27 miles S. E. of SARDIS. Philadelphia came under the Roman power with the rest of this region (ASIA) B. C. 133. It was taken by

Alia Shehr — ancient Philadelphia.—From Macfarlane's *Apocalyptic Churches*.—(Fec.)

the Turks under Bajazet I. A. D. 1390, having made a gallant defence, and held out against them longer than any other town in Asia Minor. It is still represented by a town called *Allah-shehr* (city of God.)<sup>1</sup> Its elevation is 952 feet above the sea. The region around is highly volcanic, and, geologically speaking, belongs to the district of Phrygia *Katakekau-mene*, on the western edge of which it lies. The original population of Philadelphia seems to have been Macedonian. There was, as appears from Rev. iii. 9, a synagogue of Hellenizing Jews there, as well as a Christian church. The locality continued to be subject to constant earthquakes which, in the time of Strabo, rendered even the town-walls of Philadelphia unsafe. The expense of reparation was constant, and hence perhaps the poverty of the members of the Christian Church (Rev. iii. 8).

**Phil-lar'ches** [-keez] (L. fr. Gr., see below). This word occurs as a proper name in A. V. in 2 Mc. viii. 32, where it is really the name of an office = the commander of the cavalry.

**Phil-le'mon** (Gr. *loving, affectionate*), the Christian to whom Paul addressed his Epistle in behalf of ONESIMUS. He was a native probably of Colosse, or at all events lived in that city when the apostle wrote to him; for Onesimus and Archippus whom Paul associates with Philemon in Phn. 1, 2, were Colossians (Col. iv. 9, 17). It is related that Philemon became bishop of Colosse, and died as a martyr under Nero. He was evidently a man of property and influence, the head of a numerous household, and exercising an expensive liberality toward his friends and the poor in general (Phn. 4-7). He was indebted to the Apostle Paul for his personal participation in the Gospel (ver. 19). It is not certain under what circumstances they became known to each other. It is evident that, on becoming a disciple, he gave no common proof of the sincerity and power of his faith. His character, as shadowed forth in the Epistle to him (ver. 5, 7, 21, &c.), is one of the noblest which the sacred record makes known to us (so Prof. Hackett).

**Phil-le'mon** (see above), the **Epis'tle of Paul to**, one of the letters (the others are Ephesians, Colossians, Philippians) which the apostle wrote during his first imprisonment at Rome. (COLOSSIANS, EPISTLES 70.) The time when PAUL wrote may be fixed with much precision. The apostle at the close of the letter expresses a hope of his speedy liberation. Presuming that he had good reasons for such an expectation, and that he was not disappointed in the result, we may conclude that this letter was written by him about A. D. 63, or early in A. D. 64.—Nothing is wanted to confirm the genuineness of the Epistle. The external testimony is unimpeachable. Ignatius thrice uses the Greek phrase translated in Phn. 20, "Let me have joy of thee." The Canon of Muratori enumerates this as one of Paul's Epistles. Tertullian alludes to it as admitted by Marcion into his collection. Origen and Eusebius include it among the universally acknowledged writings of the early Christian times. The style and historical allusions of the Epistle accord with its being from Paul. Baur would divest it of its historical character, and make it the personified illustration, from some

later writer, of the idea that Christianity unites and equalizes in a higher sense those whom outward circumstances have separated. But he does not impugn the external evidence, and his linguistic objections to Paul's authorship must be pronounced unfounded and frivolous.—The *occasion and object* are indicated by the letter itself. Paul, so intimately connected with the master (PHILEMON) and the servant (ONESIMUS), was anxious naturally to effect a reconciliation between them. He wished also to give Philemon an opportunity of manifesting his Christian love in the treatment of Onesimus, and his regard for his spiritual teacher and guide. Paul used his influence with Onesimus (ver. 12) to induce him to return to Colosse, and place himself again at the disposal of his master. On his departure, Paul put into his hand this letter as evidence that Onesimus was a true and approved disciple of Christ, and entitled as such to be received not as a servant, but above a servant, as a brother in the faith, as the representative and equal in that respect of the apostle himself, and worthy of the same consideration and love. He identifies himself with Onesimus, intercedes for him as his own child, promises reparation if he had done any wrong, demands for him not only a remission of all penalties, but the reception of sympathy, affection, Christian brotherhood, and while he solicits these favors for another, consents to receive them with the same gratitude and sense of obligation as if they were bestowed on himself.—The *result* of the appeal cannot be doubted. It may be assumed from the character of Philemon that the apostle's intercession for Onesimus was not unavailing. Surely, no fitting response to his pleadings for Onesimus could involve less than a cessation of every thing oppressive and harsh in his civil condition, as far as it depended on Philemon to mitigate or neutralize the evils of a legalized system of bondage, as well as a cessation of every thing which violated his rights as a Christian. Many of the best critics construe expressions in ver. 14 and 21 as conveying a distinct expectation on the part of Paul that Philemon would liberate Onesimus. Nearly all agree that he could hardly have failed to confer on him that favor, even if not requested in words, after such an appeal to his humanity and justice. The Epistle to Philemon has an *æthetical character* which distinguishes it from all the other Epistles. It is a model of delicacy and skill. The writer had peculiar difficulties to overcome; but Paul showed a degree of self-denial and a tact in dealing with them, which in being equal to the occasion could hardly be greater (so Prof. Hackett, original author of this article). BIBLE; CANON; EPISTLE; INSPIRATION; NEW TESTAMENT.

**Phil-le'tus** (L. fr. Gr. = *to be loved, worthy of love*, L. & S.), possibly a disciple of HYMENEUS, with whom he is associated in 2 Tim. ii. 17. "They appear," says Waterland, "to have believed the Scriptures of the O. T., but misinterpreted them, allegorizing away the doctrine of the Resurrection, and resolving it all into figure and metaphor. The delivering over unto Satan seems to have been a form of excommunication declaring the person reduced to the state of a heathen; and in the apostolical age it was accompanied with supernatural or miraculous effects upon the bodies of the persons so delivered." According to Walchius, they made "RESURRECTION" = the knowledge and profession of the Christian religion, or regeneration and conversion. The names of Philetus and Hymeneus occur separately among those of Cesar's household

<sup>1</sup> Rev. H. Christmas (in Fairbairn) says the Turkish name "is not *Allah Shehr* (God's city), but *Ala Shehr* or *Ala Shehr* (the beautiful city)." It is not venerated by the Turks, but its situation is highly picturesque, especially when viewed from the N. E., being principally built on four or five hills, regular in figure, like truncated pyramids. The modern town, ill-built and dirty, contains nearly 15,000 inhabitants, one-fifth Greek Christians.

whose relics have been found in the Columbaria at Rome.

**Phil'ip** (fr. Gr. *Philippos* = *fond of horses*, L. & S.). 1. Father of ALEXANDER THE GREAT (1 Mc. i. 1, vi. 2); king of MACEDONIA, B. C. 359-336.—2. A Phrygian, left by ANTIOCHUS EPIPHANES as governor at Jerusalem (about B. C. 170), where he behaved with great cruelty toward the Jews (2 Mc. v. 22, vi. 11, viii. 8); commonly identified with—3. The foster-brother (ix. 29) of Antiochus Epiphanes, whom the king upon his death-bed appointed regent of Syria and guardian of his son ANTIOCHUS V., to the exclusion of LYSIAS 1 (B. C. 164). He returned from Persia to assume the government, and occupied Antioch, which Lysias stormed (1 Mc. vi. 14, 15, 55, 56, 63). He was put to death by Lysias (so Jos. xii. 9, § 7; compare 2 Mc. xiii. 23); but 2 Mc. ix. 29 says, he went into Egypt to Ptolemy Philometor after the death of Antiochus Epiphanes.—4. Philip V., king of Macedonia, B. C. 220-179. His wide and successful endeavors to strengthen and enlarge the Macedonian dominion brought him into conflict with the Romans, then engaged in the critical war with Carthage. In 1 Mc. viii. 5, the defeat of Philip at Cynoscephalæ (B. C. 197) is coupled with that of PERSEUS as one of the noblest triumphs of the Romans.

**Phil'ip** (see above) the **A-pô's'tle** (see **APOSTLE**) was of Bethsaida, the city of ANDREW and PETER (Jn. i. 44), and apparently was among the Galilean peasants of that district who flocked to hear the preaching of John the Baptist. The manner in which St. John speaks of him, the repetition by him of the self-same words with which Andrew had brought to Peter the good news that the Christ had at last appeared, all indicate a previous friendship with the sons of Jona and of Zebedee, and a consequent participation in their Messianic hopes (so Prof. Plumptre, original author of this article). The close union of the two in Jn. vi. and xii. suggests that he may have owed to Andrew the first tidings that the hope had been fulfilled. The statement that Jesus *found* him (Jn. i. 43) implies a previous seeking. To him first in the whole circle of the disciples were spoken the words "Follow me." As soon as he has learned to know his Master, he is eager to communicate his discovery to another who had also shared the same expectations. He speaks to NATHANIEL, probably on his arrival in Cana (compare xxi. 2), as though they had not seldom communed together, of the intimations of a divine kingdom which they found in their sacred books. We may well believe that he, like his friend, was an "Israelite indeed in whom there was no guile." In the lists of the twelve apostles, in the Synoptic Gospels, his name is as uniformly at the head of the second group of four, as the name of Peter is at that of the first (Mat. x. 3; Mk. iii. 18; Lk. vi. 14); and the facts recorded by St. John give the reason of this priority. Philip, apparently, was among the first company of disciples who were with the Lord at the commencement of His ministry, at the marriage of Cana, and on His first appearance as a prophet in Jerusalem (Jn. ii.). When John was cast into prison, and the work of declaring the glad tidings of the kingdom required a new company of preachers, we may believe that he, like his companions and friends, received a new call to a more constant discipleship (Mat. iv. 18-22). When the Twelve were specially set apart for their office, he was numbered among them. The first three Gospels tell us nothing more of him individually. St. John records a few signifi-

cant utterances. Clement of Alexandria assumes that Philip was the disciple who said "Lord, suffer me first to go and bury my father" (Mat. viii. 21). Jesus, before feeding the 5,000, asked Philip, in order to prove him, "Whence shall we buy bread, that these may eat?" Philip's answer, "Two hundred pennyworth of bread is not sufficient for them that every one of them may take a little," shows how little he was prepared for the work of divine power that followed (Jn. vi. 5 ff.). Some Gentile proselytes ("Greeks," A. V.), who had come to keep the Passover at Jerusalem, desired to see Jesus. "Philip cometh and telleth Andrew, and again Andrew and Philip tell Jesus" (xii. 20-22). It was part of his childlike simplicity to express the craving, "Lord, show us the Father, and it sufficeth us." And the answer belonged especially to him. He had been eager to send others to see Jesus. He had thought of the glory of the Father as consisting in something else than the Truth, Righteousness, Love, that he had witnessed in the Son. "Have I been so long time with you, and yet hast thou not known me, Philip? He, that hath *seen* me, hath seen the Father. How sayest thou, *then*, Show us the Father?" (xiv. 8, 9). No other fact connected with the name of Philip is recorded in the Gospels. His close relation to the sons of Zebedee and Nathanael might lead us to think of him as one of the two unnamed disciples in the list of fishermen on the Sea of Tiberias (xxi.). He is among the company of disciples at Jerusalem after the Ascension (Acts i. 13), and on the day of Pentecost. After this, all is uncertain and apocryphal. He is mentioned by Clement of Alexandria as having had a wife and children, and as having sanctioned the marriage of his daughters instead of binding them to vows of chastity, and is included in the list of those who had borne witness of Christ in their lives, but had not died what was commonly looked on as a martyr's death. Polycrates, bishop of Ephesus, speaks of him as having fallen asleep in the Phrygian Hierapolis, as having had two daughters who had grown old unmarried, and a third, with special gifts of inspiration, who had died at Ephesus. There seems, however, in this mention of the daughters of Philip, to be some confusion between the apostle and PHILIP THE EVANGELIST. The apocryphal *Acts of Philip* are utterly wild and fantastic. Different traditions represent Phrygia, Greece and Parthia, and Scythia, as the scene of his labors.

**Phil'ip** (see above) the **E-van-g'e-list** (see **EVANGELIST**) is first mentioned in the account of the dispute between the Hebrew and Hellenistic disciples in Acts vi. He is one of the Seven appointed to superintend the daily distribution of food and alms, and so to remove all suspicion and partiality. (DEACON.) The persecution, of which Saul was the leader, must have stopped the "daily ministrations" of the Church. The teachers who had been most prominent were compelled to take to flight, and Philip was among them. The city of Samaria is the first scene of his activity (Acts viii.). He is the precursor of St. Paul in his work, as Stephen has been in his teaching. It falls to his lot, rather than to that of an apostle, to take that first step in the victory over Jewish prejudice and the expansion of the Church, according to its Lord's command. The scene which brings Philip and Simon the Sorcerer (SIMON MAGUS) into contact with each other, in which the magician has to acknowledge a power over nature greater than his own, is interesting, rather as belonging to the life of the heresiarch

than to that of the Evangelist. This step is followed by another. He is directed by an angel of the Lord to take the road that led down from Jerusalem to GAZA on the way to Egypt. A chariot passes by in which is a man of another race, whose complexion or dress showed him to be a native of Ethiopia. This Ethiopian eunuch, converted through Philip's instrumentality, is then baptized by him. A brief sentence tells us that Philip continued his work as a preacher at Azotus (Ashdod) and among the other cities that had formerly belonged to the Philistines, and, following the coast-line, came to CESAREA. Here, for a long period, not less than eighteen or nineteen years, we lose sight of him. Cesarea, however, seems to have been the centre of his activity. The last glimpse of him in the N. T. is in the account of St. Paul's journey to Jerusalem. To his house, as to one well known to them, St. Paul and his companions turn for shelter. He has four daughters, who possess the gift of prophetic utterance, and who apparently give themselves to the work of teaching instead of entering on the life of home (xxi. 8, 9). He is visited by the prophets and elders of Jerusalem. (AGABUS; PAUL.) One tradition places the scene of his death at Hierapolis in Phrygia (PHILIP THE APOSTLE); another makes him end his days at Cesarea; according to another, he died bishop of Tralles. The house in which he and his daughters had lived was pointed out to travellers in the time of Jerome.

**Philip Herod** (see above, and HEROD I., II. HEROD IV., V.

**Philippi** (L. fr. Gr., named from PHILIP I; see below), a city of MACEDONIA, in a plain between the ranges of Pangæus and Hæmus, about nine miles from the sea, and N. W. of the island of Thasos. St. Paul, on his first visit to Macedonia with Silas, embarked at Troas, made a straight run to Samothrace, and from thence to NEAPOLIS (the port of Philippi), which he reached on the second day (Acts xvi. 11). A steep track, following mainly the course of an ancient paved road, leads from Neapolis over a

the modern Turkish village *Bereketti*. This, though some miles distant (so Prof. Hackett), is the nearest village to the ancient ruins, which are not at the present time inhabited at all. Near the second cemetery are some ruins on a slight eminence, and also a khan. The site of the ancient city is a mile or two beyond, on the opposite side of a river-bed sixty-six feet wide, through which a winter torrent flows. The walls may still be traced. Their direction is adjusted to the course of the stream; and at 350 feet from its margin is a gap indicating where the gate once was, probably the gate at which PAUL and his company entered, and by which they went out to the "prayer-meeting" on the river-bank where they became acquainted with LYDIA (Acts xvi. 18 ff.). At Philippi the "damsel with a spirit of DIVINATION" having been dispossessed, PAUL and Silas were summarily seized and imprisoned. Philippi was "a chief city of the province of Macedonia" (Hackett, &c.), or "the first city of the district of Macedonia to which Paul came" (so Conybeare & Howson, Winer, &c.), not (as the A. V. text renders) "the chief city of that part of Macedonia" (12). Paul visited Philippi probably twice subsequently (xx. 1, 2, 6), and wrote to the Christians there the Epistle to the Philippians (see next article). The Philippi which he visited was a Roman colony founded by ARGENTUS, and the remains which strew the ground are no doubt derived from that city. On this plain had been fought (B. C. 42) the battle of Philippi, in which Brutus and Cassius were defeated by Octavius (Augustus) and Antony. The establishment of Philip of Macedonia was probably not exactly on the same site, but may have been on the elevation near the second cemetery. Philip, when he acquired possession of the site, found there a town named *Datus* or *Datum*, probably in its origin a factory of the Phœnicians, who were the first that worked the gold-mines in the mountains here, as in the neighboring Thasos. The proximity of the gold-mines was of course the origin of so large a city as Philippi, but the plain in which it lies is of extraordinary fertility.

The ipostion too was on the main road from Rome to Asia, the Egnatian Way, which from Thessalonica to Constantinople followed the same course as the existing post-road. The ruins of Philippi are spread over several acres, but present no striking feature except two lofty gateways, supposed to belong to the time of Claudius. Traces of an amphitheatre, theatre, or stadium—for it does not clearly appear which—are also visible in the direction of the hills on the N. E. side. Inscriptions both in the Latin and Greek languages, but more generally in the former, are found.

**Philippi-ans** (= *people* [i. e. Christians] of PHILIPPI), **Epistle to the**. 1. The canonical authority, Pauline authorship and integrity of this Epistle have been almost unanimously acknowledged. Marcion (A. D. 140) in the earliest known Canon held common ground with the Church touching the authority of this Epistle: it appears in the Muratorian Fragment; among the "acknowledged" books in Eusebius; in the lists of the Council of Laodicea, A. D. 365, and the Synod of Hippo, 393; and in all sub-

Ruins at Philippi.—From Devereux's *Shores of the Mediterranean*.—(Fdn.).

line of hills anciently called Symbolum to Philippi, the solitary pass being about 1,600 feet above the sea-level. Between the foot of Symbolum and the site of Philippi, two Turkish cemeteries are passed, the gravestones of which are all derived from the ruins of the ancient city, and nearly off against the one first reached, toward the middle of the plain, is

sequent lists, as well as in the Peshito and later versions. Even contemporary evidence may be claimed for it. Philippian Christians who had contributed to the collections for St. Paul's support at Rome, who had been eye and ear witnesses of the return of Epaphroditus and the first reading of St. Paul's Epistle, may have been still alive at Philippi when Polycarp wrote (A. D. 107) his letter to them, in which he refers to St. Paul's Epistle as a well-known distinction belonging to the Philippian Church. It is quoted as St. Paul's by Irenæus, Clement of Alexandria, and Tertullian. A quotation from it (Phil. ii. 6) is found in the Epistle of the Churches of Lyons and Vienne, A. D. 177. The testimonies of later writers are innumerable. (CANON.)—2. *Where written.* The constant tradition that this Epistle was written at Rome, by St. PAUL in his captivity, was impugned first by Oeder (1731), who, disregarding the fact that the apostle was in prison (i. 7, 13, 14) when he wrote, imagined that he was at Corinth; and then by Paulus (1799), Schulz (1829), Böttger (1837), and Rillicet (1841), in whose opinion the Epistle was written during the apostle's confinement at Cesarea (Acts xxiv. 23); but the references to the "palace" (Gr. *praetorium*, Phil. i. 13; see *PRÆTORIUM*), and to "Cesar's household" (iv. 22), to his extreme uncertainty of life connected with the decision of his case (i. 19, 20, ii. 17, iii. 10), and to the dissemination of the Gospel (i. 12–18), seem to point to Rome rather than to Cesarea.—3. *When written.* Assuming, then, that the Epistle was written at Rome during the imprisonment mentioned in the last chapter of the Acts, it could not have been written long before the end of the two years; for the distress of the Philippians on account of Epaphroditus' sickness was known at Rome when the Epistle was written; St. Luke was evidently absent from Rome; and lastly, it is obvious from Phil. i. 20, that St. Paul, when he wrote, felt his position to be very critical, and we know that it became more precarious as the two years drew to a close. In A. D. 62 the infamous Tigellinus succeeded Burrus the upright Pretorian prefect in the charge of St. Paul's person; and the marriage to NERO of Poppæa, who had become a Jewish proselyte, brought his imperial judge under an influence which, if exerted, was hostile to St. Paul. Assuming that St. Paul's acquittal and release took place in 63, we may date the Epistle to the Philippians early in that year.—4. *The writer's acquaintance with the Philippians.* PHILIPPI was endeared to St. PAUL, not only by the hospitality of Lydia, the deep sympathy of the converts, and the remarkable miracle which set a seal on his preaching, but also by the successful exercise of his missionary activity after a long suspense, and by the happy consequences of his undaunted endurance of ignominies, which remained in his memory (Phil. i. 30) after eleven years. Leaving Timothy and Luke to watch over the infant Church, Paul and Silas went to Thessalonica (1 Th. ii. 2), whither they were followed by the alms of the Philippians (Phil. iv. 16), and thence southward. After the lapse of five years, spent chiefly at Corinth and Ephesus, St. Paul, escaping from the incensed worshippers of the Ephesian Diana, passed through Macedonia, A. D. 57, on his way to Greece, accompanied by the Ephesians Tychicus and Trophimus, and probably visited Philippi for the second time, and was there joined by Timothy (Acts xx. 1, 2). He wrote at Philippi 2 Cor. (CORINTHIANS, SECOND EPISTLE TO THE.) On returning from Greece he again found a refuge among his faithful Philippians, where he spent some days at the time of the Passover, A. D.

58, with St. Luke, who accompanied him when he sailed from Neapolis (xx. 3–6). Once more, in his Roman captivity (A. D. 62) their care of him revived again. They sent EPAPHRODITUS, bearing their alms for the apostle's support, and ready also to tender his personal service (Phil. ii. 26).—5. *Scope and contents of the Epistle.* St. Paul's aim in writing is plainly this: while acknowledging the alms of the Philippians and the personal services of their messenger, to give them some information respecting his own condition, and some advice respecting theirs. After the inscription (i. 1, 2) in which Timothy as the second father of the Church is joined with Paul, he sets forth his own condition (i. 3–26), his prayers, care, and wishes for his Philippians, with the troubles and uncertainty of his imprisonment, and his hope of eventually seeing them again. Then (i. 27–ii. 18) he exhorts them to those particular virtues which he would rejoice to see them practising at the present time. He hopes soon to hear a good report of them (ii. 19–30), either by sending Timothy, or by going himself to them, as he now sends Epaphroditus whose diligent service is highly commended. Reverting (iii. 1–21) to the tone of joy which runs through the preceding descriptions and exhortations—as in i. 4, 18, 25, ii. 2, 16, 17, 18, 28—he bids them take heed that their joy be in the Lord, and warns them, as he had often previously warned them (probably in his last two visits), against admitting itinerant Judaizing teachers, the tendency of whose doctrine was toward a vain confidence in mere earthly things; in contrast to this, he exhorts them to follow him in placing their trust humbly but entirely in Christ, and in pressing forward in their Christian course, with the Resurrection-day constantly before their minds. Again (iv. 1–9), advertising to their position in the midst of unbelievers, he beseeches them, even with personal appeals, to be firm, united, joyful in the Lord; to be full of prayer and peace, and to lead such a life as must approve itself to the moral sense of all men. Lastly (iv. 10–23), he thanks them for the contribution sent by Epaphroditus for his support, and concludes with salutations and a benediction.—6. *Effect of the Epistle.* We have no account of the reception of this Epistle by the Philippians. Except doubtful traditions that Erastus was their first bishop, and with Lydia and Parmenas was martyred in their city, nothing is recorded of them for the next forty-four years. About A. D. 107 Ignatius was conducted through Philippi on his way to martyrdom at Rome. Soon after a letter came from Polycarp of Smyrna, which accompanied, in compliance with a request of the warm-hearted Philippians, a copy of all the letters of Ignatius in the possession of the Church at Smyrna. Now, though we cannot trace the immediate effect of St. Paul's Epistle on the Philippians, yet no one can doubt that it contributed to form the character of their Church, as it was in the time of Polycarp. It is evident from Polycarp's Epistle that the Church, by the grace of God and the guidance of the apostle, had passed through those trials of which St. Paul warned it, and had not gone back from the high degree of Christian attainments which it reached under St. Paul's oral and written teaching.—7. *The Church at Rome.* The state of the Church at Rome should be considered before entering on the study of the Epistle to the Philippians. Something is to be learned of its condition about A. D. 58 from the Epistle to the Romans, about A. D. 61 from Acts xxviii. St. Paul's presence in Rome, the freedom of speech allowed to him, and the per-

sonal freedom of his fellow-laborers were the means of infusing fresh missionary activity into the Church (Phil. i. 12-14). It was in the work of Christ that Epaphroditus was worn out (ii. 30).—8. *Characteristic features of the Epistle*. Strangely full of joy and thanksgiving amidst adversity, like the apostle's midnight hymn from the depth of his Philippian dungeon, this Epistle went forth from his prison at Rome. In most other epistles he writes with a sustained effort to instruct, or with sorrow, or with indignation; he is striving to supply imperfect, or to correct erroneous teaching, to put down scandalous impurity, or to heal schism in the Church which he addresses. But in this Epistle, though he knew the Philippians intimately, and was not blind to the faults and tendencies to fault of some of them, yet he mentions no evil so characteristic of the whole Church as to call for general censure on his part, or amendment on theirs. Of all his Epistles to Churches, none has so little of an official character as this. Love is its key-note.—The Epistle to the Philippians is found in all the principal uncial manuscripts, viz. in A, B, C, D, E, F, G, J, K. In C, however, the verses preceding i. 22, and those following iii. 5, are wanting. BIBLE; INSPIRATION; NEW TESTAMENT.

**Phil-ist'i-a** [fe-lis'te-a or fe-list'ya] (a Latinized form of Heb. *Peleseth*; see PALESTINE), the land of the PHILISTINES (Ps. lx. 8, lxxvii. 4, cviii. 9). SEPHELA.

\* **Phil-ist'im** (fr. Heb. pl. *Pelishtim*) = PHILISTINES (Gen. x. 14).

\* **Phil-ist'ine** [-tin], pl. **Phil-ist'ines** [-tinz] (fr. Heb. *Pelisht*, pl. *Pelishtim* = native of PHILISTIA, people of PHILISTIA). The origin of the Philistines is nowhere expressly stated in the Bible (so Mr. Bevan); but as the prophets describe them as "the Philistines from CAPHTOR" (Am. ix. 7), and "the remnant of the maritime district of Caphtor" (Jer. xlvi. 4), it is at the first view probable that they were the "Caphtorims which came out of Caphtor" who expelled the AVIM from their territory and occupied it in their place (Deut. ii. 23), and that these again were the Caphtorim mentioned in the Mosaic genealogical table among the descendants of Mizraim (Gen. x. 14). But in establishing this conclusion certain difficulties present themselves: in the first place, it is observable that in Gen. x. 14 the Philistines are connected with the CASLUCHIM rather than the Caphtorim. The clause seems to have an appropriate meaning in its present position, viz. to explain when and where the name Philistine was first applied to the people whose proper appellation was Caphtorim. But a second and more serious difficulty arises out of the language of the Philistines; for while the Caphtorim were Hamitic, the Philistine language is held to have been Shemitic. The difficulty arising out of the language may be met by assuming either that the Caphtorim adopted the language of the conquered Avim, or that they diverged from the Hamitic stock when the distinctive features of Hamitism and Shemitism were yet in embryo. (SEMITIC LANGUAGES.) A third objection to their Egyptian origin is raised from the application of the term "uncircumcised" to them (1 Sam. xvii. 26; 2 Sam. i. 20), whereas the Egyptians were circumcised (Hdt. ii. 36). But this objection is answered by Jer. ix. 25, 26, where the same term is applied to the Egyptians. (CIRCUMCISION.)—The next question that arises relates to the early movements of the Philistines. It has been very generally assumed of late years that

Caphtor represents CRETE, and that the Philistines migrated from that island, either directly or through Egypt, into Palestine. The hypothesis presupposes the Shemitic origin of the Philistines; but the Biblical statement is that Caphtorim was descended from Mizraim. Moreover, the name Caphtor can only be identified with the Egyptian Coptos. But the Cretan origin of the Philistines has been deduced not so much from the name Caphtor as from that of the CHERETHITES. This name in its Hebrew form bears a close resemblance to Crete, and is rendered Cretans in the LXX. But the mere coincidence of the names cannot pass for much without some corroborative testimony. Without therefore asserting that migrations may not have taken place from Crete to Philistia, Mr. Bevan holds that the evidence adduced to prove that they did, is insufficient.—The last point to be decided in connection with the early history of the Philistines is, the time when they settled in the land of Canaan. If we were to restrict ourselves to the statements of the Bible, we should conclude that this took place before the time of Abraham: for they are noticed in his day as a pastoral tribe in the neighborhood of Gerar (Gen. xxi. 32, 34, xxvi. 1, 8; ABIMELECH). At the Exodus they were still in the same neighborhood, but sufficiently powerful to inspire the Israelites with fear (Ex. xiii. 17, xv. 14). When the Israelites arrived, they were in full possession of the *Shephelah* (SEPHELA) from the "river of Egypt" (*el-'Arish*) in the S. to Ekron in the N., and had formed a confederacy of five principal cities, GAZA, ASHDOD, ASHKELON, GATH, EKRON (Josh. xiii. 3). The interval between Abraham and the Exodus seems sufficient to allow for the alteration in the position of the Philistines, and their transformation from a pastoral tribe to a settled and powerful nation. But such a view has not met with acceptance among modern critics, partly because it leaves the migrations of the Philistines wholly unconnected with any known historical event, and partly because it does not explain the great increase in their power in the time of the Judges. To meet these two requirements a double migration on the part of the Philistines, or of the two branches of that nation, has been suggested. The view adopted by Movers is, that the Philistines were carried westward from Palestine into Lower Egypt by the stream of the Hyksos movement at a period subsequent to Abraham; from Egypt they passed to Crete, and returned to Palestine in the early period of the Judges. This is inconsistent with the notices in Joshua. Ewald propounds the hypothesis of a double immigration from Crete, the first in the ante-patriarchal period, as a consequence either of the Canaanitish settlement or of the Hyksos movement, the second in the time of the Judges. Mr. Bevan regards the above views as speculations, built up on very slight data, and unsatisfactory, inasmuch as they fail to reconcile the statements of Scripture. The hypothesis of a second immigration is not needed to account for the growth of the Philistine power. Their geographical position and their relations to neighboring nations will account for it. Between the times of Abraham and Joshua, the Philistines had advanced northward into the *Shephelah* or plain of Philistia. This plain has been in all ages remarkable for the extreme richness of its soil; its fields of standing corn, its vineyards and olive-yards, are incidentally mentioned in Scripture (Judg. xv. 5), and in time of famine the land of the Philistines was the hope of Palestine (2 K.

viii. 2). It was also adapted to the growth of military power; for while the plain itself permitted the use of war-chariots, which were the chief arm of offence, the occasional elevations which rise out of it offered secure sites for towns and strongholds. It was, moreover, a commercial country; from its position it must have been at all times the great thoroughfare between Phenicia and Syria in the N., and Egypt and Arabia in the S. The Philistines

Heads of Philistine Prisoners.—From sculptures at Medinet Haboo, in Rosellini's *Monuments of Egypt*.—(Fbn.)

traded in slaves with Edom and Southern Arabia (Am. i. 6; Joel iii. 3, 5). They probably possessed a navy; for they had ports attached to Gaza and Ashkelon; the LXX. speaks of their ships in its version of Is. xi. 14; and they are represented as attacking the Egyptians out of ships. They had at an early period attained proficiency in the arts of

Philistine Ship attacked by Egyptians.—From sculptures at Medinet Haboo, in Rosellini's *Monuments of Egypt*.—(Fbn.)

CRAFT). Their wealth was abundant (Judg. xvi. 5, 18), and they appear in all respects to have been a prosperous people. Possessed of such elements of power, the Philistines had attained in the time of the Judges an important position among Eastern nations. About B. C. 1209 we find them engaged in successful war with the Sidonians (Justin, xviii. 3). About the same period, they and other Mediterranean nations were engaged in an unsuccessful naval war with Rameses III. of Egypt. And now to recur to the Biblical narrative:—The territory of the Philistines, having been once occupied by the Canaanites, formed a portion of the Promised Land, and was assigned to the tribe of Judah (Josh. xv. 2, 12, 45–47). No portion, however, of it was conquered in the lifetime of Joshua (xiii. 2), and even after his death no permanent conquest was effected

(Judg. iii. 3), though Gaza, Ashkelon, and Ekron were taken (i. 18). The Philistines, however, soon recovered these, and commenced an aggressive policy against the Israelites, by which they gained a complete ascendancy over them. Individual heroes were raised up from time to time whose achievements might well kindle patriotism, such as SHAMGAR (iii. 31), and SAMSON (xiii. xvi.); but neither of these men succeeded in permanently throwing off the yoke. Under Eli there was an organized but unsuccessful resistance to the encroachments of the Philistines, who were met at APHEK 3 (1 Sam. iv. 1). The production of the ARK on this occasion demonstrates the greatness of the emergency, and its loss marked the lowest depth of Israel's degradation. The next action took place under SAMUEL's leadership, and the tide of success turned in Israel's favor (vii. 9–14; EBEN-EZER). The Israelites now attributed their past weakness to their want of unity, and they desired a KING, with the special object of leading them against the foe (viii. 20). As soon as SAUL was prepared to throw off the yoke, he occupied with his army a position at MICHMASH, and his heroic son JONATHAN gave the signal for a rising by overthrowing the pillar (so Mr. Bevan; "GARRISON," A. V., Gesenius, &c.) which the Philistines had placed there. The challenge was accepted; the Philistines invaded the central district with an immense force, and, having dislodged Saul from Michmash, occupied it themselves, and sent forth predatory bands into the surrounding country. The Israelites shortly after took up a position

on the other side of the ravine at GEBA, and, availing themselves of the confusion consequent upon Jonathan's daring feat, inflicted a tremendous slaughter upon the enemy (xiii. xiv.). No attempt was made by the Philistines to regain their supremacy for about twenty-five years, and the scene of the next contest shows the altered strength of the two parties: it was no longer in the central country, but in a ravine leading down to the Philistine plain, the valley of ELAH: on this occasion the prowess of young DAVID secured success to Israel (GOLIATH), and the foe was pursued to the gates of Gath and Ekron (xvii.). The power of the Philistines was, however,

still intact on their own territory (xxi. 10–15, xxvii.; ACHISH). The border-warfare was continued. The scene of the next conflict was far to the N., in the valley of Esdraelon. (GILBOA.) The battle on this occasion proved disastrous to the Israelites: Saul himself perished, and the Philistines penetrated across the Jordan, and occupied the forsaken cities (xxi. 1–7). On the appointment of David to be king over the united tribes, the Philistines attempted to counterbalance the advantage by an attack on the person of the king: they therefore penetrated into the valley of REPHAIM, S. W. of Jerusalem, and even pushed forward an advanced post as far as Bethlehem (1 Chr. xi. 16). David twice attacked them at the former spot with signal success, in the first case capturing their images (BAAL-PERAZIM), in the second pursuing them

"from Geba until thou come to Gazer" (2 Sam. v. 17-25; 1 Chr. xiv. 8-16). Henceforth the Israelites appear as the aggressors: about seven years after the defeat of Kephaim, David, who had now consolidated his power, attacked them on their own soil, and took Gath with its dependencies (xviii. 1; compare "METHEG-ANNAH," 2 Sam. viii. 1), and thus their ascendancy was utterly broken. (Gob.) The whole of Philistia was included in Solomon's empire. The division of the empire at Solomon's death was favorable to the Philistine cause: Rehoboam secured himself against them by fortifying Gath and other cities bordering on the plain (2 Chr. xi. 8): the Israelite monarchs allowed the Philistines to get hold of GIBBETHON (1 K. xv. 27, xvi. 15). Judah meanwhile had lost the tribute; for, on Jehoshaphat's success "some of the Philistines brought presents" (2 Chr. xvii. 11). But in Jehoram's reign the Philistines and Arabians invaded Judah, and sacked the royal palace (xxi. 16, 17). The increasing weakness of the Jewish monarchy under the attacks of Hazael led to the recovery of Gath, which was afterward dismantled and probably destroyed by Uzziah, who also dismantled Jabneh and Ashdod, and erected forts in different parts of the country (xxvi. 6; 2 K. xii. 17). Probably the Philistines were kept in subjection until the time of Ahaz, when they attacked the border-cities (2 Chr. xxviii. 18). A few years later, the Philistines, in conjunction with the Syrians and Assyrians, and perhaps as the subject-allies of the latter, carried on a series of attacks on the kingdom of Israel (Is. ix. 11, 12). HEZEKIAH formed an alliance with the Egyptians, as a counterpoise to the Assyrians, and the possession of Philistia became henceforth the turning-point of the struggle between the two great empires of the East. Hezekiah, in the early part of his reign, reestablished his authority "even unto Gaza" (2 K. xviii. 8). Soon after, the Egyptians possessed the five Philistine cities. The Assyrians under Tartan, the general of SARGON, made an expedition against Egypt, and took Ashdod, as the key of that country (Is. xx. 1, 4, 5). Ashkelon was taken by SENNACHERIB in his first campaign against Egypt; Ashdod, Ekron, Gaza, submitted to him. The Assyrian supremacy, though shaken by the failure of his second campaign, was restored by ESAR-HADON, and probably the Assyrians retained their hold on Ashdod until its capture, after a long siege, by Psammetichus. About this time Philistia was traversed by a vast Scythian horde on their way to Egypt (compare Zeph. ii. 4-7; MAGOG). The contest between the Egyptians and the Chaldeans under Nebuchadnezzar was specially disastrous to the Philistines (Jer. xlviii.). The "old hatred" that the Philistines bore to the Jews was exhibited in acts of hostility at the time of the Babylonish Captivity (Ez. xxv. 15-17): but on the return this was somewhat abated, for some of the Jews married Philistine women, to the great scandal of their rulers (Neh. xiii. 23, 24). From this time the history of Philistia is absorbed in the struggles of the neighboring kingdoms. The latest notices of the Philistines as a nation occur in 1 Mc. iii.-v. (ASHDOD; ASHKELOH; EKRON; GAZA; MACCABEES.) B. C. 63 Pompey annexed Philistia to the province of Syria; but Gaza, Jamnia, Ashdod, and Ashkelon were assigned to Herod (Jos. xiv. 4, § 4, xv. 7, § 3, xvii. 11, § 5).—With regard to the institutions of the Philistines, our information is very scanty.<sup>1</sup>

The five chief cities had, as early as the days of Joshua, constituted themselves into a confederacy, restricted, however, in all probability, to matters of offence and defence. Each was under the government of a prince whose official title was *seren*, A. V. "lord" (Josh. xiii. 3; Judg. iii. 3, &c.), and occasionally *adr*, A. V. "prince" (1 Sam. xviii. 30, xxix. 3 ff.). Gaza is usually mentioned first, Ekron always last. Each town possessed its own territory, and had dependent towns and villages. The Philistines appear to have been deeply imbued with superstition: they carried their idols with them on their campaigns (2 Sam. v. 21), and proclaimed their victories in their presence (1 Sam. xxxi. 9). The gods whom they chiefly worshipped were DAGON (Judg. xvi. 23; 1 Sam. v. 3-5; 1 Chr. x. 10; 1 Mc. x. 83), ASHTAROTH (1 Sam. xxxi. 10), BAAL-ZEBUB (2 K. i. 2-6), and Derceto (= ATARGATIS). Priests and diviners (1 Sam. vi. 2) were attached to the various seats of worship. IDOLATRY.

**Phi-lol'o-gas** (L. fr. Gr., literally = *fond of talking*, usually a *lover of learning*, *learned*, L. & S.), a Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 15). Pseudo-Hippolytus makes him one of the seventy disciples, and bishop of Sinope.

\* **Phi-lo-me'tor** (Gr.) (2 Mc. iv. 21). PTOLEMY VI. PHILOMETOR.

**Phi-los'o-phy** (fr. Gr., literally = *love of wisdom*, hence the methodical pursuit of wisdom and actual possession of it, and the systematic arrangement of whatever is connected with this, including truths, principles, explanations of phenomena, &c.). It is the object of the following article (originally by Mr. Westcott) to give some account (I.) of that development of thought among the Jews which answered to the philosophy of the West; (II.) of the recognition of the preparatory office of Greek philosophy in relation to Christianity; (III.) of the systematic progress of Greek philosophy as forming a complete whole; and (IV.) of the contact of Christianity with philosophy.—I. *The Philosophic Discipline of the Jews*. Philosophy, if we limit the word strictly to describe the free pursuit of knowledge of which truth is the one complete end, is essentially of Western growth. In the East the search after wisdom has always been connected with practice: it has remained there, what it was in Greece at first, a part of religion. The history of the Jews offers no exception to this remark: there is no Jewish philosophy properly so called. Yet speculation and action meet in truth; and perhaps the most obvious lesson of the O. T. lies in the gradual construction of a divine philosophy by fact, and not by speculation. The method of Greece was to proceed from life to God; the method of Israel (so to speak) was to proceed from God to life. The axioms of

tioned race like the Egyptians, with regular features, and complexions somewhat lighter than those of the Egyptians. They shaved the beard and whiskers. Their arms and accoutrements were peculiar. They wore a head-dress or helmet resembling a row of feathers set in a jewelled tiara or metal band, to which were attached scales of the same material to defend the back of the head and sides of the face. The corselet was quilted with leather or plates of metal, reached only to the chest, was supported by shoulder-straps, and confined at the waist by a girdle from which a quilted skirt hung down nearly to the knee. The shield was large and circular. The weapons of the Philistines were the javelin or spear for the distant fight, and the poulard and long sword for close combat. (ARMS.) They used war-chariots like those of the Egyptians, also carts and wagons of various forms drawn by two or four oxen (Osborn, *Ancient Egypt, her Testimony to the Truth of the Bible*, pp. 187 ff.).

<sup>1</sup> The Philistines are represented as a tall, well-propor-

one system are the conclusions of the other. The one led to the successive abandonment of the noblest domains of science which man had claimed originally as his own, till it left bare systems of morality; the other, in the fulness of time, prepared many to welcome the Christ—the Truth.—The philosophy of the Jews, using the word in a large sense, is to be sought for rather in the progress of the national life than in special books. Step by step the idea of the family was raised into that of the people; and the kingdom furnished the basis of those wider promises which included all nations in one kingdom of heaven. The social, the political, the cosmical relations of man were traced out gradually in relation to God. The philosophy of the Jews is thus essentially a moral philosophy, resting on a definite connection with God. The doctrines of Creation and Providence, of an Infinite Divine Person and of a responsible human will, which elsewhere form the ultimate limits of speculation, are here assumed at the outset. The fundamental ideas of the divine government found expression in words as well as in life. The Psalms, which, among the other infinite lessons which they convey, give a deep insight into the need of a personal apprehension of truth, everywhere declare the absolute sovereignty of God over the material and moral worlds. One man among all (SOLOMON) is distinguished among the Jews as “the wise man.” The description which is given of his writings serves as a commentary on the national view of philosophy (1 K. iv. 30–33). The lesson of practical duty, the full utterance of “a large heart” (29), the careful study of God’s creatures: this is the sum of wisdom. Yet in fact the very practical aim of this philosophy leads to the revelation of the most sublime truth. Wisdom was gradually felt to be a Person, throned by God, and holding converse with men (Prov. viii.). She was seen to stand in open enmity with “the strange woman,” who sought to draw them aside by sensuous attractions; and thus a new step was made toward the central doctrine of Christianity—the Incarnation of the Word. Two books of the Bible, JOB and ECCLESIASTES, approach more nearly than any others to the type of philosophical discussions. But in both the problem is moral and not metaphysical. The one deals with the evils which afflict “the perfect and upright;” the other with the vanity of all the pursuits and pleasures of earth. The method of inquiry is in both cases abrupt and irregular; and the final solution is obtained, not by consecutive reasoning, but by an authoritative utterance, which faith welcomes as the truth, toward which all partial efforts had tended. The Captivity necessarily exercised a profound influence upon Jewish thought. (CYRUS.) The teaching of Persia seems to have been designed to supply important elements in the education of the chosen people. But it did yet more than this. The imagery of Ez. i. gave an apparent sanction to a new form of mystical speculation. It is uncertain at what date this earliest *Kabbalah* (i. e. Tradition) received a definite form; but there can be no doubt that the two great divisions of which it is composed, “the chariot” (Heb. *Merôbbâh*, Ez. i.) and “the Creation” (Heb. *Bêrêshûh* [= “In the beginning”], Gen. i.), found a wide development before the Christian era. The first dealt with the manifestation of God in Himself; the second with His manifestation in Nature; and as the doctrine was handed down orally, it received naturally, both from its extent and form, great additions from foreign sources. On

the one side it was open to the Persian doctrine of emanation, on the other to the Christian doctrine of the Incarnation; and the tradition was deeply impressed by both before it was first committed to writing in the seventh or eighth century. At present the original sources for the teaching of the *Kabbalah* are the *Sepher Jetzirah*, or Book of Creation (eighth century), and the *Sepher Hazohar*, or Book of Splendor (thirteenth century). Both are based upon a system of Pantheism. The contact of the Jews with Persia thus gave rise to a traditional mysticism. Their contact with Greece was marked by the rise of distinct sects. In the third century B. C. the great doctor Antigonos of Socho bears a Greek name, and popular belief pointed to him as the teacher of Zadok and Boëthius, the supposed founders of Jewish rationalism. At any rate, we may date from this time the twofold division of Jewish speculation which corresponds to the chief tendencies of practical philosophy. The SADDUCEES appear as the supporters of human freedom in its widest scope; the PHARISEES of a religious Stoicism. At a later time the cycle of doctrine was completed, when by a natural reaction the ESENEES established a mystic asceticism. The conception of wisdom which appears in the Book of Proverbs was elaborated with greater detail afterward (WISDOM OR SOLOMON), both in Palestine (ECCLESIASTICS) and in Egypt (ALEXANDRIA); but the doctrine of the Word is of greater speculative interest. The first use of the term Word (*Memra*), based upon the common formula of the prophets, is in the Targum of Onkelos (first century B. C.), in which “the Word of God” is commonly substituted for God in His immediate, personal relations with man; and it is probable that round this traditional rendering a fuller doctrine grew up. But there is a clear difference between the idea of the Word then prevalent in Palestine and that current at Alexandria. In Palestine the Word appears as the outward mediator between God and man, like the Angel of the Covenant: at Alexandria it appears as the spiritual connection which opens the way to revelation. The preface to St. John’s Gospel includes the element of truth in both. (MAGI; PERSIANS; SHECHINAH).—II. *The Patriotic Recognition of the Preparatory Office of Greek Philosophy.* The divine discipline of the Jews was in nature essentially moral. The lessons which it was designed to teach were embodied in the family and the nation. Yet this was not in itself a complete discipline of our nature. The reason, no less than the will and the affections, had an office to discharge in preparing man for the Incarnation. The process and the issue in the two cases were widely different, but they were in some sense complementary. Even in time this relation holds good. The divine kingdom of the Jews was just overthrown when free speculation arose in the Ionian colonies of Asia. The teaching of the last prophet nearly synchronized with the death of Socrates. All other differences between the discipline of reason and that of revelation are implicitly included in their fundamental difference of method. In the one, man boldly aspired at once to God; in the other, God gradually disclosed Himself to man. Philosophy failed as a religious teacher practically (Rom. i. 21, 22), but it bore noble witness to an inward law (ii. 14, 15). In its purest and grandest forms it was “a schoolmaster to bring men to Christ.” This function of ancient philosophy is distinctly recognized by many of the greatest of the Fathers (Clement of Alexandria, Origen, Augus-

time, &c.). But the same writers in other places sought to explain the partial harmony of Philosophy and Revelation by an original connection of the two. The use which was made of heathen speculation by heretical writers was one great cause of its disparagement by their catholic antagonists. This variety of judgment in the heat of controversy was inevitable. The full importance of the history of ancient philosophy was then first seen when all rivalry was over, and it became possible to contemplate it as a whole, animated by a great law, often trembling on the verge of truth, and sometimes by a "bold venture" claiming the heritage of faith.—

III. *The Development of Greek Philosophy.* The various attempts to derive Western philosophy from Eastern sources have signally failed. It is true that in some degree the character of Greek speculation may have been influenced, at least in its earliest stages, by religious ideas originally introduced from the East; but this indirect influence does not affect the originality of the great Greek teachers. The very value of Greek teaching lies in the fact that it was, as far as is possible, a result of simple reason, or, if faith asserts its prerogative, the distinction is sharply marked. Of the various classifications of the Greek schools which have been proposed, the simplest and truest seems to be that which divides the history of philosophy into three great periods, the first reaching to the era of the Sophists, the next to the death of Aristotle, the third to the Christian era. In the first period the world objectively is the great centre of inquiry: in the second, the "ideas" of things, truth, and being; in the third, the chief interest of philosophy falls back upon the practical conduct of life. After the Christian era philosophy ceased to have any true vitality in Greece, but it made fresh efforts to meet the changed conditions of life at Alexandria and Rome.—1. *The pre-Socratic Schools.* The first Greek philosophy was little more than an attempt to follow out in thought the mythic cosmogonies of earlier poets. What is the one permanent element which underlies the changing forms of things?—this was the primary inquiry to which the *Ionian* school endeavored to find an answer. *Thales* (about B. C. 610–625) pointed to moisture (water) as the one source and supporter of life. *Anaximenes* (about B. C. 520–480) substituted air for water. *Diogenes* of Apollonia (about B. C. 450) represented this elementary "air" as endowed with intelligence, but even he makes no distinction between the material and the intelligent. The atomic theory of *Democritus* (about B. C. 460–357) offered another and more plausible solution. The motion of his atoms included the action of force, but he wholly omitted to account for its source. Meanwhile another mode of speculation had arisen in the same school. In place of one definite element, *Anaximander* (B. C. 610–547) suggested the unlimited as the adequate origin of all special existences. And somewhat more than a century later *Anaxagoras* summed up the result of such a line of speculation: "All things were together; then mind came and disposed them in order." Thus we are left face to face with an ultimate dualism.—The *Eleatic* school started from an opposite point of view. *Xenophanes* (about B. C. 530?) "looked up to the whole heaven and said that the One is God." "Thales saw gods in all things: Xenophanes saw all things in God" (Thirlwall, *History of Greece*, ii. 136). *Parmenides* of Elea (B. C. 500) substituted abstract "being" for "God" in the system of Xenophanes, and distin-

guished with precision the functions of sense and reason. *Zeno* of Elea (about B. C. 450) developed with logical ingenuity the contradictions involved in our perceptions of things (e. g. in the idea of *motion*), and thus formally prepared the way for skepticism.—The teaching of *Heraclitus* (B. C. 500) offers a complete contrast to that of the Eleatics. So far from contrasting the existent and the phenomenal, he boldly identified being with change. Rest and continuance is death. That which *is* is the instantaneous balance of contending powers. Creation is the *play* of the Creator. Heraclitus makes noble "guesses at truth," yet leaves "fate" the supreme creator.—Others had labored to trace a unity in the world in the presence of one underlying element or in the idea of a whole; *Pythagoras* (about B. C. 570–504) sought to combine the separate harmony of parts with total unity. Numerical unity includes the finite and the infinite; and in the relations of number there is a perfect symmetry, as all spring out of the fundamental unit. Thus numbers seemed to Pythagoras to be not only "patterns" of things, but causes of their being.—2. *The Socratic Schools.* In the second period of Greek philosophy the scene and subject were both changed. A philosophy of ideas, using the term in its widest sense, succeeded a philosophy of nature. In three generations Greek speculation reached its greatest glory in the teaching of Socrates, Plato, and Aristotle. The famous sentence in which Aristotle characterizes the teaching of *Socrates* (B. C. 468–399) places his scientific position in the clearest light. There are two things, he says, which we may rightly attribute to Socrates, inductive reasoning, and general definition. By the first he endeavored to discover the permanent element which underlies the changing forms of appearances and the varieties of opinion: by the second he fixed the truth which he had thus gained. But, besides this, Socrates rendered another service to truth. Ethics occupied in his investigations the primary place which had hitherto been held by Physics. The great aim of his induction was to establish the sovereignty of virtue, and he determined to "know himself." He affirmed the existence of a universal law of right and wrong. He connected philosophy with action, both in detail and in general. On the one side he upheld the supremacy of conscience, on the other the working of Providence. Not the least fruitful characteristic of his teaching was what may be called its desultoriness. He formed no complete system. As a result of this, the most conflicting opinions were maintained by some of his professed followers who carried out isolated fragments of his teaching to extreme conclusions. Thus the Cynics, carrying out his proposition that self-command = virtue, professed an utter disregard of every thing material; the Cyrenaics, inverting the maxim that virtue is necessarily accompanied by pleasure, took immediate pleasure as the rule of action.—*Plato* alone (B. C. 430–347), by the breadth and nobleness of his teaching, was the true successor of Socrates; with fuller detail and greater elaborateness of parts, his philosophy was as many-sided as that of his master. Plato possessed two commanding powers, which, though apparently incompatible, are in the highest sense complementary: a matchless destructive dialectic, and a creative imagination. His famous doctrines of ideas and recollection are a solution by imagination of a logical difficulty. He attributed to general notions ("ideas") a substantive existence.

All men were supposed to have been face to face with truth: the object of teaching was to bring back impressions latent, but uneffaced. The "myths" of Plato answer in the philosopher to faith in the Christian. They point out in intelligible outlines the subjects on which man looks for revelation. Such are the relations of the human mind to truth, the preëxistence and immortality of the soul, the state of future retribution, the revolutions of the world.—The great difference between Plato and Aristotle (B. C. 384–322) lies in the use which Plato thus made of imagination as the exponent of instinct. The dialectic of Plato is not inferior to that of Aristotle, and Aristotle exhibits traces of poetic power not unworthy of Plato; but Aristotle never allows imagination to influence his final decision. He elaborated a perfect method, and used it with perfect fairness. His writings, if any, contain the highest utterance of pure reason. Looking back on all the earlier efforts of philosophy, he pronounced a calm and final judgment. For him many of the conclusions which others had maintained were valueless, because they rested on feeling, not on argument. The issue of his inquiry into the immortality of the soul was, part of it may be immortal, but that part is impersonal. With Socrates "ideas" (general definitions) were mere abstractions; with Plato they had an absolute existence; with Aristotle they had no existence separate from things in which they were realized, though the form which answers to the Platonic idea was held to be the essence of the thing itself. With Plato and Aristotle, Ethics is a part of Politics; the citizen is prior to the man.—3. *The post-Socratic Schools.* After Aristotle, Philosophy took a new direction. Speculation became mainly personal. Epicurus (B. C. 352–270) defined the object of Philosophy to be the attainment of a happy life. The pursuit of truth for its own sake he regarded as superfluous. He rejected dialectics as a useless study, and accepted the senses, in the widest acceptance of the term (EPICUREANS), as the criterion of truth. Physics he subordinated entirely to Ethics. The happiness at which the wise man aims is to be found, he said, not in momentary gratification, but in lifelong pleasure. It does not consist necessarily in excitement or motion, but often in absolute tranquillity. The gods, supremely happy and eternal, were absolutely free from the distractions and emotions consequent on any care for the world or man. All things were supposed to come into being by chance, and so pass away. The individual was left master of his own life. While Epicurus asserted in this manner the claims of one part of man's nature in the conduct of life, Zeno of Citium (about B. C. 280), with equal partiality, advocated a purely spiritual (intellectual) morality. (Stoics.) The opposition between the two was complete. The infinite, chance-formed worlds of the one stand over against the one harmonious world of the other. On the one side are gods regardless of material things, on the other a Being permeating and vivifying all creation. This difference necessarily found its chief expression in Ethics. For when the Stoics taught that there were only two principles of things, Matter and God, Fate or Reason, it followed that the active principle in man is of Divine origin, and that his duty is to live conformably to nature. All external things were indifferent. Reason was the absolute sovereign of man. In one point the Epicureans and Stoics were agreed. They both regarded the happiness and culture of the individual as the highest good.—Meanwhile, in

the New Academy, Platonism degenerated into skepticism. Epicurus found an authoritative rule in the senses. The Stoics took refuge in what seems to answer to the modern doctrine of "common-sense," and maintained that the senses give a direct knowledge of the object. *Carnades* (B. C. 213–129) combated these views, and showed that sensation cannot be proved to declare the real nature, but only some of the effects, of things. Skepticism remained as the last issue of speculation.—But though the Greek philosophers fell short of their highest aim, it needs no words to show the work which they did as pioneers of a universal Church. Step by step great questions were proposed—Fate, Providence—Conscience, Law—the State, the Man—and answers were given, the more instructive because they are generally one-sided.—The complete course of Philosophy was run before the Christian era, but there were yet two mixed systems afterward which offered some novel features. At ALEXANDRIA Platonism was united with various elements of Eastern speculation, and for several centuries exercised an important influence on Christian doctrine. At Rome Stoicism was vivified by the spirit of the old republic, and exhibited the extreme Western type of Philosophy. The Roman Stoicism calls for a brief notice, from its supposed connection with Christian morality (*Seneca*, † A. D. 65; *Epictetus*, † about A. D. 115; *Marcus Aurelius Antoninus*, 121–180). The superficial coincidences of Stoicism with the N. T., in thought and even in language, are certainly numerous. But beneath this external resemblance of Stoicism to Christianity the later Stoics were fundamentally opposed to it. For good and for evil they were the Pharisees of the Gentile world. Their worship was a sublime egotism. Not only is there no recognition of communion between an immortal man and a personal God, but the idea is excluded. Man is but an atom in a vast universe, and his actions and sufferings are measured solely by their relation to the whole. God is "the mind of the universe," "the soul of the world," and is even identified with the world itself. The Stoicism of M. Aurelius gives many of the moral precepts of the Gospel, but their foundation can find no place in his system.—IV. *Christianity in contact with Ancient Philosophy.* The only direct trace in the N. T. of the contact of Christianity with Western Philosophy is in the account of St. Paul's visit to Athens (Acts xvii. 18; EPICUREANS; STOICS), and there is nothing in the apostolic writings to show that it exercised any important influence upon the early Church (comp. 1 Cor. i. 22–24). But Eastern speculation penetrated more deeply through the mass of the people. The "philosophy" against which the Colossians were warned seems undoubtedly of Eastern origin, containing elements similar to those afterward embodied in various shapes of Gnosticism, as a selfish asceticism, and a superstitious reverence for angels (Col. ii. 8, 16–23); and in the Epistles to Timothy, addressed to Ephesus, in which city St. Paul anticipated the rise of false teaching (Acts xx. 30), two distinct forms of error may be traced in addition to Judaism, due more or less to the same influence; one a vain spiritualism, insisting on ascetic observances (MARRIAGE) and interpreting the RESURRECTION as a moral change (1 Tim. i. 6, iv. 1–7, vi. 20; 2 Tim. ii. 16–18); the other a materialism allied to sorcery (iii. 13; compare Acts viii. 9, xix. 19). These antagonistic and yet complementary forms of heresy found a wide development in later times; but no trace of dualism (PERSIANS, § 2), of the distinction between the Creator

and Redeemer, the Demiurge and the true God, which formed so essential a tenet of the Gnostic schools, occurs in the N. T.—The writings of the sub-apostolic age generally throw little light upon the relations of Christianity and Philosophy. The Clementine *Homilies* and *Recognitions*, however, contain a vivid delineation of the speculative struggle which Christianity had to maintain with Judaism and Heathenism. At the close of the second century, when the Church of Alexandria came into marked intellectual preëminence, the mutual influence of Christianity and Neo-Platonism opened a new field of speculation, or rather the two systems were presented in forms designed to meet the acknowledged wants of the time. Neo-Platonism was, in fact, an attempt to seize the spirit of Christianity apart from its historic basis and human elements. The want which the Alexandrine Fathers (Clement, Origen, &c.) endeavored to satisfy is in a great measure the want of our own time. If Christianity be Truth, it must have points of special connection with all nations and all periods. Christian Philosophy may be in one sense a contradiction in terms, for Christianity confessedly derives its first principles from revelation, and not from simple reason; but there is no less a true Philosophy of Christianity, which aims to show how completely these meet the instincts and aspirations of all ages.

**Phin'e-es** (Gr. form of PHINEHAS). 1. PHINEHAS 1 (1 Esd. v. 5, viii. 2, 29; 2 Esd. i. 26; Ecclus. xlv. 23; 1 Mc. ii. 26).—2. PHINEHAS 2 (2 Esd. i. 2 a).—3. PHINEHAS 3 (1 Esd. viii. 63).—4. PASEAH 2 (v. 31).

**Phin'e-has** (fr. Heb. = *mouth of brass*, Ges.), in Apoc. PHINEES. 1. Son of ELEAZAR 1 and grandson of AARON (Ex. vi. 25). His mother was a daughter of Putiel. Phinehas, while quite a youth, by his zeal and energy at the critical moment of the licentious idolatry of Shittim, appeased the Divine wrath and put a stop to the plague which was destroying the nation (Num. xxv. 7). For this he was rewarded by the special approbation of Jehovah, and by a promise that the priesthood should remain in his family forever (10-13). He was appointed to accompany as priest the expedition by which the Midianites were destroyed (xxi. 6). Many years later he also headed the party dispatched from Shiloh to remonstrate against the altar which the Transjordanic tribes built near Jordan (Josh. xxii. 13-32). In the partition of the country he received an allotment of his own—a hill on Mount Ephraim which bore his name. Here his father was buried (xxiv. 33). During his life Phinehas appears to have been the chief of the Korahites or Korhites (1 Chr. ix. 20). (KORAHITE.) After Eleazar's death he became HIGH-PRIEST—the third of the series. In this capacity he gave the oracle to the nation during the struggle with the Benjamites on the matter of Gibeah (Judg. xx. 28). The Pentateuch presents him as the type of an ardent and devoted priest (comp. Ps. cvi. 30, 31). The priests who returned from the Captivity were enrolled as "the sons of Phinehas" (Ezr. viii. 2). The memory of this champion of Jehovah was very dear to the Jews (Ecclus. xlv. 25; 1 Mc. ii. 26; PHINEES 1). Josephus (iv. 6, § 12) says that so great was his courage and so remarkable his bodily strength, that he would never relinquish any undertaking, however difficult and dangerous, without gaining a complete victory. The later Jews are fond of comparing him to Elijah, if indeed they do not regard them as one and the same individual (so Mr. Grove). The verse which closes the Book of Joshua is ascribed to Phinehas, as the

description of the death of Moses at the end of Deuteronomy is to Joshua. The tomb of Phinehas, a place of great resort to both Jews and Samaritans, is shown at *Auertah*, four miles S. E. of *Nablus*.—2. Second son of ELI (1 Sam. i. 3, ii. 34, iv. 4, 11, 17, 19, xiv. 3), killed with his brother by the Philistines when the ark was captured. He is introduced, apparently by mistake, in the genealogy of Ezra (2 Esd. i. 2 a, A. V. "Phinecs").—3. A priest or Levite, father of Eleazar in Ezra's time (Ezr. viii. 33); perhaps = No. 1.

**Ph'ison** (L. fr. Gr. form) = PISON (Ecclus. xxiv. 25).

**Phle'gon** [fle-] (Gr. *burning, blazing*), a Christian at Rome whom St. Paul salutes (Rom. xvi. 14). Pseudo-Hippolytus makes him one of the seventy disciples and bishop of Marathon. He is said to have suffered martyrdom April 8th.

**Phæ'be** [fee'be] (L.) = PHEBE.

**Phæ-nicee** [fee-ni-see or fee'nis], **Phæ-ni'cia** [fee-nish'e-ah or fee-nish'yah] (both L.). PHENICE; PHENICIA.

**Phæ-ni'ciaus** [fee-nish'yanz]. PHENICIANS.

**Pho'ros** (Gr.) = PAROSH (1 Esd. v. 9, ix. 26).

**Phryg'i-a** [fri'j'e-ah] (L. fr. Gr. = *parching*, from its being a hot and dry region, Schl.). Perhaps there is no geographical term in the N. T. which is less capable of an exact definition. There was no Roman province of Phrygia till considerably after the first establishment of Christianity in the peninsula of Asia Minor. The word was rather ethnological than political, and denoted, in a vague manner, the western part of the central region of that peninsula. All over this district the Jews were probably numerous (Acts ii. 10). (ANTIOCHUS THE GREAT.) Through this region the Apostle Paul passed in his second and third missionary journeys (xvi. 6, xviii. 23). By Phrygia we must understand an extensive district, which contributed portions to several Roman provinces, and varying portions at different times. COLOSSE, HIERAPOLIS, ICONIUM, &c., were Phrygian towns. PHILADELPHIA.

**Phud** (fr. Gr.) = PHUT (Jd. ii. 23; compare Ez. xxvii. 10).

**Phu'rah** (fr. Heb. = *bough*, Ges.), servant, probably armor-bearer (compare 1 Sam. xiv. 1) of GIBRON, and his companion in his midnight visit to the camp of the Midianites (Judg. vii. 10, 11).

**Phu'rim** (L.) = PERIM (Esth. xi. 1).

**Phut, Put** (Heb. *Pû*; L. *Phut*; see below), the third son of HAM (Gen. x. 6; 1 Chr. i. 8), elsewhere applied to an African country or people. In the list it follows CRUSH and MIZRAIM, and precedes CANAAN. We cannot place the tract of Phut out of Africa, and its position in the list would well agree with LIBYA. The few mentions of Phut in the Bible clearly indicate a country or people of Africa, and probably not far from Egypt (Jer. xlv. 9 [margin "Put," in text "the Libyans"]; Ez. xxvii. 10 [A. V. "Phut"], xxx. 5, xxxviii. 5 [in the last two, margin "Phut," text "Libya"]; Nah. iii. 9 [A. V. "Put"]). In the ancient Egyptian inscriptions Mr. R. S. Poole finds two names which he compares to the Biblical "Phut" or "Put": viz. (1.) that of the tribes or peoples called the *Nine Bows* (*IX Petu* or *IX Na-Petu* = *ΝΑΡΗΤΙΜ*?), and (2.) that of Nubia, *To-Pet* (the region of the Bow), also called *To-Meru-Pet* (the region, the island of the Bow), whence he conjectures the name of Meroë to come. He finds also in the geographical lists the latter form as the name of a people, *Ana-Meru-Pet*. He also compares the Coptic *Niphaia* with Phut.

The first syllable being the article, the word nearly resembles the Hebrew name. It is applied to the western part of Lower Egypt beyond the Delta; and Champollion conjectures it to mean the Libyan part of Egypt, so called by the Greeks. To take a broad view of the question, Mr. Poole thinks that all the names mentioned may be connected with the Hebrew Phut; and he supposes that the Naphtubim were Mizraites in the territory of Phut, perhaps intermixed with peoples of the latter stock. He regards the *Pet* of the ancient Egyptians, as a geographical designation, corresponds to the Phut of the Bible, which would therefore denote Nubia or the Nubians.—Josephus (i. 6, § 2) says, 'Phut was the founder of Libya: he called the inhabitants Phutites after himself; there is a river in the country of the Moors which bears that name; whence it is that we may see the greatest part of the Grecian historiographers mention that river and the adjoining country by the appellation of Phut; but its present name has been given it from one of the sons of Mizraim, who was called *Libys* (the progenitor of the *Lehabim*).' Jerome adopts this view, which has also been indorsed by Bochart, J. D. Michaelis, Gesenius, Rosenmüller, Von Bohlen, Delitzsch, Keil, and Kalisch. The versions (LXX., Vulgate) corroborate it also" (P. Holmes, D. D., in Kitto, article "Iam"). Dr. Holmes also holds that the territory of Phut was much more extensive than that of the Lehabim (who were only a branch of Mizraim), and that, while the Lehabim bordered on Upper Egypt, the children of Phut bordered on Lower Egypt, and extended westward along the northern coast of Africa and into the interior of the continent. TONGUES, CONFUSION OF.

**Phu'vab** (fr. Heb. = *month*? Ges.; = פֶּחַב), a son of Issachar (Gen. xlv. 13); = פֶּחַב or פֶּחַב 2.

**Phy-gel'lus** [-jel-] (fr. Gr. = *fugitive*, Cruden), a Christian connected with those in Asia of whom St. Paul speaks as turned away from himself (2 Tim. i. 15). It is open to question whether their repudiation of the apostle was joined with a declension from the faith, and whether the open display of the feeling of Asia took place—at least so far as Phygellus and Hierogenes were concerned—at Rome. Phygellus may have forsaken (see 2 Tim. iv. 16) the apostle at some critical time when his support was expected; or he may have been a leader of some party of nominal Christians at Rome, such as the apostle describes at an earlier period (Phil. i. 15, 16) opposing him there.

**Phy-lac'ter-y** (fr. Gr., literally = *safeguard, protection*). FRONTLETS.

\* **Phy-si'cian** [fe-zish'an]. MEDICINE.

**Pi-be'seth** (Heb. fr. Egyptian = *the goddess Bast* or *Bubastis*; see below), a town of Lower Egypt, mentioned only in Ez. xxx. 17. In hieroglyphics its name is written *Bahesht*, *Bast*, and *Ha-Bahesht*. The Coptic forms are *Bast*, with the article *Pi* (= *the*) prefixed, *Poubaste*, *Poubast*, &c.; the Greek *Boubastis*, *Boubastos*; and the Latin *Bubastis*. Bubastis was situated on the west bank of the Pelusiac or Bubastite branch of the Nile, in the Bubastite nome, about forty miles from the central part of Memphis. Herodotus speaks of its site as having been raised by those who dug the canals for Sesostris, and afterwards by the labor of criminals under Sabacôs the Ethiopian, or rather the Ethiopian dominion. He mentions the temple of the goddess Bubastis as more beautiful than any other known to him. It lay in the midst of the city, was built of the finest red granite, and had round it a sacred enclosure

of about 600 feet square, beyond which was a larger circuit, 940 feet by 1,200. The temple is entirely ruined, but the names of Rameses II. of the nineteenth dynasty, Userken I. (Osorchon I.) of the twenty-second, and Nekht-har-heb (Nectanebo I.), of the thirtieth, have been found here, as well as that of the goddess *Bast*. There are also remains of the ancient houses of the town, and amidst the houses on the northwest side are the thick walls of a fort which protected the temple below (Sir G. Wilkinson, in Rawlinson's *Herodotus*). The goddess *Bast* (or *Bubastis*), who was here the chief object of worship, = *Peshl*, the goddess of fire. Both names accompany a lion-headed figure, and the cat was sacred to them. Herodotus considers the goddess Bubastis = Artemis (DIANA). Manetho relates that a chasm of the earth opened at Bubastis in the time of the first king of the second dynasty, and many perished. The twenty-second dynasty (SHISHAK, &c.) was a line of Bubastite kings. Bubastis was taken and its walls were destroyed by the Persians B. C. 352; but it was a place of some importance under the Romans.

**Pic'ture**. In two of the passages in which "picture" is used in A. V. (Idol. 17) it denotes (so Mr. Phillott) idolatrous representations, either independent images, or more usually stones "portrayed," i. e. sculptured in low relief, or engraved and colored (Ez. xxiii. 14). Movable pictures, in the modern sense, were doubtless unknown to the Jews; but colored sculptures and drawings on walls or on wood, as mummy-cases, must have been familiar to them in Egypt. (CEILING; COLORS, II. 4; EMBALMING.) Mr. Phillott supposes the "pictures of silver" of Prov. xxv. 11, were wall-surfaces or cornices with carvings.—In Is. ii. 16, where the A. V. has "pleasant pictures," margin "pictures of desire." Dr. J. A. Alexander translates "*images* (i. e. visible objects) of *desire*, or rather admiration and delight," and understands it as a general expression for all attractive and majestic objects.

**Piece of Gold**. The A. V., in the passage respecting Naaman, relating that he "took with him ten talents of silver, and six thousand of gold, and ten changes of raiment" (2 K. v. 5), supplies "pieces" as the word understood; but "shekels," as designating the value of the whole quantity, not individual pieces, is preferable. MONEY.

\* **Piece of Mon'ey** (Mat. xvii. 27) = **STATER**.

**Piece of Sil'ver**. I. In the O. T. the word "pieces" is used in the A. V. for a word understood in the Hebrew, except one case (see below). The phrase is always "a thousand" or the like "of silver" (Gen. xx. 16, xxxvii. 28, xlv. 22; Judg. ix. 4, xvi. 5; 2 K. vi. 25; Hos. iii. 2; Zech. xi. 12, 13). In similar passages the word "shekels" occurs in the Hebrew (Gen. xxiii. 15, &c.). In other passages the A. V. supplies the word "shekels" instead of "pieces" (Deut. xxii. 19, 29; Judg. xvii. 2, 3, 4, 10; 2 Sam. xviii. 11, 12), and of these the first two require this to be done. The SHEKEL was the common weight for money, and therefore most likely to be understood in an elliptical phrase. The exceptional case in which a word corresponding to "pieces" is found in the Hebrew is in Ps. lxxviii. 30, Heb. 31. The Heb. *rats*, used here only, probably = "a piece" broken off, or a fragment: there is no reason to suppose that a coin is meant. (MONEY).—II. In the N. T. two Greek words are rendered "piece of silver," viz. *drachmê* and *argurion*. (1.) The first (Lk. xv. 8, 9) = **DRACHMA** or **DRACHM**, a Greek silver coin, equivalent, at the time

of St. Luke, to the Roman denarius (A. V. "PENNY"). (2.) The second word occurs in the account of the betrayal of our Lord for "thirty pieces of silver" (Mat. xxvi. 15, xxvii. 3, 5, 6, 9). If the most common silver pieces be meant, they would be denarii. (PENNY.) The parallel passage (Zech. xi. 12, 13; OLD TESTAMENT, C) must, however, be taken into consideration, where, if our view be correct, shekels must be understood (compare Ex. xxi. 20). It is more probable that the thirty pieces of silver were tetradrachms (= shekels; see STRATER) than that they were denarii (so Mr. R. S. Poole).—In Acts xix. 19 the word "pieces" is supplied in the A. V.—"50,000 pieces of silver," i. e. probably 50,000 drachms or denarii = \$7,500 (Vulgate, Rbn. N. T. Lex.). EPHESUS 3; MAGIC.

**Piety** (fr. L. *pietas* = *dutiful conduct* toward God, parents, &c.). This word occurs but once in the A. V.: "Let them learn first to show piety at home," better, "toward their own household" (1 Tim. v. 4). The choice of this word here instead of the more usual equivalents of "godliness," "reverence," &c., was probably determined by the special sense of the L. *pietas* as toward parents. The Greek verb here translated "to show piety" is translated in Acts xvii. 23 "worship."

**Pigeon** = DOVE. TURTLE.

**Pi-ha-hi'roth** (Heb. = *mouth of the caverns*, but doubtless fr. Egyptian = *place where grass* [or *sedge*] grows, Ges.), a place before or at which the Israelites encamped, at the close of the third march from Rameses, when they went out of Egypt (Ex. xiv. 2, 9; Num. xxiii. 7, 8). The name is probably that of a natural locality. This or a similar name the late M. Freznel recognized in the modern *Ghuweybet-el-boos* (the bed of reeds), a place near where the passage of the RED SEA is supposed to have occurred. EXODUS, THE.

**Pilate** (fr. L. *Pilatus* = *armed with a javelin*, Cruden, &c., or probably [so Prof. Plumptre] *covered with a felt cap*, the badge of manumitted slaves), **Pon'ti-us** [-she-us] (L. of the sea, marine, Cruden; see below). The name indicates that he was connected, by descent or adoption, with the gens (or clan) of the Pontii, first conspicuous in Roman history in the person of Caius Pontius Telesinus, the great Samnite general. He was the sixth Roman PROCURATOR of Judea, and under him our Lord (JESUS CHRIST) worked, suffered, and died, as we learn, not only from the Scriptural authorities, but from Tacitus (*Ann.* xv. 44). He was appointed A. D. 25-6, in the twelfth year of TIBERIUS. One of his first acts was to remove the headquarters of the army from Cesarea to Jerusalem. The soldiers of course took with them their standards, bearing the image of the emperor, into the Holy City. No previous governor had ventured on such an outrage. The people poured down in crowds to Cesarea, where the procurator was then residing, and besought him to remove the images. After five days of discussion he gave the signal to some concealed soldiers to surround the petitioners, and put them to death unless they ceased to trouble him; but this only strengthened their determination, and they declared themselves ready rather to submit to death than forego their resistance to an idolatrous innovation. Pilate then yielded, and the standards were by his orders brought down to Cesarea. On two other occasions he nearly drove the Jews to insurrection; the first, when he hung up in his palace at Jerusalem some gilt shields inscribed with the names of deities, which were only removed by an order from

Tiberius; the second, when he appropriated the revenue from the redemption of vows (CORBAN) to the construction of an aqueduct. This order led to a riot, which he suppressed by sending among the crowd soldiers with concealed daggers, who massacred a great number, not only of rioters, but of casual spectators. To these specimens of his administration from profane authors we must add the slaughter of certain Galileans, which was told to our Lord as a piece of news (Lk. xiii. 1), and on which He founded some remarks on the connection between sin and calamity. It must have occurred at some feast at Jerusalem, in the outer court of the Temple. It was the custom for the procurators to reside at Jerusalem during the great feasts, to preserve order, and accordingly, at the time of our Lord's last passover, Pilate was occupying his official residence in Herod's palace (JESUS CHRIST; JUDGMENT-HALL; PRETORIUM); and to the gates of this palace (so Bishop Cotton, original author of this article) Jesus, condemned on the charge of blasphemy, was brought early in the morning by the chief priests and officers of the SANHEDRIM, who were unable to enter the residence of a Gentile, lest they should be defiled, and unfit to eat the PASS-OVER (Jn. xviii. 28). Pilate therefore came out to learn their purpose, and demanded the nature of the charge. At first they seem to have expected him to carry out their wishes without further inquiry, and therefore merely described our Lord as a disturber of the public peace; but as a Roman procurator had too much respect for justice, or at least understood his business too well to consent to such a condemnation, they were obliged to devise a new charge, and therefore interpreted our Lord's claims in a political sense, accusing Him of assuming the royal title, perverting the nation, and forbidding the payment of tribute to Rome (Lk. xxiii. 3; an account plainly presupposed in Jn. xviii. 33). It is plain that from this moment Pilate was distracted between two conflicting feelings: a fear of offending the Jews, and a conscious conviction that Jesus was innocent. Moreover, this last feeling was strengthened by his own hatred of the Jews, whose religious scruples had caused him frequent trouble, and by a growing respect for the calm dignity and meekness of the Sufferer. First he examined our Lord privately, and asked Him whether He was a king? There seems to have been in Pilate's mind a suspicion that the Prisoner really was what He was charged with being (34, xix. 8, 12, 22). He accepted as satisfactory Christ's assurance that His kingdom was *not of this world*, i. e. not worldly in its nature or objects, and therefore not to be founded by this world's weapons, though he could not understand the assertion that it was to be established by bearing witness to the truth. His famous reply, "*What is truth?*" was the question of a worldly-minded skeptical politician. At the close of the interview he came out to the Jews and declared the Prisoner innocent. To this they replied that His teaching had stirred up all the people from Galilee to Jerusalem. The mention of Galilee suggested to Pilate a new way of escaping from his dilemma, by sending on the case to HEROD ANTIPAS; but Herod, though propitiated by this act of courtesy, declined to enter into the matter. So Pilate was compelled to come to a decision; and first having assembled the chief priests and also the people, he announced to them that the Accused had done nothing worthy of death; but at the same time, in hopes of pacifying the Sanhedrim, he proposed to

scourge Him before he released Him. But as the accusers were resolved to have His blood, they rejected this concession, and therefore Pilate had recourse to a fresh expedient. It was the custom for the Roman governor to grant every year, in honor of the passover, pardon to one condemned criminal. Pilate therefore offered the people their choice between two, the murderer BARABBAS, and the Prophet whom a few days before they had hailed as the Messiah. To receive their decision he ascended the "judgment-seat," a portable tribunal which was carried about with a Roman magistrate to be placed wherever he might direct. (GABBATHA.) As soon as Pilate had taken his seat he received a mysterious message from his wife (according to tradition a proselyte of the gate, named Procla or Claudia Procula),<sup>1</sup> who had "suffered many things in a dream," which impelled her to entreat her husband not to condemn the Just One. But he had no longer any choice in the matter, for the rabble, instigated of course by the priests, chose Barabbas for pardon, and clamored for the death of Jesus; insurrection seemed imminent, and Pilate reluctantly yielded. But, before issuing the fatal order, he washed his hands before the multitude, as a sign that he was innocent of the crime, in imitation probably of the ceremony enjoined in Deut. xxi. As it produced no effect, Pilate ordered his soldiers to inflict the scourging preparatory to execution; but the sight of unjust suffering so patiently borne seems again to have troubled his conscience, and prompted a new effort in favor of the victim. But the priests only renewed their clamors for His death, and, fearing that the political charge of treason might be considered insufficient, returned to their first accusation of blasphemy, and quoting the law of Moses (Lev. xxiv. 16), which punished blasphemy with stoning, declared that He must die "because He made Himself the Son of God." But this title augmented Pilate's superstitious fears, already aroused by his wife's dream (Jn. xix. 7); he feared that Jesus might be one of the heroes or demigods of his own mythology; he took Him again into the palace, and inquired anxiously into His descent ("Whence art Thou?") and His claims, but, as the question was only prompted by fear or curiosity, Jesus made no reply. When Pilate reminded Him of his own absolute power over Him, He closed this last conversation with the irresolute governor by saying, "Thou couldst have no power at all against Me, except it were given thee from above; therefore he that delivered Me unto thee hath the greater sin." The result of this interview was one last effort to save Jesus by a fresh appeal to the multitude; but now arose the formidable cry, "If thou let this man go, thou art not Cesar's friend;" and Pilate, to whom political success was as the breath of life, again ascended the tribunal, and finally pronounced the desired condemnation. So ended Pilate's share in the greatest crime which has been committed since the world began. That he did not immediately lose his feelings of anger against the Jews who had thus compelled his acquiescence, and of compassion and awe for the Sufferer whom he had unrighteously sentenced, is plain from his curt and angry refusal to alter the inscription which he had prepared for the cross, his ready

<sup>1</sup> The system of administration under the Roman Republic forbade the governors of provinces to take their wives with them, but the practice had gained ground under the Empire, and Tacitus (*Ann.* iii. 38) records the failure of an attempt to reinforce the old regulation.

acquiescence in the request by Joseph of Arimathea that the body might be given up to him rather than consigned to the common sepulchre reserved for those who had suffered capital punishment, and his sullen answer to the demand of the Sanhedrim that the sepulchre should be guarded. We learn from Josephus (xviii. 4, §§ 1, 2) that his anxiety to avoid giving offence to Cesar did not save him from political disaster. The Samaritans were unquiet and rebellious. Pilate led his troops against them, and defeated them easily enough. The Samaritans complained to Vitellius, now president of Syria, and he sent Pilate to Rome to answer their accusations before the emperor. When he reached it he found Tiberius dead, and Caius (Caligula) on the throne, A. D. 36. Eusebius adds that soon afterward, "wearied with misfortunes," he killed himself. As to the scene of his death there are various traditions. One is that he was banished to Vienna Allobrogum (Vienne on the Rhone), where a singular monument—a pyramid on a quadrangular base, fifty-two feet high—is called Pontius Pilate's tomb. Another is that he sought to hide his sorrows on the mountain by the Lake of Lucerne, now called Mount Pilatus; and there, after spending years in its recesses, in remorse and despair rather than penitence, plunged into the dismal lake which occupies its summit. We learn from Justin Martyr, Tertullian, Eusebius, &c., that Pilate made an official report to Tiberius of our Lord's trial and condemnation; and in a homily ascribed to Chrysostom, certain memoranda are spoken of as well-known documents in common circulation. The *Acts of Pilate*, now extant in Greek, and two Latin epistles from him to the emperor, are certainly spurious.

**PIL'dash** (Heb. *flame of fire*, *Fü.*), one of the eight sons of Nahor, Abraham's brother, by his wife and niece, Milcah (Gen. xxii. 22).

**PIL'e-ha** (Heb. *a slice*, *Ges.*), a chief of the people, probably a family, who sealed the covenant with Nehemiah (Neh. x. 24).

**PIL'lar** (Heb. usually *ammüd*; Gr. *stulos*). The notion of a pillar is of a shaft or isolated pile, either supporting or not supporting a roof. Pillars form an important feature in Oriental architecture, partly perhaps as a reminiscence of the *TEXT* with its supporting poles, and partly also from the use of flat roofs, in consequence of which the chambers were either narrower or divided into portions by columns. (HOUSE.) The general practice in Oriental buildings of supporting flat roofs by pillars, or of covering open spaces by awnings stretched from pillars, led to an extensive use of them in construction. At Nineveh the pillars were probably of wood, and it is very likely that the same construction prevailed in the "house of the forest of Lebanon," with its hall and porch of pillars (1 K. vii. 2, 6). (PALACE.) The "chapters" of the two pillars JACHIN and BOAZ resembled the tall capitals of the Persepolitan columns (so Mr. Phillott). (CHAPTER; PERSEPOLIS; TEMPLE.)—But perhaps the earliest application of the pillar was the votive or monumental. This in early times consisted of nothing but a single stone or pile of stones (Gen. xxviii. 18, xxxi. 46, &c.).—Lot's wife became a "pillar" of salt (ix. 26; Heb. *nētsib* = a statue, pillar, *Ges.*; GARRISON 2).—The stone EZZEL (1 Sam. xx. 19) was probably a terminal stone or waymark.—The "place" set up by Saul (xv. 12) is explained by Jerome to be a trophy. The word used (Heb. *ydd* = hand) is the same as

<sup>1</sup> Perhaps this name for monument in Hebrew may stand

that for Absalom's pillar (A. V. "place," 2 Sam. xviii. 18). So also Jacob set up a pillar (Heb. *matsebhâh*; Inol. 15) over Rachel's grave (Gen. xxxv. 20). The monolithic tombs and obelisks of Petra are instances of similar usage.—The Heb. *'al hâ-ammûd*, in the A. V. "by a pillar" (2 K. xi. 14, xxiii. 3), "at his pillar" (2 Chr. xxiii. 13), Gesenius, Keil, &c., translate on the platform, i. e. raised stand or elevated place erected for the king to stand on (= the brazen "scaffold" in 2 Chr. vi. 13?). The figurative use of the term "pillar," in reference to the cloud and fire accompanying the Israelites on their march, or as in Cant. iii. 6, and Rev. x. 1, is plainly derived from the notion of an isolated column not supporting a roof. (CLOUD, PILLAR OF; EARTH.) "A pillar is the emblem of firmness and steadfastness (Jer. i. 18; Rev. iii. 12), and of that which sustains or supports (Gal. ii. 9; 1 Tim. iii. 15)" (Dr. W. L. Alexander, in Kitto). PILLAR, PLAIN OF THE.

**Pil'lar, Plain of the**, or rather "oak of the pillar" (marg., Heb. *êlôn mutsebhâh*), a tree which stood near Shechem, and at which the men of Shechem and the house of Millo assembled to crown Abimelech son of Gideon (Judg. ix. 6). MEONENIM.

**Pilled** = *peeled, stripped* (Gen. xxx. 37, 38; Lev. xiii. 40 marg.). PEELED.

\* **Pil'low**, the A. V. translation of—1. Heb. *cebîr* = something braided or plaited, hence, a quilt, mattress, Ges.; a net, curtain of goat's hair, Ewald, W. A. Wright (1 Sam. xix. 13, 16 only).—2. Heb. pl. *ceâthôth* = cushions, pillows, Ges.; according to the Rabbins, long pillows, bolsters (Ez. xiii. 18, 20 only). Fürst proposes the translation cases of skin or of parchment, or boxes, in which oracular little images or oracular savings were kept, and which were fastened to the joints of the hands or to the arms, as an oracle-requisite for lying prophetesses. (MAGIC.)—3. Heb. pl. *mêra'ashôth* = at the head, under the head, LXX., Vulgate, Ges., Fii. (Gen. xxviii. 11, 18), once translated "at his head" (1 K. xix. 6), elsewhere translated "for his bolster" (1 Sam. xix. 13, 16), or "at his bolster" (xxvi. 7, 11, 12).—4. Gr. *prosephalaion* = a cushion for the head, a pillow (Mk. iv. 28 only; in LXX. = No. 2. BED.

**Pil'tai** (Heb. = PELATIAH, Ges.), the representative of the priestly house of Moadiah, or Maadiah, in the time of Joiakim the son of Jeshua (Neh. xii. 17).

**Pine, Pine'-tree**, the A. V. translation of—1. Heb. *tûhâr* (Is. xli. 19, lx. 13). What tree is intended is not certain. Gesenius inclines to think the oak, as implying duration; the Chaldee has a species of PLANE; the LXX. renders FIR; the Vulgate, &c., ELM; Henderson favors "pine." Pine-trees grew on Lebanon; but the etymology is regarded as indicating some other tree.—2. Heb. *shemen* (Neh. viii. 15), elsewhere rendered "OIL-TREE," &c. ASH.

**Pin'na-cle**, the A. V. translation of Gr. *pterugion* (literally a little wing), which occurs only in Mat. iv. 5, and Lk. iv. 9. It is plain, 1. that *pterugion* with the article is not a pinnacle, but the pinnacle. 2. That by the word itself we should understand an edge or border, like a feather or a fin. The only part of the Temple which answered to the modern sense of pinnacle was the golden spikes erected on the roof to prevent birds from settling there. Light-foot suggests the porch or vestibule, which projected

like shoulders on each side of the Temple. Robinson (N. T. Lex.), Fairbairn, &c., refer it to the highest point of the Temple-buildings, probably the elevation of the middle portion of the southern portico, which at its eastern end impended at a dizzy height over the valley of the Kidron. Mr. Phillott supposes it may mean the battlement ordered by law to be added to every roof.

**Pi'non** (Heb. DARKNESS, Ges.), a "DUKE" of Edom, i. e. head or founder of a tribe of that nation (Gen. xxxvi. 41; 1 Chr. i. 52). Eusebius and Jerome make the seat of the tribe at PUNON.

**Pipe** (Heb. *hâlîl* or *châlîl*; Gr. *aulos*). The "pipe" is one of the simplest, and therefore probably one of the oldest, of musical instruments. The pipe and tabret (TIMBREL), instruments of a peaceful and social character, were used at the banquets of the Hebrews (Is. v. 12), and their bridal processions (Mishna), and accompanied the simpler religious services, when the young prophets, returning from the high-place, caught their inspiration from the harmony (1 Sam. x. 5); or the pilgrims, on their way to the great festivals of their ritual, beguiled the weariness of the march with psalms sung to the simple music of the pipe (Is. xxx. 29). When Solomon was proclaimed king, all the people went up after him to Gihon, piping with pipes (1 K. i. 40). The sound of the pipe was apparently a soft wailing note, appropriate in MOURNING and at funerals (Mat. ix. 23), and in the lament of the prophet over the destruction of Moab (Jer. xlviii. 36). The pipe was the type of perforated wind instruments, and was even used in the Temple-choir, as appears from Ps. lxxxvii. 7, where "the players on instruments" are properly "pipers." Twelve days in the year, according to the Mishna, the pipes sounded before the altar. They were of reed, and not of copper or bronze, because the former gave a softer sound. Of these there were not less than two nor more than twelve. In later times the funeral and deathbed were never without the professional pipers or flute-players (Mat. ix. 23), a custom which still exists. In the social and festive life of the Egyptians the pipe played as prominent a part as among the Hebrews. The Egyptian single pipe was a straight tube, without any increase at the mouth; held with both hands when played; apparently not more than a foot and a half long, and often much smaller; with three or four holes; sometimes with a small mouth-piece of reed or thick straw. The double pipe consisted of two pipes, perhaps occasionally united by a common mouth-piece; one, played with the left hand, having few holes and serving as a bass; the other, played with the right hand, having more holes, and giving a sharp tone. Among the instruments used in Egyptian bands, we generally find either the double pipe or the flute, and sometimes both; the former being played both by men and women, the latter exclusively by women. Any of the instruments above described would have been called by the Hebrews *hâlîl* or *châlîl*, and not improbably they derived their knowledge of them from Egypt. The single pipe is said to have been the invention of the Egyptians alone, who attribute it to Osiris. MUSIC; MUSICAL INSTRUMENTS.

\* **Pi'per** (Rev. xviii. 22). MINSTREL; PIPE.

**Pi'ra** (fr. Gr.) (1 Esd. v. 19), apparently a repetition of the name CAPHIRA.

**Pi'ram** (Heb. *wild-ass-like*, i. e. indomitable, Ges.), Amorite king of Jarmuth, defeated with his four confederates by Joshua, and hung at MAKKEDAH (Josh. x. 8, 27).

in some connection with the ancient custom of sculpturing on the gravestones or sepulchral columns an upturned hand with the arm (Robinson's Ges. Heb. Lex. s. v.).

**Pir'a-thon** (Heb. *chief?* Ges.), a place "in the land of Ephraim in the mount of the Amalekite" (Judg. xii. 15 only); situated at the modern village of *Fer'ata*, on an eminence about six miles W. S. W. of *Nābulus* (Shechem).

**Pir'a-thon-ite** = the native of, or dweller in, **PIR-ATHON**. Two such are named in the Bible. 1. **ABDON** 1 the Judge (Judg. xii. 18, 15).—2. **BENAIAH** 2 (2 Sam. xxiii. 30; 1 Chr. xi. 31, xxvii. 14).

**Pisgah** (Chal. *part, piece*, Ges.), a mountain range or district (Num. xxi. 20, xxiii. 14; Deut. iii. 27, xxxiv. 1), the same as, or a part of, that called the mountains of **ABARIM** (comp. Deut. xxxii. 49 with xxxiv. 1). It lay on the E. of Jordan, contiguous to the field of Moab, and immediately opposite Jericho. The field of Zophim was situated on it, and its highest point or summit—its "head"—was the Mount **NEBO**. No traces of the name **Pisgah** have been met with in later times on the E. of Jordan, but in the Arabic garb of *Rās el-Fenkhhah* (almost identical with the Hebrew *Rōsh hap-pisgah* = *top of the Pisgah*) it is attached to a well-known headland on the northwestern end of the Dead Sea, a mass of mountain bounded on the S. by the *Wady en-Nār* (**KIDRON**), over against the northern part of which, on a conical hill, about ten miles E. of Jerusalem, is situated the great Mussulman sanctuary of *Naby Mūsa* (= *Prophet Moses*), where Mohammedan tradition (irreconcilable, of course, with the Scriptures) has placed **Pisgah** and the burial-place of **Moses**. For "the springs of **Pisgah**," see **ASHDOTH-PISGAH**.

**Pi-sid'i-a** (Gr. *the country of the Pisidae*), a district of Asia Minor, which cannot be very exactly defined, N. of **PAMPHYLIA**, and stretching along the range of **Taurus**. Northward it reached to, and was partly included in, **PHRYGIA**, which was similarly an indefinite district, though far more extensive. Thus **Antioch** in **Pisidia** (**ANTIOCH** 2) was sometimes called a Phrygian town. Both the country and its inhabitants were wild and rugged; and probably here the apostle encountered some of his "perils of robbers" and "perils of rivers." St. Paul passed through **Pisidia** twice in his first missionary journey (Acts xiii. 14, xiv. 24).

**Pi'son** (fr. Heb. = *overflowing*, Ges.), one of the four "heads" into which the stream flowing through **EDEN** 1 was divided (Gen. ii. 11).

**Pis'pah** (Heb. *a spreading*, Fül.), an Asherite, son of **Jether**, or **Ithran** (1 Chr. vii. 38).

**Pit**. In the A. V. this word appears with a figurative as well as a literal meaning, and represents several Hebrew words. 1. *Shēōl* (Num. xvi. 30, 33; Job xvii. 16), used only of the hollow, shadowy world, the dwelling of the dead. (HELL.) 2. *Shahath* or *shachath*. Here the sinking of the pit is the primary thought. It is dug into the earth (Ps. ix. 15 [Heb. 16], cxix. 85). Covered lightly over, it served as a trap for animals or men (xxxv. 7). It thus became a type of sorrow and confusion, from which a man could not extricate himself, of the dreariness of death (Job xxxiii. 18, 24, 28, 30). To "go down to the pit," is to die without hope. 3. *Bōr*. In this word, as in the cognate *Bēer*, the special thought is that of a pit or well dug for water. The process of desynonymizing which goes on in all languages, seems to have confined the former to the state of the well or **CISTERN**, dug into the rock, but no longer filled with water (Gen. xxvii. 30 ff., &c.). In the phrase "they that go down to the *pit*," it becomes even more constantly than the synonyms already noticed, the representative of the world of the dead (Ez. xxxi. 14, 16, xxxii. 18, 24; Ps. xxviii. 1, cxliii.

7). There may have been two reasons for this transfer. (1.) The wide deep excavation became the place of burial (Ez. xxxii. 24). (2.) The *pit*, however, in this sense, was never simply equivalent to burial-place. There is always implied in it a thought of scorn and condemnation (Zech. ix. 11; Is. li. 14; Jer. xxxviii. 6, 9). It is not strange that with the associations of material horror clustering round, it should have involved more of the idea of a place of punishment for the haughty or unjust, than did the *shēōl* or the grave. In Rev. ix. 1, 2, and elsewhere, the "pit" (Gr. *phrear*; *abussos*) is as a **dun-geon**. **PRISON**; **WELL**.

**Pitch**. The three Hebrew words *zepheth* (Ex. ii. 3; Is. xxxiv. 9 twice), *hēmār* or *chēmār* (A. V. "SLIME"), *cōpher* (Gen. vi. 4), all represent (so Mr. Bevan) the same object, viz. mineral pitch or asphalt, in its different aspects: *zepheth* (the *zift* of the modern Arabs), in its liquid state; *hēmār* or *chēmār*, in its solid state, from its red color; and *cōpher*, in reference to its use in overlaying wood-work. Dr. Thomson (i. 337) regards the "SLIME" and "pitch" of Ex. ii. 3 as *bitumen* and *tar*. The inflammable nature of pitch is noticed in Is. xxxiv. 9. **MOSES**; **NOAH**.

**Pitch'er** (Heb., usually *cod* [**BARREL**], once *nibul* [**BOTTLE**]; Gr. *keramion*) is used in A. V. to denote the water-jars or pitchers with one or two handles, used chiefly by women for carrying water, as in the story of **Rebecca** (Gen. xxiv. 15–20; but see Mk. xiv. 13; Lk. xxii. 10). This practice has been, and is still usual both in the East and elsewhere. The vessels used for the purpose are generally carried on the head or the shoulder. (See cut of Fountain of Nazareth, p. 312.) The Bedouin women commonly use skin-bottles. Such was the "bottle" carried by **Hagar** (Gen. xxi. 14). The same word is used of the pitchers employed by **Gideon's** 300 men (Judg. vii. 16). Probably earthen vessels were used by the Jews as by the Egyptians for containing both liquids and dry provisions. (**BARREL**; **BOTTLE**; **POT**; **VESSEL**.) "Pitcher" is used figuratively of the lip of man (Eccl. xii. 6). **MEDICINE**, p. 628.

**Pi'thom** (Heb. fr. Egyptian = the narrow place, Ges.; the *Atum* or *Tum*, a name of the sun-god, so R. S. Poole), one of the store-cities built by the Israelites for the first oppressor, the **PHARAOH** 3, "which knew not Joseph" (Ex. i. 11); probably in the most eastern part of Lower Egypt. Herodotus mentions a town called *Patumus* (in the Arabian nome on the Canal of the Red Sea), which seems = the *Thoum* or *Thou* of the *Itinerary* of Antoninus, probably the military station *Thohu* of the *Notitia*. **Pithom** and **Pathumus** have been supposed by the scholars of the French expedition, **Kitto**, **Ayre**, &c., to be at or near the present *Abbaseh*, at the entrance of the *Wady Tūmilāt*. **EXODUS**, THE; **RAM-ESSES**.

**Pi'thon** (Heb.), a descendant of **King Saul**; one of the four sons of **Micah**, the son of **Mephibosheth** (1 Chr. viii. 35, ix. 41).

**Plague, the**. The disease now called the **Plague**, which has ravaged Egypt and neighboring countries in modern times, is supposed to have prevailed there in former ages. **Manetho** speaks of "a very great plague" in the reign of **Semempses**, the seventh king of the first dynasty, B. C. about 2500 (so Mr. R. S. Poole, original author of this article). The difficulty of determining the character of the pestilences of ancient and mediæval times, even when carefully described, warns us not to conclude that every such mention refers to the **Plague**. The

Plague in recent times has not extended far beyond the Turkish Empire and the kingdom of Persia. As an epidemic it takes the character of a pestilence, sometimes of the greatest severity. The Plague, when most severe, usually appears first on the northern coast of Egypt, having previously broken out in Turkey or North Africa, W. of Egypt. It ascends the river to Cairo, rarely going much further. The mortality is often enormous, and Mr. Lane remarks of the plague of 1835:—"It destroyed not less than eighty thousand persons in Cairo, i. e. one-third of the population; and far more, I believe, than two hundred thousand in all Egypt." The Plague is considered to be a severe kind of typhus, accompanied by buboes. Like the cholera, it is most violent at the first outbreak, causing almost instant death; later it may last three days, and even longer, but usually it is fatal in a few hours. Several Hebrew words are translated "pestilence" or "plague;" but not one of these can be considered as designating by its signification the Plague.<sup>1</sup> Whether the disease be mentioned must be judged from the sense of passages, not from the sense of words. Those pestilences which were sent as special judgments, and were either supernaturally rapid in their effects, or in addition directed against particular culprits, are beyond the reach of human inquiry. But we also read of pestilences which, although sent as judgments, have the characteristics of modern epidemics, not being rapid beyond nature, nor directed against individuals (Lev. xxvi. 26; Deut. xxviii. 21). In neither of these passages does it seem certain that the Plague is specified. The notices in the prophets (Am. iv. 10; Zech. xiv. 18, compare 12) do not seem to afford sufficiently positive evidence that the Plague was known in those times. Hezekiah's disease has been thought to have been the Plague, and its fatal nature, as well as the mention of a boil, makes this not improbable. On the other hand, there is no mention of a pestilence among his people at the time.

<sup>1</sup> "Plague" is the A. V. translation of—1. Heb. *deber*, properly — *destruction, death*, Ges. (Mos. xiii. 14 only); translated "murrain" (Ex. ix. 3; Ps. lxxviii. 50 margin); elsewhere — *pestilence* (Ex. ix. 3; ix. 15, and more than forty other passages). It is used with a wide signification for different pestilences.—2. Heb. *magqephah* (compare No. 3) — *a plague*, sent from God (Ex. ix. 14), spoken chiefly (so Gesenius) of pestilential and fatal diseases (Num. xiv. 37, xvi. 48-50 [xvii. 13-15, Heb.], xxv. 8, &c.), thrice properly translated "slaughter" (1 Sam. iv. 17; 2 Sam. xvii. 9, xviii. 7).—3. Heb. *neqeph* (from the same root with No. 2) — *a plague*, a divine judgment, mostly (so Gesenius) of a fatal disease sent from God (Ex. xii. 13; Num. xvi. 46, 47 [xvii. 11, 12, Heb.], &c.), once properly translated "stumbling" (Is. viii. 14). The verb *nigaph* itself is translated "to plague" (Ex. xxxii. 35, &c.), "smite" (Judg. xx. 35, &c.), &c.—4. Heb. *macoah* — *a beating or smiting, a stroke, blow, or wound, also defeat, slaughter*, Ges. (Lev. xxvi. 21; Num. xl. 33, &c.), also translated "stripe" (Deut. xxv. 3; Prov. xxi. 30), "stroke" (Ezra. ix. 5; Is. xiv. 6), "wound" (1 K. xlii. 35, &c.), "sore" (Is. i. 6), "blow" (Jer. xiv. 17), "slaughter" (Josh. x. 10, 20, &c.), &c.—5. Heb. *naga* — *a stroke or blow, also a spot, mark, or blemish*, Ges. (Gen. xii. 17; Ex. xl. 1; Lev. xlii. 2 ff., xiv. 8, 23 ff., &c.), also translated "stroke" (Deut. xvii. 8, &c.), "stripe" (2 Sam. vii. 14, &c.), &c. The orig. final verb *naga* is sometimes translated "to plague" (Gen. xli. 17; Ps. lxxiii. 5, 14), or "smite" (2 K. xv. 5, &c.), but usually "to touch" (Gen. iii. 8, xxii. 25, 32 [26, 33, Heb.]; Lev. v. 2, 3, &c.) or "reach" (Gen. xxxviii. 12, &c.), &c.—6. Gr. *mastix* — *a whip, scourge*, tropically a scourge from God, i. e. *disease, plague*, Rbn. *N. T. Lex.* (Mk. iii. 10, v. 29, 31; Lk. vii. 31), elsewhere — "scourging" (Acts xxii. 24; Heb. xli. 36).—7. Gr. *plage* — *a stroke, stripe, or blow, also a wound, a stroke or blow from God, i. e. a plague, or calamity*, Rbn. *N. T. Lex.* (Rev. ix. 20, xi. 6, xv. 1 ff., &c.; only in Rev.) also translated "wound" (Rev. xiii. 3, 12, 14), "stripe" (Lk. xii. 48, &c.).

There does not seem, therefore, to be any distinct notice of the Plague in the Bible.

**Plagues** (see note <sup>1</sup>, under PLAGUE), the **Ten**; the name popularly given to the ten fearful judgments (MIRACLES) from JEHOVAH inflicted by the hand of MOSES and AARON upon PHARAOH 4 and his people for their oppression of the Israelites.—I. *The Plague*. Although it is distinctly stated that the plagues prevailed throughout EGYPT, yet the descriptions seem principally to apply to that part of Egypt which lay nearest to GOSHEN, and more especially to "the field of ZOAN," or the tract about that city (so Mr. R. S. Poole, original author of this article). We must look especially to Lower Egypt for our illustrations, while bearing in mind the evident prevalence of the plagues throughout the land.—II. *The Occasion* on which the plagues were sent is described in Ex. iii.-xii.—III. *The Plagues*. 1. *The Plague of Blood*. When Moses and Aaron came before Pharaoh, a miracle was required of them. Then Aaron's rod became "a serpent" (A. V.), or rather "a crocodile" (DRAGON 2.) The Egyptian magicians called by the king produced what seemed to be the same wonder, yet Aaron's rod swallowed up the others (vii. 8-12). This passage, taken alone, would appear to indicate that the magicians succeeded in working wonders, but, if compared with the others which relate their opposition on the occasions of the first three plagues, a contrary inference seems more reasonable. A comparison with other passages strengthens us in the inference that the magicians succeeded merely by juggling. (MAGIC.) Not only was the water of the Nile smitten, but all the water, even that in vessels, throughout the country. The fish died, and the river stank. The Egyptians could not drink it, and digged around it for water. This plague was doubly humiliating to the religion of the country, as the Nile was held sacred, as well as some kinds of its fish, not to speak of the crocodiles, which probably were destroyed. Those who have endeavored to explain this plague by natural causes, have referred to the changes of color to which the Nile is subject, the appearance of the Red Sea, and the so-called rain and dew of blood of the middle ages; the last two occasioned by small fungi of very rapid growth. But such theories do not explain why the wonder happened at a time of year when the Nile is most clear, nor why it killed the fish and made the water unfit to be drunk.—2. *The Plague of Frogs*. When seven days had passed after the smiting of the river, Pharaoh was threatened with another judgment, and, on his refusing to let the Israelites go, the second plague was sent. The river and all the open waters of Egypt brought forth countless frogs, which not only covered the land, but filled the houses, even in their driest parts and vessels, for the ovens and kneading-troughs are specified. The magicians again had a seeming success in their opposition. This must have been an especially trying judgment to the Egyptians, as frogs were included among the sacred animals. The frog was sacred to the goddess *Hekt*, who is represented with the head of this reptile.—3. *The Plague of Lice*. The account of the third plague is not preceded by the mention of any warning to Pharaoh. Aaron was commanded to stretch out his rod and smite the dust, which became, as the A. V. reads the word, "lice" in man and beast. The magicians again attempted opposition; but, failing, confessed that the wonder was of God (viii. 16-19). There is much difficulty as to the animals meant; but this plague

does not seem to be especially directed against the superstitions of the Egyptians.—4. *The Plague of Flies*. In the case of the fourth plague, as in that of the first, Moses was commanded to meet Pharaoh in the morning as he came forth to the water, and to threaten him with a judgment if he still refused to give the Israelites leave to go and worship. He was to be punished by what the A. V. renders “swarms of flies,” “a swarm of flies,” or, in the margin, “a mixture of noisome brants.” The proper meaning of the word *‘arôb* (FLY) is a question of extreme difficulty. Josephus, and almost all the Hebrew commentators, explain it as meaning a *mixture*, and here a mixture of wild animals. The LXX. and Philo suppose it = a dog-fly. The Vulgate has “every kind of flies.” It is almost certain, from Ex. viii. 29, 31 (25, 27 Heb.), that a single creature is intended. Oedmann proposes the cockroach (*Blatta orientalis*), a kind of beetle. Yet our experience (so Mr. Poole) does not bear out the idea that any kind of beetle is injurious to man in Egypt. If we conjecture that a fly is intended, perhaps it is more reasonable to infer that it was the common fly, which in the present day is probably the most troublesome insect in Egypt.—5. *The Plague of the Murrain of Beasts*. Pharaoh was next warned that, if he did not let the people go, there should be on the day following “a very grievous MURRAIN,” upon the horses, asses, camels, oxen, and sheep of Egypt, whereas those of the children of Israel should not die. Accordingly, “all the cattle of Egypt died; but of the cattle of the children of Israel died not one.” Yet Pharaoh still continued obstinate (ix. 1-7). This plague fell upon the Egyptian sacred animals of two of the kinds specified, the oxen and the sheep; but it would be most felt in the destruction of the greatest part of their useful beasts. In modern times murrain is not an unfrequent visitation in Egypt, and is supposed to precede the Plague.—6. *The Plague of Boils*. The next judgment appears to have been preceded by no warning, excepting, indeed, that, when Moses publicly sent it abroad in Egypt, Pharaoh might no doubt have repented at the last moment. We read that Moses and Aaron were to take ashes of the furnace, and Moses was to sprinkle it “toward the heaven in the sight of Pharaoh.” It was to become “small dust” throughout Egypt, and “be a boil breaking forth *with* BLAINS upon man and upon beast.” (MEDICINE.) This plague may be supposed to have been either an infliction of boils, or a pestilence like the PLAGUE of modern times. The former is, however, the more likely explanation.—7. *The Plague of Hail*. The seventh plague is preceded by a warning to Pharaoh, respecting the terrible nature of the plagues that were to ensue if he remained obstinate. For the morrow a very grievous and unprecedented HAIL was threatened, which would kill all the unsheltered cattle and men. Accordingly, “the LORD sent thunder and hail, and the fire ran along upon the ground.” Thus man and beast were smitten, and the herbs and every tree broken, save in the land of Goshen. Pharaoh acknowledged his wickedness, promised, if the plague were withdrawn, to let the Israelites go, but again broke his promise (ix. 18-35). The ruin caused by the hail was evidently far greater than by any of the earlier plagues. Hail is now extremely rare, but not unknown, in Egypt, and the narrative seems to imply that it sometimes falls there.—8. *The Plague of Locusts*. Pharaoh was now threatened with a plague of locusts, to begin the next day, by which every thing the hail had left was to be

devoured. This was to exceed any like visitations that had happened in the time of the king's ancestors. “And the locusts went up over all the land of Egypt, and rested in all the coasts of Egypt: very grievous *were they*; before them there were no such locusts as they, neither after them shall be such. For they covered the face of the whole earth, so that the land was darkened; and they did eat every herb of the land, and all the fruit of the trees which the hail had left: and there remained not any green thing in the trees, or in the herbs of the field, through all the land of Egypt.” Pharaoh again confessed his sin, the plague was removed; but again he would not let the people go (x. 1-20). This plague has not the unusual nature of the one that preceded it, but it even exceeds it in severity, and so occupies its place in the gradation of the more terrible judgments that form the later part of the series. Its severity can be well understood by those who have been in Egypt in a part of the country where a flight of locusts has alighted. In this case the plague was greater than an ordinary visitation, since it extended over a far wider space, rather than because it was more intense; for it is impossible to imagine any more complete destruction than that always caused by a swarm of locusts. (LOCUSTS).—9. *The Plague of Darkness*. After the plague of locusts we read at once of a fresh judgment. “There was a thick DARKNESS in all the land of Egypt three days: they saw not one another, neither rose any from his place for three days: but all the children of Israel had light in their dwellings.” Pharaoh then gave the Israelites leave to go, if only they left their cattle; but when Moses required that they should take these also, he again refused (x. 21-29). This plague has been illustrated by reference to the *Samoom* and the hot wind of the *Khamûseen*. The former is a sand-storm which occurs in the desert, seldom lasting more than a quarter of an hour or twenty minutes, but for the time often causing the darkness of twilight, and affecting man and beast. The hot wind of the *Khamûseen* usually blows for three days and nights, and carries so much sand with it, that it produces the appearance of a yellow fog. It thus resembles the *Samoom*, though far less powerful and distressing in its effects. It is not known to cause actual darkness. (WIND.) The plague may have been an extremely severe sand-storm, miraculous in its violence and its duration, for the length of three days does not make it natural, since the severe storms are always very brief.—10. *The Death of the First-born*. Before the tenth plague Moses warned Pharaoh. “And Moses said, Thus saith the LORD, About midnight will I go out into the midst of Egypt: and all the first-born in the land of Egypt shall die, from the first-born of Pharaoh that sitteth upon his throne, even unto the first-born of the maid-servant that is behind the mill; and all the first-born of beasts. And there shall be a great cry throughout all the land of Egypt, such as there was none like it, nor shall be like it any more.” He then foretold that Pharaoh's servants would pray him to go forth. “And he went out from Pharaoh in heat of anger.” But Pharaoh still refused to let Israel go (xi. 4-10). The PASSOVER was then instituted, and the houses of the Israelites sprinkled with the blood of the victims. The FIRST-BORN of the Egyptians were smitten at midnight, as Moses had forewarned Pharaoh (xii. 30). The clearly miraculous nature of this plague, in its severity, its falling upon man and beast, and the singling out of the first-born,

puts it wholly beyond comparison with any natural pestilence, even the severest recorded in history, whether of the peculiar Egyptian Plague, or other like epidemics. The history of the Ten Plagues strictly ends with the death of the first-born. (EXODUS, THE; RED SEA, PASSAGE OF.) Here it is only necessary to notice that with the event last mentioned the recital of the wonders wrought in Egypt concludes, and the history of Israel as a separate people begins. The gradual increase in severity of the plagues is perhaps the best key to their meaning. They seem to have been sent as a series of warnings to the oppressor, to afford him a means of seeing God's will and an opportunity of repenting before Egypt was ruined. The lesson that Pharaoh's career teaches us seems to be, that there are men whom the most signal judgments do not affect so as to cause any lasting repentance. In this respect the after-history of the Jewish people is a commentary upon that of their oppressor.

**Plain**, the, A. V. translation of seven Hebrew words.—1. *Abel* perhaps answers more nearly to our word *meadow* than any other (so Mr. Grove, after Gesenius, &c.). It occurs in the names of ABEL-MAIM, ABEL-MEHOLOAH, ABEL-SHITTIM, and is rendered "plain" in Judg. xi. 33, "plain of vineyards." (ABEL-CHRAMIM.)—2. *Bik'ah*, *bik'ath* (when followed by a connected noun); properly (so Gesenius) = a cleft of the mountains, a *valley*; often also a *low plain*, a *wide plain*, level country. (VALLEY 4.) The great Plain or Valley of CELOSRIA or Coelosyria, which separates the two ranges of Lebanon and Anti-Lebanon, is considered by Mr. Grove to be what is called in the Bible the *bik'ath* (A. V. "plain of") AVEN (Am. i. 5), and also probably the *bik'ath* (A. V. "valley of") LEBANON (Josh. xi. 17, xii. 7) and *bik'ath* (A. V. "valley of") MIZPEH (xi. 8), and still known throughout Syria as *el-Buk'd'a* or *Ard el-Buk'd'a*. But Gesenius, Fürst, &c., regard this "valley" of Lebanon as that which lies at the foot of Hermon and Anti-Lebanon around the sources of the Jordan, not *el-Buk'd'a*. The Jordan "valley" at Jericho appears (so Mr. Grove) to be once mentioned under this title (Deut. xxiv. 3). Mr. Grove regards the "valley" of MEGIDDO (2 Chr. xxxv. 22; Zech. xii. 11, A. V. "Megiddon") and the "plain" of ONO as not identified. Out of Palestine we find denoted by the word *bik'ah* the "plain" of the land of Shinar (Gen. xi. 2), the "plain" or "valley" of Mesopotamia (Ez. iii. 22, 23, viii. 4, xxxvii. 1, 2), and the "plain" in the province of Dura (Dan. iii. 1).—3. *Hac-Cicdar* (= *the circuit, the circumjacent tract*, Ges.) is confined in its topographical sense to the Jordan Valley (Gen. xiii. 10-12, xix. 17, 25-29; Deut. xxxiv. 3; 2 Sam. xviii. 23; 1 K. vii. 46; 2 Chr. iv. 17; Neh. iii. 22, xii. 28). (REGION ROUND ABOUT; ZOAR.)—4. *Ham-Mishor* (= *the evenness, hence the level region, the plain*, Ges.) is thought by Mr. Grove, as well as No. 3, to be an archaic term existing from a pre-historic date. It occurs in the Bible in the following passages:—Deut. iii. 10, iv. 43; Josh. xiii. 9, 16, 17, 21, xx. 8; 1 K. xx. 23, 25; 2 Chr. xxvi. 10; Jer. xlvi. 8, 21. In each of these, with one exception, it is used for the district in the neighborhood of Heshbon and Dibon—the *Belka* of the modern Arabs, their most noted pasture-ground. But it is used in 1 K. xx. 23, apparently with the mere general sense of *low land*, or rather *flat land*, in which chariots could be manoeuvred—as opposed to uneven, mountainous ground. In Jer. xxi. 19 the term denotes (so Fürst, Henderson, &c.) the level tract of considerable extent on Zion itself, A. V. "the

rock of the plain." In Zech. iv. 7 *mişor* is used without the article to denote "a plain."—5. *Id-'Arabah* had an absolutely definite meaning, being restricted to the valley of the Jordan, and to its continuation S. of the Dead Sea. (ARABAH; PALESTINE, II. § 36, &c.).—6. *Hash-Shéphelah* (= *the low country*, Ges.), the invariable designation of the depressed, flat, or gently undulating region which intervened between the highlands of Judah and the Mediterranean, and was commonly in possession of the Philistines. (JUDAH I (II.); LOW COUNTRY; PALESTINE, II. §§ 29, 30, &c.; SEPHELA; VALLEY 5.)—7. *Elon*. Our translators have uniformly rendered this word "plain" (once "oak" in the margin, Judg. ix. 6), doubtless following the Vulgate, which in about half the passages has *convallis*. But this is not the verdict of the majority or the most trustworthy of the ancient versions. They regard the word as meaning an *oak* or *grove of oaks*, a rendering supported by all, or nearly all, the commentators and lexicographers of the present day. The passages in which the word occurs erroneously translated "plain," are as follows:—Plain of MOREH (Gen. xii. 6; Deut. xi. 30), Plain of MAMRE (Gen. xiii. 18, xiv. 13, xviii. 1), Plain of ZAAAIM (Judg. iv. 11), Plain of the PILLAR (ix. 6), Plain of MEONENIM (ix. 37), Plain of TABOR (1 Sam. x. 3).—8. The Plain of ESDRELON, A. V. "the valley of Jezreel," is designated in the original by *'emek*. (VALLEY 1.)—In Lk. vi. 17 "plain" in the A. V. is the translation of Gr. *topos pedinos*, literally a *plain* (or *level*) place; the adjective *pedinos* being also in the LXX. = No. 4 above (Deut. iv. 43) and No. 6 (Josh. ix. 1).

\* **Plas'ter** = PLASTER.

\* **Plait'ing**, used only of braiding the HAIR (1 Pet. iii. 3).

\* **Planes**, the A. V. translation of Heb. pl. *maknu'oth*, which occurs only in Is. xlv. 13 in describing the carpenter's work in making an idol. Gesenius, Fürst, J. A. Alexander, &c., render the word *chisels, carving-tools*. HANDICRAFT.

\* **Plane'-tree** (Ecclus. xxiv. 14). CHESTNUT-TREE.

\* **Plan'ets** (2 K. xxiii. 5). ASTRONOMY; MAZZAROTH.

**Plas'ter**. 1. The mode of making plaster-cement has been described above. (MORTAR 2.) Plaster is mentioned in Scripture: (1.) A house infected with LEPROSY was to be replastered (Lev. xiv. 42, 43, 48). (2.) The words of the law were to be engraved on Mount Ebal on stones previously coated with plaster (Deut. xxvii. 2, 4; Josh. viii. 32). The process here mentioned was probably like that adopted in Egypt for receiving bas-reliefs. The wall was first made smooth, and its interstices, if necessary, filled up with plaster. When the figures had been drawn, and the stone adjacent cut away so as to leave them in relief, a coat of lime whitewash was laid on, and followed by one of varnish after the painting of the figures was complete. (3.) It was probably a similar coating of cement, on which the fatal letters were traced by the mystic hand "on the plaster of the wall" of Belshazzar's palace at Babylon (Dan. v. 5). 2. A plaster of figs was applied to Hezekiah's boil (Is. xxxviii. 21), and "mollifying plaster" is spoken of in Wis. xvi. 12. MEDICINE.

\* **Plat, to** (Gr. *plekō*) = to form by interweaving; used only of making the CROWN OF THORNS (Mat. xxvii. 29; Mk. xv. 17; Jn. xix. 2).

\* **Plea**. JUDGE; TRIAL, &c.

**Pledge**. DEPOSIT; HOSTAGES; LOAN.

**Piel'a-des** [plee'ya-deez] (L. fr. Gr. = *the seven stars*; usually derived from Gr. *plō* [to sail], because

Greek navigation began at the rise and closed at the setting of the Pleiades; in mythology, seven daughters of Atlas and Pleione, placed by Jupiter among the stars [L. & S.]. The Heb. *cimḥ* (properly a *heap, cluster*, especially of stars, Ges.) so rendered occurs in Job ix. 9, xxxviii. 31, and Am. v. 8. In the last passage our A. V. has "the seven stars," although the Geneva version translates the word "Pleiades" as in the other cases. In Job the LXX. has *Pleias* (singular of Pleiades), the order of the Hebrew words having been altered, while in Amos there is no trace of the original. The Vulgate renders *Hyades* in Job ix. 9, *Pleiades* in Job xxxviii. 31, and *Arcturus* in Am. v. 8. The Jewish commentators are no less at variance. R. David Kimchi in his Lexicon says: "R. Jonah wrote that it was a collection of stars called in Arabic *Al Thuraiyd*." That *Al Thuraiyd* = the Pleiades is proved by the words of Aben Ragel: "*Al Thuraiyd* is the mansion of the moon, in the sign Taurus, and it is called the celestial hen with her chickens." *Hen and chickens* is an old English name for the same stars. Aben Ezra held that *Cimḥ* was a single large star, *Aldebaran* the brightest of the Hyades, while *Cesil* (A. V. "ORION") was *Antares* the heart of Scorpio. Gesenius, Fürst, and most modern commentators agree with the A. V. in rendering *Cimḥ* by "Pleiades." The Pleiades or Seven Stars constitute a well-known cluster of stars in the neck of the constellation Taurus (the Bull). Only six are usually seen by the naked eye. (FAMINE.) *Hēa* or *Hoa*, the third god of the Assyrian triad, was known among the stars by the name of *Kimmūt*, which Rawlinson compares with the Heb. *Cimḥ*, and identifies with the constellation Draco.

**Plough or Plow.** AGRICULTURE.

\* **Plumb-line** (Heb. *ḥndk*) = a line with a plummet or weight attached; used by carpenters, masons, &c., for determining perpendicularity (Am. vii. 7, 8). HANDICRAFT; PLUMMET.

\* **Plumb-line**, the A. V. translation of Heb. *meḥkeleth* (Is. xxviii. 17) = *mishkḥeleth* (2 K. xxi. 13) = a PLUMB-LINE, *plummet*, used in levelling, Ges. The "plumb-line" and "plummet" are used symbolically to denote the strict line of justice according to which God would deal with those that provoked Him (Ayre).

**Poch'e-reth** [pok-]. The children of Pochereth of Zebaim were among the children of Solomon's servants who returned with Zerubbabel (Ezr. ii. 57; Neh. vii. 59).

**Poe'try, He'brew** (originally by Mr. W. A. Wright). The attributes which are common to all poetry, and which the poetry of the Hebrews possesses in a higher degree perhaps than the literature of any other people, it is unnecessary here to describe. But the points of contrast are so numerous, and the peculiarities which distinguish Hebrew poetry so remarkable, that these alone require a full and careful consideration. It is a phenomenon observed in the literature of all nations, that the earliest form in which the thoughts and feelings of a people find utterance is the poetic. Prose is an aftergrowth, the vehicle of less spontaneous, because more formal, expression. And so it is in the literature of the Hebrews. (LAMECH 1.) Of the three kinds of poetry illustrated by the Hebrew literature, the *lyric* occupies the foremost place. The Shemitic nations have nothing approaching to an *epic* poem, and in proportion to this defect the lyric element prevailed more greatly, commencing in the pre-Mosaic times, flourishing in rude vigor during the earlier periods of the

Judges, the heroic age of the Hebrews, growing with the nation's growth and strengthening with its strength, till it reached its highest excellence in David, the warrior-poet, and from thenceforth began slowly to decline. *Gnomic* poetry arises from the desire felt by the poet to express the results of the accumulated experiences of life in a form of beauty and permanence. Its thoughtful character requires for its development a time of peacefulness and leisure; for it gives expression, not like the lyric to the sudden and impassioned feelings of the moment, but to calm and philosophic reflection. Being less spontaneous in its origin, its form is of necessity more artificial. The period during which it flourished among the Hebrews corresponds to its domestic and settled character. We meet with it at intervals up to the time of the Captivity, and, as it is chiefly characteristic of the age of the monarchy, Ewald has appropriately designated this era the "artificial period" of Hebrew poetry. From the end of the eighth century B. C. the decline of the nation was rapid, and with its glory departed the chief glories of its literature. After the Captivity we have nothing but the poems which formed part of the liturgical services of the Temple. Whether *dramatic* poetry, properly so called, ever existed among the Hebrews, is, to say the least, extremely doubtful (see III. below, and CANTICLES).—I. *Lyrical Poetry*. The literature of the Hebrews abounds with illustrations of all forms of lyrical poetry, in its most manifold and wide-embracing compass, from such short ejaculations as the songs of the two Lamechs (Gen. iv. 23, 24, v. 29) and Psalms xv., cxvii., &c., to the longer chants of victory and thanksgiving, like the songs of Deborah and David (Judg. v.; Ps. xviii.). The names by which the various kinds of songs were known among the Hebrews will supply some illustration of this: 1. *Shir*, a "song" in general, adapted for the voice alone (Gen. xxxi. 27; Judg. v. 12; 1 K. iv. 32 [v. 12 Heb.]; Ps. xxx. title, &c.). 2. *Mizmôr*, a "psalm," or song to be sung with any instrumental accompaniment (titles of Ps. iii.-vi. and more than fifty others).<sup>1</sup> 3. *Neginah*, probably a melody expressly adapted for stringed instruments. (NEGINOTH.) 4. *Maschil*, probably a lyrical song requiring nice musical skill. 5. *Michtam*, a term of extremely doubtful meaning. 6. *Shiggarim* (Ps. vii. 1), probably a wild, irregular, dithyrambic song; or, according to some, a song to be sung with variations.—But, besides these, there are other divisions of lyrical poetry of great importance, which have regard rather to the subject of the poems than to their form or adaptation for musical accompaniments. Of these we notice:—(1.) *Tehillâh* (A. V. "praise"), a hymn of praise. The plural *tehillim* is the title of the Book of PSALMS in Hebrew. The 145th Psalm is entitled "David's (Psalm) of praise." To this class belong the songs which relate to extraordinary deliverances, such as the songs of Moses (Ex. xv.) and of Deborah (Judg. v.), and Psalms xviii. and lxxviii., which have all the air of chants to be sung in triumphal processions. Such were the hymns sung in the Temple services. (2.) *Kinâh* (A. V. "lamentation"), the lament or dirge, of which there are many examples, whether uttered over an individual or as an outburst of grief for the

<sup>1</sup> The kindred Heb. nouns *z'mir* (Ps. xcv. 2; elsewhere "song," Job xxxv. 10, &c.) and *z'mrah* (Ps. lxxxix. 1, 2 [Heb. 3], xcvi. 5; elsewhere "melody," Is. li. 3, &c.) are also translated "psalm," and the verb *zamar* is twice translated "sing psalms" (1 Chr. xvi. 9; Ps. cv. 2; elsewhere usually "sing praises," xlvii. 6 [Heb. 7] four times, 7 [Heb. 8], &c.).

calamities of the land (2 Sam. i. 19-27, iii. 33, 34, xviii. 33). (3.) *Shir yēdiddāh* (A. V. "song of loves"), a love-song (Ps. xlv. 1), in its external form at least.—Other kinds of poetry there are which are lyric in form and spirit, but gnomic in subject. These may be classed as (4.) *Māshāl* (A. V. "PARABLE," proverb, &c.), properly a similitude, and then a parable, or sententious saying, couched in poetic language. Such are the songs of Balaam (Num. xxiii. 7, 18, xxiv. 3, 15, 20, 21, 23), which are eminently lyric in character; the mocking ballad in Num. xxi. 27-30, which has been conjectured to be a fragment of an old Amorite war-song; and the apologue of Jotham (Judg. ix. 7-20), both which last are strongly satirical in tone. But the finest of all is the magnificent prophetic song of triumph over the fall of Babylon (Is. xiv. 4-27). *Hidāh* or *chidāh* (= *mdshāl* in Ez. xvii. 2), an enigma (like the "RIDDLER" of Samson, Judg. xiv. 14), or "dark saying," as the A. V. has it in Ps. xlix. 4 [Heb. 5], lxxviii. 2, &c. Lastly, to this class belongs *molitāh*, a mocking, ironical poem (Hab. ii. 6, A. V. "taunting"). (5.) *Tephillāh*, "PRAYER," is the title of Psalms xvii., lxxvi., xc., cii., cxlii., and Hab. iii. All these are strictly lyrical compositions, and the title may have been assigned to them either as denoting the object with which they were written, or the use to which they were applied.—II. *Gnomic Poetry*. This division is occupied by a class of poems which are peculiarly Shemitic, and which represent the nearest approaches made by the people of that race to any thing like philosophic thought. Reasoning there is none: we have only results, and those rather the product of observation and reflection than of induction or argumentation. As lyric poetry is the expression of the poet's own feelings and impulses, so gnomic poetry is the form in which the desire of communicating knowledge to others finds vent. It has been already remarked that gnomic poetry, as a whole, requires for its development a period of national tranquillity. Its germs are the floating proverbs which pass current in the mouths of the people, and embody the experiences of many with the wit of one. The sayer of sententious sayings was to the Hebrews the wise man, the philosopher. No less than 3,000 proverbs are attributed to Solomon (1 K. iv. 32; Eccl. xii. 9). (PROVERBS, BOOK OF.) Of the earlier isolated proverbs but few examples remain (1 Sam. xxiv. 13; Ez. xii. 22, xviii. 2).—III. *Dramatic Poetry*. It is impossible to assert that no form of the drama existed among the Hebrew people; the most that can be done is to examine such portions of their literature as have come down to us, for the purpose of ascertaining how far any traces of the drama proper are discernible, and what inferences may be made from them. It is unquestionably true, as Ewald observes, that the Arab reciters of romances will many times in their own persons act out a complete drama in recitation, changing their voice and gestures with the change of person and subject. Something of this kind may possibly have existed among the Hebrews. But the mere fact of the existence of these rude exhibitions among the Arabs and Egyptians of the present day is of no weight when the question to be decided is, whether the Song of Songs (CANTICLES) was designed to be so represented, as a simple pastoral drama. Of course, in considering such a question, reference is made only to the external form of the poem, and, in order to prove it, it must be shown that the dramatic is the only form of representation which it could as-

sume, and not that, by the help of two actors and a chorus, it is capable of being exhibited in a dramatic form. All that has been done, in our opinion (so Mr. Wright), is the latter. M. Rénan (*Le Cantique des Cantiques*) has given a spirited translation of the poem, and arranged it in acts and scenes, according to his own theory of the manner in which it was intended to be represented. He divides the whole into sixteen cantos, which form five acts and an epilogue. He does not regard the Song of Songs as a drama in the same sense as the products of the Greek and Roman theatres, but as dramatic poetry in the widest application of the term, i. e. a composition conducted in dialogue and corresponding to an action. He conjectures that it is a *libretto* (a little book containing the words) intended to be completed by the play of the actors and by music, and represented in private families, probably at marriage-feasts, the representation being extended over the several days of the feast. We must look for a parallel to it in the middle ages, when, besides the mystery-plays, there were scenic representations sufficiently developed. The groundwork of this hypothesis is taken away by M. Rénan's own admission that dramatic representations are alien to the spirit of the Shemitic races. The simple corollary to this proposition must be that the Song of Songs is not a drama, but in its external form partakes more of the nature of an eclogue or pastoral dialogue. It is scarcely necessary after this to discuss the question whether the Book of Job is a dramatic poem or not. Inasmuch as it represents an action and a progress, it is a drama as truly as any poem can be which develops the working of passion, and the alternations of faith, hope, distrust, triumphant confidence, and black despair, in the struggle which it depicts the human mind as engaged in, while attempting to solve one of the most intricate problems it can be called upon to regard. It is a drama as life is a drama, the most powerful of all tragedies; but that it is a dramatic poem, intended to be represented upon a stage, or capable of being so represented, may be confidently denied.—One characteristic of Hebrew poetry, not indeed peculiar to it, but shared by it in common with the literature of other nations, is its intensely national and local coloring. The writers were Hebrews of the Hebrews, drawing their inspiration from the mountains and rivers of Palestine, which they have immortalized in their poetic figures, and even while uttering the sublimest and most universal truths never forgetting their own nationality in its narrowest and intensest form. Examples might easily be multiplied in illustration of this remarkable characteristic of the Hebrew poets: they stand thick upon every page of their writings, and in striking contrast to the vague generalizations of the Indian philosophic poetry. In Hebrew, as in other languages, there is a peculiarity about the diction used in poetry—a kind of poetical dialect, characterized by archaic and irregular forms of words, abrupt constructions, and unusual inflections, which distinguish it from the contemporary prose or historical style. It is universally observed that archaic forms and usages of words linger in the poetry of a language after they have fallen out of ordinary use.—But the form of Hebrew poetry is its distinguishing characteristic, and what this form is, has been a vexed question for many ages. The Therapeutæ, as described by Philo (ALEXANDRIA), sang hymns and psalms of thanksgiving to God, in divers measures and strains; and these were either new or an-

cient ones composed by the old poets, who had left behind them measures and melodies of trimeter verses. According to Josephus, the Song of Moses at the Red Sea (Ex. xv.) was composed in the hexameter measure; and again, the song in Deut. xxxii. is described as a hexameter poem. The Psalms of David, according to him, were in various metres, some trimeters and some pentameters. Eusebius characterizes the great Song of Moses and the 118th (119th) Psalm as metrical compositions in what the Greeks call the heroic metre. They are said to be hexameters of sixteen syllables. The other verse compositions of the Hebrews are said to be in trimeters. Jerome says that the Book of Job, from iii. 3 to xlii. 6, is in hexameters, with dactyls and spondees. The conclusion seems inevitable that these terms are employed simply to denote a general external resemblance. There are, says Jerome, four alphabetical Psalms, the 110th (111th), 111th (112th), 118th (119th), and the 144th (145th). In the first two, one letter corresponds to each clause or verse, which is written in trimeter iambics. The others are in tetrameter iambics, like the song in Deuteronomy. In Ps. 118 (119), eight verses follow each letter: in Ps. 144 (145), a letter corresponds to a verse. In Lamentations we have four alphabetical acrostics, the first two of which are written in a kind of Sapphic metre; for three clauses which are connected together and begin with one letter (i. e. in the first clause) close with a period in heroic measure. The third is written in trimeter, and the verses in threes each begin with the same letter. The fourth is like the first and second. The Proverbs end with an alphabetical poem in tetrameter iambics. There can be little doubt that these terms are mere generalities, and express no more than a certain rough resemblance. Joseph Scaliger was one of the first to point out the fallacy of Jerome's statement with regard to the metres of the Psalter and the Lamentations, and to assert that these books contained no verse bound by metrical laws, but that their language was merely prose, animated by a poetic spirit. Gerhard Vossius says, that in Job and the Proverbs there is rhythm but no metre; i. e. regard is had to the number of syllables but not to their quantity. But, in spite of the opinions pronounced by these high authorities, there were still many who believed in the existence of a Hebrew metre, and in the possibility of recovering it (Gomarus, Marcus Meibomius, Bishop Hare, Anton, Sir W. Jones, Greve, Bellermann, &c.). The theories proposed for this purpose were various, and the enumeration of them forms a curious chapter in the history of opinion. Among those who believed in the existence of a Hebrew metre, but in the impossibility of recovering it, were Carpoz, Lowth, Pfeiffer, Herder to a certain extent, Jahn, Bauer, and Buxtorf. Lowth "begins by asserting that certain of the Hebrew writings are not only animated with the true poetic spirit, but, in some degree, conched in poetic numbers; yet, he allows, that the quantity, the rhythm, or modulation of Hebrew poetry, not only is unknown, but admits of no investigation by human art or industry; he states, after Abrabanel, that the Jews themselves disclaim the very memory of metrical composition; he acknowledges that the artificial conformation of the sentences is the sole indication of metre in these poems; he barely maintains the *credibility* of attention having been paid to numbers or feet in their compositions; and, at the same time, he confesses the utter impossibility of determining whether He-

brew poetry was modulated by the ear alone, or according to any definite and settled rules of prosody" (Jebb, *Sacr. Lit.* p. 16). On the rhythmical character of Hebrew poetry, as opposed to metrical, the remarks of Jebb are remarkably appropriate. "Hebrew poetry," he says (*Sacr. Lit.* p. 20), "is universal poetry: the poetry of all languages, and of all peoples; the collocation of words (whatever may have been the sound, for of this we are quite ignorant) is primarily directed to secure the best possible announcement and discrimination of the sense: let, then, a translator only be literal, and, so far as the genius of his language will permit, let him preserve the original order of the words, and he will infallibly put the reader in possession of all, or nearly all, that the Hebrew text can give to the best Hebrew scholar of the present day. Now, had there been originally metre, . . . the poetry could not have been, as it unquestionably and emphatically is, a poetry, not of sounds, or of words, but of things." Among those who maintain the absence in Hebrew poetry of any regularity perceptible to the ear, may be mentioned Richard Simon, Wasmuth, Alstedius, the author of the book *Cozzi*, and Rabbi Azariah de Rossi. Rabbi Azariah appears to have anticipated Bishop Lowth in his theory of parallelism: at any rate his treatise contains the germ which Lowth developed. But Lowth's system of parallelism was more completely anticipated by Schoettgen in a treatise, found in his *Horæ Hebraicæ*, vol. i. pp. 1249-1263, diss. vi., "*de Exergasia Sacra*" (literally on *sacred working out*). This *exergasia* he defines to be the conjunction of entire sentences signifying the same thing: so that *exergasia* bears the same relation to sentences that synonymy does to words. But whatever may have been achieved by his predecessors, the delivery of Lowth's lectures on Hebrew Poetry, and the subsequent publication of his translation of Isaiah, formed an era in the literature of the subject. Starting with the alphabetical poems as the basis of his investigation, because that in them the verses or stanzas were more distinctly marked, Lowth came to the conclusion that they consist of verses properly so called, "of verses regulated by some observation of harmony or cadence; of measure, numbers, or rhythm," and that this harmony does not arise from rhyme, but from what he denominates parallelism. Parallelism he defines to be the correspondence of one verse or line with another, and divides it into three classes, synonymous, antithetic, and synthetic. (1.) Parallel lines *synonymous* correspond to each other by expressing the same sense in different but equivalent terms, as in the following examples, which are only two of the many given by Lowth:—

"O-Jehovah. in-thy-strength the-king shall-rejoice;  
And-in-thy-salvation how-greatly shall-he-exult!  
The-desire-of-his-heart thou-hast-granted-unto-him;  
And-the-request-of-his-lips thou-hast-not-denied."

Ps. xxi. 1, 2.

"For-the-moth shall-consume-them like-a-garment;  
And-the-worm shall-eat-them like-wool:  
But-my-righteousness shall-endure-for-ever:  
And-my-salvation to-the-age-of-ages."—Is. li. 8.

To this first division of Lowth's Jebb objects that the name *synonymous* is inappropriate, for the second clause, with few exceptions, "*diversifies* the preceding clause, and generally so as to rise above it, forming a sort of climax in the sense." He suggests as a more appropriate name for parallelism of this kind, *cognate parallelism* (*Sacr. Lit.* p. 38). (2.) Lowth's second division is *antithetic parallelism*;

when two lines correspond with each other by an opposition of terms and sentiments; when the second is contrasted with the first, sometimes in expressions, sometimes in sense only, so that the degrees of antithesis are various. As for example—

"A wise son rejoiceth his father;  
But a foolish son is the grief of his mother."  
Prov. x. 1.  
"The memory of the just is a blessing;  
But the name of the wicked shall rot."—Prov. x. 7.

The gnomic poetry of the Hebrews abounds with illustrations of antithetic parallelism. (3.) *Synthetic or constructive parallelism*, where the parallel "consists only in the similar form of construction; in which word does not answer to word, and sentence to sentence, as equivalent or opposite; but there is a correspondence and equality between different propositions, in respect of the shape and turn of the whole sentence, and of the constructive parts—such as noun answering to noun, verb to verb, member to member, negative to negative, interrogative to interrogative." One of the examples of constructive parallels given by Lowth is Is. l. 5, 6:—

"The Lord Jehovah hath opened mine ear,  
And I was not rebellious;  
Neither did I withdraw myself backward—  
I gave my back to the smiters.  
And my cheeks to them that plucked off the hair;  
My face I hid not from shame and spitting."

Jebb gives as an illustration Ps. xix. 7-10. (4.) To the three kinds of parallelism above described Jebb adds a fourth, which seems rather to be an unnecessary refinement upon than distinct from the others. He denominates it *introverted parallelism*, in which he says, "there are stanzas so constructed that, whatever be the number of lines, the first line shall be parallel with the last; the second with the penultimate; and so throughout in an order that looks inward, or, to borrow a military phrase, from flanks to centre" (*Sacr. Lit.* p. 53). Thus—

"My son, if thine heart be wise,  
My heart also shall rejoice;  
Yea, my reins shall rejoice  
When thy lips speak right things."

Prov. xxiii. 15, 16.

"Unto Thee do I lift up mine eyes, O Thou that dwellest in the heavens;  
Behold as the eyes of servants to the hand of their masters;  
As the eyes of a maiden to the hands of her mistress,  
Even so look our eyes to Jehovah our God, until he have mercy upon us."—Ps. cxlvi. 1, 2.

A few words may now be added with respect to the classification proposed by De Wette, in which more regard was had to the rhythm. The four kinds of parallelism are—(1.) That which consists in an equal number of words in each member, as in Gen. iv. 23. Under this head are many minor divisions. (2.) Unequal parallelism, in which the number of words in the members is not the same. This has five subdivisions (Ps. lxxviii. 33; Job x. 1; Ps. xl. 10, i. 3, xxiii. 3). (3.) Out of the parallelism which is unequal in consequence of the composite character of one member, another is developed, so that both members are composite (xxxi. 11). This has three subdivisions. (4.) Rhythmical parallelism which lies merely in the external form of the diction (xix. 11, &c.). De Wette also held that there were in Hebrew poetry the beginnings of a composite rhythmical structure like our strophes. Thus in Ps. xlii. xliii., a refrain marks the conclusion of a larger rhythmical period. The essay of Koester on the strophes, or the parallelism of verses in Hebrew poetry endeavors to show that the verses are subject to the same laws of symmetry as the verse

members; and that consequently Hebrew poetry is essentially strophical in character. Ewald's treatise requires more careful consideration; but it is impossible here to give a fair idea of it.—The rules of Hebrew poetry, as laid down by the Jewish grammarians, are briefly these:—1. That a sentence may be divided into members, some of which contain two, three, or even four words, and are accordingly termed *Binary*, *Ternary*, and *Quaternary* members respectively. 2. The sentences are composed either of *Binary*, *Ternary*, or *Quaternary* members entirely, or of these different members intermixed. 3. That in two consecutive members it is an elegance to express the same idea in different words. 4. That a word expressed in either of these parallel members is often not expressed in the alternate member. 5. That a word without an accent, being joined to another word by *Makképé* (a hyphen), is generally (though not always) reckoned with that second word as one.—After reviewing the various theories with regard to the structure of Hebrew poetry, it must be confessed that, beyond the discovery of very broad general laws, little has been done toward elaborating a satisfactory system. Probably this want of success is due to the fact that there is no system to discover; and that Hebrew poetry, while possessed in the highest degree of all sweetness and variety of rhythm and melody, is not fettered by laws of versification as we understand the term. ECCLESIASTES; INSPIRATION; LAMENTATIONS.

**Poison**, the A. V. translation of—1. Heb. *hémáh* or *chémáh*, from a root signifying to be hot (Deut. xxxii. 24, 33; Job vi. 4; Ps. lvi. 4, cxi. 3), often translated "wrath" (Num. xxv. 11; Ps. lxxix. 6, &c.), or "fury" (Gen. xxvii. 44; Lev. xxvi. 28; Is. xxvii. 4, &c.), &c. As a poison, it in all cases denotes animal poison, and not vegetable or mineral. The only allusion to its application is in Job vi. 4, where reference seems to be made to the custom of anointing arrows with the venom of a snake, a practice the origin of which is of very remote antiquity.—2. Heb. *rósh*, if a poison at all, denoting a vegetable poison primarily, and only twice (Deut. xxxii. 33, A. V. "venom;" Job xx. 16, A. V. "poison") used of the venom of a serpent. In other passages where it occurs, it is translated "GALL" in the A. V., except in Hos. x. 4, where it is rendered "hemlock." Whether poisonous or not, it was a plant of bitter taste. Gesenius, on the ground that the word in Hebrew also signifies "head," rejects the hemlock (Celsius), colocynth (Oedmann), henbane, and darnel (Michaelis), and proposes the "poppy" instead; from the "heads" in which its seeds are contained. "Water of *rósh*" is then "opium," but there appears in none of the above passages to be any allusion to the characteristic effects of opium.—3. Gr. *ios* (Rom. iii. 13; Jas. iii. 8), used figuratively in both cases, the primary reference being to the poison of serpents; = No. 1 in LXX. (Rust.)—A clear case of suicide by poison is related in 2 Mc. x. 13, where Ptolemeus Macron is said to have destroyed himself by this means. But we do not find a trace of it among the Jews. It has been suggested, indeed, that the Gr. *pharmakeia* of Gal. v. 20 (A. V. "witchcraft"), signifies poisoning, but it more probably refers to the concoction of magical potions and love-philtres. ADDER; ASP; GOURD 2; MEDICINE; SCORPION; SERPENT; TARES; WORMWOOD.

\* **Poll** = the head (Num. i. 2, 18, &c.).

\* **Poll** = to cut off, clip, or shave the hair (2 Sam. xiv. 26; Ez. xlv. 20; Mic. i. 16; margin of Jer. ix. 26, xxv. 23, xlix. 32). **HAIR**

**Pollux.** CASTOR AND POLLUX.

**Polygamy** (fr. Gr. = *many marriages* or *much marriage*). MARRIAGE.

**Pomegranate** [pum-] by universal consent is = Heb. *rimmôn*, a word which occurs frequently in the O. T., and is used to designate either the pomegranate-tree or its fruit. The pomegranate was doubtless early cultivated in Egypt: hence the complaint of the Israelites in the wilderness of Zin (Num. xx. 5), this "is no place of figs, or of vines, or of pomegranates." The tree, with its characteristic calyx-crowned fruit, is easily recognized on the Egyptian sculptures. The spies brought to Joshua "of the pomegranates" of Canaan (Num. xiii. 23; compare Deut. viii. 8). The trees suffered occasionally from the devastations of locusts (Josh. i. 12; compare Hag. ii. 19). Mention is made of "an orchard of pomegranates" in Cant. iv. 13, and in viii. 2 of "spiced wine of the juice of the pomegranate." In iv. 3 the cheeks (A. V. "temples") of the Beloved are compared to a section of "pomegranate within the locks," in allusion to the beautiful rosy color of the fruit. Carved figures of the pomegranate adorned the tops of the pillars in Solomon's Temple (1 K. vii. 18, 20, &c.); and worked representations of this fruit in blue, purple, and scarlet, ornamented the hem of the robe of the ephod (Ex. xxviii. 33, 34). Russell (*Natural History of Aleppo*, i. 85, 2d ed.) states "that the pomegranate" (*rummân* in Arabic) "is common in all the gardens." The pomegranate-tree (*Punica granatum*) derives its name from the Latin *pomum granatum* = *grained apple*. It belongs to the natural order *Myrtaceae*,

Pomegranate (*Punica granatum*).

being, however, rather a bush than a tree. The foliage is dark green; the flowers are crimson; the fruit is red when ripe, and contains a quantity of juice. The rind is used in the manufacture of morocco leather. It is a native of Asia.

**Pommels** [pum'melz] (pl. fr. L. = *little apples*, i. e. knobs or balls), the A. V. translation of pl. of Heb. *gûlâh* (2 Chr. iv. 12, 13 only), translated "howls" (1 K. vii. 41, &c.). The Hebrew word = convex projections belonging to the capitals of pillars. BOWL; CHAPTER.

**Pond** (Heb. *âgdm*). The ponds of Egypt (Ex. vii. 19, viii. 5) were doubtless water left by the inunda-

tion of the Nile. Ponds for FISH are mentioned in Is. xix. 10. POOL.

**Pont'us Pilate.** PILATE, PONTIUS.

**Pont'us** (L. fr. Gr. = *the sea*, especially *the open sea*; in ancient geography applies to the *Euxine* [or Black] Sea, called *Pontus Euxinus* or *Pontus* simply; then to the country at the E. end of the Black Sea, L. & S.), a large district in the N. of Asia Minor, extending along the coast of the Pontus Euxinus or *Euxine Sea*. It is three times mentioned in the N. T. (Acts ii. 9, 10, xviii. 2; 1 Pet. i. 1). All these passages agree in showing that there were many Jewish residents in the district. The one brilliant passage of its history is the life of the great Mithridates, who reigned more than half a century, and was at one time master of twenty-five nations, but was defeated by Pompey B. C. 66. The western part of his dominions was incorporated with the province of *BITHYNIA*; the rest was divided among various chieftains. Under Nero the whole region was made a Roman province, bearing the name of Pontus. AQUILA.

**Pool**, the A. V. translation of—1. Heb. *âgdm* (Is. xiv. 23, xxxv. 7, xli. 18, xlii. 15), also translated "POND."—2. Heb. *birâchâh*, usually "bleeding," translated "pools" in pl. once only (Ps. lxxxiv. 6).—3. Heb. *birâchâh*, the usual word closely connected with the Arabic *Birkeh*, a reservoir for water. These pools, like the tanks of India, are in many parts of Palestine and Syria the only resource for water during the dry season, and the failure of them involves drought and calamity (Is. xlii. 15). Of the various pools mentioned in Scripture, perhaps the most celebrated are the pools of Solomon, about three miles S. W. of Bethlehem, called by the Arabs *el-Eurak*, from which an aqueduct was carried which still supplies JERUSALEM with water (Eccl. ii. 6; Ecclesi. xxiv. 30, 31). There are three pools, partly hewn out of the rock, and partly built with masonry, but all lined with cement, and all situated in the sides of the valley of ETAM, with a dam across its opening, which forms the eastern side of the lowest pool. Dr. Robinson makes the upper pool 380 feet long, 236 broad at E., and 229 at W., 25 deep at E., 160 above middle pool; the middle pool 423 feet long, 250 broad at E., and 160 at W., 39 deep, 248 above lower pool; the lower pool 582 feet long, 207 broad at E., and 148 at W., 50 deep. They appear to be supplied mainly from a spring in the ground above. (See cut on p. 877).—4. Heb. *mikveh* = *a gathering together, collection of waters*, Ges. (Ex. vii. 19 only, margin "gathering"), translated "gathering together" in Gen. i. 10, &c.—5. Gr. *kolumbethra* (Jn. v. 2, 4, 7, ix. 7, 11) = *a swimming place*, hence *a pool, pond, reservoir*, Rbn. N. T. Lex.; in LXX. = No. 3. BETHESDA; CONDUIT; JERUSALEM III., § 9; SILOAM.

**Poor.** The general kindly spirit of the Law toward the poor is sufficiently shown by such passages as Deut. xv. 7, for the reason that (ver. 11) "the poor shall never cease out of the land." Among the special enactments in their favor the following must be mentioned. 1. The right of GLEANING (Lev. xix. 9, 10; Deut. xxiv. 19, 21). (CORNER.) 2. From the produce of the land in the SABBATICAL YEAR, the poor and the stranger were to have their portion (Ex. xxiii. 11; Lev. xxv. 6). 3. Reentry upon land in the JUBILEE year, with the limitation as to town homes (ver. 25-30). 4. Prohibition of USURY, and of retention of pledges (ver. 35, 37; Ex. xxii. 25-27, &c.). (DEPOSIT; LOAN.) 5. Permanent bondage forbidden, and manumission of Hebrew bondmen

Pools of Solomon, *el-Burak*, in *Wady Urtis* (valley of Etam) near Bethlehem; from the S. W.—From a photograph by J. Graham.—(Ayre.) The large stones in the near fore-ground form the S. E. corner of the upper pool. The middle pool being empty, the shelving rocks on its bottom, and its smooth-plastered embankment on the E. are visible. The lower pool is in the distance.

or bondwomen enjoined in the sabbatical and jubilee years (Deut. xv. 12-15; Lev. xxv. 39-42, 47-54). (SERVANT; SLAVE.) 6. Portions from the tithes to be shared by the poor after the Levites (Deut. xiv. 28, xxvi. 12, 13). (TITHE.) 7. The poor to partake in entertainments at the feasts of Weeks and Tabernacles (xvi. 11, 14; see Neh. viii. 10). 8. Daily payment of WAGES (Lev. xix. 13). Principles similar to those laid down by Moses are inculcated in N. T., as Lk. iii. 11, xiv. 13; Acts vi. 1; Gal. ii. 10; Jas. ii. 15. In later times mendicancy, which does not appear to have been contemplated by Moses, became frequent. (AGRICULTURE; ALMS; STRANGER.) The word "poor" often occurs in the Scriptures in a figurative sense (Mat. v. 3; Rev. iii. 17, &c.).

**Poplar**, the A. V. translation of Heb. *libneh* (Gen. xxx. 37; Hos. iv. 13). Several authorities (Celsius, the LXX. in Hos., Vulgate, Henderson, Hamilton [in Fbn.], &c.) favor the rendering of the A. V., and think the "white poplar" (*Populus alba*) is the tree denoted; others (the LXX. in Gen., Ar., Rosenmüller, Royle [in Kitto], Fürst, &c.) understand the "storax-tree" (*Styrax officinale*, Linn.), from which is obtained the fragrant resin called storax. Both poplars and styrax or storax trees are common in Palestine, and either would suit the passages where the Hebrew term occurs. Storax is mentioned in Eccles. xxiv. 15, together with other aromatic substances. The *Styrax officinale* is a shrub from nine to twelve feet high, with ovate leaves, which are white underneath; the flowers are in racemes, and are white or cream-colored.

**Por'a-tha, or Po-ra'tha** (Heb. fr. Pers. = *given by lot*? Ges.), one of Haman's ten sons slain by the Jews in Shushan the palace (Esth. ix. 8).

**Porch** [*o* as in *old*], the A. V. translation of—1. Heb. *ulām* or *ulām* (1 K. vi. 3, vii. 6 ff.; 1 Chr. xxviii. 11; Ez. xl. 7 ff., &c.) = *a vestibule, porch, portico*; applied especially to the vestibule or porch

erected on the eastern front of the TEMPLE (Gesenius).—2. Heb. *mišdérôn* (Judg. iii. 23 only) = the open gallery or porch, from which there was access to the private apartment (Gesenius).—3. Gr. *pylon* (Mat. xxvi. 71), probably the passage from the street into the first court of the house, in which in Eastern houses is the stone-bench, for the porter or persons waiting, and where also the master of the house often receives visitors and transacts business. The word is elsewhere uniformly translated "GATE" (Lk. xvi. 20; Acts x. 17; Rev. xxi. 12 ff., &c.).—4. Gr. *proaulion* (Mk. xiv. 68) = *the place before a court, vestibule*, Suidas; L. & S., Rbn. *N. T. Lex.*.—5. Gr. *stoa* (Jn. v. 2, x. 23; Acts iii. 11, v. 12), used for the colonnade or portico of BETHESDA, also for that of the TEMPLE, called Solomon's porch. HOUSE; PALACE.

**Por-el-us Fes'tus** (L.) FESTUS, PORCIS.

\* **Por'phyre** [-fir] (Fr. fr. Gr. *porphura* = *purple*) = porphyry, a hard rock, usually of feldspar, of variegated colors (purple, &c.), highly prized for its beauty when polished (Esth. i. 6 margin, text "red" sc. MARBLE).

**Por'ter** [pore-] (Heb. *shō'ēr*; Chal. *tārdā*; Gr. *thurōros*) in the A. V. does not bear its modern signification of a *carrier of burdens*, but in every case = *a gate-keeper*, from the Latin *portarius*, the man who attended to the *porta* (= GATE). LEVITES.

**Pos-i-do-ni-us** (L. fr. Gr. = *of* [or *from*] *Niptune* [Gr. *Poseidōn*]), an envoy sent by Nicanor to Judas (2 Mc. xiv. 19).

**Pos-ses'sion**. DEMONIACS.

**Post**, the A. V. translation—I. (*In a building*) of—1. Heb. *ayil* (Ez. xl. 9 ff., xli. 1, 3), once translated "LINTEL" (1 K. vi. 31); usually and literally translated "ram" (Gen. xv. 9; Ez. xxix. 1 ff., &c.). As an architectural term, Gesenius makes it "a projection in a lateral wall, serving as a *post* or *column*, i. e. a *pilaster*." Fürst defines it "a *pilaster*, i. e.

the projection which, always springing, pillar-like, out of adjacent recesses on both sides, fronts toward the space where is the entrance and through-passage." (ARCH.)—2. Heb. *ammāh* = *foundation*, Ges., Fü. (Is. vi. 4 only); translated usually "cubit" (Gen. vi. 15 f., &c.).—3. Heb. *mēzūdh* = *a door-post*, on which a door moves on its hinges, Ges. (Ex. xii. 7, 22, 23, &c.). The posts of the doors of the Temple were of olive-wood (1 K. vi. 33).—4. Heb. *saph* = *sill, threshold*, Ges. (2 K. xii. 9 [Heb. 10], xxii. 4, &c.), also translated "threshold" (Judg. xix. 27, &c.), "BASIN" (Ex. xii. 22, &c.), &c.—5. Heb. *maskhōph*, translated "upper door-post" in Ex. xii. 7, = LINTEL, Ges., Fü., &c.—II. (= *runner, courier*) of Heb. *rāts* (2 Chr. xxx. 6, 10; Esth. iii. 13, 15, viii. 10, 14; Job ix. 25; Jer. li. 31), also translated "guard." COMPEL, TO; EPISTLE; FOOTMAN 2; GUARD 2.

**Pot**, a term applicable to many sorts of vessels; the A. V. translation of—1. Heb. *duṛ*, properly a vessel for holding ointment, an *oil-flask*, Kimchi, Ges. (2 K. iv. 2 only).—2. Heb. *gēbiṭ* once (Jer. xxxv. 5) = *a cup, goblet, bowl*, of a large size (Ges.).—3. Heb. *dūd* = *a boiler, pot*, Ges. (Ps. lxxx. 6, Heb. 7), also translated "seething-pot" (Job xli. 20, Heb. 12), "CALDRON" (2 Chr. xxxv. 13), "KETTLE" (1 Sam. ii. 14), "BASKET."—4. Heb. *cēli* or *cī* (Lev. vi. 28, Heb. 21), elsewhere translated "FURNITURE," &c.—5. Heb. *sir* = *a pot* (so Ges.), properly for boiling, and then generally (Ex. xxxviii. 3; 1 K. vii. 45; 2 K. iv. 38 ff., &c.), sometimes translated "CALDRON," once "PAN" (Ex. xxvii. 3). *Sir* is combined with other words to denote special uses, as "flesh-pot" (Ex. xvi. 3), "wash-pot" (Ps. lx. 8 [Heb. 10], cviii. 9 [Heb. 10]), "seething-pot" (Jer. i. 13).—6. Heb. *pārūr* = *a pot* for boiling, Ges. (Judg. vi. 19; 1 Sam. ii. 14), once translated "PAN" (Num. xi. 8).—7. Heb. *tsintseneth* = *a vase, vessel*, for keeping, preserving, Ges. (Ex. xvi. 33 only).—8. Heb. dual *shiphattayim* in Ps. lxxviii. 13; A. V. "Though ye have lien among the pots," Gesenius makes this word = *a double enclosure* surrounded with pales, and applies it to the folds or enclosures, often in two parts, into which the flocks are gathered at night, the phrase to *lie among the folds* being thus spoken proverbially of shepherds and husbandmen living in leisure and quiet. Prof. J. A. Alexander translates the clause, *When ye lie down between the borders*, i. e. within the boundaries of your territory, the general idea being in his view also one of peaceful prosperity.—9. Heb. dual *cirayim* (in part), probably (so Ges.) *a cooking-furnace*, range for pots, perhaps of pottery, as it could be broken; and double, as having places for two pots or more (Lev. xi. 35 only, A. V. "ranges for pots").—10. Heb. *matsrēph* (in part) = *a fining-pot, crucible*, Ges.; A. V. "fining-pot" (Prov. xvii. 3, xxvii. 21). (HANDICRAFT, § 1).—11. Heb. *merkādh* or *merkādh* (in part) = *unquench-kettle*, for preparing ointment, Ges.; A. V. "pot of ointment" (Job xli. 31, Heb. 23).—12. Gr. *zētia*, properly a measure containing nearly a pint, but in N. T. = any small measure or vessel, a *cup, pitcher*, Rbn. *N. T. Lex.* (Mk. vii. 4, 8). (WEIGHTS AND MEASURES).—13. Gr. *stannos* = *an earthen jar, jug, pot, vase*, Rbn. *N. T. Lex.* (Heb. ix. 4 only); in LXX. = No. 7. PITCHER; POT-SHERD; POTTERY; WATER-POT.

**Pot'-phar** (Heb. fr. Egyptian = POTIPHARAH = *belonging to the sun*), "an officer of Pharaoh, chief of the executioners (A. V. 'captain of the guard'), an Egyptian," to whom JOSEPH was sold (Gen. xxxix. 1; compare xxxvii. 36). The word here rendered "officer" literally = EUNUCH; but it is

also used for an officer of the court, and this is almost certainly the meaning here (so Mr. R. S. Poole). He appears to have been a wealthy man (xxxix. 4-6). The view we have of Potiphar's household is exactly in accordance with the representations on the monuments. When Joseph was accused by Potiphar's wife, his master cast him into prison (19, 20). After this we hear no more of Potiphar, unless, which is unlikely, the chief of the executioners afterward mentioned (xl. 3) be he. EGYPT; PHARAOH 2.

**Pot'-t'ph'e-rah**, or **Pot'-l-phe'rah** (Heb. fr. Egyptian = POTIPHAR), priest or prince of On. His daughter ASENATH was given JOSEPH to wife by Pharaoh (Gen. xli. 45, 50, xlii. 20).

**Pot'sherd** (= a broken piece of earthenware), the A. V. translation of Heb. *heres* or *cheres* (Job ii. 8; Prov. xvi. 23, &c.), also translated "sherd" (Is. xxx. 14; Ez. xxiii. 34), "earthen" VESSEL (Lev. vi. 28 [Heb. 21], xi. 33, &c.), "earthen" BOTTLE (Jer. xix. 1), "earthen" PITCHER (Lam. iv. 2), &c. Proverbially (so Gesenius) a "potsherd" = any thing mean and contemptible (Is. xlv. 9), also any thing very dry (Ps. xxii. 15, Heb. 16). Por.

\* **Pot'tage**. LENTILES.

\* **Pot'ter**. POTTERY.

**Pot'ter's Field**, the; a piece of ground which, according to Mat. xxvii. 7, was purchased by the priests with the thirty pieces of silver rejected by JUDAS ISCARIOT, and converted into a burial-place for Jews not belonging to the city. Mat. xxvii. 9 adduces this as a fulfilment of an ancient prediction. ACELDAMA; OLD TESTAMENT, C; POTTERY.

**Pot'ter-y**. The art of pottery is one of the most common and most ancient of all manufactures. It is abundantly evident, both that the Hebrews used earthen vessels in the wilderness, and that the potters' trade was afterward carried on in Palestine. They had themselves been concerned in the potters' trade in Egypt (Ps. lxxxi. 6), and the wall-paintings minutely illustrate the Egyptian process. (See cut on next page.) The CLAY, when dug, was trodden by men's feet so as to form a paste (Is. xli. 25; Wis. xv. 7; BRICK); then placed by the potter on the wheel beside which he sat, and shaped by him with his hands. How early the wheel came into use in Palestine we know not, but probably it was adopted from Egypt. It consisted of a wooden disk placed on another larger one, and turned by an attendant's hand or worked by a treadle (Is. xlv. 9; Jer. xviii. 3; Eccles. xxxviii. 29, 30). The vessel was then smoothed and coated with a glaze, and finally burnt in a furnace. There was at Jerusalem a royal establishment of potters (1 Chr. iv. 23), from whose employment, and from the fragments cast away in the process, the PORTER'S FIELD perhaps received its name (Is. xxx. 14). BASIN; PITCHER; POT; POT-SHERD; SEAL; WATER-POT.

**Pound**. 1. A weight (Heb. *manēh*; Gr. *litra*). (WEIGHTS AND MEASURES).—2. A money of account (Gr. *mnā*), mentioned in the parable of the Ten Pounds (Lk. xix. 12-27). The reference appears to be to a Greek pound, a weight used as a money of account, of which sixty went to the talent, the weight depending upon the weight of the talent. WEIGHTS AND MEASURES.

**Præ-to-ri-um** (L.) = the general's tent; or the headquarters of the Roman pretor or military governor. JUDGMENT-HALL; PRETORIUM.

**Prayer** (Heb. *tēhinnāh* or *tehinnāh* [A. V. usually "supplication"], *tēphillāh*, &c.; Gr. *deesis, proseuchē*, &c.). This article (originally by Mr. Barry)

Egyptian Pottery.—(Wilkinson.)

will touch briefly on (1.) the doctrine of Scripture as to the nature and efficacy of prayer; (2.) its directions as to time, place, and manner of prayer; (3.) its types and examples of prayer.—(1.) Scripture does not give any theoretical explanation of the mystery which attaches to prayer. The difficulty of understanding its real efficacy arises chiefly from two sources: from the belief that man lives under general laws, which in all cases must be fulfilled unalterably; and the opposing belief that he is master of his own destiny, and need pray for no external blessing. Now Scripture, while, by the doctrine of spiritual influence, it entirely disposes of the latter difficulty, does not so entirely solve that part of the mystery which depends on the nature of God. The reference of all events and actions to the will or permission of God, and of all blessings to His free grace—the principle that our “heavenly Father knoweth what things we have need of before we ask Him”—and the ignorance of man, who “knows not what to pray for as he ought,” and his consequent need of the Divine guidance in prayer—are all dwelt upon with earnestness. Yet, while this is so, on the other hand the instinct of prayer is solemnly sanctioned and enforced in every page. Not only is its subjective effect (i. e. its producing on the mind that consciousness of dependence which leads to faith, and that sense of God’s protection and mercy which fosters love) asserted, but its real objective efficacy, as a means appointed by God for obtaining blessing, both spiritual and temporal, is both implied and expressed in the plainest terms (Mat. vii. 7, 8, &c.). Thus, as usual in the case of such mysteries, the two apparently opposite truths are emphasized, because they are needful to man’s conception of his relation to God; their reconciliation is not, perhaps cannot be, fully revealed. For, in fact, it is involved in that inscrutable mystery which attends on the conception of any free action of man as necessary for the working out of the general laws of God’s unchangeable will. At the same time it is clearly implied that such a reconciliation exists, and that all the apparently isolated and independent exertions of man’s spirit in prayer are in some way perfectly subordinated to

the one supreme will of God, so as to form a part of His scheme of Providence (Mat. xxvi. 39 ff.; 2 Cor. xii. 7 ff.; 1 Jn. v. 14, 15). It is also implied that the key to the mystery lies in the fact of man’s spiritual unity with God in Christ, and of the consequent gift of the Holy Spirit. All true and prevailing prayer is to be offered in Christ’s name (Jn. xiv. 13, xv. 16, xvi. 23–27). So also is it said of the spiritual influence of the Holy Ghost on each individual mind, that while “we know not what to pray for,” the indwelling “Spirit makes intercession for the saints, according to the will of God” (Rom. viii. 26, 27). Here, as probably in all other cases, the action of the Holy Spirit on the soul is to free agents, what the laws of nature are to things inanimate, and is the power which harmonizes free individual action with the universal will of God.—(2.) There are no directions as to prayer in the Mosaic law: the duty is rather taken for granted, as an adjunct to sacrifice, than enforced or elaborated. It is hardly conceivable that, even from the beginning, public prayer did not follow every public sacrifice. Such a practice is alluded to as common in Lk. i. 10; and in one instance, at the offering of the first-fruits, it was ordained in a striking form (Deut. xxvii. 12–15). In later times it certainly grew into a regular service, both in the Temple and in the Synagogue. But, besides this public prayer, it was the custom of all at Jerusalem to go up to the Temple, at regular hours if possible, for private prayer (Lk. xviii. 10; Acts iii. 1); and those who were absent were wont to “open their windows toward Jerusalem,” and pray “toward” the place of God’s Presence (1 K. viii. 46–49; Dan. vi. 10; Ps. v. 7, xxviii. 2, cxxxviii. 2). The regular hours of prayer seem to have been three (see Ps. lv. 17; Dan. vi. 10), “the evening,” i. e. the ninth hour (Acts iii. 1, x. 3), the hour of the evening-sacrifice (Dan. ix. 21); the “morning,” i. e. the third hour (Acts ii. 15), that of the morning-sacrifice; and the sixth hour, or “noonday” (compare Ps. cxix. 164). Grace before meat would seem to have been a common practice (see Mat. xv. 36; Acts xxvii. 35). The posture of prayer among the Jews seems to have been most often standing (1 Sam. i. 26; Mat. vi. 6; Mk. xi. 25;

Lk. xviii. 11); unless the prayer were offered with especial solemnity and humiliation, which was naturally expressed by kneeling (1 K. viii. 54; compare 2 Chr. vi. 13; Ezr. ix. 5; Ps. xcv. 6; Dan. vi. 10), or prostration (Josh. vii. 6; 1 K. xviii. 42; Neh. viii. 6). In the Christian Church no posture is mentioned in the N. T. except kneeling (Acts vii. 60, ix. 40, xx. 36, xxi. 5; compare Mat. xxvi. 39; ARORATION).—(3.) The only Form of Prayer given for perpetual use in the O. T. is the one in Deut. xxvi. 5-15, connected with the offering of tithes and first-fruits, and containing in simple form the important elements of prayer, acknowledgment of God's mercy, self-dedication, and prayer for future blessing. To this may perhaps be added the threefold blessing of Num. vi. 24-26, couched as it is in a precatory form; and the short prayer of Moses (Num. x. 35, 36) at the moving and resting of the cloud, the former of which was the germ of Ps. lxxviii. Of the prayers recorded in the O. T., the two most remarkable are those of Solomon at the dedication of the Temple (1 K. viii. 23-53), and of Joshua the high-priest, and his colleagues, after the Captivity (Neh. ix. 5-38).<sup>1</sup> Both of these probably exercised a strong liturgical influence. It appears from the question of the disciples in Lk. xi. 1, and from Jewish tradition, that the chief teachers of the day gave special forms of prayer to their disciples, as the badge of their discipleship and the best fruits of their learning. All Christian prayer is, of course, based on the LORD'S PRAYER; but its spirit is also guided by that of His prayer in Gethsemane, and of the prayer recorded in Jn. xvii., the beginning of His great work of intercession. The influence of these prayers is more distinctly traced in the prayers contained in the Epistles (Eph. iii. 14-21; Rom. xvi. 25-27; Phil. i. 3-11; Col. i. 9-15; Heb. xiii. 20, 21; 1 Pet. v. 10, 11, &c.), than in those recorded in the Acts. The public prayer probably in the first instance took much of its form and style from the prayers of the synagogues (Acts i. 24, 25, iv. 24-30; SYNAGOGUE). In the record of prayers accepted and granted by God, we observe, as always, a special adaptation to the period of His dispensation to which they belong. In the patriarchal period, they have the simple and childlike tone of domestic supplication for the simple and apparently trivial incidents of domestic life (Gen. xv. 2, 3, xvii. 18, xxiv. 12-14, xxv. 21), although sometimes they take a wider range in intercession (xviii. 23-32, xx. 7-17). In the Mosaic period they assume a more solemn tone and a national bearing; chiefly that of direct intercession for the chosen people (Num. xi. 2, xii. 13, xxi. 7; 1 Sam. vii. 5, xii. 19, 23; 2 Sam. xxiv. 17, 18; 2 K. xix. 4, 15-19; 2 Chr. xiv. 11, xx. 6-12, xxxii. 20; Dan. ix. 20, 21). More rarely are they for individuals (1 Sam. i. 12, xv. 11, 35; 2 K. xx. 2, &c.). A special class are those which precede and refer to the exercise of miraculous power (Ex. viii. 12, 30, xv. 25; 1 K. xvii. 20, xviii. 36, 37; 2 K. iv. 33, vi. 17, 18, xx. 11; Acts ix. 40; Jas. v. 14-16). In the N. T. they have a more directly spiritual bearing (Acts iv. 24-30, viii. 15, x. 4, 31, xii. 5, xvi. 25; 2 Cor. xii. 7-9, &c.). It would seem the intention of Holy Scripture to encourage all prayer, more especially intercession, in all relations, and for all righteous objects. **FRONT-LETS.**

\* **Preach, to,** the A. V. translation of—1. Heb.

*bâsar* = *to bring glad tidings*, rarely *to bring tidings* in a general sense, Ges. (Ps. xl. 9, Heb. 10), also "to preach good tidings" (Is. lxi. 1), "to bring good tidings" (2 Sam. iv. 10; Is. xl. 9 twice, xli. 27, lli. 7 twice; Nah. i. 15 [ii. 1 Heb.]), also "to bear tidings" (2 Sam. xviii. 19, 20 twice), "to bring tidings" (26, 31 marg.; 1 K. i. 42; Jer. xx. 15), "to carry tidings" (1 Chr. x. 9), "to shew forth" (1 Chr. xvi. 23; Ps. xcvi. 2; Is. lx. 6), "to publish" (1 Sam. xxxi. 9; 2 Sam. i. 20, &c.).—2. Heb. *kârd* (Neh. vi. 7; Jon. iii. 2), usually and literally translated "to call" (Gen. i. 5, 10; Num. xvi. 12, and elsewhere very often) or "cry" (Deut. xv. 9; Ps. cxix. 146, 147, &c.), also "to proclaim" (Lev. xxiii. 2, 4, 21, 37, &c.), &c.—3. Gr. *diaggellô* = *to announce fully*, Rbn. *N. T. Lx.* (Lk. ix. 60), elsewhere "to signify" (Acts xxi. 26), "to declare" (Rom. ix. 17).—4. Gr. *dialogomai* = *to lay out separately* before the mind of any one, hence *to discourse, reason, dispute, with any one*, Rbn. *N. T. Lx.* (Acts xx. 7, 9), elsewhere "to reason" or "reason with" (xvii. 2, xviii. 4, 19, xxiv. 25), "to dispute" (Mk. ix. 34; Acts xvii. 17, xix. 8, 9, xxiv. 12; Jude 9), "to speak" (Heb. xii. 5).—5. Gr. *euaggelizô* = *to bring good news, to announce glad tidings*, Rbn. *N. T. Lx.* (Lk. iii. 18, iv. 43, xvi. 16; Acts v. 42, viii. 4, 12, 35, 40, x. 36, xi. 20, xiv. 15, xv. 35, xvii. 18; 1 Cor. xv. 1, 2; 2 Cor. xi. 7; Gal. i. 8, 11, 16, 23; Eph. i. 17, iii. 8; Heb. iv. 6; Rev. xiv. 6), also translated "to preach the gospel" (Mat. xi. 5; Lk. iv. 18, vii. 22, ix. 6, xx. 1; Acts viii. 25, xiv. 7, 21, xvi. 10; Rm. i. 15, x. 15, xv. 20; 1 Cor. i. 17, ix. 16 twice, 18; 2 Cor. x. 16; Gal. i. 8, 9, iv. 13; Heb. iv. 2; 1 Pet. i. 12, 25, iv. 6), "to shew glad tidings" (Lk. i. 19; viii. 1), "to bring good tidings" (ii. 10; 1 Th. iii. 6), "to bring glad tidings" (Rom. x. 15), "to declare glad tidings" (Acts xiii. 32), "to declare" (Rev. x. 7); in LXX. = No. 1.—6. Gr. *kataggellô*, properly *to bring word down* to any one, hence *to announce, publish, show forth*, Rbn. *N. T. Lx.* (Acts iv. 2, xiii. 5, 38, xv. 36, xvii. 3, 13; 1 Cor. ix. 14; Phil. i. 16, 18; Col. i. 28), also translated "to shew" (Acts xvi. 17, xxvi. 23; 1 Cor. xi. 26), "teach" (Acts xvi. 21), "declare" (xvii. 23; 1 Cor. ii. 1), "speak of" (Rom. i. 8).—7. Gr. *kêrussô* (from *kêruz*; see **PREACHER** 2), in Homer *to be a herald*, in N. T. *to proclaim, announce publicly, publish*, Rbn. *N. T. Lx.* (Mat. iii. 1, iv. 17, 23, ix. 35, x. 7, 27, xi. 1, xxiv. 14, xxvi. 13; Mk. i. 4, 7, 13, 38, 39, iii. 14, vi. 12, xiv. 9, xvi. 15, 20; Lk. iii. 3, iv. 18 [Gr. 19], 19, 44, viii. 1, ix. 2, xxiv. 47; Acts viii. 5, ix. 20, x. 37, 42, xv. 21, xix. 13, xx. 25, xxviii. 31; Rom. ii. 21, x. 8, 15; 1 Cor. i. 23, ix. 27, xv. 11, 12; 2 Cor. i. 19, iv. 5, xi. 4 twice; Gal. ii. 2, v. 11; Phil. i. 15; Col. i. 23; 1 Th. ii. 9; 1 Tim. iii. 16; 2 Tim. iv. 2; 1 Pet. iii. 19), also translated "to publish" (Mk. i. 45, v. 20, vii. 36, xiii. 10; Lk. viii. 39), "to proclaim" (Lk. xii. 3; Rev. v. 2), "preacher" (Rom. x. 14, literally *one preaching*); in LXX. = No. 2.—8. Gr. *lalêô* = *to speak, to talk, properly to use the voice*, Rbn. *N. T. Lx.* (Mk. ii. 2; Acts viii. 25, xi. 19, xiii. 42, xiv. 25, xvi. 6), usually "to speak" (Mat. ix. 18, 33, x. 19 twice, 20 twice, and very often elsewhere), also "to talk" (x. 46; Mk. vi. 50, &c.), "tell" (Mat. xxvi. 13; Jn. viii. 40, &c.), "say" (25, 26, xvi. 6, 18, &c.), "utter" (2 Cor. xii. 4; Rev. x. 3, 4 twice).—9. Gr. *prokêrussô* (in part; compound of No. 7) = *to proclaim (or announce) beforehand*, Rbn. *N. T. Lx.* (Acts iii. 20 [A. V. "to preach before"], xiii. 24 [A. V. "to preach first"]);—10. Gr. *proeuaggelizomai* (in part; compound of No. 5) = *to announce glad tidings beforehand* (Gal. iii. 8 only, A. V. "preached

<sup>1</sup> To these may be added Dan. ix. 4-19.

before the gospel").—11. Gr. *parrhêsiazomai* = *to be foretold, to be free in speech or action*, Rbn. *N. T. Lex.* (Acts ix. 27, A. V. "to preach boldly"), also translated "to speak boldly" (xiv. 3, xviii. 26, xix. 8; Eph. vi. 20), "to wax bold" (Acts xiii. 46), "to be bold" (1 Th. ii. 2), also with a verb of speaking "boldly" (Acts ix. 29, Gr. 28), or "freely" (xxvi. 28).—12. Gr. *plêroō* = *to make full, fill, fill up, fulfil*, Rbn. *N. T. Lex.* (Rom. xv. 19, A. V. "fully preached"), translated usually "to fulfil" (Mat. i. 22, ii. 15, 17, 23, and often), also "to fill up" (xxiii. 32), "to fill" (Lk. ii. 40, iii. 5, &c.), &c.—13. Gr. *akoē* = *the hearing* (Heb. iv. 2, A. V. "the word preached," literally *the word of hearing or the word of the message*), usually translated "hearing" (Mat. xiii. 14; Gal. iii. 2, 5, &c.), &c.—The verb "to preach" is evidently used in the Scriptures in no technical or exclusively official signification. See the following articles.

\* **Preach'er**, the A. V. translation of—1. Heb. *kôheleth* in ECCLESIASTES only (Eccl. i. 1, 2, 12, vii. 27; xii. 8-10).—2. Gr. *kêruz* = (so Rbn. *N. T. Lex.*) in classic Greek a *herald, public crier*; in *N. T. a preacher, public instructor*, e. g. of the divine will and precepts, as Noah (2 Pet. ii. 5), of the Gospel, as Paul (1 Tim. ii. 7; 2 Tim. i. 11). It is once used (Rom. x. 14) in translating the kindred verb *kêrussô*.  
**PREACH 7.**

\* **Preach'ing**, the A. V. translation of—1. Heb. *kêrîdh* (from *kârd*; see **PREACH 2**) = *a public crying, proclamation*, Ges. (Jon. iii. 2 only).—2. Gr. *kêrugma* (from *kêrussô*; see **PREACH 7**; **PREACHER 2**) = (so Rbn. *N. T. Lex.*) *proclamation by a herald, in Demosthenes, &c.*; in *N. T. preach'ing, public discourse of prophets* (Mat. xii. 41; Lk. xi. 32); of Christ and His apostles, *the preaching of the Gospel, public instruction* (1 Cor. i. 21, ii. 4, xv. 14; Tit. i. 3); by metonymy for the gospel preached (Rom. xvi. 25; 2 Tim. iv. 17); in LXX. = No. 1.

\* **Pre'cious** [pres'h'us] **Stones**. **STONES, PRECIOUS.**

\* **Pre-des'ti-nate**, **to**. **ORDAIN**, **to**, **18.**

\* **Prep-a-ra'tion**, the (Mk. xv. 42; Lk. xxiii. 54) = "the Preparation of the Passover" (Jn. xix. 14, 31, 42) = "the Day of the Preparation" (Mat. xxvii. 62). **PASSOVER**, III. 2, iii., **d.**

\* **Pres'by-ter-y** (1 Tim. iv. 14). **BISHOP**; **ELDER**. **Pres'ents**. **GIFT.**

**Pres'i-dent**, the A. V. translation of Chal. *sârach* or *sârêchâ*, only used Dan. vi.; = a high officer of the Persian court; applied to the three highest ministers (Gesenius).

\* **Press** (Joel iii. 13; Hag. ii. 16). **WINEPRESS.**

\* **Press'-fat** (Hag. ii. 16). **FAT**; **WINEPRESS.**

**Pre-to'ri-um** (L. *prætorium*, fr. *prætor* = *leader, chief, pretor*) = the headquarters of the Roman pretor or military governor, wherever he happened to be (Mk. xv. 16); usually translated "JUDGMENT-HALL." In time of peace some one of the best buildings of the city which was the residence of the proconsul or pretor was selected for this purpose. Thus Verres appropriated the palace of King Hiero at Syracuse; at Cesarea that of Herod the Great was occupied by Felix (Acts xxiii. 35); and at Jerusalem the new palace erected by the same prince was the residence of Pilate (so Mr. Blakesley, with Winer, Robinson, &c., relying on Jos., *B. J.* ii. 14, § 8).<sup>1</sup> This last was situated on the western, or

more elevated, hill of Jerusalem, and was connected with a system of fortifications, the aggregate of which constituted the fortified barrack. It was the dominant position on the western hill, and—at any rate on one side, probably the eastern—was mounted by a flight of steps (the same from which St. Paul made his speech in Hebrew to the angry crowd of Jews, Acts xxii. 1 ff.). From the level below the barrack a terrace led eastward to a gate opening into the western side of the cloister surrounding the Temple, the road being carried across the Valley of Tyropœon (separating the western from the Temple hill) on a causeway built up of enormous stone blocks. At the angle of the Temple-cloister just above this entrance, i. e. the northwest corner, stood the old citadel of the Temple hill, which Herod rebuilt and called **ANTONIA**. After the Roman power was established in Judea, a Roman guard was always maintained in the Antonia, the commander of which for the time being seems (so Mr. Blakesley) to be the official termed "CAPTAIN of the Temple" in the Gospels and Acts. The guard in the Antonia was probably relieved regularly from the cohort quartered in the barrack. The Pretorian camp at **ROME**, to which (so Mr. Blakesley, with Rosenmüller, Bloomfield, Robinson, &c.) St. Paul refers<sup>2</sup> (Phil. i. 13, A. V. "palace," margin "Cesar's court"), was erected by the Emperor Tiberius, acting under the advice of Sejanus. Before that time the guards were billeted in different parts of the city. It stood outside the walls, at some distance short of the fourth milestone, and near either to the Salarian or the Nomentane road. From the first, buildings must have sprung up near it for sutlers and others. St. Paul appears to have been permitted for the space of two years to lodge, so to speak, "within the rules" of the Pretorium (Acts xxviii. 30), although still under the custody of a soldier.

\* **Pre-vent'** (fr. L. *prævenio* = *to come before*), **to**, the A. V. translation of—1. Heb. *kâdam* = *to go before, precede, anticipate, meet*, Ges. (2 Sam. xxii. 6, 19; Job xxx. 27, xli. 11 [Heb. 3]; Ps. lix. 10 [Heb. 11], lxxix. 8, &c.), also translated "to come before" (2 K. xix. 32; Ps. xc. 2, &c.), "go before" (Ps. lxxviii. 25 [Heb. 26], lxxxix. 14 [Heb. 15]), "meet" (Deut. xxiii. 4 [Heb. 5]; Neh. xiii. 2).—2. Gr. *phthano* = *to go (or come) before, another, to be beforehand with, precede, anticipate*, Rbn. *N. T. Lex.* (1 Th. iv. 15), elsewhere translated "to be come" (Mat. xii. 28; Lk. xi. 20; 2 Cor. x. 14; 1 Th. ii. 16), "to attain" (Rom. ix. 31; Phil. iii. 16).—3. Gr. *prophthano* (compounded of *pro* [= *before*] and *phthano* [No. 2]), found only in Mat. xvii. 25; in LXX. = No. 1. The verb *to prevent* was used in its etymological sense as above, by Bacon, Shakspeare, Pope, and other English writers of their day, but is now used only in a

fortress Antonia. . . . There is nothing certain to be made out. The following fact, however, speaks in support of the fortress Antonia. The scourging had taken place in front of the pretorium. Then Christ was handed over to the soldiers; and they, instead of leading Jesus away immediately, commenced to mock and make a sport of Him. To carry this mockery on undisturbed, they conducted Jesus into the court of the pretorium . . . and gathered unto Him the whole band. This is conclusive for the place being the fortress Antonia" (Lange's *Comm.* [translated by Dr. Schaff] on Mat. xxvii. 27). **JESUS CHRIST**; **PILATE**, **PONTIUS**.

<sup>2</sup> Calvin, Macknight, Barnes, &c., sustain the A. V. in referring the Gr. *praitōrion* here to the emperor's "palace." Wieseler, Conybeare & Howson, &c., suppose it a barrack for the emperor's body-guard, situated at or near the palace on the Palatine Hill.

<sup>1</sup> "Is it certain, however, that the palace of Herod was always so used? . . . Where in that case would Herod Antipas, who had come up to the feast (Lk. xxiii. 7), dwell? . . . According to tradition, the governor lived in the lower city, and, as some more definitely assert, in the

special sense involving a complete interruption of progress toward an object or result.

\* **Prick**, only in the plural "pricks." "To kick against the pricks," i. e. goads, proverbially denotes a resistance which brings only harm to the one who offers it. **AGRICULTURE; GOAD.**

**Priest** (from Gr. *presbuteros* = "ELDER;" Heb. *côhen*; Gr. *hierus*). The root-meaning of the Heb. *côhen*, uncertain as far as Hebrew itself is concerned, is referred by Gesenius (*Thesaurus*) to the idea of prophecy. The *côhen* delivers a divine message, stands as a mediator between God and man, represents each to the other. This meaning, however, belongs to the Arabic, not to the Hebrew form, and Ewald connects the latter with the verb *hêchin* (= to array, put in order). According to Saalschütz, the primary meaning of the word = *minister*, and he thus accounts for the wider application of the name. Bähr connects it with an Arabic root (= to draw near). Of these etymologies, the last has the merit of answering most closely to the received usage of the word (so Prof. Plumptre). In some remarkable passages it takes a wider range. It is applied to the priests of other nations or religions, to Melchizedek (Gen. xiv. 18), Potipharah (xli. 45), Jethro (Ex. ii. 16), to those who discharged priestly functions in Israel before the appointment of Aaron and his sons (Ex. xix. 22). A case of greater difficulty presents itself in 2 Sam. viii. 18, where the sons of David are described as "priests" (Heb. pl. *côhanim*; A. V. "chief rulers," marg. "princes;" compare 1 Chr. xviii. 17). The received explanation is, that the word is used here in what is assumed to be its earlier and wider meaning, = *rulers*. Ewald sees in it an actual suspension of the usual law in favor of members of the royal house. De Wette and Gesenius, in like manner, look on it as a revival of the old household priest-hoods. Prof. Plumptre conjectures that David and his sons may have been admitted, not to distinctively priestly acts, such as burning incense (Num. xvi. 40; 2 Chr. xxvi. 18), but to an honorary, titular priest-hood.—*Origin*. The idea of a priesthood connects itself, in all its forms, pure or corrupted, with the consciousness, more or less distinct, of sin. Men feel that they have broken a law. The power above them is holier than they are, and they dare not approach it. They crave the intervention of some one likely to be more acceptable than themselves. He must offer up their prayers, thanksgivings, and sacrifices. (**ALTAR; PRAYER; SACRIFICE.**) He becomes their representative in "things pertaining unto God." He may become also (though this does not always follow) the representative of God to man. The functions of the priest and prophet may exist in the same person. The priest may be also a king or chief.—No trace of an hereditary or caste-priesthood meets us in the worship of the patriarchal age. Abraham, Isaac, and Jacob perform priestly acts, offer sacrifices, "draw near" to the Lord (Gen. xii. 8, xviii. 23, xxvi. 25, xxxiii. 20). Once only does the word *côhen* meet us as belonging to a ritual earlier than the time of Abraham. MELCHIZEDEK is "the priest of the most high God" (xiv. 18). In the worship of the patriarchs themselves, the chief of the family, as such, acted as the priest. The office descended with the birthright, and might apparently be transferred with it. (**FIRST-BORN.**) In Egypt the Israelites came in contact with a priesthood of another kind, and that contact must have been for a time a very close one. The marriage of Joseph with the daughter of the priest of On—a priest, as we may

infer from her name, of the goddess Neith (**ASENATH**)—(xli. 45), the special favor which he showed to the priestly caste in the years of famine (xlvii. 26), the training of Moses in the palace of the Pharaohs, probably in the colleges and temples of the priests (Acts vii. 22)—all this must have impressed the constitution, the dress, the outward form of life upon the minds of the lawgiver and his contemporaries. There is scarcely any doubt that a connection of some kind existed between the Egyptian priesthood and that of Israel. The latter was not indeed an outgrowth or imitation of the former. The symbolism of the one was cosmic, "of the earth, earthy," that of the other, chiefly, if not altogether, ethical and spiritual. At the time of the Exodus there was as yet no priestly caste. The continuance of solemn sacrifices (Ex. v. 1, 3) implied, of course, a priesthood of some kind, and priests appear as a recognized body before the promulgation of the Law on Sinai (xix. 22). There are signs that the priests of the old ritual were already dealt with as belonging to an obsolescent system. Though they were known as those that "come near" to the Lord (ib.), yet they are not permitted to approach the Divine Presence on Sinai. It is noticeable also that at this transition-stage, when the old order was passing away, and the new was not yet established, there is the proclamation of the truth, wider and higher than both, that the whole people was to be a "kingdom of priests" (xix. 6). The idea of the life of the nation was, that it was to be as a priest and a prophet to the rest of mankind.—*Consecration*. The functions of the HIGH-PRIEST, the position and history of the LEVITES as the consecrated tribe, are discussed under those heads. It remains to notice the characteristic facts connected with "the priests, the sons of AARON," as standing between the two. Solemn as was the subsequent dedication of the LEVITES, that of the priests involved a yet higher consecration. A special word (Heb. *kaddash*, A. V. "to be holy," "to hallow," "to sanctify") was appropriated to it. Their old garments were laid aside; their bodies were washed with clean water, and anointed with the holy anointing-oil (**OINTMENT**); the new garments of their office were put on them; special sacrifices were offered for them; the blood of the ram of consecration was sprinkled upon their right ear, foot, and hand; a wave-offering was put in their hands, &c. (Ex. xxix.; Lev. viii.). The whole of this mysterious ritual was to be repeated for seven days, during which the priests remained within the Tabernacle, separated from the people, and not till then was the consecration perfect. The consecrated character thus imparted did not need renewing. It was a perpetual inheritance transmitted from father to son through all the centuries that followed.—*Dress*. The "sons of Aaron" thus dedicated were to wear during their ministrations a special apparel—at other times apparently they wore the common DRESS of the people. The material was "LINEN" (Ex. xxviii. 42; comp. Cotton). Linen drawers from the loins to the thighs were "to cover their nakedness." Over the drawers was worn the *côthôneth*, or close-fitting cassock, also of fine linen, white, but with a diamond or chess-board pattern on it. This came nearly to the feet, and was to be woven in its garment-shape (comp. Jn. xix. 23). The white cassock was gathered round the body with a girdle of needlework, into which, as in the more gorgeous belt of the high-priest, blue, purple, and scarlet were intermingled with white, and worked in the form of flowers (Ex. xxviii. 39, 40, xxxix. 2; Ez. xliv. 17-19). Upon

their heads they were to wear caps or bonnets in the form of a cup-shaped flower, also of fine linen. (CROWN; HEAD-*DRESS*.) They had besides other "clothes of service," probably simpler, but not described (Ex. xxxi. 10; Ez. xlii. 14). In all their

acts of ministration they were to be barefooted (Ex. iii. 5; Josh. v. 15). In the earlier liturgical costume the *EPHOD* is mentioned as belonging to the high-priest only (Ex. xxviii. 6-12, xxxix. 2-5).—*Regulations.* The idea of a consecrated life, thus as-

*Dress of Egyptian Priests.*—(Wilkinson.)

served at the outset, was carried through a multitude of details. Each probably had a symbolic meaning of its own. Collectively they educated the power of distinguishing between things holy and profane, *CLEAN* and *unclean*, and so ultimately between moral

to be more to them than the ties of friendship or of blood, and, except in the case of the nearest relationships (six degrees are specified, Lev. xxi. 1-5; Ez. xlv. 25), they were to make no mourning for the dead. They were not to shave their heads. (*HAIR*.) They were to go through their ministrations with the serenity of a reverential awe, not with the frantic wildness which led the priests of Baal to cut their flesh (Lev. xix. 28; 1 K. xviii. 28), and the priests of Cybele to castrate themselves (Deut. xxiii. 1). The same thought found expression in two other forms affecting the priests of Israel. The priest was to be physically as well as liturgically perfect. (*BLEMISH*.) The marriages of the sons of Aaron were hedged round with special rules. There is indeed no evidence (so Prof. Plumptre) for what has sometimes been asserted, that either the high-priest or the other sons of Aaron were limited in their choice to the women of their own tribe, and we have some distinct instances to the contrary. It is probable, however, that the priestly families frequently intermarried, and certain that they were forbidden to marry an unchaste woman, or one who had been divorced, or the widow of any but a priest (Lev. xxi. 7, 14; Ez. xlv. 22). The prohibition of marriage with one of an alien race was assumed, though not enacted in the Law. The legitimacy of every priest depended on his *GENEALOGY*. The age at which the sons of Aaron might enter upon their duties was not defined by the Law, as that of the *LEVITES* was. Aristobulus (*HIGH-PRIEST*) at the age of seventeen ministered in the Temple in his pontifical robes (Jos. xv. 3, § 3). This may have been exceptional, but the language of the rabbis indicates that the special

*Dress of an Egyptian High-priest.*

good and evil (Ez. xlv. 23). Before they entered the Tabernacle they were to wash their hands and their feet (Ex. xxx. 17-21, xl. 30-32). During their ministration they were to drink no wine or strong drink (Lev. x. 9; Ez. xlv. 21). Their function was

consecration of the priest's life began with the opening years of manhood.—*Functions.* The work of the priesthood of Israel was, from its very nature, more stereotyped by the Mosaic institutions than any other element of the national life. The duties described in Exodus and Leviticus are the same as those recognized in the Books of Chronicles and Ezekiel. They, assisting the high-priest, were to watch over the FIRE on the altar of burnt-offerings, and to keep it burning evermore both by day and night (Lev. vi. 12; 2 Chr. xiii. 11), to feed the golden lamp ("CANDLESTICK") outside the veil with oil (Ex. xxvii. 20, 21; Lev. xxiv. 2), to offer the morning and evening sacrifices (SACRIFICE), each accompanied with a meat-offering and a drink-offering, at the door of the Tabernacle (Ex. xxix. 38-44). These were the fixed, invariable duties; but their chief function was that of being always at hand to do the priest's office for any guilty, or penitent, or rejoicing Israelite. The worshipper might come at any time. (ADULTERY; LEPROSY; MEAT-OFFERING; NAZARITE; PEACE-OFFERING; PURIFICATION; VOW, &c.) Other duties of a higher and more ethical character were hinted at, but were not, and probably could not be, the subject of a special regulation. They were to teach the children of Israel the statutes of the Lord (Lev. x. 11; Deut. xxxiii. 10; 2 Chr. xv. 3; Ez. xlv. 23, 24). The "priest's lips" were to "keep knowledge" (Mal. ii. 7). Through the whole history, except the periods of national apostasy, these acts, and others like them, formed the daily life of the priests who were on duty. The three great FESTIVALS of the year were, however, their seasons of busiest employment. Other acts of the priests of Israel, significant as they were, were less distinctively sacerdotal. They were to bless the people at every solemn meeting (Num. vi. 22-27). During the journeys in the wilderness it belonged to them to cover the Ark and all the vessels of the sanctuary with a purple or scarlet cloth before the Levites might approach them (iv. 5-15). As the people started on each day's march they were to blow "an alarm" with long silver trumpets (x. 1-8). With these they were to proclaim all the solemn days and days of gladness (ver. 10). Other instruments of music might be used by the more highly-trained Levites and the schools of the prophets, but the trumpets (CORNET) belonged only to the priests. The presence of the priests on the field of battle (1 Chr. xii. 23, 27; 2 Chr. xx. 21, 22) led, in the later periods of Jewish history, to the special appointment at such times of a war-priest. Other functions hinted at in Deuteronomy might have given them greater influence as the educators and civilizers of the people. (EDUCATION.) They were to act (whether individually or collectively does not distinctly appear) as a court of APPEAL in the more difficult controversies in criminal or civil cases (Deut. xvii. 8-13). It must remain doubtful, however, how far this order kept its ground during the storms and changes that followed. (JUDGE.)—*Maintenance.* Functions such as these were clearly incompatible with the common activities of men. A distinct provision, therefore, was made for them. This consisted—(1.) of one-tenth of the tithes (TITHE) which the people paid to the Levites, i. e. one per cent. on the whole produce of the country (Num. xviii. 26-28). (2.) Of a special tithe every third year (Deut. xiv. 28, xxvi. 12). (3.) Of the redemption-money, paid at the fixed rate of five shekels a head, for the first-born of man or beast (Num. xviii. 14-19). (4.) Of the redemption-money paid in like manner for men or things spe-

cially dedicated to the Lord (Lev. xxvii.). (5.) Of spoil, captives, cattle, and the like, taken in war (Num. xxxi. 25-47). (6.) Of the shew-bread, the flesh of the burnt-offerings, peace-offerings, trespass-offerings (xviii. 8-14; Lev. vi. 26, 29, vii. 6-10), and, in particular, the heave-shoulder and the wave-breast (x. 12-15). (7.) Of an undefined amount of the FIRST-FRUIITS of corn, wine, and oil (Ex. xxiii. 19; Lev. ii. 14; Deut. xxvi. 1-10). Of some of these, as "most holy," none but the priests were to partake (Lev. vi. 29). It was lawful for their sons and daughters (x. 14), and even in some cases for their home-born slaves, to eat of others (xxii. 11). The stranger and the hired servant were in all cases excluded (xxii. 10). (8.) On their settlement in Canaan the priestly families had thirteen cities assigned them, with "suburbs" or pasture-grounds for their flocks (Josh. xxi. 13-19). (LEVITES.)—These provisions were obviously intended to secure the religion of Israel against the dangers of a caste of pauper-priests, needy and dependent, and unable to bear their witness to the true faith. They were, on the other hand, as far as possible removed from the condition of a wealthy order. The standard of a priest's income, even in the earliest days after the settlement in Canaan, was apparently low (Judg. xvii. 10).—*Classification and Statistics.* The earliest historical trace of any division of the priesthood, and corresponding cycle of services, belongs to the time of David. Jewish tradition indeed recognizes an earlier division, even during the life of Aaron, into eight houses, augmented during the period of the Shiloh-worship to sixteen, the two families of Eleazar and Ithamar standing in both cases on an equality. No less than 3,700 priests tendered their allegiance to David at Hebron (1 Chr. xii. 27). To his reign belonged the division of the priesthood into the four-and-twenty "courses" or orders (1 Chr. xxiv. 1-19; 2 Chr. xxiii. 8; Lk. i. 5), each of which was to serve in rotation for one week, while the further assignment of special services during the week was determined by lot (i. 9). Each course appears to have commenced its work on the Sabbath, the outgoing priests taking the morning-sacrifice, and leaving that of the evening to their successors (2 Chr. xxiii. 8). In this division, however, the descendants of ITHAMAR were fewer than those of ELEAZAR, and sixteen courses accordingly were assigned to the latter, eight only to the former (1 Chr. xxiv. 4). The division thus instituted was confirmed by Solomon, and continued to be recognized as the typical number of the priesthood. On the return from the Captivity there were found but four courses out of the twenty-four, each containing in round numbers about a thousand (Ezr. ii. 36-39). Out of these, however, to revive at least the idea of the old organization, the four-and-twenty courses were reconstituted, bearing the same names as before, and so continued till the destruction of Jerusalem. If we may accept the numbers given by Jewish writers as at all trustworthy, the proportion of the priesthood to the population of Palestine, during the last century of their existence as an order, must have been far greater than that of the clergy has ever been in any Christian nation. Over and above those that were scattered in the country and took their turn, there were not fewer than 24,000 stationed permanently at Jerusalem, and 12,000 at Jericho. It was almost inevitable that the great mass of the order, under such circumstances, should sink in character and reputation. The Rabbinic classification of the priesthood, though belonging to

a somewhat later date, reflects the contempt into which the order had fallen. There were—(1.) the heads of the twenty-four courses, known sometimes as “chief priests;” (2.) the large number of reputable officiating but inferior priests; (3.) the *plebeians* or (to use the extremist formula of Rabbinic scorn) the *priests of the people of the earth*, ignorant and unlettered; (4.) those that, through physical disqualifications or other causes, were non-efficient members of the order, though entitled to receive their tithes.—*History.* The new priesthood did not establish itself without a struggle. (AARON.) The rebellion of KORAH 4, at the head of a portion of the Levites as representatives of the first-born, with Dathan and Abiram as leaders of the tribe of the first-born son of Jacob (Num. xvi. 1), showed that some looked back to the old patriarchal order rather than forward to the new. Prominent as was the part taken by the priests in the daily march of the host of Israel (x. 8), in the passage of the Jordan (Josh. iii. 14, 15), in the destruction of Jericho (vi. 12-16), the history of MICAH 1 shows that within that century there was a strong tendency to relapse into the system of a household instead of an hereditary priesthood (Judg. xvii.). The frequent invasions and conquests during the period of the Judges must have interfered with the payment of tithes, with the maintenance of worship, with the observance of all festivals, and with this the influence of the priesthood must have been kept in the background. For a time the prerogative of the line of Aaron was in abeyance. The capture of the ARK, the removal of the TABERNACLE from SHILOH, threw every thing into confusion, and Samuel, a Levite, but not within the priestly family, sacrifices, and “comes near” to the Lord: his training under Eli, his Nazarite life, his prophetic office, being regarded apparently as a special consecration. Though Shiloh had become a deserted sanctuary, Nob (1 Sam. xxi. 1) was for a time the centre of national worship, and the symbolic ritual of Israel was thus kept from being forgotten. The reign of Saul was, however, a time of suffering for them. He had manifested a disposition to usurp the priest's office (xiii. 9). The massacre of the priests at Nob (AHIMELCH 1) showed how insecure their lives were against any unguarded or savage impulse. They could but wait in silence for the coming of a deliverer in David. One at least (ABIATHAR) shared his exile (xxiii. 6, 9). When the death of Saul set them free they came in large numbers to the camp of David, prepared apparently not only to testify their allegiance, but also to support him, armed for battle, against all rivals (1 Chr. xii. 27). They were summoned from their cities to the great restoration of the worship of Israel, when the Ark was brought up to the new capital of the kingdom (xv. 4). For a time, however, the older order of sacrifices was carried on by the priests in the Tabernacle on the high-place at GIBEON (xvi. 37-39, xxi. 29; 2 Chr. i. 3). We cannot wonder that first David and then Solomon should have sought to guard against the evils incidental to this separation of the two orders, and to unite in one great TEMPLE priests and Levites, the symbolic worship of sacrifice and the spiritual offering of praise. The reigns of these two kings were naturally the culminating period of the glory of the Jewish priesthood. The position of the priests under the monarchy of Judah deserves a closer examination than it has yet received. The system described above gave them for every week of service in the Temple twenty-three weeks in which they had

no appointed work. To what employment could they turn? (1.) The more devout and thoughtful found probably in the schools of the prophets that which satisfied them. (LEVITES; PROPHET.) They became teaching priests (2 Chr. xv. 3), students, and interpreters of the Divine Law. (2.) Some, perhaps, served in the king's army (1 Chr. xii. 27; 2 Chr. xiii. 12, xxiii. 9; BENAIAH 1). (3.) A few chosen ones might enter more deeply into the divine life, and so receive, like ZECHARIAH, JEREMIAH, EZEKIEL, a special call to the office of a prophet. (4.) We can hardly escape the conclusion that many did their work in the Temple of Jehovah with a divided allegiance, and acted at other times as priests of the high places (Jer. ii. 8, viii. 1, 2; Ez. xlv. 7, 12; URIJAH 1). Those who ceased to be true shepherds of the people found nothing in their ritual to sustain or elevate them. They became as sensual, covetous, tyrannical, as ever the clergy of the Christian Church became in its darkest periods; conspicuous as drunkards and adulterers (Is. xxviii. 7, 8, lvi. 10-12). The prophetic order, instead of acting as a check, became sharers in the corruption (Jer. v. 31; Lam. iv. 13; Zeph. iii. 4). The discipline of the Captivity, however, was not without its fruits. A large proportion of the priests had either perished or were content to remain in the land of their exile, but those who did return were active in the work of restoration (Ezr. iii. 2, x. 18, 19; Neh. viii. 9-13). But in Malachi's time the priests had become degenerate again (Mal. i. 10, ii. 7-9). The office of the SCRIBE rose in repute as that of priest declined. No great changes affected the outward position of the priests under the Persian government. Both the Persian government and Alexander had respected the religion of their subjects; and the former had conferred on the priests immunities from taxation (Ezr. vi. 8, 9, vii. 24). The degree to which this recognition was carried by the immediate successors of Alexander is shown by the work of restoration accomplished by Simon the son of Onias (Ecclus. i. 12-20); and the position which they thus occupied in the eyes of the people, not less than the devotion with which his zeal inspired them, prepared them doubtless for the great struggle which was coming, and in which, under the priestly MACCABEES, they were the chief defenders of their country's freedom. Some, indeed, at that crisis, were found among the apostates. (ALCIMUS; JASON 4; MENELAUS; ONIAS 5.) The majority, however, were true-hearted. (JERUSALEM, pp. 452 ff.)—In the N. T. period of their history the division into four-and-twenty courses is still maintained (Lk. i. 5), and the heads of these courses, together with those who have held the high-priesthood (the office no longer lasting for life), are “chief priests” by courtesy, and take their place in the SANHEDRIM. The number scattered throughout Palestine was, as has been stated, very large. Of these the greater number were poor and ignorant. The priestly order, like the nation, was divided between contending sects. (PHARISEES; SADDUCEES.) The influence of Hyrcanus, himself in the latter part of his life a Sadducee, had probably made the tenets of that party popular among the wealthier and more powerful members; and the chief priests of the Gospels and the Acts, the whole “of the kindred of the high-priest” (Acts iv. 1, 6, v. 17), were apparently consistent Sadducees. The great multitude, on the other hand, who received the testimony of the Lord's resurrection and “became obedient to the faith” (vi. 7) must have been free from, or must have overcome, Sadducean pre-

judices. In the scenes of the last tragedy of Jewish history the order passes away, without honor, "dying as a fool dieth." The high-priesthood is given to the lowest and vilest of the adherents of the frenzied Zealots. Other priests appear as deserting to the enemy. Josephus the historian was a priest. The destruction of Jerusalem deprived the order at one blow of all but an honorary distinction. Their occupation was gone. Many families must have altogether lost their genealogies. The influence of the Rabbis increased with the fall of the priesthood. (EDUCATION; RABBI; SYNAGOGUE.) The language of the N. T. writers in relation to the priesthood ought not to be passed over. They recognize in Christ, the first-born, the King, the Anointed, the representative of the true primeval priesthood after the order of Melchizedek (Heb. vii., viii.), from which that of Aaron, however necessary for the time, is now seen to have been a deflection. But there is no trace of an order in the new Christian society, bearing the name and exercising functions like those of the priests of the older Covenant. (BISHOP; ELDER; MINISTER; PREACHER.) The idea which pervades the teaching of the Epistles is that of a universal priesthood (Rom. xii. 1; Heb. x. 19-22; 1 Pet. ii. 9; Rev. i. 6). It was the thought of a succeeding age that the old classification of the high-priest, priests, and Levites was reproduced in the bishops, priests, and deacons of the Christian Church (so Prof. Plumptre).

**Prince**, the A. V. translation of various Hebrew, Chaldee, and Greek terms, most of which are of general signification, indicating authority, leadership, or preëminence. (CAPTAIN 1, 2; CONGREGATION; DUKE 2; GOVERNOR 5, 6, 10, 11, 13; JUDGE; KING; PRIEST, &c.). The only special uses of the word "prince" are—1. "Princes of provinces" (1 K. xx. 14), probably = governors of districts, or local magistrates. (PROVINCE.) 2. The "princes" (Chal. pl. *āhashdarpēnīn* or *āchashdarpēnīn*) mentioned in Dan. iii. 2, 3, 27, vi. 1 ff. (see Esth. i. 1) were the predecessors of the satraps of Darius Hystaspis (PERSIANS) = "lieutenants" in Ezr. viii. 36, and Esth. iii. 12, viii. 9, ix. 3. JESUS CHRIST is "the Prince of LIFE" (Acts iii. 15), and "the Prince of the kings of the earth" (Rev. i. 5); SATAN is "the prince of this world" (Jn. xii. 31, &c.), and "the prince of the power of the air" (Eph. ii. 2). HASH-MANNIM; PROVINCE.

\* **Princess**, the A. V. translation of Heb. *sārāh* = *princess, noble lady*, Ges. (1 K. xi. 3; Is. xlix. 23 margin; Lam. i. 1), also translated "queen" (Is. xlix. 23), and "lady" (Judg. v. 29; Esth. i. 18). SARAH.

\* **Prin-ci-pal'i-ty** (= the authority, rule, or dominion of a PRINCE or chief), the A. V. translation of—1. Heb. pl. *marāshōh* (Jer. xiii. 18 only, margin "head-tires"). Gesenius and Henderson translate this passage, "From your heads shall come down the crown of your glory," instead of "Your principalities shall come down, *even* the crown of your glory." —2. Gr. *archē* = a *beginning*, what is first in time or place, Rbn. *N. T. Lex.* (Rom. viii. 38; Eph. i. 21, iii. 10, vi. 12; Col. i. 16, ii. 10, 15; Tit. iii. 1), usually translated "beginning" (Mat. xix. 4, 8; Jn. i. 1, 2, &c.), also translated "rule" (1 Cor. xv. 24), "power" (Lk. xx. 20), "magistrates" in pl. (xii. 11). In the passages where it is translated "magistrates" and "principality" or "principalities" the word is used by metonymy (so Robinson) to denote *rulers, magistrates, princes, potentates*, &c.

\* **Print**, to, the A. V. translation of—1. Heb.

*nāḏhan* (Lev. xix. 28), usually and literally translated "to give" (Gen. i. 29, iii. 12 twice, &c.), also "to make" (Lev. xix. 28, &c.), &c.—2. Heb. *hākak* or *chākak* = *to cut in, inscribe*, Ges. (Job xix. 23), also translated "to grave" (Is. xxii. 16, xlix. 16), "to portray" (Ez. iv. 1), &c. ENGRAVER; WRITING.

**Pris'ca** (L. = *ancient*) = PRISCILLA (2 Tim. iv. 19). **Pris-ell'ia** [-sil-] (L. diminutive of PRISCA, Rbn. *N. T. Lex.*), the wife of AQUILA. The name is Prisca in 2 Tim. iv. 19, and (according to the true reading) in Rom. xvi. 3, also (according to some of the best MSS.) in 1 Cor. xvi. 19. Such variation in a Roman name is by no means unusual. The wife's name is placed before the husband's in Rom. xvi. 3 and 2 Tim. iv. 19, and (according to some of the best MSS.) in Acts xviii. 26. Only in Acts xviii. 2, and 1 Cor. xvi. 19, has Aquila unequivocally the first place. Hence Dr. Howson and others conclude that Priscilla was the more energetic character of the two. Yet the husband and the wife are always mentioned together. Priscilla (so Dr. Howson) is the example of what the married woman may do for the general service of the Church, in conjunction with home duties, as PHOEBE is the type of the unmarried servant of the Church, or deaconess.

**Pris'on** [priz'n]. For imprisonment as a punishment, see PUNISHMENTS. In Egypt it is plain both that special places were used as prisons, and that they were under the custody of a military officer (Gen. xl. 3, xlii. 17). During the wandering in the desert we read on two occasions of confinement "in ward" (Lev. xxiv. 12; Num. xv. 34); but as imprisonment was not directed by the Law, so we hear of none till the time of the kings, when the prison appears as an appendage to the palace, or a special part of it (1 K. xxii. 27). Later still it is distinctly described as in the king's house (Jer. xxxii. 2, xxxvii. 21; Neh. iii. 25). This was the case also at Babylon (2 K. xxv. 27). But private houses were sometimes used as places of confinement (Jer. xxxvii. 15; JEREMIAH). Public prisons other than these, though in use by the Canaanitish nations (Judg. xvi. 21, 25; SAMSON), were unknown in Judea previous to the Captivity. Under the Herods we hear again of royal prisons attached to the palace, or in royal fortresses (Lk. iii. 20; Acts xii. 4, 10). By the Romans ANTONIA was used as a prison at Jerusalem (xxiii. 10), and at Caesarea the PRÆTORIUM of Herod (35). The sacerdotal authorities also had a prison under the superintendence of special officers (v. 18 ff., viii. 3, xxvi. 10). CHAIN; CISTERN; FETTERS; PAUL; PIT; ROMK; STOCKS.

\* **Pris'on-gate** (Neh. xii. 39), a gate of JERUSALEM, probably (so Gesenius) belonging to the wall enclosing the Temple. SHEEP-GATE.

**Proch'o-rus** (L. fr. Gr. = *leader of the chorus*, Schl.), one of the seven deacons, named next after Stephen and Philip (Acts vi. 5). DEACON.

**Pro-con-sul** (L. = one who at the close of his consulship in Rome was governor of a province, or military commander under a governor, Freund). DEPUTY.

**Proe-s-ra-tor** [in Latin pronounced prok-vu-ra-tor] (L. *manager, overseer*; see below). The Gr. *hégemón*, A. V. "GOVERNOR," is applied in the N. T. to the officer who presided over the imperial province of Judea. It is used of Pontius Pilate (Mat. xxvii., xxviii.; Lk. xx. 20), of Felix (Acts xxi., xxiv.), and of Festus (xxvi. 30). In all these cases the Vulgate equivalent is *præses* (L. = *president*). The same office is also mentioned in Lk. iiii. 1. After the battle of Actium, AUGUSTUS divided the

provinces of the Roman empire into two portions, giving some to the senate and reserving to himself the rest. The imperial provinces were administered by legates or deputies of the emperor, also called *præides* or *presidents*. No questor came into the emperor's provinces, but the property and revenues of the imperial treasury were administered by the *Rationales* (L. = *accountants*), *Procuratores* (= *procurators*), and *Actores* (= *agents*) of the emperor, who were chosen from among his freedmen, or from the knights (Tac. *Hist.* v. 9; Dio Cassius, liii. 15). These procurators were sent both to the imperial and to the senatorial provinces. Sometimes a province was governed by a procurator with the functions of a *president*. This was especially the case with the smaller provinces and the outlying districts of a larger province; and such is the relation in which Judea stood to SYRIA. After the deposition of ARCHELAUS Judea was annexed to Syria, and the first procurator was Coponius (sent out with Quirinus [CYRENICUS]), the next Marcus Ambivius, then Annius Rufus, then Valerius Gratus (procurator eleven years), then Pontius Pilate. (PILATE, PONTIUS.) He was subject to the governor (or *president*) of Syria. The headquarters of the procurator were at Cesarea (Acts xxiii. 23), where he had a judgment-seat (xxv. 6) in the audience-chamber (23), and was assisted by a council (12) whom he consulted in cases of difficulty. The procurator, as the emperor's representative, had the power of life and death over his subjects (Mat. xxvii. 26), which was denied to the proconsul (A. V. "DEPUTY"). In the N. T. we see the procurator only in his judicial capacity. Thus Christ is brought before Pontius Pilate as a political offender, and the accusation is heard by the procurator, who is seated on the judgment-seat (Mat. xxvii. 2, 11, 19). Felix heard St. Paul's accusation and defence from the judgment-seat at Cesarea (Acts xxv. 1); and St. Paul calls him "judge" (xxiv. 10), as if this term described his chief functions. The procurator is again alluded to in his judicial capacity in 1 Pet. ii. 14 (A. V. "governors"). He was attended by a cohort (A. V. "band;" ARMY, II.) as body-guard (Mat. xxvii. 27), and apparently went up to Jerusalem at the time of the high festivals, and there resided in the palace of Herod, in which was the "PRETORIUM," or "JUDGMENT-HALL."

\* **Pro-gen'i-tors** [-jen-] (fr. L.) = parents, or ancestors (Gen. xlix. 26). GENEALOGY.

\* **Prog-nos'ti-ca-tors**, **Monthly** (Is. xlvii. 13). MAGIC.

**Proph'et.** I. *The Name.* The ordinary Hebrew word for prophet is *nābî*, derived from the verb *nābâ*, connected by Gesenius with *nāba'*, to bubble forth, like a fountain. If this etymology is correct, *nābî* = a person who, as it were, involuntarily bursts forth with spiritual utterances under the divine influence, or simply one who pours forth words. Bunsen and Davidson suppose *nābî* = the man to whom announcements are made by God, i. e. inspired. (INSPIRATION.) But it is more in accordance with the etymology and usage of the word to regard it as signifying (actively) one who announces or pours forth the declarations of God (so Mr. Meyrick, original author of this article, with Ewald, Hävernick, Oehler, Hengstenberg, Lee, Pusey, and most Biblical critics). Two other Hebrew words are used to designate a prophet, *rôeh*, and *hōzeh* or *chōzeh*, both signifying one who sees, and rendered in the A. V. "seer." The three Hebrew words are found in 1 Chr. xxix. 29. *Rôeh* is a title almost appro-

priated to SAMUEL (1 Sam. ix. 9, 11, 18, 19; 1 Chr. ix. 22, xxvi. 28, xxix. 29). It is also applied to ZADOK (2 Sam. xv. 27), to HANANI (2 Chr. xvi. 7, 10), to prophets generally (1 Sam. ix. 9; Is. xxx. 10). It was superseded in general use by the word *nābî*. *Hōzeh* or *chōzeh* is found in 2 Sam. xxiv. 10; 2 K. xvii. 13; 1 Chr. xxi. 9, xxv. 5, xxix. 29 (of GAD 2); 2 Chr. ix. 29, xii. 15, xix. 2, xxix. 25, 30, xxxiii. 18, 19, xxxv. 15; Is. xxix. 10, xxx. 10 (A. V. "prophets"), xlvii. 13 (A. V. "gazers"); Am. vii. 12; Mic. iii. 7. Whether there is any difference in the usage of these three words, and, if any, what that difference is, has been much debated. On the whole, it would seem that the same persons are designated by them. The Heb. *nābî* is uniformly translated in the LXX. by the Gr. *prophētēs*, and in the A. V. by "prophet." In classical Greek, *prophētēs* = one who speaks for another, specially one who speaks for a god and so interprets his will to man (L. & S.). Hence its essential meaning is an *interpreter*. The use of the word *prophētēs* in its modern sense is post-classical, and is derived from the LXX. From the mediæval use of the derivative Greek word *prophēteia*, *prophecy* passed into the English language in the sense of *prediction*, and this sense it has retained as its popular meaning. The larger sense of *interpretation* has not, however, been lost. In fact, the English word *prophet*, like the word INSPIRATION, has always been used in a larger and in a closer sense. The different meanings, or shades of meaning, in which "prophecy" is employed in Scripture, have been drawn out by Locke as follows:—"Prophecy comprehends three things: prediction; singing by the dictate of the Spirit; and understanding and explaining the mysterious, hidden sense of Scripture, by an immediate illumination and motion of the Spirit" (*Paraphrase of 1 Cor. xii.* note, p. 121, London, 1742). The last signification applies to the prophets of the N. T. (1 Cor. xii.); the second to MIRIAM, DEBORAH 2, the "sons of Asaph," &c. (1 Chr. xxv. 3). That the idea of potential if not actual prediction enters into the conception of prophecy, as designating the function of the Hebrew prophets, seems to be proved by Deut. xviii. 22; Jer. xxviii. 9; Acts ii. 30, iii. 18, 21; 1 Pet. i. 10; 2 Pet. i. 19, 20, iii. 2. Etymologically, however, neither prescience nor prediction is implied by the term used in the Hebrew, Greek, or English language. (DANIEL, THE BOOK OF; DIVINATION.)—II. *Prophetical Order.* The sacerdotal order (PRIEST) was originally the instrument by which the members of the Jewish theocracy were taught and governed in things spiritual. Teaching by act and teaching by word were alike their task. But during the time of the Judges, the priesthood sank into a state of degeneracy, and the people were no longer affected by the acted lessons of the ceremonial service. They required less enigmatic warnings and exhortations. Under these circumstances a new moral power was evoked—the Prophetic Order. SAMUEL, himself a Levite, of the family of Kohath (1 Chr. vi. 28), and almost certainly a priest (so Mr. Meyrick), was the instrument for effecting a reform in the sacerdotal order (ix. 22), and for giving to the prophets a position of importance which they had never before held. It is not to be supposed that Samuel created the prophetic order as a new thing before unknown. The germs both of the prophetic and of the regal order are found in the Law (Deut. xiii. 1, xvii. 20, xvii. 18), but not yet developed, because there was not yet the demand for them. Samuel took measures to make his work

of restoration permanent as well as effective for the moment. For this purpose he instituted Companies, or Colleges of Prophets. One we find in his lifetime at Ramah (1 Sam. xix. 19, 20); others afterward at Bethel (2 K. ii. 3), Jericho (5), Gilgal (iv. 38), and elsewhere (vi. 1). (ELIJAH; ELISHA.) Their constitution and object were similar to those of theological colleges. Into them were gathered promising students, and here they were trained for the office which they were afterward destined to fulfil. Sometimes they were very numerous (1 K. xviii. 4, xxii. 6; 2 K. ii. 16). So successful were these institutions, that from the time of Samuel to the closing of the Canon of the OLD TESTAMENT, there seems never to have been wanting a due supply of men to keep up the line of official prophets. They are represented as extinct in 1 Mc. iv. 46, ix. 27, xiv. 41, and Ecclus. xxxvi. 15. Their chief subject of study was, no doubt, the Law and its interpretation; oral, as distinct from symbolical, teaching being henceforward tacitly transferred from the priestly to the prophetic order. Subsidiary subjects of instruction were music and sacred poetry, both of which had been connected with prophecy from the time of Moses (Ex. xv. 20) and the Judges (Judg. iv. 4, v. 1).—III. *The Prophetic Gift*. To belong to the prophetic order and to possess the prophetic gift are not convertible terms. Generally, the inspired prophet came from the College of the Prophets, and belonged to the prophetic order; but this was not always the case. (AMOS; see also AHIJAH 1; AZARIAH 9; ELIEZER 6; GAD 2; HANANI 2; IDDO 4; JAHAZIEL 4; JEHU 2; MICAH; NATHAN 1; ODED 1, 2; SHEMAIAH 1; URIJAH 4; ZECHARIAH 6.) The sixteen prophets whose books are in the CANON have therefore that place of honor, because they were endowed with the *prophetic gift* as well as ordinarily (so far as we know) belonging to the *prophetic order*. (BIBLE, III. 2.) What, then, are the characteristics of the sixteen prophets, thus called and commissioned, and intrusted with the messages of God to His people? (1.) They were the national poets of Judea. (2.) They were annalists and historians. A great portion of Isaiah, of Jeremiah, of Daniel, of Jonah, of Haggai, is direct or indirect history. (3.) They were preachers of patriotism; their patriotism being founded on the religious motive. (4.) They were preachers of morals and of spiritual religion (Is. i. 14–17, iii., v., &c.). The system of morals put forward by the prophets, if not higher, or sterner, or purer than that of the Law, is more plainly declared, and with greater, because now more needed, vehemence of diction. (5.) They were extraordinary, yet authorized, exponents of the Law (Is. lviii. 3–7; Ez. xviii.; Mic. vi. 6–8; Hos. vi. 6; Am. v. 21, &c.). (6.) They held a pastoral or quasi-pastoral office. (7.) They were a political power in the state. (8.) But their most essential characteristic is that they were instruments of revealing God's will to man, as in other ways, so, specially, by predicting future events, and, in particular, by foretelling the incarnation of the Lord JESUS CHRIST, and the redemption effected by Him. There are two chief ways of exhibiting this fact: one is suitable when discoursing with Christians, the other when arguing with unbelievers. To the Christian it is enough to show that the truth of the NEW TESTAMENT and the truthfulness of its authors, and of the Lord Himself, are bound up with the truth of the existence of this predictive element in the prophets. To the unbeliever it is necessary to show that facts have verified their predictions. The fulfil-

ment of a single prophecy does not prove the prophetic power of the prophet, but the fulfilment of a long series of prophecies by a series or number of events does in itself constitute a proof that the prophecies were intended to predict the events, and, consequently, that predictive power resided in the prophet or prophets. Now, the Messianic picture drawn by the prophets as a body contains at least as many traits as these:—That salvation should come through the family of Abraham, Isaac, Jacob, Judah, David: that at the time of the final absorption of the Jewish power, SHILOH (*the tranquillizer*) should gather the nations under his rule; that there should be a great Prophet, typified by Moses; a King descended from David; a Priest forever, typified by Melchizedek: that there should be born into the world a child to be called Mighty God, Eternal Father, Prince of Peace: that there should be a Righteous Servant of God on whom the Lord would lay the iniquity of all; that Messiah the Prince should be cut off, but not for Himself: that an everlasting kingdom should be given by the Ancient of Days to one like the Son of Man. (MESSIAH.) We have here a series of prophecies so applicable to the person and earthly life of Jesus Christ as to be thereby shown to have been designed to apply to Him. And if they were designed to apply to Him, prophetic prediction is proved.—Objection 1. *Vagueness*. It has been said that the prophecies are too darkly and vaguely worded to be proved predictive by the events which they are alleged to foretell. But to this might be answered—(a.) That God never forces men to believe, but that there is such a union of definiteness and vagueness in the prophecies as to enable those who are willing to discover the truth, while the wilfully blind are not forcibly constrained to see it. (b.) That, had the prophecies been couched in the form of direct declarations, their fulfilment would have thereby been rendered impossible, or, at least, capable of frustration. (c.) That the effect of prophecy would have been far less beneficial to believers, as being less adapted to keep them in a state of constant expectation. (d.) That the Messiah of Revelation could not be so clearly portrayed in His varied character as God and Man, as Prophet, Priest, and King, if He had been the mere “teacher.” (e.) That the state of the Prophets, at the time of receiving the Divine revelation, was such as necessarily to make their predictions fragmentary, figurative, and abstracted from the relations of time. (f.) That some portions of the prophecies were intended to be of double application, and some portions to be understood only on their fulfilment (comp. Jn. xiv. 29; Ez. xxxvi. 33).—Objection 2. *Obscurity of a part or parts of a prophecy otherwise clear*. The objection drawn from “the unintelligibility of one part of the prophecy, as invalidating the proof of foresight arising from the evident completion of those parts which are understood” is akin to that drawn from the vagueness of the whole of it, and may be answered like Objection 1 above.—Objection 3. *Application of the several prophecies to a more immediate subject*. It has been the task of many Biblical critics to examine the different passages alleged to be predictions of Christ, and to show that they were delivered in reference to some person or thing contemporary with, or shortly subsequent to, the time of the writer. Let it be granted that it may be proved of all the predictions of the Messiah—it certainly may be proved of many—that they primarily apply to some historical and present fact: in that case a certain law, under which

God vouchsafes His prophetic revelations, is discovered; but there is no semblance of disproof of the further Messianic interpretation of the passages under consideration. Whether it can be proved by an investigation of Holy Scripture, that this relation between Divine announcements for the future and certain present events does so exist as to constitute a law, and whether, if the law is proved to exist, it is of universal or only of partial application, we do not pause to determine. But it is manifest that the existence of a primary sense cannot exclude the possibility of a secondary sense.<sup>1</sup> (OLD TESTAMENT,

<sup>1</sup> Prof. S. C. Bartlett (in *B. S.* xviii. 737 f.) presents the references in Mat. ii. 15 to Hos. ii. 1, in Heb. i. 5 to 2 Sam. vii. 12-16, in Heb. x. 5-7 to Ps. xl. 6-8 (comp. verse 12), in Jn. xix. 28 ff. to Ps. lxxix. 21 (comp. ver. 5), in Jn. xix. 35 to Ex. vii. 46, in Gal. iii. 16 ff. to Gen. xlii. 15 and xvii. 8, in Heb. ii. 6-8 to Ps. ii. 4 ff., in Mat. i. 22, 23, to Is. vii. 14, in Mat. xv. 7 to Is. xxix. 13, and the reference in 1 Cor. x. 3-6 to the Israelites as drinking "of the spiritual Rock that followed them, and that Rock was Christ," &c., as affording "specimens of the chief forms of difficulty surrounding the subject of Messianic prophecy. The problem is to discover some fundamental and central principle, according to which these various kinds of passages can be understood, so as neither to abrogate the authority of the N. T., nor to set aside the authority of the Old." Prof. Bartlett enumerates five theories which attempt to meet, in whole or in part, the difficulties of this problem: 1. "The theory of accommodation," which denies that the apostles intended to cite the passages as veritable prophecies, and affirm that they employed them only as apt quotations. The supporters of this theory (Tittmann, Stinart, Robinson, Barnes, &c.) render the Gr. *hina plērōthē*, &c. (A. V. "that it might be fulfilled") so that it was fulfilled, but the best scholarship of the present day (Meyer, Alford, Winer, Olshausen, De Wette, Wordsworth, Tholuck, Alexander, Davidson, Fairbairn, Lee, &c.) sustains the A. V. translation in rendering "that it might be fulfilled." 2. "The theory of alternating subjects of prophecy." Thus Psalms xxii., xl., lxxix., &c., have been interpreted as referring partly to David and partly to Christ. This theory arbitrarily introduces two subjects when the writer evidently presents only one. 3. "The theory of a twofold signification or 'double sense'":—primary and secondary—lower and higher—literal and allegorical or typical. Thus Chrysostom held that Ps. vii. treats primarily of man, but in a higher sense of Christ. This theory is infelicitous in its statement, and lacks method, precision, and limitation. 4. "The theory of a reiterated reference." This view asserts but one signification of the language, but assigns to that one signification repeated applications, either to events which lie along on the same level, or to events related as members of an ascending series, the fulfilment in this case rising from a lower to a higher sphere, i. e. from a type or symbol to the thing typified or symbolized, from a generic or indefinite prophecy to a fulfilment in each of a series of separate events or persons culminating in Christ, &c. Thus Is. vi. 9, 10, and xxix. 18 plainly refer to the prophet's contemporaries, but are applied in Mat. xlii. 14 ff., and xv. 7, 8, by our Saviour Himself to the Jews of His time. They were, says Lange (*on Mat.* xlii. 14 and xv. 7) "most completely fulfilled when the Jews resisted the Gospel itself." "Isaiah's verbal prophecy about his contemporaries was, in [these respects,] a typical prophecy of the times of Jesus." Alford regards "is fulfilled" in Mat. xlii. 14 as = "finds one of the stages of its fulfilment—a partial one having taken place in the contemporaries of the prophet." He regards likewise Is. xxix. 13 as "one of those deeper and more general declarations of God which shall be ever having their successive illustrations in His dealings with men." Hengstenberg and Prof. J. A. Alexander refer Psalms xxii., lxxix., &c. to "an ideal person, the righteous servant of Jehovah," or "the righteous man in general," "representing the whole class of righteous sufferers," and regard his words as capable of being "appropriated, to a certain extent, by any suffering believer, and by the whole suffering Church," yet "fully verified only in Christ, the head and representative of the class in question." 5. "The theory of an organic connection and correlation sustained by the whole O. T. economy to that of the N. T. It finds one continuous scheme of God running unbroken through the two dispensations, of which the earlier portion sustains a preordained parallelism to the later, being typical, or rather representative, of it. This earlier train of arrangements being not ultimate, but, by the intention of the Holy Spirit, preparatory and representative, points forward, and thus even the language describing them involves a prophecy, while also the utter-

B.).—Objection 4. *Miraculous character.* There is no question that if MIRACLES are, either physically or morally, impossible, then prediction is impossible.

—IV. *The Prophetic State.* We learn from Holy Scripture that it was by the agency of the Spirit of God that the prophets received the Divine communication (Num. xi. 17, 25, 29; 1 Sam. x. 6, xix. 20; Jer. xxiii. 16; Ez. xiii. 2, 3; 2 Pet. i. 21). (MISTRELL.) The prophet held an intermediate position in communication between God and man. God communicated with him by His Spirit, and he, having received this communication, was "the spokesman" of God to man (comp. Ex. vii. 1, and iv. 16). But the means by which the Divine Spirit communicated with the human spirit, and the conditions of the human spirit under which the Divine communications were received, have not been clearly declared to us. They are, however, indicated. In Num. xii. 6-8 (comp. Joel ii. 28 and Dan. i. 17) we have an exhaustive division of the different ways in which the revelations of God are made to man. 1. Direct declaration and manifestation, "I will speak mouth to mouth, apparently, and the similitude of the Lord shall he behold." 2. Vision. 3. Dream. The theory of Philo and the Alexandrian school, that the prophet was in a state of entire unconsciousness when under the influence of Divine INSPIRATION, identifies Jewish prophecy in all essential points with the heathen *mantikē* (Gr. = DIVINATION) as distinct from *prophēteia*, or interpretation. According to the belief of the heathen, of the Alexandrian Jews, and of the Montanists, the vision of the prophet was seen while he was in a state of ecstatic unconsciousness, and the enunciation of the vision was made by him in the same state. The Fathers of the Church opposed the Montanist theory with great unanimity. It does not seem possible to draw any very precise distinction between the prophetic "dream" and the prophetic "vision." In the case of Abraham (Gen. xv. 1) and of Daniel (Dan. vii. 1), they seem to melt into each other. In both, the external senses are at rest, reflection is quiescent, and intuition energizes. The action of the ordinary faculties is suspended in the one case by natural, in the other by supernatural or extraordinary causes. (DREAMS.) The prophetic TRANCE, in which the prophets and other inspired persons, sometimes, at least, received Divine revelations, would seem to have been of the following nature. (1.) The bodily senses were closed to external objects as in deep sleep. (2.) The reflective and discursive faculty was still and inactive. (3.) The spiritual faculty was awakened to the highest state of energy. Hence revelations in trances are described by the prophets as "seen" or "heard" by them, for the spiritual faculty energizes by immediate perception on the part of the inward sense, not by inference and thought. Hence, too, the prophets' visions are unconnected and fragmentary, as they are not the subject of the reflective but of the perceptive faculty, and succession in time is disregarded or unnoticed. Hence, too, the imagery with which the prophetic

ances that point most distinctly to the distant future not only clothe themselves with the forms of the present, but commonly view that future from the point of view and through the medium of its present representation." This last theory, "advocated substantially by Fairbairn, Wm. Lee, Ebrard, Tholuck, &c." Prof. Bartlett presents as the basis of the true and comprehensive view of the case, and traces in its threefold relation to direct Messianic prophecy, typical transactions, and typical and representative predictions. (See his valuable article in *B. S.* xviii. 724-770.)

writings are colored, and the dramatic cast in which they are moulded. But though Scripture language seems to point out the state of dream and of trance, or ecstasy, as a condition in which the human instrument received the Divine communications, it does not follow that all the prophetic revelations were thus made. The greater part of the Divine communications may have been made to the prophets in their waking and ordinary state, while the visions were exhibited to them in the state either of sleep, or of ecstasy.—Had the prophets a full knowledge of that which they predicted? It follows from what we have already said that they had not, and could not have. They were the “spokesmen” of God (Ex. vii. 1), the “mouth” by which His words were uttered, or they were enabled to view, and empowered to describe, pictures presented to their spiritual intuition; but there are no grounds for believing that, contemporaneously with this miracle, there was wrought another miracle, enlarging the understanding of the prophet, so as to grasp the whole of the Divine counsels which he was gazing into, or which he was the instrument of enunciating (Dan. xii. 8; Zech. iv. 5; 1 Pet. i. 10; INSPIRATION.)

—V. *Interpretation of Predictive Prophecy.* A few rules, deduced from the nature of prophecy, are (1.) Interpose distances of time according as history may show them to be necessary with respect to the past, or inference may show them to be likely in respect to the future, because, as we have seen, the prophetic visions are abstracted from relations in time. (2.) Distinguish the *form* from the *idea*. (3.) Distinguish in like manner figure from what is represented by it. (4.) Make allowance for the imagery of the prophetic visions, and for the poetical diction in which they are expressed. (5.) In respect to things past, interpret by the apparent meaning, checked by reference to events: in respect to things future, interpret by the apparent meaning, checked by reference to the analogy of the faith. (6.) Interpret according to the principle which may be deduced from the examples of visions explained in the O. T. (7.) Interpret according to the principle which may be deduced from the examples of prophecies interpreted in the N. T. (OLD TESTAMENT, B.)

—VI. *Use of Prophecy.* Predictive prophecy is at once a part and an evidence of revelation: at the time that it is delivered, and until its fulfilment, a part; after it has been fulfilled, an evidence. 2 Pet. i. 19 describes it as “a light shining in a dark place,” or “a taper glimmering where there is nothing to reflect its rays,” i. e. throwing some light, but only a feeble light as compared with what is shed from the Gospel history. But after fulfilment, “the word of prophecy” becomes “more sure” than before; i. e. it is no longer merely a feeble light to guide, but it is a firm ground of confidence, and, combined with the apostolic testimony, serves as a trustworthy evidence of the faith. As an evidence, fulfilled prophecy is as satisfactory as any thing can be, for who can know the future except the Ruler who disposes future events; and from whom can come prediction except from Him who knows the future?—VII. *Development of Messianic Prophecy.* (MESSIAH; SAVIOUR; SON OF GOD.) Hengstenberg arranges the list of the prophets chronologically thus: Hosea, Joel, Amos, Obadiah, Jonah, Micah, Isaiah, Nahum, Habakkuk, Zephaniah, Jeremiah, Ezekiel, Daniel, Haggai, Zechariah, Malachi. Keil arranges the minor prophets with their dates thus (*B. S.* xxiv. 783): Obadiah (b. c. 889–884), Joel (875–848), Jonah (824–783), Amos (810–783), Hosea (790–725), Micah

(758–710), Nahum (710–699), Habakkuk (650–624), Zephaniah (628–623), Haggai (619), Zechariah (from 519 on), Malachi (433–422).—VIII. *Prophets of the New Testament.* So far as their predictive powers are concerned, the O. T. prophets find their N. T. counterpart in the writer of the Apocalypse (ANTICHRIST; REVELATION OF ST. JOHN); but in their general character, as specially illumined revealers of God's will, their counterpart will rather be found, first in the great Prophet of the Church (JESUS CHRIST), and His forerunner JOHN THE BAPTIST, and next in all those persons who were endowed with the extraordinary gifts of the Spirit in the apostolic age, the speakers with tongues and the interpreters of tongues, the prophets and the discerners of spirits, the teachers and workers of miracles (1 Cor. xii. 10, 28). That predictive powers did occasionally exist in the N. T. prophets is proved by the case of AGABUS (Acts xi. 28), but this was not their characteristic. The prophets of the N. T. were supernaturally-illumined expounders and preachers. (For “false prophets,” see DIVINATION; IDOLATRY; MAGIC.)

\* **Prophet-ess** (Heb. *nēbiāh*; Gr. *prophētis*) = a female PROPHET, spoken of MIRIAM (Ex. xv. 20), DEBORAH 2 (Judg. iv. 4), HULDAH (2 K. xxii. 14; 2 Chr. xxxiv. 22), NOADIAH 2 (Neh. vi. 14), ANNA 2 (Lk. ii. 38), and assumed by “JEZEBEL” in Rev. ii. 20. In Is. viii. 3 “prophetess” = *wife of the prophet*.

\* **Pro-pi-ti-a-tion** [pro-pish-e-a'shun] (fr. L.), the A. V. translation of—1. Gr. *hilasmos* = *propitiation*, *expiation*, for *propitiator*, i. e. one who makes ATONEMENT (1 Jn. ii. 2, iv. 10).—2. Gr. *hilasterion* = *an expiatory sacrifice, propitiation*, Rbn. N. T. *Lz.* (Rom. iii. 25), translated “MERCY-SEAT” in Heb. ix. 5.

\* **Pro'rex** (L. for the king) = viceroy or regent (2 K. i. 17 marg. n.).

**Pros'e-lyte** (fr. Gr. *proslutos* = *a new-comer*; the LXX. translation of Heb. *ger*). The Hebrew word thus translated in the LXX. is in the A. V. commonly rendered “STRANGER” (Gen. xv. 13; Ex. ii. 22; Is. v. 17, &c.). In the N. T. the word = one who has come over to Judaism (Mat. xxiii. 15; Acts ii. 10, vi. 5, xiii. 43). The existence, through all stages of the history of the Israelites, of a body of men, not of the same race, but holding the same faith and adopting the same ritual, is a fact which, from its very nature, requires to be dealt with historically. This article (originally by Prof. Plumptre) considers the condition of the proselytes of Israel in the five great periods into which the history of the people divides itself: viz. (I.) the age of the patriarchs; (II.) from the Exodus to the commencement of the monarchy; (III.) the period of the monarchy; (IV.) from the Babylonian Captivity to the destruction of Jerusalem; (V.) from the destruction of Jerusalem downward.—I. The position of the family of Israel as a distinct nation, with a special religious character, appears at a very early period to have exercised a power of attraction over neighboring races. In the case of the Shechemites, the sons of Jacob require circumcision as an indispensable condition (Gen. xxxiv. 14). This, and apparently this only, was required of proselytes in the pre-Mosaic period.—II. The life of Israel under the Law, from the very first, presupposes and provides for the incorporation of men of other races. The “mixed multitude” of Ex. xii. 38 implies the presence of proselytes more or less complete. It is recognized in the earliest rules for the celebration of the Passover (Ex. xii. 19, 48, &c.; A. V. “STRANGER”). The laws clearly point to the position of a convert.

Among the proselytes of this period the KENITES were probably the most conspicuous (Judg. i. 16). The presence of the class was recognized in the solemn declaration of blessings and curses from Ebal and Gerizim (Josh. viii. 33). The period after the conquest of Canaan was not favorable to the admission of proselytes. The people had no strong faith, no commanding position. The Gibeonites (Josh. ix.) furnish the only instance of a conversion, and their condition is rather that of slaves compelled to conform than of free proselytes. (NETHINIM.)—III. With the monarchy and the consequent fame and influence of the people, there was more to attract stragglers from the neighboring nations, and, accordingly, many names (ARAHNAH; DOEG; EBEN-MELECH; ITIMAH; SHEBNA (?); URIAH 1; ZELEX) suggest the presence of men of another race conforming to the faith of Israel. The CHERETHITES and PELETHITES consisted probably of foreigners who had been attracted to the service of David, and were content for it to adopt the religion of their master. A convert of another kind, the type, as it has been thought, of the later proselytes of the gate is NAAMAN the Syrian (2 K. v. 15, 18) recognizing Jehovah as his God, yet not binding himself to any rigorous observance of the Law. The position of the proselytes during this period appears to have undergone considerable changes. On the one hand, men (Doeg, &c.; see above) rose to power and fortune. It might well be a sign of the times in the later days of the monarchy that they became "very high," the "head" and not the "tail" of the people (Deut. xxviii. 43, 44). The picture had, however, another side. They were treated by David and Solomon as a subject-class, brought under a system of compulsory labor from which others were exempted (1 Chr. xxii. 2; 2 Chr. ii. 17, 18). The statistics of this period, taken probably for that purpose, give their number (probably, i. e. the number of adult working males) at 153,600 (*ib.*). They were subject, at other times, to wanton insolence and outrage (Ps. xciv. 6). They became the special objects of the care and sympathy of the prophets (Jer. vii. 6, xxii. 3; Ez. xxii. 7, 29; Zech. vii. 10; Mal. iii. 5).—IV. The proselytism of the period after the Captivity assumed a different character. It was for the most part the conformity, not of a subject-race, but of willing adherents. Even as early as the return from Babylon we have traces of those who were drawn to a faith which they recognized as holier than their own (Neh. x. 28). With the conquests of Alexander, the wars between Egypt and Syria, the struggle under the MACCABEES (ANTIOCHUS IV., &c.), the expansion of the Roman empire, the Jews became more widely known and their power to proselyte increased. (DISPERSION, JEWS OF THE.) In most of the great cities of the empire were men who had been rescued from idolatry and its attendant debasements, and brought under the power of a higher moral law. The converts who were thus attracted, joined, with varying strictness, in the worship of the Jews. In Palestine itself the influence was often stronger and better. Even Roman centurions learned to love the conquered nation, built synagogues for them (Lk. vii. 5), fasted and prayed, and gave alms, after the pattern of the strictest Jews (Acts x. 2, 30), and became preachers of the new faith to the soldiers under them (v. 7). Such men, drawn by what was best in Judaism, were naturally among the readiest receivers of the new truth which rose out of it, and became in many cases the nucleus of a Gentile Church. Proselytism

had, however, its darker side. The Jews of Palestine were eager to spread their faith by the same weapons as those with which they had defended it. The Idumeans (EDOMITES) had the alternative offered them by John Hyrcanus, of death, exile, or circumcision (Jos. xiii. 9, § 3). The Itureans (ITUREA) were converted in the same way by Aristobulus (Jos. xiii. 11, § 3). Where force was not in their power, they obtained their ends by the most unscrupulous fraud. Those who were most active in proselyting were precisely those from whose teaching all that was most true and living had departed. The vices of the Jew were engrafted on the vices of the heathen (Mat. xxiii. 15). The position of such proselytes was indeed every way pitiable. At Rome, and in other large cities, they became the butts of popular scurrility. They had to share the fortunes of the Jews. (AQUILA.) At a later time, they were bound to make a public profession of their conversion, and to pay a special tax. Among the Jews themselves their case was not much better. For the most part the convert gained but little honor even from those who gloried in having brought him over to their sect and party. Proselytes were regarded as the leprosy of Israel. One proverb coupled them with the vilest profligates as hindering Messiah's coming, and another taught that no wise man would trust a proselyte even to the twenty-fourth generation. The better Rabbis did their best to guard against these evils. Anxious to exclude all unworthy converts, they grouped them, according to their motives, as—(1.) Love-proselytes, where they were drawn by the hope of gaining the beloved one; (2.) Man-for-Woman, or Woman-for-Man proselytes, where the husband followed the wife's religion or conversely; (3.) Esther-proselytes, where conformity was assumed to escape danger, as in the original Purim (Esth. viii. 17); (4.) King's-table-proselytes, who were led by the hope of court-favor and promotion, like the converts under David and Solomon; (5.) Lion-proselytes, where the conversion originated in a superstitious dread of a Divine judgment, as with the Samaritans of 2 K. xvii. 26. None of these were regarded as fit for admission within the covenant. When they met with one with whose motives they were satisfied, he was warned that, in becoming a Jew, he was attaching himself to a persecuted people, and must expect only suffering in this life, his reward in the next. On the part of some there was a disposition to dispense with circumcision, which others regarded as indispensable (Jos. xx. 2, § 5; comp. Acts xi. 2 ff., xv.; PAUL). The centurion of Lk. vii. (probably) and Acts x., possibly the Grecians (HELLENIST) of Jn. xii. 20 and Acts xiii. 42, are instances of men admitted on the former footing. (PAUL.) The phrases "religious proselytes" (Acts xiii. 43), "devout Greeks" (xvii. 4), or "devout persons" (ver. 17), "devout men" (ii. 5, viii. 2), often inaccurately supposed to describe the same class—the Proselytes of the Gate—were probably used generally of all converts, or, if with a specific meaning, applied to the full Proselytes of Righteousness. (See below, V.)—V. The teachers who carried on the Rabbinical succession consoled themselves, as they saw the new order waxing and their own glory waning, by developing the decaying system with an almost microscopic minuteness. The precepts of the Talmud may indicate the practices and opinions of the Jews from the second to the fifth century. They are very untrustworthy as to any earlier time. The points of interest which present themselves for inquiry are: (1.) The Classi-

fication of Proselytes. (2.) The ceremonies of their admission. The division which has been in part anticipated, was recognized by the Talmudic Rabbis, but received its full expansion at the hands of Maimonides. The term "Proselytes of the Gate" was derived from the frequently occurring description in the Law, "the stranger that is within thy gates" (Ex. xx. 10, &c.). To them were referred the greater part of the precepts of the Law as to the "stranger." Converts of this class were not bound by circumcision and the other special laws of the Mosaic code. It was enough for them to observe the seven precepts of Noah, i. e. the six supposed to have been given to Adam against (1.) idolatry, (2.) blasphemy, (3.) bloodshed, (4.) uncleanness, (5.) theft, (6.) of obedience, with (7.) the prohibition of "flesh with the blood thereof" given to Noah. The proselyte was not to claim the privileges of an Israelite, might not redeem his first-born, or pay the half-shekel. He was forbidden to study the Law under pain of death. The later Rabbis, when Jerusalem had passed into other hands, held that it was unlawful for him to reside within the holy city. In return they allowed him to offer whole burnt-offerings for the priest to sacrifice, and to contribute money to the Corban of the Temple. They held out to him the hope of a place in the paradise of the world to come. They insisted that the profession of his faith should be made solemnly in the presence of three witnesses. The Jubilee was the proper season for his admission. All this seems so full and precise, that we cannot wonder that it has led many writers to look on it as representing a reality. It remains doubtful, however, whether it was ever more than a paper-scheme of what ought to be, disguising itself as having actually been. All that can be said therefore is, that in the time of the N. T. we have independent evidence (see IV., above) of the existence of converts of two degrees, and that the Talmudic division is the formal systematizing of an earlier fact. The "proselytes" and "devout" persons of the N. T. were, however, probably limited to the circumcised.—In contrast with these were the Proselytes of Righteousness, known also as Proselytes of the Covenant, perfect Israelites. Here also we must receive what we find with the same limitation as before. All seems at first clear and definite enough. The proselyte was first catechised as to his motives. If these were satisfactory, he was first instructed as to the Divine protection of the Jewish people, and then circumcised. Often the proselyte took a new name. All this, however, was not enough. The convert was still a "stranger." His children would be counted as "bastards," i. e. aliens. Baptism was required to complete his admission. When the wound was healed, he was stripped of all his clothes, in the presence of the three witnesses who had acted as his teachers, and who now acted as his sponsors, the "fathers" of the proselyte, and led into the tank or pool. As he stood there, up to his neck in water, they repeated the great commandments of the Law. These he promised and vowed to keep, and then, with an accompanying benediction, he plunged under the water. The baptism was followed, as long as the Temple stood, by the offering or Corban, consisting of two turtle-doves or pigeons (compare Lev. xii. 18), for which was substituted, after the destruction of Jerusalem, a vow to offer it as soon as the Temple should be rebuilt. For women-proselytes, there were only baptism and the Corban, or, in later times, baptism by itself.—It is obvious

that this account suggests many questions of grave interest. Was this ritual observed as early as the commencement of the first century? If so, was the BAPTISM of John, or that of the Christian Church, in any way derived from, or connected with, the baptism of proselytes? If not, was the latter in any way borrowed from the former? Prof. Plumptre thus sums up the conclusions which seem fairly to be drawn from the controversial works on this subject:—(1.) There is no *direct* evidence of the practice being in use before the destruction of Jerusalem. (2.) The negative argument drawn from the silence of the O. T., of the Apocrypha, of Philo, and of Josephus, is almost decisive against the belief that there was in their time a baptism of proselytes, with *as much* importance attached to it as we find in the Talmudists. (3.) It remains probable, however, that there was a baptism in use at a period considerably earlier than that for which we have direct evidence. The symbol was in itself natural and fit. (4.) The history of the N. T. itself suggests the existence of such a custom (Jn. i. 25, iii. 10, &c.). A sign is seldom chosen, unless it already has a meaning for those to whom it is addressed. The fitness of the sign in this case would be in proportion to the associations already connected with it. (5.) It is, however, not improbable that there may have been a reflex action in this matter, from the Christian upon the Jewish Church. The Rabbis saw the new society, in proportion as the Gentile element in it became predominant, throwing off circumcision, relying on baptism only. There was every thing to lead them to give a fresh prominence to what had been before subordinate. Two facts of some interest remain to be noticed. (a.) It formed part of the Rabbinic hopes of the kingdom of the Messiah that then there should be no more proselytes. (b.) Partly, perhaps, as connected with this feeling, partly in consequence of the ill-repute into which the word had fallen, there is, throughout the N. T. a sedulous avoidance of it. It is used four times only (see above). NOVICK.

#### \* Pros'it-tute. HARLOT.

**Proverbs, Book of.** 1. *Title.* The title of this book in Hebrew is, as usual, taken from the first word, *mishlêy* (= *proverbs of*), or more fully from the first two words, *mishlêy Shêlômôh* (= *proverbs of Solomon*), and is in this case appropriate to the contents. By this name it is commonly known in the Talmud. The Heb. *māshāl* (pl. *māshālîm*, pl. construct *mishlêy*, as above), rendered in the A. V. "by-word," "PARABLE," "proverb," expresses all and even more than is conveyed by its English representatives. The primary idea involved in it is that of *likeness, comparison* (so Mr. Wright, original author of this article). Probably all proverbial sayings were at first of the nature of similes, but the term *māshāl* soon acquired a more extended significance. It was applied to denote such short, pointed sayings as do not involve a comparison directly, but still convey their meaning by the help of a figure (e. g. 1 Sam. x. 12; Ez. xii. 22, 23, xvii. 2, 3). From this stage of its application it passed to that of *sententious maxims generally* (e. g. Prov. i. 1, x. 1, xxv. 1, xxvi. 7, 9; Eccl. xii. 9; Job xiii. 12), many of which, however, still involve a comparison (Prov. xxv. 3, 11-14, &c., xxvi. 1-3, &c.). Such comparisons are either expressed, or the things compared are placed side by side, and the comparison left for the hearer or reader to supply. Next we find it used of those longer pieces in which a single idea is no longer exhausted in a sentence,

but forms the germ of the whole, and is worked out into a didactic poem. Many instances of this kind occur in the first section of the Book of Proverbs: others are found in Job xxvii., xxix. (PARABLE.) But the Book of Proverbs, according to the introductory verses which describe its character, contains, besides several varieties of the *māshāl*, sententious sayings of other kinds, mentioned in i. 6. The first of these is the *hūdāh* or *chidāh* (apparently = a *knotty, intricate saying*, the solution of which demands experience and skill), rendered in the A. V. "dark saying," "dark speech," "hard question," "RIDDLE," and once (Hab. ii. 6) "proverb." Another was the *mālīsāh* (Prov. i. 6, A. V. "the interpretation," margin "an eloquent speech"), probably = a *dark enigmatical saying*, which might assume the character of sarcasm and irony, though these were not essential to it.—II. *Canonicity of the book and its place in the Canon.* The canonicity of the Book of Proverbs has never been disputed except by the Jews themselves. It appears to have been one of the points urged by the school of Shammai, that the contradictions in the Book of Proverbs rendered it apocryphal. It occurs in all the Jewish lists of canonical books, and is reckoned among what are called the "writings" (*Cethūbim*) or Hagiographa, which form the third great division of the Hebrew Scriptures. (BIBLE, III. 3.) The Proverbs are frequently quoted or alluded to in the N. T., and the canonicity of the book thereby confirmed. (Compare Prov. iii. 11, 12, with Heb. xii. 5, 6; Prov. iii. 34 with Jas. iv. 6; Prov. xx. 20 with Mat. xv. 4 and Mk. vii. 10; Prov. xxvii. 11 with 2 Pet. ii. 22, &c. CANON; INSPIRATION; OLD TESTAMENT.)—III. *Authorship and date.* The superscriptions affixed to several portions of the Book of Proverbs, in i. 1, x. 1, xxv. 1, attribute the authorship of those portions to Solomon the son of David, king of Israel. With the exception of the last two chapters, which are distinctly assigned to other authors, it is probable that the statement of the superscriptions is in the main correct, and that the majority of the proverbs contained in the book were uttered or collected by Solomon. According to Bartolocci, quoted by Carpov, the Jews ascribe the composition of the Song of Songs to Solomon's youth, the Proverbs to his mature manhood, and the Ecclesiastes to his old age. But in the *Seder Olam Rabba* they are all assigned to the end of his life. There is nothing unreasonable in the supposition that many, or most of the proverbs in the first twenty-nine chapters originated with Solomon. Whether they were left by him in their present form is a distinct question. The book consists of three main divisions, with two appendices. 1. Chs. i.-ix. form a connected *māshāl* (see I. above), in which Wisdom is praised and the youth exhorted to devote themselves to her. This portion is preceded by an introduction and title describing the character and general aim of the book. 2. Chs. x. 1-xxiv., with the title, "the Proverbs of Solomon," consist of three parts:—x. 1-xxii. 16, a collection of single proverbs, and detached sentences out of the region of moral teaching and worldly prudence; xxii. 17-xxiv. 21, a more connected *māshāl*, with an introduction, xxii. 17-22, which contains precepts of righteousness and prudence: xxiv. 23-34, with the inscription, "these also belong to the wise," a collection of unconnected maxims, which serve as an appendix to the preceding. 3. The third division, xxv.-xxix., according to the superscription, is a collection of Solomon's proverbs, consisting of

single sentences, which the men of the court of Hezekiah copied out. The first appendix, ch. xxx., "the words of Agur," is a collection of partly proverbial and partly enigmatical sayings; the second, ch. xxxi., is divided into two parts, "the words of King Lemuel" (1-6), and an alphabetical acrostic in praise of a virtuous woman, which occupies the rest of the chapter.—At first sight it is evident that there is a marked difference between the collections of single maxims and the longer didactic pieces, which both come under the general head *māshāl*. The collection of Solomon's proverbs made by the men of Hezekiah (xxv.-xxix.) belongs to the former class of detached sentences, and in this respect corresponds with those in the second main division (x. 1-xxii. 16). The expression in xxv. 1, "these also are the proverbs of Solomon," implies that the collection was made as an appendix to another already in existence, which we may not unreasonably presume to have been that which stands immediately before it in the present arrangement of the book. Upon one point most modern critics are agreed, that the germ of the book in its present shape is the portion x. 1-xxii. 16, to which is prefixed the title, "the Proverbs of Solomon." At what time it was put into the form in which we have it, cannot be exactly determined. Ewald suggests as a probable date about two centuries after Solomon (compare xxv. 1). That all the proverbs in this collection are not Solomon's is extremely probable (so Mr. Wright); that the majority of them are his there seems no reason to doubt, and this fact would account for the general title in which they are all attributed to him. The poetical style, says Ewald, is the simplest and most antique imaginable. Most of the proverbs are examples of antithetic parallelism, the second clause containing the contrast to the first. Each verse consists of two members, with generally (in Hebrew) three or four, but seldom five words in each. (POETRY, HEBREW.) Furthermore, the proverbs in this collection have the peculiarity of being contained in a single verse. In addition to the distinctive form assumed by the proverbs of this earliest collection, may be noticed the occurrence of favorite and peculiar words and phrases—e. g. "fountain of life" (x. 11, xiii. 14, xiv. 27, xvi. 22), "tree of life" (xi. 30, xiii. 12, xv. 4), "snares of death" (xiii. 14, xiv. 27), &c.—With regard to the other collections, opinions differ widely both as to their date and authorship. Ewald places next in order chs. xxv.-xxix., the superscription to which fixes their date about the end of the eighth century B. C. "These are also the proverbs of Solomon, which the men of Hezekiah copied out," or compiled. The memory of these learned men of Hezekiah's court is perpetuated in Jewish tradition. In the Talmud they are called the *si'ah*, "society" or "academy" of Hezekiah, and it is there said, "Hezekiah and his academy wrote Isaiah, Proverbs, Song of Songs, Ecclesiastes." Many of the proverbs in this collection are repetitions, with slight variations, of some in the previous section. We may infer from this that the compilers of this section made use of the same sources from which the earlier collection was derived. The question now arises, as in the former section: Were all these proverbs Solomon's? Jahn says Yes; Bertholdt, No; for xxv. 2-7 could not have been by Solomon or any king, but by a man who had lived for a long time at a court. In xxvii. 11, it is no monarch who speaks, but an instructor of youth; xxviii. 16 censures the very errors which stained the reign of

Solomon, and the effect of which deprived his son and successor of the ten-tribes; xxvii. 23-27 must have been written by a sage who led a nomad life. The peculiarities of this section distinguish it from the older proverbs in x.-xxii. 16. Some of these may be briefly noted. The use of the interrogation "seest thou?" in xxvi. 12, xxix. 20 (compare xxii. 29), the manner of comparing two things by simply placing them side by side and connecting them with the simple copula "and," as in xxv. 3, 20, xxvi. 3, 7, 9, 21, xxvii. 15, 20. We miss the pointed antithesis by which the first collection was distinguished. The verses are no longer of two equal members. The character of the proverbs is clearly distinct. Their construction is looser and weaker, and there is no longer that sententious brevity which gives weight and point to the proverbs in the preceding section. Ewald assigns this portion of the book to the end of the eighth century B. C. All that we know about the section xxv.-xxix. is that in Hezekiah's time, i. e. in the last quarter of the eighth century B. C., it was supposed to contain what tradition had handed down as the proverbs of Solomon, and that the majority of the proverbs were believed to be his there seems no good reason to doubt.—The date of the sections i.-ix., xxii. 17-xxv. 1, has been variously assigned. That they were added about the same period Ewald infers from the occurrence of favorite words and constructions, and that that period was a late one he concludes from the traces of a degeneracy from the purity of the Hebrew. It is a remarkable fact, and one showing the extreme difficulty of arguing from internal evidence, that the same details lead Ewald and Hitzig to precisely opposite conclusions; the former placing the date of i.-ix. in the first half of the seventh century, while the latter regards it as the oldest portion of the book, and assigns it to the ninth century. Their arguments, it must be confessed, are by no means conclusive, and we must ask for further evidence before pronouncing so positively as they have done upon a point so doubtful and obscure. In one respect they are agreed, namely, with regard to the unity of the section. Ewald finds in these chapters a certain development which shows that they must be regarded as a whole and the work of one author. The poet intended them as a general introduction to the Proverbs of Solomon, to recommend wisdom in general. But, as Bertheau remarks, there appears nowhere throughout this section any reference to what follows, which must have been the case had it been intended for an introduction. The unity of plan is no more than would be found in a collection of admonitions by different authors referring to the same subject, and is not such as to necessitate the conclusion that the whole is the work of one. There is observable throughout the section, when compared with what is called the earlier collection, a complete change in the form of the proverb. The single proverb is seldom met with, while the characteristics of this collection are connected descriptions, continuous elucidations of a truth, and longer speeches and exhortations. The style is more highly poetical, the parallelism is synonymous and not antithetic or synthetic, as in x. 1-xxii. 16; and another distinction is the usage of *Elohim* (= "God") in ii. 5, 17, iii. 4, which does not occur in x. 1-xxii. 16. Amidst this general likeness, however, there is considerable diversity. It is not necessary to lay so much stress as Bertheau appears to do upon the fact that certain paragraphs are distinguished from those with which they are placed,

not merely by their contents, but by their external form; nor to argue from this that they are the work of different authors. There is more force in the appeal to the difference in the formation of sentences and the whole manner of the language as indicating diversity of authorship. With regard to the date as well as the authorship of this section it is impossible to pronounce with certainty. In its present form it did not exist till probably some long time after the proverbs which it contains were composed. At whatever time it may have reached its present shape there appears no sufficient reason to conclude that Solomon may not have uttered many or most of the proverbs here collected.—The section xxii. 17-xxiv. contains a collection of proverbs marked by certain peculiarities. (1.) The structure of the verses is not so regular as in the preceding section, x. 1-xxii. 16. (2.) A sentence is seldom completed in one verse, but most frequently in two; three verses are often closely connected (xxiii. 1-3, 6-8, 19-21); sometimes as many as five (xxiv. 30-34). (3.) The form of address, "my son," so frequent in the first nine chapters, occurs also here in xxiii. 19, 26, xxiv. 13; and the appeal to the hearer is often made in the second person. Ewald regards this section as a kind of appendix to the earliest collection of the proverbs of Solomon, added not long after the introduction in the first nine chapters, though not by the same author. He thinks it probable that the compiler of this section added also the collection of proverbs made by the learned men of the court of Hezekiah, to which he wrote the superscription in xxv. 1. This theory of course only affects the date of the section in its present form. When the proverbs were written there is nothing to determine. Bertheau maintains that they in great part proceeded from one poet. Keil asserts positively the single authorship of chs. i.-xxix., and maintains that "the contents in all parts of the collection show one and the same historical background, corresponding only to the relations, ideas, and circumstances, as well as to the progress of the culture and experiences of life, acquired by the political development of the people in the time of Solomon."—The concluding chapters (xxx., xxxi.) are in every way distinct from the rest and from each other. The former, according to the superscription, contains "the words of AGUR the son of JAKEN." Whoever he was he appears to have had for his pupils Ithiel and Ucal, whom he addresses in xxx. 1-6, which is followed by single proverbs of Agur's. Ch. xxxi. 1-9 contains "the words of King LEMUEL, the prophecy that his mother taught him." The last section of all (xxxi. 10-31) is an alphabetical acrostic in praise of a virtuous woman. Its artificial form stamps it as the production of a late period of Hebrew literature, perhaps about the seventh century B. C. The coloring and language point to a different author from the previous section, xxx. 1-xxx. 9.—Mr. Wright concludes from a consideration of the whole question of the manner in which the Book of Proverbs arrived at its present shape, that the nucleus of the whole was the collection of Solomon's proverbs in x. 1-xxii. 16; that to this was added the further collection made by the learned men of the court of Hezekiah (xxv.-xxix.); that these two were put together and united with xxii. 17-xxiv., and to this as a whole the introduction (i.-ix.) was affixed, but that whether it was compiled by the same writer who added xxii. 16-xxiv. cannot be determined; and that it is impossible to assert that this same compiler may not have added the concluding chap-

ters of the book to his previous collection. With regard to the date at which the several portions of the book were collected and put in their present shape, the conclusions of various critics are uncertain and contradictory.—To the views of Mr. Wright and others as given above, it may be added that the Rabbins and the earlier school of commentators attribute the whole book to Solomon, even chapters xxx., xxxi. being assigned to him by Rashi and his school. Keil, Hahn, &c., maintain the ancient view (see above). Delitzsch regards the first portion (i.—xxiv. 22) as put forth in Jehoshaphat's time, the introduction (i.—ix.) and appendix (xxii. 16—xxiv. 22) being written by the compiler, "a highly-gifted didactic poet, and an instrument of the Spirit of revelation;" the second portion (xxiv. 23—xxxi.) as published in Hezekiah's time, the introductory (xxiv. 23—34) and closing (xxx., xxxi.) portions being set on each side of the collection of Solomon's proverbs as a kind of foil (Rev. E. Venables, in Kitto). Rev. H. Constable (in Fairbairn) ascribes chs. i.—xxiv. to the time and hand of Solomon; and regards xxv.—xxix., according to xxv. 1, as also Solomon's own sayings copied out and collected in Hezekiah's reign by that king's officers, but previously committed to writing; xxx. as the work of Agur, probably "the man of Massa" (so Bunsen; A. V. "the prophecy"), and brother of Lemuel (so Hitzig); and xxxi. as written by the mother of "Lemuel king of Massa."

\* **Prov'ender** = food for cattle (Gen. xxiv. 25, &c.). BARN; CORN; GRASS; HAY; HERD; OX, &c.

\* **Prov'idence** = foresight, forethought (Acts xxiv. 2). GOD.

**Prov'ince** (fr. L.; Heb. and Chal. *mēdināh*; Gr. *eparchia*). (1.) In the O. T. this word appears in connection with the wars between Ahab and Benhadad (1 K. xx. 14, 15, 19). The victory of the former is gained chiefly "by the young men ('armor-bearers,' Keil) of the princes of the province," i. e., probably, of the chiefs of tribes in the Gilead country (so Prof. Plumptre; Prof. Stuart [on Eccl. ii. 8] and Fürst consider the word as used of divisions of a kingdom for the collection of revenue, like the commissariat districts of Solomon in 1 K. iv. 7 ff.; compare the use of the same word in Eccl. ii. 8, v. 8 [Heb. 7]). (2.) More commonly the word is used of the divisions of the Chaldean (Dan. ii. 49, iii. 1, 30) and the Persian kingdoms (Ezr. ii. 1; Neh. vii. 6; Esth. i. 1, 22, ii. 3, &c.). Each of the Persian provinces, which were the smaller sections of a satrapy, had its own governor, who communicated more or less regularly with the central authority for instructions (Ezr. iv., v.). Each province had its own system of finance, subject to the king's direction (Hdt. iii. 89). The total number of the provinces is given at 127 (Esth. i. 1, viii. 9), the satrapies being twenty. (COMPEL 5; EPISTLE; GOVERNOR 7; PERSIANS; TAXES.) (3.) In the N. T. we are brought into contact with the administration of the provinces of the ROMAN EMPIRE. Judea was a sub-province in SYRIA. (ACHAIA; ASIA; CILICIA; CYPRUS; DEPUTY; GOVERNOR 13; PROCURATOR; PUBLICAN.) The right of any Roman citizen to APPEAL from a provincial governor to the emperor meets us as asserted by St. Paul (Acts xxv. 11). In the "COUNCIL" of Acts xxv. 12 we recognize the assessors appointed to take part in the judicial functions of the governor.

\* **Pre-vis'ion** [-vizh'un] = a supply of food, except in the phrase "to make provision" (1 K. iv. 7; 1 Chr. xxix. 19; Rom. xiii. 14), i. e. to prepare and lay up, or make ready for use, a supply of materials, food, or whatever else is needed or desired.

\* **Pra'ning-Hook. KNIFE.**

\* **Psalm** [sahn] (Heb. usually *mizmôr*; Gr. *psalmos*) = a song in praise of God (1 Cor. xiv. 26; Eph. v. 19; Col. iii. 16), especially one of those contained in the Book of Psalms (Lk. xx. 42, &c.). In Lk. xxiv. 44 "the Psalms" are named as the beginning of the *Hagiographa* (BIBLE, III. 3) and as the portion of this containing the most direct Messianic elements (Van Oosterzee in *Lange's Comm.*, l. c.). HYMN; MUSIC; POETRY, HEBREW; PSALMS, BOOK OF.

**Psalms** [sahmz] (see above and below), **Book of.** (Abridged from Mr. Thrupp's original article.) 1.

*The Collection as a Whole.* It does not appear how the Psalms were, as a whole, anciently designated. Their present Hebrew appellation is *Tehillim* = *Praises*. But in the actual superscriptions of the psalms the word *Tehilláh* is applied only to Ps. cxlv., which is indeed emphatically a praise-hymn. (POETRY, HEBREW, I.; PSALM.) The LXX. entitled them *Psalmoi* or "Psalms." The Christian Church obviously received the Psalter or Book of Psalms from the Jews not only as a constituent portion of the Holy Scripture (BIBLE; CANON; INSPIRATION; OLD TESTAMENT), but also as the liturgical hymn-book which the Jewish Church had regularly used in the Temple. The number of separate psalms contained in it is, by the concordant testimony of all ancient authorities, one hundred and fifty; the avowedly "supernumerary" psalm which appears at the end of the Greek and Syriac Psalters being manifestly apocryphal. In the details, however, of the numbering, both the Greek and Syriac Psalters differ from the Hebrew. The LXX. (and so the Vulgate) joined together Psalms ix., x., and cxiv., cxv., and then divided Psalm cxvi. and Psalm cxlvii.; the Syriac joined Psalms cxiv., cxv., and divided Psalm cxlvii. Of the three divergent systems of numbering, the Hebrew (as followed in our A. V.) is, even on internal grounds, to be preferred. The verse-numbering of the A. V. frequently differs from the Hebrew in consequence of the Jewish practice of reckoning the superscription as the first verse.—2. *Component Parts of the Collection.* Ancient tradition and internal evidence concur in parting the Psalter into five great divisions or books. The ancient Jewish tradition is preserved to us by the abundant testimonies of the Christian Fathers. The doxologies at the end of Psalms xli., lxxii., lxxxix., cvi., mark the ends of the first four of the five books. It suggests itself at once that these books must have been originally formed at different periods. This is by various further considerations rendered all but certain, while the few difficulties which stand in the way of admitting it vanish when closely examined. Thus, there is a remarkable difference between the several books in their use of the divine names *Jehovah* and *Elohim*, to designate Almighty God. In Book I. (i.—xli.), the former name is found 272 times, while *Elohim* occurs but 15 times. (We here take no account of the superscriptions or doxology, nor yet of the occurrences of *Elohim* when inflected with a possessive suffix.) In Book II. (xlii.—lxxii.), *Elohim* is found more than five times as often as *Jehovah*. In Book III. (lxxiii.—lxxxix.), the preponderance of *Elohim* in the earlier is balanced by that of *Jehovah* in the later psalms of the book. In Book IV. (xc.—cvi.), the name *Jehovah* is exclusively employed; and so also, virtually, in Book V. (cvii.—cl.), *Elohim* being there found only in two passages incorporated from earlier psalms. Those who maintain, therefore, that the psalms were all collected and arranged at once, contend that the collector distributed the

psalms according to the divine names which they severally exhibited. We find the several groups of psalms which form the respective five books distinguished from each other, in great measure, by their superscriptions. Book I. is exclusively Davidic, thirty-seven of the forty-one psalms having his name prefixed, two others (i., ii.) being prefatory, and the other two (x., xxxiii.) closely connected with those before them. Book II. falls, by the superscriptions of its psalms, into two distinct subdivisions, a Levitic (xlii.-l.) and a Davidic (li.-lxxi.), supplemented by lxxii. the Psalm of Solomon. In Book III., the psalms are all ascribed, explicitly or virtually, to the various Levite singers, except only Psalm lxxxvi., which bears the name of David. In Books IV., V., we have, in all, seventeen psalms marked with David's name. In reasoning from the superscriptions, we have to meet the preliminary inquiry, Are the superscriptions authentic? For the affirmative it is contended that they form an integral, and till modern times almost undisputed portion of the Hebrew text of Scripture; that they are in analogy with other biblical superscriptions or subscriptions, Davidic or otherwise (comp. 2 Sam. i. 18, probably based on an old superscription; xxxiii. 1; SAMUEL, BOOKS OF; Is. xxxviii. 9; IIab. iii. 1, 19); and that their diversified, unsystematic, and often obscure and enigmatical character is inconsistent with the theory of their having originated at a later period. On the other hand is urged their analogy with the untrustworthy subscriptions of the N. T. epistles; also the fact that many arbitrary superscriptions are added in the Greek version of the Psalter. Mr. Thrupp believes (with Tholuck, Hengstenberg, Delitzsch, Oehler, Keil, J. A. Alexander, &c.) that they are, when rightly interpreted, fully trustworthy, and that every objection to the correctness of any one of them can be fairly met. Let us now trace the bearing of the superscriptions upon the date and method of compilation of the several books. Book I. is, by the superscriptions, entirely Davidic; nor do we find in it a trace of any but David's authorship. We may well believe that the compilation of the book was also David's work. Book II. appears by the date of its latest psalm (xli.) to have been compiled in the reign of Hezekiah. It would naturally comprise, 1st, several or most of the Levitical psalms anterior to that date; and 2dly, the remainder of the psalms of David previously uncompiled. To these latter, the collector, after properly appending the single psalm of Solomon, has affixed the notice that "the prayers of David the son of Jesse are ended" (Ps. lxxii. 20); evidently implying, at least apparently, that no more compositions of the royal psalmist remained. How, then, do we find, in the later Books III., IV., V., further psalms yet marked with David's name? The name "David" is used to denote, in other parts of Scripture, after the original David's death, the then head of the Davidic family; and so, in prophecy, the MESSIAH of the seed of David, who was to sit on David's throne (1 K. xii. 16; Hos. iii. 5; Is. lv. 3; Jer. xxx. 9; Ez. xxxiv. 23, 24). Thus, then, we may explain the meaning of the later Davidic superscriptions in the Psalter (and so of "Asaph," "Heman," "Ethan"). The psalms to which they belong were written by Hezekiah, by Josiah, by Zerubbabel, or others of David's posterity. This explanation removes all serious difficulty respecting the history of the later Books of the Psalter. Book III., the interest of which centres in the times of Hezekiah, stretches out, by its last two psalms, to the reign of Manasseh: it was

probably compiled in the reign of Josiah. Book IV. contains the remainder of the psalms up to the date of the Captivity; Book V. the Psalms of the Return. There is nothing to distinguish these two books from each other in respect of outward decoration or arrangement, and they may have been compiled together in the days of Nehemiah. Many critics have assigned various psalms to the age of the Maccabees. The three named by De Wette as bearing, apparently, a Maccabean impress, are Psalms xlv., lx., lxxiv.; and in fact these, together with Ps. lxxix., are perhaps all that would, when taken alone, seriously suggest the hypothesis of a Maccabean date. But even in the case of these, the internal evidence, when more narrowly examined (superscription and verses 7, 8, of Ps. lx.; no mention of the Captivity in xlv.; lxxiv. 9 unnatural 200 years after prophecy ceased; lxxix. 6, "kingdoms;" comp. 1 Mc. vii. 6, 7), proves to be in favor of an earlier date.<sup>1</sup>—3. *Connection of the Psalms with the Israelitish History.* The psalms grew, essentially and gradually, out of the personal and national career of DAVID and of ISRAEL. That of MOSES (Ps. xc.), which, though it contributed little to the production of the rest, is yet, in point of actual date, the earliest, faithfully reflects the long, weary wanderings, the multiplied provocations, and the consequent punishments of the wilderness. With David, however, Israelitish psalmody virtually commences. Previous mastery over his harp had probably already prepared the way for his future strains, when the anointing oil of Samuel descended upon him, and he began to drink in special measure, from that day forward, of the Spirit of the Lord. Then victorious at home over the mysterious melancholy of Saul and in the field over the vaunting champion of the Philistine hosts, he sang how from even babes and sucklings God had ordained strength because of His enemies (Ps. viii.). His next psalms (lviii., lix.) are of a different character; his persecutions at the hands of Saul had commenced. Other psalms also (lvi., xxxiv., lvii., lii., xxxi., liv., xxxv., xxxvi., liii. [except verse 6, comp. xiv.], xlii., xliii., xxxviii. -xl.), may be referred to the period before David ascended the throne. When David's reign has begun, it is still with the most exciting incidents of his history, private or public, that his psalms are mainly associated. There are none to which the period of his reign at Hebron can lay exclusive claim. But after the conquest of Jerusalem his psalmody opened afresh with the solemn removal of the ark to Mount Zion; and in xxiv.-xxix., which belong together, we have the earliest definite instance of David's systematic composition or arrangement of psalms for public use. Psalm xxx. is of the same date, composed for the dedication of David's new palace. Other psalms (lx., lxi., xx., xxi.) show David's feelings in the midst of his foreign wars. Ps. li. is connected with the dark episode which made David tremble not only for himself, but also for the city on which he had labored. To the period of David's flight from Absalom we may refer iii.-vii., lv., lxii., lxiii. Even of those psalms which cannot be referred to any definite occasion, several reflect the general historical circumstances of the times. Thus Ps. ix. is a thanksgiving for the deliverance of the

<sup>1</sup> The best arrangement for the ordinary student of the Psalter is the arrangement of the book itself. Uniform tradition and analogy agree in representing it as highly probable that this arrangement was the work of EZRA, the inspired collector and editor of the Canon (Prof. J. A. Alexander, Preface to *The Psalms translated and explained*).

land of Israel from its former heathen oppressors. Ps. x. is a prayer for the deliverance of the Church from the high-handed oppression exercised from within. The succeeding psalms dwell on the same theme, the virtual internal heathenism by which the Church of God was weighed down. So that there remain very few, e. g. xv.-xvii., xix., xxxii. (with its choral appendage xxxiii.), xxxvii., of which some historical account may not be given. A season of repose near the close of his reign induced David to compose his grand personal thanksgiving for the deliverances of his whole life, Ps. xviii.; the date of which is approximately determined by its place in the history (2 Sam. xxii.). Probably at this period he finally arranged for the sanctuary-service that collection of his psalms which now constitutes the First Book of the Psalter, designedly excluding from it all (li.-lxi.) unfitted for immediate public use, and prefixing by way of preface Psalms i. and ii., the concluding psalm (xli.) seeming to be a sort of ideal summary of the whole. The course of David's reign was not, however, as yet complete. The solemn assembly convened by him for the dedication of the materials of the future Temple (1 Chr. xxviii., xxix.) would naturally call forth a renewal of his best efforts to glorify the God of Israel in psalms; and to this occasion we doubtless owe the great festal psalms lxx.-lxxvii., lxxviii., containing a large review of the past history, present position, and prospective glories of God's chosen people. The supplications of Ps. lxxx. suit best with the renewed distress occasioned by the sedition of Adonijah. Ps. lxxxi., to which Ps. lxx., a fragment of a former psalm, is introductory, forms David's parting strain. Yet that the psalmody of Israel may not seem finally to terminate with him, the glories of the future are forthwith anticipated by his son in Ps. lxxxii.—For a time the single psalm of Solomon remained the only addition to those of David. If, however, religious psalmody were to revive, somewhat might be not unreasonably anticipated from the great assembly of King Asa (2 Chr. xv.); and Ps. i. may well be assigned to a descendant of "Asaph" (comp. § 2 above) on that occasion. Of another revival of psalmody under Jehoshaphat (2 Chr. xx.) Psalms xlvii., xlviii., were the fruits. Ps. xlv. connects itself most readily with the splendors of Jehoshaphat's reign. After psalmody had thus definitely revived, there would be no reason why it should not thenceforward manifest itself in seasons of anxiety, as well as of festivity and thanksgiving. Hence Ps. xlix. Psalms xlii.-xlv., lxxiv., are best assigned to the reign of Ahaz. The reign of Hezekiah is naturally rich in psalmody. Psalms xli., lxxiii., lxxv., lxxvi., connect themselves with the resistance to the supremacy of the Assyrians and the Divine destruction of their host. We are now brought to a series of psalms of peculiar interest (lxxvii.-lxxxix.), springing out of the political and religious history of the separated ten tribes. In date of actual composition they commence before the times of Hezekiah. The earliest is probably Ps. lxxx., a supplication for the Israelitish people at the time of the Syrian oppression. Ps. lxxxi. is an earnest appeal to them; lxxxii. a stern reproof of the oppression prevalent in Israel (Am. iv.); lxxxiii. a prayer for deliverance from the confederacy of enemies (Joel iii.; Am. i.); lxxxviii., probably at the opening of Hezekiah's reign, reproves the disobedience of the Israelites by the parable of the nation's earlier rebellions, sets forth the Temple at Jerusalem as the appointed centre of religious worship and the heir of David's

house as the sovereign of the Lord's choice; lxxxiv. represents the thanks and prayers of the northern pilgrims coming up, for the first time in 250 years, to celebrate the passover in Jerusalem; lxxxv. may well be the thanksgiving for the happy restoration of religion then; lxxvii. the lamentation of the Jewish Church for the Captivity of the ten tribes soon afterward; in lxxxvi. the king himself ("David," see § 2, above) and in lxxxvii. the Levites anticipated the future welcome of all the Gentiles into the Church of God; lxxxix. may be a picture of the evil days that followed through Manasseh's transgressions; and in lxxxviii., lxxxix. we have the pleadings of the nation with God in Manasseh's captivity. All these psalms (except lxxxvi.) are referred by their superscriptions to the Levite singers ("Asaph," see above: "sons of Korah"), and thus bear witness to the efforts of the Levites to reconcile the two branches of the chosen nation.—The captivity of Manasseh himself proved to be but temporary; but the sentence which his sins had provoked upon Judah and Jerusalem still remained to be executed, and precluded the hope that God's salvation could be revealed till after such an outpouring of His judgments as the nation never yet had known. Labor and sorrow must be the lot of the present generation; through these mercy might occasionally gleam, but the glory which was eventually to be manifested must be for posterity alone. The psalms of Book IV. bear generally the impress of this feeling. Psalms ci., ciii. ("of David," see above) readily refer themselves to Josiah as their author.—We pass to Book V. Ps. cvii. is the opening psalm of the Return, sung probably at the first Feast of Tabernacles (Ezr. iii.). The ensuing Davidic psalms (cviii.-cx.) may well be ascribed to Zerubbabel. Ps. cxviii., with which cxiv.-cxvii. (and in the estimation of some cxiii. and even cxii., cxii.) stand connected, was sung at the laying of the foundation of the second Temple. We here pass over the questions connected with Ps. cxix.; but a directly historical character belongs to cxx.-cxxxiv., styled in our A. V. "Songs of Degrees." (DEGREES, SONGS OF.) Internal evidence refers these to the period when the Jews under Nehemiah were, in the very face of the enemy, repairing the walls of Jerusalem, and the title may signify "Songs of goings up upon the walls," the psalms being, from their brevity, well adapted to be sung by the workmen and guards while engaged in their respective duties. Theodoret thinks the "Solomon" of Ps. cxxvii. = Zerubbabel; more probably = Nehemiah (compare "David" of cxxii., cxxiv., cxxxi., cxxxiii., and see above). Psalms cxxxv., cxxxvi. connect themselves with the fast in Neh. ix. Of somewhat earlier date, it may be, are Ps. cxxxvii. and the ensuing Davidic psalms. Of these, cxxxix. is a psalm of the new birth of Israel, from the womb of the Babylonish captivity, to a life of righteousness; cxi.-cxliii. may be a picture of the trials to which the unreturned exiles were still exposed in the realms of the Gentiles. Henceforward, as we approach the close of the Psalter, its strains rise in cheerfulness; and it fittingly terminates with Psalms cxlvii.-cl., which were probably sung on the occasion of the thanksgiving procession of Neh. xii., after the rebuilding of the walls of Jerusalem had been completed. (AIJELETH SHAHAR; ALAMOTH; AL-TASCHITH; GITITH; HIGGAION; JEDUTHUN; JONATHAN-ELEH-RECHOKIM; MAHALATH; MAHALATH LE-ANNOTH; MASCHIL; MICHAM; MUSIC; MUSICAL INSTRUMENTS; MUTH-LABEN; NEGINAH; NEGINOTH;

NEHILOTH; SELAH; SHEMINITH; SHIGGAION; SHOSHANNIM; SHOSHANNIM-EDUTH; SHUSHAN-EDUTH.)—4. *Moral Characteristics of the Psalms.* Foremost among these meets us, undoubtedly, the universal recourse to communion with God (Ps. lxxvii. 1, &c.). Connected with this is the faith by which the psalmist everywhere lives in God rather than in himself (lxxvii.). It is of the essence of such faith that his view of the perfections of God should be true and vivid. The Psalter describes God as He is: it glows with testimonies to His power and providence, His love and faithfulness, His holiness and righteousness; it correspondingly testifies against every form of idol which men would substitute in the living God's place. The Psalms not only set forth the perfections of God: they proclaim also the duty of worshipping Him by the acknowledgment and adoration of His perfections. They encourage all outward rites and means of worship. Among these they recognize the ordinance of sacrifice as an expression of the worshipper's consecration of himself to God's service (iv., v., xxvii., li.). But not the less do they repudiate the outward rite when separated from that which it was designed to express (xl., li., lxi.). Similar depth is observable in the view taken by the psalmists of human sin. In regard to the Law, the psalmist, while warmly acknowledging its excellence, feels yet that it cannot so effectually guide his own unassisted exertions as to preserve him from error (xix., li., cxix.). The Psalms bear repeated testimony to the duty of instructing others in the ways of holiness (xxxii., xxxiv., li.). They indirectly enforce the duty of love, even to our enemies (vii. 4, xxxv. 13, cix. 4). On the other hand, they imprecate, in the strongest terms, the judgments of God on transgressors.<sup>2</sup>

<sup>2</sup> We may condemn the Imprecatory Psalms, because—(a.) We overlook the benevolent temper which characterized the writers of the O. T., and was eminently conspicuous in David, the author of the sternest songs (Lev. xix. 17, 18; Deut. xlii. 6, 7; 1 Sam. xxiv. 2 ff.; 2 Sam. i. 19-27, xvi. 10 ff.; Prov. xxiv. 17, 18, 29, &c.). (b.) We fail to recognize the sentiments of justice breathed forth by the N. T. writers, and particularly by Christ Himself (Mat. xi. 20 ff., xlii. 13 ff.; Mk. iii. 5; Acts viii. 20; 1 Cor. xvi. 22; Gal. i. 8, 9, v. 12; 2 Tim. iv. 14; Heb. x. 26-31, xii. 25, 29; Rev. vi. 10, &c.). (c.) We are inclined to overlook the peculiar genius of their authors—to interpret an ancient and an Oriental poet as we would interpret a modern and Occidental essayist (compare Is. lxli. 5, &c.). (d.) We regard them as teaching some proposition which we infer from them, and to exalt the incidental fact which we think to be involved in them above the grand aim which they obviously propose for themselves. Thus the psalmist's *entreaties* in Ps. xxviii. 4 may have reference only to the temporal discomfiture of men who were nuisances to society, though his *words* may seem to fly beyond this mark. (e.) We overlook their inspiration. When it is revealed to men that a particular sinner has been abandoned by Jehovah, they have a right to adopt such a mode of speech with regard to the reprobated one, as we have no right to originate in reference to a sinner whom we may simply conjecture to have been thus abandoned. We may not devise for ourselves a peculiarity of style, which may yet be fitly prescribed by heavenly wisdom for other penmen. (f.) We imagine all of them must be explained on one and the same principle. Different songs and different parts of the same song may be justifiable on different grounds; and a statement proving some one verse of a Psalm to be correct may be inapplicable to some other. Thus some threatenings may have been uttered with a tacit condition, "if he turn not" (compare Ps. vii. 9, 11, 12); the imprecations on the Jews must be explained differently from those on the Gentiles, for whom the general atonement had not been distinctly made known, &c.—The Imprecatory Psalms illustrate—(1.) The fact that there are times when a man, as a single individual, and for his own personal advantage, should not resist his enemies, and still may resist them as he is identified with the public and in union with God (lix. 2, 4, 13, 15, lxxxiii. 2-5, 12-18, cxxxix. 21, 22, &c.). (2.) The principle that

This brings us to notice, lastly, the faith of the psalmists in a righteous recompense to all men according to their deeds (xxxvii., &c.).—5. *Prophetical Character of the Psalms.* The moral struggle between godliness and ungodliness, so vividly depicted in the Psalms, culminates, in Holy Scripture, in the life of the Incarnate Son of God upon earth. The Psalms themselves definitely anticipated this culmination. At least three psalms may be termed directly and exclusively Messianic (ii., xlv., cx., perhaps lxxii.). It would be strange if these few psalms stood, in their prophetical significance, absolutely alone among the rest: the more so, as Ps. ii. forms part of the preface to the First Book of the Psalter, and would, as such, be entirely out of place, did not its general theme virtually extend itself over those which follow, in which the interest generally centres in the figure of the suppliant or worshipper himself. And hence the impossibility of viewing the psalms generally, notwithstanding the historical drapery in which they are outwardly clothed, as simply the past devotions of the historical David or the historical Israel. All the psalms of a personal rather than of a national character are marked in the superscriptions with the name of David, as proceeding either from David himself or from one of his descendants. It results from this, that while the Davidic psalms are partly personal, partly national, the Levitic psalms are uniformly national. It thus follows that only those psalmists who were types of Christ by external office and lineage as well as by inward piety were charged by the Holy Spirit to set forth beforehand, in Christ's own name and person, the sufferings that awaited Him and the glory that should follow. The national hymns of Israel are indeed also prospective; but in general they anticipate rather the struggles and the triumphs of the Christian Church than those of Christ Himself. (MESSIAH; OLD TESTAMENT, B; PROPHET.) Passages from the Psalms are quoted or embodied in the N. T. more than seventy times. OLD TESTAMENT, C.

\* *Psalter* [sawl-] (fr. Gr.) = the Book of Psalms.

private individuals, as such, ought not to satisfy their retributive sentiments by inflicting evil on transgressors; but ought to invoke the administrator of law to do what the general good requires, in satisfying this sentiment (v. 10, lxxvi. 8, 9; compare Rom. xii. 1 ff., &c.). (3.) The duty of acquiescing in the evils inflicted upon a fellow-being, when these are the *minor* evils, preventing the occurrence of the *larger* (Ps. cix. 4 ff.). (4.) The principle that while we may grieve over an event, viewed in one aspect, that of involving certain calamities, we may rejoice in the same event, viewed in a different aspect, that of involving transcendent blessings. The success of the upright is the defeat of the wicked (Ex. x. 1; Ps. vii. 15, 16, xxxv. 8, lii. 6, lviii. 11, cxxxvii. 7-9; compare Mat. xxv. 31-41; Rev. xviii. 20-24, &c.). (5.) The principle that we may pray for a complex event when the blessings involved in it are vividly seen to be far greater than the evils incidental to it; when the evils are vividly seen to be such as cannot be avoided, even if we do entreat God to avert them; and when the blessings are vividly seen to be such as may be gained, in fuller measure, if we pray for them than if we refuse to pray. We do not pray for the evils unavoidably incident to the blessings, but for the blessings only, and for them as clearly overbalancing the unavoidable evils (Ps. xxxv. 5-10, cxlxi. 12, &c.). (6.) The principle that in particular emergencies we may give an unqualified statement of one truth, provided that in other emergencies we give an unqualified statement of the antithetic truth. The Imprecatory Psalms are shining delineations of the justice that punishes the heathen, but do not sketch, with equal brilliancy, the grace that offers an atonement to Gentiles as well as Jews. Yet they have their proper place in the Bible and in God's system as truly as the calm sentiments of the Redeemer. Justice as well as mercy is involved in a complete love. (Abridged from Prof. E. A. Park's article in *B. S.* xix. 165 ff.)

(See above.)—*Psalter of Solomon*; see SOLOMON, VII.

**Psal'ter-y** (fr. Gr., see below). The psaltery was a stringed instrument of music to accompany the voice. The Heb. *nebel*, or *nebel*, is uniformly so rendered in the A. V., except in Is. v. 12, xiv. 11, xxii. 24 margin, and Am. v. 23, vi. 5, where it is translated *viol*. The ancient viol was a six-stringed guitar. In the Prayer Book version of the Psalms, the Hebrew word is rendered "lute." This instrument resembled the guitar, but was superior in tone, being larger, and having a convex back, somewhat like the vertical section of a gourd, or more nearly resembling that of a pear. These three instruments, the psaltery or sautry, the viol, and the lute, are frequently associated in the old English poets, and were clearly instruments resembling each other, though still different. The Gr. *psallérion*, from which our word is derived, denotes a stringed instrument played with the fingers instead of a plectrum or quill. The LXX. renders the Heb. *nebel* or *nebel* by the Gr. *psallérion* in Neh. xii. 27, &c.; *organon* (= instrument; ORGAN) in Am. v. 23, vi. 5; and *nabla* in 1 Sam. x. 5, &c. Josephus appears to have regarded the Gr. *nabla* = Heb. *nebel*. He tells us that the difference between the *kinura* (Heb. *cinór*, A. V. "harp") and the *nabla* was, that the former had ten strings and was played with the plectrum, the latter had twelve notes and was played with the hand. We have strong presumptive evidence that *nabla* = *nebel*; and that the *nabla* = *psallérion* appears from the Glossary of Philoxenus. Of the psaltery among the Greeks one kind had only two or three strings, the other as many as twenty, but sometimes only five. Both Isidorus and Cassiodorus describe the psaltery as triangular in shape, like the Greek delta ( $\Delta$ ), with the sounding-board above the strings, which were struck downward. The *nebel* or Hebrew "psaltery" was probably of various kinds, as Kimchi says in his note on Is. xxii. 24, differing from each other both with regard to the position of the pegs and the number of the strings. The *nebel 'asór* (A. V. "psaltery and an instrument of ten strings," Ps. xxxiii. 2, xcii. 3 [Heb. 4], cxliv. 9) appears to have been an instrument of the psaltery kind which had ten strings, and was of a trapezium shape, according to some accounts. (MUSICAL INSTRUMENTS, 3.) The "psaltery" is associated with religious services (1 Sam. x. 5; 2 Sam. vi. 5; 1 Chr. xiii. 8, xv. 16, 20, 28; 2 Chr. v. 12, xx. 28, xxix. 25; Neh. xii. 27; Ps. xxxiii. 2, lxxi. 22, &c.), but it had its part also in private festivities, and was associated with banquets and luxurious indulgence (Is. v. 12, xiv. 11, xxii. 24; Am. vi. 5). The psalteries of David were made of cypress (2 Sam. vi. 5), those of Solomon of alghum or almug trees (1 K. x. 12; 2 Chr. ix. 11). Among the instruments of the band which played before Nebuchadnezzar's golden image on the plains of Dura, we again meet with the "psaltery" (Dan. iii. 5, 10, 15), Chal. *pēsantérin*, apparently merely a modification of the Gr. *psallérion*.

\* **Ptol'e-mæ'us** [tol'e-mæ'us] (L.). PTOLEMY and PROLEMEUS; PROLEMY.

\* **Ptol'e-mæ'is** [tol'e-mæ'is] (Gr., named fr. PTOLEMY) = ACCRO.

**Ptol'e-mæe**, and **Ptol'e-me'us** [tol-] (L. *Ptolemæus* = PROLEMY). 1. "The son of Dorymenes" (1 Mc. iii. 38; 2 Mc. iv. 45); a courtier who possessed great influence with Antiochus Epiphanes. He was induced by a bribe to support the cause of Mene-laüs (iv. 45-50), and was afterward active in forcing

the Jews to apostatize (vi. 8). He took part in the great expedition which Lysias organized against Judas (1 Mc. iii. 38).—2. Son of Agasarchus, a Megalopolitan; surnamed Macron, governor of Cyprus during the minority of Ptolemy Philometor. He afterward deserted the Egyptian service to join Antiochus Epiphanes. He stood high in the favor of Antiochus, and received from him the government of Phenicia and Celosyria (2 Mc. viii. 8, x. 11, 12). On the accession of Antiochus Eupator, his conciliatory policy toward the Jews brought him into suspicion at court. He was deprived of his government, and in consequence of this disgrace poisoned himself about B. C. 164 (x. 13).—3. Son of Abubus; a man of great wealth, who married the daughter of Simon the Maccabee (MACCABEES), and being invested with the government of the district of Jericho, formed the design of usurping the sovereignty of Judea. With this view he treacherously murdered Simon and two of his sons (1 Mc. xvi. 11-16); but John Hyrcanus received timely intimation of his design, and escaped. Hyrcanus afterward besieged him in his stronghold of Docus, but in consequence of the occurrence of the Sabbatical year, he was enabled to make his escape to Zeno Cotylas, prince of Philadelphia.—4. A citizen of Jerusalem, father of LYSIMACHUS I, the Greek translator of ESTHER (Esth. xi. 1).—5. PTOLEMY VI. PHILOMETOR (l. c. [so Mr. Westcott]; 1 Mc. i. 18, x. 51 ff., xi. 1 ff.; 2 Mc. i. 10, iv. 21).—6. Son of DOSITHEUS (Esth. xi. 1). PTOLEMY.

**Ptol'e-my** [tol-] (L. *Ptolemæus*, fr. Gr. *Ptolemaios* = *variike*), the dynastic name of the Greek kings of EGYPT, the successors of ALEXANDER THE GREAT; in A. V. "PTOLEMEE" and "PTOLEMEUS" (see ALEXANDRIA; DISPERSION, JEWS OF THE; HELLENIST; PHILOSOPHY).—1. **Ptol'e-my I. Soter** (Gr. *Saviour*), known as the son of Lagus, a Macedonian of low rank, was generally supposed to have been an illegitimate son of PHILIP I. He distinguished himself greatly during the campaigns of Alexander; at whose death, foreseeing the necessary subdivision of the empire, he secured for himself the government of Egypt, where he proceeded at once to lay the foundations of a kingdom (B. C. 323). He abdicated in favor of his youngest son Ptolemy II. Philadelphus, two years before his death, which took place in B. C. 283. Ptolemy Soter is described very briefly in Dan. xi. 5 ("the king of the south") as one of those who should receive part of the empire of Alexander when it was "divided toward the four winds of heaven." In one of his expeditions into Syria, probably B. C. 320, Ptolemy treacherously occupied Jerusalem on the Sabbath. He carried many Jews and Samaritans captive to Alexandria, but gave them full citizenship there. Afterward many Jews voluntarily emigrated to Egypt.—2. **Ptol'e-my II. Phil-a-del-phus** (L. fr. Gr. = *fond of his brother*), youngest son of Ptolemy I., was made king two years before his death, to confirm the irregular succession. The conflict between Egypt and Syria was renewed during his reign in consequence of the intrigue of his half-brother Magas. "But in the end of years they [the kings of Syria and Egypt] joined themselves together [in friendship]. For the king's daughter of the south [Berenice, the daughter of Ptolemy Philadelphus] came [as bride] to the king of the north [Antiochus II.], to make an agreement" (so Mr. Westcott, using for history the language of Dan. xi. 6). The unhappy issue of this marriage is noticed under ANTIOCHUS II. The liberal encouragement which Ptolemy be-

stowed on literature and science gave birth to a new school of writers and thinkers. (ALEXANDRIA; PHILOSOPHY; SEPTUAGINT.) It was impossible that the Jew, who was now become as true a citizen of the world as the Greek, should remain passive in the conflict of opinions. From this time the Jew was familiarized with the great types of Western literature, and in some degree aimed at imitating them. An elder Philo celebrated Jerusalem in a long hexameter poem. Another epic poem, "on the Jews," was written by Theodotus. The work of ARISTOBULUS I on the interpretation of the Law was a still more important result of the combination of the old faith with Greek culture, as forming the groundwork of later allegories. A second time and in a new fashion Egypt disciplined a people of God. It first impressed upon a nation the firm unity of a family, and then in due time reconnected a matured people with the world from which it had been called out.—3. **Ptol'e-my III. Eu-er'-ge-tes** [*je-teez*] (Gr. *benefactor*), the eldest son of Ptolemy Philadelphus and brother of Berenice the wife of ANTIOCHUS II. The repudiation and murder of his sister furnished him with an occasion for invading Syria (about B. C. 246). He "*stood up, a branch out of her stock* [sprung from the same parents] *in his [father's] estate; and set himself at [the head of] his army, and came against the fortresses of the king of the north* [Antiochus], *and dealt against them and prevailed*" (so Mr. Westcott, as above; Dan. xi. 7). He extended his conquests as far as Antioch, and then eastward to Babylon, but was recalled to Egypt by tidings of seditions there. His success was brilliant and complete. "*He carried captive into Egypt the gods* [of the conquered nations] *with their molten images, and with their precious vessels of silver and gold*" (xi. 8). This capture of sacred trophies, which included the recovery of images taken from Egypt by Cambyzes, earned for the king the name **Euergetes**—recorded in the inscriptions which he set up at Adule in memory of his achievements. After his return to Egypt (about B. C. 243) he suffered a great part of the conquered provinces to fall again under the power of Seleucus. But the attempts which Seleucus made to attack Egypt terminated disastrously to himself. He first collected a fleet which was almost totally destroyed by a storm; and then, as if by some judicial infatuation, "*he came against the realm of the king of the south, and [being defeated] returned to his own land* [to Antioch]" (xi. 9). After this, Ptolemy "*desisted some years from [attacking] the king of the north*" (xi. 8). The remainder of his reign seems to have been spent chiefly in developing the resources of the empire. His policy toward the Jews was like that of his predecessors.—4. **Ptol'e-my IV. Phi-lop'a-tor** (Gr. *loving his father*, spoken ironically). After the death of Ptolemy Euergetes the line of the Ptolemies rapidly degenerated. Ptolemy Philopator, his eldest son, who succeeded him, was to the last degree sensual, effeminate, and debased. But externally his kingdom retained its power and splendor; and when circumstances forced him to action, Ptolemy himself showed ability not unworthy of his race. The description of the campaign of Raphia (B. C. 217) in Daniel gives a vivid description of his character (so Mr. Westcott, as above). "*The sons of Seleucus* [Seleucus Ceraunus and ANTIOCHUS THE GREAT] *were stirred up, and assembled a multitude of great forces; and one of them* [Antiochus] *came and overflew and passed through* [even to Pelusium]; *and he returned* [from Seleucia, to which he had re-

tired during a faithless truce]; *and they* [Antiochus and Ptolemy] *were stirred up* [in war] *even to his* [Antiochus] *fortress. And the king of the south* [Ptolemy Philopator] *was moved with choler, and came forth and fought with him* [at Raphia]; *and he set forth a great multitude; and the multitude was given into his hand* [to lead to battle]; *and the multitude raised itself* [proudly for the conflict], *and his heart was lifted up, and he cast down ten thousands* (comp. Polybius, v. 86), *but he was not vigorous*" [to reap the fruits of his victory] (Dan. xi. 10-12; compare Polybius, v. 62, 66, 86, and 3 Mc. i. 1-5). After this decisive success, Ptolemy Philopator visited the neighboring cities of Syria, and among others, Jerusalem. After offering sacrifices of thanksgiving in the Temple, he attempted to enter the sanctuary. A sudden paralysis hindered his design; but when he returned to Alexandria he determined to inflict on the Alexandrine Jews the vengeance for his disappointment. (MACCABEES, BOOKS OF, III.) He died B. C. 205, and was succeeded by his only child, Ptolemy V. Epiphanes, then only four or five years old.—5. **Ptol'e-my V. E-piph'a-n'es** [*e-pif'a-nez*] (Gr. = *illustrious*). His reign was a critical epoch in the history of the Jews. The rivalry between the Syrian and Egyptian parties, which had for some time divided the people, came to an open rupture in the struggles which marked his minority. (ANTIOCHUS THE GREAT; ONIAS 5.) In the strong language of Daniel, "*The robbers of the people exalted themselves to establish the vision*" (so Mr. Westcott, as above; Dan. xi. 14). The accession of Ptolemy and the confusion of a disputed regency furnished an opportunity for foreign invasion. "*Many stood up against the king of the south*" under Antiochus the Great and Philip III. of Macedonia, who formed a league to dismember his kingdom. "*So the king of the north* [Antiochus] *came, and cast up a mound, and took the most fenced city* [Sidon], *and the arms of the south did not withstand*" [at Paneas, B. C. 198] (xi. 14, 15). The Romans interfered, and in order to retain the provinces of Celsyria, Phenicia, and Judea, Antiochus "*gave him* [Ptolemy, his daughter Cleopatra] *a young maiden*" [as his betrothed wife] (xi. 17). But in the end his policy only partially succeeded. After the marriage of Ptolemy and Cleopatra (B. C. 193), Cleopatra did "*not stand on his side*," but supported her husband in maintaining the alliance with Rome. The disputed provinces, however, remained in the possession of Antiochus; and Ptolemy was poisoned when preparing an expedition to recover them from SELEUCUS, the successor of Antiochus, B. C. 181.—6. **Ptol'e-my VI. Philo-me'tor** (Gr. *fond of his mother*). On the death of Ptolemy Epiphanes, his wife Cleopatra held the regency for her young son, Ptolemy Philometor, and preserved peace with Syria till she died, B. C. 173. The government then fell into unworthy hands, and an attempt was made to recover Syria (compare 2 Mc. iv. 21). ANTIOCHUS EPIPHANES seems to have made the claim a pretext for invading Egypt. Ptolemy's generals were defeated near Pelusium, probably at the close of B. C. 171 (1 Mc. i. 16 ff.); and the next year Antiochus, having secured the young king's person, reduced almost the whole of Egypt (compare 2 Mc. v. 1). Meanwhile Ptolemy Euergetes II., also called Physcon, younger brother of Ptolemy Philometor, assumed the supreme power at Alexandria; and Antiochus, under the pretext of recovering the crown for Philometor, besieged Alexandria B. C. 169. But his selfish designs were apparent; the brothers were reconciled, and Antiochus was

obliged to acquiesce for the time in the arrangement which they made. But he prepared for another invasion of Egypt, and was already approaching Alexandria, when he was met by the Roman embassy led by Caius Popilius Lænas, who, in the name of the Roman senate, insisted on his immediate retreat (B. C. 168), a command which the late victory at Pydna made it impossible to disobey. These campaigns, which are intimately connected with the visits of Antiochus to Jerusalem B. C. 170 and 168, are briefly described in Dan. xi. 25-30. After the discomfiture of Antiochus, Philometor was for some time occupied in resisting the ambitious designs of his brother, who made two attempts to add Cyprus to the kingdom of Cyrene, which was allotted to him. Having effectually put down these attempts, he turned his attention again to Syria. During the brief reign of ANTIOCHUS EUPATOR he seems to have supported PHILIP 3 against the regent LYSIAS (compare 2 Mc. ix. 29). After the murder of Eupator by DEMETRIUS I., Philometor espoused the cause of ALEXANDER BALAS, the rival claimant to the throne, because Demetrius had made an attempt on Cyprus; and when Alexander had defeated and slain his rival, he accepted the overtures which he made, and gave him his daughter Cleopatra in marriage (B. C. 150: 1 Mc. x. 51-58). But, according to 1 Mc. xi. 1, 10, &c., the alliance was not made in good faith, but only to secure possession of Syria. According to others, Alexander himself made a treacherous attempt on the life of Ptolemy (compare 1 Mc. xi. 10), which caused him to transfer his support to DEMETRIUS II., to whom also he gave his daughter, whom he had taken from Alexander. The whole of Syria was quickly subdued, and he was crowned at Antioch king of Egypt and Asia (xi. 13). Alexander made an effort to recover his crown, but was defeated by the forces of Ptolemy and Demetrius, and

shortly afterward put to death in Arabia. But Ptolemy did not long enjoy his success. He fell from his horse in the battle, and died within a few days (xi. 18), B. C. 145. Ptolemy Philometor is the last king of Egypt noticed in the Apocrypha, and his reign was marked also by the erection of the temple at Leontopolis. The consecration of a new centre of worship placed a religious as well as a political barrier between the Alexandrine and Palestinian Jews. (ALEXANDRIA; ONIAS 5.) Henceforth the nation was again divided. The date of the building of this temple at Leontopolis may perhaps be placed after the conclusion of the last war with Ptolemy Physcon (about B. C. 154). In Palestine the erection of this second temple was not condemned so strongly as might have been expected. The circumstances under which it was erected were evidently accepted as in some degree an excuse for the irregular worship. The Jewish colony in Egypt, of which Leontopolis was the immediate religious centre, was formed of various elements and at different times. The settlements under the Greek sovereigns, though the most important, were by no means the first. In the later times of the kingdom of Judah many "trusted in Egypt," and took refuge there (Jer. xliii. 6, 7). This colony, formed against the command of God, was devoted to complete destruction (xlv. 27), but probably the Persians, acting on the same policy as the Ptolemies, encouraged the settlements of Jews in Egypt to keep in check the native population.—The following table by Mr. Westcott gives the descent of the royal line of the Ptolemies as far as it is connected with Biblical history. The sign (=) in this table denotes marriage of those between whom it stands, and in several cases marks this connection between brother and sister. The numerals (1, 2, 3, &c.) point out those belonging to the family by birth.

### GENEALOGICAL TABLE OF THE PTOLEMIES.

#### 1. PTOLEMY I. SOTER (son of LAGUS) (about B. C. 323-285).

Arsinoë (daughter of Lysimachus) — 2. P. II. PHILADELPHUS (B. C. 285-247) — (second wife) 3. Arsinoë.

4. P. III. EUERGETES (B. C. 247-223).

5. Berenice — Antiochus II.

6. P. IV. PHILOPATOR (B. C. 223-205) — 7. Arsinoë

8. P. V. EPIPHANES (B. C. 205-181) — Cleopatra (daughter of Antiochus III.).

9. P. VI. PHILOMETOR  
(B. C. 181-146).  
— Cleopatra (11).

10. P. VII. EUERGETES II. (Physcon)  
(B. C. 171-146-117)

— 11. CLEOPATRA [compare No. 9].  
— (second wife) Cleopatra (14).

12. Cleopatra  
— Alexander Balas.  
— Demetrius II.

13. P. Eupator

14. Cleopatra

15. P. VIII. SOTER II.  
(B. C. 118-81).

**Pu'a** (fr. Heb.) = PHUYAH or PUAH 2, the son of Issachar (Num. xxvi. 23); ancestor of the PUNITES.

**Pu'ah** (Heb. *mouth*? Ges.; see No. 3 below). 1. Father of Tola, a man of Issachar, and JUDGE of Israel after Abimelech (Judg. x. 1).—2. Son of Issachar (1 Chr. vii. 1); = PHUYAH and PUA.—3. (Heb. *mouth*, or (so Sim.) *splendid*, Ges.). One of the two midwives whom Pharaoh commanded to kill the Hebrew male children after their birth (Ex. i. 15). The A. V. calls them "Hebrew midwives;" but the original may be translated "the midwives

of the Hebrew women." The two, Shiphrah and Puah, are supposed to have been the chief and representatives of their profession. Mr. Wright (with Josephus, Henry Ayre, &c.) supposes them Egyptians; Bush, Scott, Dr. W. L. Alexander (in Kitto), &c., regard them, with the A. V., as Hebrews; and a Jewish tradition makes Shiphrah = JOCHEBED, and Puah = MIRIAM.

\* **Pu-bas'tum** (fr. Egyptian) = PI-BESETH (Ez. xxx. 17 margin).

**Pub'il-can** (fr. L. *publicanus*; Gr. *telônês*; see be-

low). The class thus designated in the Synoptic Gospels were employed as collectors of the Roman revenue. The Roman senate found it convenient, at a period as early as, if not earlier than, the second Punic war, to farm the direct **TAXES** (*L. vectigalia*) and the customs or imposts (*L. portoria*) to capitalists who undertook to pay a given sum into the treasury (*L. in publicum*), and so received the name of *publicani* = *publicans*. Contracts of this kind fell naturally into the hands of the knights (*L. equites*), as the richest class of Romans. Not unfrequently they went beyond the means of any individual capitalist, and a joint-stock company was formed, with one of the partners, or an agent appointed by them, acting as managing director (*L. magister* = *master*). Under this officer, who resided commonly at Rome, transacting the business of the company, paying profits to the partners and the like, were the *sub-magistri* (*L. = sub-masters, or deputies*) living in the provinces. Under them, in like manner, were the *collectors* (*L. portitores*), the actual custom-house officers, who examined each bale of goods exported or imported, assessed its value more or less arbitrarily, wrote out the ticket, and enforced payment. The latter were commonly natives of the province in which they were stationed, as being brought daily into contact with all classes of the population. The Gr. *telónai*, pl. *telónai*, which etymologically might = the *publicani* or *publicans* properly so called, popularly, and in the N. T. exclusively, = the *portitores* or *collectors*. The *publicani* were thus an important section of the knights or equestrian order. The system was, however, essentially vicious. The *publicani* were banded together to support each other's interest, and at once resented and defied all interference. They demanded severe laws, and put every such law into execution. They encouraged their agents, the *collectors* or *portitores* (the "publicans" of the A. V.), in the most vexatious or fraudulent exactions, and a remedy was all but impossible. The popular feeling ran strong even against the equestrian capitalists. The underlings overcharged whenever they had an opportunity (*Lk. iii. 13*). They brought false charges of smuggling in the hope of extorting hush-money (*xix. 8*). They detained and opened letters on mere suspicion. It was the basest of all livelihoods. All this was enough to bring the class into ill-favor everywhere. In Judea and Galilee there were special circumstances of aggravation. The employment brought out all the besetting vices of the Jewish character. The strong feeling of many Jews as to the absolute unlawfulness of paying tribute at all made matters worse. The scribes who discussed the question (*Mat. xxii. 15*), for the most part answered it in the negative. (**JUDAS OF GALILEE**.) In addition to their other faults, accordingly, the "Publicans" of the N. T. were regarded as traitors and apostates, defiled by their frequent intercourse with the heathen, willing tools of the oppressor. They were classed with sinners (*ix. 11, xi. 19*), with harlots (*xxi. 31, 32*), with the heathen (*xviii. 17*). The Talmud enumerates three classes (murderers, thieves, publicans), with whom promises need not be kept. No money known to come from them was received into the alms-box of the synagogue or the Corban of the Temple. They were not fit to sit in judgment or give testimony. The class thus practically excommunicated furnished some of the earliest disciples both of John the Baptist and of our Lord. The publican who cried "God be merciful to me a sinner" (*Lk. xviii. 13*), may be taken as

the representative of those who had come under John's influence (*Mat. xxi. 32; Lk. iii. 12, 13*). (**MATTHEW**.) The position of **ZACCHÆUS** as a "chief among the publicans" (*xix. 2*), implies a gradation of some kind among the persons thus employed. Possibly the balsam-trade, of which Jericho was the centre, may have brought larger profits, possibly he was one of the deputies or *sub-magistri* in immediate communication with the Bureau at Rome.

**PUBLIUS** (*L. of the people, public, popular*, Schl., Pott), "the chief man"—probably the governor—of **MELITA**, who received and lodged St. Paul and his companions on their being shipwrecked off that island, and whose father was miraculously cured of a fever by the apostle (*Acts xxviii. 7, 8*). Publius possessed property in Melita: the title given him is "the first of the island:" and two inscriptions have been found at Cetta Vecchia, in which that apparently official title occurs. Publius may have been the delegate of the Roman pretor of Sicily to whose jurisdiction Melita or Malta belonged. Traditions make him first bishop of Melita, afterward bishop of Athens and a martyr.

**PUDENS** (*L. shamed, bashful*), a Christian friend of Timothy at Rome (*2 Tim. iv. 21*). Papebroch, the Bollandist editor, while printing the legendary histories, distinguishes between two saints of this name, both Roman senators; one St. Peter's host and St. Paul's friend, martyred under Nero; the other, the grandson of the former, living about A. D. 150. Earlier writers are disposed to believe in the existence of one Pudens only. Martial, the Spanish poet, who went to Rome A. D. 66, or earlier, in his twenty-third year, and dwelt there for nearly forty years, mentions two contemporaries, Pudens (an immortal Umbrian, who went, as a military officer, to the remote N.) and Claudia (beautiful and witty, of British birth, and mother of a flourishing family), as husband and wife (*Epig. iv. 13*). Modern researches among the Columbaria at Rome, appropriated to members of the imperial household, have brought to light an inscription in which Pudens appears as a servant of Tiberius or Claudius. Although the identity of St. Paul's Pudens with any legendary or heathen namesake is not absolutely proved, yet it is difficult to believe that these facts add nothing to our knowledge of the friend of Paul and Timothy (so Mr. Bullock).

**PUTHITES** (fr. Heb. sing. *Púthi*, taken collectively = descendant of *Puthijah* [which means *Jah is revelation*], Fñ.), the, according to 1 Chr. ii. 53, belonged to the families of Kirjath-jearim.

**PUL** (Heb., see below), a country or nation once mentioned, if the Masoretic text be here correct, in the Bible (*Is. lxvi. 19*). The name = that of Pul, king of Assyria. It is spoken of with distant nations: "The nations [to] Tarshish, Pul, and Lud, that draw the bow, [to] Tubal, and Javan, [to] the isles afar off." If a Mizraite LUD be intended, Pul may be African. It has accordingly been compared by Bochart and J. D. Michaelis with the island *Phile* (which in Egyptian = border, far country, Ges.). The common LXX. reading suggests that the Hebrew had originally **PHUT** (Put) in this place.

**PUL** (Heb. fr. Assyrian = elephant? or better, lord, king, Ges.), an Assyrian king, the first of those monarchs mentioned in Scripture. He made an expedition against **MENAEH**, king of Israel, about A. C. 770. Menahem appears to have inherited a kingdom already included among the dependencies of Assyria. Under the Assyrian system the monarchs of tributary kingdoms, on ascending the throne, ap-

plied for "confirmation in their kingdoms" to the Lord Paramount, and only became established on receiving it. We may gather from 2 K. xv. 19, 20, that Menahem neglected to make any such application to Pul—a neglect which would have been regarded as a plain act of rebellion. Possibly, he was guilty of more overt and flagrant hostility. "Menahem smote TIPSAH" (2 K. xv. 16). Pul marched an army into Palestine to punish his revolt, when Menahem made his submission, and paid 1,000 talents of gold to Pul, who then confirmed him as king. The Assyrian monuments (so Rawlinson, original author of this article) have a king, whose name is read very doubtfully as *Vul-lush* or *Iva-lush*, at about the period when Pul must have reigned. His probable date is B. C. 800–750, while Pul, as we have seen, ruled over Assyria in B. C. 770. The Hebrew name Pul is undoubtedly curtailed; for no Assyrian name consists of a single element. If we take the "Phalos" or "Phaloch" of the LXX. as probably nearer the original, we have a form not very different from *Vul-lush* or *Iva-lush*. *Vul-lush* reigned at Calah (*Nimrud*) from about B. C. 800 to 750. He states that he made an expedition into Syria, wherein he took Damascus; and that he received tribute from the Medes, Armenians, Phenicians, Samaritans, Damascenes, Philistines, and Edomites. He also tells us that he invaded Babylonia and received the submission of the Chaldeans. His wife bears the name of Semiramis. He was probably the last Assyrian monarch of his race. The list of Assyrian monumental kings, traceable without a break and in a direct line to him from his seventh ancestor, here comes to a stand. ASSYRIA; NINEVEH.

\* **Pul'pit**, the A. V. translation of the Heb. *migdāl* in Neh. viii. 4 only, usually translated "tower" (Gen. xi. 4, 5, &c.). Gesenius and Fürst make the Hebrew in Neh. viii. 4 = *an elevated stage, pulpit* (comp. ix. 4).

**Pulse** occurs in the A. V. only in Dan. i. 12, 16, as the translation of the Hebrew plural nouns *zér'ôim* and *zér'ônim*, which literally = *seeds* of any kind. "Pulse" now = the grains of leguminous vegetables (peas, beans, &c.) (A. V., 2 Sam. xvii. 28); but in Dan. i. probably = uncooked grain of any kind, whether barley, wheat, millet, vetches, &c. Food.

**Pun'ish-ments.** The earliest theory of punishment current among mankind is doubtless the one of simple retaliation, "blood for blood." (BLOOD, AVENGER OF.) Viewed historically, the first case of punishment for crime mentioned in Scripture, next to the Fall itself (ADAM), is that of CAIN the first murderer. That DEATH was regarded as the fitting punishment for murder appears plain from the remark of LAMECH 1 (Gen. iv. 24). In the post-diluvian code, if we may so call it, retribution by the hand of man, even in the case of an offending animal, for blood shed, is clearly laid down (ix. 5, 6). Passing onward to Mosaic times, we find the sentence of capital punishment, in the case of MURDER, plainly laid down in the Law. (LAW OF MOSES.) The murderer was to be put to death, even if he should have taken refuge at God's altar or in a CITY OF REFUGE, and the same principle was to be carried out even in the case of an animal (Ex. xxi. 12, 14, 28, 36; Lev. xxiv. 17, 21; Num. xxxv. 31; Deut. xix. 11, 12; 1 K. ii. 28, 34). I. The following offences also are mentioned in the Law as liable to the punishment of death:—1. Striking, or even reviling, or persistently disobeying, a parent (Ex. xxi. 15, 17; Deut. xxi. 18, 19; CHILD). 2. BLASPHEMY (Lev.

xxiv. 14, 16, 23). 3. Sabbath-breaking (Num. xv. 32–36; Ex. xxxi. 14, xxxv. 2; SABBATH). 4. Witchcraft, and false pretension to prophecy (Ex. xxii. 18; Lev. xx. 27; Deut. xiii. 5, xviii. 20; DIVINATION; MAGIC). 5. ADULTERY (Lev. xx. 10; Deut. xxii. 22). 6. Unchastity (xxii. 21, 23; Lev. xxi. 9; HARLOT). 7. Rape (Deut. xxii. 25). 8. Incestuous and unnatural connections (Lev. xx. 11, 14, 16; Ex. xxii. 19; SODOMITES). 9. Man-stealing (xxi. 16; Deut. xxiv. 7; MEN-STEALERS). 10. IDOLATRY, actual or virtual, in any shape (Lev. xx. 2; Deut. xiii. 6, 10, 15, xvii. 2–7; see Josh. vii., xxii. 20, and Num. xxv. 8). 11. False witness in certain cases (Deut. xix. 16, 19).—II. But many offences, some of them included in this list, are named in the Law as involving the penalty of "cutting off from the people." On the meaning of this expression some controversy has arisen. This formula is used in the Pentateuch in thirty-six or thirty-seven cases, which may be thus classified: 1. Breach of Morals. 2. Breach of Covenant. 3. Breach of Ritual. 1. Wilful sin in general (Num. xv. 30, 31). † 15 cases of incestuous or unclean connection (Lev. xviii. 29, xx. 9–21). 2. †† Uncircumcision (Gen. xvii. 14; Ex. iv. 24). Neglect of Passover (Num. ix. 13). † Sabbath-breaking (Ex. xxxi. 14). Neglect of Atonement-day (Lev. xxiii. 29). † Work done on that day (30; ATONEMENT, DAY OF). †† Children offered to MOLECH (xx. 3). †† Witchcraft (6). Anointing a stranger with holy oil (Ex. xxx. 33; OINTMENT). 3. Eating leavened bread during PASSOVER (xii. 15, 19). Eating FAT of sacrifices (Lev. vii. 25). Eating BLOOD (27, xvii. 14). † Eating sacrifice in an unclean condition (vii. 20, 21, xxii. 8, 4, 9). Offering too late (xix. 8). Making holy ointment for private use (Ex. xxx. 32, 33). Making holy perfume for private use (38; INCENSE). Neglect of PURIFICATION in general (Num. xix. 13, 20). Not bringing offering after slaying a beast for food (Lev. xvii. 9). Not slaying the animal at the tabernacle-door (4). †† Touching holy things illegally (Num. iv. 15, 18, 20: see 2 Sam. vi. 7; 2 Chr. xxvi. 21). (SACRIFICE; TABERNACLE.) In the foregoing list, classified according to the view supposed to be taken by the Law of the principle of condemnation, the cases marked with † are (a) those which are expressly threatened or actually visited with death, as well as with cutting off. In those (b) marked †† the hand of God is expressly named as the instrument of execution. The question is, whether the phrase "cut off" be likely to mean death in all cases, and to avoid that conclusion Le Clerc, Michaelis, &c., have suggested that in some of them, the ceremonial ones, it was intended to be commuted for banishment or privation of civil rights. Rabbinical writers explained "cutting off" = EXCOMMUNICATION, and laid down three degrees of severity as belonging to it. But most commentators agree, that, in accordance with the obvious meaning of Heb. x. 28, the "cutting off" must = death-punishment of some sort. In two instances violations of a ritual command took place without the actual infliction of a death-punishment (1 Sam. xiv. 32; 2 Chr. xxvi. 19, 21 [here leprosy, a virtual death]); in other instances the offenders were punished with death for similar offences (Lev. x. 1, 2; Num. xvi. 10, 33; 2 Sam. vi. 7). We may perhaps conclude (so Mr. Phillott) that the primary meaning of "cutting off" is a sentence of death to be executed in some cases without remission, but in others voidable: (1.) by immediate atonement on the offender's part; (2.) by direct interposition of the Almighty, i. e. a sentence of death always

"recorded," but not always executed.—III. Punishments in themselves are twofold, Capital and Secondary. 1. Of the former kind, the four following only are prescribed by the Law: (a.) *Stoning*, which was the ordinary mode of execution (Ex. xvii. 4; Lk. xx. 6; Jn. x. 31; Acts xiv. 5). In the case of idolatry, and probably in other cases also, the witnesses, of whom there were to be at least two, were required to cast the first stone (Deut. xiii. 9, xvii. 7; Jn. viii. 7; Acts vii. 58). The Rabbinical writers add, that the first stone was cast by one of them on the chest of the convict, and if this failed to cause death, the bystanders proceeded to complete the sentence. (b.) *Hanging* is mentioned as a distinct punishment (Num. xxv. 4; 2 Sam. xxi. 6, 9); but generally, in the case of Jews, follows death by some other means. (c.) *Burning*, in pre-Mosaic times, was the punishment for unchastity (Gen. xxxviii. 24). Under the Law it is ordered in the case of incest with a mother-in-law, and of unchastity of a priest's daughter (Lev. xx. 14, xxi. 9); but it is also mentioned as following death by other means (Josh. vii. 25), and some have thought it was never used except after death. Among other nations burning appears to have been not unusual, and in a modified form was not unknown in war among the Jews (2 Sam. xii. 31; Jer. xxix. 22; Dan. iii. 20, 21). A tower of burning embers is mentioned in 2 Mc. xiii. 4-8. (d.) *Death by the sword or spear* is named in the Law (Ex. xix. 13, xxxii. 27; Num. xxv. 7), and occurs frequently in regal and post-Babylonian times (1 K. ii. 25, 34, xix. 1; 2 Chr. xxi. 4, &c.). (e.) *Strangling* is said by the Rabbins to have been regarded as the most common but least severe of the capital punishments, and to have been performed by immersing the convict in clay or mud, and then strangling him by a cloth twisted round the neck.—Besides these ordinary capital punishments, we read of others, either of foreign introduction or of an irregular kind. (f.) *CRUCIFIXION*. (g.) *Drowning*, though not ordered under the Law, was practised at Rome, and is said by Jerome to have been in use among the Jews. (h.) *Sawing amider* (ISAIAH) or crushing beneath iron instruments (2 Sam. xii. 31, and perhaps Prov. xx. 26; Heb. xi. 37). (i.) *Pounding in a mortar, or beating to death*, is alluded to in Prov. xxvii. 22, but not as a legal punishment, and cases are described (2 Mc. vi. 28, 30). (j.) *Precipitation*, attempted in the case of our Lord at Nazareth (Lk. iv. 29), and carried out in that of captives from the Edomites (2 Chr. xxv. 12), and of St. JAMES, who is said to have been cast from "the pinnacle" of the Temple (see also 2 Mc. vi. 10).—Criminals executed by law were buried outside the city-gates, and heaps of stones were flung upon their graves (Josh. vii. 25, 26; 2 Sam. xviii. 17; Jer. xxii. 19).—2. *Of secondary punishments* among the Jews the original principles were, (a.) *retaliation*, "eye for eye," &c. (Ex. xxi. 24, 25). (b.) *Compensation*, identical (restitution), or analogous; payment for loss of time or of power (Ex. xxi. 18-36; Lev. xxiv. 18-21; Deut. xix. 21), double payment for *trespass*, and double to fivefold for *theft*, the thief sometimes to be sold, &c. (Ex. xxii. 1 ff.; DEPOSIT; ROBBERY; SLAVE). *Slander* against a wife's honor was to be compensated to her parents by a fine of 100 shekels, and the traducer himself to be punished with stripes (Deut. xxii. 18, 19). (c.) *Stripes*, not to exceed forty (Deut. xxv. 3); whence the Jews took care not to exceed thirty-nine (2 Cor. xi. 24). (d.) *Scourging* with thorns is mentioned Judg. viii. 16. The stocks are mentioned (Jer. xx. 2); *passing through fire* (2

Sam. xii. 31); *mutilation* (Judg. i. 6; 2 Mc. vii. 4; 2 Sam. iv. 12); *plucking out hair* (Is. i. 6); in later times, *imprisonment* and *confiscation* or *exile* (Ezr. vii. 26; Jer. xxxvii. 15, xxxviii. 6; Acts iv. 3, v. 18, xii. 4; CAPTIVITY; PRISON). As in earlier times imprisonment formed no part of the Jewish system, the sentences were executed at once (Esth. viii. 8-11). The command for witnesses to cast the first stone shows that the duty of execution did not belong to any special OFFICER. (JUDGE; TRIAL).—Of punishments inflicted by other nations we have the following notices:—In Egypt the power of life and death and imprisonment rested with the king, and to some extent also with officers of high rank (Gen. xl. 3, 22, xlii. 20). Death might be commuted for slavery (xlii. 19, xlii. 9, 33). In Egypt, and also in Babylon, the chief of the executioners, A. V. "CAPTAIN of the GUARD," was a great officer of state (Gen. xxxvii. 36; Dan. ii. 14, &c.). Putting out the eyes of captives, and other cruelties, as flaying alive, burning, tearing out the tongue, &c., were practised by Assyrian and Babylonian conquerors (1 Sam. xi. 2; 2 K. xxv. 7; Jer. xxix. 22; Dan. iii. 6, &c.; BLINDNESS; FURNACE; HOOK 3; WAR). The execution of HAMAN and the story of DANIEL are pictures of summary Oriental procedure. With the Romans, stripes and the stocks were in use, and imprisonment, with a chain attached to a soldier. There was also the *free custody* or confinement in private houses (Acts xvi. 23, xxii. 24, xxviii. 16). *Exposure to wild beasts* appears to be mentioned by St. Paul (1 Cor. xv. 32; 2 Tim. iv. 17), but not with any precision.—In regard to Divine punishment, see DAMNATION; DEATH; ETERNAL; GOD; HELL; JEHOVAH; JUSTIFY; PSALMS, BOOK OF, n. 2; SIN, &c.

**Pu'rites** (fr. Heb.), the = the descendants of PUA, or PHUVAH, the son of Issachar (Num. xxvi. 23).

**Pu'nion** (Heb. *darkness*, Ges.), a halting-place of the Israelite host in the last portion of the Wandering (Num. xxxiii. 42, 43). By Eusebius and Jerome it is identified with Pinon, the seat of the Edomite tribe of PINON, and with Pheno, which contained the copper-mines, so notorious at that period, and was situated between Petra and Zoar; but its site is unknown. MINES; WILDERNESS OF THE WANDERING.

\* **Pur** (Heb. fr. Pers. = a lot, A. V., Ges.) (Esth. iii. 7, ix. 24). PURIM.

**Pu-ri-fi-ca-tion** (fr. L. = a making clean), in its legal and technical sense, is applied to the ritual observances whereby an Israelite was formally absolved from the taint of UNCLEANNESS, whether evidenced by any overt act or state, or connected with man's natural depravity. (BAPTISM; LEVITE; PRIEST; PROSELYTE; SACRIFICE.) The present article (abridged from Mr. Bevan's) relates to the former class, in which alone were the ritual observances of a special character. The essence of purification, indeed, in all cases, consisted in the use of water, whether by way of ablution or aspersion; but in the greater offences of legal uncleanness, sacrifices of various kinds were added, and the ceremonies throughout bore an expiatory character. Simple ablution of the person was required after sexual intercourse (Lev. xv. 18; 2 Sam. xi. 4); ablution of the clothes, after touching the carcass of an unclean beast, or eating or carrying the carcass of a clean beast that had died a natural death (Lev. xi. 25, 40; CLEAN; UNCLEAN MEATS); ablution both of the person and of the defiled garments in cases of emission of seed (xv. 16, 17)—the ceremony in each of the above instances to take place on the day on which the uncleanness was contracted. A higher degree

of uncleanness from "a running issue" in males, and menstruation in women, required ablution of the person and garments after seven days, and an offering of two turtle-doves or young pigeons on the eighth (1-15, 19-30). Contact with persons in the above states, or even with clothing or furniture that had been used by them while in those states, involved uncleanness in a minor degree, requiring ablution generally the same day, in one case after seven days (5-11, 21-24). The purification after childbirth was at the end of forty days for a son and eighty for a daughter, the sacrifice being a lamb of the first year with a pigeon or turtle-dove, or for the poor two turtle-doves or young pigeons (xii. 4 ff.; Lk. ii. 22-24). The uncleannesses already specified were comparatively of a mild character: the more severe were connected with death, which, viewed as the penalty of sin, was in the highest degree contaminating. To this head we refer the two cases of (1.) touching a corpse, or a grave (Num. xix. 16), or even killing a man in war (xxxi. 19); and (2.) LEPROSY, regarded by the Hebrews as a living death. In the first of these two cases, the "water of separation," prepared by mixing "running water" with the ashes of an unblemished red heifer which had been slain by the high-priest's eldest son and wholly burnt in his sight, with cedar-wood and hyssop and scarlet, outside the camp (OLIVES, MOUNT OF), was sprinkled on the third and seventh days upon the unclean person (Num. xix.; Heb. ix. 13). The purification of the leper was a yet more formal proceeding, and indicated the highest pitch of uncleanness. One of two clean birds was killed by the priest's order over a vessel of "running (i. e. living or spring) water," into which the blood fell; the other bird, with cedar-wood and hyssop and scarlet, was dipped by the priest into the mixed blood and water, and, after the leper to be cleansed had been sprinkled seven times with the same liquid, was let loose; and the leper washed himself and his clothes, and shaved his head. Then, having passed seven days away from his tent, he repeated the washing, shaved all his hair, and brought to the tabernacle his prescribed offerings of two he-lambs, a yearling ewe-lamb (or, if poor, one lamb and two turtle-doves or young pigeons), fine flour mingled with oil, and a log of oil (Lev. xiv. 4-32; Mat. vii. 4; Lk. xvii. 14). The two stages of the proceedings indicated, the first, which took place outside the camp, the readmission of the leper to the community of men; the second, before the sanctuary, his readmission to communion with God. In the first stage, the slaughter of the one bird and the dismissal of the other, symbolized the punishment of death deserved and fully remitted. In the second, the use of oil and its application to the same parts of the body as in the consecration of priests (Lev. viii. 23, 24), symbolized the rededication of the leper to the service of Jehovah. The ceremonies in the purification of a house or a garment infected with leprosy, were identical with the first stage of those for the leper (xiv. 33-53). The necessity of purification was extended in the post-Babylonian periods to a variety of unauthorized cases. Cups and pots, brazen vessels and couches, were washed as a matter of ritual observance (Mk. vii. 4). The WASHING OF THE HANDS before meals was conducted in a formal manner (vii. 3). These ablutions required a large supply of water (Jn. ii. 6). We know not the specific causes of uncleanness in those who came up to purify themselves before the Passover (Jn. xi. 55), or in those who had taken upon themselves the Nazirite's vow (Acts xxi.

24, 26); in either case it may have been contact with a corpse, though in the latter more probably a general purification preparatory to the accomplishment of the vow.—The distinctive feature in the Mosaic rites of purification is their expiatory character. The idea of uncleanness was not peculiar to the Jew. But with all other nations simple ablution sufficed: no sacrifices were demanded. The Jew alone was taught by the use of expiatory offerings to discern to its full extent the connection between the outward sign and the inward fount of impurity.

**Pu'rim** (Heb. pl. fr. Pers. = *lots*, Ges.), the annual festival instituted to commemorate the preservation of the Jews in Persia from the massacre with which they were threatened through the machinations of HAMAN (Esth. ix.). (ESTHER; MORDECAI.) Haman appears to have been very superstitious, and much given to casting lots (iii. 7). The Jews gave the name Purim, or Lots, to the commemorative festival, because he had thrown lots to ascertain what day would be auspicious for him to carry into effect the bloody decree which the king had issued at his instance (ix. 24). The festival lasted two days, and was regularly observed on the 14th and 15th of Adar; but if the 14th happened to fall on the Sabbath, or on the second or fourth day of the week, the commencement of the festival was deferred till the next day. The traditions of the Jews, and their modern usage respecting it, are curious. A preliminary fast was appointed, called "the fast of Esther," to be observed on the 13th of Adar, in memory of the fast which Esther and her maids observed (iv. 16). If the 13th was a Sabbath, the fast was put back to the fifth day of the week. According to modern custom, as soon as the stars begin to appear, when the 14th of the month has commenced, candles are lighted up in token of rejoicing, and the people assemble in the synagogue. After a short prayer and thanksgiving, the reading of the Book of Esther commences. The book is written in a peculiar manner, on a roll called "the Roll" (*Hob. Megillah*) (BIBLE, III. 3, 6.). The reader reads in a histrionic manner, suiting his tones and gestures to the changes in the subject matter. When he comes to the name of Haman the whole congregation cry out, "May his name be blotted out," or "Let the name of the ungodly perish." The names of the sons of Haman (ix. 7-9) are read as one word to signify that they were hanged all at once. When the roll is read through, the whole congregation exclaim, "Cursed be Haman; blessed be Mordecai; cursed be Zeresh (the wife of Haman); blessed be Esther; cursed be all idolaters; blessed be all Israelites, and blessed be Harbonah who hanged Haman." The volume is then solemnly rolled up. In the morning service in the synagogue, on the 14th, after the prayers, the passage is read from the Law (Ex. xvii. 8-16) which relates the destruction of the Amalekites, the people of Agag (1 Sam. xv. 8), the supposed ancestor of Haman (Esth. iii. 1). The roll is then read again in the same manner. The 14th of Adar, as the very day of the deliverance of the Jews, is more solemnly kept than the 13th; but when the service in the synagogue is over all give themselves up to merrymaking. On the 15th the rejoicing is continued. Offerings for the poor are also made by all who can afford to do so. When the month Adar used to be doubled, in the Jewish leap-year, the festival was repeated on the 14th and 15th of the second Adar. It was suggested first by Kepler that the "feast of the Jews" of Jn. v. 1, was the feast of Purim (and so Petavius, Olshausen, Stier,

Wieseler, Winer, Anger, &c.). It seems to be generally allowed that the opinion of most of the Fathers (and of Calvin, Beza, &c.) that the feast was Pentecost, and that of Cocceius that it was Tabernacles, are precluded by the general course of the narrative, and especially by Jn. iv. 35, compared with v. 1. The interval indicated by a comparison of these texts could scarcely have extended beyond Nisan. The choice is thus left between Purim and the Passover. The principal objections to Purim are (a) that it was not necessary to go up to Jerusalem to keep the festival; (b) that it is not very likely that our Lord would have made a point of paying especial honor to a festival which appears to have had but a very small religious element in it, and seems rather to have been the means of keeping alive a feeling of national revenge and hatred. That the Passover = the feast in Jn. v. 1 has been maintained by Irenæus, Eusebius, Theodoret, Luther, Grotius, Hengstenberg, Neander, Tholuck, Robinson, and the majority of commentators. The only real objection to the Passover seems to be that Jn. v. 1 says "a (not the) feast of the Jews." But this difficulty, though not small, does not seem sufficient to outweigh the grave objections against the feast of Purim. JESUS CHRIST, p. 468.

\* **Purple.** COLORS, II. 1; DRESS, II.

**Purse.** The Hebrews, when on a journey, were provided with a BAG in which they carried their money (Gen. xlii. 35; Prov. i. 14, vii. 20; Is. xlv. 6; Lk. x. 4, xii. 33, xxii. 35, 36; Jn. xii. 6, xiii. 29), and, if they were merchants, also their weights (Deut. xxv. 13; Mic. vi. 11). The GIRDLE also served as a purse (Mat. x. 9; Mk. vi. 8).

**Put** (Heb.) = PHUT (1 Chr. i. 8; Jer. xlv. 9 margin; Nah. iii. 9).

**Put-e-o-li** (L. plural = *little wells*, or *stinking* sc. springs; see below), the great landing-place of travellers to Italy from the Levant, and the harbor to which the Alexandrian corn-ships brought their cargoes. Here St. PAUL tarried seven days with Christian brethren, when on his way to Rome (Acts xxvii. 13). Puteoli was at that period a place of very great importance, at the N. E. angle of the celebrated bay, now "the bay of Naples," and in early times "the bay of Cumæ," but then called "the bay of Puteoli." Close to it was Baia, one of the most fashionable of the Roman watering-places. The earlier name of Puteoli, when the lower part of Italy was Greek, was Dicæarchia. The word Puteoli was a true Roman name, and arose from the strong mineral (sulphurous) springs which are characteristic of the place. Cicero had a villa in the neighborhood, Vespasian gave the city peculiar privileges, and here Hadrian was buried. In the fifth century Puteoli was ravaged both by Alaric and Genseric, and never afterward recovered its former eminence. It is now a fourth-rate Italian town, *Pozzuoli*. A cross-road from Puteoli joined the Appian Way at Capua. (APPII FORUM; THREE TAV- ERNS.) Among the remains of Puteoli are the aqueduct, the reservoirs, the great amphitheatre, the building called the Temple of Serapis, and sixteen piers of the ancient mole, which is formed of the concrete called *Pozzolana*.

**Puti-el** (Heb. *afflicted of God*, Ges.). One of the daughters of Putiel was wife of Eleazar the son of Aaron, and mother of Phinehas (Ex. vi. 25).

**Pygarg** (fr. Gr. *pygargos*; L. *pygargus*) occurs only (Deut. xiv. 5) in the list of clean animals as the rendering (after the LXX., Vulgate, &c.) of the Heb. *dishôn*, the name apparently of some species of an-

telope. The Greek *pygargos* denotes an animal with a "white rump," and is used by Herodotus as the name of some Libyan deer or antelope. It is usual to identify the *pygarg* of the Greek and Latin writers with the *addax* of North Africa, Nubia, &c. (*Addax nasomaculatus*); but Mr. Houghton is inclined to consider the *pygarg* as a generic name to denote any of the white-rumped antelopes of North Africa, Syria, &c.

\* **Pythion** (L. fr. Gr.), in mythology, the name of a serpent slain by Apollo, who was hence called the Pythian Apollo or Pythion; in Acts xvi. 16 margin, a *soothsayer* or *ventriloquist* supposed to be inspired by the Pythian Apollo (Rbn. N. T. Lxx., L. & S.). DIVINATION 5; MAGIC.

## Q

**Quails**, the translation by the A. V., the most important old versions, and most modern authorities, of the Heb. *selâv* or *selâyv*, used collectively (Ex. xvi. 13; Num. xi. 32; Ps. cv. 40), once *salvin* in plural (Num. xi. 31), which twice miraculously satisfied the appetites of the Israelites in the WILDERNESS OF THE WANDERING. Rudbeck endeavored to show that *selâv* = *locusts*; Hermann von der Hardt made them = *locust birds* (*Pastor roseus*); Mr. Forster advocated *red geese* (*Casarea rutila*); Rudbeck favored *flying-fish*, of the genus *Exocoetus*; Ehrenberg other *flying-fish*, which he named *Trigla* (*Dactylopterus*) *Israelitarum*, &c. Some writers, while they hold that the original word denotes "quails," are of opinion that a species of Sand-grouse (*Pterocles Alchata*), frequent in the Bible lands, is also included under the term. It is clear, however (so Mr. Houghton), that the *selâv* of the Pentateuch and Ps. cv. denotes the common European "quail" (*Coturnix dactylisonans*), and no other bird. The Hebrew word *selâr* undoubtedly = the Arabic *salad*, a "quail." The expression "as it were two cubits (high) upon the face of the earth" (Num. xi. 31) is explained by the LXX., Vulgate, and Josephus, to refer to the height at which the quails flew above the ground, in their exhausted condition from their long flight. As to the enormous quantities which the least successful Israelite is said to have taken, viz. "ten homers,"

European Quail (*Coturnix dactylisonans*).—(Fhn.)

in the space of a night and two days, there is every reason for believing that the "homers" here spoken of do not denote strictly the measure of that name, but simply a "heap:" this is the explanation given

by Onkelos and the Arabic versions of Saadias and Epepius, in Num. xi. 81. Quails migrate in immense numbers. The Israelites would have little difficulty in capturing large quantities of these birds, as they arrive at places sometimes so completely exhausted by their flight as to be readily taken, not in nets only, but by the hand. They "spread the quails round about the camp," to dry them. The Egyptians similarly prepared these birds. The expression "quails from the sea" (xi. 31) must not be restricted to denote that the birds came from the sea as their starting-point, but must be taken to show the direction from which they were coming. The quails were, at the time of the event narrated in the sacred writings, on their spring journey of migration northward. "It was at even" that they began to arrive; and they no doubt continued to come all the night. Many observers have recorded that the quail migrates by night. The European quail (*Coturnix coturnix*), the only species of the genus known to migrate, has a very wide geographical range on the Eastern Continent. The common quail of the United States (*Ortyx virginianus*) is of a different, though allied, genus. PARTRIDGE.

\* **Quar'ries** (Judg. iii. 19, 26). IDOL 20.

\* **Quar'tus** (L. fourth), a Christian of Corinth (Rom. xvi. 23). There is the usual tradition that he was one of the seventy disciples; and it is also said that he ultimately became bishop of Berytus (*Beirut*).

**Qua-ter-ni-on** (fr. L. = a four), a military term, signifying a guard of four soldiers, two of whom were attached to the person of a prisoner, while the other two kept watch outside the door of his cell (Acts xii. 4).

**Queen** (Heb. *mal'akh, sh'gál, gēbirāh*; Gr. *basilissa*). Of the three Hebrew terms cited as = "queen" in the A. V., the first alone is applied to a queen-regnant (1 K. x. 1 ff.; 2 Chr. ix. 1 ff.); the first (Esth. i. 9 ff., vii. 1 ff., &c.; Cant. vi. 8, 9) and second (Neh. ii. 6; Ps. xlv. 9) equally to a queen-consort, without, however, implying the dignity which in European nations attaches to that position; and the third (1 K. x. 13; 2 Chr. xv. 16; also [so Mr. Bevan, &c.; see below] 2 K. x. 13; and Jer. xiii. 18, xxix. 2) to the queen-mother, to whom that dignity is transferred in Oriental courts. The etymological force of the Hebrew words accords with their application. *Mal'akh* is the feminine of *melekh*, "king." *Sh'gál* simply means "wife" (Dan. v. 2, 3). *Gēbirāh*, on the other hand, is expressive of authority; = *powerful* or *mistress*. It would therefore be applied to the female who exercised the highest authority; and this, in an Oriental household, is not the wife but the mother of the master. Strange as such an arrangement at first sight appears, it is one of the inevitable results of polygamy (so Mr. Bevan). The title "queen" (Heb. *gēbirāh*, see above) in 1 K. xi. 19 is referred to the queen-consort by Gesenius, Fürst, Keil, and Kitto; but Henderson refers it to the queen-mother, and Mr. Bevan (after the LXX.) would read here "elder" instead of "queen;" in 2 K. x. 13 also to the queen-consort by Gesenius, &c., but to the queen-mother by Keil and Henderson; in Jer. xiii. 18 and xxix. 2 (compare 2 K. xxiv. 12, 15) also to the queen-mother by Henderson and Mr. Bevan (as above). ATHALIAH; BATH-SHEBA; JEZEBEL; MAACHAH 3; NEHUSHTA; QUEEN OF HEAVEN.

**Queen of Heav'en.** In Jer. vii. 18, xlv. 17, 18, 19, 25, the Heb. *mēlekheth hashshamayim* is thus rendered in the A. V., margin "frame or workmanship of heaven." Kimchi says "'workmanship of

heaven,' i. e. the stars; and some interpret 'the queen of heaven,' i. e. a great star which is in the heavens." Rashi favors the latter; and the Targum renders throughout "the star of heaven." Kircher favors some constellation, the Pleiades or Hyades. It is generally believed that the "queen of heaven" is the moon, worshipped as ASHTORETH or Astarte, to whom the Hebrew women offered cakes in the streets of Jerusalem. The Babylonian Venus was also styled "the queen of heaven." Mr. Layard identifies Hera, "the second deity mentioned by Diodorus, with Astarte, Mylitta, or Venus," and with the "queen of heaven," frequently mentioned in the sacred volumes. . . . The planet which bore her name was sacred to her, and in the Assyrian sculptures a star is placed upon her head. She was called Beltis, because she was the female form of the great divinity, or BAAL." With the cakes (*cav-vānim*) which were offered in her honor, with incense and libations, Selden compares the "bran" (Bar. vi. 43) burnt by the women who sat by the wayside near the idolatrous temples for prostitution. Rashi says the cakes had the image of the god stamped on them, and Theodoret that they contained pine-cones and raisins.

\* **Quick** in A. V. = *alive, living*. It stands for—1. Heb. *hay* or *chay* = *alive, living*, Ges. (Num. xvi. 30; Ps. lv. 15 [Heb. 16], cxiv. 3), also translated "alive" (Num. xvi. 33, &c.), "living" (Gen. viii. 1, 17, 21, &c.), &c.—2. Heb. *mihyāh* or *michyāh*, a noun kindred to No. 1, = *the quick*, &c. (Lev. xiii. 10, 24), translated "reviving" (Ezr. ix. 8, 9), &c.—3. Gr. participle *zōn*, from *zōō, zō, to live*, used mostly in the phrase "the quick and dead" (Acts x. 42; 2 Tim. iv. 1; 1 Pet. iv. 5), once applied to the word of God as living or active, enduring, sure (Heb. iv. 12), often translated "living" (Mat. xvi. 16, xxii. 32, &c.) or "alive" (Acts i. 3, ix. 41, &c.), &c.—In Is. xi. 3 the Heb. *hārīkhō* or *hārīchō* (from *rūach* or *rūach, to breathe*), in A. V. "he shall make him of quick understanding," margin "scent or smell," is translated "his delight shall be" by Gesenius, with whom J. A. Alexander, Barnes, &c., substantially agree.

\* **Quick'en, to**, in A. V. = *to make alive*. It represents—1. Heb. *hiyāh* or *chīyāh* (from *hāyāh* or *chāyāh, to live*) fourteen times in the Psalms (Ps. lxxi. 20, lxxx. 18 [Heb. 19], cxix. 25, 37, 40, 50, 88, 93, 107, 149, 154, 156, 159, cxliii. 11); elsewhere translated "to keep alive" (Gen. vii. 3, &c.), "save alive" (Ex. i. 17, 18, 22, &c.), "make alive" (Deut. xxxii. 39; 1 Sam. ii. 6), "revive" (Hab. iii. 2, &c.), &c.—2. Gr. *zōopoioō* (Jn. v. 21 twice; Rom. iv. 17, viii. 11; 1 Cor. xv. 36; 1 Tim. vi. 13; 1 Pet. iii. 18), also translated "to make alive" (1 Cor. xv. 22); translated "to quicken," i. e. to give spiritual or eternal LIFE to (Jn. vi. 63; 1 Cor. xv. 45), and in the same sense "to give life" (2 Cor. iii. 6; Gal. iii. 21). LIFE; QUICK; REGENERATION.

**Quick'sands** (Gr. *Surtis*; L. *Syrtsis*, fr. Ar. *sirt* = *desert*, Howson), the, more properly "the Syrts" (Acts xxvii. 17), the broad and deep bight on the North African coast between Carthage and Cyrene. This region was an object of peculiar dread to the ancient navigators of the Mediterranean, partly because of the drifting sands and the heat along the shore itself, but chiefly on account of the shallows and the uncertain currents of water in the bay. There were properly two Syrtes: the eastern or larger, now called the *Gulf of Sidra* (referred to in Acts i. c.); and the western or smaller, now the *Gulf of Cubes*. PAUL.

**Quin'tus Mem'mi-us** (L.) (2 Mc. xi. 34). See **MEMMIUS**, **QUINTUS**, and **MANLIUS**, **TITUS**.

**Quiver** = a case or sheath for holding arrows (**ARMS**, I. 3); the A. V. translation of—1. Heb. *qili*, from a root which signifies to *hang* (Gen. xxvii. 3 only). The Hebrew may denote either a quiver (so LXX., Vulgate, Gesenius, &c.) or a suspended weapon—for instance, such a sword as in our own language was formerly called a “hanger” (Onkelos, Pesbitho, Arabic).—2. Heb. *ashpáh* (Job xxxix. 23; Ps. cxxvii. 5; Is. xxii. 6, xlix. 2; Jer. v. 16; Lam. iii. 13). The root of this word is uncertain. It is connected with arrows only in Lam. iii. 13. The LXX. usually translate it “quiver,” but “bow” in Job xxxix. 23, and “desire” in Ps. cxxvii. 5. As to the thing itself, there is nothing in the Bible to indicate either its form or material, or in what way it was carried. See cuts under **ARMS** and **CHARIOT**.

## R

**Ra'a-mah** (Heb. *a trembling*, Ges.), a son of **CUSH**, and father of the Cushite **SHEBA** and **DEBAN**. The tribe of Raamah became renowned as traders (Ez. xxvii. 22) and probably settled on the shores of the Persian Gulf. The name Raamah seems to be recovered in Regma, a city on the Arabian shore of the Persian Gulf mentioned by Ptolemy.

**Ra-a-mi'ah** (Heb. = **REELAIAH**, Ges.), one of the chiefs who returned with Zerubbabel (Neh. vii. 7); = **REELAIAH** in Ezr. ii. 2.

**Ra-am'ses** [-sees] (Heb.) = **RAMESSES** (Ex. i. 10).

**Rab'bah** (Heb. *a great city, metropolis*, Ges.), the name of several ancient places both E. and W. of the Jordan. 1. A very strong place E. of the Jordan, which when its name is first introduced in the sacred records was the chief city of the Ammonites. (**AMMON**.) In five passages (Deut. iii. 11; 2 Sam. xii. 26, xvii. 27; Jer. xlix. 2; Ez. xxi. 20) it is styled “Rabbath (or ‘Rabbah’) of the Ammonites,” or “of the children of Ammon;” but elsewhere (Josh. xiii. 25; 2 Sam. xi. 1, xii. 27, 29; 1 Chr. xxi. 1; Jer. xlix. 3; Ez. xxv. 5; Am. i. 14) simply “Rabbah.” When first named it is in the hands of the Ammonites, and is mentioned as containing the bed or sarcophagus of the giant Og (Deut. ii. 11). It was not included in the territory of the tribes E. of Jordan; the border of Gad stops at “Arzer, which faces Rabbah” (Josh. xiii. 25). David's first Ammonite campaign appears to have occurred early in his reign. A part of the army, under Abishai, was sent as far as Rabbah to keep the Ammonites in check (2 Sam. x. 10, 14), but the main force under Joab remained at Medeba (1 Chr. xix. 7). After the defeat of the Syrians at Helam, the Ammonite war was resumed, and this time Rabbah was made the main point of attack (2 Sam. xi. 1). Joab took the command, and was followed by the whole of the army. The siege must have lasted nearly, if not quite, two years. (**BATH-SHEBA**; **DAVID**; **URIAH**.) The sallies of the Ammonites appear to have formed a main feature of the siege (xi. 17, &c.) At the end of that time Joab succeeded in capturing a portion of the place—the “city of waters,” i. e. the lower town, so called from its containing the perennial stream which rises in and still flows through it. But the citadel, which rises abruptly on the north side of the lower town, a place of very great strength, still remained to be taken; and Joab insists on reserving for his king the honor of this capture. The waters of the lower city once in the

hands of the besiegers, the fate of the citadel was certain. The provisions also were at last exhausted, and shortly after David's arrival the fortress was taken, and its inmates, with a very great booty, and the idol of **MOLECH**, fell into his hands. We are not told whether the city was demolished, or whether David was satisfied with the slaughter of its inmates. In the time of Amos, two centuries and a half later, it had again a “wall” and “palaces,” and was still the sanctuary of Molech—“the king” (Am. i. 14). So it was also at the invasion of Nebuchadnezzar (Jer. xlix. 2, 3), when its dependent towns are mentioned, and when it is named in such terms as imply that it was of equal importance with Jerusalem (Ez. xxi. 20). At Rabbah, no doubt **BAALIS**, king of the children of Ammon (Jer. xl. 14), held such court as he could muster; and within its walls was plotted the attack of **ISHMAEL** 6, which cost Gedaliah his life, and drove Jeremiah into Egypt. In the period between the O. and N. T., Rabbah appears to have been a place of much importance, and the scene of many contests. It lay on the road between Heshbon and Bostra (**BOZRAH** 2?), and was the last place at which a stock of water could be obtained for the journey across the desert, while as it stood on the confines of the richer and more civilized country, it formed an important garrison-station for repelling the incursions of the wild tribes of the desert. From Ptolemy Philadelphus (b. c. 285–247) it received the name of Philadelphia. B. c. 218, it was taken from Ptolemy Philopator by Antiochus the Great, after a long and obstinate resistance. Its ancient name, though under a cloud, was still used: it is mentioned by Polybius under the hardly altered form of Rabbatāmana. It was taken from the Arabs by Herod the Great, b. c. 30. At the Christian era Philadelphia formed the eastern limit of the region of Perea. It was one of the cities of the Decapolis, and as far down as the fourth century was esteemed one of the most remarkable and strongest cities of Coele-syria (**CELOSRYIA**). Its magnificent theatre (said to be the largest in Syria), temples, and other public buildings, were probably erected in the second and third centuries. Philadelphia became the seat of a Christian bishop, and was one of the nineteen sees of “Palestina tertia,” which were subordinate to Bostra. The church still remains “in excellent preservation,” with its lofty steeple. The site, now ‘*Ammān*, is about twenty-two miles from the Jordan, about fourteen from Heshbon, and twelve from *es-Salt* (Ramoth-gilead?). It lies in a valley which is a branch, or perhaps the main course, of the *Wady Zerka*, usually identified with the Jabbok. The *Moiet-Ammān*, or water of ‘*Ammān*, a mere streamlet, rises within the basin which contains the ruins of the town. When the Moslems conquered Syria they found the city in ruins; and in ruins remarkable for their extent and desolation even for Syria, the “land of ruins,” it still remains. The public buildings are said to be Roman, in general character like those at *Jerrash* (Gerasa), except the citadel, which is described as of large square stones put together without cement, and is probably more ancient than the rest. The remains of private houses scattered on both sides of the stream are very extensive.—2. Although there is no trace of the fact in the Bible, there can be little doubt that the name of Rabbah was also attached in Biblical times to the chief city of Moab. Its Biblical name is **AR**, but in the fourth century A. C. it possessed the special title of Rabbath Moab. This name was for a time displaced by Arcopolis.

'Amman (ancient "Rabbah of the Children of Ammon"), from the east; showing the perennial stream and part of the citadel-hill.—From a sketch by Wm. Tipping, Esq.

*Rabba* lies on the highlands at the southeast quarter of the Dead Sea, between *Kerak* and *Jibei Shihdn*.—3. A city of Judah, named with *Kirjath-jearim* in Josh. xv. 60 only. No trace of its existence has yet been discovered.—4. In one passage (Josh. xi. 8) *Zidon* is mentioned with the affix *Rabbah*—*Zidon-rabbah*. This is preserved in the margin of the A. V., though in the text it is translated "great *Zidon*."

**Rab'bath** (Heb. construct of **RABBAH**) of the Children of Ammon, and **Rab'bath of the Ammonites** = **RABBAH** 1 (Deut. iii. 11; Ez. xxi. 20).

**Rab'bi** (Heb. *my master*, Rbn. *N. T. Lex.*; see below), a title of respect given by the Jews to their doctors and teachers, and often addressed to our Lord (Mat. xxiii. 7, 8; xxvii. 25, 49; Mk. ix. 5, xi. 21, xiv. 45; Jn. i. 38, 49 [Gr. 39, 50], iii. 2, 26, iv. 31, vi. 25, ix. 2, xi. 8; A. V. "master" in Mat. xxvi., Mk., and Jn. iv., ix., xi.). The title is interpreted in express words by St. John, and by implication in St. Matthew, to mean *Master, Teacher* (Jn. i. 39, compare xi. 28, xiii. 13; Mat. xxiii. 8). The same interpretation is given by St. John of the kindred title **RABBONI** (Jn. xx. 16), which in Mk. x. 51 is translated in A. V. "Lord." The *i* which is added to the Heb. and Chal. *rab* (= *great, a great one*, i. e. teacher, master, doctor) or *rabbon* or *rabbān* (= *our teacher, our master*) has been thought to be the pronominal affix = *My*; but it is to be noted that St. John does not translate either of these by "*My Master*," but simply "*Master*," so that the *i* would seem to have lost any special significance as a possessive pronoun intimating appropriation or

endearment, and, like the "*my*" in English or French titles of respect (e. g. "*My lord*," *Monsieur*, *Monsieur*), to be merely part of the formal address. The title *Rabbi* is not known to have been used before the reign of Herod the Great, and is thought to have taken its rise about the time of the disputes between the rival schools of Hillel and Shammai. *Rabbi* was considered a higher title than *Rab*, and *Rabban* higher than *Rabbi*. EDUCATION; SCRIBES.

**Rab'bith** (Heb. *multitude*, Ges.), a town in the territory, perhaps on the boundary, of Issachar (Josh. xix. 20 only).

**Rab-bo'ni** (Heb. *my great master*, Rbn. *N. T. Lex.*) (Jn. xx. 16). **RABBI**.

**Rab'-mag** (Heb. fr. Pers. = *chief magus*, i. e. chief of the **MAGI**, Ges.; *chief priest*? Sir H. Rawlinson) is found only in Jer. xxxix. 3, 13. In both places it is a title borne by NERGAL-SHAREZER, probably = the king called by the Greeks Nergissar. This king, and certain other important personages, bear the title in the Babylonian inscriptions (so Rawlinson). It is written indeed with a somewhat different vocalization, being read as *Rabu-Emga* by Sir H. Rawlinson.

**Rab'sa-ces** [-seez] (L.) = **RABSHAKEH** (Ecclus. xlviii. 18).

**Rab'-sa-ris**, or **Rab-sa'ris** (Heb., see below). 1. An officer of the king of Assyria sent up with **TARTAN** and **RABSHAKEH** against Jerusalem in the time of Hezekiah (2 K. xviii. 17).—2. One of the princes of Nebuchadnezzar, who was present at the capture of Jerusalem, B. C. 588 (Jer. xxxix. 3, 13).—**Rab-saris** is probably (so Mr. Eddrup, with Henderson, Keil, &c.) rather the name of an office than of an individual, the word signifying *chief eunuch*; in Dan. i. 3, *Ashpenaz* is called the master of the eunuchs (Heb. *Rab-sar'im*). Not improbably we have in Jer. xxxix. not only the title of the *Rab-saris* given, but his name also, either **SARSECHIM** (ver. 3) or (ver. 13) **NEBU-SHASBAN**.

**Rab'sha-keh**, or **Rab-sha'keh** (Heb. *chief cup-*

<sup>1</sup> Rev. Albert Barnes and others have regarded Mat. xxiii. 8—"Be not ye called *Rabbi*"—as forbidding in its spirit the reception of the title D. D., the modern equivalent of *Rabbi*; but P. Schaaf, D. D. (in *Lange on Mat.* l. c.) maintains that "the Saviour prohibits not so much the titles themselves (of D. D., Rev., Mr. and Mrs., &c.), as the spirit of pride and ambition which covets and abuses them, the *haughty* spirit which would domineer over inferiors and also the *servile* spirit which would basely cringe to superiors" (compare ver. 6, 10-12; 1 Cor. iv. 15; 1 Tim. i. 2; Tit. i. 4; 1 Pet. v. 13).

*bearer*, Ges.), one of the officers of the king of Assyria sent against Jerusalem in the reign of HEZEKIAH. SENNACHERIB, having taken other cities of Judah, was now besieging Lachish; and Hezekiah, terrified at his progress, and losing for a time his firm faith in God, sent to Lachish with an offer of submission and tribute. But Sennacherib, not content with this, sent a great host against Jerusalem under TARTAN, RAB-SARIS, and Rabshakeh; not so much, apparently, with the object of immediately engaging in the siege of the city, as with the idea that, in its present disheartened state, the sight of an army, combined with the threats and specious promises of Rabshakeh, might induce a surrender at once. Many have imagined, from the familiarity of Rabshakeh with Hebrew, that he was either a Jewish deserter or an apostate captive of Israel. Being unable to obtain any promise of submission from Hezekiah, who, in the extremity of his peril returning to trust in the help of the Lord, was encouraged by the words and predictions of Isaiah, Rabshakeh went back to the king of Assyria, who had now departed from Lachish (2 K. xviii., xix.;

Is. xxxvi., xxxvii.). The A. V. takes Rabshakeh as the name of a person; it may, however, be rather the name of the office which he held at the court, that of *chief cupbearer* (compare RAB-MAG; RAB-SARIS).

**Ra'ca** (L. fr. Chal. *réyká* = *worthless*), a term of reproach used by the Jews of our Saviour's age (Mat. v. 22).

**Race.** GAMES.

**Ra'chab** [-kab] (Gr.) = RAHAB the harlot (Mat. i. 5).

**Ra'chal** [-kal] (Heb. *traffic*, Ges.), one of the places to which, as one of his haunts during his wandering life, David sent a portion of his plunder from the Amalekites as a present (1 Sam. xxx. 29 only).

**Ra'chel** [ch as in *child*] (L. fr. Heb. = *a ewe*), also written RAHEL, the younger of the daughters of LABAN. She became the wife of JACOB, and mother of JOSEPH and BENJAMIN. The incidents of her life may be found in Gen. xxix.-xxxiii., xxxv. The beauty of Rachel, the deep love with which she was loved by Jacob from their first meeting by the well

Rachel's Tomb.—(Cassell's Bible Dictionary.)

of HARAN, when he showed to her the simple courtesies of the desert-life, and kissed her and told her he was Rebekah's son; the long servitude with which he patiently served for her, in which the seven years "seemed to him but a few days, for the love he had to her;" their marriage at last, after the fraud which substituted the elder sister (LEAH) in the place of the younger; and the death of Rachel at the very time when in giving birth to another son her own long-delayed hopes were accomplished, and she had become still more endeared to her husband; his deep grief and ever-living regrets for her loss (Gen. xlviii. 7): these things make up a touching tale of personal and domestic history which has kept alive the memory of Rachel. Yet from what is related to us concerning her character

there does not seem much to claim any high degree of admiration and esteem. The discontent and fretful impatience shown in her grief at being for a time childless, moved even her fond husband to anger (xxx. 1, 2). She appears, moreover, to have shared all the duplicity and falsehood of her family. See, e. g., Rachel's stealing her father's images, and the ready dexterity and presence of mind with which she concealed her theft (xxx. 1). From this incident we may also infer that she was not altogether free from the superstitions and IDOLATRY which prevailed in the land whence Abraham had been called (Josh. xxiv. 2, 14). (TERAPHIM).—*Rachel's tomb*. "Rachel died and was buried in the way to Ephrath, which is Bethlehem. And Jacob set a pillar upon her grave: that is the pillar of Rachel's grave."

to this day" (Gen. xxxv. 19, 20). The spot was well known in the time of Samuel and Saul (1 Sam. 2); and Jeremiah (xxxi. 15-17) forcibly and beautifully represents the buried Rachel weeping for the loss and captivity of her children, as the bands of the exiles, led on their road to Babylon, passed near her tomb (so Mr. Eddrup). Mat. ii. 17, 18, applies this to the slaughter by Herod of the infants at Bethlehem. (OLD TESTAMENT, B, C; PROPHET, note<sup>1</sup>.) The position of this RAMAH (RAMA) is disputed, but the site of Rachel's tomb, "on the way to Bethlehem," "a little way to come to Ephrath," "in the border of Benjamin," has never been questioned. It is about one mile N. of Bethlehem. The present building is of stone, plastered, not ancient, and now falling to decay. Within it is a tomb in the ordinary Mohammedan form.

**Rad'dai** (Heb. *treading down*, Ges.), a brother of DAVID, and fifth son of Jesse (1 Chr. ii. 14). Ewald conjectures that he = REI, but this does not seem probable.

**Ra'gan** (L. fr. Gr., see below). 1. A place named only in Jd. i. 5, 15; probably = RAGES.—2. (fr. Heb.) REU, an ancestor of our Lord (Lk. iii. 35).

**Rages** (L. fr. Gr.; named [so Strabo] from certain *chasms* [Gr. *rhagos*, a rent] near it made by an earthquake), an important city in northeastern MEDIA, where that country bordered upon Parthia. It is not mentioned in the Hebrew Scriptures, but according to Tobit (i. 14 ff., v. 5, vi. 10, 12, &c.) some of the Israelitish captives taken by Enemessar (Shalmaneser) had been transported to it, and thither the angel Raphael conducted TOBIAS. In Judith (i. 5, 15) it is made the scene of the great battle between Nabuchodonosor and ARPHAXAD. 2. Rages appears as Raghā in the Zendavesta, in Isidore, and in Stephen; as Raga in the inscriptions of Darius; Rhage in Duris of Samos, Strabo, and Arrian; and Rhagea in Ptolemy. Properly speaking, Rages is a town, but the town gave name to a province sometimes called Rages or Rhage, sometimes Rhagiana. It appears from the Zendavesta that here was one of the earliest settlements of the Aryans, who were mingled, in Rhagiana, with two other races, and were thus brought into contact with heretics. Isidore calls Rages "the greatest city in Media." In the troubles which followed the death of ALEXANDER THE GREAT, Rages appears to have gone to decay, but it was soon after rebuilt by Seleucus I. (Nicator), who gave it the name of Europus. When the PARTHIANS took it they called it Arsacia, after the Arsaces of the day; but it soon recovered its ancient appellation, which it has ever since retained, with only a slight corruption, the ruins being still known by the name of *Rhey*. These ruins lie about five miles S. E. of Teheran, and cover a space 4,500 yards long by 3,500 yards broad. The walls are well marked, and are of prodigious thickness. The importance of the city consisted in its vicinity to the Caspian Gates, the pass in the range of mountains on the southern shore of the Caspian Sea. The modern Teheran, built out of its ruins, has now superseded *Rhey*.

**Ra'gu'el**, or **Rag'u-el** (L. form), and **Rem'el** (Heb. *friend of God*, Ges.). 1. A prince-priest of Midian, the father of ZIPPORAH according to Ex. ii. 18, 21, and of HOBAB according to Num. x. 29. As the father-in-law of Moses is named JETHRO in Ex. iii. 1, and Hobab in Judg. iv. 11, and perhaps in Num. x. 29 (though the latter passage admits of another sense), the obvious view would be that Raguel, Jethro, and Hobab were different names for the

same individual. Such is probably the case with regard to the two first, if not with the third (so Mr. Bevan). One of the names may represent an official title. Another solution of the difficulty has been sought in the loose use of terms of relationship among the Hebrews; as that the Heb. *hōthen* or *chōthen*, translated "father-in-law" in Ex. iii. 1, xviii. 1, and Num. x. 29, may = any relation by marriage, and so Jethro and Hobab were brothers-in-law of Moses; or that "father" and "daughter" in Ex. ii. 16, 21 = *grandfather* and *granddaughter* (so Targum Jonathan, Aben Ezra, Michaelis, Winer, &c.).—2. A pious Jew of "Ecbatane, a city of Media;" father of Sara, the wife of Tobias (Tob. iii. 7, 17, &c.).

**Ra'hab** (Heb. *wide, broad, large*, Ges.), or **Ra'chab** [-kab] (Gr. fr. Heb.), a celebrated woman of JERICHO, who received the spies sent by JOSHUA to spy out the land, hid them in her house from the pursuit of her countrymen, was saved with all her family when the Israelites sacked the city; and became the wife of Salmon, and ancestress of the Messiah. At the time of the arrival of the Israelites in Canaan she was a young unmarried woman, dwelling in a house of her own alone, though she had a father and mother, and brothers and sisters, living in Jericho. She was a "harlot," and probably combined the trade of lodging-keeper for wayfaring men. She seems also to have been engaged in the manufacture of linen and the art of dyeing, for which the Phenicians were early famous; since we find the flat roof of her house covered with stalks of flax put there to dry, and a stock of scarlet or crimson line in her house. Her house was on the wall, probably near the town gate, convenient for persons coming in and going out of the city. Rahab therefore had been well informed with regard to the events of the Exodus. She had heard of the passage through the Red Sea, of the utter destruction of Sihon and Og, and of the irresistible progress of the Israelitish host. The effect upon her mind had been to lead her to a firm faith in Jehovah as the true God, and to the conviction that He purposed to give the land of Canaan to the Israelites. Her reception of the spies, the artifice by which she concealed them from the king, their escape, and the saving of Rahab and her family at the capture of the city, in accordance with their promise, are all told in Josh. ii.-vi. The narrator adds, "and she dwelleth in Israel unto this day," not necessarily implying that she was alive at the time he wrote, but that the family of strangers of which she was reckoned the head, continued to dwell among the children of Israel. We learn from Mat. i. 5 that Rahab (A. V. "Rachab") became the wife of Salmon the son of Naasson, and the mother of Boaz, Jesse's grandfather. The suspicion naturally arises that Salmon may have been one of the spies whose life she saved, and that gratitude for so great a benefit led in his case to a more tender passion, and obliterated the memory of any past disgrace attaching to her name. But, however this may be, Rahab became the mother of the line from which sprung David, and eventually Christ; for that the Rachab mentioned by St. Matthew is Rahab the harlot, is as certain as that David in the genealogy is the David in the books of Samuel (so Lord A. C. Hervey). The mention of an utterly unknown Rahab in the genealogy would be absurd. The character of Rahab has much and deep interest. Dismissing, as inconsistent with truth, the attempt to clear her character of stain by saying that she was only an innkeeper, and not a harlot, we may yet

notice that it is very possible that to a woman of her country and religion such a calling may have implied a far less deviation from the standard of morality than it does with us, and moreover, that with a purer faith she seems to have entered upon a pure life. As a case of casuistry, her conduct in deceiving the king of Jericho's messengers with a false tale, and, above all, in taking part against her own countrymen, has been much discussed. With regard to the first, strict truth, either in Jew or heathen, was a virtue so utterly unknown before the promulgation of the Gospel, that, as far as Rahab is concerned, the discussion is quite superfluous. Her taking part against her own countrymen is fully justified by the circumstance that fidelity to her country would in her case have been infidelity to God, and that the higher duty to her Maker eclipsed the lower duty to her native land. If her own life of shame was in any way connected with that idolatry, one can readily understand what a further stimulus this would give, now that her heart was purified by faith, to her desire for the overthrow of the nation to which she belonged by birth, and the establishment of that to which she wished to belong by a community of faith and hope. This view of Rahab's conduct is fully borne out by the references to her in the N. T. "By faith the harlot Rahab perished not with them that believed not, when she had received the spies with peace" (Heb. xi. 31). St. James fortifies his doctrine of justification by works, by asking, "Was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?" (Jas. ii. 25). And in like manner Clement of Rome says, "Rahab the harlot was saved for her faith and hospitality." JAMES, GENERAL EPISTLE OF; JUSTIFY.

**Rahab** (Heb. *a sea-monster*, Ges.; see below), a poetical name of EGYPT (Ps. lxxxix. 10; Is. li. 9). The same word signifies *fierceness, insolence, pride*; if Hebrew, when applied to Egypt it would indicate the national character of the inhabitants (so Mr. R. S. Poole). This word occurs in Job. xxvi. 12 (A. V. "the proud," margin "pride"), where it is usually translated, as in the A. V., instead of being treated as a proper name. Rahab, as a name of Egypt, occurs once only without reference to the Exodus (Ps. lxxxvii. 4). In Is. xxx. 7 the name is alluded to (A. V. "strength;" Gesenius translates *violence* [i. e. the violent] *they sit still*).

**Raham** (Heb. *womb*, Ges.), son of Shema and father of Jorkoam in the genealogy of the descendants of Caleb the son of Hezron (1 Chr. ii. 44).

**Rahel** (Heb.) = RACHEL (Jer. xxxi. 15 in some copies).

\* **Raiment** = clothing. DRESS.

**Rain**, the A. V. translation of the Heb. *mâtâr* (Ex. ix. 33, 34; Deut. xi. 11, 14, 17, xxviii. 12, 24, xxxii. 2, &c.; Job xxxvii. 6 twice, xxxviii. 28; Zech. x. 1 twice, &c.); also of *gashem*, which, when it differs from *mâtâr*, signifies a more violent rain (Gen. vii. 12, vii. 2; Lev. xxvi. 4; 1 K. xvii. 7, 14, xviii. 41, 44, 45; Ezz. x. 9 [A. V. "great rain," margin "showers"]; 13 [A. V. "much rain"]; Ez. i. 28, xiii. 11, 13, xxxiv. 26 twice [A. V. "shower" in Ez. xiii. and xxxiv.], xxxviii. 22, &c.), and is also used as a generic term, including the early and latter rain (Jer. v. 24; Joel ii. 23). *Early Rain*, the rains of the autumn, Heb. *yôrêh* (Deut. xi. 14, A. V. "first rain;" Jer. v. 24, A. V. "former" sc. rain), also *môrêh* (Ps. lxxxiv. 6, Heb. 7, A. V. "rain;" Joel ii. 23 twice, A. V. "former rain"). *Latter Rain*, the rain of spring, Heb. *molkôsh* (Deut. xi. 14; Job

xxix. 23; Prov. xvi. 15; Jer. iii. 3, v. 24; Hos. vi. 3; Joel ii. 23; Zech. x. 1). The early and latter rains are mentioned together (Deut. xi. 14; Jer. v. 24; Hos. vi. 3; Joel ii. 23; Jas. v. 7). Another word, of a more poetical character, is Heb. plural *ribbîm*, translated in our version "showers" (Deut. xxxii. 2; Ps. lxxv. 10 [Heb. 11], lxxii. 6; Jer. iii. 3, xiv. 22; Mic. v. 7 [Heb. 6]). The Hebrews have also *zerem* = violent rain, storm, tempest, accompanied with hail (A. V. "storm" in Is. iv. 6 and xxv. 4 twice; "tempest" and "flood" in xxviii. 2; "tempest" in xxx. 30 and xxxii. 2; "overflowing" in Hab. iii. 10; "showers" in Job xxiv. 8, the heavy rain which comes down on mountains); *sog-rîr* (A. V. "very rainy;" Prov. xxvii. 15 only) = continuous and heavy rain; pl. *šê'îrîm* = *showers*, Ges. (Deut. xxxii. 2 only, A. V. "small rain"). In the N. T. "rain" twice answers to the Gr. *broché* (Mat. vii. 25, 27), which in LXX. = Heb. *gashem*; but usually to the Gr. *huelos* (Acts xiv. 17, xxviii. 2; Heb. vi. 7; Jas. v. 7, 18; Rev. xi. 6), which in LXX. = Heb. *gashem* and *mâtâr*. The Greek verb *brechô* is translated "to rain" (Lk. xvii. 29; Jas. v. 17 twice; Rev. xi. 6), once "to send rain" (Mat. v. 45), twice "to wash" (Lk. vii. 38, 44).—In a country comprising so many varieties of elevation as Palestine, there must of necessity occur corresponding varieties of climate. For six months in the year no rain falls, and the harvests are gathered in without any of the anxiety with which we are so familiar lest the work be interrupted by unseasonable storms. But, in this long absence of rain, the whole land becomes dry, parched, and brown, the cisterns are empty, the springs and fountains fail, and the autumnal rains are eagerly looked for, to prepare the earth for the reception of the seed. These, the early rains, commence about the latter end of October or beginning of November, in Lebanon a month earlier: not suddenly, but by degrees; the husbandman has thus the opportunity of sowing his fields of wheat and barley. The rains come mostly from the W. or S. W. (Lk. xii. 54), continuing for two or three days at a time, and falling chiefly during the night; the wind then shifts round to the N. or E., and several days of fine weather succeed (Prov. xxv. 23). In November and December the rains continue to fall heavily, but at intervals; afterward they return, only at longer intervals, and are less heavy; but at no period during the winter do the rains (snow falls in the elevated regions) entirely cease. Rain continues to fall more or less during March; it is very rare in April, and even in Lebanon the showers that occur are generally light. With respect to the distinction between the early and the latter rains, Robinson observes that there are not at the present day "any particular periods of rain or succession of showers, which might be regarded as distinct rainy seasons. The whole period from October to March now constitutes only one continued season of rain without any regularly intervening term of prolonged fine weather. Unless, therefore, there has been some change in the climate, the early and the latter rains, for which the husbandman waited with longing, seem rather to have implied the first showers of autumn which revived the parched and thirsty soil, and prepared it for the seed; and the later showers of spring, which continued to refresh and forward both the ripening crops and the vernal products of the fields (Jas. v. 7; Prov. xvi. 15)." (AGRICULTURE; DEW; FAMINE; FROST; HAIL; PALESTINE, Climate; THUNDER.)—Rain furnishes the writers of the O. T. with appropriate and beautiful

metaphors, varying in character according as they regard it as the beneficent and fertilizing shower (Deut. xxxii. 2; 2 Sam. xxiii. 4; Job xxix. 23; Ps. lxxii. 6; Hos. vi. 3, &c.), or the destructive storm pouring down the mountain-side and sweeping away the labor of years (Job xx. 23; Ps. xi. 6; Prov. xxviii. 3; Ez. xxviii. 22).

**Rain'bow** answers to the Heb. *keseth*, A. V. "bow" (Gen. ix. 13-16; Ez. i. 28; ARMS, I. 3); Gr. *toxon* (Ecclus. xliii. 11); Gr. *iris* (Rev. iv. 3, x. 1). The rainbow is the token of the COVENANT which God made with NOAH when he came forth from the ark, that the waters should no more become a flood to destroy all flesh. The right interpretation of Gen. ix. 13 (A. V. "I do set [Heb. *uṯhan*, literally *I have given*; see ORDAIN 4] my bow in the cloud, and it shall be for a token of a covenant between me and the earth") seems to be (so Mr. Eddrup, with Henry, Gleig, Kitto, Ayre, Wordsworth, &c.) that God took the rainbow, which had hitherto been but a beautiful object shining in the heavens when the sun's rays fell on falling rain, and consecrated it as the sign of His love and the witness of His promise (Ecclus. xliii. 11). Many regard Gen. ix. 13 as indicating the first appearance of the rainbow then, because (so Dr. Barth) there was no rain until the flood, or because (so Keil and Delitzsch), though there was rain before the flood, the atmosphere was differently constituted, &c.—The figurative and symbolical use of the rainbow as an emblem of God's mercy and faithfulness must not be passed over. In Rev. iv. 3 it is said that "there was a rainbow round about the throne, in sight like unto an emerald:" amidst the awful vision of surpassing glory is seen the symbol of Hope, the bright emblem of Mercy and of Love.

\* **Rais'ing from the Dead.** RESURRECTION.

**Ral'sins** [-znz]. VINE.

**Ra'kem** (Heb. = REKEM). Among the descendants of Machir the son of Manasseh, by his wife Maachah, are mentioned Ulam and Rakem, apparently sons of Sheresh (1 Chr. vii. 16).

**Rak'kath** (Heb. *shore*, Ges.), a fortified town of Naphtali, named between HAMMATH and CHINNERETH (Josh. xix. 35); according to the Rabbins, on the site afterward occupied by the city of TIBERIAS.

**Rak'kon** (Heb. *thinness*, Ges.), a city of Dan (Josh. xix. 46), apparently not far from Joppa.

**Ram** (Heb. *high*, Ges.). 1. Second son of Hezron, and father of Amminadab (Ru. iv. 19; 1 Chr. ii. 9, 10); = ARAM 4.—2. The first-born of Jerahmeel, and nephew of No. 1 (ii. 25, 27).—3. Elihu, the son of Barachel the Buzite, is described as "of the kindred of Ram" (Job xxxii. 2). Ewald identifies Ram with ARAM 2.

**Ram** represents usually and appropriately the Heb. *ayil*, which occurs in the O. T. more than 150 times (Gen. xv. 9, xxii. 13 twice, &c.). "Rams" is also thrice the A. V. translation of the Chal. pl. *dichrin* (Ezr. vi. 9, 17, vii. 17), properly = *males*, but specifically *male sheep, rams*, Ges.; twice of Heb. pl. *atūdim* (Gen. xxxi. 10 [marg. "he-goats"], 12), = *he-goats*, Ges. and A. V. elsewhere; and once (Ez. xxi. 22 marg., Heb. 27) of Heb. *cārim*,

plural of *car*. GOAT; LAMB; RAM, BATTERING; SACRIFICE; SHEEP; SHEPHERD.

**Ram, Bat'ter-ing** (Heb. *car*; see LAMB 4; named [so Mr. Wright] from its iron head shaped like a ram's head, or from its movement, battering down a wall like a ram butting). This instrument of ancient siege operations is twice mentioned in the O. T. (Ez. iv. 2, xxi. 22 [Heb. 27]); and as both references are to the battering-rams in use among the Assyrians and Babylonians, it will only be necessary to describe those known to have been employed in their sieges. In attacking the walls of a fort or city, the first step appears to have been to form an inclined plane or bank of earth (compare Ez. iv. 2, "cast a mount against it"), by which the besiegers could bring their battering-rams and other engines to the foot of the walls. "The battering-rams," says Mr. Layard, "were of several kinds. Some were joined to movable towers which held warriors and armed men. The whole then formed one great temporary building, the top of which is represented in sculptures as on a level with the walls, and even turrets, of the besieged city. In some bas-reliefs the battering-ram is without wheels; it was then perhaps constructed upon the spot, and was not intended to be moved. . . . The mode of working the rams cannot be determined from the Assyrian sculptures. It may be presumed from the representations in the bas-reliefs, that they were partly suspended by a rope fastened to the outside of the machine, and that men directed and impelled them from within. . . .

Battering Ram.

The artificial tower was usually occupied by two warriors: one discharged his arrows against the besieged, whom he was able, from his lofty position, to harass more effectually than if he had been below; the other held up a shield for his companion's defence." ENGINE; WAR.

**Ra'ma** (L. = RAMAH) (Mat. ii. 18, referring to Jer. xxxi. 15). The original passage may allude to a massacre of Benjamite or Ephraimite prisoners

(compare ver. 9, 18), at the RAMAH in Benjamin or in Mount Ephraim (so Mr. Grove). This is seized by the Evangelist and turned into a touching reference to the slaughter of the Innocents at Bethlehem, near which was (and is) the sepulchre of Rachel. Dr. Thomson thinks this Rama or Ramah must have been near Bethlehem, and subject to the same calamity. He says, a heap of rubbish, not 400 yards from Rachel's tomb, is now pointed out as Ramah (Thn. ii. 501-503). PROPHET, note <sup>1</sup>; RACHEL.

**Ramah** (Heb. *a high place*, Ges.), a word which in its simple or compound shape forms the name of several places in the Holy Land; one which, like Gibeah, Geba, Gibeon, or Mizpeh, betrays the aspect of the country. (PALESTINE, II. § 46.) As an appellative it is found only in one passage (Ez. xvi. 24-39), in which it occurs four times, rendered in the A. V. "HIGH PLACE." 1. One of the cities of Benjamin (Josh. xviii. 25), named between Gibeon and Beeroth. There is a more precise specification of its position in the catalogue of the places N. of JERUSALEM which were disturbed by the approach of the king of Assyria (Is. x. 28-32). At Michmash he crosses the ravine; and then successively dislodges or alarms Geba, Ramah, and Gibeah of Saul. Geba is *Jeba*, on the southern brink of the great valley; and a mile and a half beyond it, directly between it and the main road to the city, is *er-Râm* (= *the Ramah*), lying on a high hill, commanding a wide prospect—now a miserable village of a few half-deserted houses, but with remains of columns, squared stones, and perhaps a church, indicating former importance (Robinson, i. 576). Its distance from the city is five English miles. Its position is in close agreement with the notices of the Bible (Judg. iv. 5, xix. 13; Jer. xl. 1, &c.). In the struggles after the disruption of the kingdom, Ramah, as a frontier town, commanding the northern road from Jerusalem, was taken, fortified, and retaken (1 K. xv. 17, 21, 22; 2 Chr. xvi. 1, 5, 6; RAMA). Its proximity to Gibeah is implied in 1 Sam. xxii. 6; Hos. v. 8; Ezr. ii. 26; Neh. vii. 30: the last two passages show also that its people returned after the Captivity. The Ramah in Neh. xi. 33 occupies a different position in the list, and may be a distinct place situated further W., nearer the plain.—2. The home of Elkannah, Samuel's father (1 Sam. i. 19, ii. 11), the birthplace of SAMUEL himself, his home and official residence, the site of his altar (vii. 17, viii. 4, xv. 34, xvi. 13, xix. 18 ff., xx. 1), and finally his burial-place (xxv. 1, xxviii. 3); = RAMATHAIM-ZOPHIM. All that is directly said as to its situation is that it was in Mount Ephraim (i. 1), and this would naturally lead us to seek it in the neighborhood of Shechem. But the whole tenor of the narrative of Samuel's public life (in connection with which alone this Ramah is mentioned) is so restricted to the region of the tribe of Benjamin, and to the neighborhood of Gibeah of Saul (vii. 17), that it seems impossible not to look for Samuel's city in the same locality (so Mr. Grove, original author of this article). On the other hand, the boundaries of Mount EPHRAIM are nowhere distinctly set forth. In the mouth of an ancient Hebrew the expression would mean that portion of the mountainous district which was at the time of speaking in the possession of the tribe of Ephraim. Mount Ephraim is mentioned as including the palm-tree of Deborah between Bethel and Ramah (Judg. iv. 5), and Bethel itself (Josh. xviii. 22). Jeremiah connects Ramah of Benjamin (so Mr. Grove; see RA-

MA) with Mount Ephraim (Jer. xxxi. 6, 9, 15, 18). In this district, tradition, with a truer instinct than it sometimes displays, has placed the residence of Samuel. The *Onomasticon* of Eusebius says, "Armathem Seipha: the city of Helkana and Samuel; it lies near Diospolis: thence came Joseph, in the Gospels said to be from Arimathea." Diospolis is LYDDA, the modern *Ludd*, and the reference of Eusebius is no doubt to *Ramleh*, the well-known modern town two miles from *Ludd*. But Ramleh is on the plain, not in Mount Ephraim (compare No. 6 below). Another tradition, however, that just alluded to, common to Moslems, Jews, and Christians, up to the present day, places the residence of Samuel on the lofty and remarkable eminence of *Neby Samûil* (= *Prophet Samuel*), which rises four miles to the N. W. of Jerusalem (see cut under GIBEON, and map of the environs of JERUSALEM, and MIZPAH 6). The height of this eminence (greater than that of Jerusalem itself), its commanding position, and its peculiar shape, render it the most conspicuous object in all the landscapes of that district, and make the names of Ramah and Zophim exceedingly appropriate to it. Since the days of Arculf (about A. D. 700) the tradition appears to have been continuous. The miserable modern village bears marks of antiquity in cisterns, &c. The mosque is said to stand on the foundations of a Christian church, which probably Justinian built or added to. The ostensible tomb is a mere wooden box; but below it is a cave or chamber, apparently excavated, like that of the patriarchs at Hebron. Here, then, Mr. Grove is inclined to place the Ramah of Samuel. It is usually assumed that the city in which Saul was anointed by Samuel (1 Sam. ix., x.) was Samuel's own city Ramah; but Mr. Grove regards it as different, and near Rachel's tomb (x. 2; RACHEL; ZUPH, THE LAND OR). On the assumption that Ramathaim-zophim was the city of Saul's anointing, various attempts have been made to find a site for it in the neighborhood of Bethlehem. (a.) Gesenius suggests the *Jebel Furaidis*, four miles S. E. of Bethlehem, the ancient Herodium, the "Frank mountain" of more modern times. (b.) Dr. Robinson proposes *Sôta*, in the mountains six miles W. of Jerusalem, as the possible representative of Zophim. (c.) Van de Velde, following Rev. S. Wolcott (B. S. for 1843, pp. 44 ff.), argues for *Râmeh* (or *Râmeh el-Khulî*), a well-known site of ruins about two and a half miles N. of Hebron. (d.) Dr. Bonar adopts *er-Râm*, which he places a short distance N. of Bethlehem, E. of Rachel's sepulchre (compare RAMA). Two suggestions in an opposite direction must be noticed:—(a.) That of Ewald, who places Ramathaim-zophim at *Râm-Allah*, a mile W. of *el-Birch* (BEEROth), and nearly five N. of *Neby Samûil*. (b.) That of Schwarz, who, starting from Gibeah of Saul as the home of Kish, fixes upon *Râmeh* N. of Samaria and W. of *Sânûr*, which he supposes also to be Ramoth or Jarmuth, the Levitical city of Issachar.—3. A fortified city of Naphtali (Josh. xix. 36), named between Adamah and Hazor; apparently, if the order of the list may be accepted, in the mountainous country N. W. of the Lake of Gennesaret; not improbably the place named *Râmeh*, discovered by Dr. Robinson, lying on the main track between *Alala* and the N. end of the Sea of Galilee, and about eight miles E. S. E. of *Safed*.—4. A place on the boundary (A. V. "coast") of Asher (Josh. xix. 29), apparently between Tyre and Zidon. Porter (in Kitto), and Mr. Grove (apparently), would make this = *Râmeh*, about three miles E. of Tyre; Rob-

inson (iii. 78) identifies it with another *Rameh*, a village more than ten miles S. E. of Tyre; while Van de Velde (i. 114) would place it at *el-Hamrah*, a village on the N. side of the Leontes, about twenty miles E. by N. from Tyre.—5. RAMOTH-GILEAD in 2 K. viii. 29 and 2 Chr. xxii. 6 only.—6. A place mentioned among those reinhabited by the Benjamites after the Captivity (Neh. xi. 33). It may be the Ramah of Benjamin (above, No. 1) or the Ramah of Samuel, but Mr. Grove thinks that its position in the list (remote from Geba, Michmash, Bethel, ver. 31, compare Ezr. ii. 26, 28) seems to remove it further W., to the neighborhood of Lod, Hadid, and Ono. The situation of the modern *Ramleh* agrees very well with this.

**Ra'math-le'hi** (Heb. *the height [or hill] of Lehi [the jaw-bone]*, Ges.), the name bestowed by Samson on the scene of his slaughter of the thousand Philistines with the jaw bone of an ass (Judg. xv. 17). "He cast away the jaw-bone out of his hand, and called that place 'Ramath-lehi'" (A. V. margin, "i. e. the lifting up of the jaw-bone, or the casting away of the jaw-bone"). LEHI; RAMATH OF THE SOUTH.

**Ra'math-miz'peh** (Heb. *the height of Mizpeh, or of the watch-tower*), a place mentioned in Josh. xiii. 26 only, apparently on the northern boundary of Gad; probably (so Mr. Grove) = MIZPAH 1 and RAMOTH-GILEAD.

**Ra'math** (Heb. construct of RAMAH) of the South, a city of Simeon (Josh. xix. 8), apparently at its extreme southern limit, and = BAALATH-BEER; also probably = SOUTH RAMOTH. Mr. Rowlands (in Fairbairn) would identify it with *Jebel Barahir*, a hill about forty-five miles S. W. of Beer-sheba; Wilton (*The Negeb*) would place it at the ruined site called *Kurnub* (KINAH? TAMAR?), on the southern declivity of the low ridge named *Kubbet el-Baul*, about twenty miles S. E. of Beer-sheba. Van de Velde takes it as = RAMATH-LEHI, which he finds at *Tell el-Lekiyeh*, near Beer-sheba.

**Ram-a-tha'im-zo'phim** (fr. Heb., see below), the full name of the town (RAMAH 2) in which Elkanah, the father of the prophet Samuel, resided. It is given in its complete shape in the Hebrew text and A. V. but once (1 Sam. i. 1). Ramathaim, if interpreted as a Hebrew word, is dual (fr. *ramah*) = the double eminence. This may point to a peculiarity in the shape or nature of the place, or may be an instance of the tendency, familiar to all students, which exists in language to force an archaic or foreign name into an intelligible form (so Mr. Grove). Of the force of "ZOPHIM" no probable explanation has been given. It was an ancient name on the E. of Jordan (Num. xxiii. 14), and there, as here, was attached to an eminence. Even without the testimony of the LXX. there is no doubt, from the narrative itself, that the Ramah of Samuel—where he lived, built an altar, died, and was buried—was the same place as the Ramah or Ramathaim-zophim in which he was born. Of its position nothing, or next to nothing, can be gathered from the narrative. It was in Mount Ephraim (1 Sam. i. 1). It had apparently attached to it a place called NAIOH (xix. 18, &c., xx. 1); and it had also in its neighborhood a great well, the well of SECHU (xix. 22). RAMAH 2; RAMATHEN.

**Ram'a-them** (fr. Gr., see below), one of the three "governments" which were added to Judea by King Demetrius Nicator, out of the country of Samaria (1 Mc. xi. 34). It no doubt derived its name from a town RAMATHAIM, probably that re-

nowned as the birthplace of Samuel the Prophet, though this cannot be stated with certainty.

**Ra'math-ite** (fr. Heb. = *native [or inhabitant] of some RAMAH*), the. Shimei the Ramathite had charge of the royal vineyards of King David (1 Chr. xxvii. 27).

**Ram'e-ses**, or **Ra-am'ses** (both Heb. fr. Egyptian, the name [= *son of the sun*, Ges.] of several kings of EGYPT, one of whom probably founded the city and named it from himself), a city and district of Lower Egypt. There can be no reasonable doubt (so Mr. R. S. Poole, original author of this article) that the same city is designated by Rameses and Raamses, and that this was the chief place of the land of Rameses, all the passages referring to the same region. The first mention of Rameses is in the narrative of the settling by Joseph of his father and brethren in Egypt, where it is related that a possession was given them "in the land of Rameses" (Gen. xlvii. 11). This land of Rameses either corresponds to the land of GOSHEN, or was a district of it, more probably the former (compare 6). "Raamses" next occurs as one of the two store-cities (A. V. "treasure cities") built for the Pharaoh who first oppressed the children of Israel (Ex. i. 11). There can be no doubt that Raamses (compare PITHOM) is Rameses in the land of Goshen. In the narrative of the Exodus, Rameses was the starting-point of the journey (xii. 37; see also Num. xxxiii. 3, 6). If, then, we suppose Rameses or Raamses to have been the chief town of the land of Rameses, either Goshen itself or a district of it, we have to endeavor to determine its situation. Lepsius supposes that *Abou-Kesheyd* (see map under EXODUS, THE) is on the site of Rameses. His reasons are, that in the LXX. Heroöpolis (which he makes = Rameses, and places at *Abou-Kesheyd*) is placed in the land of Rameses, in a passage where the Hebrew only mentions "the land of Goshen" (Gen. xlv. 28), and that there is a monolithic group at *Abou-Kesheyd* representing Tum, and Ra, and between them, Rameses II., who was probably there worshipped. The Biblical narrative of the position of Rameses seems to point to the western part of the land of Goshen, since two full marches, and part at least of a third, brought the Israelites from this town to the Red Sea; and the narrative appears to indicate a route for the chief part directly toward the sea. The one fact that *Abou-Kesheyd* is within about eight miles of the ancient head of the gulf, seems to us fatal to Lepsius's identification. There is good reason to suppose that many cities in Egypt bore this name. EXODUS, THE.

**Ra-mes'se** (fr. Gr.) = RAMESSES (Jd. i. 9).

**Ra-mi'ah** (fr. Heb. = whom *Jehovah hath set*, Ges.), a layman of Israel, one of the sons of Parosh; husband of a foreign wife (Ezr. x. 25).

**Ra'moth** (Heb. *heights*, Ges.), one of the four Levitical cities of Issachar according to 1 Chr. vi. 73; perhaps = JARMUTH and REMETH. RAMAH, 2, 6.

**Ra'moth** (see above), an Israelite layman, of the sons of Bani (Ezr. x. 29).

**Ra'moth-gil'e-ad** (Heb. *the heights of Gilead*), one of the great fastnesses on the E. of Jordan, and the key to an important district, as is evident not only from the statement of 1 K. iv. 13, that it commanded the regions of Argob and of the towns of Jair, but also from the obstinacy with which it was attacked and defended by the Syrians and Jews in the reigns of AHAB, AHAZIAH, and JEHOHAM. It seems probable (so Mr. Grove, with Winer, &c.) that it was identical with Ramath-mizpeh (Josh. xiii.

26), which again there is every reason to believe occupied the spot on which Jacob had made his covenant with Laban. It was the city of refuge for the tribe of Gad (Deut. iv. 43; Josh. xx. 8, xxi. 38). We next encounter it as the residence of one of Solomon's commissariat officers (1 K. iv. 13). In the second Syrian war Ramoth-gilead played a conspicuous part. During the invasion related in 1 K. xv. 20, or some subsequent incursion, this important place had been seized by Ben-hadad I. from Omri. Ahab, with Jehoshaphat, planned an attack upon it, but the attempt failed, and he lost his life (1 K. xxii.; 2 Chr. xviii.). It probably remained in possession of the Syrians till the suppression of the Moabite rebellion gave Jehoram time to renew the siege. He was more fortunate than Ahab. The town was taken by Israel, and held in spite of all the efforts of Hazael (who was now on the throne of Damascus) to regain it (2 K. ix. 14). Jehoram was severely wounded in the encounter, and retired to his palace at Jezreel (2 K. viii. 28, ix. 15; 2 Chr. xxii. 6). The fortress was left in charge of JEHU, who was here anointed king (2 K. ix.). He drove off to Jezreel, but did not return. Henceforward Ramoth-gilead disappears from our view. Eusebius and Jerome specify the position of Ramoth as fifteen miles from Philadelphia (RABBAN 1); but Eusebius places it W., and Jerome E. of Philadelphia. The latter position is obviously untenable. The former is nearly that of the modern town of *es-Salt*, which Gesenius, Porter (in Kitto), Fairbairn, Robinson, &c., would identify with Ramoth-gilead. *Es-Salt* has about 3,000 inhabitants, and occupies a strong and picturesque situation, on the summit of a steep hill, crowned with a castle, and having its lower slopes covered with terraced vineyards. In the cliffs and ravines beneath it are many tombs and grottoes. Its raisins are esteemed the best in Palestine (Porter). Ewald proposes a site further N., at *Reimun*, a few miles W. of *Jerash* (Gerasa). Mr. Grove is disposed to place it at or near a site named *Jel'ad* (= *Gilead*), which is mentioned by Seetzen as four or five miles N. of *es-Salt*.

**Ra'moth in Gil'e-ad** (Deut. iv. 43; Josh. xx. 8, xxi. 38; 1 K. xxii. 3) = **RAMOTH-GILEAD**.

**Rams' Horns.** CORNER; JUBILEE.

**Rams' Skins dyed red** formed part of the materials that the Israelites were ordered to present as offerings for the making of the Tabernacle (Ex. xxv. 5); of which they served as one of the inner coverings. There is no doubt that the A. V., following the LXX. and Vulgate, and the Jewish interpreters, is correct (so Mr. Houghton). The original words, it is true, admit of being rendered "skins of red rams." The red ram is by Col. C. H. Smith identified with the Aoudad sheep (*Ammotragus Tragelaphus*).

\* **Ran'ges** [rain'jez] for **Pots** (Lev. xi. 35). Por 9.

\* **Ransom** = price of expiation or redemption; the A. V. translation of—1. Heb. *côpher*, literally *a cover* or *that which covers* (Ex. xxx. 12; 1 Sam. xii. 3 margin [text "BRIBE"]; Job xxxiii. 34 [margin "ATONEMENT"]; xxxvi. 18; Ps. xlix. 7 [Heb. 8]; Prov. vi. 35, xiii. 8, xxi. 18; Is. xliii. 3; Am. v. 12 margin [text "bribe"]; also translated "sum of money" (Ex. xxi. 30), "satisfaction" (Num. xxxv. 31, 32).—2. Heb. *pidyôn* (Ex. xxi. 30), also translated "REDEMPTION" (Ps. xlix. 8 [Heb. 9]).—3. Gr. *antilutron*, properly *an equivalent for redemption*, i. e. a ransom, Rbn. *N. T. Lex.* (1 Tim. ii. 6 only).—4. Gr. *lutron* = *loosing-money*, a *ransom*, price paid for the release of any one, Rbn. *N. T. Lex.*; used

tropically only (Mat. xx. 28; Mk. x. 45); in LXX. = No. 1. PUNISHMENTS; SAVIOUR; SLAVE; WAR.

**Ra'pha** (Heb. *high, tall?* Ges.). 1. A Philistine giant, father or ancestor of a family of tall men (margin of 2 Sam. xxi. 16 ff. and 1 Chr. xx. 4, 6). (See REPHAIM under GIANTS).—2. A son or descendant of Benjamin (1 Chr. viii. 2).—3. Son of Binea, a descendant of Saul (1 Chr. viii. 37); = REPHAIAH 4.

**Ra'pha-el, or Raph'a-el** (L. fr. Heb. = *the divine healer*, Mr. Westcott; whom *God heals*, Ges.), "one of the seven holy angels which . . . go in and out before the glory of the Holy One" (Tob. xii. 15). According to another Jewish tradition, Raphael was one of the *four* angels which stood round the throne of God (Michael, Uriel, Gabriel, Raphael). In Tobit he appears as the guide and counsellor of Tobias. AZARIAH 5; TOBIT, BOOK OF.

**Raph'a-lem** (L. fr. Heb. = REPHAIM), an ancestor of Judith (Jd. viii. 1).

**Raphon** (L.), a city of Gilead, under the walls of which Judas Maccabeus defeated Timotheus (1 Mc. v. 37 only). It may have been identical with Raphana, mentioned by Pliny as one of the cities of the Decapolis. In Kiepert's map accompanying Wetzstein's *Lauran*, &c. (1860), a place named *Er-Râfe* is marked, on the E. of *Wady Hrér*, and S. of *es-Sanamin* (Ashteroth Karnaim?). If *Er-Râfe* be Raphana, we should expect to find large ruins.

**Ra'phu** (Heb. *healed*, Ges.), father of Palti, the Benjamite spy (Num. xiii. 9).

**Ras'es** (fr. Gr., see below), **Chil'dren of**: one of the nations whose country was ravaged by Helerferes in his approach to Judea (Jd. ii. 23 only). The old Latin version reads *Thiras et Rasia*. Wolff restores the original Chaldee text of the passage as Thars (= TIRAS?) and Rosos, and compares the latter name with Rhosus, a place on the Gulf of Issus (compare also *Russia*). ROSH 3.

**Rath-u-mus** (fr. Gr. = REHM), "Rathumus the story writer" of 1 Esd. ii. 16, 17, 25, 30 = "REHM the chancellor" of Ezr. iv. 8, 9, 17, 23.

**Ra'ven** (Heb. *'ôrêb*, so called from its *black* color, Ges.; Gr. *korax*), a well-known bird mentioned in various passages in the Bible. A raven was sent out by NOAH from the ark to see if the waters were abated (Gen. viii. 7). This bird was not allowed as food by the Mosaic law (Lev. xi. 15). The Heb. *'ôrêb* is doubtless used in a generic sense, and includes other species of the genus *Corvus*, such as the crow (*Corvus Corone*), and the hooded crow (*Corvus Cornix*). The European raven (*Corvus Corax*, Linn.) and the American raven (*Corvus caninus*, Bartram) are very closely allied species, the largest of the crow family, omnivorous, but by preference carnivorous, living on small animals of all kinds, carrion, &c. The Hebrew and A. V. in Gen. viii. 7 read "the raven went forth to and fro [from the ark] until the waters were dried up;" but the LXX., Vulgate, and Syriac represent the raven as "not returning until the water was dried from off the earth." The subject of Elijah's sustenance at the brook Cherith by means of ravens (1 K. xvii. 4, 6) has given occasion to much fanciful speculation. It has been attempted to show that the *'ôrêbim* ("ravens") were the people of Orbo, a small town near Cherith. Others have found in the ravens merely merchants; while Michaelis has attempted to show that Elijah merely plundered the ravens' nests of hares and other game! To the fact of the raven being a common bird in Palestine, and to its habit of flying restlessly about in constant search for food to satisfy its voracious appetite, may

perhaps be traced the reason for its being selected by our Lord and the inspired writers as the special object of God's providing care (Job xxxviii. 41; Ps. cxlvii. 9; Lk. xii. 24).

European Raven (*Corvus Corax*).—(Fbn.)

**Ra'zls** (Gr. fr. Heb. = *consumption, destruction*, or *a tumult, crowd*? W. L. Alexander, in Kitto), "one of the elders of Jerusalem," who killed himself under peculiarly terrible circumstances, that he might not fall "into the hands of the wicked" (2 Mc. xiv. 37-46). In dying he is reported to have expressed his faith in a resurrection (ver. 46). This act of suicide, which was wholly alien to the spirit of the Jewish law and people, has been rightly urged by Protestant writers as an argument against the inspiration of 2 Maccabees (so Mr. Westcott).

**Ra'zor**. Besides other usages, the practice of shaving the head after the completion of a vow, must have created among the Jews a necessity for the special trade of a barber (Num. vi. 9, 18, viii. 7; Lev. xiv. 8; Judg. xiii. 5; Is. vii. 20; Ez. v. 1; Acts xviii. 18). The instruments of his work were probably, as in modern times, the razor, the basin, the mirror, and perhaps also the scissors (see 2 Sam. xiv. 26). Like the Levites, the Egyptian priests were accustomed to shave their whole bodies. **BEARD; HAIR; HANDICRAFT; KNIFE; PURIFICATION; STEEL.**

**Re-af'a** [-a'yah], or **Re-a-i'a** (fr. Heb. = *REABAN*), a Reubenite, son of Micah, and apparently prince of his tribe (1 Chr. v. 5).

**Re-af'ah** [-a'yah], or **Re-a-i'ah** (Heb. whom *Jehovah cares for*, Ges.). 1. Son of Shobal, the son of Judah (1 Chr. iv. 2); = **HAROEI**?—2. Ancestor of a family of Nethinim who returned from Babylon with Zerubbabel (Ezr. ii. 47; Neh. vii. 50).

\* **Reap'ing**. **AGRICULTURE.**

**Re'ba** (Heb. *a fourth part*, Ges.), one of the five kings of the Midianites slain by the children of Israel, when Balaam fell (Num. xxxi. 8; Josh. xiii. 21).

**Re-bee'ca**, the Latinized Greek form of **REBEKAH** (Rom. ix. 10 only).

**Re-bek'ah** (fr. Heb. = *a cord with a noose*, not unaptly of a female who ensnares by her beauty, Ges.), also written **REBECCA**, daughter of **BETHUEL** (Gen. xxii. 23) and sister of **LABAN**, married to **ISAAC**, her father's cousin. She is first presented to us in the account of the mission of Eliezer to Padan-aram (xxiv.), in which his interview with **Rebekah**, her consent and marriage are related. For nineteen years she was childless: then, after the prayers of Isaac and her journey to inquire of the

Lord, **ESAU** and **JACOB** were born, and while the younger was more particularly the companion and favorite of his mother (xxv. 19-28) the elder became a grief of mind to her (xxvi. 35). When Isaac was driven by a famine into the lawless country of the Philistines, **Rebekah's** beauty became, as was apprehended, a source of danger to her husband (xx.; compare **ABRAHAM**). It was probably a considerable time afterward when **Rebekah** suggested the deceit practised by Jacob on his blind father. She directed and aided him in carrying it out, foresaw the probable consequence of Esau's anger, and prevented it by moving Isaac to send Jacob away to Padan-aram (xxvii.) to her own kindred (xxix. 12). It has been conjectured that she died during Jacob's sojourn in Padan-aram. Her burial is incidentally mentioned by Jacob (xlix. 31). St. Paul (Rom. ix. 10) refers to her as being made acquainted with the purpose of God regarding her children before they were born.

\* **Re-c'eipt** [-seet] of **Cus'tom**. **PUBLICAN; TAXES.**

**Re'chab** [-kab] (Heb. *the horseman*). 1. Father or ancestor of **Jehonadab** and the **RECHABITES** (2 K. x. 15, 23; 1 Chr. ii. 55; Jer. xxxv. 6-19); identified by some writers with **Hobab**.—2. One of the two "captains of bands," whom **Ishbosheth** took into his service, and who conspired to murder him (2 Sam. iv. 2).—3. Father of **Malchiah**, ruler of "PART" of **Beth-hacerem** (Neh. iii. 14).

**Re'chab-ites** (fr. Heb. = *descendants of RECHAB*). The tribe thus named appears before us in one memorable scene. Their history before and after it lies in some obscurity.—(I.) In 1 Chr. ii. 55, the house of **Rechab** is identified with a section of the **Kenites**, who came into Canaan with the Israelites and retained their nomadic habits, and the name of **HEMATH** is mentioned as the patriarch of the whole tribe. It has been inferred from this passage that the descendants of **Rechab** belonged to a branch of the **Kenites** settled from the first at **Jabez** in **Judah**; but probably this passage refers to the locality occupied by the **Rechabites** after their return from the Captivity. Of **RECHAB** 1 himself nothing is known. He may have been the father, he may have been the remote ancestor of **JEHONADAB**. The name may have pointed, as in the robber-chief of 2 Sam. iv. 2, to a conspicuous form of the wild Bedouin life, and **Jehonadab**, the son of the *Rider*, may have been, in part at least, for that reason, the companion and friend of the fierce captain of Israel who drives as with the fury of madness (2 K. ix. 20). **Boulduc** infers from 2 K. ii. 12, xiii. 14, that the two great prophets **Elijah** and **Elisha** were known, each of them in his time, as the "chariot" (Heb. *recheb*) of Israel. He infers from this that the special disciples of the prophets, who followed them in all their austerity, were known as the "sons of the chariot" (Heb. *binay recheb*), and that afterward, when the original meaning had been lost sight of, this was taken as a patronymic, and referred to an unknown **Rechab**.—(II.) The personal history of **JEHONADAB** has been dealt with elsewhere. He and his people had all along been worshippers of **Jehovah**, circumcised though not reckoned as belonging to Israel, and probably therefore not considering themselves bound by the Mosaic law and ritual. The worship of **Baal** was accordingly not less offensive to them than to the Israelites. The luxury and license of Phœnician cities threatened the destruction of the simplicity of their nomadic life (Am. ii. 7, 8, vi. 3-6). A protest was needed against both evils, and as in the case of **Elijah**, and of the **Nazarites** of Am. ii. 11, it

took the form of asceticism. There was to be a more rigid adherence than ever to the old Arab life. They were to drink no wine, nor build house, nor sow seed, nor plant vineyard, nor have any. All their days they were to dwell in tents, as remembering that they were strangers in the land (Jer. xxxv. 6, 7). This was to be the condition of their retaining a distinct tribal existence. For two centuries and a half they adhered faithfully to this rule. The Nabatheans (NEBAIOTH) and Wahabees (ARABIA) supply us with a striking parallel.—(III.) The invasion of Judah by Nebuchadnezzar, in B. C. 607, drove the Rechabites from their tents. Some inferences may be safely drawn from the facts of Jer. xxxv. The names of the Rechabites show that they continued to be worshippers of Jehovah. They are already known to the prophet. One of them (ver. 3; JEREMIAH 8) bears the same name. Their rigid Nazarite life gained for them admission into the house of the Lord, into one of the chambers assigned to priests and Levites, within its precincts. Here they are tempted and their steadfastness is a reproof for the unfaithfulness of Judah and Jerusalem. The history of this trial ends with a special blessing: "Jonadab, the son of Rechab, shall not want a man to stand before me forever" (ver. 19). Prof. Plumptre regards the words "to stand before me" as not only pointing to the perpetuation of the name and tribe, but as meaning also that the Rechabites acted as the servants and ministers of Jehovah—that they were solemnly adopted into the families of Israel, and were recognized as incorporated into the tribe of Levi. (But compare Num. iii. 10, xvi. 40, xviii. 1–10.)—(IV.) Prof. Plumptre alleges in support of his view the following traces of their after-history in the Biblical and later writers:—(1.) The singular heading of the Ps. lxxi. in the LXX. version, indicating that the "sons of Jonadab" shared the captivity of Israel. (2.) The mention of a son of Rechab in Neh. iii. 14, as co-operating with the priests, Levites, and princes in the restoration of the wall of Jerusalem. (3.) The mention of the house of Rechab in 1 Chr. ii. 55. The Rechabites have become SCRIBES. They give themselves to a calling which, at the time of the return from Babylon was chiefly, if not exclusively, in the hands of Levites (so Prof. Plumptre). The close juxtaposition of the Rechabites with the descendants of David in 1 Chr. iii. 1, shows also in how honorable an esteem they were held at the time when that book was compiled. (4.) The account of the martyrdom of James the Just given by Hegesippus. While the Scribes and Pharisees were stoning him, "one of the priests of the sons of Rechab, the son of Rechabim, who are mentioned by Jeremiah the prophet," cried out, protesting against the crime. Dr. Stanley supposes the name "priests" here used loosely, as indicating the abstemious life of James and other Nazarites, and points to the fact that Epiphanius ascribes to Symeon the brother of James the words which Hegesippus puts into the Rechabite's mouth. Calmet supposes the man was one of the Rechabite Nethinim, whom the informant of Hegesippus took, in his ignorance, for a priest. (5.) Some later notices are not without interest. Benjamin of Tudela, in the twelfth century, mentions that near *El Subar* (= Pumbeditha) he found Jews who were named Rechabites. They tilled the ground, kept flocks and herds, abstained from wine and flesh, and gave tithes to teachers who devoted themselves to studying the Law, and weeping for Jerusalem. A later

traveller, Dr. Joseph Wolff, gives a yet stranger and more detailed report. The Jews of Jerusalem and Yemen told him that he would find the Rechabites of Jer. xxxv. living near Mecca. When he came near Senaa, he came in contact with a tribe, the *Beni-Khaibr*, who identified themselves with the sons of Jonadab. One of them, Mousa, read to Dr. Wolff from an Arabic Bible Jer. xxxv. 5–11, and affirmed that it was fulfilled in them, and that they were 60,000 in number. After a second interview with Mousa, he describes them as keeping strictly to the old rule, calls them now by the name of the *B'ne-Arhab*, and says that *B'ne Israel* of the tribe of Dan live with them. Signor Pierotti read a paper "On recent notices of the Rechabites" before the British Association, in October, 1862. He met with a tribe about two miles S. E. of the Dead Sea, who called themselves by that name, had a Hebrew Bible, said their prayers at the tomb of a Jewish Rabbi, and told him the same stories as had been told to Wolff thirty years before.

**Rechab** [-kah] (Heb. *the side, hinder part*, Ges. l. In 1 Chr. iv. 12, Beth-rapah, Paschah, and Tehinnah the father, or founder, of Ir-nabash, are said to have been "the men of Rechab.")

\* **Rec-on-ell-i-ation.** ATONEMENT.

**Re-cord'er** (Heb. *mazcir*), an officer of high rank in the Jewish state, exercising the functions not simply of an annalist, but of chancellor or president of the privy council. In David's court the recorder appears among the high officers of his household (2 Sam. viii. 16, xx. 24; 1 Chr. xviii. 15). In Solomon's he is coupled with the three secretaries, and is mentioned last, probably as being their president (1 K. iv. 3; compare 2 K. xviii. 18, 37; 2 Chr. xxxiv. 8). KING; WRITING.

\* **Red.** COLORS; RED HEIFER; RED SEA.

\* **Re-deemer**, the A. V. translation of Heb. *gôel*, applied (so Gesenius) to one who redeems a field by paying back the price for which it had been sold, this right belonging to the nearest kinsman (Lev. xxv. 25, 26; A. V. in both "to redeem"), and often figuratively applied to God as redeeming and delivering men, and especially Israel (Job xix. 25; Is. xlix. 7, 26, &c.). The same word is also translated "kinsman" (Ru. iv. 1 ff. [= margin "redeemer" in 14], &c.), "avenger," or "revenger" sc. of blood (Num. xxxv. 12 ff., &c.). BLOOD, AVENGER OF; MARRIAGE: ATONEMENT; JESUS CHRIST; SAVIOUR, &c.

\* **Re-demp'tion**, the A. V. translation of—1. Heb. *ge'ullah* = the redemption or repurchase of a field, &c. (Lev. xxv. 24, 51, 52; Jer. xxxii. 7, 8; REDEEMER).—2. Heb. *pedûth* (Ex. viii. 23 marg. [Heb. 19]; Ps. cxi. 9, cxxx. 7), *pidyôn* (Num. iii. 49), *pidyôn* (Ps. xlix. 8 [Heb. 9]; RANSOM), all from a Hebrew root signifying (so Gesenius) to cut, to cut in two, to cut loose, hence to ransom, to redeem, to set free.—3. Gr. *apolutrôis*, properly (so Rbn. N. T. Lex.) a letting off for a ransom, i. e. redemption, deliverance on account of a ransom paid (Lk. xxi. 28; Rom. iii. 24, viii. 23; 1 Cor. i. 30; Eph. i. 7, 14, iv. 30; Col. i. 14; Heb. ix. 15), once translated "deliverance" (xi. 35).—4. Gr. *lutrôis* = a ransoming, deliverance (Lk. ii. 38; Heb. ix. 12); once, with a verb signifying to make, translated "redeemed," i. e. made redemption for (Lk. i. 68). ATONEMENT; JESUS CHRIST; REDEEMER.

**Red Heifer** [hef-]. PURIFICATION.

**Red Sea.** The sea known to us as the Red Sea was by the Israelites called in Heb. *hayyân* = "the sea" (Ex. xiv. 2, 9, 16, 21, 28, xv. 1, 4, 8, 10, 19; Josh. xiv. 6, 7, &c.); and specially *yam-sûph*, A. V.

"Red Sea" (Ex. x. 19, xiii. 18, xv. 4, 22, xxiii. 31; Num. xiv. 25, &c.). It is perhaps written in Heb. *sû-phâh* in Num. xxi. 14, rendered "Red Sea" in A. V. (NUMBERS, B); and in like manner in Deut. i. 1, *sûph*, A. V. "Red Sea," margin "Zuph." The LXX. always render it *hê eruthra thalassa* (except in Judg. xi. 16). The same Greek name occurs in Acts vii. 36 and Heb. xi. 29.—Of the names of this sea (1.) Heb. *yâm* signifies "the sea," or any sea. It is also applied to the NILE (exactly as the Arabic *bahr* is so applied) in Nah. iii. 8. (2.) Heb. *yâm-sûph*. The meaning of *sûph*, and the reason of its being applied to this sea, have given rise to much learned controversy. Gesenius renders it *rush*, *reed*, *sedge*, *sea-weed*. It is mentioned in the O. T. almost always in connection with the sea of the Exodus; it also occurs in the narrative of the exposure of Moses (Ex. ii. 3, 5), and in Is. xix. 6, where it is rendered "FLAG" in the A. V. It only occurs in one place besides those already referred to: in Jon. ii. 5, Heb. 6 (A. V. "weeds"). The *sûph* of the sea, it seems quite certain, is a *sea-weed resembling wool* (so Mr. E. S. Poole, original author of this article). Such sea-weed is thrown up abundantly on the shores of the Red Sea. But it may have been also applied to any substance resembling wool, produced by a *fluvial rush*, such as the papyrus, and hence by a synecdoche to such rush itself. (3.) Heb. *yêôr*, signifies "a RIVER." Gesenius says it is almost exclusively used of the NILE (and so Fürst, Porter [in Kitto], Fairbairn, &c.); but Mr. Poole thinks that in the passages relating to the exposure of Moses it applies to the ancient extension of the Red Sea toward Tanis (ZOAN, AVARIS), or to the ancient canal through which the water of the Nile passed to the "tongue of the Egyptian Sea." (4.) Gr. *hê eruthra thalassa* (Acts vii. 36; Heb. xi. 29); L. *mare Erythreum*. The authors of theories concerning the origin of this appellation may be divided into two schools. The first have ascribed it to some natural phenomenon; such as the singularly red appearance of the mountains of the western coast; the red color of the water sometimes caused by the presence of zoophytes; the red coral of the sea; the red seaweed; and the red storks that have been seen in great numbers, &c. The second have endeavored to find an etymological derivation. Of these the earliest (European) writers proposed a derivation from *EDOM* (*red*), by the Greeks translated literally. The Greeks and Romans tell us that the sea received its name from a great king, Erythras (Gr. *Eruthras*), who reigned in the adjacent country: the stories that have come down to us appear to be distortions of the tradition that Himyer was the name of apparently the chief family of Arabia Felix, the great South-Arabian kingdom, whence the Himyerites, and Homeritæ: Himyer appears to be derived from the Arabic *ahmar*, *red*. We can scarcely doubt, on these etymological grounds, the connection between the Phenicians and the Himyerites, or that in this is the true origin of the appellation of the Red Sea. But when the ethnological side of the question is considered, the evidence is much strengthened. The South-Arabian kingdom was a Joktanite (or Shemite) nation mixed with a Cushite. The Red Sea, therefore, was most probably the Sea of the Red men.—*Ancient Limits*. The most important change in the Red Sea has been the drying up of its northern extremity, "the tongue of the Egyptian Sea." The land about the head of the gulf has risen, and that near the Mediterranean become depressed. The head of the gulf has conse-

quently retired gradually since the Christian era. Thus the prophecy of Isaiah has been fulfilled (xi. 15, xix. 5): the tongue of the Red Sea has dried up for a distance of at least fifty miles from its ancient head. An ancient canal conveyed the waters of the Nile to the Red Sea flowing through the *Wâdî-t-Tumeyldt*, and irrigating with its system of water-channels a large extent of country (see maps under EGYPT, and EXODUS, THE). The drying up of the head of the gulf appears to have been one of the chief causes of the neglect and ruin of this canal. The country, for the distance above indicated, is now a desert of gravelly sand, with wide patches about the old sea-bottom, of rank marsh-land, now called the "Bitter Lakes." At the northern extremity of this salt waste is a small lake sometimes called the Lake of Heroöpolis, now *Birket el-Timsah* (the Lake of the Crocodile), and supposed to mark the ancient head of the gulf. The canal that connected this with the Nile was of Pharaonic origin, anciently known as the *Foasa Regum* (L. = *King's Canal*), and the *Canal of Hero*. The time at which the canal was extended, after the drying up of the head of the gulf, to the present head is uncertain, but it must have been late, and probably since the Mohammedan conquest. Traces of the ancient channel throughout its entire length to the vicinity of Bubastis (Pi-beseth), exist at intervals in the present day. The land N. of the ancient head of the gulf is a plain of heavy sand, merging into marsh-land near the Mediterranean coast, and extending to Palestine. This region, including *Wâdî-t-Tumeyldt*, was probably the frontier-land occupied in part by the Israelites, and open to the incursions of the wild tribes of the Arabian desert.—*Physical Description*. In extreme length the Red Sea stretches from the Straits of *Bâb el-Mendebeh* (or rather *Râs Bâb el-Mendebeh*) in latitude 12° 40' N., to the modern head of the Gulf of Suez, latitude 30° N., about 1,400 English miles (see map under ARABIA). Its greatest width may be stated roughly at about 200 geographical miles; this is about latitude 16° 30', but the navigable channel is here really narrower than in some other portions. From shore to shore, its narrowest part is at *Râs Berceed* opposite, a little north of *Yembo*, the port of Medina; and thence northward to *Râs Mohammed*, the sea maintains about the same average width of 100 geographical miles. At *Râs Mohammed*, the Red Sea is split by the granitic peninsula of Sinai into two gulfs: the westernmost, or Gulf of Suez, is now about 130 geographical miles in length, with an average width of about 18, though it contracts to less than 10 miles: the easternmost, or Gulf of *El-'Akabeh*, is only about 90 miles long, from the Straits of *Tirdn*, to the *'Akabeh* (ELATH), and of proportionate narrowness. The navigation of the Red Sea and Gulf of Suez, near the shore, is very difficult from the abundance of shoals, coral-reefs, rocks, and small islands; but in mid-channel, exclusive of the Gulf of Suez, there is generally a width of 100 miles clear, except the *Dædalus* reef. The bottom in deep soundings is in most places sand and stones, from Suez as far as *Juddah*; and thence to the straits it is commonly mud. The deepest sounding in the excellent Admiralty chart is 1,054 fathoms, in latitude 22° 30'. Journeying southward from Suez, on our left is the peninsula of SINAI: on the right is the desert coast of Egypt, of limestone formation like the greater part of the Nile valley in Egypt, the cliffs on the sea-margin stretching

landward in a great rocky plateau, while more inland a chain of volcanic mountains (beginning about latitude 28° 4' and running S.) rears its lofty peaks at intervals above the limestone, generally about 15 miles distant, and some of them 6,000 feet or more in height. This coast is especially interesting in a Biblical point of view, for here were some of the earliest monasteries of the Eastern Church, and in those secluded and barren mountains lived very early Christian hermits. South of the "Elba" chain (about latitude 22°), the country gradually sinks to a plain, until it rises to the highland of *Geedán*, latitude 15°, and thence to the straits extends a chain of low mountains. The greater part of the African coast of the Red Sea is sterile, sandy, and thinly peopled. The Gulf of *El-Akabe* (i. e. "of the Mountain-road") is the termination of the long valley of the *Ghór* or *'Arabah* that runs northward to the Dead Sea. It is itself a narrow valley; the sides are lofty and precipitous mountains, of entire barrenness; the bottom is a river-like sea, running nearly straight for its whole length of about 90 miles. The northerly winds rush down this gorge with uncommon fury, and render its navigation extremely perilous; while most of the few anchorages are open to the southerly gales. The western shore is the peninsula of *SINAI*. The Arabian chain of mountains skirts the eastern coast. The sea, from its dangers and sterile shores, is entirely destitute of boats. The Arabian coast outside the Gulf of *'Akabe* is skirted by the range of Arabian mountains, which generally leave a belt of coast country, called *Tihámeh*, or the *Ghór*. This tract is generally a sandy parched plain, thinly inhabited; these characteristics being especially strong in the N. The mountains of the *Hejáz* consist of ridges running parallel toward the interior, and increasing in height as they recede. The distant ranges have a rugged pointed outline, and are granitic; nearer the sea many of the hills are fossiliferous limestone, while the beach hills consist of light-colored sandstone, fronted by and containing large quantities of shells and masses of coral. Some of the mountains on this side are from 6,000 to 7,700 feet high. The coast-line itself, or *Tihámeh*, N. of *Yembo'*, is of moderate elevation, varying from 50 to 100 feet, with no beach. To the southward to *Juddah* it is more sandy and less elevated. The coral of the Red Sea is remarkably abundant, and beautifully colored and variegated. It is often red, but the more common kind is white; and of hewn blocks of this many of the Arabian towns are built.—The earliest navigation of the Red Sea (passing by the pre-historical Phenicians) is mentioned by Herodotus. "Sesostris (Rameses II.) was the first who, passing the Arabian Gulf in a fleet of long vessels, reduced under his authority the inhabitants of the coast bordering the Erythrean Sea." Three centuries later, Solomon's navy was built "in EZION-GEHER which is beside Elath (ELATH), on the shore of the Red Sea in the land of Edom" (1 K. ix. 26). It is possible that the sea has retired here as at Suez, and that Ezion-geber is now dry land. Jehoshaphat also "made ships of Tharshish to go to Ophir for gold: but they went not, for the ships were broken at Ezion-geber" (xxii. 48). The scene of this wreck has been supposed to be *Edh-Dhahab*. The fashion of the ancient ships of the Red Sea, or of the Phenician ships of Solomon, is unknown. From Pliny we learn that the ships were of papyrus and like the boats of the Nile (EGYPT); and this statement was no doubt in some measure correct. El-Mak-

reezee, in the first half of the fifteenth century, thus describes the ships that sailed from *Eydháb* on the Egyptian coast to *Juddah*: "Their '*jel-behs*,' which carry the pilgrims on the coast, have not a nail used in them, but their planks are sewed together with fibre, which is taken from the cocoanut-tree, and they caulk them with the fibres of the wood of the date-palm; then they 'pay' them with butter, or the oil of the palma Christi, or with the fat of the kirsh (white shark? *Squalus Carcharias*). . . . The sails of these *jel-behs* are of mats made of the *dóm*-palm." The fleets appear to have sailed about the autumnal equinox, and returned in December or the middle of January. The Red Sea, as it possessed for many centuries the most important sea-trade of the East, contained ports of celebrity. Of these, Elath and Ezion-geber alone appear to be mentioned in the Bible. The Heroöpolite Gulf (Gulf of Suez) is of the chief interest: it was near to Goshen; it was the scene of the passage of the Red Sea; and it was the "tongue of the Egyptian Sea." It was also the seat of the Egyptian trade in this sea and to the Indian Ocean. Heroöpolis is doubtless the same as Hero, and its site is probably identified with the modern *Abou Kenkeyd*, at the head of the old gulf. (RAMSES.) Suez is a poor town, and has only an unsafe anchorage, with very shoal water. On the shore of the Heroöpolite gulf was also Arsinoë, founded by Ptolemy Philadelphus: its site has not been settled. Berenice, founded by the same, on the southern frontier of Egypt, rose to importance under the Ptolemies and the Romans: it is now of no note. On the western coast was also the anchorage of Myos Hormos, a little N. of the modern town *Ez-Kuseyr*, which now forms the point of communication with the old route to Coptos. On the Arabian coast the principal ports are *Mu'ayleh*, *Yembo'* (the port of Medina), *Juddah* (the port of Mecca), and *Mukhá*, by us commonly written Mocha. The commerce of the Red Sea was, in very ancient times, unquestionably great. The earliest records tell of the ships of the Egyptians, the Phenicians, and the Arabs. (ALEXANDRIA; ARABIA; EGYPT; PHENICIA.) But the shoaling of the head of the gulf rendered the navigation, always dangerous, more difficult; it destroyed the former anchorages, and made it necessary to carry merchandise across the desert to the Nile. This change appears to have been one of the main causes of the decay of the commerce of Egypt. Since the time of Mohammed the Red Sea trade has been insignificant.

**Red Sea, Passage of the.** The passage of the Red Sea was the crisis of the Exodus. (EXODUS, THE.) It was the miracle by which the Israelites left Egypt and were delivered from the oppressor. (PHARAOH 4.) The points that arise are the place of the passage, the narrative, and the importance of the event in Biblical history. 1. It is usual to suppose that the most northern place at which the RED SEA could have been crossed is the present head of the Gulf of Suez. An examination of the country N. of Suez has shown, however, that the sea has receded many miles (so Mr. R. S. Poole, original author of this article). The old bed is indicated by the *Birket el-Timadh* (Lake of the Crocodile), and the most southern Bitter Lakes, the northernmost part of the former probably corresponding to the head of the gulf at the time of the Exodus.—It is necessary to endeavor to ascertain the route of the Israelites before we attempt to discover where they crossed the sea. The point from which they started was RAMSES, a place certainly in the land of GOSHEN, which we identify

with the *Wādī-t-Tumeylūt* (see maps under Egypt and Exodus, THE). After the mention that the people journeyed from Rameses to Succoth, and before that of their departure from Succoth, a passage occurs which appears to show the first direction of the journey, and not a change in the route: "God led them not [by] the way of the land of the Philistines, although that [was] near; . . . but God caused the people to turn [by] the way of the wilderness of the Red Sea" (Ex. xiii. 17, 18). At the end of the second day's journey the camping-place was at ETHAM "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6). Here the *Wādī-t-Tumeylūt* was probably left, as it is cultivable and terminates in the desert. After leaving this place the direction seems to have changed. The first passage relating to the journey, after the mention of the encamping at Etham, is a command given to Moses: "Speak unto the children of Israel, that they turn [or 'return'] and encamp [or 'that they encamp again'] before PI-HAHIROTH, between MIGDOL and the sea, over against BAAL-ZEPHON" (Ex. xiv. 2). This explanation is added: "And Pharaoh will say of the children of Israel, They [are] entangled in the land, the wilderness hath shut them in" (3). The rendering of the A. V., "that they turn and encamp," seems the most probable of those given. At the end of the third day's march, for each camping-place seems to mark the close of a day's journey, the Israelites encamped by the sea. The place of this last encampment, and that of the passage, if Mr. Poole's views as to the most probable route are correct, would not be very far from the Persepolitan monument, about thirty miles N. of the present head of the Gulf of Suez. Local tradition favors the common opinion that the Israelites passed near the present head of the gulf; but local tradition in Egypt and the neighboring countries, judging from the evidence of history, is of very little value. The Moslems suppose the Pharaoh of the Exodus resided at MEMPHIS. From opposite Memphis a broad valley leads to the Red Sea. It is in part called the *Wādī-t-Teh* = *Valley of the Wandering*. From it the traveller reaches the sea beneath the lofty *Gebel-et-Tukah*, which rises on the N. and shuts off all escape in that direction, except by a narrow way along the seashore, which Pharaoh might have occupied. The sea here is broad and deep, as the narrative is generally held to imply. All the local features seem suited for a great event. The supposition that the Israelites took an upper route, now that of the Mecca caravan, along the desert to the N. of the elevated tract between Cairo and Suez, must be mentioned, although it is less probable than that just noticed, and offers the same difficulties. It is, however, possible to suppose that the Israelites crossed the sea near Suez without attaining it through the *Wādī-t-Teh*. If they went through the *Wādī-t-Tumeylūt* they might have turned southward from its E. end, and so reached the neighborhood of Suez; but this would make the third day's journey more than thirty miles at least. Mr. Poole therefore thinks that the only opinion warranted by the narrative is that already stated, which supposes the passage of the sea to have taken place near the northernmost part of its ancient extension.—The last camping-place was before PI-HAHIROTH. It appears that MIGDOL was behind PI-hahiroth, and, on the other hand, BAAL-ZEPHON and the sea. From PI-hahiroth the Israelites crossed the sea. The only points bearing on geography in the account of this event are (a.) that the sea was divided by an E. wind, whence we may

reasonably infer that it was crossed from W. to E., and (b.) that the whole Egyptian army perished, which shows that it must have been some miles broad, probably at least twelve miles. 2. A careful examination of the narrative of the passage of the Red Sea is necessary to a right understanding of the event. When the Israelites had departed, Pharaoh repented that he had let them go. Mr. Poole supposes he started from ZOAN to pursue them. The strength of Pharaoh's army is not further specified than by the statement that "he took six hundred chosen chariots, and [or 'even'] all the chariots of Egypt, and captains over every one of them" (xvi. 7; CHARIOT). With this army, which, even if a small one, was mighty in comparison to the Israelite multitude, encumbered with women, children, and cattle, Pharaoh overtook the people "encamping by the sea" (9). When the Israelites saw the oppressor's army they were terrified and murmured against Moses (11, 12). Then Moses encouraged them, bidding them see how God would save them. It seems from the narrative that Moses did not know at this time how the people would be saved, and spoke only from a heart full of faith, for we read, "And the LORD said unto Moses, Wherefore criest thou unto Me? speak unto the children of Israel, that they go forward: but lift thou up thy rod, and stretch out thine hand over the sea, and divide it: and the children of Israel shall go on dry [ground] through the midst of the sea" (15, 16). That night the two armies, the fugitives and the pursuers, were encamped near together. Between them was "the pillar of the cloud," darkness to the Egyptians and a light to the Israelites. Perhaps in the camp of Israel the sounds of the hostile camp might be heard on the one hand, and on the other the roaring of the sea. But the pillar was a barrier and a sign of deliverance. The time was now come for the great decisive miracle of the Exodus. "And Moses stretched out his hand over the sea: and the LORD caused the sea to go [back] by a strong east wind all that night, and made the sea dry [land], and the waters were divided. And the children of Israel went through the midst of the sea upon the dry [ground]: and the waters [were] a wall unto them on their right hand, and on their left" (21, 22, compare 29). The narrative distinctly states that a path was made through the sea, and that the waters were a wall on either hand. The term "wall" does not appear to oblige us to suppose, as many have done, that the sea stood up like a cliff on either side, but should rather be considered to mean a barrier, as the former idea implies a seemingly-needless addition to the miracle, while the latter seems to be not discordant with the language of the narrative. It was during the night that the Israelites crossed, and the Egyptians followed. In the morning watch, the last third or fourth of the night, or the period before sunrise, Pharaoh's army was in full pursuit in the divided sea, and was there miraculously troubled, so that the Egyptians sought to flee (23-25). Then was Moses commanded again to stretch out his hand, and the sea returned to its strength, and overwhelmed the Egyptians, of whom not one remained alive (26-28). From Ps. lxxvii. 15-20 we learn that at the time of the passage of the sea there was a storm of rain with thunder and lightning, perhaps accompanied by an earthquake. 3. The importance of this event in Biblical history is shown by the manner in which it is spoken of in the books of the O. T. written in later times (Job xxvi. 10-13). In them it is the chief fact of Jewish history.—It may be inquired how it is that

there seems to have been no record or tradition of this miracle among the Egyptians. This question involves that of the time in Egyptian history to which this event should be assigned. The date of the Exodus according to different chronologers varies more than three hundred years; the dates of the Egyptian dynasties ruling during this period of three hundred years vary full one hundred. If the lowest date of the beginning of the eighteenth dynasty be taken and the highest date of the Exodus, both which Mr. Poole considers the most probable of those which have been conjectured in the two cases, the Israelites must have left Egypt in a period of which monuments or other records are almost wanting. CHRONOLOGY; MIRACLES; MOSES.

**Reed.** Under this name may be noticed several Hebrew and Greek words:—1. Heb. *aymôn* occurs in Job xl. 26 (A. V. xli. 2, "hook"), xli. 12 (A. V. xli. 20, "caldron"); Is. ix. 14 (A. V. "rush"). It is mentioned also as an Egyptian plant (A. V. "rush") in Is. xix. 15; while from lviii. 5 (A. V. "bulrush") we learn that it had a pendulous panicle. There can be no doubt that it denotes some aquatic reed-like plant, whether of the Natural order *Cyperaceæ* (*Sedges*), or that of *Gramineæ* (*Grasses*). Celsius has argued in favor of the *Arundo phragmitis*; Mr. Houghton is inclined to adopt his opinion. This is a stout grass-like reed, often an inch in diameter at the base, six to twelve feet high, found in both continents in swamps and about ponds and streams, sometimes used for thatching, fencing gardens, &c., and, when split, for making strings, mats, &c. The *Arundo phragmitis* (now the *Phragmites communis*), if it does not occur in Palestine and Egypt, is represented by a very closely allied species, viz. the *Arundo iniaea* of Delisle. The drooping panicle of flowers of this plant will answer well to the "bowing down the head" of which Isaiah speaks. The kindred *agdm* (POND; POOL) is once translated "reed" (Jer. li. 32) by the A. V., Gesenius, &c.—2. Heb. *gômē*, in A. V. "rush" (Job viii. 11; Is. xxxv. 7) and "bulrush" (Ex. ii. 3; Is. xviii. 2), without doubt denotes the celebrated paper-reed of the ancients (*Papyrus Antiquorum*), a plant of the Sedge family (*Cyperaceæ*), formerly common in some parts of Egypt. According to Bruce the modern Abyssinians use boats made of the papyrus reed. (Egyrpt, pp. 254-5.) The ancient material called "papyrus," used for writing, was made from the soft cellular portion of the stem, cut lengthwise into thin slices, which were placed in two layers, one across the other, glued together, pressed and dried. The lower part of the papyrus reed was used as food by the ancient Egyptians. The papyrus reed is not now found in Egypt; it grows, however, in Syria. Mr. Tristram found it growing luxuriantly, with a stem sixteen feet long and three inches in diameter, in a marsh near *Khan Minch* on the edge of the Lake of Tiberias (GENNESARET), and forming "an impenetrable wilderness" in the marsh of the *Hûleh*, ancient "waters of MEROM" (Trm. 436, 587). The papyrus-plant (*Papyrus Antiquorum*) has an angular stem from three to six feet or more in height; it has no leaves; the flowers are in very small spikelets, which grow on thread-like flowering branchlets which form a bushy crown to each stem.—3. Heb. pl. *'arôth* is erroneously translated "PAPER-REED" in Is. xix. 7.—4. Heb. *kâneh* = a reed of any kind; it occurs in numerous passages of the O. T., and sometimes denotes the "stalk" of wheat (Gen. xli. 5, 22), or the "branches" of the candlestick (Ex. xxv., xxxvii.); in Job xxxi. 22, it

denotes "the bone" of the arm between the elbow and the shoulder; in Ez. xl.-xlii. it denotes a measuring "reed" of six cubits. It is translated "reed"

Papyrus plant or Paper-reed (*Papyrus Antiquorum*).

in 1 K. xiv. 15; 2 K. xviii. 21; Job xl. 21; Ps. lxviii. 30 marg. (Heb. 31); Is. xix. 6, xxxv. 7, xxxvi.

Reed (*Arundo Donax*).

6, xlii. 3; Ez. xxix. 6: "calamus" in Ex. xxx. 23; Cant. iv. 14; Ez. xxvii. 19: "sweet cane" in Is.

xlili. 24, and Jer. vi. 20: "BALANCE" in Is. xli. 6. Strand (*Flor. Palæst.* 28-30) gives the following names of the reed-plants of Palestine:—*Saccharum officinale* (sugar-cane; see below), *Cyperus Papyrus* (*Papyrus Antiquorum*), *Cyperus rotundus* and *Cyperus exculentus*, and *Arundo scriptoria*; but no doubt the species are numerous. The *Arundo Donax*, the *Arundo Egyptiaca* (?) of Bové, is common on the banks of the Nile, and may perhaps be "the staff of the bruised reed" to which Sennacherib compared the power of Egypt (2 K. xviii. 21; Ez. xxix. 8, 7). The thick stem of this reed may have been used as walking-staves by the ancient Orientals; perhaps the measuring-reed was this plant; at present the dry culms of this huge grass are in much demand for fishing-rods, &c. Some kind of fragrant reed is denoted by *kāneh* in Is. xliii. 24; Ez. xxvii. 19; Cant. iv. 14; or more fully by *kāneh bōsem* (literally *cane of fragrance* or *of spice*) in Ex. xxx. 23, or *kāneh hattōb* (i. e. *good* [or *fragrant*] *cane*, Jer. vi. 20); which the A. V. renders "sweet cane," and "calamus." It was of foreign importation (Jer. vi. 20). Some writers have sought to identify the *kāneh bōsem* with the *Acorus Calamus*, the *sweet sedge*, also called *sweet flag*, *sweet cane*, and *calamus*. Dr. Royle refers the *aromatic calamus* or *sweet cane* of Dioscorides to a species of *Andropogon*, which he calls *Andropogon calamus aromaticus*, a plant of remarkable fragrance, and a native of Central India. Still there is no necessity to refer the *kāneh bōsem* or *hattōb* to the *sweet cane* of Dioscorides; it may be represented by Dr. Royle's plant or by the *Andropogon Schœnanthus*, the *lemon-grass* of India and Arabia. Before the crusades, sugar-cane (*Saccha-*

Lemon-grass (*Andropogon Schœnanthus*).

*rum Officinatum* or *Saccharum officinale*) was cultivated in abundance on the plains of Jericho and on the Mediterranean coast around Tripolis and as far S. as Tyre. The remains of ancient sugar-mills are still seen W. of *Ain es-Sultān* (Rbn. i. 561-2; Thn. ii. 457; JERICHO).—5. Gr. *kalamos* is uniformly translated "reed" (Mat. xi. 7, xii. 20, xxvii. 29, 30, 48; Mk. xv. 19, 36; Lk. vii. 24; Rev. xi. 1, xxi. 15, 16);

except once (3 Jn. 13, A. V. "pen;" WRITING); in LXX. = No. 4 in Is. xliii. and Ez. xl. In Mat. xxvii. 48 and Mk. xv. 36 it denotes the *stalk* or *stem* of hyssop (so Robinson, Lange, Royle [in Kitto], Barnes; comp. Jn. xix. 29); in Rev. a *measuring-reed* or *rod*.

**Re-e-lal'ah** [-l'h'yah] (fr. Heb. = whom *Jehovah makes tremble*, i. e. who fears Jehovah, Ges.), one of the children of the province who went up with Zerubbabel (Ezr. ii. 2). In Neh. vii. 7 he is called RAAMIAH, and in 1 Esd. v. 8 REESAIAH.

**Re-e'll-us** (fr. Gr.) = BIGVAI in Ezr. ii. 2 (1 Esd. v. 8).

**Re-e-sai'as** (fr. Gr.) = REELIAH or RAAMIAH (1 Esd. v. 8).

**Re-finer** (Heb. *tsōrēph*, *mītsārēph*). The refiner's art was essential to the working of the precious metals. It consisted in the separation of the dross from the pure ore, which was effected by reducing the metal to a fluid state by the application of heat, and by the aid of solvents, such as alkali (Is. i. 25) or lead (Jer. vi. 29), which, amalgamating with the dross, permitted the extraction of the unadulterated metal. The instruments required by the refiner were a crucible or FURNACE, and a bellows or blow-pipe. He sat at his work (Mal. iii. 3), and could thus better watch the process, and let the metal run off at the proper moment. (HANDICRAFT; METALS; MINES.) The notices of refining are chiefly figurative, and describe moral refinement as the result of chastening (Is. i. 25; Zech. xiii. 9; Mal. iii. 2, 3).

**Refuge, Cit'y of.** CITY OF REFUGE.

**Re'gem** [g as in *gel*] (Heb. *friend*, sc. of God, Ges.), son of Jahdai, among Caleb's descendants (1 Chr. ii. 47).

**Re'gem-me'lech** [-lek] (Heb. *friend of the king*, Ges.). Sherezer and Regem-melech were sent on behalf of some of the Captivity to make inquiries at the Temple concerning fasting (Zech. vii. 2). The expression "the people of the land" (ver. 5) seems to indicate that those who sent to the Temple were not the captive Jews in Babylon, but those who had returned to their own country; hence in verse 2 "Bethel" (A. V. "house of God") is probably to be taken as the subject of the verb—"and Bethel, i. e. the inhabitants of Bethel, sent" (so Mr. Wright, with Henderson, &c.). Mr. Wright supposes Regem-melech (comp. 1 Chr. xxvii. 33) was probably an Assyrian title of office.

**\* Re-gen-er-a'tion** [-jen-] (fr. L. = *a being born again, new birth*), the A. V. translation of Gr. *palingenesis*, which occurs twice only in the N. T. (Mat. xix. 28; Tit. iii. 5). In Mat. i. c. the best interpreters connect the phrase "in the regeneration," not with the preceding words "followed me," but with the succeeding clauses, and consider "when the Son of Man shall sit in the throne of His glory" as explanatory of "in the regeneration." Robinson (*N. T. Lxx.*) makes the word here = *renovation, restoration, restitution*, from decay and ruin to a former state; and regards it as spoken of the complete external manifestation of the Messiah's kingdom when all things are to be delivered from their present corruption and restored to spiritual purity and splendor (comp. Acts iii. 21). In Tit. iii. 5 the word is used tropically in a moral or spiritual sense (comp. Jn. iii. 3 ff. "born again," &c.) to denote the beginning of a Christian life, which involves a change by grace from a carnal to a Christian state, from sinful to holy affections. DEATH; FAITH; LIFE; MESSIAH; SPIRIT, THE HOLY, &c.

\* **Region**, the A. V. translation of—1. Heb. *hebel*

or *chebel* (literally a *rope* or *cord*) in the phrase "the region of ARGOB" (Deut. iii. 4, 13; 1 K. iv. 13), once translated "the country of Argob" (Deut. iii. 14). In Zeph. ii. 5-7, the same Hebrew word is translated "coast," as applied to the region bordering on the Mediterranean Sea; also in Josh. xix. 29 in the phrase "from the coast to Achzib." The word is also translated "cord" (Josh. ii. 15; Eccl. xii. 6, &c.), "line" (2 Sam. viii. 2; Ps. xvi. 6, &c.), "rope" (1 K. xx. 31, 32, &c.), "lot" (Deut. xxxii. 9, &c.), "portion" (Josh. xvii. 5, 14, &c.), "band" (1's. cxix. 61), "company" (1 Sam. x. 5, 10), &c.—2. Heb. *nāphāh* (= *high place, height*, Ges.) in the phrase "the region of Dor" (1 K. iv. 11), elsewhere translated "the coast" (Josh. xii. 23), or "borders of Dor" (xi. 2).—3. Gr. *klima* = a *climate, clime, region*, Rbn. *N. T. Lex.* (2 Cor. xi. 10; Gal. i. 21), also translated in the plural "parts" (Rom. xv. 23).—4. Gr. *chōra* (Mat. iv. 16; Lk. iii. 1; Acts viii. 1, xiii. 49, xvi. 6), usually translated "country" (Mat. ii. 12, viii. 28, &c.), also "land" (Mk. i. 5, &c.), &c. See also the next article.

**Rēgion round 'a-bout'**, the (Gr. *hē perichōros*, in LXX. = *hac-Ciccar*; PLAIN 3). The Greek term in Mat. iii. 5 and Lk. iii. 3 (A. V. "country about") denotes the populous and flourishing region which contained JERICHO and its dependencies, in the Jordan valley, enclosed in the amphitheatre of the hills of *Quarantana*. It is also applied (so Mr. Grove) to the district of Gennesaret (Mat. xiv. 35 [A. V. "country round about"]; Mk. vi. 55; Lk. iv. 37 [A. V. "country round about"]; vii. 17).

**Re-ha-bi'ah** (fr. Heb. = whom *Jehovah enlarges*, i. e. makes free and happy, Ges.), only son of Eliezer, the son of Moses (1 Chr. xxiii. 17, xxiv. 21, xxvi. 25).

**Re'hob** (Heb. a *street, area, broad place*, Ges.). 1. Father of Hadadezer, king of Zobah, whom David smote at the Euphrates (2 Sam. viii. 3, 12).—2. A Levite, or family of Levites, who sealed the covenant with Nehemiah (Neh. x. 11).

**Re'hob** (see above). 1. The northern limit of the exploration of the spies (Num. xiii. 21). It is specified as being "as men come unto HAMATH," i. e. at the commencement of the territory of that name, by which in the early books of the Bible the great valley of Lebanon (CELOSRYIA; PLAIN 2; VALLEY 4), the *Buk'd'a* of the modern Arabs, seems to be roughly designated. This seems to fix the position of Rehob as not far from *Tell el-Kādy* and *Baniās*. Dr. Robinson proposes to identify Rehob and BETH-REHOB with *Humin*, Dr. W. M. Thomson with *Baniās*. Inasmuch, however, as Beth-rehob was "far from Zidon" (Judg. xviii. 28), it must be distinct from—2. A town of Asher, apparently near Zidon (Josh. xix. 28).—3. Asher contained another Rehob (xix. 30); but the situation of this, like the former, remains unknown. One of the two was allotted to the Gershonite Levites (xxi. 31; 1 Chr. vi. 75), and of one the Canaanites retained possession (Judg. i. 31).

**Re-ho-bo'am** (fr. Heb. = *he enlarges the people*, Ges.), son of SOLOMON, by the Ammonite princess Naamah (1 K. xiv. 21, 31), and his successor as king (xi. 43). From the earliest period of Jewish history we perceive symptoms that the confederation of the tribes was but imperfectly cemented. The powerful Ephraim could never brook a position of inferiority (Judg. viii. 1, xii. 1). When Solomon's strong hand was withdrawn the crisis came. Rehoboam selected Shechem as the place of his coronation, probably as a concession to the Ephraimites, and perhaps in deference to old and wise counsellors of his father,

whose advice he afterward unhappily rejected (1 K. xii. 1 ff.). The people demanded a remission of the severe burdens imposed by Solomon, and Rehoboam promised them an answer in three days, during which time he consulted first his father's counsellors, and then the young men "that were grown up with him, and which stood before him." Rejecting the advice of the elders to conciliate the people at the beginning of his reign, he returned as his reply the frantic bravado of his contemporaries: "My little finger shall be thicker than my father's loins. . . . I will add to your yoke; my father hath chastised you with whips, but I will chastise you with scorpions" (i. e. scourges furnished with sharp points, as Bishop Cotton, with Gesenius, &c., explains). Thereupon rose the formidable song of insurrection, heard once before when the tribes quarrelled after David's return from the war with Absalom. Rehoboam sent Adoram or ADONIRAM (iv. 6; 2 Sam. xx. 24) to reduce the rebels to reason, but he was stoned to death by them; whereupon the king and his attendants fled to Jerusalem. JEROBOAM, having at the invitation of his friends returned from Egypt and taken part with the Israelites in demanding a remission of burdens, was now summoned by them to be their king. 1 K. xii. 3 should be translated (according to Sebastian Schmidt, Keil, &c.) "and they sent and called him" (a continuation of the parenthesis in the latter part of verse 2), "that Jeroboam and all the congregation of Israel came, and spake unto Rehoboam," &c. This translation, which the Hebrew admits, removes the apparent contradiction between verse 3 and verse 20, which states that "when all Israel heard that Jeroboam was come again, they sent and called him unto the congregation and made him king." Bishop Cotton, however, supposes that ver. 3 has been interpolated. On Rehoboam's return to Jerusalem he assembled an army of 180,000 men from the two faithful tribes of Judah and Benjamin, in the hope of reconquering Israel. The expedition, however, was forbidden by the prophet Shemaiah (xii. 24): still during Rehoboam's lifetime peaceful relations between Israel and Judah were never restored (2 Chr. xii. 15; 1 K. xiv. 30). Rehoboam now occupied himself in strengthening the territories which remained to him, by building a number of fortresses (2 Chr. xi. 6-10). The pure worship of God was maintained in Judah. But Rehoboam did not check the introduction of heathen abominations into his capital: the lascivious worship of Ashtoreth was allowed to exist by the side of the true religion, "images" were set up, and the worst immoralities were tolerated (1 K. xiv. 22-24). These evils were punished and put down by the terrible calamity of an Egyptian invasion. In the fifth year of Rehoboam's reign the country was invaded by a host of Egyptians and other African nations under SHISHAK, numbering 1,200 chariots, 60,000 cavalry, and a miscellaneous multitude of infantry. The line of fortresses which protected Jerusalem to the W. and S. was forced, Jerusalem itself was taken, and Rehoboam had to purchase an ignominious peace by delivering up all the treasures with which Solomon had adorned the Temple and palace, including his golden shields, 200 of the larger, and 300 of the smaller size (x. 16, 17; ARMS, II. 5). After the Egyptians had retired, Rehoboam comforted himself by substituting shields of brass, which were solemnly borne before him in procession by the body-guard, as if nothing had been changed since his father's time. Shishak's success is commemorated by sculptures discovered by Champollion on the outside of the great temple at

Karnak, where among a long list of captured towns and provinces occurs the name *Melchi Judah* (kingdom of Judah). After this great humiliation the moral condition of Judah seems to have improved (2 Chr. xii. 12). He died B. C. 958, after a reign of seventeen years, having ascended the throne B. C. 975 at the age of forty-one (1 K. xiv. 21; 2 Chr. xii. 13). He had eighteen wives, sixteen concubines, twenty-eight sons, and sixty daughters. He wisely dispersed his sons in command of the new fortresses about the country. ISRAEL, KINGDOM OF; JUDAH, KINGDOM OF.

**Re-ho'both** (Heb. *wide places, streets*, Ges.; *wide places, spaces*, i. e. *extension*, Fü.), the third of the series of wells dug by Isaac (Gen. xxvi. 22). Isaac had left GERAR and its turbulent inhabitants before he dug this well. A *Wady Ruhaibeh*, containing the ruins of a town of the same name, with a large well, lies about twenty miles S. W. of Beer-sheba, and has been identified with Rehoboth by Williams, Stewart, Van de Velde, Bonar, Porter (in Kitto), Rowlands (in Fairbairn), though Dr. Robinson (and apparently Mr. Grove) thinks it too far S.

**Re-ho'both** (see above), the **Cit'y**; one of the four cities built by Asshur, or by Nimrod in Asshur (Gen. x. 11). Nothing certain is known of its position. Bunsen and Kalisch propose as the representative of Rehoboth a place called *Rahabeh-malik*, on the E. bank of the Euphrates, about twelve miles below the mouth of the *Khabûr*. Its distance from *Kalah-Sherghat* and *Nimrûd* (nearly 200 miles) is perhaps an obstacle to this identification. Sir H. Rawlinson suggests *Selemyah* near *Nimrûd*. (NINEVEH.) Jerome considers *Rehoboth-ir* (A. V. "the city Rehoboth") as referring to Nineveh, and as meaning "the streets of the city" (and so A. V. margin). See the next article.

**Re-ho'both** (see above) **by the Riv'er**, the city of Saul or Shaul, an early king of the Edomites (Gen. xxxvi. 37; 1 Chr. i. 48). The affix, "the river" (Heb. *nahâr*; RIVER 1), fixes the situation of Rehoboth as on the Euphrates. The name still remains attached to two spots on the Euphrates, each said to contain extensive ancient remains; one (with which Schultens, Bochart, Winer, Gesenius, &c., identify this Rehoboth), simply *Rahabeh*, on the right bank, eight miles below the junction of the *Khabûr*, and about three miles W. of the river; the other, four or five miles further down on the left bank. The latter is said to be called *Rahabeh-malik*, i. e. "royal," and is on this ground identified by the Jewish commentators with the city of Saul; but whether this is accurate, and whether that city, or either of the two sites just named, is also identical with Nimrod's "city Rehoboth" (see above), is not yet known.

**Re'hûm** (Heb. *compassionate*, Ges.). 1. One of the "children of the province" who went up from Babylon with Zerubbabel (Ezr. ii. 2); = **NEHUM**.—2. "Rehum the chancellor," one of those who wrote to Artaxerxes to stop the rebuilding of the Temple (iv. 8, 9, 17, 23); perhaps a kind of lieutenant-governor of the province under the king of Persia, holding apparently the same office as **TATHAI**.—3. A Levite of the family of Bani, who assisted in rebuilding the walls of Jerusalem (Neh. iii. 17).—4. One of the chief of the people, who sealed the covenant with Nehemiah (x. 25).—5. A priestly family, or the head of a priestly house, who went up with Zerubbabel (xii. 3); = **HARIM** 3; perhaps = No. 1.

**Re'l** (Heb. *friendly, social*, Ges.), a person mentioned (1 K. i. 8 only) as having remained firm to

David's cause when Adonijah rebelled. Jerome makes him = "Hiram the Zairite," i. e. Ira the Jairite. Ewald suggests that Re'i = **RADDAI**.

**Re'ins** (fr. L. *renes* = *kidneys*), the A. V. translation of—1. Heb. *el'dayôth*. In ancient physiology the kidneys were believed to be the seat of desire and longing, and were hence often coupled with the heart (Ps. vii. 9, xxvi. 2; Jer. xi. 20, xvii. 10, &c.).—2. Heb. *haldâsayim* or *chaldâsayim* once (Is. xi. 5), elsewhere translated "loins" (Gen. xxxv. 11; Job xxxviii. 3, &c.).—3. Gr. *nephros*, pl. *nephroi* (Rev. ii. 23); in LXX. = No. 1.

**Re'kem** (Heb. *variegation, flower-gardening*, Ges.; = **RAKEM**). 1. One of the five "kings" of Midian slain by the Israelites (Num. xxxi. 8; Josh. xiii. 21).—2. One of the four sons of Hebron; father of Shammai (1 Chr. ii. 43, 44).

**Re'kem** (see above), a city of Benjamin (Josh. xviii. 27); site unknown. May there not be (so Mr. Grove) a trace of the name in 'Ain Karim, the well-known spring W. of Jerusalem?

**Rem-a-l'ah** (fr. Heb. = whom *Jehovah decks*, Ges.), father of PEKAM, king of Israel (2 K. xv. 25-37, xvi. 1, 5; 2 Chr. xxviii. 6; Is. vii. 1-9, viii. 6).

**Re'meth** (Heb. *height*, Ges.), a city of Issachar (Josh. xix. 21); perhaps = the RAMOTH of 1 Chr. vi. 73. Porter (in Kitto) suggests its identity with *W'zâr*, a small village on a rocky summit about five miles N. of *Jenin* (En-gannim).

**Rem'mon** (L. fr. Heb.) = **RIMMON**, a city of Simeon (Josh. xix. 7).

**Rem'mon-me-tho'ar** (fr. Heb. *Rimmôn ham-methôar*, see below), a place on the eastern boundary of Zebulun (Josh. xix. 18 only). Methoar does not really form a part of the name; but (being a participle = *stretching, extending*, Ges.) should be translated (as in the margin of the A. V.)—"Rimmon which reaches to Neah" (so Mr. Grove, with Gesenius, Fürst, Rashi, &c.). This Rimmon, Parchi says, is called Rumaneh, and stands an hour S. of Sepphoris. If for S. we read N., this is in close agreement with the statements of Robinson and Van de Velde, who place *Rumânêh* on the southern border of the Plain of *Buttauf*, three miles N. N. E. of *S'fûrîsh*. It is difficult, however, to see how this can have been on the eastern boundary of Zebulun. **RIMMON** 2.

**Rem'phan** (fr. Gr.) (Acts vii. 43) and **Ch'i'un** [ki-] (fr. Heb.) (Am. v. 26) have been supposed to be names of an idol worshipped by the Israelites in the wilderness, but seem to be the names of two idols. Much difficulty has been occasioned by this corresponding occurrence of two names so wholly different in sound. The most reasonable opinion seemed to be that Chiun was a Hebrew or Shemitic name, and Remphan an Egyptian equivalent substituted by the LXX. The former, rendered Saturn in the Syr., was compared with the Ar. and Pers. *kairân* = the planet Saturn. Egyptology has, however, shown that this is not the true explanation (so Mr. R. S. Poole, original author of this article). Among the foreign divinities worshipped in Egypt, two, the god *Rempu*, perhaps pronounced *Rempu*, and the goddess *Ken*, occur together. Besides those divinities represented on the monuments of Egypt which have Egyptian forms or names, or both, others have foreign forms or names, or both. Of the latter, some appear to have been introduced at a very remote age. The foreign divinities that seem to be of later introduction are *Rempu*, and the goddesses *Ken*, *Anta*, and *Astarta*. The first and second of these have foreign forms; the third and

fourth have Egyptian forms: there would therefore seem to be an especially foreign character about the former two. *Rempu*, pronounced *Rempu* (?), is represented as an Asiatic, with the full beard and apparently the general type of face given on the monuments to most nations E. of Egypt, and to the *Rebu* or Libyans. This type is evidently that of the Shemites. His hair is bound with a fillet, which is ornamented in front with the head of an antelope. *Ken* is represented perfectly naked, holding in both hands corn, and standing upon a lion. She is also called *Kelesh*. *Anata* appears to be Anaitis. *Astarta* is of course the Ashtoreth of Canaan. The names of these divinities occur as early as the period of the eighteenth and nineteenth dynasties, and it is therefore not improbable that they were introduced by the Shepherds. *Rempu* and *Ken* occur together, and *Ken* is a form of the Syrian goddess, and also bears some relation to the Egyptian god of productiveness, *Khem*. Their similarity to Baal and Ashtoreth seems strong. The naked goddess *Ken* would suggest such worship as that of the Babylonian Mylitta, but the thoroughly Shemite appearance of *Rempu* is rather in favor of an Arab source. The mention of *Chiun* or *Remphan* as worshipped in the desert shows that this idolatry was, in part at least, that of foreigners, and no doubt of those settled in Lower Egypt.—We can now endeavor to explain the passages in which *Chiun* and *Remphan* occur. The Masoretic text of Am. v. 26 reads thus:—"But ye bear the tent [or 'tabernacle'] of your king ('Moloch,' A. V.) and *Chiun* your images, the star of your gods [or 'your god'], which ye made for yourselves." The Vulgate agrees with the Masoretic text in the order of the clauses, though omitting *Chiun* or *Remphan*. The passage is cited in the Acts almost in the words of the LXX.: "Yea, ye took up the tabernacle of Moloch, and the star of your god *Remphan* ('Rhaiphan,' LXX.), figures which ye made to worship them" ("your images which ye made for yourselves," LXX.). A slight change in the Hebrew would enable us to read Moloch (Malcam or Milcom) instead of "your king." Beyond this it is extremely difficult to explain the differences. The tent or tabernacle of Moloch is supposed by Gesenius to have been an actual tent, and he compares the sacred tent of the Carthaginians. But there is some difficulty in the idea that the Israelites carried about so large an object for the purpose of idolatry, and it seems more likely that it was a small model of a larger tent or shrine. The reading Moloch appears preferable to "your king." There is reason for supposing that Moloch was a name of the planet Saturn, and that this planet was evidently supposed by the ancient translators to be intended for *Chiun* and *Remphan*. The correspondence of *Remphan* or *Rhaiphan* to *Chiun* is extremely remarkable, and can, we think, only be accounted for by the supposition that the LXX. translator or translators of the prophet had Egyptian knowledge, and being thus

<sup>1</sup> Gesenius (*Hebrew Lexicon*, translated by Robinson, 1854) interprets Am. v. 26 thus:—"Ye bore the tabernacle of your king (idol), and the statue (or statues) of your idols, the star of your god which ye made to yourselves." According to this interpretation, the name of the idol so worshipped by the Israelites is not given; and it can only be inferred from the mention of a star, that some planet is to be understood, which Jerome conjectures to have been Lucifer or Venus. The LXX. held *Chiun* to be the proper name of an idol; although changing  $\zeta$  (c or ch) into  $\rho$  (r or rh) they write it corruptly *Rhaiphan*. *Rhephan*, which by the further corruption of transcribers became *Rhemphan*, *Rhempha*.

acquainted with the ancient joint worship of *Ken* and *Rempu*, substituted the latter for the former, as they may have been unwilling to repeat the name of a foreign Venus. From the manner in which it is mentioned we may conjecture that the star of *Remphan* was of the same character as the tabernacle of Moloch, an object connected with false worship rather than an image of a false god. IDOL; IDOLATRY.

\* **Reud'ing, Rent.** DRESS; MOURNING.

\* **Re-pent, to**, the A. V. translation of—1. Heb. *niham* or *nicham*, and *hithnahem* or *hithnachem* = (so Gesenius) *to lament, to grieve*—(a) in regard to others, hence *to pity, to have compassion*; (b) in regard to one's own doings, hence *to repent*; often of one who *repents, grieves*, for the evil he has brought on another (Ex. xiii. 17; Judg. xxi. 16; Job xlii. 6; Jer. viii. 6, &c.). God is often said "to repent," i. e. to be grieved on account of the misconduct, sufferings, &c., of men, in view of which He may be moved to take a different course from what He has pursued or would otherwise pursue (Gen. vi. 6, 7; 1 Sam. xv. 11, 35; Jer. xviii. 8, 10, &c.; PRAYER); but He does not so grieve over His own course as to condemn Himself for the past or change for the future what He has fully resolved to do or bring to pass (Num. xxiii. 19; 1 Sam. xv. 29; Ps. cx. 4).—2. Heb. *shub* thrice (1 K. viii. 47; Ez. xiv. 6, xviii. 30); usually and literally translated "to turn" (Josh. xix. 12, 27, 29 twice, 34, &c.), "turn away" (Num. xiv. 43, xxxii. 15, &c.), "turn back" (2 K. i. 5; Jer. xi. 10, &c.), and especially "return" (Gen. iii. 19, xviii. 33, xxxi. 3, 13, &c.).—3. Gr. *metamelomai*, properly (so Rbn. N. T. Lxx.) *to transfer or change one's care*, hence *to change one's mind or purpose*, after having done any thing (Mat. xxi. 29, 32; Heb. vii. 21 = Ps. cx. 4 in No. 1), especially with the idea of regret, sorrow, remorse (Mat. xxvii. 3; 2 Cor. vii. 8 twice). (REPENTANCE 3.)—4. Gr. *metanoëō*, properly (so Rbn. N. T. Lxx.) *to perceive afterward, to have an afterview*, hence *to change one's view, mind, or purpose*, implying (in the N. T.) regret, sorrow, remorse (Lk. xvii. 3, 4; 2 Cor. xii. 21); in a religious sense, implying sorrow for unbelief and sin, and the turning from them to God and the Gospel of Christ (Mat. iii. 2, iv. 17, xi. 20, and about twenty other passages); sometimes spoken of as attended with the external acts of sorrow or MOURNING which are characteristic of the East (Mat. xi. 21, xii. 41; Lk. x. 13, xi. 32; compare Jon. iii. 5-10). REPENTANCE; REPENTINGS.

\* **Re-pent'ance**, the A. V. translation of—1. Heb. *nôham* or *nôcham* (Hos. xiii. 14 only; compare REPENT 1).—2. Gr. *metanoia* = (so Rbn. N. T. Lxx.) *change of mind or purpose, repentance*, used in a general sense once (Heb. xii. 17, A. V. "he found no place of repentance," i. e. in Isaac, compare Gen. xxvii. 34 ff.); elsewhere in a religious sense = *repentance, penitence*, implying sorrow for unbelief and sin, and a turning from them to God and the Gospel of Christ (Mat. iii. 8, 11, ix. 13, and twenty other passages in N. T.).—3. Gr. adj. *ametamelētos* (in part) once. This word (= *not to be repented of, unchangeable*, Rbn. N. T. Lxx.; compare REPENT 3) occurs twice only in the N. T. (Rom. xi. 29, A. V. "without repentance," i. e. on God's part; 2 Cor. vii. 10, A. V. "not to be repented of," i. e. on the Christian's part). FAITH; LIFE; LOVE; REGENERATION; REPENT, TO; SAVIOUR; SPIRIT, THE HOLY, &c.

\* **Re-pent'ings**, the A. V. translation of Heb. pl. *ne'ûnim* or *ne'chûnim* once (Hos. xi. 8). The He-

brew word here = *feelings of compassion*, Targum, Ges., Fū., Henderson, &c. Compare REPERT 1.

**Repha-el**, or **Reph'a-el** (Heb. whom *God heals*, Ges.; = RAPHAEL), a Levite porter, son of She-maiah, the firstborn of Obed-edom (1 Chr. xxvi. 7).

**Rephah** (Heb. *riches*, Ges.), son of Ephraim, and ancestor of Joshua (1 Chr. vii. 25).

**Re-phai'ah** [-fa'yah], or **Reph-a-i'ah** (Heb. whom *Jehovah healed*, Ges.). 1. The sons of Rephaiah appear among the descendants of Zerubbabel in 1 Chr. iii. 21.—2. A Simeonite chieftain (iv. 42).—3. Son of Tola, the son of Issachar (vii. 2).—4. Son of Binea, and descendant of Saul (ix. 43); = RAPHA 3.—5. Son of Hur, and ruler of "the half-PART" of Jerusalem (Neh. iii. 9), who aided in repairing the wall.

**Reph'a-im**, **Reph'a-ims** (Heb. plural *rephaim*). GIANTS 3.
